Interior design is a service profession. The interior designer makes living and working environments attractive and functional by considering the purpose of a space and the needs of its occupants.

Interior Design is a challenging field requiring organizational skills, attention to detail, artistic talents and the ability to visualize spatial relationships.

Typically, the designer prepares or supervises the preparation of sketches and detailed plans for the finished interior. This includes the selection of floor and wall coverings, furniture and appropriate equipment and accessories. Building, life safety codes, the ADA and barrier-free designs are also incorporated.

Designers may work as a member of a design firm team or as a private consultant.

Career Opportunities

Interior design work may be performed in a variety of environments, including residential design, kitchen and bath, commercial, health care, retail, hospitality, facility management, institutional, education, product design, universal design, and historic preservation.
