The Natural Resource Program offers an AS Degree and a certificate in Natural Resources. Natural Resources Management is broadly defined as the art, science and business of managing, conserving and preserving non-renewable and renewable natural resources such as air, water, land and their biological resources for the benefit of present and future generations.

Today’s natural resource technicians and professionals need a strong foundation in ecological and natural resource science as well as specific technical skills related to natural resource management. The Natural Resource curriculum provides this broad foundation for a wide range of career choices. The AS Degree and the certificate are designed to train graduates for direct entry into jobs involving extensive fieldwork with State, Federal or Local Agencies as well as the private sector. Students completing the AS Degree can choose to continue their education towards degrees in wildlife biology, forestry, natural resource management or related disciplines.

The Natural Resources 20 unit Core Requirement serves both the degree major and certificate program. The degree major has an additional 18-21 unit concentration requirement in such areas as biological science, physical science, technical writing, statistics and computer information science.

The Natural Resources Department additionally offers the general education student coursework that prepares them for a greater appreciation and understanding of our natural resources and current human threats to those resources.

**Career Opportunities**

There are entry-level technician and professional opportunities with private lumber and resource managing companies; city, state and national park systems and other state and federal resource agencies such as The California Department of Fish and Game, The California Department of Forestry and Fire Protection, the United States Forest Service, United States Fish and Wildlife Service, and the United States Bureau of Reclamation.

---

**Requirements for Degree Major:** 38-41 units

**General Education Graduation Requirements:**

Students must also complete the general education graduation requirements for an A.S. degree. See graduation requirements.

Most Natural Resource courses are accepted for credit at CSU and several are accepted for credit at UC. The Natural Resource core courses 300, 302, 304, 320 satisfy the AA/AS area 3A Natural Science Requirement.
NATR 294  Topics in Natural Resources  5-5 Units
Formerly: NATR 93
Prerequisite: To be determined for each topic.
Advisory: ENGRD 116 or ESLR 320.
Course Not Transferable UC or CSU
Hours: 9-90 hours LEC and/or 27-270 hours LAB
Topics in natural resources management will be examined through various
course offerings designed to cover field study activities and subjects relevant
to natural resources and forestry not covered by regular catalog offerings. Topics
and field study locations vary. Course content and unit credit to be determined
by instructional area. Course topics may include advanced subjects related to
wildlife, fisheries, conservation biology, forest resources and management,
restoration ecology or aquatic ecology. Field trips required. This course may
be taken four times.

NATR 300  Introduction to Natural Resource Management  3 Units
Formerly: NATR 1
Prerequisite: None
Course Transferable to UC/CSU
Hours: 54 hours LEC
This course is an overview of ecosystems and natural resource management.
It considers non-renewable and renewable natural resources such as water,
land, soils, air, wildlife and their vegetative communities. Additionally,
this course provides a greater appreciation and understanding of the field of natural
resource management, current human threats, and the protection and
maintenance of natural resource systems. Field trips are required. AA/AS area A.

NATR 302  Introduction to Wildlife Biology  3 Units
Formerly: NATR 3
Prerequisite: None
Course Transferable to CSU
Hours: 36 hours LEC, 54 hours LAB
This course is an introduction to Wildlife Biology and the basic principles
and techniques related to the practice of Wildlife Management. Emphasis is
based on ecological principles of populations and communities as they relate
to the interdependence of wildlife and human populations. This course
includes the discussion of the social, political and biological implications of
Wildlife Management. Additionally, this course includes habitat and
population sampling, radio telemetry and the development of a wildlife
management plan. Field trips are required. AA/AS area A.

NATR 304  Introduction to Forestry  3 Units
Formerly: NATR 5
Prerequisite: None
Course Transferable to UC/CSU
Hours: 54 hours LEC
This course covers basic biological and physical science concepts important to
a general understanding in forestry. Topics include forest history, forests of the
United States, general tree taxonomy, forest ecology, soils, silvics, insects
and diseases of forest trees, role of fire in forest management, forest
measurements, multiple use management, forest issues and policies. Field
trips are required. AA/AS area 3A.

NATR 306  Introduction to Range Management  3 Units
Formerly: NATR 14
Prerequisite: None
Course Transferable to CSU
Hours: 36 hours LEC, 54 hours LAB
This course examines the historical developments of range management and
theory and application of grazing strategies. This course focuses on the effects
of grazing on range ecosystems, the taxonomy and physiology of range plants,
ruminant nutrition and physiology. In addition, sampling techniques of field
vegetation, the use of fire and other methods for range conversion and
maintenance are explored. Field trips are required.

NATR 310  Natural Resource Measurements  4 Units
Formerly: NATR 4
Prerequisite: None
Course Transferable to CSU
Hours: 36 hours LEC; 108 hours LAB
This course provides basic natural resource measurement and survey skills. Included
in this course are elementary surveying, public land survey, distance
and direction measurements, topographic map reading and stream flow
measurements. This course will also focus on forest sampling techniques such as
transects and quadrates. Also included are the fundamental wildlife sampling
techniques as well as Global Positioning Systems (GPS) and Geographic
Information Systems (GIS). Field trips are required.

NATR 311  Natural Resource Measurements-Land Surveying Methods  1 Unit
Formerly: NATR 4A
Prerequisite: None
Course Transferable to CSU
Hours: 9 hours LEC, 27 hours LAB
This course provides basic natural resource land survey skills. Included in this
course are elementary surveying, public land survey, distance and direction
measurements, and topographic map reading. Field trips are required.

NATR 312  Natural Resource Measurements-Field Methods and Study Design  1 Unit
Formerly: NATR 4B
Prerequisite: None
Course Transferable to CSU
Hours: 9 hours LEC, 27 hours LAB
This course provides basic statistics and study design as well as fundamental
wildlife sampling techniques and an introduction to field applications of Global
Positoning Systems (GPS) and Geographic Information Systems (GIS). Field
trips are required.

NATR 313  Natural Resource Measurements-Vegetation Analysis and Forest Sampling  1 Unit
Formerly: NATR 4C
Prerequisite: None
Course Transferable to CSU
Hours: 9 hours LEC, 27 hours LAB
This course provides basic forest and vegetation sampling skills. Included in
this are forest sampling techniques such as tree heights, diameters, volume,
and age. Vegetation sampling techniques such as quantitative and semi-
quantitative analysis, and single species surveys will be covered. Field trips are
required.

NATR 314  Natural Resource Measurements-Aquatic Resource Sampling  1 Unit
Formerly: NATR 4D
Prerequisite: None
Course Transferable to CSU
Hours: 9 hours LEC, 27 hours LAB
This course provides basic aquatic resource sampling skills. Included in this
course are stream flow measurements and water quality sampling. Sampling
techniques for fisheries and other aquatic organisms will also be addressed. Field
trips are required.

NATR 320  Principles of Ecology  3 Units
Formerly: NATR 2
Prerequisite: None
Course Transferable to UC/CSU
Hours: 36 hours LEC, 54 hours LAB
This course covers basic principles of ecology, including the physical and
biological factors of different environments in relation to the distribution of
plants and animals. Emphasis will be on the management of ecosystems using
ecological principles and the understanding of current ecological issues. Field
trips are required. AA/AS area A.
NATR 325  Black Bear Ecology and Management in California  1 Unit
Formerly: NATR 10
Prerequisite: None
Course Transferable to CSU
Hours: 15 hours LEC; 9 hours LAB
This course will explore the natural history, habitat and management of the Black Bear. Topics include the distribution, abundance, physiology, reproduction, behavior, and management of black bears. An exciting field trip into black bear country is required to allow students to identify bear sign and appreciate the natural habitat of this remarkable animal.

NATR 326  Analysis of a Predator-The Mountain Lion  1 Unit
Formerly: NATR 9
Prerequisite: None
Course Transferable to CSU
Hours: 15 hours LEC; 9 hours LAB
This course will explore the natural history and political history of the Mountain Lion. Topics include the distribution and abundance of mountain lions in California and throughout western North America; the important ecological role of this predator; problems associated with mountain lions, and the legal status of mountain lions in California. An exciting field trip into mountain lion country is required to allow students to identify lion sign and appreciate the natural habitat of this magnificent predator.

NATR 330  Identification of Native Trees and Shrubs  4 Units
Formerly: NATR 6
Prerequisite: None
Course Transferable to CSU
Hours: 54 hours LEC; 54 hours LAB
This course will focus on the identification of native trees and shrubs of California by means of plant keys. In addition, this course will also include sight identification of some grasses, and other herbaceous and wetland plants. The ecology of vegetative communities and the natural history of native plants will be explored. A collection of at least seventy-five plant specimens is required. Field trips are required.

NATR 332  Wildflowers of the Sacramento Region  4 Units
Formerly: NATR 8
Prerequisite: None
Course Transferable to UC/CSU
Hours: 54 hours LEC; 54 hours LAB
This course focuses on the wildflowers of the Sacramento Region. The identification, distribution, and interrelationships of herbaceous plants in their natural environment, ecological principles, and representative plant communities are examined. Special emphasis will be given to the study of plant families in our local grasslands, vernal pools, oak woodlands and foothills, and the use of taxonomic keys. AA/AS area A

NATR 340  John Muir “Conservationist”  2 Units
Formerly: NATR 7
Prerequisite: None
Course Transferable to CSU
Hours: 36 hours LEC
This course covers the life, writings and philosophy of one of the founders of the American Conservation Movement. This course focuses on John Muir’s significant contributions to the formation of the National Park System. This course is recommended to Elementary and Secondary Educators and those interested in natural resources, conservation and California history. Some class sessions will be held at the Muir National Historical Site in Martinez, the Muir Redwoods and Yosemite National Park. Field trips are required.

NATR 342  Forest Resource Protection  4 Units
Formerly: NATR 24
Prerequisite: None
Course Transferable to CSU
Hours: 54 hours LEC; 54 hours LAB
This course examines impacts to forest resources by destructive agents such as plant diseases, insects, fire, animals, and weather. Identification of causal agents and principles of forest protection are covered along with practical management concepts. Field trips are required.
