Design Technology Degree and Certificate

The ARC Design Technology degree and certificate emphasizes the basic skills needed for success in architectural, mechanical, and engineering occupations. These include the design process, drafting standards and practices, technical communication, material sciences, and design critique. The use of computers and various computer aided design and drafting (CADD) softwares are emphasized throughout the program.

Student Learning Outcomes

Upon completion of this program, the student will be able to:
- Apply the principles of architecture and engineering technology.
- Identify, analyze, and solve technical problems within architectural and engineering disciplines.
- Plan, conduct, and analyze typical architectural and engineering design projects by applying the design process.
- Communicate architectural and engineering design solutions effectively through speaking, writing, and the use of design graphics.

Associate Degree Requirements: The Design Technology Associate in Arts (A.A.) Degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Engineering Technology Degree

The Engineering Technology degree gives students a basic preparation in physics, mathematics, computer aided design and drafting (CADD), chemistry, manufacturing processes, engineering materials and other subjects necessary for the well trained engineering technician.

Student Learning Outcomes

Upon completion of this program, the student will be able to:
- Apply the principles of engineering technology.
- Identify, analyze, and solve technical problems within engineering disciplines.
- Plan, conduct, analyze, and interpret experiments.
- Communicate engineering design solutions effectively through speaking, writing, and the use of graphics.

Career Opportunities

Upon completion of the A.S. degree the engineering technician will be prepared to go directly into employment as a technical assistant to engineers, or other technical employment. The two-year A.S. degree program provides options for special concentration: engineering technology, architectural engineering technology, civil engineering technology, electrical engineering technology, or mechanical engineering technology. Engineering technicians are needed in the fields of manufacturing, architecture, construction, materials testing, public utilities and many other fields.

One or more transfer level Language and Rationality course (numbered 300-499)

And a minimum of 6 units from the following: ..................... 6
Transfer level Social Science courses (numbered 300-499)

And a minimum of 5 units from the following: ................. 5
Transfer level courses (numbered 300-499).

Associate Degree Requirements: The Engineering: Transfer Associate in Science (A.S.) Degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

DESGN 100 Introduction to Computer Aided Drafting and Design (CADD) 3 Units
Hours: 36 hours LEC; 72 hours LAB
This course is an introduction to computer-assisted drafting and design (CADD) and basic technical drawing. It covers orthographic and isometric projection concepts, utilizing CADD to produce basic technical drawings and applies the editing commands available in the software. It introduces basic drawings from architecture, mechanical design, electronics and space planning. This course may be taken four times using different software releases.

DESGN 102 Intermediate Computer Aided Drafting and Design (CADD) 3 Units
Prerequisite: DESGN 100 with a grade of “C” or better.
Hours: 36 hours LEC; 72 hours LAB
This course emphasizes advanced CADD commands and design graphics drawing principles. Orthographic and isometric projection principles are used for solving missing view problems with CADD as the tool for producing the drawings. Section views for mechanical and architectural applications are covered. Topics encompass architectural design, mechanical design, 3D-drawing, orthographic and isometric projection, sections, developments, attributes, civil drafting, and interior design and space planning. This covers the preparation for professional work skills and advanced design courses. This course may be taken four times using different software releases.

DESGN 298 Work Experience in Design Technology 1-4 Units
Advisory: ENGRW 102 or 103, and ENGRD 116 with grade of “C” or better; OR ESR 320 and ESR 320 with grade of “C” or better; OR placement through assessment process
General Education: AA/AS Area II(b)
Hours: 60-300 hours LAB
This course provides students with opportunities to develop marketable skills in preparation for employment in the architectural and engineering field. Course content includes understanding the application of education to the workforce; completion of required forms which document the student’s progress and hours spent at the work site; and developing workplace skills and competencies. Appropriate level learning objectives are established by the student and the employer. During the semester, the student is required to fulfill a weekly orientation and 75 hours of related paid work experience, or 60 hours of unpaid work experience for one unit. An additional 75 or 60 hours of related work experience is required for each additional unit. The weekly orientation is required for first time participants, returning participants are not required to attend the weekly orientation but are required to meet with the instructor as needed to complete all program forms and assignments. Work Experience may be taken for a total of 16 units when there are new or expanded learning objectives.

DESGN 300 Introduction to Design Resources 3 Units
Advisory: ENGWR 102 or 103, and ENGRD 116 with a grade of “C” or better; OR ESR 320 and ESR 320 with a grade of “C” or better; OR placement through assessment process.
Course Transferable to CSU
Hours: 54 hours LEC
This course is a survey of the resources that are used in the architectural and engineering professions for design planning, evaluation, and selection. It covers the methods and techniques used to determine human resources, evaluate and select materials for design, and disseminate design information.

DESGN 308 Three Dimensional Design-Solids Modeling 3 Units
Prerequisite: DESGN 100, 300, and 320 with grades of “C” or better
Corequisite: DESGN 102.
Advisory: ENGRW 102 or 103, and ENGRD 116; OR ESR 320 and ESR 320
Course Transferable to UC/CSU
Hours: 36 hours LEC; 72 hours LAB
This course covers CADD applications of three dimensional graphic design using AutoCAD solid modeling, mechanical desktop, and solid works software. Topics include the development and techniques for producing wire frame, surface, and solid models and their application in architectural and mechanical design. This course may be taken 4 times on different software releases.

DESGN 310 Graphic Analysis 3 Units
Prerequisite: DESGN 100 with a grade of “C” or better.
Advisory: Design Technology 102.
Course Transferable to CSU
Hours: 36 hours LEC; 72 hours LAB
This course covers CADD applications of the orthographic projection and geometric construction principles to solve technical problems as well as graphical analysis of the true length, true shape, true angle in the solution of engineering and architectural problems. This course satisfies the transfer requirements to CSUS for engineering, engineering technology, and design technology students.

DESGN 320 Three Dimensional Graphics and Design 3 Units
Advisory: ENGRW 102 or 103, 116 or ESR 320 and ESR 320 or placement through assessment process
Course Transferable to UC/CSU
Hours: 36 hours LEC; 72 hours LAB
This course includes instruction and practice in freehand engineering computer and architectural technical expression in various graphic media. Additionally, it will cover the development of design solutions represented in freehand perspectives, 3-D CADD, and various software applications, photostat, mass modeling design projects will be included.
DESIGN 330 Machine Design 4 Units
Prerequisite: DESGN 308 and 310 with grades of “C” or better
Course Transferable to CSU
Hours: 54 hours LEC, 54 hours LAB
This course covers machine and mechanical system design through the study of mechanical system applications. Basic production documentation is applied to a variety of industrial and commercial products, utilizing orthographics, sections, auxiliaries, tolerance reviews, geometric dimension and tolerancing (GDT), as well as the creation of facility and production plans. Emphasis is placed on the current American National Standards Institute (ANSI) standard for geometric dimension and tolerancing and its application to working drawings. Applications emphasize green technology concerns, such as water and energy conservation in industrial, commercial, or municipal settings.

DESIGN 340 Architecture and Construction 5 Units
Prerequisite: DESGN 102, 310, and 320.
Course Transferable to CSU
Hours: 54 hours LEC, 108 hours LAB
This course covers individual and group exercises simulating typical design, drafting and procedures in architecture and construction. The course focuses on residential design and light commercial wood frame construction.

DESIGN 350 Surveying and Construction Measurement Techniques 4 Units
Prerequisite: DESGN 102, DESGN 310 with a grade of “C” or better.
Advisory: Math 120.
Course Transferable to CSU
Hours: 54 hours LEC, 54 hours LAB
This course covers basic measurement and alignment techniques used in light and heavy construction for design technology analysis. Additionally, the course includes site, road staking, cut and fill calculations, and elementary surveying principles.

DESIGN 360 Commercial Engineering Design and Drafting 5 Units
Prerequisite: DESGN 102 and 310 with a grade of “C” or better.
Advisory: Design Technology 320.
Course Transferable to CSU
Hours: 54 hours LEC, 108 hours LAB
This course employs individual and group exercises simulating typical design and engineering problems in structures, land planning, and environmental systems in buildings. Design solutions are presented by freehand, manual drafting, and CADD application. The course includes both individual and team design problems.

DESIGN 405 Advanced Computer-Aided Drafting and Design (CADD) 3 Units
Prerequisite: DESGN 340 or 360 with a grade of “C” or better.
Course Transferable to CSU
Hours: 36 hours LEC, 72 hours LAB
This course emphasizes the study of electronic graphical data development, manipulation techniques, and research data retrieval within the areas of architectural and mechanical, and civil engineering applications. Data base development is applied to various technical design problems incorporating the design process. This course may be taken four times on different software versions.
