Computer Science Degree

This program is a comprehensive exposure to programming languages, algorithms and problem solving in preparation for upper division computer science courses. The Computer Science degree includes substantial course work in mathematics as is required by most university computer science programs.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

• Evaluate various programming language solutions to a proposed problem.
• Recommend tools and techniques for each step in the development of a computer program.
• Integrate the basic mathematical knowledge that is fundamental to Computer Science into the solutions of proposed problems.
• Evaluate the theories and core techniques of computer science using scientific methods.

Requirements for Degree

36 Units

CISP 300 Algorithm Design/Problem Solving ..................... 3
CISP 310 Assembly Language Programming for Microcomputers ....... 4
CISP 360 Introduction to Structured Programming .................... 4
CISP 400 Object Oriented Programming with C++ ..................... 4
CISP 430 Data Structures ............................................... 4
CISP 440 Discrete Structures for Computer Science ................... 3
CISP 453 Introduction to Systems Programming in UNIX ............ 4
MATH 400 Calculus I ....................................................... 5
MATH 401 Calculus II ....................................................... 5

Associate Degree Requirements: The Computer Science Associate in Science (A.S.) Degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

CIS: Computer Networking Management Degree

The Computer Networking Management degree covers network administration technologies, techniques, and the hardware and software used in today's business/enterprise networking environment. Major topics covered include installation, configuration, and troubleshooting of network operating systems. The degree stresses the knowledge and skills required for the day-to-day operation, business aspects, security and management of computer networks. This degree has three distinct concentrations with specific courses for each concentration track:

• Microsoft Windows networking concentration, focusing on preparing for the Microsoft Certified Systems Engineer (MCSE) and/or the Microsoft Certified Systems Administrator (MCSD) certification.
• Linux/Unix networking concentration, focusing on preparing for the administration of commercial Linux/Unix servers and network environments.
• Cisco router and network administration concentration, which covers all the objectives of the Cisco Certified Network Associate (CCNA) certification exam.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

• WINDOWS CONCENTRATION:
  • install, configure, monitor, manage, backup, and customize a Microsoft server.
  • design, construct and apply group policies and NTFS file system permissions to secure files and network resources.
  • design, construct and troubleshoot a Microsoft Active Directory network using Microsoft workstation and server operating systems.
• CISCO CONCENTRATION:
  • design, evaluate, construct and implement a routed IP network using industry standard routing protocols and routing equipment, in a wired or wireless configuration.
• design, evaluate, construct and implement a multilayer switching network using switching protocols, such as Ethernet, in a wired or wireless configuration.

• design, install and test Wide Area Network (WAN) connectivity solutions.

• design and evaluate basic security and access solutions in a switched or routed LAN or WAN.

• design, evaluate, specify, and install various types of network media.

• LINUX/UNIX CONCENTRATION:
  • install, configure, monitor, manage, backup, and customize a Linux server.
  
• design, evaluate and implement and troubleshoot typical Linux server services in the areas of user accounts and security, printing, web server, telnet server, firewall, email server, domain name service, dynamic host configuration protocol, network file system, and Microsoft Windows compatibility.

Career Opportunities

The Network Management degree is designed for career/technical students who plan to enter the work force as well as working IT professionals that wish to upgrade their skills. Typical careers a student could expect to pursue include network technical support staff, network administrators, network designers, network systems engineer, network troubleshooters, and information systems security specialists.

Core Requirements for Degree  14 Units

BUS 310 Business Communications (3) .................................3

or ENGW 300 College Composition (3)

CISA 315 Introduction to Electronic Spreadsheets ......................2

CISC 320 Operating Systems ..................................................1

CISC 322 Linux Operating System ...........................................1

CISC 350 Introduction to Data Communications ...............................1

CISC 361 Microcomputer Support Essentials - Preparation for A+ Certification ...........................................3

CISS 310 Network Security Fundamentals ....................................3

CISCO Concentration  33-34 Units

Core Requirements ........................................................................14

CISC 324 Intermediate Linux Operating System .........................1

CISN 110 Networking Technologies - Preparation for N+ Certification (2) ..................................................3

and CISN 111 Intermediate Networking Technologies - Preparation for N+ Certification (2)

or CISN 119 TCP/IP Protocols (3)

CISN 140 CISCO Networking Academy (CCNA): Data Communication and Networking Fundamentals ........3

CISN 141 CISCO Networking Academy (CCNA): Networking Theory and Routing Technologies .......................3

CISN 142 CISCO Networking Academy (CCNA): Advanced Routing and Switching ..................................3

CISN 143 CISCO Networking Academy (CCNA): Wide Area Network and Project-Based Learning ..................3

And a minimum of 3 units from the following: ...........................................3

CISP 453 Introduction to Systems Programming in UNIX (4)

CISS 325 Network Security and Firewalls (3)

LINUX Concentration  32 Units

Core Requirements ........................................................................14

CISC 324 Intermediate Linux Operating System .........................1

CISN 110 Networking Technologies - Preparation for N+ Certification ....2

CISN 111 Intermediate Networking Technologies - Preparation for N+ Certification ..................................2

CISN 119 TCP/IP Protocols .......................................................3

CISN 120 Beginning Network Administration with Linux ...............3

CISN 121 Network Administration with Linux: LAN Services ..........2

CISN 122 Network Administration with Linux: Internet Services ....2

And a minimum of 3 units from the following: ...........................................3

CISP 400 Object Oriented Programming with C++ (4)

CISP 453 Introduction to Systems Programming in UNIX (4)

CISS 342 Implementing Linux Operating System Security (3)

WINDOWS Concentration  33 Units

Core Requirements ........................................................................14

CISN 110 Networking Technologies - Preparation for N+ Certification ....2

CISN 111 Intermediate Networking Technologies - Preparation for N+ Certification ..................................2

CISN 300 Network Systems Administration ................................3

CISN 302 Intermediate Network Systems Administration ............3

CISN 307 Windows Active Directory Services ..............................3

CISN 308 Internetworking with TCP/IP (3) ........................................3

or CISN 119 TCP/IP Protocols (3)

And a minimum of 3 units from the following: ...........................................3

CISP 370 Beginning Visual Basic (4)

CISS 341 Implementing Windows Operating System Security (3)

Associate Degree Requirements: The CIS: Computer Networking Management Associate in Science (A.S.) Degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

CIS: Computer Networking Management Certificate

The CIS: Computer Networking Management certificate provides instruction for entry-level and IT professionals aiming for skill enhancement on the specific knowledge and skills required to master one of three industry standard network technologies:

• Microsoft Windows networking concentration, focusing on preparing for the Microsoft Certified Systems Engineer (MCSE) and/or the Microsoft Certified Systems Administrator (MCSA) certification.

• Linux/Unix networking concentration, focusing on preparing for the administration of commercial Linux/Unix servers and network environments.

• Cisco router and network administration concentration, which covers all the objectives of the Cisco Certified Network Associate (CCNA) certification exam.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

• demonstrate competency in basic Microsoft Windows and Linux operating system terminology, command line interface commands, account management, and file management and storage.

• define networking terminology, protocols, industry standard models, and best practices for configuring network operating system services.

• configure and implement basic data security methods for protecting servers, workstations and networks from unauthorized access.

• evaluate and demonstrate basic procedures for troubleshooting and replacing field replaceable components in microcomputers.

• implement, evaluate and troubleshoot a transmission control protocol/internet protocol (TCP/IP) addressing scheme.

• define, implement, evaluate and troubleshoot the most common utilities and protocols of the TCP/IP suite.
CISCO CONCENTRATION:
- design, evaluate, construct and implement a routed network using TCP/IP and industry standard routing protocols and state of the technology routing equipment, in a wired or wireless configuration.
- design, evaluate, construct and implement a multilayer switching network using switching protocols, such as Ethernet, in a wired or wireless configuration.
- design, install and test Wide Area Network (WAN) connectivity solutions.
- design and evaluate basic security and access solutions in a switched or routed LAN or WAN.
- evaluate, specify, and install various types of network media.

LINUX/UNIX CONCENTRATION:
- install, configure, monitor, manage, backup, and customize a Linux server.
- design, evaluate and implement and troubleshoot typical Linux server services in the areas of user accounts and security, printing, web server, telnet server, firewall, email server, domain name service, dynamic host configuration protocol, network file system, and Microsoft Windows compatibility.

WINDOWS CONCENTRATION:
- install, configure, monitor, manage, backup, and customize a Microsoft Windows server.
- design, construct and apply group policies and NTFS file system permissions to secure files and network resources.
- design, construct and troubleshoot a Microsoft Active Directory network using Microsoft workstation and server operating systems.

CIS: Computer Programming Degree

The computer programming degree includes general topics in programming as well as focused topics related to one commonly used programming language. General topics include the use of an operating system and systems analysis. Programming language specific topics include syntax, program structuring, language constructs and proper programming methods.

Student Learning Outcomes

Upon completion of this program, the student will be able to:
- Verify the syntactic correctness of a program.
- Verify the logical correctness of a program.
- Analyze the behavior of a program and locate defects.
- Develop programs using the top-down method.
- Apply structured programming techniques.
- Assess requirements of an information system.
- Develop specifications of an information system.
- Design an information system.
- Describe how programming relates to the development of an information system.

Career Opportunities

Upon completion of the computer programming degree, a student has the minimum qualifications as an entry-level programmer/developer.

CIS: Computer Programming Certificate
This certificate provides up-to-date and general knowledge in the field of computer programming, such as syntax, programming methodologies, and structured programming. It also includes topics relating to the work environment of a programmer. Such topics include operating systems and systems analysis.

Student Learning Outcomes
Upon completion of this program, the student will be able to:
• Apply techniques of structured programming.
• Design programs using object-oriented methodology.
• Analyze problems related to programming.
• Design algorithms to solve problems related to programming.
• Assess requirements of an information system as a whole.
• Compare alternative implementations of an information system using a variety of criteria.
• Develop specifications of an information system based on requirements.
• Describe how programming fits in the context of the development of an information system.

Career Opportunities
The programming certificate enables people who are already in information technology and computer fields to develop programs.

CIS: Database Management Degree
The CIS: Database Management degree focuses on relational database technology used in the business environment. The emphasis is on selecting the appropriate system platform for database deployment. Course work includes database system design and programming for desktop, enterprise and Internet platforms, structure query language (SQL) programming, introductory principles of modular programming, system design and problem solving, desktop operating systems, electronic spreadsheets and a variety of introductory business courses.

Student Learning Outcomes
Upon completion of this program, the student will be able to:
• describe relational database technologies for desktop, enterprise and Internet platforms.
• explain and discuss database theory and principles.
• employ relational database technologies for either desktop, enterprise and Internet platforms to solve common business problems using standard database principles and practices.
• assess and document information system requirements.
• employ modular programming concepts in program development.
• design and code elementary programs encountered in business and government.
• identify interactive web publishing situations requiring database solutions.
• create interactive web database.
• analyze practical business problems and utilize critical thinking in the determination of alternative solutions.
• apply communication theory, effective writing techniques, and interpersonal communication skills to business situations.
• analyze and explain the nature and purpose of accounting and its function in business.

CIS: Microcomputer Applications Degree

This associate degree program focuses on the use of the microcomputer and current, commonly used software to solve problems in a business environment. Course work includes microcomputer applications in database management, desktop publishing, electronic spreadsheets, presentation graphics, operating systems, word processing, at least one programming language, and a variety of business courses.

Student Learning Outcomes

Upon completion of this program, the student will be able to:
• Design and manage database tables, queries and forms.
• Produce reports for use in a typical business environment.
• Evaluate the basic computing needs of a business by developing associated documentation and presentations.
• Create spreadsheet formulas and manipulate business data.
• Compose and format typical business communications documents according to industry standards.
• Combine data from different software applications into one document.
• Compose simple computer programs using basic logic.
• Apply file management techniques in organizing computer data.

Taken on the Windows operating system.

CIS: PC Support Management Degree

The CIS: PC Support Management degree covers the use and maintenance of a microcomputer’s hardware, software and network connections in today’s business environment. Course work includes learning basic computer skills in configuration, use, and troubleshooting major hardware components, different operating systems, and applications in a standalone and network environment. Additionally, the degree introduces basic business and project management skills. This program covers all the objectives of the Computing Technology Industry Association (CompTIA) A+ certification exam.

Student Learning Outcomes

Upon completion of this program, the student will be able to:
• Identify the names, purpose, and characteristics of system components.
• Evaluate and demonstrate basic procedures for adding and removing field replaceable components for desktop computers.
• Analyze and demonstrate the installation and troubleshooting of current operating systems, applications and basic networking technology used in industry.
• Formulate back-up, recovery, and system protection plans for the operating system in a network environment.
• Develop proficiency in customer service skills to effectively diagnose and communicate microcomputer software and hardware-related problems and solutions at the user level.
• Demonstrate the techniques to manage a project, control costs, and schedule resources employing management software.
• Recognize within the information technology (IT) field the diverse business environment associated with support issues.
• Configure and implement data security methods for protecting computers and networks from unauthorized access.

Requirements for Degree 31 Units

CISC 323  Linux Operating System ................................................1
Taken on the Windows operating system.

Associate Degree Requirements: The CIS: PC Support Management Associate in Science (A.S.) Degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

CIS: PC Support Certificate

The CIS: PC Support certificate involves learning the use of a microcomputer’s hardware, software and networking used in today’s business environment. Course work includes basic computer skills in configuration, use, and troubleshooting major hardware components, different operating systems, and applications in a standalone and network environment. This program covers all the objectives of the Computer Technology Industry Associates (CompTIA) A+ certification exam.

Student Learning Outcomes

Upon completion of this program, the student will be able to:
• Identify and recognize the names, purpose, and characteristics of system components by sight or definition.
• Evaluate and demonstrate basic procedures for adding and removing field replaceable components for desktop computers.
• Analyze and demonstrate understanding for installation and troubleshooting current operating systems, applications and basic networking technology used in industry.
• Formulate back-up, recovery, and system protection plans for the operating system in a network environment.
• Develop proficiency in customer service skills to effectively diagnose and communicate microcomputer software and hardware-related problems and solutions at the user level.
• Configure and implement data security methods for protecting computers and networks from unauthorized access.

Requirements for Certificate 25 Units

BUS 310  Business Communications ..................................................3
CISC 310  Introduction to Computer Information Science .............3
CISC 320  Operating Systems .........................................................3
CISC 350  Introduction to Data Communications ............................1

Information Systems Security Degree

This program provides the information and skills necessary for network administration professionals to implement security from internal and external threats for an enterprise network. It covers client and server security on different operating systems, disaster recovery planning, and forensics. 

This program also provides preparation for several computer information security certification exams, including the Certified Information Systems Security Professional (CISSP) and the Certified Information Technology Professional (CIPT) exams and several of the Certified Information Systems Security Professional (CISSP) certification exams.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- Define best practices for configuring network operating system services to provide optimum security.
- Compare and contrast the benefits of firewalls vs. intrusion detection devices and software.
- Explain and configure a network firewall to provide optimum security from external threats and exploits.
- Analyze organizational needs and implement internal security policies for the enterprise.
- Evaluate and implement the required security programs and policies to protect the enterprise against viruses, Trojans, worms, rootkits, and spyware.
- Assess and configure secure data transfer protocols for internal and external needs, including IPSec and Virtual Private Network (VPN) tunneling protocols.
- Apply Windows group policy to secure the internal network and shared resources.
- Construct NTFS file system permissions and shares to allow only the minimum levels of access needed by users to use network resources.
- Prioritize and establish a disaster recovery plan for the enterprise.
- Construct and apply group policies and NTFS file system permissions to secure files and network resources.

Requirements for Certificate

The Information Systems Security Associate in Science (A.S.) Degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Information Systems Security Certificate

This program provides the information and skills necessary for network administrators to implement security to protect against internal and external threats to an enterprise network, and covers client and server security on different operating systems. 

This program provides preparation for several certification exams, including the Computer Technology Industry Association (CompTIA) Security+ exam, Microsoft Certified Systems Engineer (MCSE) exams and some of the Certified Information Systems Security Professional (CISSP) certification exams.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- Define best practices for configuring network operating system services to provide optimum security.
- Construct and apply secure group policy settings at the Organizational Unit (OU), domain, site or local machine level.
- Evaluate and implement the required security programs and policies for the enterprise.
- Prioritize and establish a disaster recovery plan for the enterprise.
- Compare and contrast the benefits of firewalls vs. intrusion detection devices and software.

Network Administration Essentials - Windows Certificate

This program provides the information and skills necessary for network administration professionals to administer a Windows Active Directory domain-based enterprise network. It also provides preparation for several Microsoft Certified Systems Engineer (MCSE) certification exams.

Student Learning Outcomes

Upon completion of this program, the student will be able to:
- Define best practices for configuring network operating system services.
- Construct and apply group policy settings at the Organizational Unit (OU), Domain, Site or local machine level.
- Apply Windows group policy and NTFS file system permissions to secure the workstations, the internal network and shared resources.

Web Developer Certificate

The web developer certificate offers a program of study for students seeking jobs in the fields of web based programming and web application development. The program provides students with the necessary skills and aptitudes for creating and maintaining interactive, database-driven, web applications.

Student Learning Outcomes

Upon completion of this program, the student will be able to:
- Research the differences in goals, techniques, and costs between traditional print publishing and web publishing.
- Create a functional web site using HyperText Markup Language (HTML) and Cascading Style Sheets (CSS).
• Incorporate dynamic and interactive features into a web site using client-side or server-side scripting.
• Evaluate web accessibility issues when designing web sites.
• Integrate graphic principles and programming functionality with a web application.
• Demonstrate basic use of both Linux and Windows Operating System commands.

Requirements for Certificate 19 Units

CISC 310 Introduction to Computer Information Science 3
CISC 320 Operating Systems 1
CISC 323 Linux Operating System 1
CISW 300 Web Publishing 3
CISW 350 Imaging for the Web 1
CISW 310 Advanced Web Publishing 4
or CISW 400 Client-side Web Scripting 4
or CISW 410 Middleware Web Scripting 4
or CISW 420 Server-side Web Scripting 4
And a minimum of 3 units from the following: 3
ARTNM 402 Intermediate Web Design (3)
CISW 355 Web Imaging Projects (2)
CISW 385 E-Commerce (3)
CISW 442 Web Publishing with XML (3)
ARTNM 410 Interactive Multimedia Projects (4)
or CISW 471 Interactive Multimedia Projects (4)
CISW 365 Interactive Multimedia Basics (3)
or ARTNM 404 Interactive Multimedia Basics (3)

Technical Communications Degree

The Technical Communications degree program is an interdisciplinary course of study designed to prepare students for employment as professional writers and communicators in a variety of media intended to instruct and inform audiences. The degree program includes substantial coursework in a variety of media intended to instruct and inform audiences.

Career Opportunities

Technical communicators may be employed in a variety of occupations in government, scientific firms, nonprofits, natural resources, finance, education, and high tech.

Student Learning Outcomes

Upon completion of this program, the student will be able to:
• analyze audience information needs and propose solutions to aid the audience.
• design technical communication solutions for a variety of industry and government purposes.
• design and create web sites and help systems with effective visual design, navigation, and written content.
• design and publish printed pages with effective design, organization, content, and indexing.
• compose professional prose for a variety of audiences with a variety of purposes.
• compose and edit professional documents in grammatically correct, concise English.
• create and use style templates in a variety of industry standard software.

Requirements for Degree 32 Units

CISA 305 Beginning Word Processing ......................... 2
CISW 300 Web Publishing ..................................... 3

ENGWR 344 Technical/Professional Communication: Writing Reports ........ 1.5
ENGWR 348 Technical/Professional Communication: Plain English ...... 1.5
ENGWR 350 Technical/Professional Communication: Proposal Writing ........................................... 1.5
ENGWR 352 Technical/Professional Communication: Writing Technical Manuals ..................................... 3
ENGWR 353 Technical/Professional Communication: Developing Help Systems ..................................... 1.5
JOUR 300 Newswriting and Reporting ................................ 3
And a minimum of 12 units from the following: ................... 12
ARTNM 328 Digital Photo Imagery - Photoshop Basics (3)
ARTNM 330 Intermediate Digital Photo Imagery (3)
ARTNM 352 Design for Publication (3)
or CISA 330 Desktop Publishing (2)
or CISA 331 Intermediate Desktop Publishing (2)
ARTNM 401 Introduction to Web Development and Design (3)
or CISW 307 Introduction to Web Development and Design (3)
ARTNM 402 Intermediate Web Design (3)
ARTNM 404 Interactive Multimedia Basics (3)
CISW 310 Advanced Web Publishing (4)

Associate Degree Requirements: The Technical Communications Associate in Arts (A.A.) Degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Technical Communications Certificate

The Technical Communications certificate offers an interdisciplinary program of courses in writing, Art/New Media, and Computer Information Systems to prepare students for a variety of technical writing and professional communication careers. The certificate includes the theory, writing skills, design background, and computer applications knowledge needed for jobs in technical communication.

Career Opportunities

Technical communicators find employment in medical, scientific, high tech, business, university, and government settings. They may write white papers, tutorials, reference and procedure manuals, help systems, user assistance video scripts, grants and proposals, and more.

Student Learning Outcomes

Upon completion of this program, the student will be able to:
• analyze audience information needs.
• compose concise, clearly written professional documents organized with the audiences’ needs in mind.
• design printed pages and online screens that communicate organizations’ values, enhance readability, and are easy to use.
• demonstrate basic skills in the use of key word processing, page design, help development, and web design applications.
• evaluate organizations’ communication goals with technical writing ethics in mind.

Requirements for Certificate 21.5-22.5 Units

ARTNM 352 Design for Publication (3) ......................... 3-4
or CISA 330 Desktop Publishing (2)
and CISA 331 Intermediate Desktop Publishing (2)
CISA 305 Beginning Word Processing .............................. 2
CISA 126  Outlook: Basics   1 Unit
Same As: BUSTEC 126
Advisory: BUSTEC 300
Hours: 18 hours LEC
This course introduces desktop communication management for users of Microsoft Outlook. Topics include e-mail, creating and managing contacts in the address book, and accessing files and folders. The skills and topics needed to pass the International Computer Driver’s License (ICDL) Module 7: Information and Communication communications portion of the ICDL exam are covered. Additionally, CISA 126/BUSTEC 126 and CISA 127/BUSTEC 127 taken together are considered sufficient preparation to pass the Microsoft Office Specialist certification objectives for the Microsoft Outlook application. This course is not open to students who have taken BUSTEC 126.

CISA 127  Outlook: Tools   1 Unit
Same As: BUSTEC 127
Advisory: BUSTEC 300
Hours: 18 hours LEC
This Outlook course presents the communication tools beyond basic email. Topics include calendar and scheduling, tasks and notes, shared folders, and customizing Outlook. In addition, the course covers the integration of Outlook with other applications within the Microsoft Office suite. CISA 126/BUSTEC 126 and CISA 127/BUSTEC 127 taken together are considered sufficient preparation to pass the Microsoft Office Specialist certification objectives for the Microsoft Outlook application. This course is not open to students who have taken BUSTEC 127.

CISA 141  Capturing and Publishing Digital Media   2 Units
Hours: 27 hours LEC, 27 hours LAB
This course is an overview of multimedia publishing software and peripherals used to produce digital media. Topics include the function and features of technology devices such as video camcorders, digital cameras, digital music devices, graphic pads and pens, DVD/CD burners, USB drives, and photo/CD/DVD printers. Multimedia publishing software and devices are examined and discussed for advantages and disadvantages. File and equipment management techniques are presented.

CISA 160  Project Management Techniques and Software   3 Units
Same As: MGMT 142
Advisory: ENGRD 116; or ESLR 320 and ESLW 320; CISC 300
Hours: 54 hours LEC
This is an introductory course covering the responsibilities of a project manager. It includes the knowledge needed to manage a project, control costs and schedule resources. It will also introduce the use of project management software to track project resources, tasks and milestones. Not open to students who have taken MGMT 142.

CISA 171  Introduction to Adobe Acrobat   1 Unit
Hours: 9 hours LEC, 27 hours LAB
This course introduces Adobe Acrobat tools for creating, editing, reading, and printing Portable Document Format (PDF) documents. Topics include software navigation, converting other file types to PDF, and customizing output quality. Additional topics include modifying PDF files, placing documents on-line, adding digital signatures and security, creating presentations, manipulating graphics, and managing eBooks.

CISA 294  Topics in Computer Information Science - Applications   .5-.5 Units
Prerequisite: To be determined with each topic.
Hours: 9-72 hours LEC, 0-54 hours LAB
This is an individualized course developed in cooperation with industry and/or government to meet specialized training needs. The course may be taken twice for credit.

CISA 305  Beginning Word Processing   2 Units
Advisory: CISC 300
General Education: AA/AS Area II(b)
Course Transferable to CSU
Advisory: ENGWR 102 or 103; and ENGRD 116; or ESLR 320 and ESLW 320; CISC 300
Same As: MGMT 142
Hours: 27 hours LEC, 27 hours LAB
This is an introductory course in word processing. The course introduces word processing operations such as creating, editing, file management techniques, and printing text. Emphasis is on formatting and document production techniques to produce professional business documents used in today's workplace. The course culminates with the study of intermediate level features such as merge, sort, graphics, macros, style, and templates. This course may be taken four times on a different software package or version.

CISA 306  Intermediate Word Processing   2 Units
Prerequisite: CISA 305 with grade of "C" or better
Course Transferable to CSU
Hours: 27 hours LEC, 27 hours LAB
This course is a continuation of word processing with emphasis on applications for business documents and reports. In addition, this course includes desktop publishing techniques using word processing software, newsletter production, macro editing, complex document styles and commands, importing, linking and merging data from other applications into a word processing document. This course may be taken four times on a different software packaging or version.

CISA 308  Exploring Word Processing and Presentation Software   1 Unit
Course Transferable to CSU
Hours: 18 hours LEC
The course introduces word processing and presentation software. The basic features and skills of creating, editing and formatting documents, inserting tables and graphics and enhancing word processed documents and presentations are covered.
CISA 315  Introduction to Electronic Spreadsheets  2 Units  
Advisory: CISA 315 with a grade of “C” or better  
Course Transferable to CSU  
Hours: 18 hours LEC  
This course introduces spreadsheet software. Topics include navigating a spreadsheet, editing and formatting data, using formulas and functions, inserting and formatting charts and graphics, basic database features, and analyzing data. 

CISA 316  Intermediate Electronic Spreadsheets  2 Units  
Prerequisite: CISA 315 with a grade of “C” or better  
Course Transferable to CSU  
Hours: 27 hours LEC; 27 hours LAB  
This course is a continuation of electronic worksheets with emphasis on workbook design and integration, template design, use of complex formulas, and built-in financial, logical, and database functions. It also includes look-up tables, the use of worksheet analysis tools, macros, and data integration. The course may be taken four times for credit on a different software package or version. 

CISA 318  Exploring Spreadsheet Software  1 Unit  
Course Transferable to CSU  
Hours: 18 hours LEC  
The course introduces spreadsheet software. Topics include navigating a spreadsheet, editing and formatting data, using formulas and functions, inserting and formatting charts and graphics, basic database features, and analyzing data. 

CISA 320  Introduction to Database Management  1 Unit  
Advisory: BUSTEC 300 and CISC 300  
General Education: AA/AS Area II(b)  
Course Transferable to CSU  
Hours: 9 hours LEC; 27 hours LAB  
This course introduces the use of database management programs on the microcomputer. It includes designing a database; storing, searching, and updating files; and designing and producing printed reports. It may be taken four times for credit on a different software package or version. 

CISA 322  Design and Development of Desktop Database Applications  3 Units  
Prerequisite: CISA 320 with a grade of “C” or better  
Course Transferable to CSU  
Hours: 36 hours LEC; 54 hours LAB  
This course covers strategies for the design and development of desktop database applications. Topics include database objects, data types, data integrity, relational tables, joins, relationships, domain constraints, complex queries, forms, reports, sharing data with other applications, and data maintenance. It may be taken three times for credit with a different version of the software. 

CISA 330  Desktop Publishing  2 Units  
Advisory: BUS 300, BUSTEC 100, and CISC 300  
Course Transferable to CSU  
Hours: 27 hours LEC; 27 hours LAB  
This course builds upon previous desktop publishing software concepts and study. Topics include working with color, applying styles, importing and linking graphics, tabs and tables, and working with transparency effects. It also covers producing long documents and book features, output and exporting to PDF format, and creating interactive documents for online use. This course may be taken four times for credit on a different software package or version. 

CISA 331  Intermediate Desktop Publishing  2 Units  
Prerequisite: CISA 330 with a grade of “C” or better  
Advisory: BUS 100  
Course Transferable to CSU  
Hours: 27 hours LEC; 27 hours LAB  
This course provides an overview of desktop publishing (DTP) and a major desktop publishing application program. It includes page layout skills needed to produce newsletters, brochures, flyers, reports, and marketing material on the computer. Additionally, it covers importing graphics and text, using palette menus, layers, master pages, and working with graphic and text frames. This course may be taken four times for credit on different software packages or versions. 

CISA 340  Presentation Graphics  2 Units  
Advisory: CISC 300  
Course Transferable to CSU  
Hours: 27 hours LEC; 27 hours LAB  
This course covers an in-depth look at using presentation software in business environments. Topics include elements of good presentation design, slide show techniques, integrating and linking of various software applications and media, animation effects, and the production of presentations using a variety of hardware. This course may be taken four times on a different software package or version. 

CISC 100  Computer Fundamentals with Hands-on Lab  2 Units  
Hours: 27 hours LEC; 27 hours LAB  
This introductory course provides general non-technical knowledge combined with a hands-on lab on how computers work including basic computer terminology and concepts. The focus is slower paced instruction with extensive hands-on reinforcement of instructional concepts. Course topics include an introduction to the operating system software and application software focusing on word processing, spreadsheets, the Internet and email. 

CISC 294  Topics in Computer Information Science - Core  2 Units  
Course Transferable to CSU  
Hours: 9-72 hours LEC; 0-54 hours LAB  
Current topics in computer science and information systems not covered by regular catalog offerings are examined. Topics and locations vary, including advanced subjects related to computer science, networking, programming, database, applications, PC support, security, communications, and web development and publishing. Field trips may be required. This course may be taken four times for credit on different topics.
CISC 300  Computer Familiarization  1 Unit
Advisory: ENGRD 116 or ESLR 320, and the ability to touch type.
General Education: AA/AS Area II(b); AA/AS Area III(b)
Course Transferable to CSU
Hours: 18 hours LEC
This course provides a general non-technical introduction to how computers work in addition to basic computer terminology and concepts. The focus is hands-on instruction using an operating system, word processing, spreadsheet, and Internet software. The course may be taken twice for credit on different hardware platforms.

CISC 305  Introduction to the Internet  1 Unit
Advisory: CISC 300 and 320
Course Transferable to CSU
Hours: 18 hours LEC, 18 hours LAB
This course is an introduction to how the Internet works and how to effectively use basic Internet services. Topics include E-mail, E-mail lists, the World Wide Web, search engines, newsgroups, Telnet, File Transfer Protocol (FTP), various forms of asynchronous communications such as Really Simple Syndication (RSS), and Internet security considerations.

CISC 306  Introduction to Web Page Creation  1 Unit
Advisory: CISC 305.
Course Transferable to CSU
Hours: 18 hours LEC, 18 hours LAB
This course covers the production of web pages, including design, layout, construction, and presentation. A web authoring tool is used to format a web page and Extensible Hypertext Markup Language (XHTML) is introduced. This course may be taken four times for credit on a different software package or version.

CISC 308  Exploring Computer Environments and the Internet  1 Unit
Course Transferable to CSU
Hours: 18 hours LEC
The course introduces the fundamentals of microcomputer hardware, software, and computer networking, focusing on operating systems. The fundamentals of the Internet and Internet tools are also introduced.

CISC 309  Applied Applications Lab  .5 Unit
Concurrent: CISA 305, CISA 306, CISA 315, CISA 316, CISA 320, or CISC 300
Advisory: ENGRD 116 or ESLR 320, and the ability to touch type.
Course Transferable to CSU
Hours: 27 hours LAB
This course complements CISC 300, CISA 305, CISA 306, CISA 315, CISA 316, and CISA 320 by providing supplemental lab instruction. The material reinforces the concepts and techniques presented in these courses. This course may be taken four times for credit. Pass/No Pass only.

CISC 310  Introduction to Computer Information Science  3 Units
Course Transferable to UC/CSU
Hours: 54 hours LEC
This course is a survey of the computer field covering the function and purpose of computer hardware and software, computer programming concepts, productivity software, employment opportunities, and the social impact of the computer.

CISC 320  Operating Systems  1 Unit
Advisory: CISC 300 and ability to touch type.
Course Transferable to CSU
Hours: 18 hours LEC, 18 hours LAB
This course introduces operating systems for the PC. Topics include file systems, operating system services, program management, file and directory organization, and hard drive maintenance. It also includes information on protecting your PC from viruses, Trojans, worms, adware, spyware, and other malicious network exploits. Additional topics are DOS commands and batch files. The course may be taken four times on a different Windows operating system version.

CISC 323  Linux Operating System  1 Unit
Advisory: CISC 300 and ability to touch type.
Course Transferable to CSU
Hours: 18 hours LEC, 18 hours LAB
This course introduces the Linux operating system for microcomputers. Concepts include the kernel, file structures, daemons, graphical user interfaces (GUI), open source, file security and permissions. Procedures for installing software, basic system administration and utilities, the Bourne again shell (BASH), command line interface utilities, and introduction to scripting topics are also covered.

CISC 324  Intermediate Linux Operating System  1 Unit
Prerequisite: CISC 323 with a grade of “C” or better
Course Transferable to CSU
Hours: 18 hours LEC, 18 hours LAB
This course is a continuation of CISC 323. Topics include boot loaders, Linux devices, and command line interface (CLI) system management utilities. It covers advanced Bourne Again Shell (BASH) shell scripting, including looping and decision making logic structures. Alternates to the BASH shell and regular expressions and text stream editors are introduced.

CISC 325  Introduction to Data Communications  1 Unit
Advisory: CISC 300 and ability to touch type.
Course Transferable to CSU
Hours: 18 hours LEC
This course introduces business data communication concepts, systems, technology, protocols, theory, and basic terminology. Specific topics include analog and digital data encoding and transmission; media; interfaces; packet, circuit, and broadcast networks; and data multiplexing.

CISC 351  Introduction to Local Area Networks  1 Unit
Advisory: CISC 320 and 350.
Course Transferable to CSU
Hours: 18 hours LEC, 18 hours LAB
This course introduces local area networks (LAN) and provides hands-on training in LAN applications and network administration. Topics include planning, installing, and maintaining a LAN, responsibilities of the system administrator, and basic network security principles. The course may be taken for credit four times on a different Windows operating system.

CISC 361  Microcomputer Support Essentials - Preparation for A+ Certification  3 Units
Advisory: CISC 310, 320, and 350
Course Transferable to CSU
Hours: 42 hours LEC, 36 hours LAB
This course is the first of two courses covering support and repair for stand-alone personal computers. It includes training to troubleshoot hardware to a field replaceable component. Operating systems installation and simple networking are also covered. The course provides a firm grounding in the supporting software that runs the hardware and in distinguishing hardware from software problems. This course, along with CISC 363, prepares students for the Computing Technology Industry Association (CompTIA) A+ certification.
CISC 362 Microcomputer and Applications Support 2 Units
Corequisite: CISC 361
Advisory: CISA 305, 315, and 320
Course Transferable to CSU
Hours: 24 hours LEC; 36 hours LAB
This course is an in-depth investigation of the technical, business, soft, and self-management skills technicians need to provide effective customer service and support in an information technology (IT) environment. Customer service and problem solving skills needed for success in a small or large business environment are introduced. Students serve as assistants in computer support in one of the American River College (ARC) computer classrooms/labs.

CISC 363 Microcomputer Support Technical - Preparation for A+ Certification 3 Units
Prerequisite: CISC 361 with a grade of "C" or better
Course Transferable to CSU
Hours: 42 hours LEC; 36 hours LAB
This course is the second of two courses providing a foundation in personal computer (PC) support. Hands-on skills include advanced component installation and configuration, troubleshooting component hardware, and configuring and troubleshooting major operating systems and networking hardware. This course along with CISC 361 prepares students for the Computing Technology Industry Association (CompTIA) A+ Certification exam.

CISC 498 Work Experience in Computer Information Science - Core 1-4 Units
Advisory: ENGWR 102 or 103, and ENGRD 116 with a grade of "C" or better; OR ESLR 320 and ESLW 320 with a grade of "C" or better; OR placement through assessment process.
General Education: AA/AS Area III(b)
Enrollment Limitation: Students must be in a paid or unpaid internship, volunteer position, or job related to computer information science.
Students are advised to consult with the Computer Information Science Department faculty to review specific certificate and degree work experience requirements.
Course Transferable to CSU
Hours: 60-300 hours LAB
This course provides students with opportunities to develop marketable skills in preparation for employment or advancement within the field of computer information science. It is designed for students interested in work experience and/or internships in transfer level degree occupational programs. Course content includes understanding the application of education to the workforce; completion of required forms which document the student's progress and hours spent at the work site; and developing workplace skills and competencies. Appropriate level learning objectives are established by the student and the employer. During the semester, the student is required to attend a weekly orientation and 75 hours of related paid work experience, or 60 hours of unpaid work experience for one unit. An additional 75 or 60 hours of related work experience is required for each additional unit. The weekly orientation is required for first time participants; returning participants are not required to attend the orientation weekly but are required to meet with the instructor as needed to complete all program forms and assignments. Work Experience may be taken for a total of 16 units when there are new or expanded learning objectives.

CISN 110 Networking Info Science-Network 2 Units
Prerequisite: CISC 360 with a grade of "C" or better
Course Transferable to CSU
Hours: 24 hours LEC
This is an introductory course in networking software and hardware. Topics include modems, communication protocols, local and wide area networks, intra- and inter-networks, network architectures, topologies, and the Open Systems Interconnect (OSI) model. This course, along with CISN 111, prepares students for the Computer Technology Industry Association N+ Certification test.

CISN 111 Intermediate Networking Technologies - Preparation for N+ Certification 2 Units
Prerequisite: CISN 110 with a grade of "C" or better
Course Transferable to CSU
Hours: 36 hours LEC
This is an intermediate course in networking software and hardware. Topics include network operating systems setup, analyzing network performance, diagnosing and repairing of network problems, and network security techniques. This course, along with CISN 110, provides preparation for the Computer Technology Industry Association N+ Certification test.

CISN 118 Internet Protocol Subnetting 1 Unit
Advisory: CISN 110 and MATH 25
Hours: 18 hours LEC
This course introduces Transmission Control Protocol/Internet Protocol (TCP/IP) address assigning and subnetting. Topics include a review of binary, hexadecimal, and decimal numbering systems, classes of Internet Protocol (IP) addresses, Classless Inter-domain Routing (CIDR), and Variable Length Subnet Masks (VLSM). The future of IP addressing, version 4 (IPv4) and version 6 (IPv6), is covered.

CISN 119 TCP/IP Protocols 3 Units
Advisory: CISN 350.
Hours: 54 hours LEC
This course covers the TCP/IP protocol suite for the Internet. Information to support and manage TCP/IP is provided.

CISN 120 Beginning Network Administration with Linux 3 Units
Prerequisite: CISN 323 with a grade of "C" or better.
Advisory: CISN 324.
Hours: 45 hours LEC; 27 hours LAB
This course covers the basics of installation and administration of the Linux Network Operating System. Topics include installation of the Linux server, connecting to a network, utilizing network utilities, administering and maintaining network printing, protecting network data, and installing network applications. This course also covers planning, accessing, and managing file systems, planning and implementing login and file system security, administering and maintaining user accounts, upgrading the kernel, and backing up servers.

CISN 121 Network Administration with Linux: LAN Services 2 Units
Prerequisite: CISN 120 with a grade of "C" or better.
Advisory: CISN 119.
Hours: 27 hours LEC; 27 hours LAB
This course covers Linux network administration of local area network (LAN) services. Topics focus on server and LAN services including the network file system (NFS), share resources between Linux and Microsoft Windows using Server Message Block (SMB), network information service (NIS), virtual network computing (VNC), remote network access, the secure shell (SSH) vs. telnet, X-windows as a network service, and dynamic host configuration protocol (DHCP). The course also covers the command scheduler (cron),
monitoring and logging system activities and system events (syslog), as well as installing and configuring MySQL Structured Query Language (SQL) database management service.

**CISN 122  Network Administration with Linux: Internet Services**  
2 Units  
Prerequisite: CISN 120 with a grade of “C” or better.  
Advisory: CISN 119.  
Hours: 27 hours LEC, 27 hours LAB  
This course covers Linux network administration of Internet services. Topics focus on server and TCP/IP services including the Internet services daemon (XINETD), file transfer protocol (FTP), email, domain name service (DNS), firewall, secure shell, and proxy services. Installing and configuring the Apache Web Server and Webmin (the Linux web based administration tool) are introduced.

**CISN 140  CISCO Networking Academy (CCNA)tm: Networking Fundamentals**  
3 Units  
Advisory: CISC 310, 320, or 350  
Hours: 54 hours LEC, 18 hours LAB  
This course introduces the architecture, structure, functions, components, and models of the Internet and other computer networks. It surveys data communication protocols, standards, hardware and software components and basic networking concepts. Topics include the Open Systems Interconnection (OSI) and TCP/IP models, IP addressing and subnetting, routing concepts, LAN media, Ethernet, and network configuration, troubleshooting and analysis. This is the first course in preparation for Cisco CCNA certification examination. ARC is a certified Cisco Networking Academy and all courses are taught by Cisco Certified Academy Instructors (CCAI). This course may be taken two times for credit for recertification due to updates to industry standards.

**CISN 141  CISCO Networking Academy (CCNA)tm: Routing Protocols and Concepts**  
3 Units  
Prerequisite: CISN 140 with a grade of “C” or better  
Hours: 54 hours LEC, 18 hours LAB  
This course describes the architecture, components, and operation of routers, and explains the principles of routing and routing protocols. Topics include configuring, verifying, and troubleshooting Routing Information Protocol (RIP) version 1 and 2, Enhanced Interior Gateway Routing Protocol (EIGRP), and Open Shortest Path First (OSPF) routing protocols. Basic router configuration and troubleshooting, networking theory, and IP addressing are also covered. This is the second course in preparation for Cisco CCNA certification examination. ARC is a certified Cisco Networking Academy and all courses are taught by Cisco Certified Academy Instructors (CCAI). This course may be taken two times for credit for recertification due to updates to industry standards.

**CISN 142  CISCO Networking Academy (CCNA)tm: LAN Switching and Wireless**  
3 Units  
Prerequisite: CISN 140 with a grade of “C” or better  
Hours: 54 hours LEC, 18 hours LAB  
This course focuses on Layer 2 switching protocols, concepts and technologies. Topic include hierarchy LAN design, basic switch concepts and configuration, Virtual LANs (VLANs), Virtual Trunking Protocol (VTP), Spanning Tree Protocol (STP), Inter-VLAN routing, basic wireless concepts and configuration. Implementing, verifying, securing and troubleshooting converged switching technologies in a small-to-medium network, including integrating wireless devices into a LAN, are also covered. This is the third course in preparation for Cisco CCNA certification examination. ARC is a certified Cisco Networking Academy and all courses are taught by Cisco Certified Academy Instructors (CCAI). This course may be taken two times for credit for recertification due to updates to industry standards.

**CISN 143  CISCO Networking Academy (CCNA)tm: Accessing the Wide Area Network**  
3 Units  
Prerequisite: CISN 141 and 142 with grades of “C” or better  
Hours: 54 hours LEC, 18 hours LAB  
This course covers wide area networks (WAN) technologies to connect small- to medium-sized business networks. It focuses on Point to Point Protocol (PPP), Frame Relay, and broadband links. Topics include network security, traffic control and access control lists (ACLs), Virtual Private Networks (VPN) and network troubleshooting, IP addressing services Network Address Translation (NAT) and Dynamic Host Configuration Protocol (DHCP) are covered, and IPv6 is introduced. This is the fourth course in preparation for Cisco CCNA certification examination. ARC is a certified Cisco Networking Academy and all courses are taught by Cisco Certified Academy Instructors (CCAI). This course may be taken two times for credit for recertification due to updates to industry standards.

**CISN 300  Network Systems Administration**  
3 Units  
Advisory: CISC 320, 350, and 351.  
Course Transferable to CSU  
Hours: 45 hours LEC, 27 hours LAB  
This course covers advanced system administration in a client/server network. Topics include configuring the server environment, implementing system policies, implementing and managing fault-tolerant disk volumes, and managing applications. Additional topics covered are managing connectivity for different network and client operating systems, as well as managing and implementing remote servers. This course covers material required for one of the Microsoft MCSE Network certification examinations. This course may be taken four times on a different Windows version.

**CISN 302  Intermediate Network Systems Administration**  
3 Units  
Prerequisite: CISN 300 with a grade of “C” or better.  
Course Transferable to CSU  
Hours: 45 hours LEC, 27 hours LAB  
This course covers material required for one of the Microsoft MCSE Network certification examinations. This course may be taken four times on a different Windows version.

**CISN 307  Windows Active Directory Services**  
3 Units  
Prerequisite: CISN 302 with a grade of “C” or better.  
Course Transferable to CSU  
Hours: 45 hours LEC, 27 hours LAB  
This course covers installing, configuring, and administering Microsoft Windows Active Directory services. It also focuses on implementing Group Policy and understanding the Group Policy tasks required to manage users and computers. Group Policies are used to configure and manage the user desktop environment, configure and manage software, and implement and manage security settings. Installation and configuration of Domain Naming System (DNS) and Windows Internet Naming System (WINS) is covered, as well as publishing, replication and the backup of the directory services data base. This course may be taken up to four times on different Windows operating system versions.
CISP 308  Internet networking with TCP/IP  3 Units
Prerequisite: CISP 302 with a grade of “C” or better.
Course Transferable to CSU
Hours: 45 hours LEC; 27 hours LAB
This course covers installing, configuring, managing, and supporting a
network infrastructure using the Microsoft Windows Server prod-
ucts. It focuses on TCP/IP and related services, including Dynamic
Host Configuration Protocol (DHCP), Domain Naming System (DNS),
Windows Internet Naming Service (WINS), Internet Information
Server (IIS), Public Key Infrastructure (PKI) and certificate
service, Internet protocol security (IPSec), Network Address Trans-
lation (NAT), and remote access. It also covers configuring Windows
as a network router, Virtual Private Network (VPN) connectivity and
managing a Windows deployment using Remote Installation Services
(RIS). This course may be taken four times on different Windows
operating system versions.

CISP 374  Messaging Server Administration  3 Units
Prerequisite: CISP 302 with a grade of “C” or better.
Course Transferable to CSU
Hours: 45 hours LEC; 27 hours LAB
This course covers the installation and administration of messaging
servers. Topics include the installation, configuration, management
and tuning of mail and messaging services on both servers and cli-
ents; mail access protocols; security issues; backup and restore of the
messaging database; and Internet connectivity. This course may be
taken four times on different software versions.

CISP 300  Algorithm Design/Problem Solving  3 Units
Advisory: CISC 310
Course Transferable to CSU
Hours: 54 hours LEC
This course introduces methods for solving typical computer prob-
lems through algorithm design. Topics include assessing and analyz-
ing computer problems in a top-down, divide-and-conquer approach
that leads to a programming solution. It also covers programming
plans and detailed design documents from which source code ver-
sions of programs are created.

CISP 310  Assembly Language Programming for
Microcomputers  4 Units
Prerequisite: CISP 360 with a grade of “C” or better.
Course Transferable to UC/CSU
Hours: 54 hours LEC; 54 hours LAB
This course is an introduction to the architecture of microcompu-
ters that use the Intel microprocessor. Topics include machine and
assembly language, keyboard and screen manipulation, binary and
binary coded decimal (BCD) arithmetic, American Standard Code
for Information Interchange (ASCII) and binary conversion, table
processing, macros, and subroutines. Machine language programs are
traced as an aid to debugging.

CISP 315  Introduction to Computer Architecture and
Design  4 Units
Prerequisite: CISP 310 with a grade of “C” or better
General Education: AA/AS Area II(b)
Course Transferable to UC/CSU
Hours: 54 hours LEC; 54 hours LAB
This course is an introduction to the fundamental theories of,
and their applications in, digital computer design. Topics include
machine code decoding, memory bus cycles, memory, arithmetic
and logic unit, registers, latches, Boolean algebra, logic gates, state
machines, binary representation, pipelining and Boolean equation
optimization. Synthesis of the design of a computer in a hardware
description language (HDL) is stressed. All topics are related to pro-
gramming and overall computer system operations.

CISP 320  COBOL Programming  4 Units
Prerequisite: CISP 300 or 370 with a grade of “C” or better
General Education: AA/AS Area II(b)
Course Transferable to CSU
Hours: 54 hours LEC; 54 hours LAB
This course is an introduction to the COBOL programming lan-
guage. Course elements include top-down design, modular program-
ming methods, and structured programming methods to analyze and
solve problems found in business and government. Laboratory as-
signments cover a variety of input/output techniques including data
validation, report formatting, arithmetic operations, output editing,
single and double array processing, control-break concepts, and the
creation and update of sequential files.

CISP 350  Database Programming  3 Units
Advisory: CISA 320 and CISC 310
General Education: AA/AS Area II(b)
Course Transferable to CSU
Hours: 36 hours LEC; 54 hours LAB
This is an introductory course in Structured Query Language (SQL)
database programming. Topics include database normalization, sub-
queries, joins, import/export, privileges, and Procedural Language
(PL)/SQL programming.

CISP 360  Introduction to Structured Programming  4 Units
Prerequisite: CISP 300, 320, 340, or 370 with a grade of “C” or better
General Education: AA/AS Area II(b)
Course Transferable to UC/CSU
Hours: 54 hours LEC; 54 hours LAB
This course is an introduction to structured programming and ob-
jects. Topics include program design, documentation, testing, and
debugging, as well as data representation, data types, variables, con-
stants, and operators. It also includes control structures, interactive
and file input/output, standard libraries, arrays, pointers, methods
(functions), classes and objects.

CISP 370  Beginning Visual Basic  4 Units
Advisory: CISC 310 and CISP 300
Course Transferable to CSU
Hours: 54 hours LEC; 54 hours LAB
This is an introductory programming course covering the develop-
ment of Windows-based desktop applications using Visual Basic
.NET (VB .Net). Topics include best practices for Graphical User
Interface (GUI) design, use of the Visual Studio .NET development
software, organizing code into procedures and modules, calculation
techniques, input data validation, file input and output, variable
scope, arrays, and multiple-window applications. This course is
designed for those who want a strong foundation in building GUI
applications. It may be taken four times for credit with different ver-
sions of the VB .Net language.

CISP 371  Intermediate Visual Basic  4 Units
Prerequisite: CISP 370 with a grade of “C” or better.
Course Transferable to CSU
Hours: 54 hours LEC; 54 hours LAB
This is the second course in Visual Basic programming. The course
evaluates data and its relationship to the functions that operate on
data. Topics include forms, components, properties, classes, objects,
static and dynamic relationships, databases, data sets, queries, hier-
archies, inheritance, coding, dialog boxes, associations, testing, and debugging. This course may be taken four times with a different version of Visual Basic.

**CISP 372  Beginning Visual Basic for Applications Programming**

Course Transferable to CSU

Hours: 15 hours LEC; 9 hours LAB

This course introduces Visual Basic for Applications (VBA) programming for the purposes of application automation and customization. It includes basic programming concepts such as variables, control structures and subroutines. The use of elementary user interface controls are also included in this course.

**CISP 400  Object Oriented Programming with C++**

Prerequisite: CISP 360 with a grade of “C” or better

Advisory: CISC 323

General Education: AA/AS Area II(b)

Course Transferable to UC/CSU

Hours: 54 hours LEC; 54 hours LAB

This course is an introduction to the C++ programming language and object-oriented programming in the Linux/UNIX environment. Topics include program analysis and design, encapsulation, overloading, classes, inheritance, virtual functions, polymorphism, templates, exception handling, and the standard template library. In addition, basic Linux/UNIX commands and make files are covered.

**CISP 401  Object Oriented Programming with Java**

Prerequisite: CISP 360 with a grade of “C” or better

Advisory: CISP 400

Course Transferable to UC/CSU

Hours: 54 hours LEC; 54 hours LAB

This course introduces object oriented programming using the Java programming language. Topics include objects, inheritance, polymorphism, interfaces, abstract classes, inner classes, error handling, graphical user interfaces (GUI), applets, threads, files, databases, and packages.

**CISP 430  Data Structures**

Prerequisite: CISP 360 with a grade of “C” or better

Advisory: CISP 400

Course Transferable to UC/CSU

Hours: 54 hours LEC; 54 hours LAB

This course applies object-oriented techniques for systematic problem analysis and the managing of program complexity using abstraction. Specifications, design, coding, testing, and documentation of large multi-file programs are covered. It uses advanced language features such as classes, strings, non-text files, pointers, and recursion. Abstract data types such as stacks, queues, lists, binary trees, heaps/priority queues, hash tables, and graphs are examined. Various sorting and searching algorithms are presented and analyzed using Big-O notation. (CAN CSCI 24)

**CISP 440  Discrete Structures for Computer Science**

Prerequisite: MATH 370 with a grade of “C” or better

Corequisite: CISP 430

General Education: AA/AS Area II(b); CSU Area B4

Course Transferable to UC/CSU

Hours: 54 hours LEC

This course is an introduction to the essential discrete structures used in Computer Science, with emphasis on their applications. Topics covered include elementary formal logic and set theory, elementary combinatorics, recursive programming and algorithm analysis, finite state machines and formal languages, digital logic and switching, combinatorial circuits, and computer arithmetic.

**CISP 453  Introduction to Systems Programming in UNIX**

Prerequisite: CISP 310, 360, and 430 with grades of “C” or better

Advisory: CISP 323.

Course Transferable to UC/CSU

Hours: 54 hours LEC; 54 hours LAB

This course covers the features of the C language commonly used in systems programming, and the application of those features to systems programming in a Linux/UNIX environment. Topics include C preprocessor macros, input/output, bit-manipulation facilities; time-sharing system concepts; shell script programming; make files and source code control; basic system calls including fork and exec; pointers and dynamic memory allocation; libraries; and relocation and linking concepts including assembler handling of symbol tables.

**CISP 457  Computer Systems Analysis and Design**

Prerequisite: CISP 300 or 370 with a grade of “C” or better.

Advisory: CISP 305 and 340.

Course Transferable to CSU

Hours: 54 hours LEC

This course covers the methods used to analyze, design, and implement a computer system that meets client business needs. The methodology emphasizes the skills needed by a system analyst throughout the steps of a system development life cycle. These steps include system feasibility, analysis, design, implementation, documentation, and evaluation.

**Computer Info Science-Security**

**CISS 300  Introduction to Information Systems Security**

Advisory: CISC 320, 350, or 351

Course Transferable to CSU

Hours: 18 hours LEC; 18 hours LAB

This course provides an introduction to network-based and Internet-based security applications and standards. Topics include encryption, security protocols, network security applications, digital signatures, protecting computers and the network from viruses, Trojans, spyware, unsolicited E-mail and public and private key exchange.

**CISS 301  Ethical Hacking**

Advisory: CISC 320, 323, 350, and 351

Course Transferable to CSU

Hours: 27 hours LEC; 27 hours LAB

This course explores ways in which security for a stand-alone PC and a network-connected PC can be compromised. It introduces basic security concepts, principles and “best practices.” It also explores ways in which the security of a PC can be checked and evaluated. Principles of ethical hacking are discussed. Internal and external security threats are discussed, including viruses, worms, Trojans, scripts, and other malicious e-mail content. Network vulnerabilities, common exploits, and basic countermeasures are also covered.

**CISS 310  Network Security Fundamentals**

Advisory: CISP 119, 140, and 302.

Course Transferable to CSU

Hours: 45 hours LEC; 27 hours LAB

This course provides the information and skills required to analyze security risks from potential network intrusions to organizations’ network information systems. Topics cover the required content of the Computing Technology Industry Association (CompTIA) Security+ certification exam.

American River College Catalog 2010-2011
CISS 325  Network Security and Firewalls  3 Units
Prerequisite: CISS 310 with a grade of “C” or better.
Course Transferable to CSU
Hours: 45 hours LEC; 27 hours LAB
This course covers network and Internet security and deployment of industry standard countermeasures, including configuring Virtual Private Network (VPN) connections. Topics include the evaluation, implementation, and management of secure remote-access technologies. Also covered is the configuration of network firewalls such as Microsoft ISA Server, and allowing access to key services while maintaining security. This course provides preparation for the Check Point Security’s “Check Point Certified Security Administrator” (CCSA) certification exam. This course is not open to students who have completed CISS 320 and CISS 330.

CISS 341  Implementing Windows Operating System Security  3 Units
Advisory: CISC 320, CISC 351, and CISS 310
Course Transferable to CSU
Hours: 45 hours LEC; 27 hours LAB
This course provides in-depth information on the Microsoft Windows desktop operating system security features, as well as step-by-step configuration for most effective operating system security. The techniques needed in order to maintain the integrity, authenticity, availability, and privacy of the system and user data are covered. This course may be taken 4 times for credit on different versions of the Windows operating system.

CISS 342  Implementing Linux Operating System Security  3 Units
Advisory: CISC 323 and CISS 310
Course Transferable to CSU
Hours: 45 hours LEC; 27 hours LAB
This course provides in-depth information on Linux/UNIX operating system security features, as well as step-by-step configuration for most effective operating system security. The techniques needed in order to maintain the integrity, authenticity, availability, and privacy of the system and user data are covered. This course may be taken 4 times for credit on different versions of the Linux or UNIX operating systems.

CISS 350  Disaster Recovery  3 Units
Advisory: CISS 310
Course Transferable to CSU
Hours: 54 hours LEC
This course provides methods for identifying vulnerabilities and implementing countermeasures to prevent and mitigate failure risks in the information technology infrastructure for the business enterprise. Topics include disaster recovery, development of a disaster recovery plan, and development and implementation of disaster recovery policies and procedures.

CISS 360  Computer Forensics and Investigation  3 Units
Advisory: CISC 324, CISS 310, and CISS 350
Course Transferable to CSU
Hours: 45 hours LEC; 27 hours LAB
This course introduces the methods used to conduct a computer forensics investigation. Topics include an overview of computer forensics as a profession, the computer investigation process, operating systems’ boot processes and disk structures, data acquisition and analysis, ethics, and a review of standard computer forensic tools. The course topics map to the objectives of the International Association of Computer Investigative Specialists (IACIS) certification.

CISW 300  Web Publishing  3 Units
Advisory: CISC 300 and CISC 305.
Course Transferable to CSU
Hours: 36 hours LEC; 54 hours LAB
This course is an introduction to publishing on the World Wide Web. Topics include creating web pages with the Hyper Text Markup Languages (HTML), organizing a series of pages into a web site, and uploading web pages to a server. The course makes extensive use of the computer tools necessary to insert HTML tags, create images, and view web documents. It also prepares apprentice web designers and publishers to identify the information dissemination needs of a client, design an appropriate web solution, and implement it.

CISW 307  Introduction to Web Development and Design  3 Units
Same As: ARTNM 401
Course Transferable to CSU
Hours: 36 hours LEC; 54 hours LAB
This course covers the strategies for the development and design of web sites. Using an industry standard web authoring tool, the course integrates both artistic and technical concepts. Topics include assembling, designing and publishing web pages using strategies, principles and processes universally practiced by the professionals in this field. This course, in combination with ARTNM 401, may be taken four times for credit on a different software package or version.

CISW 310  Advanced Web Publishing  4 Units
Prerequisite: CISW 300 with a grade of “C” or better
Course Transferable to CSU
Hours: 54 hours LEC; 54 hours LAB
This course builds upon previous web publishing concepts and study. The primary focus of this course is the systematic development of interactive web sites. Topics include cascading style sheets, dynamic HTML, forms, client-side scripting with JavaScript, Common Gateway Interface (CGI) scripting with Perl, and web-database interactivity.

CISW 350  Imaging for the Web  1 Unit
Advisory: CISW 306 or CISW 300
Course Transferable to CSU
Hours: 18 hours LEC; 18 hours LAB
This course takes an in-depth look at graphics for the Web. Industry standard graphic software is used to technically develop original graphics as well as to manipulate found imagery. Topics include understanding Web file formats, compressing graphics for use on the Web, editing and enhancing graphics, extracting elements, and using layers. It also covers creating buttons and intuitive navigational elements, making background textures and images, and simple animation/video. It may be taken two times for credit on different platforms or software versions.

CISW 355  Web Imaging Projects  2 Units
Prerequisite: ARTNM 402 or CISW 350 with a grade of “C” or better
Course Transferable to CSU
Hours: 27 hours LEC; 27 hours LAB
This course is a continuation of CISW 350. Projects and simulations developing graphics for the Web are created for the purpose of marketing and advertising on the Web. The steps, procedures, and common problems encountered when producing quality graphics for professional websites are discussed and practiced. Real and simulated projects include the following: compressing and uploading times, cropping and resizing, digital camera imaging, retouching and fixing photographs, photographic special effects and filters, rasterizing text, implementing backgrounds, buttons, themes, image maps, slicing, and simple animations.
CISW 365  Interactive Multimedia Basics  3 Units
Same As: ARTNM 404
Advisory: ARTNM 324, ARTNM 402, CISW 300, or CISW 310
Course Transferable to CSU
Hours: 36 hours LEC; 54 hours LAB
This course demonstrates how to create simple vector-based graphics, animation, buttons, movies and raster files in a web environment. Topics include drawing tools, time-line effects, sound and video integration and basic interactivity. CISW 365 and/or ARTNM 404 may be taken a total of 4 times on different platforms or software versions.

CISW 370  Designing Accessible Web Sites  1 Unit
Prerequisite: CISW 300 with a grade of "C" or better
Course Transferable to CSU
Hours: 18 hours LEC
This course provides an overview of the methods that are used to design web sites for people with disabilities. Current legal requirements for accessible web sites, especially the Americans with Disabilities Act (ADA), are emphasized.

CISW 385  E-Commerce  3 Units
Prerequisite: CSC 305 or CISW 300 with a grade of "C" or better.
Course Transferable to CSU
Hours: 54 hours LEC
This course provides both the beginner and the professional with a working knowledge of e-commerce. It emphasizes the theory and practice of marketing in an electronic environment. The personalization and interactivity of commercial web sites as a tool to build strong customer relationships are stressed.

CISW 400  Client-side Web Scripting  4 Units
Prerequisite: CISW 300 with a grade of "C" or better
Advisory: CISW 300 and CISW 310
Course Transferable to CSU
Hours: 54 hours LEC; 54 hours LAB
This course emphasizes the creation of dynamic and interactive web sites using a client-side scripting language such as JavaScript. Topics include the Document Object Model of web pages, core features of the client-side scripting language, event handling, control of windows and frames, functions, and form validation. This course may be taken twice using a different client-side scripting language.

CISW 405  ActionScript for Flash  3 Units
Prerequisite: ARTNM 404 or CISW 365 with a grade of "C" or better.
Advisory: CIS 300 or CISW 400.
Course Transferable to CSU
Hours: 36 hours LEC; 54 hours LAB
This course introduces Macromedia Flash users to programming with ActionScript to animate, process data, and create dynamic content. It emphasizes the object-oriented capabilities of Macromedia Flash, and instructs how to use ActionScript objects, methods, events, properties, and functions, with an eye toward ActionScript best practices.

CISW 410  Middleware Web Scripting  4 Units
Prerequisite: CISW 300 with a grade of "C" or better
Advisory: CISP 300 and CISW 310
Course Transferable to CSU
Hours: 54 hours LEC; 54 hours LAB
This course emphasizes the creation of interactive web sites using a middleware scripting environment such as PHP or Active Server Pages (ASP). Topics include core features of the middleware scripting language, embedding server commands in HTML pages, control structures, functions, arrays, form validations, cookies, environmental variables, email applications, and database-driven web applications. This course may be taken twice using different middleware web scripting environments.

CISW 411  Middleware Scripting Database Web Applications  2 Units
Prerequisite: CISW 410 with a grade of "C" or better
Advisory: CISW 310
Course Transferable to CSU
Hours: 27 hours LEC; 27 hours LAB
This course covers interactive database applications for the Web using a database and middleware scripting language. Topics include organizing data, developing tables for databases, and creating middleware scripts that add, delete, sort, edit, and merge the data in the database. Maintaining database integrity and using DHTML (Dynamic Hypertext Mark-up Language) to streamline certain client-side functions, such as form validation, are also covered.

CISW 420  Server-side Web Scripting  4 Units
Prerequisite: CISW 300 with a grade of "C" or better
Advisory: CISP 300 and CISW 310
Course Transferable to CSU
Hours: 54 hours LEC; 54 hours LAB
This course emphasizes the creation of interactive web sites using a server-side scripting language such as a Perl or Java. Topics include core features of the server-side scripting language, control structures, functions, arrays, form validation, regular expressions, cookies, environmental variables, email applications, and database-driven web applications. This course may be taken twice using a different server-side web scripting language.

CISW 442  Web Publishing with XML  3 Units
Prerequisite: CISW 300 with a grade of "C" or better.
Course Transferable to CSU
Hours: 36 hours LEC; 54 hours LAB
This course describes how to create well-formed and valid Extensible Markup Language (XML) documents, which are later used in conjunction with Extensible Style Sheet Language (XSL) to produce Web pages and other result documents. Topics include formatting XML documents with Cascading Style Sheets (CSS), Document Type Definitions (DTD), XML Namespaces and Schemas, XPath, and Extensible Style Sheet Language Transforms (XSLT).

CISW 471  Interactive Multimedia Projects  4 Units
Same As: ARTNM 410
Prerequisite: ARTNM 402, ARTNM 404, CISW 300, CISW 310, or CISW 365 with a grade of "C" or better
Advisory: ARTNM 328, CISW 410, and CISW 420
Course Transferable to CSU
Hours: 54 hours LEC; 54 hours LAB
This course focuses on interactive multimedia project development. Emphasis is placed on the project development cycle including design specification, research, production, modification, and presentation. Projects assigned are multifaceted, approaching the complexity that individuals would be expected to encounter in the interactive multimedia development industry. This course is not open to students who have completed ARTNM 410.
