College-Level Examination Program Scores

American River College grants credit for College Level Examination Program (CLEP) examinations. CLEP scores may be used to meet American River College AA/AS general education requirements and California State University (CSU) general education requirements; they do not fulfill graduation competencies, requirements for any major at American River College, or enrollment limitations (such as prerequisite requirements) for any course at American River College.

A student may receive credit for CLEP exams they have successfully passed once the following requirements are met:

- Official copies of test scores are on file with Admissions and Records
- Student has completed twelve (12) units of credit and has a minimum 2.0 grade point average (GPA)

Visit College Board’s College Level Examination Program (https://clep.collegeboard.org/) website to learn more.

CLEP scores are not accepted for transfer to the University of California. Students should be aware that other colleges and universities have the right to accept, modify, or reject the use of CLEP scores towards their graduation requirements. Check with your counselor to determine whether these test results will be accepted at the transfer institution of your choice.

CSU CLEP Credit

Visit CSU’s CLEP webpage (https://www2.calstate.edu/apply/transfer/Pages/college-level-examination-program.aspx) to find information on how credit is granted for admission and general education. Please note that each campus in the CSU system individually determines how it will apply external examination credit in the major. For more information about CLEP credit, consult a counselor.
International Baccalaureate Test Scores

American River College may award college credit for international baccalaureate (IB) higher-level (HL) course completion, if the course work is compatible with the college's curriculum. IB test scores may be used to meet American River College AA/AS general education requirements, California State University (CSU) general education requirements, and Intersegmental General Education Transfer Curriculum (IGETC). No credit will be granted for lower-level course work completed in the IB program.

A student may receive credit for IB tests they have successfully passed once the following requirements are met:

- Official copies of test scores are on file with Admissions and Records
- Student has completed twelve (12) units of credit and has a minimum 2.0 grade point average (GPA)

Students should be aware that other colleges and universities have the right to accept, modify, or reject the use of IB scores towards their graduation requirements. Check with your counselor to determine whether these test results will be accepted at the transfer institution of your choice.

Students who have earned credit from an IB exam should not take a comparable college course because transfer credit will not be granted for both.

American River College General Education International Baccalaureate Credit

The use of IB exam scores for American River College course credit and general education is determined by American River College policy.

Introduction
Credit for Military Experience

Military Service Transcripts

Students must send an official military transcript to American River College before petitioning for course credit for prior military education, training, and service.

The Joint Services Transcript (JST) is an academically accepted document used to validate an Army, Coast Guard, Marines, or Navy service member's military experience and training with the corresponding college credit recommendations. See Request Official Joint Services Transcript (https://jst.doded.mil/official.html).

Contact the Veterans Resource Center (https://arc.losrios.edu/veterans) for assistance.

How to Apply for Military Credit

Credit for Military Education and Training

Military personnel and veterans may receive course credit for prior military education and training.

How to Apply

Submit a completed Petition for Credit for Military Education and Training or Service (shared/doc/admissions-records/forms/credit-for-military-education-training-or-service.pdf) and an official copy of your Joint Services Transcript to Admissions and Records for review. The college will consider the credit recommendations of the American Council for Education when determining the awarding of credit for courses with subject matter similar to that of the student's military education and training. You must be currently registered as a student and in good standing to receive credit.

Credit for Military Service

Veterans may receive credit for military service.

How to Apply

Submit a completed Petition for Credit for Military Education and Training or Service (shared/doc/admissions-records/forms/credit-for-military-education-training-or-service.pdf) and a copy of your DD-214 to Admissions and Records for review. You may be eligible to receive four (4) units of living skills graduation requirements.

If you have already submitted your DD-214 to receive veteran benefits, then you are not required to submit a second copy to receive Military Service Credit.

How to Use This Catalog

An Important Resource

This college catalog is a vital resource for you as a student at American River College. Please spend some time becoming familiar with the information in this catalog – it can be a key tool in your academic success.

Changes

It's important to keep in mind that policies and regulations are subject to change. Many of these changes are dictated by the State of California or federal agencies. This catalog captures the latest information as of the publish date, but changes happen on a regular basis. For updated information, please consult the college website.

Official Updates

If there are significant changes – such as new courses, programs, or regulations – the college will publish a catalog update online (similar to an "addendum" in a print catalog). If updates are published, then they will typically appear in September and/or November of each year, but may be added at other times if critical content updates are necessary. Throughout the year, the catalog website (https://arc.losrios.edu/catalog) will always include the most current catalog content.
Career Education Program Changes

Please be aware that the required courses for career education (formerly career and technical education, or CTE) programs are subject to change due to state, regional, and federal agencies. It's important to meet with a counselor to stay on top of any potential changes to these programs.

About This Catalog

Every effort has been made to ensure that what is stated in this catalog is accurate. The courses and programs we offer, together with other information contained in this online catalog, are subject to change without notice by the administration of the Los Rios Community College District and American River College for reasons related to student enrollment, level of financial support, or for any other reason, at the discretion of the district and American River College. The district and American River College further reserve the right to add, amend, or repeal any of their rules, regulations, policies, and procedures.
College Safety and Security

At American River College, we are committed to maintaining a safe learning environment and supporting an ongoing comprehensive safety program. The Los Rios Police Department (LRPD) employs sworn police officers who are certified through California Peace Officers Standards and Training (POST) and are responsible for protecting life and property across the district.

LRPD has excellent working relationships with other law enforcement agencies and emergency service providers in our neighboring communities. These strong partnerships help support more effective responses in emergency situations.

Learn more about Los Rios Police Department (https://police.losrios.edu).

About American River College

American River College's beautiful 153-acre main campus is in the suburbs of Sacramento, California, on the old Cameron Ranch. We enroll approximately 30,000 students each spring and fall, making it one of the larger higher education institutions in California. Our vision is to transform the future of all students and our community through inclusive, equitable education.

We offer a large selection of academic and career-oriented associate degrees and programs designed to prepare students to enter the workforce or transfer to complete their bachelor's degree. We are a feeder school for many of the four-year universities in the area, including California State University (CSU) Sacramento and University of California (UC) Davis. In fact, American River College transfers more students to CSU Sacramento and UC Davis than any other community college in California.

Crime Prevention

American River College actively supports crime prevention through a number of programs.

Emergency Automobile Assistance

Though they are not mechanics, Los Rios Police officers are equipped and trained to start cars with dead batteries or unlock non-electric car doors. Proper identification is required for the performance of these services.

Unlawful Weapons

California Penal Code Section 626.9 (h) prohibits the possession of a firearm on college grounds.

The California Penal Code Section also prohibits the possession of knives 626.10, switchblade 21510, pepper spray 22810 (e) and Tasers/Stun Gun 626.10.

Alcohol

Consumption of, or being under the influence of, alcohol while on campus is strictly prohibited. Violators are subject to suspension, expulsion, and/or criminal prosecution (per Los Rios Policy P-2443: Drug and Alcohol-Free Workplace and College Premises (shared/doc/board/policies/P-2443.pdf)).

Emergency Telephones

Outdoor, emergency telephones have been installed at strategic locations throughout the campuses. These blue phones, when accessed, will automatically connect the caller to the Los Rios Police Department.

Emergency Alerts and Rave Guardian App

In the event of an emergency or disaster, Los Rios will provide critical information to students and employees via an emergency alert system.

Additionally, as part of our ongoing commitment to campus safety, the Los Rios Police Department launched Rave Guardian, a free mobile safety app that turns your smartphone into a personal safety device.

Learn more about emergency alerts and Rave Guardian App (https://police.losrios.edu/emergencies/emergency-alerts).

Illegal Drugs

American River College is committed to being a drug-free campus. Violators will be subject to disciplinary procedures. The use, sale, or possession on campus of, or presence on campus under the influence of, any controlled substance is strictly prohibited. Violators are subject to suspension,
expulsion, and/or criminal prosecution (per Los Rios Policy P-2441: Standards of Conduct (shared/doc/board/policies/P-2441.pdf) and Los Rios Policy P-2443: Drug and Alcohol-Free Workplace and College Premises (shared/doc/board/policies/P-2443.pdf)).

**Children on Campus**

It is not appropriate for children to attend classes with their parents. All children on campus must be under the direct supervision of a parent, guardian, or other authorized adult. Unattended or disruptive children will be reported to the proper authorities.

**Parking**

Vehicles that do not have a valid semester parking decal or daily permit properly displayed will be issued a parking citation. There is a $283 fine for parking in designated disabled spaces (including hatch marks next to disabled spaces) without a state-issued disabled decal or plate.

**Sexual Harassment**

Sexual harassment in any situation is unacceptable and is in violation of state and federal laws and regulations. Corrective action will be taken where evidence of sexual harassment is found (per Los Rios Policy P-2424: Sexual Harassment (shared/doc/board/policies/P-2424.pdf)).

**Hate Crimes**

Hate crimes include any of the following offenses that are motivated by bias:

- Murder/non-negligent manslaughter, negligent manslaughter, sexual assault, robbery, aggravated assault, burglary, motor vehicle theft, arson
- Larceny-theft: The unlawful taking carrying, leading or riding away of property from the possession or constructive possession of another
- Constructive possession: the condition in which a person does not have physical custody or possession, but is in a position to exercise dominion or control over a thing
- Simple assault: an unlawful physical attack by one person upon another where neither the offender displays a weapon, nor the victim suffers obvious severe or aggravated bodily injury involving apparent broken bones, loss of teeth, possible internal injury, severe laceration, or loss of consciousness
- Intimidation: To unlawfully place another person in reasonable fear of bodily harm through the use of threatening words and/or other conduct, but without displaying a weapon or subjecting the victim to actual physical attack
- Destruction, damage, vandalism: To willfully or maliciously destroy, damage, face, or otherwise injure real or personal property without the consent of the owner or the person having custody or control of it

**Mission, Vision, and Values**

**Our Mission**

American River College places students first in providing an academically rich, inclusive environment that inspires critical thinking, learning and achievement, and responsible participation in the community.

American River College, serving the greater Sacramento region, offers education and support for students to strengthen basic skills, earn associate degrees and certificates, transfer to other colleges and universities, and achieve career as well as other academic and personal goals.

**Our Vision**

Transform the future of all students and our community through inclusive, equitable education.

**Our Commitment to Social Justice and Equity**

American River College strives to uphold the dignity and humanity of every student and employee. We are committed to equity and social justice through equity-minded education, transformative leadership, and community engagement. We believe this commitment is essential to achieving our mission and enhancing our community.

**Campus Traffic Regulations**

Los Rios Police Department (LRPD) enforces the California Vehicle Code (CVC) and board-approved regulations on grounds designated for vehicle parking and traffic.
For more information, see parking regulations (https://police.losrios.edu/parking-resources/parking-regulations).

Accreditation

The Los Rios Community College District consists of four comprehensive, public California community colleges: American River College, Cosumnes River College, Folsom Lake College, and Sacramento City College. American River College is accredited by the Accrediting Commission for Community and Junior Colleges (ACCJC) of the Western Association of Schools and Colleges, an institutional accrediting body recognized by the Council of Higher Education Accreditation and the US Department of Education. The American River College educational centers are fully accredited under the college’s accreditation status.

Additionally Accredited Programs

The following American River College programs are accredited by other external agencies.

- The Automotive Technology Program is accredited by the National Automotive Technical Education Foundation (NATEF) (https://www.aseedfoundation.org/).
- The Child Development Center is accredited by the National Association for the Education for Young Children (https://www.naeyc.org/accreditation).
- The Dietary Manager (Dietary Service Supervision) option is accredited by the California State Department of Public Health (https://www.cdph.ca.gov/).
- The Fire Technology Program is accredited by the California State Fire Marshal’s Office (https://osfm.fire.ca.gov/).
- The Funeral Service Education Program is accredited by the American Board of Funeral Service Education (ABFSE) (https://www.abfse.org/).
  - Address: 992 Mantua Pike, Suite 108, Woodbury Heights, NJ 08097
  - Phone: (816) 233-3747
  - Email: exdir@abfse.org
- The five occupational Gerontology degrees are accredited by the Accreditation for Gerontology Education Council (https://geroaccred.org/).
- The five Gerontology certificates of achievement are recognized as Programs of Merit by the Academy for Gerontology in Higher Education (AGHE), which is the academic arm of the Gerontological Society of America (https://www.geron.org/) (GSA).
- The Human Services Program is a recognized program by the California Association of DUI Treatment Programs (https://cadtp.org/) (CADTP), which offers certification in alcohol and drug counseling.
- The Human Services option, Chemical Dependency Studies, is accredited by the California Consortium of Addiction Programs and Professionals (https://www.ccapp.us).
- The Legal Studies Program is accredited by the American Bar Association (https://www.americanbar.org/topics/paralegal/).
- The AS Nursing Program is accredited by the California State Board of Registered Nursing (https://www.rn.ca.gov/).
- The Paramedic Program is accredited by the Commission on Accreditation of Allied Health Education Programs (https://www.caahep.org/) upon the recommendation of the Committee on Accreditation of Educational Programs for the Emergency Medical Services Professions (CoAEMSP).
  - Address: 361 Park Street, Clearwater, FL 33756
  - Phone: (727) 210-2350
- The Respiratory Care Program is accredited by the Commission on Accreditation for Respiratory Care (https://www.coarc.com/) (CoARC).
  - Address: 1248 Harwood Road, Bedford, TX 76021
  - Phone: (817) 283-2835

Reporting a Crime/Incident

To report an on-campus crime or incident, see crime and reporting (https://police.losrios.edu/crime-and-reporting) on the Los Rios Police Department website.

Board of Trustees and Chancellor

The Board of Trustees is the governing body of Los Rios Community College District.

The board is responsible for the educational, physical, and financial well-being of the district. The board also sets legal policy for the district.

The board is composed of seven board members who are elected to four-year terms by registered voters. The board also includes a non-voting student trustee who is elected by students.

Board Members

Ms. Pamela Haynes
Mr. Dustin Johnson
Mr. Robert Jones
Mr. John Knight
Ms. Tami Nelson
Ms. Deborah Ortiz
Ms. Kelly Wilkerson
Student Trustee

Chancellor

Dr. Brian King
Getting Started

Clery Report

Each year, the Los Rios Police Department publishes the Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Report (also known as the Annual Clery Report). This report includes information about our safety and security policies and specific crime statistics.

Academic Calendar

Fall 2023

Fall 2023 starts August 19, 2023 and ends December 14, 2023.

<table>

Student Rights and Responsibilities

How to Enroll

Apply Now

Guarantee your admission to American River College by completing the online application to American River College (https://www.opencccapply.net/cccarry-cccapply-welcome?cccMisCode=231).

Note: You must submit a new application any time you have a break of enrollment where you do not attend for a year or more.

When applying to one college in the Los Rios Community College District, you are able to enroll in all four colleges (American River College, Cosumnes River College, Folsom Lake College, and Sacramento City College).

Save Money

To qualify for the Los Rios Promise and other programs, fill out the Free Application for Federal Student Aid (FAFSA) or the California Dream Act Application (CADAA). Learn more about how to save money with financial aid (https://arc.losrios.edu/save-money).

Other Admissions Tips

- Submit your high school and/or college transcripts to be placed automatically into English and mathematics courses that match your skill level. Learn more about placement (https://arc.losrios.edu/admissions/placement). English as a Second Language (ESL) assessment testing is still available via assessment testing (https://arc.losrios.edu/admissions/placement/assessment-testing).
- Participate in orientation for new students (https://arc.losrios.edu/admissions/orientation).

Academic Rights and Responsibilities

The classroom (including laboratories, field trips, independent study, and so on) is the essential part of any college where freedom to learn should flourish. The instructor has the responsibility for the manner of instruction and the conduct of the classroom. The instructor should not act in any way that denies the rights of students as set forth below (Administration Regulation R-2411: Student Rights and Responsibilities (shared/doc/board/regulations/R-2411.pdf)).

Student Academic Rights

Student Publications

In preparing student publications, the editorial staff and faculty advisors shall be free from censorship and advance copy approval except as provided by published district policy, statutes, or college regulation. These publications should do the following:

- Adhere to canons of responsible journalism, such as avoidance of libel, indecency, undocumented allegations, attacks on personal integrity, and the techniques of harassment and innuendo.
- State on the editorial page that the opinions expressed are not necessarily those of the college or the student body.

Support Causes

Students shall have the right to:

- Take stands on issues
- Examine and discuss questions of interest to them
- Support causes by orderly means which are in harmony with the regular functioning of the institution

Free Assembly and Free Speech

Students shall have the right to hear speakers on any subject and college recognized student organizations shall have the right to present speakers on any subject. In addition, students shall have the right of free assembly on each campus subject to regulations that assure the regular functioning of the institution.
The policies and regulations shall include reasonable provisions for the time, place, and manner of conducting these activities, but shall not prohibit the right of students to exercise free expression including, but not limited to, the use of bulletin boards, the distribution of printed materials or petitions, and the wearing of buttons, badges, and other insignia.

Expression which is obscene, libelous, or slanderous according to current legal standards, or which so incites students as to create a clear and present danger of the commission of unlawful acts on college premises, or the violation of lawful district or college regulations, or the substantial disruption of the orderly operation of the college, shall be prohibited.

Free to Organize

Students shall have the right to form an organization around any particular interest. This right includes the freedom to organize and to join student organizations subject to published college and district regulations.

Voice in Decision-Making

Students shall have the right to be informed on all college matters that can be shown to be directly relevant to them by having a voice in decision making that affects their academic future, with the exception of staff appointment, termination, and tenure.

In case of conflict in determining what college matters are relevant to students, the determination will be made by a college-designated student, faculty, and administrative committee.

In addition, student representatives shall be members of all faculty and administrative committees related to students' concerns; such student representatives shall have a vote as committee members.

Confidentiality

Students shall have the right to have their academic records treated in a confidential and responsible manner with due regard to the personal nature of the information these records contain. Students' records will be released only on the written consent of the students or as provided by law. Learn more about access to student records (https://arc.losrios.edu/access-to-student-records).

Academic Evaluation

Students shall have the right of protection against prejudiced or capricious academic evaluation. At the same time, students are responsible for maintaining standards of academic performance established in advance for each course in which they are enrolled.

Grievance Procedure

Students shall have the right to file a grievance as outlined in Administrative Regulation R-2412: Student Grievance Procedures (shared/doc/board/regulations/R-2412.pdf), in the event of an alleged breach of their rights. American River College's designated grievance officer will hear grievances of students who believe their academic rights have been denied or violated.

Go to Class-Related Concerns (https://arc.losrios.edu/class-related-concerns)

Student Responsibilities

The Expectations of the College

Admission to college assumes the expectation that the student will:

- Be a responsible member of the college community
- Obey the law
- Comply with the published rules and regulations of the college
- Respect the rights, privileges, and property of the other members of the college community
- Not interfere with legitimate college affairs

Students enrolled in a class are responsible for meeting standards of performance and conduct established by the Los Rios Community College District and the instructor. Students are responsible for registering, "adding," and "dropping" classes in a timely fashion to make sure that other students have an opportunity to take classes. Students are responsible for completing and submitting all class assignments, examinations, tests, projects, reports, and so on by scheduled due dates, or face penalties.

If any problem arises regarding coursework or attendance, the student will be held responsible for initiating communication and contact with the instructor. In addition, students will be held responsible for behavior and conduct adverse to the preservation of order as established by the college and the instructor. Students are responsible for meeting their degree requirements as provided in the college catalog.

See Students Standards of Conduct (https://arc.losrios.edu/standards-of-conduct)

Students also have the responsibility to use information technology resources effectively. Each user has the responsibility to:

- Use the resources appropriately and efficiently
- Respect the freedom and privacy of others
• Protect the stability and security of the resources
• Understand and fully abide by established college policies and applicable public laws

In the case of student conduct that involves an alleged or proven violation of criminal law, the disciplinary authority of the college will not be used to duplicate the function of criminal authority. Disciplinary action may be taken if the conduct also involves a violation of district or college policy.

See Student Disciplinary Procedures (https://arc.losrios.edu/student-discipline)

Challenges to Matriculation Process

Students can elect to not participate or be exempt from most or parts of the matriculation process based on the following criteria:

1. The student has completed an associate degree or higher.
2. The student satisfies at least two of the following:
   - The student has identified a goal of upgrading job skills
   - The student has enrolled for fewer than 12 units
   - The student is concurrently enrolled in another post-secondary institution
   - The student has declared no degree or occupational objective

Participation in matriculation activities does not provide enhancement in priority registration and students who elect not to participate in these activities will not receive a less favorable priority registration date as a result. Matriculation activities are intended to promote student success and Los Rios encourages students to participate.

Access to Student Records (FERPA)

Use and Release of Student Information

The Family Educational Rights and Privacy Act of 1974 (FERPA) was designed to protect the privacy of educational records and to establish the rights of students to inspect and review their educational records. It also provides control over the release of educational record information. The original intent of this legislation was to keep elementary and high school records private and to give parents access to their child's school records.

After a student turns eighteen or attends an institution of higher education (a college or university), the rights of access to the student's records transfer to the student. This means that all academic information regarding a college student goes directly to the student unless the student has given specific, written permission to release that information to someone else.

Though parents understandably have an interest in their child's academic progress, they are not automatically granted access to a student's records without the written consent of the student. Parents are encouraged to consult with the student if academic information is needed.

A student can give permission for a third party to access their records by filing a Student Consent for Release of Records Form (shared/doc/admissions-records/forms/student-consent-for-release-of-student-records.pdf) with the Admissions and Records office.

The security of student information is very important to us, which is why we will not discuss student records over the phone. This includes resetting a student's password. If you do not remember your password reset questions, then you must come to the campus or one of the outreach centers in person with photo identification.

To obtain a copy of your records – including your current enrollment – you can log in to eServices (https://ps.losrios.edu/student/signon.html) or come to campus in person with photo identification. You can order your official transcripts online (https://arc.losrios.edu/order-transcripts).

Student Rights Under FERPA

Students have the right to:

1. Inspect and review their own education records within a reasonable time after the college receives a request for access. If a student wants to review their record, then they should contact the Vice President of Student Services for a petition. Education records include any item of information directly related to an identifiable student maintained by the district or college or required to be maintained by an employee in the performance of the employee's duties, whether that information is recorded by handwriting, print, tapes, files, microfilm, electronically, or by other means. Education records do not include: directory information, information provided by a student's parent related to financial aid or scholarships, information prepared by and that remains in the sole possession of the person who created it, certain medical records, and decisions reached as a result of disciplinary hearings. Education records are maintained by the offices that generate or receive those records and the manager of those offices is responsible for the maintenance of those records. The Admissions and Records Office at each college maintains a log of those persons who have been given access to education records as required by FERPA.

2. Request an amendment of their education record if a student believes it is inaccurate or misleading. If a student feels there is an error in their record, then the student should submit a statement to the college official responsible for the record, clearly identifying the part of the record they want to be changed and why they believe it is inaccurate or misleading. That office will notify the student of their decision and advise of any appropriate appeal rights.

3. Consent to disclosure of personally identifiable information contained in the student's education records, except to the extent that FERPA authorizes disclosure without consent. There are several exceptions that permit disclosure without consent, including but not limited to: Disclosure to school officials with “legitimate educational interests.” School officials are employees of the district and its colleges, agents with which the district or college has contracted to provide services, the board of trustees, or students serving on a...
committee or assisting another school official in the performance of their tasks. A legitimate educational interest exists when the school official has a need to know the information in connection with their official duties.

- “Directory information,” which includes a student's name, identification number, major field of study, participation in officially recognized activities and sports, weight and height of members of athletic teams, dates of attendance, degrees and awards received, and most recent previous public or private school attended by the student. A student has the right to withhold the release of directory information. To do so, the student must complete a form, which is available in the Admissions and Records Office.

However, placing a “No Release” on a student's records means that no one including friends, parents, prospective employers, honor societies, or any other group or individual will be able to obtain this information.

- Disclosures to officials of another school, school system, or institution of postsecondary education where the student seeks or intends to enroll, or where the student is already enrolled, so long as the disclosure is for the purpose related to the student's enrollment or transfer.

4. File a complaint with the US Department of Education concerning alleged failures by the district or college to comply with the requirements of FERPA. Further information about FERPA and student records can be found in the District Policy P-2265: Access to Student Records (shared/doc/board/policies/P-2265.pdf) and Regulation R-2265: Access to Student Records (shared/doc/board/regulations/R-2265.pdf) or at the college office of the Vice President of Student Services.

Submit Transcripts and Test Scores

Unofficial Transcripts and Test Scores

Students can submit unofficial transcripts from colleges and universities outside of Los Rios – as well as unofficial test scores – to use for educational planning with a counselor and to meet prerequisites.

Email unofficial transcripts and test scores to recadmis@arc.losrios.edu or bring them with you to a counseling appointment.

Official Transcripts and Test Scores

American River College (ARC) requires official transcripts and test scores from colleges and universities outside of Los Rios if you are pursuing a degree or certificate, plan to apply for financial aid, or receive veterans educational benefits. If you are planning to graduate from ARC and you have transcripts from any institution other than a California community college, it is required that you make an appointment with an academic counselor to complete a curriculum planning sheet prior to petitioning to graduate.

Submit by Mail

Mail official transcripts and test scores to:

American River College
Attn: Admissions
4700 College Oak Drive
Sacramento, CA 95841

Submit by Email

Official transcripts can be sent electronically to recadmis@arc.losrios.edu, but they must come directly from the college or university.

Contact Admissions and Records at (916) 484-8261 if you have questions.

Transfer Credit Acceptance

We accept coursework from colleges and universities that are accredited by the following regional bodies:

- Accrediting Commission for Community and Junior Colleges, Western Association of Schools and Colleges (ACCJC)
- Higher Learning Commission (HLC)
- Northwest Commission on Colleges and Universities (NWCCU)
- Southern Association of Colleges and Schools Commission on Colleges (SACSCOC)
- Middle States Commission on Higher Education (MSCHE)
- New England Commission of Higher Education (NECHE)
- WASC Senior College and University Commission (WSCUC)

We do not accept coursework that is remedial or post-baccalaureate in nature. Transfer credit may not be reflected on your records, but it is kept on file for use in completion of degrees or certificates.
Foreign Transcript Evaluation

Students who want to use coursework from a foreign (non-US) college or university need to have their transcript(s) evaluated through a company that is a current member of the National Association of Credential Evaluation Services (NACES) (https://www.naces.org/members) or Association of International Credential Evaluators, Inc. (AICE) (http://www.aice-eval.org/). When you get your transcript evaluated, make sure you ask for:

- A course-by-course evaluation
- A breakdown of coursework into general education academic areas
- Whether unit values are in semester or quarter units
- What coursework is lower division, upper division, or graduate level

Be advised that these evaluation services are fee-based. We highly recommend you meet with a counselor for further guidance on your educational goal before obtaining an evaluation.

- Degrees from accredited institutions outside of the US will be evaluated on a case-by-case basis (see Board Policy P-7241: Graduation Requirements, section 2.3.7 (shared/doc/board/policies/P-7241.pdf)). All lower-division and upper-division credits completed will be accepted as elective credits that count towards an associate degree at American River College. No credits are granted for graduate-level courses.
- Students who wish to be granted credit for specific American River College general education areas may meet with a counselor and provide English-translated course descriptions for course certification.
- To determine course equivalency eligibility towards major requirements for a degree or certificate of achievement at American River College, the student will need to petition for course substitution with the advisement of their counselor. An English-translated course description from your prior university will be required in support of the review of these courses. Course descriptions may be available within the college/university catalog, where the courses were offered and completed.
- Foreign coursework from non-United States regionally accredited institutions cannot be used to meet California State University General Education-Breadth requirements, Intersegmental General Education Transfer Curriculum (IGETC) requirements, and associate degree for transfer requirements. Though four-year universities may accept international courses, the evaluation of such courses is determined independently by each transfer institution.

Alcohol, Drug, and Smoking Policy

Alcohol and Drug Policy

The abuse of illicit drugs and alcohol disrupts classes, compromises your physical and mental health, subjects you to criminal penalties, and impairs your ability to benefit from the learning experience. We therefore ask the college community to actively support a drug- and alcohol-free learning environment by knowing and making others aware of college policies and the substantial health and legal consequences of abuse.

District Policy

Policy P-2443: Drug and Alcohol-Free Workplace and College Premises (shared/doc/board/policies/P-2443.pdf) states that the district "is committed to maintaining a drug- and alcohol-free workplace in accordance with the requirements of the US Drug-Free Workplace Act of 1988, and a drug- and alcohol-free college environment for students and employees in accordance with the requirements of the Drug-Free Schools and Community Act Amendment of 1989."

Legal Sanctions

The Los Rios Standards of Student Conduct prohibit the use, sale, or possession on campus of, or presence on campus under the influence of, any controlled substance. Controlled substances include cocaine, marijuana, LSD, heroin, methadone, mescaline, peyote, and methaqualone, among others.

If you abuse drugs or alcohol on campus, or appear on campus or at a college-sponsored function under the influence of drugs or alcohol, you can be suspended, expelled, and/or criminally prosecuted. The penalties for the more common offenses are:

- Possession or use of alcohol: year in jail and/or fine
- Possession of marijuana: criminal citation and fine
- Possession of cocaine: imprisonment in a state prison
- Sales of any illegal drug: imprisonment in a state prison
- Possession or use of alcohol by a minor: one year in jail and/or fine
- If you are a student employee, you may be terminated
- You are required to report any convictions within five days of the occurrence
- You will be ineligible for financial aid

Smoking Policy

Per section 2.23 of Regulation R-1411: Use of Facilities (shared/doc/board/regulations/R-1411.pdf), smoking, vaping, and the use of tobacco is prohibited on all district/college property. Smoking is defined as inhaling, exhaling, burning, or carrying any lighted or heated cigar, cigarette, pipe, or
any other lighted or heated tobacco or other product intended for inhalation, in any matter or in any form. Smoking also includes the use of e-cigarettes. An e-cigarette is any oral device that provides a vapor of nicotine or any other substance for inhalation. E-cigarettes do not include products approved by the United States Department of Food and Drug Administration for medical treatment.

Computer and Internet Use Policy

Computer Use Policy

The following rules apply to all computer labs on campus. Specific labs may have additional rules.

General Rules

- Equipment use in the lab is intended for class assignments only - use of computers is closely monitored for compliance with acceptable use standards
- Computers are available on a first-come, first-served basis
- Food and/or drinks (including water bottles) are not allowed in computer labs at any time
- Children (under 18) are not allowed to use computer equipment unless they are current American River College students
- Report problems with computers and/or printers to computer lab staff
- A valid login may be used for assigned purposes only – sharing access with others is not permitted
- All downloading and saving must be to removable media
- Playing games on college computers is prohibited except for class assignments
- When you’re done, log off the computer but don’t turn the computer off
- Directions from any lab assistant or instructor concerning equipment/facilities or student conduct must be followed in order to continue use of the facilities

Respect Those Around You

- Bring your own headphones for sound control.
- Pets are not allowed, except for service animals.
- Keep noise to a minimum
- Use one workstation per person
- Keep backpacks out of the walkways
- Turn off or silence cell phones and pagers and answer phone calls outside of the lab

Software

- Software may not be copied from computers or network drives
- Installing software or games on computers is prohibited

Internet Use Policy

Internet access is limited to classroom assignments only.

The acceptable use standards concerning internet use must be followed where applicable. The following activities are not allowed:

- Transmitting unsolicited information, which contains profane language or panders to bigotry, sexism, or other forms of discrimination
- Using the internet to gain unauthorized access to any computer
- Engaging in personal attacks (writing bullying, intimidating, threatening, or harassing entries)
- Making threats (directed towards others or yourself) without expecting the recipients of those threats, the college, and the police to consider them real
- Transmitting information that contains obscene, indecent, lewd, or lascivious material or other material that explicitly or implicitly refers to sexual conduct. This includes displaying such material where other individuals could potentially view it
- Inappropriate mass mailing, which includes multiple mailing to news groups, mailing lists, or individuals

Attempts by students to obtain, manipulate, delete, or change the contents of another user's files, passwords, etc. are regarded as infractions of the California Computer Crime Penal Code. Attempts to “break” the operating system constitute a felony under this law.
Placement and Assessment Services

Standardized assessment tests are no longer administered for placement into English and math classes. An English as a Second Language (ESL) test is still offered.

Placement results are used by academic counselors to determine readiness for specific courses and programs. For students enrolling in English writing and math, placements may be based on a review of their academic record or on a Guided Self-Placement. For English as a Second Language (ESL) students, placement will be based on either a remote assessment completed online or an assessment completed on campus.

For English as a Second Language (ESL) assessment times, please check the English as a Second Language (ESL) Assessment Calendar (https://docs.google.com/presentation/d/1So8m3Ujk82a05iDySn4RRbv7fOn67HjxxyAmFZCAMqMg).

There are no fees for students who are taking Los Rios Placement assessments.

If you feel like you have a disability or have a verified disability and need accommodations for English as a Second Language (ESL) assessment, then contact the Disability Services and Programs for Students (DSPS) Office before you make an appointment for ESL assessment:

- Visit the DSPS webpage (http://www.arc.losrios.edu/DSPS)
- Email dsps@arc.losrios.edu

If you have an accommodation on file and choose to assess without accommodations, then you may not be given an extra assessment attempt with accommodations within a timely manner.

Getting Started With Placement and Assessment

What to Bring

- Students must complete the online college application (https://www.opencccapply.net/gateway/apply?cccMisCode=231) process and obtain a student ID number before testing/placement.
- Students must present a valid photo ID (school or government issued) for testing. The following are acceptable forms of ID:
  - Driver’s License
  - High school ID card
  - College ID card
  - State or Federal ID card
  - Passport
  - Tribal ID card
  - Naturalization card or Certificate of Citizenship
  - Green card

Placement Re-Evaluation Petition (PREP)

ARC has changed its method for placing students in the English and mathematics course sequences to use more high school record information. Students who graduated from a U.S. high school within the last ten years and who provided inaccurate or incomplete high school information on their college application may want to have their English and/or math placements reevaluated.

Please note students must be term active at ARC (enrollment within the last two semesters) by either completing the online application or the supplemental enrollment form.

To receive your course placements in English and math, submit your completed and signed Placement Re-Evaluation Petition (PREP) form and your high school transcript to the Admissions Office. Please follow the submission instructions on the cover page of this form. Be sure to submit all pages, including the cover page with the instructions, to assessment@arc.losrios.edu.

View and download the Instructions for Placement Re-Evaluation Petition (PREP) Form (arc/main/doc/ARC02-Admissions/ARC-Placement/PREP-Form-fillable.pdf).

Copyright and Piracy Policy

What is a Copyright?

A copyright is a legal protection that gives the developer of an original piece of work (intellectual or artistic) exclusive rights for a certain time period. Copyright infringement is the unauthorized use of copyrighted material.
What is Piracy?

Piracy is the recreational downloading of copyrighted materials. Piracy is a violation of both federal law and college policy. The Recording Industry Association of America (RIAA) and Motion Pictures Association of America (MPAAP) have been cracking down on piracy in the US and targeting university and college networks, since this is where the highest amount of copyright infringements occur.

What is Peer-to-Peer (P2P) Software?

Peer-to-Peer (P2P) software allows users to download and distribute files from computer to computer across networks using P2P protocols, regardless of whether the user has paid for the files. When users have not paid for these files, they break federal and international copyright laws.

Piracy is not the only down side of using P2P software. P2P software allows users to access your computer and potentially hack into your private data. The result is exposure of your computer to significant security risks from viruses, worms, and hackers that could lead to possible loss of data, identity theft, and other liabilities.

College Actions for Violation

Sharing music, videos, or other copyrighted materials using Peer-to-Peer (P2P) applications over the network exposes you and anyone you share files with to legal action.

If a notice is sent from a trusted agency to American River College, then the student's account will be blocked from accessing the WiFi network. The student in question may have to go through the college's disciplinary process to regain access.

Summary of Civil and Criminal Penalties for Violation of Federal Copyright Laws

Copyright infringement is the act of exercising, without permission or legal authority, one or more of the exclusive rights granted to the copyright owner under section 106 of the Copyright Act (Title 17 of the United States Code). These rights include the right to reproduce or distribute a copyrighted work. In the file-sharing context, downloading or uploading substantial parts of a copyrighted work without authority constitutes an infringement.

Penalties for copyright infringement include civil and criminal penalties. In general, anyone found liable for civil copyright infringement may be ordered to pay either actual damages or "statutory" damages affixed at not less than $750 and not more than $30,000 per work infringed. For "willful" infringement, a court may award up to $150,000 per work infringed. A court can, in its discretion, also assess costs and attorneys' fees. For details, see Title 17, United States Code, Sections 504, 505.

Willful copyright infringement can also result in criminal penalties, including imprisonment of up to five years and fines of up to $250,000 per offense.

AB 705 and AB 1805

AB 705
California law (Assembly Bill 705) essentially eliminated the use of assessment tests for purposes of determining the placement of students into transfer-level math and English courses in community colleges.

Research shows that California students are far more prepared than assessment tests have acknowledged. A student’s high school performance is a much stronger predictor of success in transfer-level courses than standardized placement tests.

AB 705 requires colleges to take into account high school coursework, high school grades, and high school grade point average when determining math and English placement upon enrollment.

Pathways for Course Placement
With Assembly Bill 705, there are two pathways for course placement:

Recent Graduates
Students who graduated from a United States high school in the last 10 years will receive English and math placements using high school records instead of standardized assessment tests.

Less Recent Graduates
Students who graduated more than 10 years ago, students who have foreign transcripts, and students who left high school without graduating will use a guided self-placement tool to choose the course(s) most suitable for them.

AB 1805 – Placement and Enrollment Outcomes
American River College wants to make sure students are placed fairly, equitably, and accurately in English, math, statistics, and English as a Second Language (ESL) courses. As part of that effort, we are making placement and enrollment data in these courses available to you.

The data includes the number of new students placed in English, math, statistics, and ESL courses, either with or without support. The information provided also includes the number of students who enrolled in transfer-level courses, transfer-level courses with support, degree-applicable math coursework, and transfer-level ESL courses.

As part of our equity and anti-racism efforts, we have included data by race and ethnicity, so you can see how students from different racial and ethnic groups placed and where they enrolled.

Disciplinary Procedures and Due Process
The following are the disciplinary and due process procedures for when a student is referred to the Office of Student Conduct.

1. A student who is referred for discipline is required to meet with the Student Conduct Officer. This referral means the student's alleged behavior is believed to have been a violation of the Los Rios Student Standards of Contact.
2. The student will receive a certified letter via US standard mail notifying them of their referral. In the notification, the student is instructed to make an appointment for an investigative meeting with the Student Conduct Officer.
3. At the informal, investigative meeting, the Student Conduct Officer shall interview the student for the purpose of discussing the alleged misconduct and the disciplinary action that should be taken (if any).
4. At the investigative meeting, the parties shall have the right to present statements, testimony, evidence, and witnesses, except that neither party shall have the right to be represented by an attorney.
5. The investigative meeting is mandatory. If the student fails to make an appointment and/or does not attend the meeting, then the Student Conduct Officer may review the case and initiate disciplinary action without input from the student.
6. After the investigative meeting, the Student Conduct Officer may initiate disciplinary action by filing a notice with the Vice President of Student Services and serving such notice on the student charged. This decision depends entirely on the information obtained during the investigation.
7. The student has the right to request an appeal to the disciplinary action with the Vice President of Student Services no later than seven (7) days after the service of the notice of disciplinary action. A copy of the appeal form will be mailed to you along with your notice of disciplinary action.

8. After an appeal hearing, a written decision will be mailed to the student from the Office of the President within ten days of the conclusion of the hearing.

9. At this point, the final decision for disciplinary action rests with the college president. The president may approve, reject, or modify the written decision. The decision of the college president for disciplinary action is final.

Refer to Regulation R-2442: Due Process (shared/doc/board/regulations/R-2442.pdf) for complete information regarding student standards of conduct and due process.

**Contact**

For additional information on student conduct, please contact the Student Conduct Officer:

Chad Funk (Associate Vice President, Student Services)
Email: funkc@arc.losrios.edu
Phone: (916) 484-8452
Admission Requirements and Procedures

Photo and Video Policy

The Los Rios Community College District and its colleges take photos and video of students throughout the year. These images often include students in classrooms, study areas, athletic events, etc.

American River College reserves the right to use these photographs and/or videos as a part of its publicity and marketing efforts. Students who enroll at American River College do so with the understanding that these photographs and/or videos might include them and/or their family members and might be used in college publications, both printed and electronic, and for publicity.

Admissions Eligibility

Any person who has earned a high school diploma or the equivalent – such as a certificate of proficiency issued by the State Board of Education including a General Education Development (GED) – is eligible for admission to American River College. Non-high school graduates 18 years of age or older who demonstrate ability to profit from a community college education may also be admitted.

There are four main types of students who attend American River College:

First-Time College Students

First-time college students are individuals who are a high school graduates or are at least 18 years old and never attended any college (other than those who attended while in high school).

Continuing Students

Continuing students are individuals who attended classes at any Los Rios college in the term immediately prior to the next term.

Returning or Transfer Students

All students returning after an absence or transferring from a non-Los Rios college must complete an admissions application and submit official transcripts of all other college work to the Admissions and Records Office.

Special Admit Students (Dual Enrollment)

High school students who will have started ninth grade or be at least 14 years of age by the start of classes and adult school students working on a high school diploma program may be eligible to enroll in a maximum of eleven units of community college classes each semester through Dual Enrollment program.

Plagiarism and Cheating Policy

Academic Integrity and Responsibility

Academic integrity and responsibility mean acting honestly, conscientiously, and honorably in all academic endeavors. Students are accountable for all that they say and write. Since trust is the foundation of an intellectual community, and since student work is the basis for instructors to evaluate student performance in courses, students should not misrepresent their work nor give or receive unauthorized assistance.

Academic Dishonesty

In contrast to academic integrity and responsibility, academic dishonesty takes the form of plagiarism and/or cheating.

Plagiarism

The word plagiarism comes from the Latin word "plagiarius," meaning kidnapper. Plagiarism is generally the taking of words, sentences, organization, and ideas from another source without acknowledging that source.
Plagiarism may include:
- Submitting papers, examinations, or assignments written/completed entirely or in part by others
- Directly copying portions of another’s work without enclosing the copied passage in quotation marks for written work or without citing appropriately in an oral presentation and without acknowledging the source in the appropriate scholarly convention whether the work is presented in written or oral form
- Using a unique term or concept without acknowledging the source
- Paraphrasing or summarizing a source’s ideas without acknowledging the source
- Replicating a visual presentation, representation, or performance without acknowledging the source

Cheating
Cheating is similar to plagiarism in that it involves representing another’s work as one’s own. However, cheating often involves more overtly deceptive or fraudulent acts of academic dishonesty designed to gain credit for academic work that is not one's own.

Cheating may include:
- Giving or receiving unauthorized assistance during an examination
- Fabricating or altering a source of data in a laboratory or experiment
- Collaborating with others when collaboration is not permitted, or when the contributions of others are not made clear
- Using unauthorized materials or aids during an examination, including calculators, dictionaries, or information accessed via any electronic devices
- Acquiring, without permission, tests or other academic material belonging to a member of the college faculty or staff

Admission with Transfer Credit
Students who desire academic credit for courses taken at other regionally accredited colleges and universities must submit official transcripts of that work to the Admissions & Records office. It is the student's responsibility to initiate a request to each institution asking that an official transcript of their work be sent directly to:

American River College
Attn: Admissions
4700 College Oak Drive
Sacramento, CA 95841

To be credited by American River College, the coursework must meet the following criteria:
- The course(s) must have been taken at a regionally accredited college or university.
- The course(s) must be at the undergraduate level.
- The course(s) must have been completed with a grade of D or higher. All transferred grades (including Fs) will be used in the calculation of units attempted, units completed, and the grade point average.
- For determination of course applicability/equivalency, student must meet with a counselor.

Students who have completed college- or university-level courses outside of the United States and who are requesting credit must have those transcripts evaluated by a Foreign Credit Evaluation Service. American River College will accept a foreign transcript evaluation from a current member of Association of International Credential Evaluators, Inc. (http://aice-eval.org/) (AICE) or National Association of Credential Evaluation Services (https://www.naces.org/) (NACES).

Credit for coursework/degrees will be granted if it is determined to be equivalent to that of a regionally accredited college or university in the US and is at the baccalaureate level. Once received by American River College, the evaluation becomes property of the college and is treated in the same manner as an official transcript.

Right-to-Know Program Completion
In compliance with the Student Right-to-Know and Campus Security Act of 1990, completion and transfer rates for students attending American River College can be found on the California Community College State Chancellor’s Office Student Right-to-Know Rate Disclosure Website (http://srtk.cccco.edu/index.asp).

Admission for Veterans and Dependents Using Veterans Educational Benefits
Veterans services are available to assist veterans, spouses, and children of disabled or deceased veterans who may be eligible for federal and/or state educational benefits.
Veterans and their dependents should contact American River College's Veterans Resource Center (https://arc.losrios.edu/vrc) each semester to initiate benefits. Veterans will need to provide a copy of their DD-214 and other supporting documentation. Eligibility may take several weeks to process. Eligibility is determined by the US Department of Veterans Affairs (VA).

Eligibility for Programs Eligibility for VA educational benefits can be extended to veterans, reservists, and children of service-connected deceased or disabled veterans under the following programs:

* Forever GI Bill® – Harry W. Colmery Veterans Educational Assistance Act
* The Montgomery GI Bill® (Chapter 30)
* US Department of Veterans Affairs Veteran Readiness and Employment (VR&E) (Chapter 31)
* Post-9/11 GI Bill® (Chapter 33)
* Dependents' GI Bill® (Chapter 35)
* Reservists Montgomery GI Bill® (Chapter 1606)

For more information please visit Veterans Affairs Educational Benefits (https://benefits.va.gov/gibill/).

VA requires that all credit for previous education and training is on file at American River College. Veterans and dependents are required to submit transcripts from other institutions before they meet with their academic counselor at American River College. American River College will maintain a record of the previous education and training of veterans and eligible persons – and indicate where credit has been granted, if appropriate – and the student will be notified accordingly. An evaluation of prior credit will be recorded and granted appropriately on a VA Education Plan. All recipients of VA educational benefits are required to select a major and have a VA Educational Plan on record.

In most cases, all tuition and enrollment fees, miscellaneous fees, textbooks, and class supplies are paid for by the student and not by VA. The exception is students who are using the Post 9/11 GI Bill® or Vocational Rehabilitation benefits. Students using Post 9/11 – Chapter 33, Transfer of Entitlement, Fry Scholarship, or Vocational Rehabilitation – Chapter 31 benefits must notify the Veterans Resource Center immediately after they enroll each semester to avoid being dropped for non-payment.

Principles of Excellence

American River College is a member of the White House Executive Order 13607 Principles of Excellence for Educational Institutions Serving Service Members, Veterans, Spouses, and Other Family Members. The Departments of Defense, Veterans Affairs, and Education established Principles of Excellence to apply to educational institutions receiving funding from Federal military and veterans educational benefits programs, including benefits programs provided by the Post-9/11 GI Bill. The Principles ensure that these educational institutions provide meaningful information to service members, veterans, spouses, and other family members about the financial cost and quality of educational institutions to assist those prospective students in making choices about how to use their Federal educational benefits; prevent abusive and deceptive recruiting practices that target the recipients of Federal military and veterans educational benefits; and ensure that educational institutions provide high-quality academic and student support services to active-duty service members, reservists, members of the National Guard, veterans, and military families.

Veterans Choice Act

If you're receiving veterans educational benefits, you may be able to receive in-state tuition rates under Section 702 of the Veterans Choice Act.

Eligibility Requirements for Veterans

To be eligible, all the following must be true:

* When you start school, you live in the state where your school is located
* You've served on active duty for at least 90 days since September 10, 2001
* You're receiving benefits under the Post-9/11 GI Bill, the Montgomery GI Bill Active Duty (MGIB-AD), or Veteran Readiness and Employment (VR&E)

Note: Section 702 of the Veterans Choice Act covers you only after discharge, not while you're still on active duty or while you're a member of the Active Guard Reserve (AGR).

Eligibility Requirements for Spouses or Children

To be eligible, the following must be true:

* When you start school, you live in the state where your school is located
* One of the following must be true:
  * You're using education benefits transferred from a veteran
  * You're using benefits under the Fry Scholarship and the veteran had served a period of active-duty service of at least 90 days before their death
  * You're using benefits through the Survivors' and Dependents' Educational Assistance (DEA) program
Keeping Your In-State Residency Status

You'll keep your in-state residency status as long as you remain enrolled at a Los Rios college. You can take scheduled breaks between courses, semesters, or terms, but if you discontinue and return, you won't keep your in-state residency status under the Veterans Choice Act.

Registration Priority for Veterans

All veteran students are subject to the provisions under SBI 1456. Under the provisions of California Education Code 66025.8, American River College will grant priority registration to eligible members or former members of the Armed Forces of the United States. Proof of current military status (military ID or DD214 Member4) must be submitted to the School Certifying Official. For eligibility information, please contact the Veterans Resource Center (https://arc.losrios.edu/vrc).

GI Bill® is a registered trademark of the US Department of Veterans Affairs (VA). More information about education benefits offered by VA is available at the official US Department of Veterans Affairs website (https://www.benefits.va.gov/gibill/).

Service Animals on Campus

Students and employees with a disability* who need a service animal may use a service animal (including a service animal in training) on district and college property. Therapy animals and pets are not allowed.

*A Disability must be consistent with guidelines set forth by the Americans with Disabilities Act (ADA) and the Fair Employment and Housing Act (FEHA).

Service Animal Guidelines

Service animals are subject to the following guidelines:

1. A service animal is any dog or a miniature horse that is trained to do work or perform tasks for an individual with a disability.
2. Faculty, staff, or student owners of service animals that wish to bring the animal to campus, are requested, but not required, to register their service animal with the Vice President of Student Services or Vice President of Administrative Services. Registration provides a quick way to demonstrate the service animal is properly on campus.
3. If owner applies for registration, owner must provide documentation of their service animal's current shot/vaccination records at the time of registration. Visitors should check in with the Vice President’s offices.
4. If owner applies for registration, owner must provide documentation of appropriate licenses.
5. If owner applies for registration, owner should carry proof of service animal registration when accompanied by that service animal on campus.
6. The service animal must be in good health, and free of fleas and external parasites.
7. The service animal must be on a leash at all times.
8. Owner is responsible for all cleanup of animal feces.
9. Service animals that disrupt the learning environment and the ability of others to learn may be excluded from campus.
10. Service animals that are ill, unclean, noisy, or bedraggled will not be allowed on campus.
11. Service animals that show unprovoked aggressive tendencies or are deemed potentially dangerous will not be allowed on campus.
12. Service animals are not permitted to be in the following areas: mechanical rooms/custodial closets, any room where protective gear is worn, or any room that poses a potential danger to the animal.
13. Owner will be financially responsible for any damage or cleaning costs resulting from the animal being brought on to campus. Animals that cause damage may be excluded from the campus.

Individuals who bring a service animal to campus must extend courtesy and respect to colleagues, students, and visitors in the area. Owners are required to keep service animals on a leash and should consider safety, health, and the possible fears others may have in the presence of animals.

International Student Admission

American River College welcomes students from all over the world. There are different attendance requirements for each visa type. International students are those who are attending college in the US on an F-1 visa.

American River College is approved by the US Citizenship and Immigration Services (USCIS) to issue I-20s, which students can use to apply for the F-1 visa. An international student must be enrolled in at least 12 units each semester and must maintain the same academic standards as all students, in order to comply with F-1 visa requirements.

For more information, see international student admissions (https://arc.losrios.edu/international-student).
Social Media Policy

Social Media Participation Guidelines

As an institution of higher learning, American River College – by its very nature – embraces the free and open exchange of ideas. To that end, we are committed to the community’s First Amendment rights and the core values of free speech.

We believe in fostering a thriving online community. We support the various channels of social networking – Facebook, Twitter, YouTube, Instagram, and so on – as valuable tools for engaging students, staff, faculty, alumni, friends, and supporters in a constructive two-way dialogue about American River College and its mission.

At the same time, the long-term value, vibrancy, and success of any social media community depends on a shared philosophy of how to behave. It’s important that members of our community become familiar with Facebook’s Terms of Service (https://www.facebook.com/legal/terms), Twitter’s Rules and Policies (https://help.twitter.com/en/rules-and-policies), YouTube’s Policies (https://www.youtube.com/about/policies/#community-guidelines), Instagram’s Terms of Use (https://help.instagram.com/581066165581870), and similar support sites for social media. The emphasis for all participants – including site administrators – should always be transparency, honesty, respect, and civility.

All content, information, and views expressed on social media belong to the individuals posting the content. These views do not necessarily reflect the official policies or positions of the college, district, or Board of Trustees. We are not responsible for unanswered posts or inaccurate information posted by others.

Here are guidelines for engaging in American River College social media platforms:

• Be respectful of the rights and opinions of others. Be willing to agree to disagree and move on.
• Stay on topic. Our social media sites are established as forums for the open and honest discussion of matters and developments related to – and limited to – our mission (https://arc.losrios.edu/about-us/our-values).
• Be transparent and honest.
• Add value. Be part of the conversation but don’t take it over.
• Avoid hateful speech, personal attacks, flaming, profanity, vulgarity, pornography, nudity, and abusive language.
• Keep personal information (for example, your phone number and address) out of your posts.
• Think before you post. Almost everything you write or post to a social media site – words, pictures, video – is public or can be discovered. If you post on any of our social media sites, then you consent that what you post can be published and you waive any expectation of privacy regarding the post. What you choose to add to the conversation today will live on long after the subject matter has come and gone as a topic of conversation.
• We encourage you to post comments and “like” articles, photos, and videos you enjoy.

On our Facebook, Twitter, YouTube, and Instagram pages and other social media platforms, our goal is to post interesting, entertaining, and educational content. We welcome your comments and suggestions. We encourage conversation and dialogue, but we want to ensure a respectful online environment and invigorating conversation for the broader college community. Our page administrators review posts and comments regularly to ensure any issues or concerns are addressed in a timely manner.

We may or may not reply to comments, but if it’s provocative, fair, and insightful, chances are others will engage in the conversation.

We reserve the right to determine and remove from American River College social media sites any of the following:

• Comments, links, images, or videos that are illegal or encourage illegal activity, or are obscene, defamatory/libelous/slanderous, indecent, lewd, lascivious, sexually harassing or explicit in nature, or pose risks to the health or safety of individuals
• Comments that personally attack or threaten any person
• For students, anything that would violate District policies regarding student regulations (https://losrios.edu/about-los-rios/board-of-trustees/policies-and-regulations)
• For staff and faculty, anything that would violate District policies regarding staff and faculty regulations (https://losrios.edu/about-los-rios/board-of-trustees/policies-and-regulations)
• Successive off-topic posts by one or more individuals or groups
• Repetitive posts copied and pasted or duplicated by one or more individuals or groups
• Solicitations or advertisements
• Any materials that infringe upon the intellectual property or other rights of any third party

Dual Enrollment Admission

Courses that provide enrichment and advancement in educational experience may be offered to high school and adult school students. The student must have started ninth grade or be at least 14 years old by the first day of instruction.

High school students should request information from their high school counselor regarding eligibility and complete the Special Admit Form. The high school counselor should then submit a completed Special Admit Form that has been signed by a parent and by the high school counselor or principal, and an official transcript.

After the Special Admit Form has been approved, Admissions and Records staff will enroll the student in classes. A Dual Enrollment student is not considered a continuing student when registering for classes for any subsequent semesters. It is the responsibility of the Dual Enrollment student to become familiar with, and aware of, all the requirements, processes, and deadlines pertaining to Dual Enrollment.
Standards of Conduct

Code of Conduct

A student who enrolls at American River College may rightfully expect that students, faculty, and administrators will maintain an environment in which there is freedom to learn.

Student conduct must comply with federal and state laws, college rules and regulations, and Administrative Regulation R-2441: Standards of Conduct (shared/doc/board/regulations/R-2441.pdf). Students who violate such rules and regulations are subject to disciplinary action.

Disciplinary Offenses

Any student found to have committed, or to have attempted to commit, the following misconduct is subject to appropriate disciplinary action:

- Continued disruptive behavior, continued willful disobedience, habitual profanity or vulgarity, or the open and persistent defiance of the authority of, or persistent abuse of, members of the college community
- Assault, battery, or any threat of force or violence upon members of the college community
- Willful misconduct which results in injury or death to members of the college community, or which results in cutting, defacing, or other injury to any real or personal property owned by the district
- The use, sale, or possession on campus of, or presence on campus under the influence of, any controlled substance (See alcohol, drug, and smoking policies (https://arc.losrios.edu/about-us/our-values/student-rights-and-responsibilities/alcohol-drug-and-smoking-policies))
- Willful or persistent smoking in any area where smoking has been prohibited by law or district policy (See alcohol, drug, and smoking policies (https://arc.losrios.edu/about-us/our-values/student-rights-and-responsibilities/alcohol-drug-and-smoking-policies))
- Persistent, serious misconduct where other means of correction have failed to bring about proper conduct
- Violation of College rules and regulations including those concerning student organizations, the use of college facilities, or the time, place and manner of public expression and distribution of materials
- Obstruction or disruption of teaching, research, administrative disciplinary procedures or other college activities, including its community service activity, or of other authorized activities on college-controlled premises
- Theft of or non-accidental damage to property of the college or a member of the college community while on campus or at college-sponsored events
- Unauthorized entry to or use of college facilities
- Dishonesty, such as cheating, plagiarism, or furnishing false information to the college; forgery, alteration, or misuse of college documents, records, or identifications (See plagiarism and cheating policies (https://arc.losrios.edu/about-us/our-values/student-rights-and-responsibilities/plagiarism-and-cheating))
- Knowing possession or use of explosives, dangerous chemicals or deadly weapons on college property or at a college function without prior authorization of the college president or designated representative
- Use, possession, distribution or being under the influence of alcoholic beverages, narcotics or dangerous drugs on college property or at college-sponsored events (See alcohol, drug, and smoking policies (https://arc.losrios.edu/about-us/our-values/student-rights-and-responsibilities/alcohol-drug-and-smoking-policies))
- Soliciting or assisting another to do any act which would subject a student to expulsion, suspension, probation or other discipline pursuant to Regulation R-2441: Standards of Conduct (shared/doc/board/regulations/R-2441.pdf)
- Violation of any order of a college president, notice of which has been given prior to such violation, and which order is not inconsistent with any of the other provisions of this policy. This notice may be given by publication in the college newspaper, by posting on an official bulletin board designated for this purpose or by any other means reasonably calculated to inform students of its provisions.
- Attempting to commit an act that would be cause for disciplinary action identified above

Undocumented Student Admission

At American River College, we define undocumented to include all immigrants who reside in the US without legal status. All undocumented students must:

2. Submit a California Non-Resident Tuition Exemption Form available to the Admissions & Records Office.

For more information, see undocumented student admissions (https://arc.losrios.edu/undocumented-students).
Student Grievance and Class-Related Concerns

Students are provided opportunities to informally resolve problems or complaints related to their experience at American River College (ARC). In the event that informal resolution is not found, students may file a request for a formal grievance hearing. The Student Grievance Officer is available to help both students and college staff understand their rights and to advise them about the process.

Steps to Resolution

Note: the informal process must begin within ten (10) days of the incident.

1. Students should speak with their instructor about the concern and attempt to resolve the problem informally.
2. Students who feel as though they are unable to speak with their instructor or resolve the situation should contact the instructional division area dean.
3. If the issue is not resolved by meeting with the instructor and/or divisional dean, then the student should contact the Student Grievance Officer and initiate a formal grievance.
4. If applicable, there will be a student grievance hearing and the opportunity for a written appeal.

Filing a Formal Grievance

There are specific timelines and date limitations to file a formal grievance. The formal grievance process must begin within five (5) calendar days of the attempted informal resolution. File a Student Grievance Form (https://lrccd.formstack.com/forms/arc_incident_report) online.

What You Should Know About Student Grievance Procedures

- Students may not grieve grades unless they demonstrate “there is a mistake, fraud, bad faith, or incompetence” in the giving of the grade. (Education Code, section 76224(a) and Los Rios Community College District Policy 2412).
- If a student does not meet the specific grievance timelines, the grievance is deemed waived and may not be pursued further.
- The student must seek informal resolution of his or her complaint by meeting with the faculty or other staff member, and/or that individual’s supervisor, within 10 calendar days of the alleged grievable act.
- If informal resolution is not achieved, the student must file a Grievance Form with the Grievance Officer within five (5) calendar days of that attempt at resolution. The process must be initiated by the student not later than 25 days after the date of the alleged grievable act.
- The college Grievance Officer will review the student’s documentation and interview the student to determine whether the claim is grievable.
- If the Grievance Officer determines that the complaint is not grievable (meaning that sufficient evidence of the alleged wrongdoing is not provided or that the action does not fall within the scope of the grievance process), then the student will receive a letter to that effect. The Grievance Officer’s decision on this point is final.
- If the complaint is found to be grievable, a hearing will be scheduled. An independent Hearing Officer will be appointed.
- The decisions of the Hearing Officer can be appealed to the Chief Student Services Officer. The Chief Student Services Officer’s determination is final.

Contact

For information on how to file a formal grievance, please contact the Student Grievance Officer:

Nisha Beckhorn (Dean of Student Services, Counseling and Transfer Services)
Email: andrewm2@arc.losrios.edu
Phone: (916) 484-8375

Additional Grievance Information

Issues that are not resolved at the college or district level may be presented via resources provided by the California Community Colleges Chancellor’s Office. Complainants are encouraged to use the official form provided by the Chancellor’s office (https://www.cccco.edu/Complaint-Process-Notice), however, that form is not required and complaints will not be considered defective or rejected if you do not use the form.

A student may file a grievance or grieve an action or decision of the district or one of its colleges when the student's status and/or rights have been adversely affected.

Grievances relating to grades are subject to Education Code Section 76224(a), which reads:

"When grades are given for any course of instruction taught in a community college district, the grade given to each student shall be the grade determined by the instructor of the course and the determination of the student's grade by the instructor, in the absence of mistake, fraud, bad faith, or incompetence, shall be final."

In addition to complaints being filed by students or employees, complaints may be initiated by other individuals or entities, such as a family member, representative, organization, or other third party wishing to file on behalf of an individual or group alleged to have suffered unlawful discrimination or harassment per Los Rios Regulation R-2423: Discrimination and Harassment Complaint Procedures (shared/doc/board/regulations/R-2423.pdf).
Residency Requirements

Students who are California residents pay in-state tuition of $46 per unit, whereas students who are non-residents pay out-of-state tuition of $395 per unit (note: these tuition fees are for the 2022-2023 academic year; the out-of-state tuition fee increases to $480 per unit beginning with the summer 2023 term). Community college enrollment fees are set by the California State Legislature. All fees are subject to change.

The term "California resident" for fee purposes may differ from other definitions of California residency. A person who has a California driver’s license and/or vehicle registration or who is a California resident for tax, voting, or welfare purposes may have established legal residence in the state but not necessarily be considered a resident for fee purposes.

Residency Eligibility

To be eligible for California residency, a student must do the following:

- Be a citizen or hold a US immigration status that does not prevent establishment of residency
- Verify physical presence in California for at least one year and one day prior to the first day of the semester/term
- Verify intent to make California your permanent place of residence
- Establish financial independence from a non-resident parent or guardian

For more information, go to residency requirements on the American River College website (https://arc.losrios.edu/residency-requirements).

Equal Opportunity, Equity, Discrimination, and Harassment

Readmission from Dismissed Status

Students on dismissed status from American River College must submit a Petition for Readmission After Dismissed Status form, which is completed with a college counselor. In order to enroll in classes, the dean must approve readmission following counselor recommendation.

Equal Opportunity

Equal Opportunity is the Law

American River College is an equal opportunity employer/program. Auxiliary aids and services are available upon request to individuals with disabilities through Disability Services and Programs for Students (https://arc.losrios.edu/dsps).

As a recipient of federal financial assistance, it is against the law for American River College to discriminate against any individual in the US based on the following: race, color, religion, sex (including pregnancy, childbirth, and related medical conditions, sex stereotyping, transgender status, and gender identity), national origin (including limited English proficiency), age, disability, or political affiliation or belief, or, against any beneficiary of, applicant to, or participant in programs financially assisted under Title I of the Workforce Innovation and Opportunity Act, on the basis of the individual's citizenship status or participation in any WIOA Title I-financially assisted program or activity.

American River College must not discriminate in any of the following areas:

- Deciding who will be admitted, or have access, to any WIOA Title I-financially assisted program or activity
- Providing opportunities in, or treating any person with regard to, such a program or activity
- Making employment decisions in the administration of, or in connection with, such a program or activity

Recipients of federal financial assistance must take reasonable steps to ensure that communications with individuals are as effective as communications with others. This means that, upon request and at no cost to the individual, American River College is required to provide appropriate auxiliary aids and services to qualified individuals with disabilities.

What to Do If You Believe You Have Experienced Discrimination

If you think that you have been subjected to discrimination under a Workforce Innovation and Opportunity Act (WIOA) Title I financially assisted program or activity, then you may file a complaint within 180 days from the date of the alleged violation with either American River College's Equal Opportunity Officer (or the person whom the recipient has designated for this purpose) or the Civil Rights Center.

American River College Equity Officer

Contact Jeff Stephenson at (916) 484-8462 or stephej@arc.losrios.edu.
Civil Rights Center (https://www.dol.gov/agencies/oasam/centers-offices/civil-rights-center)

US Department of Labor
200 Constitution Avenue NW, Room N-4123
Washington, DC 20210

If you file your complaint with American River College, then you must wait either until American River College issues a written Notice of Final Action, or until 90 days have passed (whichever is sooner), before filing with the Civil Rights Center (see address above).

If American River College does not give you a written Notice of Final Action within 90 days of the day on which you filed your complaint, then you may file a complaint with Civil Rights Center complaint within 30 days of the 90-day deadline (in other words, within 120 days after the day on which you filed your complaint with the recipient).

If American River College does give you a written Notice of Final Action on your complaint, but you are dissatisfied with the decision or resolution, then you may file a complaint with the Civil Rights Center. You must file your Civil Rights Center complaint within 30 days of the date on which you received the Notice of Final Action.

La Igualdad De Oportunidades Es La Ley

Es contra la ley que este beneficiario de asistencia financiera federal discrimine de la siguiente manera: contra cualquier individuo en los Estados Unidos, sobre la base de raza, color, religión, sexo (incluyendo embarazo, parto y afecciones médicas relacionadas, estereotipos sexuales, estatus de transexuales e identidad de género), origen nacional (incluyendo la competencia limitada en inglés), edad, incapacidad, o afiliación o creencia política o contra cualquier beneficiario de, solicitante o participante en programas con asistencia financiera bajo el Título 1 del Workforce Innovation and Opportunity Act (WIOA), sobre la base del estatus de ciudadanía del individuo o la participación en cualquier programa o actividad con asistencia financiera del Título de WIOA.

El destinatario no debe discriminar en ninguna de las siguientes áreas: decidir quién será admitido, o tendrá acceso, a cualquier programa o actividad con asistencia financiera del Título 1 de WIOA; proporcionar oportunidades o el tratar a cualquier persona con respeto a dicho programa o actividad; o, tomar decisiones de empleo en la administración de, o en relación con, tal programa o actividad.

Los destinatarios de la asistencia financiera federal deben tomar medidas razonables para garantizar que las comunicaciones con las personas sean tan efectivas como las comunicaciones con los demás. Esto significa que, previa solicitud y sin costo para el individuo, se requiere que los destinatarios proporcionen ayuda y servicios auxiliares adecuados a personas calificadas con discapacidades.

Qué Hacer Si Usted Cree Que Ha Experimentado Discriminación

Si usted piensa que ha sido sometido a discriminación bajo una ley de Workforce Innovation and Opportunity Act I (WIOA) Título I programa o actividad asistida financieramente, usted puede presentar una queja dentro de 180 días a partir de la fecha de la presunta violación con cualquier:

American River College Oficial de Equidad

Jeff Stephenson
(916) 484-8462
stephej@arcc.losrios.edu

Civil Rights Center (https://www.dol.gov/agencies/oasam/centers-offices/civil-rights-center)

US Department of Labor
200 Constitution Avenue NW, Room N-4123
Washington, DC 20210

Si presenta su queja con el destinatario, debe esperar hasta que el destinatario emita una Notificación por escrito de la Acción Final, o hasta que hayan pasado 90 días (lo que ocurra primero), antes de presentar su queja con el Civil Rights Center (véase la dirección anterior).

Si el destinatario no le da una Notificación por escrito de la Acción Final dentro de los 90 días del día en que usted presente su queja, usted puede presentar una queja ante el Civil Rights Center antes de recibir ese aviso. Sin embargo, usted debe presentar su queja de Civil Rights Center dentro de 30 días después del día en que usted presenta su queja con el destinatario.

Si el destinatario le da una Notificación por escrito de la Acción Final sobre su queja, pero usted no está satisfecho con la decisión o resolución, usted puede presentar una queja ante el Civil Rights Center. Usted debe presentar su queja de Civil Rights Center dentro de 30 días de la fecha en que recibió Notificación de la Acción Final.

Fees

Community college enrollment fees are set by the California State Legislature. All fees are subject to change.
Fees for 2023-2024

⁴ Students who receive the California College Promise Grant are eligible to buy a semester parking permit for $30.

**Fee Descriptions**

**Tuition and Enrollment Fee**

Refundable: Yes. Learn more about refunds (https://arc.losrios.edu/admissions/cost-of-attendance/refunds).

Tuition and enrollment fees are charged per unit of enrollment. These fees are set by the State of California and are subject to change at any time. Students who have registered for classes prior to an increase may be required to pay the additional amount.

**Foreign Student Application Fee**

Refundable: No.

The foreign student application fee applies to all international students. Some international students may be exempt from paying this fee if they demonstrate economic hardship. Read Regulation R-2251 Nonresident and International Student Fees (shared/doc/board/regulations/R-2251.pdf) to learn more.

**Student Representation Fee**

Refundable: Yes.

The student representation fee supports student government in its effort to advocate and lobby for legislative issues that affect students.

$1 of every $2 fee supports the operations of a statewide community college student organization that is recognized by the Board of Governors of the California Community Colleges (Assembly Bill 1504). This statewide organization provides for student representation and participation in state-level community college shared governance as well as governmental affairs representatives to advocate before the legislature and other state and local governmental entities.

Students can refuse to pay this fee based on moral, religious, political, or financial grounds. To be exempted from paying the fee, submit the Student Representation Fee Exemption Form (https://losrios.edu/srf), preferably before you pay your fees.

This fee was established under provision of California Education Code section 76060.5 and California Code of Regulations, Title V, sections 54801-54805.

**Health Services Fee**

Refundable: Yes.
In a remote environment, the health services fee provides access to virtual health and mental health services as well as virtual mental health counseling by local mental health counselors. College nurses are available by appointment for phone or email advice and referrals to community resources as needed. College nurses will offer remote health and wellness educational offerings throughout the semester along with virtual health fairs.

The following students may be exempted from the health services fee if they submit the Health Services Fee Exemption Form (https://losrios.edu/hsf) before the last day of the semester:

- Students who depend exclusively upon prayer for healing in accordance with the teachings of a bona fide religious sect, denomination, or organization
- Students who receive California College Promise Grant (formerly BOG Fee Waiver) Part A

The following students are not charged the health services fee:

- Students enrolled in the Sacramento Regional Public Safety Training Center (SRPSTC)
- Students enrolled in apprenticeship programs
- Students only enrolled in UC Davis Co-Op program courses
- Incarcerated students inside correctional facilities
- Students admitted as special part-time students (K-12 students)

### Universal Transit Pass (UTP) Fee

*Note: the current UTP contract between Los Rios Community College District and Sacramento Regional Transit ends on December 31, 2023. If the contract is extended, then updated fee and date information will be posted.*

The Universal transit pass (UTP) is available to certain students for use on Regional Transit (RT) services, including buses and light rail. All eligible students are charged the UTP fee, regardless of whether or not they use the pass.

Visit the Sacramento Regional Transit website (https://www.sacrt.com/fares/) for a list of all transit and bus systems that accept the UTP. UC Davis Unitrans does not accept the UTP.

#### Eligibility

Students taking one or more units during the fall semester are eligible for the UTP.

Some students are not eligible for the UTP and therefore are not charged the fee. These students include:

- Students enrolled in the Sacramento Regional Public Safety Training Center (SRPSTC)
- Students enrolled in apprenticeship programs
- Students taking classes on the UC Davis main campus
- Students studying abroad
- Incarcerated students inside correctional facilities
- Students whose home college is not a Los Rios college but who are enrolled in courses at a Los Rios college through the California Community Colleges Online Education Initiative Course Exchange

#### Valid Dates

- For the fall semester, the UTP is valid from August 1 through December 31.

#### Fee Structure

For the fall semester, eligible students will pay $3 per unit. Any fraction of a unit is rounded up to the next whole unit. The minimum fee charged is $3 (for one unit) and the maximum fee is $45 (for 15 or more units). For example:

- A student enrolled in .5 units will not pay the UTP fee.
- A student enrolled in one unit will pay $3.
- A student enrolled in 1.5 units will pay $6.
- A student enrolled in 15 or more units will pay the maximum fee of $45.

### Semester Parking Permit Fee

Students can buy a semester parking permit online via eServices (https://ps.losrios.edu/student/signon.html) or in person*. The semester parking permit is a decal that is placed on the windshield or hung from the rear-view mirror.
Lost, Stolen, or Damaged Parking Permit
If a semester parking permit is lost or stolen, then you will have to pay full price for a new one. If a vehicle is sold or damaged, then a replacement can be issued for $2. You will need to provide the old decal and proof of sale or repair for the $2 replacement.
* Parking permits can be purchased at the Business Services Office on each campus.

Daily Parking Permit Fee
Refundable: No.
Students can buy daily parking permits from machines located in the parking lots at each campus. Daily parking permits are not recommended for motorcycles because they can be easily stolen. Read Los Rios' Administrative Regulation R-2252: Student Parking Fees (shared/doc/board/regulations/R-2252.pdf) to learn more.

Instructional Material Fees
Instructional material fees for designated courses may be assessed in accordance with Title 5, Section 59400 and Los Rios Policy P-2253 (shared/doc/board/policies/P-2253.pdf).

Non-Discrimination Policy
At American River College, we value equity and diversity. That's why we work toward just and fair inclusion into a society in which all people can participate, prosper, and reach their full potential.

No person shall be unlawfully discriminated against, harassed, or excluded from any benefits, activities, or programs because they possess of any of the following characteristics (actual or perceived):

- Ethnic group identification
- Race or color
- Sex, gender, gender identity, or gender expression
- Pregnancy or childbirth-related condition
- Sexual orientation or sexual identity
- Religion or religious creed
- Age (over forty)
- National origin or ancestry
- Physical or mental disability
- Medical condition
- Political affiliation or belief
- Military and veteran status
- Marital status

In addition, retaliation against a person who files a complaint, refers a matter for investigation, participates in an investigation, or serves as an advocate for a complainant or respondent is prohibited by district policy.

For more information or to file a complaint, contact the American River College Equity Officer at arc-equity@arc.losrios.edu.

Fee Payment Deadlines
Your tuition and fees are due soon after you enroll in classes. You may be dropped if your fees are not paid by the fee payment deadline. This is true even if you enroll in a class that starts later in the semester.

Fall 2023 Payment Deadlines

<table>
<thead>
<tr>
<th>Date Enrolled in Classes</th>
<th>Payment Due Date</th>
</tr>
</thead>
<tbody>
<tr>
<td>July 21, 2023 or earlier</td>
<td>August 4, 2023</td>
</tr>
<tr>
<td>July 22, 2023 or later</td>
<td>The next day after enrollment date*</td>
</tr>
</tbody>
</table>

* To make sure students who enroll during open enrollment have sufficient time to pay for classes, we will not drop students for non-payment if they enroll in classes on July 22 or later. However, students who have unpaid fees after the end of the term will receive a hold preventing future enrollment until payment is received.

</tr>
</tbody>
</table>

* To make sure students who enroll during open enrollment have sufficient time to pay for classes, we will not drop students for non-payment if they enroll in classes on May 14 or later. However, students who have unpaid fees after the end of the term will receive a hold preventing future enrollment until payment is received.

A Note About Financial Aid
Not all your financial aid awards are automatically applied to your fees (the California College Promise Grant is an example of financial aid that is automatically applied). After you have applied your financial aid, you are responsible for paying the remaining amount on your account.

Make sure you apply for financial aid as early as possible and review the financial aid deadlines (https://arc.losrios.edu/financial-aid-deadlines).

How to Pay for Classes
Pay your tuition and fees using any of the following methods:

1. Online through eServices (https://ps.losrios.edu/student/signon.html) with a credit card
2. By mail with a check
   - Make checks payable to Los Rios Community College District.
   - Mail your check to the Business Services office.
   - Make sure to include your student ID number and "enrollment fees" on the check's subject line.
3. In person
   - Visit American River College's Business Services Office and pay with check, cash, or credit card.
4. Using the student payment plan (https://arc.losrios.edu/admissions/cost-of-attendance/student-payment-plan)
   - Pay your fees over a few months instead of all at once. There is a non-refundable $15 fee each semester you use the student payment plan.

Sexual Harassment or Assault

Title IX (Sex Discrimination)
Title IX of the Educational Amendments of 1972 and subsequent amendments bans sex discrimination in schools, whether it be in academics or athletics. Title IX states: "No person in the United States shall, on the basis of sex, be excluded from participation in, be denied benefits of, or be subjected to discrimination under any education program or activity receiving federal financial assistance."

The underlying intent of Title IX is to eliminate any form of discrimination based on gender that may interfere with a student's physical well-being, emotional well-being, and academic performance. Colleges and universities receiving federal funds bear an affirmative duty to ensure that no student (male or female) is deprived of an educational opportunity or benefit due to such discrimination.

Gender Harassment
Sex discrimination in the form of gender harassment consists primarily of repeated comments, jokes, and innuendoes directed at persons because of their gender or sexual orientation. This behavior typically is not aimed at eliciting sexual cooperation, but, like racial harassment, it contaminates the learning and work environment and has no place at American River College.

Examples of gender harassment include the following:

- Disparaging women's intellectual abilities and potential
- Using sexist statements in classroom discussions
• Disparaging the lifestyles or behaviors of gays or lesbians

**Sexual Harassment Policy**

It is the desire of the Los Rios Community College District Board of Trustees to provide for all students and employees an educational environment and workplace free from sexual harassment. Sexual harassment in any situation is unacceptable and is in violation of state and federal laws and regulations. Where evidence of harassment is found, appropriate corrective action shall be taken.

**Definition of Sexual Harassment**

Sexual harassment means unwelcome sexual advances, requests for sexual favors, and other verbal, visual, or physical conduct of a sexual nature, made by someone from or in the work or educational setting, under any of the following conditions:

• Submission to the conduct is explicitly or implicitly made a term or a condition of an individual's employment, academic status, or progress
• Submission to, or rejection of, the conduct by the individual is used as the basis of employment or an academic decision affecting the individual
• The conduct has the purpose or effect of having a negative impact upon the individual's work or academic performance, or of creating an intimidating, hostile, or offensive work or educational environment
• Submission to, or rejection of, the conduct by the individual is used as the basis for any decision affecting the individual regarding benefits and services, honors, programs, or activities available at or through the educational institution.

Sexual harassment includes, but is not limited to:

• Making unsolicited written, verbal, visual, or physical contact with sexual overtones. Some examples are:
  ◦ Epithets
  ◦ Derogatory comments or slurs of a sexual nature
  ◦ Impeding or blocking movements or any physical interference with normal work
  ◦ Derogatory posters or cartoons
• Continuing to express sexual interest after being informed that the interest is unwelcome (reciprocal attraction is not considered sexual harassment)
• Within the work environment, engaging in explicit or implicit coercive sexual behavior which controls, influences, or affects the career, salary, and/or work environment, or any other term or condition of employment
• Within the educational environment, engaging in explicit or implicit coercive sexual behavior which controls, influences, or affects the educational opportunities, grades, and/or learning environment of the student
• Making reprisals, threats of reprisal, or implied threats of reprisal following a negative response to a sexual advance. For example, within the work environment, either suggesting or actually withholding support for an appointment, promotion, or change of assignment; suggesting a poor performance report will be prepared; or suggesting probation will be failed. Within the educational environment, either suggesting or actually withholding grades earned or deserved; suggesting a poor performance evaluation will be prepared; or suggesting a scholarship recommendation or college application will be denied
• Offering favors of educational or employment benefits, such as grades or promotions, favorable performance evaluations, favorable assignments, favorable duties or shifts, recommendations, reclassifications, and so on, in exchange for sexual favors.

**Sexual Assault**

Sexual assault includes, but is not limited to:

• Rape
• Forced sodomy
• Forced oral copulation
• Rape by a foreign object
• Sexual battery
• Domestic violence
• Dating violence
• Stalking
• Threat of sexual assault

Sexual assault is a form of sexual harassment and should be reported under the district's Board Policy P-2423: Discrimination and Harassment Procedures (shared/doc/board/policies/P-2423.pdf) and Administrative Regulation R-2423: Discrimination and Harassment Procedures (shared/doc/board/regulations/R-2423.pdf).
Sexual Violence

Sexual violence means physical sexual acts perpetrated against a person's will or where a person is incapable of giving consent due to the victim's use of drugs or alcohol. An individual also may be unable to give consent due to an intellectual or other disability. Sexual violence includes, but is not limited to, rape, sexual assault, sexual battery, and sexual coercion.

Consent

Consent is the informed, affirmative, conscious decision by each participant to engage in mutually agreed-upon sexual activity.

Consent must be voluntary, and given without coercion, force, threats, or intimidation. Consent requires positive cooperation in a particular sexual act, or expression of intent to engage in that sexual act through the exercise of free will.

Consent can be withdrawn or revoked. Consent to one form of sexual activity (or one sexual act) does not constitute consent to other forms of sexual activity (or other sexual acts). Consent to sexual activity given on one occasion does not constitute consent to sexual activity on another occasion. The fact that two people are, or were in, a dating or sexual relationship does not constitute consent to engage in sexual activity. There must always be mutual and affirmative consent to engage in sexual activity. Consent to a sexual act may be withdrawn or revoked at any time, including after penetration. The victim's request for the perpetrator to use a condom or birth control does not, in and of itself, constitute consent. Once consent is withdrawn or revoked, the sexual activity must stop immediately.

Consent cannot be given by a person who is incapacitated. For example, a person cannot give consent if she/he is unconscious or coming in and out of consciousness. A person is incapacitated if she/he lacks the physical and/or mental ability to make informed, rational judgments. Examples of incapacitation include unconsciousness, sleep, and blackouts. Whether an intoxicated person (as a result of using alcohol or other drugs) is incapacitated depends on the extent to which the alcohol or other drugs impact the person's decision-making capacity, awareness of consequences, and ability to make fully informed judgments. A person with a medical or mental disability may also lack the capacity to give consent.

Being intoxicated by drugs or alcohol does not diminish a person's responsibility to obtain consent from the other party before engaging in sexual activity. Factors to be considered include whether the person knew, or whether a reasonable person in the accused's position should have known, that the victim did not give, or revoked, consent; was incapacitated; or was otherwise incapable of giving consent.

Sexual intercourse with a minor is never consensual when the victim is under 18 years old, because the victim is considered incapable of giving legal consent due to age.

Domestic Violence

Domestic violence is a form of sexual violence and is abuse committed against someone who is a current or former spouse, current or former cohabitant, someone with whom the abuser has a child, someone with whom the abuser has or had a dating or engagement relationship, or a person similarly situated under California domestic or family violence law.

Cohabitant means two unrelated persons living together for a substantial period of time, resulting in some permanency of relationship. Factors that may determine whether persons are cohabiting include, but are not limited to:

1. Sexual relations between the parties while sharing the same living quarters
2. Sharing of income or expenses
3. Joint use or ownership of property
4. Whether the parties hold themselves out as husband and wife
5. The continuity of the relationship
6. The length of the relationship

Dating Violence

Dating violence is a form of sexual violence and is abuse committed by a person who is, or has been, in a social or dating relationship of a romantic or intimate nature with the victim. This may include someone the victim just met; for example, a person they met at a party, were introduced to through a friend, or met on a social networking website.

Stalking

Stalking means a repeated course of conduct directed at a specific person (when based on gender or sex) that places that person in reasonable fear for his/her or others' safety, or to suffer substantial emotional distress.

Policies and Regulations

- Board Policy P-2423: Discrimination and Harassment Procedures (shared/doc/board/policies/P-2423.pdf)
- Administrative Regulation R-2423: Discrimination and Harassment Procedures (shared/doc/board/regulations/R-2423.pdf)
- Administrative Regulation R-2423.5: Interim Title IX Guidelines (shared/doc/board/regulations/r-2423-5.pdf)
Resources
For issues regarding sexual harassment and assault, the following resources are available:

- Los Rios Police, (916) 558-2221
- WEAVE Confidential Advocate, (916) 568-3011 or WEAVE@losrios.edu
- Joshua Moon Johnson, Title IX Coordinator, (916) 484-8925 or johnsoj2@arc.losrios.edu

Debts Owed to College
Should a student or former student fail to pay a debt owed to the institution, the institution may withhold permission to any combination of the following from any person owing a debt until the debt is paid (Title 5, California Code of Regulations, Sections 42380 and 42381)

- Register
- Use facilities for which a fee is authorized to be charged
- Receive services, materials, food, or merchandise

If a student believes they do not owe all or part of an unpaid obligation, the student should contact the Business Services office.

Types of Harassment
It is a priority of American River College to prevent and respond to all forms of harassment, including bullying, psychological harassment, racial harassment, religious harassment, stalking, mobbing, hazing, and backlash.

Bullying
Bullying is physical and psychological harassing behavior perpetrated against an individual, by one or more persons. Bullying can occur on the playground, in school, on the job, or any other place.

Workplace bullying is repeated, health-harming mistreatment of one or more persons (the targets) by one or more perpetrators that takes one or more of the following forms:

- Verbal abuse
- Offensive conduct/behaviors (including nonverbal) which are threatening, humiliating, or intimidating
- Work interference (sabotage) which prevents work from getting done

Psychological Harassment
Psychological harassment is humiliating or abusive behavior that lowers a person's self-esteem or causes them torment. This can take the form of verbal comments, actions, or gestures. Workplace mobbing is considered psychological harassment.

Racial Harassment
Racial harassment is the targeting of an individual because of their race or ethnicity. The harassment includes words, deeds, and actions that are specifically designed to make the target feel degraded due to their race of origin or ethnicity.

Religious Harassment
Religious harassment is verbal, psychological, or physical harassment used against targets because they choose to practice a specific religion. Religious harassment can also include forced and involuntary conversions.

Stalking
Stalking is the unauthorized following and surveillance of an individual, to the extent that the person's privacy is unacceptably intruded upon and the victim fears for their safety.

Mobbing
Mobbing is violence committed directly or indirectly by a loosely affiliated and organized group of individuals to punish or even execute a person for an alleged offense without a lawful trial. The “offense” can range from a serious crime, like murder to simple expression of ethnic, cultural, or
religious attitudes. The issue of the victim's actual guilt or innocence is often irrelevant to the mob, since the mob relies on contentions that are unverifiable, unsubstantiated, or completely fabricated.

Hazing

Hazing is persecuting, harassing, or torturing in a deliberate, calculated, planned manner. Typically the targeted individual is a subordinate, for example, a fraternity pledge, a first-year military cadet, or somebody who is considered “inferior” or an “outsider.” Hazing is illegal in many instances.

Backlash

Backlash or “victim blaming” occurs when the harasser or other people in the environment blame the victim for the harassment or the resulting controversies and conflicts after the harassment is reported or discovered.

Backlash results when people erroneously believe the victim could stop the harassment if they really tried, or that the victim must have done something to cause the harassment. The victim may be accused of trying to get attention, covering for incompetence, or in cases where the harassment is proven, lying about the extent of the effects.

Outdated attitudes about certain kinds of harassment remain and there is often social pressure for victims to keep quiet about abuse or suffer the consequences.

Federal Education Tax Credits

Students (or parents of dependent students) may be able to obtain federal tax credits (including the American Opportunity Credit and Lifetime Learning Credit) for enrollment fees if the student:

- Is enrolled in at least six (6) units during any semester or summer session
- Meets the other conditions prescribed by federal law

Students who consent to online access can view and print the IRS Form 1098-T through eServices by January 31 of each year. For eligible students who do not consent to online access, the IRS Form 1098-T will be mailed by January 31.

Who Does Not Receive the 1098-T

Students will not receive a 1098-T if any of the following apply:

- The student (or parents of dependent students) did not pay qualified educational expenses in the previous tax year.
- The student received a Promise Grant (which waived their enrollment fees).
- The student is an international student who does not have a social security number (SSN) or individual taxpayer identification number (ITIN).

Discrimination and Harassment Complaint Procedures

How to File a Complaint

To file a complaint, fill out a Discrimination Complaint Form (irccd/shared/doc/legal/discrimination-complaint-form.pdf) and submit it to your equity officer. This form is not required and a complaint will not be rejected based on failure to use the form.

For more information or to file a complaint, contact the American River College Equity Officer at arc-equity@arc.losrios.edu.

Complaint Resolution

If it is determined that misconduct occurred, then American River College will take immediate steps to halt misconduct and remedy any effects of that misconduct.

An equity officer will hold an informal conference if the complainant wants to try and resolve the complaint informally. The equity officer will provide information about applicable laws and rules. If an informal resolution is not reached or if the complainant disagrees with the recommendation made, then the complainant may engage in a formal resolution process.
Fee Refunds

What Fees are Refundable?

Refundable Fees

- Resident enrollment and tuition fee
- Non-resident enrollment and tuition fee
- Universal transit pass (UTP) fee
- Student representation fee
- Health services fee
- Semester parking permit fee

Non-Refundable Fees

- Foreign student application fee
- Daily parking permit fee

How to Get a Refund

Refunds for Enrollment and Tuition Fees

Follow these steps to get a refund for enrollment and tuition fees:

1. **Drop your class(es) by the deadline.** After your class is dropped, money is credited to your eServices account. Keep all documentation that shows the date your class was officially dropped.

2. **Request a refund in eServices** (https://arc.losrios.edu/admissions/financial-aid-and-fees/tuition-and-fees/refunds/refund-application-instructions) to get the money out of your eServices account by the deadline.

Refunds for Health Services Fee

Follow these steps to get a refund for the health services fee:

1. **Drop all of your class(es) by the deadline.** After your class is dropped, money is credited to your eServices account. Keep all documentation that shows the date your class was officially dropped.

2. **Request a refund in eServices** (https://arc.losrios.edu/admissions/financial-aid-and-fees/tuition-and-fees/refunds/refund-application-instructions) to get the money out of your eServices account by the deadline.

Students who depend exclusively upon prayer for healing in accordance with the teachings of a bona fide religious sect, denomination, or organization – or students who receive the California College Promise Grant Part A – can refuse to pay this fee. To be exempted from paying the fee, submit the Health Services Fee Exemption Form (https://losrios.edu/hsf) before the last day of the semester.

Refunds for Semester Parking Permits

To get a refund for a semester parking permit, go to American River College's Business Services Office to fill out a paper refund application before the deadline. Your parking permit decal must be attached to your refund application. You cannot do this step online. Your refund will be processed within six to eight weeks.

Refunds for Student Representation Fee

Follow these steps to get a refund for the student representation fee:

1. **Drop all of your class(es) by the deadline.** After your class is dropped, money is credited to your eServices account. Keep all documentation that shows the date your class was officially dropped.
2. Request a refund in eServices (https://arc.losrios.edu/admissions/financial-aid-and-fees/tuition-and-fees/refunds/refund-application-instructions) to get the money out of your eServices account by the deadline.

Students can refuse to pay this fee based on moral, religious, political, or financial grounds. To be exempted from paying the fee, submit the Student Representation Fee Exemption Form (https://losrios.edu/srf) before the last day of the semester (but preferably before you pay your fees).

Refunds for UTP Fee

With the introduction of the digital UTP/ZipPass (https://arc.losrios.edu/student-resources/technology-resources/apps-and-software-for-students/sacramento-regional-transit-zippass/universal-transit-pass), students who drop all units by the deadline are eligible to receive a full Universal Transit Pass (UTP) refund. Students who request a physical version of the UTP are not eligible for a UTP refund.

Follow these steps to get a refund for the UTP fee:

1. **Drop your class(es) by the deadline.** After your class is dropped, money is credited to your eServices account. Keep all documentation that shows the date your class was officially dropped.
2. **Request a refund (https://arc.losrios.edu/admissions/financial-aid-and-fees/tuition-and-fees/refunds) to get the money out of your eServices account by the deadline.** You can submit this request online.

Important Information About Refunds

Credit Balances in eServices

Money in your eServices account is not automatically refunded to you. If you have a credit balance in your eServices account and you do not request a refund by the last day of instruction of the semester, then you forfeit that money.

Exceptions for Military Students

If you have to withdraw from classes for military purposes, then you will be refunded 100% of your fees and tuition. This is true even if you drop after the deadline or request your refund after the end of the semester.

How long will it take to get my refund?

Refunds are issued within six to eight weeks. If you paid by credit card, then a refund will be issued to the credit card you paid with. All other methods of payment will be refunded by check and mailed to the address on file with Admissions and Records.

Graduation and Transfer

Make a Plan for Transfer Success

Students who plan to transfer to the California State University (CSU) system, the University of California (UC) system, or to a private or out-of-state college or university should make an education plan with a counselor. This will ensure you meet the requirements for the specific institution you plan to attend.

Transfer eligibility is based on transferable college units and/or high school records and test scores. Each institution has its own admission requirements. To prepare for transfer:

1. Decide where you want to transfer
2. Talk to a counselor about that school’s specific requirements
3. Create an education plan

Associate Degree Graduation Requirements

Students may graduate from American River College with the Associate in Arts (AA) or the Associate in Science (AS) degree by fulfilling the following requirements:

1. Satisfactory completion of 60 units of collegiate work with a ‘C’ (2.0) grade point average (GPA) in a curriculum that the district accepts toward the degree. (This does not include courses numbered 200 to 299 if taken between fall 1989 and spring 2003, and courses numbered 1 to 99 and numbered 1000 or higher if taken after spring 2003.) At least 12 of the 60 units must be earned at American River College.
2. Major: completion of an AA or AS program of study offered at American River College. Courses used to complete requirements for the major must be completed with a grade of ‘C’ or better.
3. Completion of American River College’s general education requirements (https://arc.losrios.edu/2023-2024-catalog/graduation-and-transfer/associate-degree-graduation-requirements#ge) with a minimum GPA of 2.0 in courses used for general education (21 units minimum) or...
2023-2024 Graduation Competency Requirements

Demonstrate college-level competence in reading, written expression, and mathematics by completing the following:

A. Written Expression Competency (one of the following) –
   - Completion with a grade of 'C' or better of one of the following: BUS 310; ENGWR 300, 480; ESLW 340
   - Possession of a bachelor's degree or higher from a regionally accredited college in the US

B. Reading Competency (one of the following) –
   - Completion of American River College's General Education pattern (https://arc.losrios.edu/2023-2024-catalog/graduation-and-transfer/associate-degree-graduation-requirements#ge) or any local general education pattern offered in the Los Rios Community College District
   - Completion and certification of the CSU GE Breadth pattern
   - Possession of an associate degree (AA/AS) or higher from a regionally accredited college in the US

C. Mathematics Competency (one of the following) –
   - Completion with a grade of 'C' or better of one of the following: ECON 310; MATH 110, 120, 125, 129, 133, 300, 311, 320, 325, 333, 340, 342, 355, 356, 370, 372, 373, 375, 400, 401, 402, 410, or 420; PHIL 324; PSYC 330; STAT 300, 305, or 480
   - Obtained a satisfactory score on a mathematics competency examination used district-wide for graduation
   - Possession of a bachelor's degree or higher from a regionally accredited college in the US

1 See District Policy P-7241: Graduation Requirements (shared/doc/board/policies/P-7241.pdf) and Regulation R-7241: Graduation Requirements (shared/doc/board/regulations/R-7241.pdf).

2023-2024 General Education Requirements for AA/AS Degrees

</table>

* These ethnic/multicultural courses can also satisfy general education category requirements.

## Catalog Rights

For the purpose of graduating or earning a certificate from any college in the Los Rios Community College District, a student who attends at least one session (whether quarter, semester, or summer) in each calendar year at any California community college, California State University, University of California, or any regionally accredited institution of higher education, may choose to meet the requirements in effect at the Los Rios college from which the student intends to graduate, as follows:

- Requirements that were in effect at the time the student was admitted to a Los Rios college
- Requirements that were in effect at the time the student originally enrolled in an accredited college
- Requirements that were in effect at the intended date of graduation from a Los Rios college

Please note:

- A college may authorize or request substitution for discontinued courses.

AMERICAN RIVER COLLEGE

2023-2024 Catalog
Students who change their major field of study may be required to complete those requirements for the major in effect at the point of change.

For purposes of this section, “attendance” means taking classes in at least one session (semester or summer session) in each calendar year. Absence for attendance at another regionally accredited institution shall not be considered an interruption in attendance, per Los Rios Policy P-7242: Establishing Catalog Rights (shared/doc/board/policies/P-7242.pdf).

Financial Aid

Get the Financial Help You Need

Money shouldn't get in the way of getting a college education. The Financial Aid Office is here to help you get the financial support you need to afford college.

Financial Aid Eligibility

Generally, to be eligible for financial aid, students must:

- Demonstrate financial need (for most programs)
- Be a US citizen or an eligible non-citizen
- Have a valid Social Security number (with the exception of students from the Republic of the Marshall Islands, Federated States of Micronesia, or the Republic of Palau)
- Be enrolled or accepted for enrollment as a regular student in an eligible degree or certificate program
- Be enrolled at least half-time to be eligible for Direct Loan Program funds
- Maintain satisfactory academic progress
- Sign the certification statement on the Free Application for Federal Student Aid (FAFSA) stating that:
  - You are not in default on a federal student loan and do not owe money on a federal student grant
  - You will use federal student aid only for educational purposes
- Show you’re qualified to obtain a college or career school education by one of the following:
  - Having a high school diploma or a recognized equivalent such as a General Educational Development (GED) certificate
  - Completing a high school education in a homeschool setting approved under state law (or – if state law does not require a homeschooled student to obtain a completion credential – completing a high school education in a homeschool setting that qualifies as an exemption from compulsory attendance requirements under state law)
  - Enrolling in an eligible career pathway program and meeting one of the ability-to-benefit alternatives (https://arc.losrios.edu/2023-2024-catalog/while-you-are-here/financial-aid#benefit)

Ability-to-Benefit Alternatives

If you were enrolled in college or career school prior to July 1, 2012, or if you are currently enrolled in an eligible career pathway program*, then you may show you're qualified to obtain a higher education by one of the following:

- Passing an approved ability-to-benefit test* (if you don't have a diploma or GED, a college can administer a test to determine whether you can benefit from the education offered at that school)
- Completing six credit hours or equivalent course work toward a degree or certificate (you may not receive aid while earning the six credit hours)

*For more information about these criteria, talk to the Financial Aid Office.

General Education and Institutional Student Learning Outcomes

Philosophy

The primary function of education is to transmit from each generation to the next the knowledge and skills requisite to enlarge the comprehension of our place in the universe. General Education gives breadth to the college experience, enhances the ability to learn and develops critical thinking skills. American River College is committed to the principle of providing general education which includes: Humanities, Languages and Rationality, Living Skills, Natural Sciences, Social and Behavioral Sciences and Ethnic/Multicultural Studies. All of these are basic and necessary to participate in and contribute to a balanced life in a democratic society that is diverse in its social, cultural and educational backgrounds.

Description of General Education Areas and Alignment with Institutional Student Learning Outcomes

Humanities (3 units minimum)

Courses in the humanities are those which study the cultural activities and artistic expressions of human beings. To satisfy the general education requirement in the humanities, a course should help the student develop an awareness of the ways in which people throughout the ages and in different cultures have responded to themselves and the world around them in artistic and cultural creation and help the student develop an aesthetic understanding and an ability to make value judgments. This category includes introductory or integrative courses in the arts, foreign languages, literature, philosophy, religion, and related disciplines.

Institutional Student Learning Outcomes Aligned with Humanities

- Demonstrate skills and behaviors which contribute to inclusive and respectful communication of diverse ideas and beliefs.
- Critically evaluate information to develop informed perspectives on a variety of issues, problems, and challenges.
- Contribute to society using personal knowledge, resources, and skills.
- For students earning degrees, demonstrate an understanding of basic content and methodology for the major areas of knowledge: arts and humanities, mathematics, natural sciences, and social sciences.

Languages and Rationality (6 units: 3 units each from (a) and (b))

Courses in language and rationality are those which use and examine principles and guidelines of clear and logical thinking and communication. Courses in this category should build upon rather than remediate verbal and quantitative skills.

a. English Composition: Courses fulfilling the written composition requirement should include both expository and argumentative writing.

b. Communication and Analytical Thinking: Courses fulfilling the communication and analytical thinking requirement include oral and written communication, mathematics, logic, statistics, computer language and programming, and related disciplines.

Institutional Student Learning Outcomes Aligned with Languages and Rationality

- Utilize a variety of methods to communicate effectively.
- Use various technologies to collect information and solve problems.
- Critically evaluate information to develop informed perspectives on a variety of issues, problems, and challenges.

Living Skills (3 units minimum)

One physical education activity course (with ADAPT, DANCE, FITNS, PACT, SPORT, or TMACT designators) must be taken in this area and a minimum of 2 units from the other courses included in this category. Adapted physical education courses are available for students with documented physical disabilities. These Adapted courses will fulfill the graduation requirement.
Courses in this area may be selected from a number of different disciplines that help students to acquire skills and knowledge to understand themselves as whole persons (integral to their environment). This category includes the study of courses that develop and maintain personal, social, physical and emotional well-being. It is the intent that this area includes such courses as health education, human sexuality, marriage and family, nutrition, and personal adjustment.

**Institutional Student Learning Outcomes Aligned with Living Skills**

- Demonstrate personal and professional readiness for career and/or academic advancement.
- Demonstrate skills and behaviors which contribute to inclusive and respectful communication of diverse ideas and beliefs.
- Utilize a variety of methods to communicate effectively.
- Work cooperatively and effectively with others.
- Use various technologies to collect information and solve problems.
- Critically evaluate information to develop informed perspectives on a variety of issues, problems, and challenges.

**Natural Sciences (3 units minimum)**

Courses in the natural sciences are those which examine the physical universe, its life forms and its natural phenomena. To satisfy the general education requirement in natural sciences, a course should help the student develop an appreciation and understanding of the scientific method, and encourage an understanding of the relationships between science and other human activities. This category includes introductory or integrative survey courses in astronomy, biology, chemistry, general physical science, geology, physical geography, physical anthropology, physics and other scientific disciplines.

**Institutional Student Learning Outcomes Aligned with Natural Sciences**

- Use various technologies to collect information and solve problems.
- Critically evaluate information to develop informed perspectives on a variety of issues, problems, and challenges.
- For students earning degrees, demonstrate an understanding of basic content and methodology for the major areas of knowledge: arts and humanities, mathematics, natural sciences, and social sciences.

**Social and Behavioral Sciences (3 units minimum)**

Courses in the social and behavioral sciences are those which focus on people as members of society. To satisfy the general education requirement in social and behavioral sciences, a course should help the student develop an awareness of the method of inquiry used by the social and behavioral sciences. It should stimulate critical thinking about the ways people act and have acted in response to their societies and should promote appreciation of how societies and social subgroups operate. This category includes introductory or integrative survey courses in anthropology, economics, history, political science, psychology, sociology and related disciplines, exclusive of those which fulfill the American Institutions requirement.

**Institutional Student Learning Outcomes Aligned with Social and Behavioral Sciences**

- Demonstrate skills and behaviors which contribute to inclusive and respectful communication of diverse ideas and beliefs.
- Utilize a variety of methods to communicate effectively.
- Work cooperatively and effectively with others.
- Use various technologies to collect information and solve problems.
- Critically evaluate information to develop informed perspectives on a variety of issues, problems, and challenges.
- For students earning degrees, demonstrate an understanding of basic content and methodology for the major areas of knowledge: arts and humanities, mathematics, natural sciences, and social sciences.

**American Institutions Requirement (3 units minimum)**

Courses in American Institutions are those which focus on the historical development of American institutions and ideals, the operation of representative democratic government under the Constitution of the United States, and the principles of state and local government established under the Constitution of this State. To satisfy the general education requirement in American Institutions, a course should help the student develop an appreciation and understanding of the basic institutions, ideals, knowledge, and skills necessary for intelligent and loyal citizenship. It should stimulate critical thinking, problem solving, and literacy skills in regard to American historical, political, governmental, economic, social, and intellectual issues as they relate to both domestic and foreign affairs. This category includes introductory or integrative survey courses in history and political science which qualify under the guidelines of either “a” or “b” below.

a. Any course which addresses the historical development of American Institutions and ideals, inclusive of the following:
   - Significant events occurring in the entire area now included in the United States of America, including the relationships of regions within that area and with external regions and powers as appropriate to the understanding of those events within the United States during the period under study.
   - The role of major ethnic and social groups in such events and the contexts in which the events have occurred.
   - The events presented within a framework which illustrates the continuity of the American experience and its derivation from other cultures including consideration of three or more of the following: politics, economics, social movements, and geography.
b. Any course which addresses the U.S. Constitution, representative democratic government operation, and the process of California State and local government, inclusive of the following:
- The political philosophies of the framers of the Constitution and the nature and operation of United States political institutions and processes under that Constitution as amended and interpreted.
- The rights and obligations of citizens in the political system established under the Constitution.
- The Constitution of the State of California within the framework of evolution of Federal-State relations and the nature and processes of State and local government under that Constitution.
- Contemporary relationships of State and local government with the Federal government, the resolution of conflicts and the establishment of cooperative processes under the constitutions of both the State and nation, and the political processes involved.

Institutional Student Learning Outcomes Aligned with American Institutions

- Utilize a variety of methods to communicate effectively.
- Work cooperatively and effectively with others.
- Use various technologies to collect information and solve problems.
- Critically evaluate information to develop informed perspectives on a variety of issues, problems, and challenges.
- Contribute to society using personal knowledge, resources, and skills.
- For students earning degrees, demonstrate an understanding of basic content and methodology for the major areas of knowledge: arts and humanities, mathematics, natural sciences, and social sciences.

Ethnic/Multicultural Studies

Ethnic studies will be offered in at least one of the required general education areas.

Students may fulfill the District's Ethnic/Multicultural Studies course requirement through completion of one 3 unit course. Significant and substantial elements of the course must examine multicultural matters as specified by the criteria below.

- The course examines significant aspects of culture, contributions, and social experiences of under-represented ethnic/racial minority groups in the United States such as: African American, Asian American, Chicano, Latino, Hispanic Americans, and Native Americans; Non-western, Non-Eurocentric cultures.
- The course examines multiple groups, one of which may include European Americans and is comparative in nature.
- The course should include analysis of ethnicity, ethnocentrism, and/or racism, and how they shape and explain ethnic experience.

Institutional Student Learning Outcomes Aligned with Ethnic/Multicultural Studies

- Demonstrate skills and behaviors which contribute to inclusive and respectful communication of diverse ideas and beliefs.
- For students earning degrees, demonstrate an understanding of basic content and methodology for the major areas of knowledge: arts and humanities, mathematics, natural sciences, and social sciences.

Free Application for Federal Student Aid

What is FAFSA?

The Free Application for Federal Student Aid (FAFSA) (https://studentaid.gov/h/apply-for-aid/fafsa) is a form you fill out to get financial aid. Financial aid includes fee waivers, grants, work-study, loans, and scholarships. Submit the FAFSA each year you are in college – it only takes about 30 minutes to complete when you are prepared.

Though undocumented students cannot apply for aid through the FAFSA, they may be eligible for state financial aid through the California Dream Act (https://dream.csac.ca.gov/landing).

FAFSA Priority Filing Deadline

Submit the FAFSA as early as you can. This will help you figure out how to pay for college before classes begin.

Academic Year 2023-2024

The 2023-2024 academic year includes fall 2023, spring 2024, and summer 2024.

- Date FAFSA available: October 1, 2022
- FAFSA priority filing deadline: March 2, 2023*
- Tax filing year to use for FAFSA: 2021
* You can submit the FAFSA after the "FAFSA Priority Filing Deadline" date until June 30 of the following year, but priority is given on a first-come, first-served basis. You may not be considered for a Cal Grant if you submit your application after this date.

Federal School Code

American River College's federal school code is 001232. Make sure you include this on your FAFSA if you want to receive financial aid at American River College.
Petition for a Certificate

How to Petition for a Certificate of Achievement

Students can file a petition for a Certificate of Achievement using our online graduation petition form (https://apps.arc.losrios.edu/GraduationPetition). Be prepared to fill out your personal information and each course that satisfies the major requirements. All requirements must be met by the end of the term in which you petition.

Our counseling team is here to help you succeed! You may meet with a counselor (https://arc.losrios.edu/student-resources/counseling/meet-with-a-counselor) before you submit your graduation petition to ensure that you have met all the requirements for your program.

Requirements

To petition for a certificate, students must:

1. Know their catalog year.*
2. Complete all certificate requirements with a minimum grade point average (GPA) of 2.0.
3. Complete at least 12 degree-applicable units toward the certificate at American River College. (This does not apply to Departmental Certificate programs that are less than 12 units.)

* Usually, students follow the current catalog year. However, if you are following certificate requirements from an old catalog, then you must have maintained catalog rights (https://arc.losrios.edu/2023-2024-catalog/graduation-and-transfer/petition-for-a-certificate#catalog-rights).

Required Documentation

The following must be on file in the Admissions and Records Office for a certificate petition to be processed:

- Official transcripts of all coursework completed at colleges outside of the Los Rios Community College District
- Official copies of AP/IB/CLEP test scores, if applicable
- A copy of DD214-military discharge papers, if the veteran desires credit for military units
- List of courses in progress if attending another college
- Official final transcripts will be required at the end of the semester for the final certificate evaluation
- Copy of any required competency tests, if applicable

Students must complete all certificate requirements by the end of the semester in which they petition for a certificate.

Petition Deadlines for 2023-2024

- Fall 2023: Friday, October 6, 2023
- Spring 2024: Friday, March 1, 2024
- Summer 2024: Friday, July 5, 2024

Approval or Denial

Final evaluations begin after final grades are posted at the end of each respective term/semester.

You will be notified via email if your petition is approved or denied. If denied, then you will be notified of the missing requirements and advised to submit a new petition. If approved, then your certificate will be posted to your transcript within three to four months after the end of the semester.

All certificates will be mailed to the student’s address on file. If you need an accommodation to pick up a certificate in person, then contact the Admissions and Records office.

Catalog Rights

For the purpose of graduating or earning a certificate from any college in the Los Rios Community College District, a student who attends at least one session (whether quarter, semester, or summer) in each calendar year at any California community college, California State University, University of California, or any regionally accredited institution of higher education, may choose to meet the requirements in effect at the Los Rios college from which the student intends to graduate, as follows:

- Requirements that were in effect at the time the student was admitted to a Los Rios college
- Requirements that were in effect at the time the student originally enrolled in an accredited college
- Requirements that were in effect at the intended date of graduation from a Los Rios college

Please note:

- A college may authorize or request substitution for discontinued courses.
- Students who change their major field of study may be required to complete those requirements for the major in effect at the point of change.
- For purposes of this section, “attendance” means taking classes in at least one session (semester or summer session) in each calendar year. Absence for attendance at another regionally accredited institution shall not be considered an interruption in attendance, per Los Rios Policy P-7242: Establishing Catalog Rights (shared/doc/board/policies/P-7242.pdf).

Certificate Programs

American River College offers two types of certificates:

Certificate of Achievement

The Certificate of Achievement certifies that a student has completed all required courses and is prepared to enter the career designated on their certificate. Certificate of Achievement programs are developed to provide vocational training for students who are not necessarily seeking a college degree. Certificates of Achievement require a grade of “C” or better in each course with a minimum of 12 degree-applicable units completed at American River College.

Departmental Certificate

Departmental Certificates are intended to certify that students are prepared to meet specific occupational needs, upgrade skills, or advance in an existing career. A grade of “C” or better is required in each course leading to the Departmental Certificate. Departmental Certificates are not noted on transcripts.

Departmental Certificates require 15.99 units or fewer. For Departmental Certificates requiring one to 11 units, all units must be completed at American River College. For Departmental Certificates requiring 12 to 15.99 units, a minimum of 12 units must be completed at American River College.

Note: Department Certificates are also listed as Certificates under the program requirement.

California Dream Act Application

The California Dream Act is a law that allows undocumented and nonresident students (US citizens and eligible non-citizens) who qualify for a non-resident exemption under Assembly Bill 540 (AB 540) to receive certain types of financial aid. The California Dream Act is unrelated to the federal Deferred Action for Childhood Arrivals (DACA) program.

Instead of submitting the Free Application for Federal Student Aid (FAFSA), students for whom any of the following are true can submit the California Dream Act Application (https://dream.csac.ca.gov/) (CADAA) to receive financial aid. You are eligible to complete the CADAA if you:

- Are undocumented
- Have a valid or expired DACA status
- Are a U visa holder
- Have Temporary Protected Status (TPS)
- Meet the non-resident exemption requirements under AB 540

Financial Aid Available for Undocumented Students

Undocumented students may qualify for the following types of financial aid:

- State grants, including the California College Promise Grant (formerly BOG Fee Waiver), Cal Grants, Chafee Grants, and Student Success Completion Grant
- Assistance from EOPS, CARE, or CalWORKs
- Some scholarships
Petition for a Degree

How to Petition for a Degree

Students can file a petition for a degree using our online graduation petition form (https://apps.arc.losrios.edu/GraduationPetition). Be prepared to fill out your personal information and each course that satisfies the general education areas and major requirements. All requirements must be met by the end of the term in which you petition.

We highly recommend that you meet with a counselor (https://arc.losrios.edu/student-resources/counseling/meet-with-a-counselor) before you submit your graduation petition to ensure that you have met all the requirements for your program.

Requirements

To petition for a degree, students must:

1. Know their catalog year*  
2. Complete all degree requirements with a minimum grade point average (GPA) of 2.0  
3. Complete at least 12 units toward the degree at American River College

* Usually, students follow the catalog year from which they began and maintained enrollment or the current catalog year. If you have questions about your catalog year, then please consult the information about catalog rights (https://arc.losrios.edu/2023-2024-catalog/graduation-and-transfer/petition-for-a-degree#catalog-rights) or a counselor.

Required Documentation

The following must be on file in the Admissions and Records Office for a degree petition to be processed:

- Official transcripts of all coursework completed at colleges outside of the Los Rios Community College District#  
- Official copies of AP/IB/CLEP test scores, if applicable  
- A copy of DD214-military discharge papers, if veteran desires credit for military units  
- List of courses in progress if attending another college and official final transcripts will be required at the end of the semester for final degree evaluation  
- Copy of any required competency tests, if applicable

Students must complete all degree requirements by the end of the semester in which they petition for a degree.

* External coursework may require a petition for course substitution/waiver approval through the department and use towards your program. Please check with your counselor for more information.

Petition Deadlines for 2023-2024

- Fall 2023: Friday, October 6, 2023  
- Spring 2024: Friday, March 1, 2024  
- Summer 2024: Friday, July 5, 2024

Approval or Denial

Final evaluations begin after final grades are posted at the end of each respective term/semester.

You will be notified via email if your petition is approved or denied.

If denied, then you will be notified of the missing requirements and advised to submit a new petition. If approved, then your degree will be posted to your transcript within three to four months after the end of the semester.

All diplomas will be mailed to the student’s address on file. If you need an accommodation to pick up your diploma in person, then please contact the Admissions and Records office.

Catalog Rights

For the purpose of graduating or earning a certificate from any college in the Los Rios Community College District, a student who attends at least one session (whether quarter, semester, or summer) in each calendar year at any California community college, California State University, University of California, or any regionally accredited institution of higher education, may choose to meet the requirements in effect at the Los Rios college from which the student intends to graduate, as follows:

- Requirements that were in effect at the time the student was admitted to a Los Rios college
- Requirements that were in effect at the time the student originally enrolled in an accredited college
- Requirements that were in effect at the intended date of graduation from a Los Rios college

Please note:

- A college may authorize or request substitution for discontinued courses.
- Students who change their major field of study may be required to complete those requirements for the major in effect at the point of change.
- For purposes of this section, “attendance” means taking classes in at least one session (semester or summer session) in each calendar year. Absence for attendance at another regionally accredited institution shall not be considered an interruption in attendance, per Los Rios Policy P-7242: Establishing Catalog Rights (shared/doc/board/policies/P-7242.pdf).

Commencement

American River College has one commencement ceremony in May of each year, at the end of the spring semester. Students who meet and satisfy the graduation requirements during the prior summer term (August), prior fall semester (December), or during the spring semester may participate in the graduation commencement exercise.

The 2023-2024 commencement ceremony will be held on May 16, 2024.

All students who are eligible for an associate degree must petition for graduation.

Promise Programs

What is the Los Rios Promise Program?

The Los Rios Promise Program covers the cost of tuition for eligible students, up to 15 units. You may also hear it referred to as California Promise or AB-19 (Assembly Bill 19) and AB-2 (Assembly Bill 2).

Costs Covered

The Promise Program covers:

Resident tuition and enrollment fees (the cost of your classes) for up to 15 units, at $46 per unit

Costs Not Covered

The Promise Program does not cover:

- Health Services fee
- Student Representation fee
- Books
- Transportation
- Living expenses

Eligibility Requirements

Student eligibility is based on funding availability. To be eligible, you must:

- Submit (and receive confirmation of processing) a complete CCCApply application for enrollment (https://arc.losrios.edu/admissions/get-started-and-apply/first-time-college-student-admission-and-enrollment-steps) for the term for which you are applying.
- Be a California resident (learn about residency requirements (https://arc.losrios.edu/residency-requirements)).
Enroll in at least 12 units by the deadline (https://arc.losrios.edu/2023-2024-catalog/while-you-are-here/financial-aid/promise-programs#deadline). No more than 15 units will be covered.

Complete each semester with a minimum 2.0 GPA and a 66.67% completion rate (learn more about satisfactory academic progress (https://arc.losrios.edu/sap), or SAP).

### Deadlines

<table>
<thead>
<tr>
<th>Semester</th>
<th>Deadline for Completed/Processed FAFSA/CADAA</th>
<th>Deadline to be Enrolled in 12 or More Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>Summer 2023</td>
<td>N/A</td>
<td>June 14, 2023</td>
</tr>
<tr>
<td>Fall 2023</td>
<td>August 11, 2023</td>
<td>September 5, 2023</td>
</tr>
<tr>
<td>Spring 2024</td>
<td>January 5, 2024</td>
<td>January 29, 2024</td>
</tr>
</tbody>
</table>

Applications must be completed and processed by the deadlines (https://arc.losrios.edu/2023-2024-catalog/while-you-are-here/financial-aid/promise-programs#deadline). "Processed" means that you must have received communication from the Department of Education indicating you have successfully submitted your FAFSA and you received an email from Los Rios indicating your FAFSA has been received, or - if you completed a CADAA - then you received communication from the California Student Aid Commission indicating you have successfully submitted your CADAA and you received an email from Los Rios indicating your CADAA has been received. Please plan accordingly and complete the applications at least three weeks before the deadlines.

Student eligibility is based on funding availability. If you are determined eligible and then do not enroll for subsequent terms (excluding summer) by the enrollment dates (https://arc.losrios.edu/2023-2024-catalog/while-you-are-here/financial-aid/promise-programs#deadline), then you will be ineligible for the program without an opportunity to regain eligibility.

### Eligibility Requirements for a Second Year of the Los Rios Promise Program

The second year of eligibility is reviewed for all students who received the waiver in their first year under the Los Rios Promise Program. Second-year eligibility is contingent upon funding. Second-year students will automatically be awarded if they:

- Submit the FAFSA/CADAA by the deadline (https://arc.losrios.edu/2023-2024-catalog/while-you-are-here/financial-aid/promise-programs#deadline).
- Maintain full-time enrollment (12 units required, 15 recommended).
- Enroll in a minimum of 12 units by the enrollment date requirement.
- Maintain a cumulative 2.0 GPA, with a 66.67% cumulative completion rate (learn more about SAP (https://arc.losrios.edu/sap)).

You must contact the Financial Aid office if you are transferring in from another California community college. Students transferring from a college or university outside of California are not eligible for the Los Rios Promise Program.

### Eligibility for Mid-Year and First-Time New Recipients

Students are only eligible for the Los Rios Promise Program for two award years beginning with their initial enrollment in the summer/fall term. If your first enrollment is the spring term, then you are only eligible for 1.5 years (not the full two years), provided that you meet the enrollment and FAFSA completion deadline (https://arc.losrios.edu/2023-2024-catalog/while-you-are-here/financial-aid/promise-programs#deadline).

### FAQ

**How is a "first-time student" defined?**

Students entering college directly from high school, students who attended adult school to complete their high school graduation requirements, or students who have never attempted college units are considered "first-time" students.

**Am I still a first-time student if I earned college credit while in attending high school or adult school to complete my high school education?**

Yes! College credit earned while in high school (Dual Enrollment or Advanced Education) or adult school does not affect your eligibility for the Los Rios Promise Program as long as you haven't yet earned a degree or certificate. However, students who earn a college certificate or degree while in high school are not eligible for this tuition waiver.
While You Are Here

Make a Plan for Transfer Success

Students who plan to transfer to the California State University (CSU) system, the University of California (UC) system, or to a private or out-of-state college or university should make an education plan with a counselor. This will ensure you meet the requirements for the specific institution you plan to attend.

Transfer eligibility is based on transferable college units and/or high school records and test scores. Each institution has its own admission requirements. To prepare for transfer:

1. Decide where you want to transfer
2. Talk to a counselor about that school’s specific requirements
3. Create an education plan

Grants

What Is a Grant?

A grant is money given to you by the federal or state government that you don’t usually have to pay back.

Types of Grants for Community College Students

Learn more about the types of grants available to community college students, eligibility, and how and when to apply.

Cal Grant B

Cal Grant B is a need-based program and provides free money to low-income students who are:

- Enrolled in a program of study resulting in an associate, baccalaureate degree, or certificate of at least 24 semester units in length
- Enrolled and attending at least six eligible units per semester

How to Apply

- Submit a Verified Cal Grant GPA (https://www.csac.ca.gov/post/cal-grant-gpa-verification-form) (high school GPA or community college GPA) to the California Student Aid Commission (CSAC) by March 2. Please note:
  - California community colleges have a second deadline – September 2 – for some types of Cal Grant.
  - American River College submits electronically-eligible GPAs.
- Create an account at Web Grants for Students (https://mygrantinfo.csac.ca.gov/) after you submit your FAFSA or CADAA to review your award status.

After you submit your completed FAFSA/CADAA and high school GPA, then you will be considered (by CSAC) for the appropriate Cal Grant award based on GPA, financial need, and college of attendance.

Eligibility and Grant Amounts

See CSAC Cal Grant eligibility requirements (https://www.csac.ca.gov/cal-grants).

Dependent students or independent students without dependent children receive up to $1,648 annually; students with dependent children younger than 18 years of age (Students With Dependents annual certification required*) receive up to $6,000 annually. Awards are pro-rated according to eligible enrollment as per the following semester-based chart:

<table>
<thead>
<tr>
<th>Student Type</th>
<th>Full-Time Amount</th>
<th>¼-Time Amount</th>
<th>½-Time Amount</th>
<th>Less than ½-Time Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dependent Students or Independent without Dependent Children</td>

</tr>
<tr>
<td>Students with Dependent Children*</td>
<td>$3,000</td>
<td>$2,250</td>
<td>$1,500</td>
<td>$0</td>
</tr>
</tbody>
</table>

*See CSAC students with dependents information (https://www.csac.ca.gov/students-dependents).
Cal Grant Recalculations (CRD) apply – see financial aid deadlines (https://arc.losrios.edu/financial-aid-deadlines).

In addition, awarded Cal Grant B students enrolled in 12 or more eligible units per semester might become eligible to receive the additional Student Success Completion Grant (SSCG). Students enrolled in 12 to 14.99 financial aid eligible units will receive $1,298 SSCG for that semester. Students enrolled in 15 or more financial aid eligible units will receive $4,000 for that semester.

Cal Grant C

Cal Grant C is a need-based program and provides free money to low-income students who are:
- Pursuing an occupational or technical program of least four months in length
- Enrolled and attending at least six eligible units per semester

How to Apply
- Complete the FAFSA (https://studentaid.gov/h/apply-for-aid/fafsa) or the California Dream Act Application (https://dream.csac.ca.gov/) (CADAA) by March 2.
- Create an account at Web Grants for Students (https://mygrantinfo.csac.ca.gov/) after you submit your FAFSA or CADAA to review your award status.

If the California Student Aid Commission (CSAC) determines you eligible for a Cal Grant C, then they will contact you to complete the Cal Grant C Supplement Form and return to the CSAC by the requested deadline.

Eligibility and Grant Amounts

See CSAC Cal Grant eligibility requirements (https://www.csac.ca.gov/cal-grants).

Dependent students or independent students without dependent children receive up to $1,094 annually; students with dependent children younger than 18 years of age (Students With Dependents annual certification required*) receive up to $4,000 annually. Awards are prorated according to eligible enrollment as per the following semester-based chart:

<table>
<thead>
<tr>
<th>Student Type</th>
<th>Full-Time Amount</th>
<th>¾-Time Amount</th>
<th>½-Time Amount</th>

* See CSAC students with dependents information (https://www.csac.ca.gov/students-dependents).

Cal Grant Recalculations (CRD) apply – see financial aid deadlines (https://arc.losrios.edu/financial-aid-deadlines).

In addition, awarded Cal Grant C students enrolled in 12 or more eligible units per semester might become eligible to receive the additional Student Success Completion Grant (SSCG). Students enrolled in 12 to 14.99 financial aid eligible units will receive $1,298 SSCG for that semester. Students enrolled in 15 or more financial aid eligible units will receive $4,000 for that semester.

California College Promise Grant

The California College Promise Grant (formerly BOG Fee Waiver) is just for California community college students and does not have to be repaid.

What It Covers

The California College Promise Grant waives enrollment fees for eligible students. It does not cover the cost of books or other expenses.

Eligibility

You may qualify for the California College Promise Grant if you are a California resident or are exempt from nonresident fees under AB 540 and you meet the criteria of Type A, Type B, or Type C described below.

Type A

You are receiving Temporary Aid For Needy Families (TANF), Supplemental Security Income (SSI/SSP), or General Assistance.

Type B

You meet the income standards listed below. Please note:
- Family size means the number of people in your household, including yourself
- Total family income means adjusted gross income and/or untaxed income for the year listed
<table>
<thead>
<tr>
<th>Family Size</th>
<th>2020 Total Family Income (for 2022-2023 school year)</th>
<th>2021 Total Family Income (for 2023-2024 school year)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>$19,320</td>
<td>$20,385</td>
</tr>
<tr>
<td>2</td>

<td>$60,180</td>
<td>$62,865</td>
</tr>
<tr>
<td>8</td>
<td>$66,180</td>
<td>$69,945</td>
</tr>
</tbody>
</table>

Note: For each additional family member, add $6,810 for 2022-2023 school year and $7,080 for 2023-2024 school year.

**Type C**

You submitted the Free Application for Federal Student Aid (FAFSA) or the California Dream Act application (for AB 540 students who are not US citizens or eligible non-citizens) and it shows you have unmet financial need.

**How to Apply**

To apply, fill out the California College Promise Grant ([https://home.cccapply.org/money/california-college-promise-grant](https://home.cccapply.org/money/california-college-promise-grant)) application online. Alternatively, you can fill out the application below and return the completed application to American River College's Financial Aid Office.

**Maintaining the California College Promise Grant**

If you qualify for the California College Promise Grant, then make sure you continue to meet the following academic and progress standards to keep receiving the grant funds.

- **Academic**: Maintain a grade point average (GPA) of 2.0 or higher. If your cumulative GPA falls below 2.0 for two consecutive primary terms (fall/spring semesters), then you may lose your grant eligibility.
- **Progress**: Complete more than 50% of your coursework. If the cumulative number of units you complete is not more than 50% in two consecutive primary terms (fall/spring semesters, or fall/winter/spring quarters), then you may lose your grant eligibility.
- **Combination of academic and progress standards**: Any combination of two consecutive terms of cumulative GPA below 2.0 and/or cumulative unit completion of not more than 50% may result in loss of grant eligibility.

**Regaining the California College Promise Grant**

If you lose your California College Promise Grant due to not meeting the academic and progress standards, then you may appeal the loss by following the process for Loss of Priority Registration ([https://arc.losrios.edu/admissions/enroll-in-classes/loss-of-priority-registration](https://arc.losrios.edu/admissions/enroll-in-classes/loss-of-priority-registration)).

Admissions and Records with notify you once the form has been processed. If approved, then your California College Promise Grant will be reinstated.

**Chafee Grant for Foster Youth**

Chafee Grants are awarded by the State of California to current or former foster youth. Chafee Grants do not have to be repaid.

**What it Covers**

A Chafee Grant can be used to pay for tuition, fees, books, supplies, transportation, living expenses, and child care.

**Eligibility**

To qualify for a Chafee Grant, you must meet the following criteria:

- You are a current or former foster youth who was a ward of the court, living in foster care, for at least one day between the ages of 16 and 18
- If you are or were in Kin-GAP, a non-related legal guardianship, or were adopted, you are only eligible if you were a dependent or ward of the court, living in foster care, for at least one day between the ages of 16 and 18
- You have not reached your 26th birthday as of July 1 of the award year
- You have not participated in the program for more than five years (consecutive or otherwise)
How to Apply
To apply for a Chafee Grant, you must submit the following each year you are eligible:

- FAFSA (https://studentaid.gov/h/apply-for-aid/fafsa) or the California Dream Act (https://dream.csac.ca.gov/) application (if you do not have a social security number)
- The Chafee Grant (https://chafee.csac.ca.gov) application

Federal Pell Grant
Federal Pell Grant are awarded by the federal government and do not have to be repaid.

What it Covers
Federal Pell Grant can be used for tuition, fees, books, supplies, transportation, living expenses, and child care.

Eligibility
Federal Pell Grant is based on financial need, cost of attendance, the number of financial aid eligible units enrolled, and how long you plan to attend college. Eligible students can receive the Federal Pell Grant for up to six years (12 full-time semester or the equivalent), or 600%.

Pell Grant are usually only given to undergraduate students who have not earned a bachelor's degree or higher. In some cases, a student enrolled in a post-baccalaureate teacher certification program can receive a Federal Pell Grant. You are not eligible to receive a Pell Grant if you are incarcerated or are subject to an involuntary civil commitment upon completion of a period of incarceration for a forcible or non-forcible sex offense.

DACA and undocumented AB 540 students are not eligible to receive Federal Pell Grant.

How to Apply
Submit the FAFSA (https://studentaid.gov/h/apply-for-aid/fafsa) every year to see if you qualify for a Federal Pell Grant. The amount of other student aid you qualify for does not affect the amount of your Federal Pell Grant.

Federal Supplemental Educational Opportunity Grant (FSEOG)
Federal Supplemental Educational Opportunity Grants are awarded by the federal government and do not have to be repaid.

What it Covers
A FSEOG can be used for tuition, fees, books, supplies, transportation, living expenses, and child care. You can receive $100 to $600 per year.

Eligibility
FSEOGs are awarded based on financial need, how early you apply, number of financial aid eligible units enrolled, and total amount of Financial Aid.

FSEOGs are only given to undergraduate students who have not earned a bachelor's or a professional degree.

DACA and AB 540 students are not eligible to receive FSEOGs.

How to Apply
Submit the FAFSA (https://studentaid.gov/h/apply-for-aid/fafsa) each year to see if you qualify for a FSEOG. American River College has a limited amount of FSEOG funds, so make sure you submit your FAFSA as early as possible.

Student Success Completion Grant (SSCG)

What it Covers
The Student Success Completion Grant (SSCG) provides up to $8,000 per year to pay for educational costs.

Eligibility
To qualify for a SSCG, you must be:

- Cal Grant B or C recipients
- Enrolled in at least 12 financial aid eligible units each semester

Students enrolled in 12 to 14.99 financial aid eligible units will receive $1,298 for that semester. Students enrolled in 15 or more financial aid eligible units will receive $4,000 for that semester.
How to Apply

Students who qualify will be notified. No additional application is necessary for eligibility for the SSCG.

Transfer to California State University

Transfer Requirements

A maximum of 70 transferable units completed at California community colleges can be applied to a baccalaureate degree. Coursework completed that exceeds the 70-unit maximum may be given “subject credit” after transfer. Consult with a counselor.

You may be eligible for transfer to the California State University (CSU) system after you complete the following at a California community college:

1. A minimum of 60 transferable units with a 2.0 grade point average*
2. Either of the following general education requirements:
   1. At least 30 units of CSU general education requirements (https://arc.losrios.edu/catalog/csu-ge), including:
      1. Area A1, A2, and A3
      2. Area B4
   2. Intersegmental General Education Transfer Curriculum (IGETC) requirements (https://arc.losrios.edu/catalog/igetc)

In addition to general education and graduation requirements, we encourage you to complete lower-division preparatory courses for your major as required by the CSU to which you want to transfer. You can find lower-division major requirements at assist.org (https://assist.org), the official state-wide repository for transfer and course articulation information.

* GPA requirements are higher for campuses or majors that are impacted or more competitive. The minimum GPA for international or non-resident students is 2.4 instead of 2.0.

Application Dates and Deadlines

Priority application deadlines for CSU:

- For fall admission, October 1 to November 30 of the prior year
- For spring admission, August 1 to 31 of the prior year

Federal Work-Study

What is Federal Work-Study?

The Federal Work-Study (FWS) program provides jobs to students to help them pay for their educational expenses.

Eligibility

To be eligible, you must:

- Have a complete financial aid file
- Have unmet financial need
- Be enrolled in at least six financial aid course eligible units at American River College*
- Maintain satisfactory academic progress

*If you are enrolled at multiple Los Rios colleges, then you must have an approved consortium on file for those units to be counted towards your enrollment status.

You are not guaranteed a FWS job just because you are eligible for FWS. FWS jobs are limited, so make sure you apply for a FWS job as early as possible.
Hours

FWS students work an average of 17 hours per week during the fall and spring semesters. Students may be employed for no more than 26 hours per week during a semester and no more than 40 hours per week between semesters. The number of hours may change depending on the needs of the department. Summer FWS hours are based on funding availability.

You may not work more than the number of hours you were awarded.

Pay

FWS students are paid an hourly rate at minimum wage. On average, FWS students earn up to $7,000 during the school year. Paychecks are distributed on the tenth of each month.

Disclaimer

We reserve the right to reduce your FWS award at the end of the fall or spring semester for hours not worked or due to ineligibility. Your FWS award may also be reduced if your financial need changes. You will be notified of any change via email and it is your responsibility to notify your supervisor of the change.

Transfer to University of California

Transfer Requirements

Students who plan to transfer to the University of California (UC) system must meet certain requirements.

A maximum of 70 UC-transferable units completed at California community colleges can be applied to a baccalaureate degree. Coursework completed that exceeds the 70-unit maximum may be given "subject credit" after transfer. Consult with a counselor.

Transfer Eligibility

Subject Requirement

If you met the scholarship requirement but not the subject requirement, then you must do all of the following to transfer to a UC:

1. Take transferable college courses in the missing subject areas
2. Earn a C or better in each required course
3. Have a 2.0 grade point average (GPA) in all transferable coursework

Examination Requirement

If you met the scholarship requirement but not the examination requirement, then you must complete a minimum of 12 semester units of transferable work and maintain a 2.0 grade point average in transferable coursework.

Scholarship Requirement

If you did not meet the scholarship requirement, then you must do the following:

1. Complete 60 units of UC-transferable college credit with a grade point average of at least 2.4 (for California residents) or 2.8 (for non-residents)
2. Complete the following course pattern, earning a grade of C or better in each course:  
   1. Two transferable courses (three units each) in English composition
   2. One transferable course (three units) in mathematical concepts and quantitative reasoning
   3. Four transferable courses (three units each) chosen from at least two of the following subject areas: the arts and humanities, the social and behavioral sciences, or the physical and biological sciences

1 Students who satisfy the Intersegmental General Education Transfer Curriculum prior to transferring to UC will satisfy number 2 above.
Intersegmental General Education Transfer Curriculum (IGETC)

When you complete the Intersegmental General Education Transfer Curriculum (IGETC) pattern (https://arc.losrios.edu/catalog/igetc), you partially fulfill the 60-unit requirement for transfer to UC and complete the lower division general education breadth requirements. You should request your IGETC certification from the community college you last attended when your final transcript is sent to the UC campus.

The IGETC is best if you have not yet chosen a major or a campus. Once you have selected a major, it is important to begin fulfilling any required preparatory classes for that major. This is especially true for professional or "high-unit" majors. If you are preparing for an engineering or a high-unit science major at a UC campus, then it is not advisable to use the IGETC. Instead you should concentrate on fulfilling the 60-unit admission requirement by completing lower division major preparation courses as well as the basic admission requirements listed above.

Helpful Hints

- Connect with a counselor regularly to monitor your transfer progress.
- Many courses other than the ones listed in the IGETC will transfer to UC. The units from those other courses will count toward the 60 units required to transfer as a junior. Check the catalog for the transfer status of any course.
- Though transfers do not require an associate degree, it is easy to complete one while preparing to transfer. Learn about associate degree graduation requirements (https://arc.losrios.edu/2020-2021-catalog/graduation-and-transfer/graduation-requirements/associate-degree-graduation-requirements).
- Check with your counselor about other courses needed for your major. In many cases, it is to your advantage to complete all pre-major requirements as well as general education requirements before you transfer.

Scholarships

What is a Scholarship?

A scholarship is money given to you to help pay for your education or related expenses. Scholarships come from a variety of sources, such as your college or a private organization.

Examples of types of scholarships:

- Merit scholarships are based on a student's achievements.
- School scholarships are given to students by the school they attend.
- Work scholarships require students to work to receive scholarship money.
- Field of Study scholarships are given to students pursuing a specific field of study or academic program.
- Need scholarships are based on financial need.

The Financial Aid office maintains a list of local, state, and national scholarships. Enrollment verification is usually required.

Learn More About Scholarships (https://arc.losrios.edu/scholarships)

Transfer to Private Colleges

Even if American River College does not have a transfer agreement with a private or out-of-state college to which you want to transfer, you can probably receive academic credit for most of your community college classes. Most four-year institutions give full credit for general education courses and other courses designated for transfer at community college.

In addition, many out-of-state colleges participate in the Western Undergraduate Exchange (WUE) (https://www.wiche.edu/WUE/students), which offers discounts to California students in certain majors.

Find Out Transfer Requirements

Many colleges require transfer students to have completed a certain number of units, so make sure you check the requirements of the college to which you want to transfer. Transfer requirements are generally outlined in a college's catalog.
Federal Direct Loans

What is a Federal Direct Loan?
A federal direct loan is money you borrow from the government that you have to pay back with interest. We encourage students to apply for grants and scholarships before taking out a student loan. A loan is a serious and long-term obligation.

Loan Eligibility
To be eligible for a federal student loan, you must:

- Submit the Free Application for Federal Student Aid (FAFSA) (https://studentaid.gov/h/apply-for-aid/fafsa)
- Demonstrate that you are qualified to enroll in college by one of the following means:
  - You have a high school diploma
  - You have a General Education Development (GED) Certificate
  - You passed the California High School Proficiency Exam (CHSPE)
- Be a US citizen or eligible non-citizen with a social security number (SSN)
- Be enrolled in an eligible degree or certificate program
- Be enrolled in six units that apply toward the completion of your program
- Maintain satisfactory academic progress
- Certify that you will use federal financial aid only for educational purposes
- Certify that you are not in default on a federal student loan and do not owe money on a federal student grant

All borrowers must sign the Master Promissory Note (MPN) annually. New borrowers must also complete entrance loan counseling through the Student Aid website (https://studentaid.gov/entrance-counseling/).

Types of Federal Loans

Subsidized Direct Loans
Subsidized direct loans are given to eligible students who demonstrate financial need.

The federal government pays the interest on subsidized loans while you are enrolled in school at least half-time (six units in the fall or spring semester; three units in the summer semester). If you graduate, drop below half-time, or withdraw from school, then you have a six-month grace period where the federal government will continue to pay the interest on your loan. After the six-month grace period, you are responsible for paying the interest on your loan.

Unsubsidized Direct Loans
Unsubsidized direct loans are given to eligible students, regardless of their financial need. The combined amount of an unsubsidized direct loan and all other financial aid that you receive cannot exceed the cost of attendance.

Interest accrues from the time the loan is disbursed, and interest payments begin immediately but can be deferred until you are done with school. It is advantageous to pay the interest while you are in school. This way, the debt will be the principal amount only when repayment begins. Regular monthly payments begin six months after you graduate, drop below half-time status, or withdraw from school.

Annual Loan Limits

<table>
<thead>
<tr>
<th>Year</th>
<th>Dependent Students (except students whose parents are unable to obtain PLUS Loans)</th>
<th>Independent Students (and dependent undergraduate students whose parents are unable to obtain PLUS Loans)</th>
</tr>
</thead>
<tbody>
<tr>
<td>First-Year Undergraduate Annual Loan Limit</td>
<td>$5,500 - no more than $3,500 of this amount may be in subsidized loans.</td>
<td>$9,500 - no more than $3,500 of this amount may be in subsidized loans.</td>
</tr>
<tr>
<td>Second-Year Undergraduate Annual Loan Limit</td>

How to Apply for Loans

Steps to Apply (for Academic Year – Fall/Spring Semesters)

**Step 1: Federal Direct Loan Request in eServices**

Only students who received an Award Notification may submit a Federal Loan Request.

1. Log in to eServices (https://ps.lorrios.edu/student/signon.html).
2. Select Financial Aid.
3. Select Financial Aid Award Year.
4. Click on the Federal Direct Loan Request link.

**Step 2: Loans Offered**

A notification will be sent to your message center within a week for you to accept the offer.

**Step 3: Accept, Decline, or Reduce Loans Offered**

(Note: Firefox browser is recommended.)

Once you receive notification that your loans were offered, you can accept the amount, decline the offer, or reduce the amount to fit your financial need.

**To Accept:** Once you receive notification that your loans were offered, you can accept the amount offered. After you accept the loans offered, you will see checklist items added to your To Do List.

**To Decline:** Once you receive notification that your loans were offered, you can decide to decline the loans completely.

1. Under the Awards, click on Accept/Decline.
2. Click on the edit/pencil icon.
3. Under Award Decision column, click Accept/Decline to accept or decline the award.
4. Click the Submit button to submit your loan.

Federal Direct Loans screenshot (shared/img/body-misc/financial-aid/fa-fed-direct-accept-decline-screenshot.jpg)

**To Reduce:** Once you receive notification that your loans were offered and you have determined that you do not need the amount offered, but would like a reduced amount, please follow these steps:

1. Under the Awards, click on Accept/Decline.
2. Click on the edit/pencil icon.
3. To reduce the award, click Accept under the Award Decision column
4. Check the Reduce box.
5. Enter the updated amount.
6. Click the Submit button to submit your loan.

After you accept the loans offered, you will see checklist items added to your To Do List.

Federal Direct Loans screenshot (shared/img/body-misc/financial-aid/fa-fed-direct-reduce-screenshot.jpg)

If the process doesn't work for you, please contact the Financial Aid Office (https://arc.lorrios.edu/financial-aid).

**Step 4: Origination (Automated Process)**

After loans have been originated, you will then be allowed to complete the Master Promissory note (MPN) process. New borrowers must also complete undergraduate Student Loan Entrance Counseling (https://studentaid.gov/entrance-counseling)/.

Students are encouraged to electronically sign the MPN annually via the Federal Student Aid/Master Promissory Note (https://studentaid.gov/mpn/) webpage.

Alternatively, students can complete, print, sign and mail a paper MPN.* Paper MPNs are available at the financial aid office upon request.

*A mailed paper MPN may delay your refund for up to two months.

Mail a paper MPN to:

<table>
<thead>
<tr>
<th>Post Office Box (standard mail)</th>
<th>Street Address (overnight or commercial courier)</th>
</tr>
</thead>
<tbody>
<tr>
<td>U.S. Department of Education</td>
<td>U.S. Department of Education</td>
</tr>
<tr>
<td>P.O. Box 1130</td>
<td>4050 Legato Road, #1100</td>
</tr>
<tr>
<td>Fairfax, VA 22033</td>
<td>Fairfax, VA 22033</td>
</tr>
</tbody>
</table>

While You Are Here
**Step 5: Disbursement**

Typically, loans are disbursed to students who have satisfied all the requirements to receive loans.

**Steps to Apply (for Summer Term)**

If this is your first time applying for student loans for the academic year, then refer to the previous section, *Steps to Apply (for Academic Year – Fall/Spring Semesters)*.

This section explains how a student who already has Federal Direct Loans for the academic year can meet the criteria and apply for summer Federal Direct Loans.

**Step 1: Meet the Criteria**

Students must meet the following criteria to apply for Summer Federal Direct Loans:

1. Have not borrowed the maximum annual loan limit for your grade level and dependency status:

<table>
<thead>
<tr>
<th>Year</th>
<th>Dependent Students (except students whose parents are unable to obtain PLUS Loans)</th>
<th>Independent Students (and dependent undergraduate students whose parents are unable to obtain PLUS Loans)</th>
</tr>
</thead>
<tbody>
<tr>
<td>First-Year* Undergraduate Annual Loan Limit</td>
<td>$5,500 – no more than $3,500 of this amount may be in subsidized loans.</td>
<td>$9,500 – no more than $3,500 of this amount may be in subsidized loans.</td>
</tr>
<tr>
<td>Second-Year** Undergraduate Annual Loan Limit</td>
<td>$6,500 – no more than $4,500 of this amount may be in subsidized loans.</td>
<td>$10,500 – no more than $4,500 of this amount may be in subsidized loans.</td>
</tr>
<tr>
<td>Subsidized and Unsubsidized Aggregate Loan Limit</td>
<td>$31,000 – no more than $23,000 of this amount may be in subsidized loans.</td>
<td>$57,500 for undergraduates – no more than $23,000 of this amount may be in subsidized loans.</td>
</tr>
</tbody>
</table>

*First-Year is a student who has less than 30 units completed, prior to the start of the semester

**Second-Year is a student who has completed 30+ units, prior to the start of the semester

2. Meet satisfactory academic progress (SAP) for the term or have an approved summer SAP appeal.

**Step 2: Enroll in Courses**

Enroll in at least three (3) units of financial aid eligible courses.

**Step 3: Submit Loan Request**

Submit the Summer Direct Loan Request Form at least one (1) week before your summer classes end. The form will be available from May 29 through July 27. **Note:** Download the form to your computer and complete it in an application such as Adobe Acrobat or Preview. Do not fill out the form in your internet browser window. Contact the Financial Aid Office (https://arc.losrios.edu/financial-aid).

**Step 4: Wait for Processing**

Allow up to two (2) weeks for your summer loan request to be processed.

**Borrower's Rights and Responsibilities**

When you accept a loan, you accept legal rights and responsibilities that last until the loan is repaid.

**Borrower’s Rights**

You have the right to:

- Receive a copy of your promissory note either before or at the time the loan is made
- Receive a disclosure statement before repayment on your loan begins, including information about:
  - Interest rates
  - Fees
  - Loan balance
  - The number of payments
  - The amount of each payment
- A grace period after you leave school or drop below half-time status and before your loan payments begin (if applicable)
- Prepay all or part of your loans without a repayment penalty
- Receive written notice if your loan is sold to a new holder
- Apply for deferment for your loan payments for certain specified periods (if eligible)
- Request forbearance from the holder of your loan if unable to make payments and don’t qualify for deferment
- Receive proof when your loan is paid in full
Borrower’s Responsibilities

You agree to:

- Repay your loan(s), including accrued interest and fees, even if you do not:
  - Complete or find satisfaction in your education
  - Complete the program within the regular timeframe
  - Obtain employment
- Attend exit counseling before you leave school or drop below half-time enrollment
- Notify your loan holder within ten days if you:
  - Change your name, address, or phone number
  - Drop below half-time status
  - Withdraw from school
  - Transfer to another school
  - Change your graduation date
- Direct all correspondence to your loan holder or servicer
- Make monthly payments on your loan after leaving school, unless you are granted a deferment or forbearance
- Notify your loan holder of anything that might change your eligibility for an existing deferment

Loan Exit Counseling

All students who receive a loan must complete mandatory online loan exit counseling through the Department of Education. Loan exit counseling provides important information regarding repayment, deferment, and default prevention.

How to Complete Loan Exit Counseling

Visit the Student Aid website to complete loan exit counseling (https://studentaid.gov/exit-counseling/). You will need your FSA ID and password to complete the loan exit counseling. Be sure to select American River College (federal school code: 001232) when asked, otherwise the Financial Aid Office will not receive confirmation that you completed the requirement.

When to Complete Loan Exit Counseling

Loan recipients must complete loan exit counseling when they do any of the following:

- Withdraw from college
- Drop below half-time units
- Transfer to another college
- Graduate

Failure to complete loan exit counseling may result in the delay of your financial aid processing.
2023-2024 California State University General Education Requirements

Minimum Requirements for Transfer to a California State University (CSU) With Junior Standing

1. Complete 60 transferable semester units. Complete as many of the lower division requirements in your major as possible. These requirements can be found at assist.org (https://assist.org).
   - Complete at least 30 semester units of CSU general education (GE) courses with a grade of "C-" or better.
2. Have a 2.0 grade point average (GPA) in all transferable units attempted.
3. Be in good standing at the last college or university attended.
4. Complete the following CSU GE areas with a grade of "C-" or better:
   - Area A1: Oral Communication
   - Area A2: Written Communication
   - Area A3: Critical Thinking
   - Area A4: Quantitative Reasoning

Tips for Using the CSU GE Pattern

- Each year, a few courses are added or deleted on these patterns. If you take a course during the semester/term it appears on the CSU GE pattern, then it counts for CSU GE. If you take a course after it has been deleted or before it appears on the pattern, then it doesn't count for CSU GE.
- Meet with your counselor before attempting to take courses at another college to fulfill CSU GE requirements. Approved courses vary from college to college.
- The CSU GE pattern may change each year. It is the student's responsibility to check with a counselor for the updated CSU GE pattern.

General Education Certification

Most CSU campuses require that the CSU GE pattern be certified. You must meet with a counselor to have your CSU GE certified. Certification should be done in your last term of enrollment prior to transfer.

A. English Language Communication and Critical Thinking

Choose one course (three units minimum) from each area for a minimum of nine semester units.

<table>
<thead>
<tr>
<th>Area</th>
<th>Courses</th>
</tr>
</thead>
<tbody>
<tr>
<td>A1</td>
<td>COMM 301, 331, 361, 362</td>
</tr>
<tr>
<td>A2</td>
<td>ENGW 300, 480; ESLW 340</td>
</tr>
<tr>
<td>A3</td>
<td>COMM 302, 311; ENGRD 310; ENGW 301*, 302, 303, 482; ESL 350*; PHIL 320</td>
</tr>
</tbody>
</table>

* Courses appearing in more than one category may be used to satisfy only one category.

B. Scientific Inquiry and Quantitative Reasoning

Choose one course from each area for a minimum of nine semester units. Courses in areas B1 or B2 may also be used in area B3 where appropriate. Related lecture courses must be completed prior to or concurrently with lab courses.

<table>
<thead>
<tr>
<th>Area</th>
<th>Courses</th>
</tr>
</thead>
<tbody>

Associate Degrees for Transfer (ADT)

American River College offers associate degrees for transfer to CSU. These include associate in arts (AA-T) or associate in science (AS-T) degrees. These degrees are designed to provide a clear pathway to a CSU major and baccalaureate degree. Students who earn an ADT degree are guaranteed admission with junior standing at a campus in the CSU system and are given priority admission consideration to their local CSU campus or to a program that is deemed similar to their community college major.

Earning an ADT does not guarantee admission to specific majors or campuses. Students who earn an ADT degree are able to complete the remaining requirements for the major in which the ADT was earned with not more than 60 semester or 90 quarter units after transfer.

Current and prospective community college students are encouraged to meet with a counselor to review their options for transfer and to develop an educational plan that best meets their goals and needs.

CSU Requirements for a Bachelor's Degree

Degree requirements at a CSU consist of:

1. General education requirements, which are required of all degree candidates
2. Major requirements, which are part of the student's field of specialization
3. Individual campus graduation requirements
4. State law requirements

These requirements are classified in two levels – lower division and upper division. Students may transfer a maximum of 70 lower division semester units from a community college, which may involve preparation for the major and all lower division general education courses.

To be eligible for graduation with a bachelor’s degree from a CSU, students must complete a minimum of 48 semester units of general education. American River College will certify completion of 39 lower division general education units for students if they follow the pattern of requirements outlined here. The remaining nine (9) units required in general education must be upper division courses completed at the four-year university.

A minimum of 60 transferable semester units are required for a student to transfer with junior standing. It is important that lower division major course requirements be completed prior to transfer. Major requirements can be found at assist.org (https://assist.org/).

Review Advanced Placement (https://arc.lorios.edu/2023-2024-catalog/while-you-are-here/credit-for-prior-learning-and-alternative-study-options/advanced-placement-test-scores) (AP), College Level Examination Program (https://arc.lorios.edu/2023-2024-catalog/while-you-are-here/credit-for-prior-learning-and-alternative-study-options/college-level-examination-program-scores) (CLEP), and International Baccalaureate (https://arc.lorios.edu/2023-2024-catalog/while-you-are-here/credit-for-prior-learning-and-alternative-study-options/international-baccalaureate-test-scores) (IB) examinations that are appropriate for fulfillment of specific areas of the CSU GE breadth pattern.

Private Loans

What is a Private Loan?

A private loan is money you borrow from a private lender that you have to pay back with interest. We encourage students to apply for grants (https://arc.lorios.edu/grants) and scholarships (https://arc.lorios.edu/scholarships) before taking out a student loan. If you have to take out a loan, then we encourage you to learn more about federal direct loans (https://arc.lorios.edu/federal-direct-loans) before considering a private loan. A loan is a serious and long-term obligation.

Private loans are determined based on credit. They accrue interest and typically have higher interest rates than federal direct loans. Private loans also do not generally offer the same repayment protections that federal direct loans do.

Students may establish a private loan through any banking institution of their choice. Disbursements are typically made via check.
Code of Conduct for Private Loans

American River College is prohibited from engaging in any business arrangement that is a conflict of interest between the college and private lenders in accordance with the Truth in Lending Act (15 U.S.C 1638(e)). American River College does not:

- Receive any revenue sharing with any lender
- Receive gifts from lenders, guarantors, or loan services
- Have contracting arrangements providing financial benefit from any lender or affiliate of a lender
- Direct prospective student borrowers to a particular lender
- Maintain a preferred lender list
- Delay or refuse loan certifications based upon choice of private lender
- Offer funds for private loans
- Receive any compensation for members of the college that may belong to the advisory board of any lender
2023-2024 Intersegmental General Education Transfer Curriculum Requirements

Completion of all the requirements in the Intersegmental General Education Transfer Curriculum (IGETC) meet lower-division general education requirements at either a California State University (CSU) or University of California (UC) without the need after transfer to take additional lower division general education courses. All courses must be completed with grades of "C" or better.

Students can also visit assist.org (https://assist.org/) to see which courses will complete lower-division major preparation requirements. Students must see a counselor to have the IGETC pattern certified before transferring. Students who have selected a specific campus for transfer should consult with a counselor before following the IGETC pattern.

The IGETC requirements may change each year. It is the student’s responsibility to check with a counselor each year for updated IGETC information.

Advanced Placement (AP) and International Baccalaureate (IB) examinations are appropriate for inclusion on the IGETC pattern.

Area 1: English Communication

For CSU, choose one course from each area for a total of three courses (three units each for a total of nine units). For UC, choose two courses, one from area 1A and one from area 1B (three units each for a total of six units). Complete area 1C if you are completing an associate degree for transfer (ADT).

While You Are Here
Area 5: Physical and Biological Sciences

Choose one course from each area for a total of seven to nine semester units. Lecture courses must be completed prior to or concurrently with labs. Courses used in 5C may also be used in 5A or 5B if listed in those areas.

Area Courses

5A Physical Science
- ASTR 300, 310, 320, 330, 481+
- CHEM 305+, 309+, 338+, 400+, 401+, 423+
- GEOG 300, 305, 306, 307, 308
- GEOL 300, 305, 310, 320, 325, 330, 345
- PHYS 310, 311, 350+, 360+, 410+

5B Biological Science
- ANTH 300, 303, 480
- BIOL 300, 301, 303*, 305*, 310*, 332*, 342, 352, 370*, 375, 400*, 410*, 415*, 420*, 430*, 440*, 442*, 482*
- HEED 308
- NATR 301+, 302*, 305*, 310*, 330*, 332*
- PSYC 310

5C Lab
- ANTH 301
- ASTR 400, 481*
- CHEM 305+, 309+, 338+, 400*, 401*, 423*
- GEOG 301, 309
- GEOL 301, 306, 311, 331
- NATR 301, 302*, 305*, 310*, 320*
- PHYS 312, 350*, 360*, 410*
- PSYC 311

+ Courses may be counted in two areas.

Area 6: Language Other than English

This is a UC requirement only. Students may fulfill this requirement by one of the following:

- Completion of two years of the same foreign language in high school level work with a grade of “C” or better
- Completion of two years of formal schooling at the sixth grade level or higher in an institution where the language of instruction is not English with a grade of “C” or better (appropriate documentation must be presented to substantiate that the required coursework was completed)
- Earn a score of 3 or higher on the Foreign Language Advanced Placement test
- Complete one of the following courses at American River College

Area Courses

6A DEAF 310, 312, 314*, 316*, 318*
- GERM 401*, 402*, 411*, 412*
- ITAL 401, 402, 411*, 412*
- RUSS 401, 402*, 411*, 412*, 413*, 415*
- SPAN 401, 402*, 411*, 412*, 413*, 415*

+ Courses may be counted in two areas.

Area 7: Ethnic Studies

Area 7 is required for students with fall 2023 (or later) catalog rights. If you have catalog rights prior to fall 2023, then this section is not required.

Choose one course from the following.

Area Courses

7 ETHNS 300*, 320*, 330*, 340*, 350*

* Courses appearing in more than one area may be used to satisfy only one area.

Area 8: US History, Constitution, and American Ideals

This is a CSU graduation requirement only – it is not required for IGETC certification. Choose one course from each group for a total of two courses.

Group Courses

Group 1 POLS 301, 481
Group 2 HIST 310, 311, 318, 320, 321, 323, 325, 327, 330, 483, 484

* Courses appearing in more than one area may be used to satisfy only one area.

# Courses are approved for IGETC beginning in fall 2023. See all new approvals for fall 2023 (https://arc.losrios.edu/2023-2024-catalog/graduation-and-transfer/preparing-to-transfer/intersegmental-general-education-transfer-curriculum-requirements#fall2023).

College and Academic Regulations

Academic Freedom

Statement of Principles on Academic Freedom (American Association of University Professors)

- The purpose of this statement is to promote public understanding and support of academic freedom and tenure and agreement upon procedures to ensure them in colleges and universities. Institutions of higher education are conducted for the common good and not to further the interest of either the individual teacher or the institution as a whole. The common good depends upon the free search for truth and its free exposition.

- Academic freedom is essential to these purposes and applies to both teaching and research. Freedom in research is fundamental to the advancement of truth. Academic freedom in its teaching aspect is fundamental for the protection of the rights of the teacher in teaching and the freedom of the student in learning. It carries with it duties correlative with rights.

- Teachers are entitled to freedom in the classroom in discussing their subject, but they should be careful not to introduce into their teaching controversial matter, which has no relation to their subject.

- College and university teachers are citizens, members of a learned profession, and officers of an educational institution. When they speak or write as citizens, they should be free from institutional censorship or discipline, but their special position in the community imposes special obligations. As scholars and educational officers, they should remember that the public may judge their profession and their institution by their utterances. Hence they should at all times be accurate, should exercise appropriate restraint, should show respect for the opinions of others, and should make every effort to indicate that they are not speaking for the institution.

Academic Honors

The distinction of honors and highest honors is noted on a student's transcript for each semester in which a student has enrolled in twelve (12) units or more and has earned a grade point average (GPA) of at least 3.0 (honors) or 3.5 or higher (highest honors). Students earning highest honors will be notified by email of their eligibility to join the honor society, Phi Theta Kappa. Students earning honors or highest honors may be eligible to participate in the Honors Program.

Honors at Graduation

Students who maintain a high grade point average are eligible for honors at graduation. Students who maintain a grade point average of 3.0 or better are eligible for graduation with honors, and students who maintain a grade point average of 3.5 or better are eligible for graduation with highest honors. All undergraduate level coursework that a student has completed is used to calculate honors at graduation (including coursework taken outside of Los Rios). For ADT degrees, only transfer-level, undergraduate coursework is used.

The published lists of students are compiled from the data available at the time of publication and may be subject to subsequent revision.
Academic Renewal Without Course Repetition

A student may petition to have previous sub-standard grades (a D, F, or NP) earned at American River College discounted. Courses and grades which no longer reflect a student's current educational objective and current level of academic success may upon petition be discounted in the computation of the grade point average (Title 5, Section 55046). The following conditions must apply:

- A minimum of twelve (12) consecutive months shall have elapsed since the end of the semester or summer session in which the work to be alleviated was recorded; and a minimum of twelve (12) semester units (or its equivalent) with a grade of C or Pass/Credit or better shall have been attained. The coursework must have been completed at a regionally accredited college.
- Current educational objectives must be discussed with a counselor and the counselor's recommendation must be included on the petition.
- No more than thirty (30) units of substandard grades may be discounted.
- Under no circumstances may course work be discounted if it was used to fulfill requirements for a degree or certificate that has been awarded.
- All grades remain on the permanent record and transcript of grades. However, a proper notation on the transcript will indicate the specific grades that were discounted from the grade point average.
- Once elected, the academic renewal cannot be reversed.
- Academic renewal is not intended for courses that are required and/or will be repeated.

Students with questions regarding this policy or who want to initiate a petition should contact the Counseling office.

Attendance

For students to successfully complete their college work, regular class attendance is necessary, and students are expected to attend all sessions of classes in which they are enrolled. See Los Rios Regulation R-2222 (shared/doc/board/regulations/R-2222.pdf).

All students who remain enrolled in a class after the last day to withdraw (see the academic calendar (https://arc.losrios.edu/academic-calendar)) will be issued a letter grade for the course. If a student has stopped attending but not dropped the class, the student may receive an F grade for the course on their permanent record. Exception to this policy involves completion of the Student Petition, with appropriate signatures and documentation of extenuating circumstances.

Excessive Absences

Students are expected to attend all sessions of the class in which they are enrolled. Any student with excessive absences may be dropped from class (Title 5, Section 58004).

Per Los Rios Regulation R-2222, a student may be dropped from any class when student's absences exceed six percent (6%) of the total hours of class time. Instructors shall state in each course syllabus what constitutes excessive absences for that course.

Non-Attendance at First Class

Per Los Rios Regulation R-2222 (shared/doc/board/regulations/R-2222.pdf), students who fail to attend the first session of a class may be dropped by the instructor.

Auditing Courses

American River College does not permit auditing of classes. Auditing is defined as attending a course without having enrolled in the course, without responsibility for completing assignments, and without receiving a grade or credit.

Catalog Rights

For the purpose of graduating or earning a certificate from any college in the Los Rios Community College District, a student who attends at least one session (whether quarter, semester, or summer) in each calendar year at any California community college, California State University, University of California, or any regionally accredited institution of higher education, may choose to meet the requirements in effect at the Los Rios college from which the student intends to graduate, as follows:

- Requirements that were in effect at the time the student was admitted to a Los Rios college
- Requirements that were in effect at the time the student originally enrolled in an accredited college
- Requirements that were in effect at the intended date of graduation from a Los Rios college

Please note:

- A college may authorize or request substitution for discontinued courses.
- Students who change their major field of study may be required to complete those requirements for the major in effect at the point of change.
- For purposes of this section, "attendance" means taking classes in at least one session (semester or summer session) in each calendar year. Absence for attendance at another regionally accredited institution shall not be considered an interruption in attendance, per Los Rios Policy P-7242 (shared/doc/board/policies/P-7242.pdf).
Change of Address and/or Name

Requests to have a student's name changed are submitted directly to the Admissions & Records office. In order for this type of request to be processed, documentation (such as a marriage license, court documents, or naturalization papers) is required to verify a legal name change.

Students should report a change of address immediately. Changes can be submitted online in eServices (https://ps.losrios.edu/student/signon.html) or by submitting a Change of Data form to the Admissions & Records office. American River College is not responsible for misdirected mail if the address change is not provided by the student.

Students can submit birth date and social security number corrections to the Admissions & Records office along with proper documentation (official birth certificates or social security verification).

Course Repetition and Repeatability

Repetition of courses must be conducted by all California community colleges in compliance with Title 5, Sections 55040 through 55046.

Course Repetition Where Substandard Grade is Recorded

Where a student has received a substandard grade in a course taken at a college, a student may repeat that course up to a maximum of two (2) times in an effort to alleviate the substandard academic grade. Substandard grade is defined as a notation of D, F, NC (No Credit), or NP (No Pass). This regulation is effective across all Los Rios colleges.

The grade and credits earned in the final enrollment shall be used exclusively in determining the grade points earned for that particular course (Title 5, Section 55042).

Repeatable Courses

Courses taken where a grade of C or better was earned cannot be repeated. There are, however, certain specialized courses that are designated as “repeatable” and are listed as such in the course description. These include:

- Courses for which repetition is necessary to meet the major requirements of CSU or UC for completion of a bachelor's degree
- Intercollegiate athletics and their related conditioning courses may be repeated to meet requirements for California Community College Athletic Association (CCCAA) eligibility.
- Intercollegiate academic or vocational competition courses with the primary purpose to prepare students for competition
- Variable unit courses that are open entry/exit such as math, reading, and writing laboratory courses. Students may re-enroll in these courses as many times as necessary to complete one time the entire curriculum of the course.
- Work Experience courses, which can be taken again when there is new or expanded learning on the job for a maximum of six (6) to sixteen (16) units.

Repetition Without Substandard Grades

Unless a specific exception applies, a student who has received a satisfactory grade shall not repeat the course. Satisfactory grade is defined as A, B, C, P (Pass), or CR (Credit). There are special circumstances that allow for repetition. However, the student must submit a petition requesting the course repetition. These include:

- Students may repeat a course where a course is required by a statute or regulation as a condition of continued paid or volunteer employment, or as a result of a significant change in industry or licensure standards such that repetition is necessary for employment or licensure. These repetitions are not limited and are granted based on the college’s verification of established legal mandates (Cal. Code Regs., Title 5, section 55040).
- Students may repeat a course if there has been a significant lapse of time since the first grade was obtained, and:
  - If the college has a properly established recency prerequisite for a course or program (Title 5, Section 55043).
  - If the college finds that another institution of higher education to which the student seeks to transfer has established a recency requirement which the student shall not be able to satisfy without repeating the course in question (Title 5, Section 55043)
- The college finds that the student's most recent previous grade is, at least in part, the result of extenuating circumstances. Extenuating circumstances are verified cases of accident, illness, or other circumstances beyond the student's control. This is a one-time exception.
- A special course that can be repeatable by petition so that a particular student can be approved to repeat it as a disability-related accommodation.

Limitations on Active Participatory Courses

Active participatory courses are those courses where individual study or group assignments are the basic means by which learning objectives are obtained. These include kinesiology/physical education (PE) active participatory courses, as well as visual and performing arts active participatory courses (theatre arts, music, and art). Some courses in these categories are related in content and have been placed in groups that the Los Rios colleges are calling “families” of courses. Each family of courses allows for skill development beyond an introductory level.

Students are limited to taking a maximum of four courses in any one family across all four Los Rios colleges, regardless of how many courses there are. Sometimes a family of courses may include more than four. For example, the Modern Dance Technique family of courses across the four Los Rios colleges includes five courses – DANCE 330 through DANCE 334 (Modern Dance I, II, III, IV, and V).

In addition, if a student gets a substandard grade (a notation of D, F, NC (No Credit), NP (No Pass), or W (Withdrawal)) in any course within a family, the substandard grade counts as one of the four course limitations in the family. The list of families of courses is available in the Counseling office. Please consult with a counselor for more information.
Course Time Conflict/Course Overlap

Students may not enroll in two classes that meet during part of the same hour, except through a petition process. The student must state their justification for enrolling in the overlapping class, and instructors must indicate how the missed time will be made up (Title 5, Section 58031).

Good Standing

In determining a student's eligibility to acquire or remain in good standing at American River College, both quality of performance and progress toward completion of objectives are considered. A student who completes 12 or more semester units, earns a 2.0 GPA on a 4.0 grading scale, and completes more than 50 percent of all enrolled units, merits good standing with the college. Students in good standing are limited to 18 units per semester. In exceptional cases, a student may initiate a petition with a counselor to exceed the 18-unit limit.

Grades and Grade Point Averages (GPA)

### Types of Grades

<table>
<thead>
<tr>
<th>Letter Grade</th>
<th>Explanation</th>
<th>Grade Points Per Unit</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Excellent</td>
<td>Four (4) grade points per unit</td>
</tr>
<tr>
<td>B</td>
<td>Good</td>
<td>Three (3) grade points per unit</td>
</tr>
<tr>
<td>C</td>
<td>Satisfactory</td>
<td>Two (2) grade points per unit</td>
</tr>
<tr>
<td>D</td>
<td>Passing (not satisfactory)</td>
<td>One (1) grade point per unit</td>
</tr>
<tr>
<td>F</td>
<td>Failing</td>
<td>Zero (0) grade points per unit</td>
</tr>
<tr>
<td>P</td>
<td>Pass (C or better)</td>
<td>Not computed in GPA</td>
</tr>
<tr>
<td>NP</td>
<td>No Pass (less than C)</td>
<td>Not computed in GPA; affects progress probation and dismissal</td>
</tr>
<tr>
<td>I</td>
<td>Incomplete</td>
<td>Not computed in GPA; affects progress probation and dismissal</td>
</tr>
<tr>
<td>W</td>
<td>Withdrawal</td>
<td>Not computed in GPA; affects progress probation and dismissal</td>
</tr>
<tr>
<td>EW</td>
<td>Excused Withdrawal</td>
<td>Not computed in GPA; does not affect progress probation and dismissal; does not count as one of your three attempts</td>
</tr>
</tbody>
</table>

### Grade Point Average

The grade point average is found by taking the (Total Grade Points Earned) divided by (Total units attempted with a letter grade).

### Progress Percentage

The progress percentage is found by taking the (Total units with W, I and NC) divided by (Total units enrolled).

### Pass/No Pass Grading

You may choose one course each semester from courses that allow Pass/no Pass (P/NP) grading. A petition must be filed with the admissions office before the deadline published in the Class Schedule. A grade earned with an "A", "B" or "C" grade will be recorded as P with Grade Points Per Unit. A "D" or "F" grade will be recorded as NP with no Grade Points Per Unit. Units attempted for P/NP grades are not computed in the grade point average but are used for determining progress probation and dismissal. Once you have filed for P/NP grading in a course, it cannot be changed to a letter grade. No more than 15 units of Pass/No Pass may be applied toward an AA or AS degree.

### Incomplete Grading

An instructor may assign an incomplete grade, "I", when the instructor believes the student cannot complete the requirements of the class before the end of the semester due to unforeseeable emergency and justified reasons. To receive credit for the class, the student must finish the incomplete work within one year after the end of the semester. After the work is completed and evaluated, or when the time has expired, a final grade will be assigned. A student receiving an incomplete may not reenroll in the class. If you receive an "in-progress" grade, you must re-enroll in the class in the next semester. If you don't re-enroll, a grade will be assigned in lieu of the "in-progress."

### Withdrawal from Class

A student may officially drop a class without notation on the permanent academic record/transcript prior to the point in which 15% of a class has occurred (see the academic calendar (https://arc.losrios.edu/admissions/academic-calendar) for withdrawal deadlines). Withdrawals occurring after this time, and before the point in which 75% of the class has occurred, shall result in a W notation on the permanent academic record/transcript. Official withdrawals are those that have been processed via eServices or in the Admissions and Records office.

A W grade on the permanent academic record/transcript is used for determining progress probation and progress dismissal. No withdrawals are permitted during the last 25% of a course (see academic calendar for deadlines), except due to extenuating circumstances (verified cases of accidents, illness, or other circumstances beyond the control of the student), for which a student may request withdrawal through the student petition process. After consultation with the instructor and with administrative approval, the grade may be recorded as a W rather than as a less than satisfactory or failing grade on the permanent academic record/transcript. In all other cases, after the 75% date, a student will receive a grade in the course.
Military withdrawal is available for students who are members of an active or reserve military service, and who receive orders compelling a withdrawal from courses. Students requesting military withdrawal must file a student petition and include supporting documentation.

Excused withdrawal is available when a student is permitted to withdraw from a course(s) due to specific events beyond the control of the student making his or her ability to complete a course(s) impractical. These events may include a job transfer outside the geographical region, an illness in the family where the student is the primary caregiver, when the student who is incarcerated in a California state prison or county jail is released from custody or involuntarily transferred before the end of the term, when the student is the subject of an immigration action, or other extenuating circumstances. Excused withdrawal shall not be counted in progress probation and dismissal calculation. Excused withdrawal shall not be counted toward the permitted number of withdrawals or counted as an enrollment attempt.

Remedial Unit Limitation

The California Community Colleges Board of Governors has adopted regulations limiting the number of remedial course units a student may take to 30. These courses are usually numbered 1 through 99. Students may petition for a waiver to the 30-unit limitation through a counselor. However, federal financial aid does not allow a student to receive aid for more than 30 remedial units.

Transcripts

Order Transcripts Online

Current and former students can order transcripts and authorize the release of student records online. Students must submit a separate order for each Los Rios college they attended.

Order Transcripts Online (https://arc.losrios.edu/order-transcripts)

Unit/Academic Load

Per Los Rios Regulation R-7211: Maximum and Recommended Academic Load (shared/doc/board/regulations/R-7211.pdf), 15 units each semester is considered a full load. 12 units each semester is a minimum full-time load and is usually acceptable to qualify for scholarships, grants, loans, and holding student offices.

Fall/Spring Semester

18 units per semester is a maximum load. The unit limit is district-wide. A petition to exceed the maximum load must be submitted in writing to the college at which the additional units will be taken prior to registration. A student may petition up to a maximum of six (6) additional units (for a total of 24 units) district-wide through this process.

Summer Session

Eight (8) units per summer session is a maximum load. The unit limit is district-wide. A petition to exceed the maximum load must be submitted in writing to the college at which the additional units will be taken prior to registration. A student may petition up to a maximum of four (4) additional units (for a total of 12 units) district-wide through this process.

Special Considerations

Full governmental subsistence for veterans and dependents requires the unit load of twelve (12) units (with reduced benefit amounts dependent on the total number of enrolled units).

The following categories require the minimum unit load indicated:

- International students – twelve (12) units
- Student-athletes – twelve (12) units, including kinesiology/physical education

Unit of Credit

Units of credit are assigned to courses based on the “Carnegie Unit,” which assigns one unit of credit for three hours of work by the student per week. Usually this means one hour of lecture or discussion led by the instructor and two hours of outside preparation by the student. In laboratory courses, three hours of work in the laboratory are normally assigned one unit of credit which may include some additional preparation outside of class time. Students can find the number of units of credit with each course description.
Transfer Degree Requirements

Associate degrees for transfer (also called ADTs or transfer degrees) are designed to provide a clear pathway for California community college students to California State University (CSU) degrees. California community college students who earn an associate degree for transfer are guaranteed admission with junior standing to select CSU campuses and are given priority admission consideration over other transfer students. Students who have completed a transfer degree in a major deemed similar to a CSU major are able to complete the remaining requirements at that CSU within 60 units after transfer. For more information, consult a counselor.

Students can visit the I Can Go to College (https://icangotocollege.com/) website to learn more.

Requirements for a Transfer Degree

Transfer degrees require the following:

1. Complete all required courses for a major with a grade of "C" or better (or "P" if taking a class Pass/No Pass).
2. Complete one of the following general education (GE) patterns (check with your counselor to determine the appropriate pattern for the degree you are pursuing):
   - Intersegmental General Education Transfer Curriculum (IGETC) - CSU option
   - CSU General Education Breadth Requirements
3. Complete 60 CSU-transferable units. At least 12 of the 60 units must be earned at American River College.

Transfer Degrees at American River College

There are two types of transfer degrees: Associate of arts for transfer (AA-T) and associate of science for transfer (AS-T). American River College offers the following transfer degrees:

- AA-T in Anthropology
- AA-T in Art History
- AS-T in Biology
- AS-T in Business Administration 2.0
- AA-T in Communication Studies
- AS-T in Early Childhood Education for Transfer
- AA-T in Economics
- AA-T in Elementary Teacher Education
- AA-T in English
- AA-T in Geography
- AS-T in Geology
- AA-T in Global Studies
- AA-T in History
- AA-T in Journalism and Mass Communications
- AA-T in Kinesiology
- AS-T in Mathematics
- AA-T in Music
- AS-T in Nutrition and Dietetics
- AA-T in Philosophy
- AS-T in Physics
- AA-T in Political Science
- AA-T in Psychology
- AA-T in Social Justice Studies: Race and Ethnicity
- AA-T in Social Justice Studies: Women, Gender, and LGBTQ Studies
- AA-T in Sociology
- AA-T in Spanish
- AA-T in Studio Art
- AA-T in Theatre Arts
Academic and Progress Probation and Dismissal

American River College uses Academic Probation, Progress Probation, Academic Dismissal, and Progress Dismissal to identify students who are struggling and offer them support. We will notify you if you are in one of these standings, or you can view your academic standing on your unofficial transcript after grades are posted each semester. Log in to eServices (https://ps.losrios.edu/student/signon.html), then click Academic Records to find your unofficial transcript. If you are in probation or dismissal status, then you may need to meet certain requirements to remain enrolled in classes.

Definitions

Academic Probation and Academic Dismissal (AP1, AP2, AD)
- Students who have attempted at least 12 semester units, and whose cumulative GPA is below 2.0, will be placed on Academic Probation 1 (AP1).
- After the second consecutive semester of a cumulative GPA below 2.0, student will be placed on Academic Probation 2 (AP2).
- After the third consecutive semester, students are placed on Academic Dismissal (AD).
- When the overall GPA improves to 2.0 or higher, the student returns to Good Standing.

Progress Probation and Progress Dismissal (PP1, PP2, PD)
- Students who have attempted at least 12 semester units are placed on Progress Probation 1 (PP1) when W, I, and NP grades are recorded in one half or more of all units in which a student has enrolled.
- After the second consecutive semester, students fall into Progress Probation 2 (PP2).
- After the third consecutive semester, students are placed on Progress Dismissal (PD).
- When the overall ARC transcript has less than one half of W, I, or NP grades, the student returns to Good Standing.

Potential Consequences

Students who are placed on Academic Probation 2, Progress Probation 2, or Dismissal:
- Will lose priority registration as a continuing student and will only be able to register for classes during open enrollment (which is later than priority 1 and 2)
- May lose their California College Promise Grant (https://arc.losrios.edu/admissions/financial-aid-and-fees/types-of-financial-aid/grants) eligibility

Students who have a term GPA of 2.0 and have completed more than half the attempted units for the term may appeal their loss of priority registration or the California College Promise Grant.

How to Address a Probation or Dismissal Hold

Students on Academic or Progress Probation 1

American River College does not currently place holds on students on Probation 1 but we are here to help you be successful. Consider the following options to get help:
- Get academic support through the Science Success Center (https://arc.losrios.edu/student-resources/campus-tutoring-programs/science-success-center), STEM Center (https://arc.losrios.edu/student-resources/mesa), Tutoring Center (https://arc.losrios.edu/student-resources/campus-tutoring-programs), or Homebases (https://arc.losrios.edu/homebases).
- Check out our range of student support programs (https://arc.losrios.edu/student-resources/support-services).

Students on Probation 1 must achieve a 2.0 GPA or better and complete at least half of their attempted units, or they will be placed on Probation 2.

Students on Academic or Progress Probation 2

American River College does not currently place holds on students on Probation 1 but we are here to help you be successful. Consider the following options to get help:
- Get academic support through the Science Success Center (https://arc.losrios.edu/student-resources/campus-tutoring-programs/science-success-center), STEM Center (https://arc.losrios.edu/student-resources/mesa), Tutoring Center (https://arc.losrios.edu/student-resources/campus-tutoring-programs), or Homebases (https://arc.losrios.edu/homebases).
- Check out our range of student support programs (https://arc.losrios.edu/student-resources/support-services).

Students on Probation 2 must achieve a 2.0 GPA or better and complete at least half of their attempted units, or they will be placed on Dismissal.
Students on Academic or Progress Dismissal

To be readmitted after a dismissed status, students must take the following steps:

1. Complete a Back on Track workshop in Canvas.
2. After you complete the workshop, you can submit a Statement of Circumstances and request a Back on Track planning appointment in Canvas. If you do not have a Canvas tile but you do have an eServices hold, then the Back on Track team will add the tile to your Canvas account.
3. Meet with a counselor to complete a Back on Track Plan to request readmission to ARC. The deadline to complete your Back on Track Plan is ten (10) business days before the semester begins.
4. If your plan is approved, then you will have a unit limit and you must maintain a 2.0 and a 50% completion rate **each semester** until your cumulative GPA is above a 2.0 and you are out of dismissal status.

Resources For Students at Risk of Dismissal

Are you at risk of probation or dismissal? ARC has programs in place to support you and help get you back on track. Learn about the Back on Track Program (https://arc.losrios.edu/student-resources/counseling/academic-probation-dismissal-and-readmission/back-on-track-program).
Course Transferability and C-ID

Transfer Credit

Courses accepted for transfer by the University of California (UC) and/or California State University (CSU) systems are identified as such in the course details next to "Transferable." Students who have questions regarding transferability of credit for specific courses to specific institutions should consult a counselor.

Course Identification Numbering System (C-ID)

The C-ID system is a statewide numbering system designed to identify comparable courses and facilitate articulation. Any community college course that bears a C-ID number signifies that it is equivalent in content, rigor, and student learning outcomes. Any course with a C-ID number can be assured that it will be accepted at other participating community college or CSU campuses. For example: C-ID COMM 110 at American River College will be accepted by any other college that has been approved for the same C-ID COMM 110 number.

Students should consult a counselor for specific information and help evaluating course transferability. In addition, students should visit assist.org (https://assist.org) to confirm how each college’s course will be accepted for the following:

1. Majors at CSU and UC campuses
2. CSU general education requirements
3. IGETC general education requirements

Please consult a counselor to find out if your courses meet requirements at private and out-of-state colleges and universities. See an up-to-date listing of American River College C-ID approved courses at www.c-id.net (https://www.c-id.net).

Enrollment Verification

Enrollment verification for child care, health insurance, or car insurance can be printed out via eServices or requested by fax or in-person. All other requests can be processed immediately by the National Student Clearinghouse for a fee.

Verifications for Child Care, Health Insurance, and Car Insurance

eServices

You can print or save an enrollment verification certificate for free through eServices (https://ps.losrios.edu/student/signon.html). From your eServices dashboard:

1. Click Academic Records
2. Click Enrollment Verification
3. Follow the instructions to get to your printable verification

Fax and In-Person Requests

We do not accept verification requests over the phone.

Faxed and in-person requests are processed in five to seven business days after we receive the request. We do not fax back verifications - all verifications must be picked up in person at Admissions and Records. You must provide a photo ID when you pick up your enrollment verification.

Faxed requests must include:

• Your name
• Your student ID number
• Your birthdate
• Which semester you need verified
• Your signature
Other Enrollment and Degree Verifications

The National Student Clearinghouse acts as American River College's agent for verification of student enrollment and degree status. You can obtain an official Enrollment Verification Certificate online via the National Student Clearinghouse Verifications website (https://nscverifications.org/welcome-to-verification-services/) or by calling (703) 742-4200.

We will direct the following types of requests to the National Student Clearinghouse:

- Requests from credit issuers
- Requests from travel and consumer product companies
- Requests from housing providers
- Requests from scholarship providers
- Requests from employers and employment agencies
- Requests from students or parents that are not related to child care, health insurance, or car insurance
Order Official Transcripts From American River College

Order Transcripts Online

American River College has contracted with Parchment to provide transcript ordering and electronic delivery of PDF transcripts. Parchment can send PDF transcripts through an encrypted and secure service to any valid email address (another college or university, third-party recipient, or the requestor).

Current students, former students, and alumni can request a PDF transcript online anytime and from virtually anywhere. Submit separate orders for each Los Rios college attended.

Cost

The first two transcripts requests are free for each Los Rios college attended. After that, each transcript request costs $5.00. New Parchment users need to set up an account for the first order.

Current Students

Order official transcripts online through eServices. Click Academic Records, then Request Official Transcript.

Go to eServices (https://ps.losrios.edu/student/signon.html)

Alumni and Former Students

Alumni and former students can order official transcripts online directly through Parchment.

Alumni Transcript Order (https://www.parchment.com/u/registration/32214/account)

Check Order Status Online

Current and former students can check the status of a transcript order (https://www.parchment.com/u/order/track) online via their Parchment account.

Advantages of Ordering Transcripts Online

- You can order transcripts anytime, anywhere, through our partner, Parchment.
- Sending digital transcripts gets your credentials there almost instantaneously – it's the fastest way!
- Check your order status and order history online, through your Parchment Credential Profile.
- Parchment sends automatic order updates via email. From receipt of the order to order completion, the requestor is automatically notified each step of the way.
- You can send transcripts digitally to professional application services such as LSAC and AMCAS.

Important Order Information

Orders Needed Quickly

If you need your transcript quickly, then we recommend that you select the PDF delivery option. PDF transcripts are official transcripts. However, please be aware that when sending a PDF transcript to yourself, it cannot then be forwarded to a different email address. Forwarding a PDF transcript makes it unofficial. If your transcript is going to a third party, then you should have it sent directly to their email address.

Student and Alumni Responsibilities

Students and alumni assume responsibility for the following:

- Providing the correct mailing address and/or email address.
- Ensuring the recipient accepts your chosen method of delivery.
- Ordering with enough time to meet the recipient's deadline.
• Following up with the recipient to ensure the order’s arrival.

Current Semester Transcripts

Official transcripts for the current semester will be processed after final grades are submitted. At the end of the semester, you can check that your current grades are included by viewing your unofficial transcript in eServices (https://ps.losrios.edu/student/signon.html). Work-In-Progress grades will be included for current courses.

Third Party Authorization

Student records are protected by the Family Educational Rights and Privacy Act (FERPA). If a third party is picking up your transcripts, they must provide an authorization signed by you. Online requests that are automatically verified through eServices (or another automated authentication) are the exception to this rule.

Lost Transcripts

We are not responsible if your transcript is lost by the US Postal Service, FedEx, or the school or agency it was sent to. We are also not responsible if you provide the wrong mailing address and your transcript is lost as a result. You will have to pay the normal fees for new transcript orders.

Order Transcripts by Mail

Submit a completed transcript request form to American River College. Make a check or money order payable to Los Rios Community College District (the fee is $5.00 per transcript request). Mail to:

American River College
Attn: Admissions
4700 College Oak Drive
Sacramento, CA 95841

Download the ARC Transcript Request Form (shared/doc/admissions-records/forms/arc-official-transcript-request-form.pdf).

Questions?

Visit the Parchment Help Center (https://parchmentsupport.force.com/s/?language=en_US) if you have questions about ordering or email notifications, experience login issues, or need help. You can also engage with ParchieBot, an intelligent chat function designed to answer your questions and provide order information.

Credit for Prior Learning and Alternative Study Options

In addition to regular classes, students may receive college credit for prior learning and alternative study options.

Credit for Prior Learning

Advanced Placement (AP) Exams

American River College grants credit for College Board Advanced Placement (AP) examinations. A student who meets the following requirements may receive credit for exams they successfully passed:

• Official copies of test scores are on file with Admissions and Records
• Student is in good standing, which is defined as having completed twelve (12) units of credit and having a minimum 2.0 grade point average (GPA)

Students should be aware that other colleges and universities have the right to accept, modify, or reject the use of AP scores towards their graduation requirements. Check with your counselor to determine whether these test results will be accepted at the transfer institution of your choice.

Review the AP Credit Chart (https://arc.losrios.edu/ap-scores-chart) to see how American River College grants credit for AP exams.

College-Level Examination Program (CLEP)

American River College grants credit for College-Level Examination Program (CLEP) examinations. CLEP scores fulfill general education areas only; they do not fulfill graduation competencies, requirements for any major at American River College, or enrollment limitations (such as prerequisite requirements) for any course at American River College.
A student may receive credit for CLEP exams they have successfully passed once the following requirements are met:

- Official copies of test scores are on file with Admissions and Records
- Student has completed twelve (12) units of credit and has a minimum 2.0 grade point average (GPA)

Visit College Board's College-Level Examination Program website (https://clep.collegeboard.org) to learn more.

CLEP scores are not accepted for transfer to the University of California. Students should be aware that other colleges and universities have the right to accept, modify, or reject the use of CLEP scores towards their graduation requirements. Check with your counselor to determine whether these test results will be accepted at the transfer institution of your choice.

Review the CLEP Credit Chart (https://arc.losrios.edu/clep-scores-chart) to see how American River College grants credit for CLEP exams.

International Baccalaureate (IB) Tests

American River College may award college credit for international baccalaureate (IB) higher-level course completion, if the course work is compatible with the college’s curriculum. No credit will be granted for lower-level course work completed in the IB program.

A student who meets the following requirements may receive credit for IB tests they successfully passed:

- Official copies of test scores are on file with Admissions and Records
- Student is in good standing, which is defined as having completed twelve (12) units of credit and having a minimum 2.0 grade point average (GPA)

Review the IB Credit Chart (https://arc.losrios.edu/ib-scores-chart) to see how American River College grants credit for IB tests.

Students should be aware that other colleges and universities have the right to accept, modify, or reject the use of IB scores towards their graduation requirements. Check with your counselor to determine whether these test results will be accepted at the transfer institution of your choice.

Students who have earned credit from an IB test should not take a comparable college course because transfer credit will not be granted for both.

Credit by Examination

Under special circumstances and with department approval, students who are regularly enrolled and in good standing who believe they are qualified by experience or previous training may take a special examination to establish credit in a course in which they are not formally enrolled. The California College Promise and Los Rios Promise program tuition fee waivers do not cover fees for the credit by examination process. Students are required to pay the current tuition fee per unit. The determination to offer credit by examination is at the discretion of the discipline faculty.

A student who wishes to petition for credit by examination must:

- Be currently enrolled and in good standing at American River College
- Have an education plan on file
- Request a course that is listed in the current college catalog
- Never have received credit for the particular course

Successful completion of a course by the credit by examination process is recorded on the permanent transcript as a letter grade (A, B, or C) or as Pass (P) grade. The P grade does not enter into the computation of the student's GPA. Non-passing grades are not recorded on the academic transcript.

Limitations

A maximum of 15 units may be allowed by credit by examination at American River College. Credit by exam units may not be used to satisfy the 12-unit residence requirement for graduation. Credit by examination is not applicable to all courses, and in some instances, the process may require measures of evaluation.

Some four-year colleges and universities do not accept units granted through credit by examination. Students are encouraged to consult with a counselor to discuss credit by examination to determine how it may affect their educational objective.

For more information, contact the area dean.

Credit for Military Education and Training

Military personnel and veterans may receive course credit for prior military education and training.

See Credit for Military Experience (https://arc.losrios.edu/military-credit) for more information.

Alternative Study Options

Distance/Online Education

American River College offers instruction via the internet. This includes online course sections where all work is carried out online, and partially online course sections where instruction is divided between online and in-person modalities.
To be successful in online courses, students need to be self-directed, motivated, and able to independently complete and electronically submit assignments on schedule. Students will also need reliable access to a computer and basic internet skills.

Online Classes
In online classes, classes meet online and all coursework is done online. Class schedules will indicate whether an online class is asynchronous (meaning there are no scheduled meeting times) or synchronous (meaning there are regularly scheduled meetings through teleconference).

Partially Online or "Hybrid" Classes
Partially online classes feature a mix of online and in-person meetings and coursework. Class schedules will indicate the day/time of the in-person, on-campus class sessions.

Online Learning Platform
All online classes are offered through Canvas (https://lrccd.instructure.com), a cloud-based learning management system used by faculty and students within Los Rios Community College District.

Learn more about online education at American River College (https://arc.losrios.edu/academics/online-education).

Independent Study
An independent study course involves an individual student or small group of students in study, research, or activities beyond the scope of regularly offered courses, pursuant to an agreement among the college, faculty member, and student(s). Independent studies require regular meetings between the student and instructor. Additionally, the instructor may require examinations or other measures of evaluation, field trips, term papers, and other assignments.

Please note that some four-year colleges and universities do not accept units granted through independent study. Students are encouraged to meet with a counselor for more information.

For the appropriate petition and course proposal form, please contact Admissions and Records (https://arc.losrios.edu/admissions-records).

Credit for Military Service
Veterans may receive college credit for military service.

See Credit for Military Experience (https://arc.losrios.edu/military-credit) for more information.

Study Abroad
Study abroad can be an enlightening, maturing, and life-changing experience. Students are challenged to re-examine themselves, their attitudes, and their studies as they learn to understand new and different cultures. In cooperation with the American Institute for Foreign Study, Los Rios Community College District offers unique study opportunities in cities such as:

- London, England
- Barcelona, Spain
- Florence, Italy

Requirements
To study abroad, students must:

- Be at least 18 years old
- Be in good academic standing with 12 college units completed by the time you go abroad
- Have a minimum overall grade point average (GPA) of 2.25

During the 13-week Study Abroad program, all students take 12 units – a three-unit Life and Culture class, an additional Los Rios class, and two other classes from the list of offerings.

Financial Aid
Financial Aid is available for study abroad.

Upcoming Study Abroad Opportunities
Learn more about current and upcoming study abroad opportunities (https://arc.losrios.edu/study-abroad).
Work Experience and Internship Program

Work experience is an academic program in which students apply what they have learned in the classroom to a job or internship and work to earn college credits. There are two types of programs: vocational and general.

For more information, please visit the Work Experience and Internship Program (https://arc.losrios.edu/wexp).
Programs of Study

American River College offers associate degrees, certificates, and transfer opportunities, as well as courses in general education.

Degree Programs

Associate in Arts Degree (AA)

The Associate degree may be obtained by the completion of all required courses for a major (18 units or more) with grades of "C" or better in each course, fulfillment of general education requirements, satisfaction of competencies, and completion of sufficient electives to meet a minimum total of 60 units with a grade point average of 2.0 ("C" average). At least 12 units toward the degree must be completed at American River College.

Associate in Science Degree (AS)

The Associate degree may be obtained by the completion of all required courses for a major (18 units or more) with grades of "C" or better in each course, fulfillment of general education requirements, satisfaction of competencies, and completion of sufficient electives to meet a minimum total of 60 units with a grade point average of 2.0 ("C" average). At least 12 units toward the degree must be completed at American River College. An Associate in Science Degree includes all science, technology, engineering, and mathematics (STEM) disciplines and career education (CE) fields.

Associate in Arts for Transfer (AA-T) and Associate in Science for Transfer (AS-T)

The following are the Associate Degree for Transfer (ADT) student completion requirements (as stated in SB 1440 law):

1. Completion of a minimum of 60 semester units or 90 quarter units that are eligible for transfer to the California State University, including both of the following:
   A. The Intersegmental General Education Transfer Curriculum (IGETC) or the California State University (CSU) General Education Breadth Requirements.
   B. A minimum of 18 semester units or 27 quarter units in a major or area of emphasis, as determined by the community college district.
2. Obtainment of a minimum grade point average of 2.0. ADTs also require that students must earn a "C" or better in all courses required for the major or area of emphasis.

At least 12 units toward the degree must be completed at American River College.

Visit A Degree With A Guarantee: Associate Degree for Transfer (https://adegreewithaguarantee.com) to learn more.

Certificate Programs

American River College offers two types of certificates:

Certificate of Achievement

The Certificate of Achievement certifies that a student has completed all required courses and is prepared to enter the career designated on their certificate. Certificate of Achievement programs are developed to provide vocational training for students who are not necessarily seeking a college degree. Certificates of Achievement require a grade of "C" or better in each course with a minimum of 12 degree-applicable units completed at American River College.

Departmental Certificate

Departmental Certificates are intended to certify that students are prepared to meet specific occupational needs, upgrade skills, or advance in an existing career. A grade of "C" or better is required in each course leading to the Departmental Certificate. Departmental Certificates are not noted on transcripts.

Departmental Certificates require 15.99 units or fewer. For Departmental Certificates requiring one to 11 units, all units must be completed at American River College. For Departmental Certificates requiring 12 to 15.99 units, a minimum of 12 units must be completed at American River College.

Note: Department Certificates are also listed as Certificates under the program requirement.
Advanced Placement Test Scores

Students may earn credit for College Entrance Board Advanced Placement (AP) tests with scores of 3, 4, or 5. AP scores can be used to meet American River College associate degree general education requirements, California State University (CSU) general education (GE) requirements, and Intersegmental General Education Transfer Curriculum (IGETC).

A student may receive credit for AP exams they have successfully passed once the following requirements are met:

- Official copies of test scores are on file with Admissions and Records
- Student has completed twelve (12) units of credit and has a minimum 2.0 grade point average (GPA)

Students should be aware that other colleges and universities have the right to accept, modify, or reject the use of AP scores towards their graduation requirements. Check with your counselor to determine whether these test results will be accepted at the transfer institution of your choice.

American River College General Education Advanced Placement Credit

The use of AP exam scores for American River College course credit and general education is determined by American River College policy. A score of 3 or higher on the AP test is required for the course to fulfill the following GE at American River College.

CSU Advanced Placement Credit

Visit CSU's AP Credit webpage (https://www2.calstate.edu/apply/transfer/pages/advanced-placement-ap.aspx) to find information on how credit is granted for admission and general education. Please note that each campus in the CSU system individually determines how it will apply external examination credit in the major. For more information about AP credit, consult a counselor.

IGETC Advanced Placement Credit

This table describes how credit is granted for admission and general education using the Intersegmental General Education Transfer Curriculum (IGETC) pattern. For more information about transferring to the University of California (UC), see how UC awards credit for AP (https://admission.universityofcalifornia.edu/admission-requirements/ap-exam-credits/ap-credits/).

% AP test meets IGETC science course and lab requirement but only grants three units toward IGETC. Students will need to earn at least seven units in IGETC Area 5 to be certified.

$ Offered May 2013 and beyond.

** Students need to complete a course that covers California State and Local Government to complete CSU American Institutions requirement.
List of Degrees and Certificates

American River College offers degree and certificate options. Requirements are identified for each career and general education program. Students must complete the program requirements to earn the desired degree or certificate, regardless of the order of completion.

Description of Courses
College-Level Examination Program Scores

American River College grants credit for College Level Examination Program (CLEP) examinations. CLEP scores may be used to meet American River College AA/AS general education requirements and California State University (CSU) general education requirements; they do not fulfill graduation competencies, requirements for any major at American River College, or enrollment limitations (such as prerequisite requirements) for any course at American River College.

A student may receive credit for CLEP exams they have successfully passed once the following requirements are met:

- Official copies of test scores are on file with Admissions and Records
- Student has completed twelve (12) units of credit and has a minimum 2.0 grade point average (GPA)

Visit College Board’s College Level Examination Program (https://clep.collegeboard.org/) website to learn more.

CLEP scores are not accepted for transfer to the University of California. Students should be aware that other colleges and universities have the right to accept, modify, or reject the use of CLEP scores towards their graduation requirements. Check with your counselor to determine whether these test results will be accepted at the transfer institution of your choice.

American River College General Education CLEP Credit

The use of CLEP exam scores for American River College course credit and general education is determined by American River College policy.

CSU CLEP Credit

Visit CSU’s CLEP webpage (https://www2.calstate.edu/apply/transfer/Pages/college-level-examination-program.aspx) to find information on how credit is granted for admission and general education. Please note that each campus in the CSU system individually determines how it will apply external examination credit in the major. For more information about CLEP credit, consult a counselor.

Course Numbering

Course Numbering System

American River College has a standardized course numbering system. The following numbers are designed to provide students with general information regarding the focus and intent of courses.
Course Number 1 to 99
Courses numbered 1 to 99 are credit courses that are considered developmental or basic skills and are not acceptable for the associate degree or transfer credit.

Course Number 100 to 299
Courses numbered 100 to 299 are applicable to an associate degree, but not transferable to a four-year institution.

Course Number 300 to 499
Courses numbered 300 to 499 are articulated for transfer with four-year institutions and are intended to meet major, general education, or elective credit requirements.
International Baccalaureate Test Scores

American River College may award college credit for international baccalaureate (IB) higher-level (HL) course completion, if the course work is compatible with the college’s curriculum. IB test scores may be used to meet American River College AA/AS general education requirements, California State University (CSU) general education requirements, and Intersegmental General Education Transfer Curriculum (IGETC). No credit will be granted for lower-level course work completed in the IB program.

A student may receive credit for IB tests they have successfully passed once the following requirements are met:

- Official copies of test scores are on file with Admissions and Records
- Student has completed twelve (12) units of credit and has a minimum 2.0 grade point average (GPA)

Students should be aware that other colleges and universities have the right to accept, modify, or reject the use of IB scores towards their graduation requirements. Check with your counselor to determine whether these test results will be accepted at the transfer institution of your choice.

Students who have earned credit from an IB exam should not take a comparable college course because transfer credit will not be granted for both.

American River College General Education International Baccalaureate Credit

The use of IB exam scores for American River College course credit and general education is determined by American River College policy.

Prerequisites, Corequisites, and Advisories

Enrollment Conditions

Many courses and educational programs have enrollment conditions, such as prerequisites, corequisites, or advisories on recommended preparation. These faculty-approved conditions are considered necessary and appropriate to ensure that students are adequately prepared to succeed in the course or educational program. It is the student's responsibility to meet any and all enrollment conditions.

Students may challenge a prerequisite requirement through the challenge process (https://arc.losrios.edu/2023-2024-catalog/programs-of-study/description-of-courses/prerequisites-corequisites-and-advisories#challenge).

Prerequisite

A prerequisite is a course that a student is required to take to demonstrate current readiness for enrollment in another course or educational program. For example, in order to take ENGWR 301, a student must have already completed ENGWR 300 with a grade of "C" or better.

Corequisite

A corequisite is a course that a student is required to take during the same semester as another course, or prior to another course. For example, a student needs to take GEOL 300 at the same time as GEOL 301 (or before taking GEOL 301).

Advisory

An advisory is a condition of enrollment when a student is advised, but not required to meet before, or in conjunction with, enrollment in a course or educational program.

How to Verify Prerequisites or Corequisites

Verifying Prerequisites

If you are enrolled in a course that has a prerequisite, then you must provide evidence that you have met the prerequisite. Supporting evidence includes:

- A Los Rios transcript that verifies that you have earned a "C" or better in the prerequisite course. Current Los Rios students may print an unofficial transcript in eServices (https://ps.losrios.edu/student/signon.html). Instructors also have access to this information on their roster if you took the prerequisite class within Los Rios since 2003 (prior course information cannot be viewed).
- Los Rios English and/or math placement results.

If you enroll in a course and do not meet the prerequisite, then the instructor must drop you from the course.

Verifying Corequisites

If you are enrolled in a course that has a corequisite, then you must provide evidence that you meet the corequisite requirement through one of the following:

- Your personal class schedule shows you are currently enrolled in the corequisite course.
- A Los Rios transcript that shows you have already completed the corequisite course.
How to Challenge Prerequisites or Corequisites

If you do not have the supporting evidence to verify a prerequisite or corequisite (https://arc.losrios.edu/2023-2024-catalog/programs-of-study/description-of-courses/prerequisites-corequisites-and-advisories#verify) but you believe that you should qualify to enroll in the course, then you may challenge a prerequisite or corequisite.

Criteria for challenging a prerequisite or corequisite include:

- You have knowledge or ability to succeed in the course with the prerequisite.
- The prerequisite course is not readily available.
- You believe that the prerequisite is discriminatory or being applied in a discriminatory manner.
- You believe that the prerequisite was established in violation of regulations and/or the established district-approved policy and procedures.

To challenge a prerequisite or corequisite:

1. Submit a Prerequisite Equivalency Form (arc/main/doc/ARC02-Admissions/ARC-Prerequisite-Equivalency.pdf) – along with any supporting documentation – to the instructional department (locations are listed on form) at least one week prior to the start of instruction.
2. Your challenge will be reviewed by the department's prerequisite challenge committee.
3. You will be informed in writing of the committee's determination within five working days of the review.

Math and English Prerequisite Clearance

Prerequisites for all 300-level mathematics courses (MATH and STAT) and English courses (ENGWR, ENGED, and ENGCW) must be cleared prior to enrollment.

Automatic Clearance

You will be automatically cleared to enroll in a math or English class if:

- You are currently enrolled in the appropriate prerequisite course at a Los Rios college (you must earn a grade of "C" or better or you will be automatically dropped from the higher-level course before the new semester begins).
- You have completed and passed the appropriate prerequisite course at a Los Rios college.
- You have been placed into the math or English course you want to add.

Clearance Through Coursework From Outside of Los Rios

If you completed the equivalent prerequisite course with a grade of "C" or better at a college or university that is on the Los Rios Math Prerequisite Clearance List (shared/doc/admissions-records/prerequisite/math-prerequisite-clearance-list.pdf) or English Prerequisite Clearance List (shared/doc/admissions-records/prerequisite/english-prerequisite-clearance-list.pdf) then:

- Submit unofficial or official transcripts (unless already on file with the Admissions and Records office) along with the Prerequisite Equivalency Form (arc/main/doc/ARC02-Admissions/ARC-Prerequisite-Equivalency.pdf) to the Admissions and Records office. Please Note: In-progress coursework cannot be used.
- If verified through a transcript, then the external course will be posted as transfer credit on your unofficial transcript, which will clear enrollment for math courses. This process may take three to five business days, so plan ahead.

If you did not find your course on the approved equivalency lists above – but you believe you have the knowledge or ability to succeed in an English or math course through other college/university coursework (or other credentials) – then you may challenge the prerequisite via the challenge process (https://arc.losrios.edu/2023-2024-catalog/programs-of-study/description-of-courses/prerequisites-corequisites-and-advisories#challenge).
Credit for Military Experience

Military Service Transcripts

Students must send an official military transcript to American River College before petitioning for course credit for prior military education, training, and service.

The Joint Services Transcript (JST) is an academically accepted document used to validate an Army, Coast Guard, Marines, or Navy service member's military experience and training with the corresponding college credit recommendations. See Request Official Joint Services Transcript (https://jst.doded.mil/official.html).

Contact the Veterans Resource Center (https://arc.losrios.edu/veterans) for assistance.

How to Apply for Military Credit

Credit for Military Education and Training

Military personnel and veterans may receive course credit for prior military education and training.

How to Apply

Submit a completed Petition for Credit for Military Education and Training or Service (shared/doc/admissions-records/forms/credit-for-military-education-training-or-service.pdf) and an official copy of your Joint Services Transcript to Admissions and Records for review. The college will consider the credit recommendations of the American Council for Education when determining the awarding of credit for courses with subject matter similar to that of the student's military education and training. You must be currently registered as a student and in good standing to receive credit.

Credit for Military Service

Veterans may receive credit for military service.

How to Apply

Submit a completed Petition for Credit for Military Education and Training or Service (shared/doc/admissions-records/forms/credit-for-military-education-training-or-service.pdf) and a copy of your DD-214 to Admissions and Records for review. You may be eligible to receive four (4) units of living skills graduation requirements.

If you have already submitted your DD-214 to receive veteran benefits, then you are not required to submit a second copy to receive Military Service Credit.

To Be Arranged Scheduling

Some or all of the class hours for courses may be offered using the “To Be Arranged” (TBA) course scheduling option. Please refer to the class schedule listing for sections of courses for specific TBA weekly or daily class hour requirements that may apply.
College Safety and Security

At American River College, we are committed to maintaining a safe learning environment and supporting an ongoing comprehensive safety program. The Los Rios Police Department (LRPD) employs sworn police officers who are certified through California Peace Officers Standards and Training (POST) and are responsible for protecting life and property across the district.

LRPD has excellent working relationships with other law enforcement agencies and emergency service providers in our neighboring communities. These strong partnerships help support more effective responses in emergency situations.

Learn more about Los Rios Police Department (https://police.losrios.edu).

Crime Prevention
American River College actively supports crime prevention through a number of programs.

Emergency Automobile Assistance
Though they are not mechanics, Los Rios Police officers are equipped and trained to start cars with dead batteries or unlock non-electric car doors. Proper identification is required for the performance of these services.

Unlawful Weapons
California Penal Code Section 626.9 (h) prohibits the possession of a firearm on college grounds.

The California Penal Code Section also prohibits the possession of knives 626.10, switchblade 21510, pepper spray 22810 (e) and Tasers/Stun Gun 626.10.
Alcohol
Consumption of, or being under the influence of, alcohol while on campus is strictly prohibited. Violators are subject to suspension, expulsion, and/or criminal prosecution (per Los Rios Policy P-2443: Drug and Alcohol-Free Workplace and College Premises (shared/doc/board/policies/P-2443.pdf)).

Emergency Telephones
Outdoor, emergency telephones have been installed at strategic locations throughout the campuses. These blue phones, when accessed, will automatically connect the caller to the Los Rios Police Department.

Emergency Alerts and Rave Guardian App
In the event of an emergency or disaster, Los Rios will provide critical information to students and employees via an emergency alert system. Additionally, as part of our ongoing commitment to campus safety, the Los Rios Police Department launched Rave Guardian, a free mobile safety app that turns your smartphone into a personal safety device.
Learn more about emergency alerts and Rave Guardian App (https://police.losrios.edu/emergencies/emergency-alerts).

Illegal Drugs
American River College is committed to being a drug-free campus. Violators will be subject to disciplinary procedures. The use, sale, or possession on campus of, or presence on campus under the influence of, any controlled substance is strictly prohibited. Violators are subject to suspension, expulsion, and/or criminal prosecution (per Los Rios Policy P-2441: Standards of Conduct (shared/doc/board/policies/P-2441.pdf) and Los Rios Policy P-2443: Drug and Alcohol-Free Workplace and College Premises (shared/doc/board/policies/P-2443.pdf)).

Children on Campus
It is not appropriate for children to attend classes with their parents. All children on campus must be under the direct supervision of a parent, guardian, or other authorized adult. Unattended or disruptive children will be reported to the proper authorities.

Parking
Vehicles that do not have a valid semester parking decal or daily permit properly displayed will be issued a parking citation. There is a $283 fine for parking in designated disabled spaces (including hatch marks next to disabled spaces) without a state-issued disabled decal or plate.

Sexual Harassment
Sexual harassment in any situation is unacceptable and is in violation of state and federal laws and regulations. Corrective action will be taken where evidence of sexual harassment is found (per Los Rios Policy P-2424: Sexual Harassment (shared/doc/board/policies/P-2424.pdf)).

Hate Crimes
Hate crimes include any of the following offenses that are motivated by bias:
- Murder/non-negligent manslaughter, negligent manslaughter, sexual assault, robbery, aggravated assault, burglary, motor vehicle theft, arson
- Larceny-theft: The unlawful taking carrying, leading or riding away of property from the possession or constructive possession of another
- Constructive possession: the condition in which a person does not have physical custody or possession, but is in a position to exercise dominion or control over a thing
- Simple assault: an unlawful physical attack by one person upon another where neither the offender displays a weapon, nor the victim suffers obvious severe or aggravated bodi injury involving apparent broken bones, loss of teeth, possible internal injury, severe laceration, or loss of consciousness
- Intimidation: To unlawfully place another person in reasonable fear of bodily harm through the use of threatening words and/or other conduct, but without displaying a weapon or subjecting the victim to actual physical attack
- Destruction, damage, vandalism: To willfully or maliciously destroy, damage, face, or otherwise injure real or personal property without the consent of the owner or the person having custody or control of it

Cross-Listed Courses
When a course is listed under two (or more) different departments in the catalog, the course is referred to as "cross-listed," "cross-referenced," or "same as." The cross-listed course has identical content under both departments’ catalog listing.
If two (or more) courses are cross-listed, then a student can only earn credit for one of those courses. Students who are not sure which cross-listed course they should enroll in are encouraged to consult with a counselor.

When a cross-listed course is repeatable, the course may be taken (under either name) the total number of times stated in the catalog descriptions of the cross-listed course.

Reporting a Crime/Incident

To report an on-campus crime or incident, see crime and reporting (https://police.losrios.edu/crime-and-reporting) on the Los Rios Police Department website.
List of Programs

Clery Report

Each year, the Los Rios Police Department publishes the Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Report (also known as the Annual Clery Report). This report includes information about our safety and security policies and specific crime statistics.

Accounting

This degree focuses on preparation for careers in various accounting professions. It develops a common foundation in accounting and business, and provides various courses covering both fundamental and specialized accounting topics to meet individual career goals.

The Accounting certificate provides occupational training and preparation for entry-level clerical and technical positions in various accounting careers. It provides a strong background in fundamental accounting concepts and typical accounting computer applications. In addition, it provides various specialized accounting topics to meet career individual goals.

Degrees and Certificates Offered

A.A. in Accounting
Accounting Clerk Certificate
Accounting Certificate
Financial Services Apprenticeship Certificate
Taxation Certificate

Total Units: 36

The Accounting Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- evaluate and perform all steps in the financial accounting cycle.
- compile and analyze costs within a company.
- analyze and communicate appropriate information to managers, investors, creditors, and other interested parties utilizing a variety of reports.
- audit financial statements and express appropriate opinions on those statements.
- integrate the principles of business, business law, ethics, and economics into accounting functions.
- apply accounting standards and techniques to one or more specialized areas of accounting.

Career Information

This degree is designed for a variety of student objectives. It includes courses required for immediate employment in accounting positions. The courses meet the requirements of governmental employers for promotional exams. Students seeking transfer to four-year universities will meet the transfer requirements of financial accounting (ACCT 301) and managerial accounting (ACCT 311). Individuals with existing bachelor’s degrees can also use these courses to meet the requirements to take the exam for Certified Public Accountant.

Certificates of Achievement

Accounting Clerk Certificate

This certificate provides fundamental occupational training and preparation for entry level accounting clerk positions. The program includes basic accounting and specialized courses designed for the accounting workplace, including small business accounting, technology, and basic business principles.

</table>

**A minimum of 16 units from the following:**

- APPRT 498: Work Experience in Apprenticeable (Occupation) (0.5 - 4)

**Total Units:** **45 - 45.5**

**Enrollment Eligibility**
To be eligible for enrollment in the program, the student must meet the following criteria:

- At least 18 years of age.
- Meets the requirements under the selection procedures of participating California state agencies.
- Engaged in learning a designated occupation and who has entered into a written apprentice agreement to participate in an apprenticeship program for a designated occupation under Department of Apprenticeship Standards' File No. 100451. Apprentice agreement must be approved by the apprenticeship committee.
Enrollment Process

Eligible students are selected for the program according to the following steps:

- Apprentice selection process - Facilitated by the Joint Apprenticeship Committee (JAC): Application, aptitude assessment, interview with JAC and participating department, selection and confirmation, apprentice and department notification, signing ceremony.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- describe the components of the conceptual framework for financial accounting and reporting, including the qualitative characteristics of accounting information, the assumptions underlying accounting, the basic principles of financial accounting, and the constraints and limitations on accounting information.
- apply transaction analysis, input transactions into the accounting system, process this input, and prepare and interpret the four basic financial statements.
- define and illustrate various cost terms, concepts, and behaviors, and evaluate their relevance for different decision-making purposes.
- compare, contrast, and apply different costing methods.
- explain the purposes of budgeting, prepare a master budget and its component schedules, and relate the budget to planning and control.
- examine the role of cost accounting in business planning and decision-making.
- differentiate between, account for, and report product and period costs.
- use costs to make pricing and other types of business decisions.
- examine the concepts, principles, and practices of financial accounting, including discussion of Generally Accepted Accounting Principles (GAAP) and International Financial Reporting Standards (IFRS) on selected topics.
- prepare financial statements and related disclosures, including classified balance sheets, multiple step income statements with presentation of discontinued operations, extraordinary items, and accounting changes.
- analyze and account for complex business transactions.
- analyze the six principles of the American Institute of Certified Public Accountants (AICPA) Code of Professional Conduct.
- assess the various components of audit risk.
- evaluate the structure of audit working papers documentation.
- compare and contrast the three methods of documenting and assessing internal controls.
- identify, select, and use appropriate writing aids, references, and Internet resources used in business writing.
- prepare documents that exhibit a clear understanding of the essentials of sentence structure, word usage, punctuation, spelling, critical thinking, and business vocabulary.
- define and explain important legal principles and analyze how they affect business and personal issues.
- assess the reading process and materials to employ appropriate critical reading strategies.

Career Information

Training for the following California state occupations: (1) Tax Examiners, Collectors, and Revenue Agents, (2) Accountants, (3) Auditors.

Taxation Certificate

This certificate provides occupational training and education in the areas of individual and business income tax preparation and consulting. Courses in this program provide a background in individual, corporate, partnership, and estate taxes.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- complete federal and California individual income tax returns.
- prepare federal and California corporate and partnership income tax returns.
- prepare federal estate, gift, and trust tax returns.
- research federal and state tax issues.
- identify elements to utilize for tax planning.

Accounting (ACCT) Courses

ACCT 101 Fundamentals of College Accounting

Units: 3  
Hours: 54 hours LEC  
Prerequisite: None  
Advisory: BUS 105, MATH 100, MATH 104, or MATH 132; AND eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300, OR ESLW 340.

This introductory course in small business accounting covers the accounting cycle for service and merchandising businesses. Topics include the general journal, the general and subsidiary ledgers, and adjusting, correcting, and closing journal entries. Income statements, statements of owner equity, balance sheets for service and merchandising businesses are prepared and analyzed. Additional topics include cash management and bank reconciliations, accounting for sales and purchase discounts, sales taxes, merchandise inventory, and payroll.

ACCT 103 Intermediate Accounting - Part I

Units: 4  
Hours: 72 hours LEC  
Prerequisite: ACCT 301 with a grade of "C" or better
This course continues the study and application of accounting principles and techniques used in preparing and reporting the financial results of business corporations. Areas of study include liabilities and contingencies, stockholders' equity and earnings per share, investments, revenue recognition, income taxes, pensions, leases, accounting changes and error analysis, and cash flows.

**ACCT 104 Intermediate Accounting - Part II**

**Units:** 4  
**Hours:** 72 hours LEC  
**Prerequisite:** ACCT 103 with a grade of "C" or better

This course continues the study and application of accounting principles and techniques used in preparing and reporting the financial results of business corporations. Areas of study include liabilities and contingencies, stockholders' equity and earnings per share, investments, revenue recognition, income taxes, pensions, leases, accounting changes and error analysis, and cash flows.

**ACCT 107 Auditing**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** ACCT 104 with a grade of "C" or better  
**Advisory:** BUS 105 or MATH 100, 104 or 132; AND eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300, OR ESSLR 340 AND ESSLW 340.

This course on auditing practice and theory emphasizes attestation audits of financial statements and the accompanying footnotes. Topics include Generally Accepted Auditing Standards (GAAS), ethics, legal issues, audit planning and methodology, internal control analysis, sampling, and auditors' reports. Additional topics include specific auditing objectives and tests of assets, liabilities, equity, revenues, and expenses.

**ACCT 111 Cost Accounting**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** ACCT 311 with a grade of "C" or better  
**Advisory:** CISA 315

This course covers advanced managerial accounting. Topics include recording, classifying, reporting, and analyzing costs as well as examining different costing systems. It focuses on understanding costs, appropriate accounting for them, and using them to analyze, plan, operate, and evaluate manufacturing, merchandising, and service businesses. It utilizes the industry-standard software, Excel, to do so.

**ACCT 121 Payroll Accounting**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** ACCT 101 or 301 with a grade of "C" or better

This course covers current practices in payroll accounting and tax reporting, including federal and state laws that affect payroll records and reports. Topics include both manual and computer payroll systems with hands-on computer applications.

**ACCT 125 Federal and State Individual Taxation**

**Units:** 4  
**Hours:** 72 hours LEC  
**Prerequisite:** None.  
**Advisory:** ACCT 101 or 301; AND eligible for ENGRD 116; ENGWR 101; ESL 325

This course covers basic Federal and State Income Tax regulations with an emphasis on the skills necessary for the preparation of individual income tax returns. Topics include filing requirements, determination of taxable income, allowable deductions, tax computation, tax credits, other taxes, payment methods, and audit procedures.

**ACCT 128 Taxation of Corporations, Partnerships, Estates, and Trusts**

**Units:** 4  
**Hours:** 72 hours LEC  
**Prerequisite:** ACCT 125 and 301 with grades of "C" or better

This course provides a continuing study of federal income tax compliance with an emphasis on the taxation of business entities including corporations, partnerships, limited liability companies, S-corporations, estates, and trusts. Topics include tax and non-tax characteristics of business entities, income tax filing requirements, differences in book and taxable income, selection of accounting methods and periods, tax computation, and available credits.

**ACCT 153 Governmental Accounting**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** ACCT 301 with a grade of "C" or better  
**Advisory:** BUS 105 or MATH 100 or 132

This course covers accounting and financial reporting for governmental units and institutions with emphasis on the accounting standards prescribed by the Governmental Accounting Standards Board (GASB). Additional topics include governmental budgeting and budgetary controls.

**ACCT 295 Independent Studies in Accounting**

**Units:** 1 - 3  
**Hours:** 54 - 162 hours LAB  
**Prerequisite:** None.

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

**ACCT 299 Experimental Offering in Accounting**

**Units:** 0.5 - 4  
**Prerequisite:** None.

This is the experimental courses description.

**ACCT 301 Financial Accounting**

**Units:** 4  
**Hours:** 72 hours LEC  
**Prerequisite:** None.  
**Advisory:** ACCT 101; AND BUS 105 or MATH 100, or 132; AND eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300, OR ESSLR 340 AND ESSLW 340.  
**Transferable:** CSU; UC  
**C-ID:** C-ID ACCT 110

This course covers accounting as an information system, examining why it is important and how it is used by investors, creditors, and others to make decisions. Topics include the accounting information system, including recording and reporting of business transactions with a focus on the accounting cycle, the application of generally accepted accounting principles, the financial statements, and statement analysis. It also covers issues relating to asset, liability, and equity valuation, revenue and expense recognition, cash flow, internal controls, and ethics.
ACCT 311 Managerial Accounting

Units: 4  
Hours: 72 hours LEC  
Prerequisite: ACCT 301 with a grade of "C" or better  
Transferable: CSU; UC  
C-ID: C-ID ACCT 120

This course covers how managers use accounting information in decision-making, planning, directing operations, and controlling. It focuses on cost terms and concepts, cost behavior, cost structure, and cost-volume-profit analysis. Topics include issues relating to cost systems, cost control, profit planning, and performance analysis in manufacturing, merchandising, and service environments.

ACCT 341 Computerized Accounting

Units: 3  
Hours: 54 hours LEC  
Prerequisite: ACCT 101 or 301 with a grade of "C" or better  
Advisory: CISC 100 or 300  
Transferable: CSU

This course covers major areas of computerized accounting system for small business using QuickBooks Online (QBO). Topics include setting up a new company in QBO, creating a chart of accounts, banking, recording customer and vendor transactions, using QBO inventory tracking, paying employees, making adjusting entries, and generating financial and management reports for service and merchandising businesses. This course provides students with hands-on experience in using QBO and prepares students to take Intuit certified QB certification exam.

ACCT 343 Computer Spreadsheet Applications for Accounting

Units: 2  
Hours: 27 hours LEC; 27 hours LAB  
Prerequisite: None.  
Advisory: CISA 315; ENGRD 102 and ENGRD 116 OR ESR 320 and ESR 320; ESR 320; MATH 100, 104, 132 or BUS 105  
Transferable: CSU

This course combines the study of accounting and computer spreadsheets. Projects include topics in financial accounting, managerial accounting, and financial analysis. The course focuses on accuracy, clarity, creativity, adaptability, and presentation skills.

ACCT 361 Ethics, Fraud, and Legal Issues for Accountants

Units: 3  
Hours: 54 hours LEC  
Prerequisite: None.  
Advisory: ACCT 107 and 301  
Transferable: CSU

This course explores ethics, fraud, and legal issues that must be addressed by accountants, including exploration through case studies. Topics in ethics include ethical foundations as well as the unique ethical requirements of professional organizations and the California Board of Accountancy. The course also examines the legal liability of accountants. A variety of case studies are evaluated to gain perspective into ethical lapses, fraud, and legal liability.

ACCT 495 Independent Studies in Accounting

Units: 1 - 3  
Hours: 54 - 162 hours LAB  
Prerequisite: None.  
Transferable: CSU

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

ACCT 498 Work Experience in Accounting

Units: 0.5 - 4  
Hours: 30 - 300 hours LAB  
Prerequisite: None.  
Enrollment Limitation: Students must be in a paid or unpaid internship, volunteer position, or job related to accounting with a cooperating site supervisor. Students are advised to consult with the Accounting Department faculty to review specific certificate and degree work experience requirements.  
Advisor: Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLR 340.  
Transferable: CSU  
General Education: AA/AS Area III(b)

This course provides students with opportunities to develop marketable skills in preparation for employment or advancement within the field of accounting. It is designed for students interested in work experience and/or internships in transfer-level degree occupational programs. Course content includes understanding the application of education to the workforce, completion of Title 5 required forms which document the student’s progress and hours spent at the work site, and developing workplace skills and competencies.

During the semester, the student is required to complete 37.5 hours of related paid work experience, or 30 hours of related unpaid work experience for 0.5 unit. An additional 37.5 or 30 hours of related work experience is required for each additional 0.5 units. All students are required to attend the first class meeting, a mid-semester meeting, and a final meeting. Additionally, students who have not already successfully completed a Work Experience course will be required to attend weekly orientations while returning participants may meet individually with the instructor as needed. Students may take up to 16 units total across all Work Experience course offerings. This course may be taken up to four times when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

ACCT 499 Experimental Offering in Accounting

Units: 0.5 - 4  
Prerequisite: None.  
Transferable: CSU

This is the experimental courses description.

Property Tax (PROPTX) Courses

PROPTX 310 Introduction to Appraising for Property Tax Purposes

Units: 1.5  
Hours: 30 hours LEC  
Prerequisite: None.  
Advisor: MATH 100, 104, or 132; AND eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLR 340 AND ESR 340.  
Transferable: CSU

This course introduces the basic principles of property tax appraisal. It covers the economic aspects and legal definitions of market value, California Property Tax Laws and Regulations, the appraisal process, and methods of valuation. It is designed to meet the California Board of Equalization training requirements for county property tax appraisers.
PROPTX 311 Appraisal of Machinery & Equipment for Property Tax Purposes

Units: 1.5
Hours: 32 hours LEC
Prerequisite: None.
Advisory: PROPTX 110; AND MATH 100, 104, or 132; AND eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300, OR ESLR 340 AND ESLW 340.

Transferable: CSU
This course covers the principles of property tax appraisal for tax assessment of personal property and fixtures. Topics include the economic aspects and legal definitions of market value, California Property Tax Laws and Regulations, the appraisal process, and methods of valuation. It is designed to meet the California Board of Equalization training requirements for county property tax auditor-appraisers and appraisers.
Student Rights and Responsibilities
Administration of Justice

ARC’s Administration of Justice program offers both Associate’s and Associate's for Transfer degrees. The Associate’s degree covers the prevention, discovery, control and treatment of crimes, criminals, and criminality. Students desiring to enter a career concerned with the administration of justice will find that this curriculum has flexibility that allows them to prepare for specific fields included in that broad category. The Transfer degree provides students with a major that fulfills the general requirements of the California State University for transfer. Students with this degree will receive priority admission with junior status to the California State University system.

Degrees and Certificates Offered

A.S.-T. in Administration of Justice
A.S. in Administration of Justice
Homeland Security Certificate

Division Dean Steven Segura
Department Coordinator Charissa Gorre
Phone (916) 570-5000

Associate Degrees for Transfer

A.S.-T. in Administration of Justice

The Associate in Science in Administration of Justice for Transfer (A.S.-T.) degree may be obtained by completion of 60 transferable, semester units with a minimum overall grade point average (GPA) of 2.0, including (a) a minimum grade of “C” (or “P”) for each course in the major or area of emphasis described in the Required Program, and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education-Breadth Requirements.

The Associate in Science in Administration of Justice for Transfer (A.S.-T.) degree may be obtained by completion of 60 transferable, semester units with a minimum overall grade point average (GPA) of 2.0, including (a) a minimum grade of “C” (or “P”) for each course in the major or area of emphasis described in the Required Program, and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education-Breadth Requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

• evaluate various local, state, and federal law enforcement career options.
• research the law enforcement application and hiring processes.
• critique the ethical philosophy of the American justice system.
• analyze crime causation, criminal statutes and elements of particular crimes.
• describe the various levels of punishment and corrections.
• evaluate the legal aspects of criminal investigations, constitutional law, and case law.
• identify various controlled substances and interpret their impact on society and law enforcement.
• apply laws and procedures for the collection and use of evidence.
• identify ethical standards placed on law enforcement professionals.
• communicate effectively in written and oral formats.

Career Information

Potential employers include: Federal, State and local law enforcement agencies (Sheriff, Police, California Highway Patrol, Federal Bureau of Investigations, Drug Enforcement Administration, Department of Justice, Crime Scene Investigations, and California Department of Corrections and Rehabilitation).

Associate Degrees

A.S. in Administration of Justice

This degree covers the prevention, discovery, control and treatment of crimes, criminals, and criminality. Students desiring to enter a career concerned with the administration of justice will find that this curriculum has flexibility that allows them to prepare for specific fields included in that broad category.

Total Units: 24

The Administration of Justice Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- evaluate various local, state, and federal law enforcement career options.
- research the law enforcement application and hiring processes and develop an effective career strategy.
- critique the ethical philosophy of the American justice system and all participants.
- analyze crime causation, criminal statutes and elements of particular crimes and criminal procedures.
- recognize the complexities of punishment, corrections, community and human relations.
- evaluate the complex legal aspects of criminal investigations, procedures, constitutional law, and case law.
- identify various controlled substances and interpret their addictive properties, influences, and impact on society and law enforcement.
- apply laws and procedures for the collection and use of evidence.
- identify and adapt to ethical standards placed on law enforcement professionals.
- communicate effectively in written and oral formats.

Career Information

Police Officer; Deputy Sheriff; Crime Scene Investigator; Identification Technician; Community Services Officer; Corrections Officer; Parole Officer; Probation Officer and a variety of support service occupations. Potential employers include: Federal, State and local law enforcement agencies (Sheriff, Police, California Highway Patrol, Federal Bureau of Investigations, Drug Enforcement Administration, Department of Justice, Crime Scene Investigations, and California Department of Corrections and Rehabilitation).

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- construct a historical time-line reflecting significant terrorist threats and events in the United States and globally.
- classify the roles, functions of, and interdependency among local, federal and international law enforcement and military agencies to counter and combat terrorism.
- differentiate between ethical and unethical attitudes and actions regarding the execution of homeland security practices.
- identify the characteristics, ideologies, motives and behaviors of various extremist and terrorist groups that foster and support terrorist, criminal activities.
- explain operational knowledge of intelligence gathering and analysis processes pertinent to homeland security.
- identify and describe threats to national and international security.
- outline the primary federal, state, and local agencies in the United States that are affiliated with border and transportation security and the ethical parameters in which they operate.
- discuss differences in dealing with security threats for passengers versus freight/cargo transportation systems and border security.
- describe the impact of technology on countering threats to transportation systems and border security.

Administration of Justice (ADMJ) Courses

ADMJ 300 Introduction to Administration of Justice

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ELSR 340 AND ESLW 340.
Transferable: CSU; UC
General Education: AA/AS Area V(b); CSU Area D8; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4H
C-ID: C-ID Aj 110

This course introduces the characteristics of the American criminal justice system, U.S. Constitutional Rights, criminal activity, crime causation, domestic and international criminal threats, law enforcement response to criminal activity, and future law enforcement trends. It emphasizes the components of the American justice system, due process, courts and correctional services, ethics, and leadership.

ADMJ 301 Investigative Report Writing

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ELSR 340 AND ESL 340
Transferable: CSU

Homeland Security Certificate

This certificate examines the roots of terrorism, weapons of mass destruction, intelligence analysis, response methods, natural disaster incidents, threat mitigation, crisis negotiation, and conflict resolution. It explores topics directly associated with border security and security for transportation infrastructure, including: seaports, ships, aircraft, trains, train stations, highways, bridges, rail lines, pipelines, and bus systems.
This course provides techniques of writing facts, information, and ideas effectively in a simple, clear, and logical manner in the various types of criminal justice system reports. It emphasizes criminal justice terminology, organization of information, investigative note taking, and thorough documentation of witness statements and evidence.

ADMJ 302 Community Relations: Multicultural Issues

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLR 340 AND ELSW 340.
Transferable: CSU; UC
General Education: AA/AS Area V(b); AA/AS Area VI; CSU Area D3; CSU Area D7; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4
C-ID: C-ID AJ 160

This course examines the complex, dynamic relationship between communities and the institutions of the justice system in addressing crime and conflict with an emphasis on the challenges and prospects of addressing the unique cultural, multicultural, and multilingual communities. It addresses the role that race, ethnicity, gender, sexual orientation, social class, culture, and the criminal justice professional play in shaping these relationships. It also examines new strategies, skills, tools, and cultural knowledge necessary for personnel engaged in all aspects of the criminal justice system. Special topics include how terrorism and the need for homeland security have changed the dynamics of police-community relations.

ADMJ 304 Juvenile Delinquency

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300.
Transferable: CSU; UC
General Education: AA/AS Area V(b); CSU Area D0
C-ID: C-ID AJ 220

This course examines juvenile delinquency from a variety of perspectives including the concept of delinquency, theories of delinquency, social and environmental influences on delinquency, and the history of the juvenile justice system. It also explores the nature and extent of delinquency relative to gender differences, family dynamics, peer groups and gang affiliation, schools, drug use, and the juvenile justice courts.

ADMJ 309 Career Preparation for Law Enforcement Occupations

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLR 340 AND ELSW 340.
Transferable: CSU

This course is designed for students who are pursuing careers in law enforcement and corrections. It covers employment and career search techniques, application processes, resume development, and cover letter writing. This course prepares students for pre-employment testing, interviews, background investigations, polygraph examinations, medical screening, conditional job offers, and hiring processes.

ADMJ 320 Concepts of Criminal Law

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLR 340 AND ELSW 340.
Transferable: CSU; UC
General Education: AA/AS Area V(b); CSU Area D8; IGETC Area 4H
C-ID: C-ID AJ 120

This course explores the early development and present-day role of patrol operations and techniques used by local law enforcement agencies. Major topics include community policing, effective patrol strategies, gang awareness, and key factors affecting deployment of patrol resources, such as community involvement and meeting department objectives.

ADMJ 322 Criminal Procedures

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLR 340 AND ELSW 340.
Transferable: CSU
C-ID: C-ID AJ 122

This course is an in-depth study of criminal procedures used to enforce substantive law at both the federal and state level. Every step of the criminal process, from arrest to appeal, is thoroughly explored.

ADMJ 323 Legal Aspects of Evidence

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLR 340 AND ELSW 340.
Transferable: CSU
C-ID: C-ID AJ 124

This course examines the origins, development, philosophy, and constitutional foundations of the rules of evidence as applied in United States law. Emphasis is placed on the types of evidence and the laws governing admissibility of evidence into criminal procedures. Topics include search and seizure, hearsay evidence, witness competency, and direct and circumstantial evidence.

ADMJ 330 Criminal Investigation

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLR 340 AND ELSW 340.
Transferable: CSU
C-ID: C-ID AJ 140

This course introduces basic investigative responsibilities and procedures as applied to criminal investigations. Topics include crime scene management, forensic and physical evidence handling, search and seizure, property crimes, violent crimes, organized criminal enterprises, gangs, and domestic and international terrorist organizations.

ADMJ 331 Patrol Procedures

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLR 340 AND ELSW 340.
Transferable: CSU

This course explores the philosophy and structure of criminal law in the United States. Special emphasis is placed on the classification of crime, the general elements of crime, the definitions of common and statutory law, and the nature of acceptable evidence. It utilizes case studies to introduce students to criminal law and the classification of crimes against persons, property, morals, and public welfare. It also includes discussion of prosecution and defense decision making, criminal culpability, and defenses to crimes.
ADMJ 340 Introduction to Correctional Services

Units: 3  
Hours: 54 hours LEC  
Prerequisite: None.  
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340.  
Transferable: CSU  
C-ID: C-ID AJ 200

This course provides an overview of the history and trends of adult and juvenile corrections including probation and parole. It focuses on the legal issues, specific laws, and general operation of correctional institutions. The relationship between corrections and other components of the judicial system is examined.

ADMJ 498 Work Experience in Administration of Justice

Units: 0.5 - 4  
Hours: 30 - 300 hours LAB  
Prerequisite: None.  
Enrollment Limitation: Students must be in a paid or unpaid internship, volunteer position, or job related to administration of justice with a cooperating site supervisor. Students are advised to consult with the Administration of Justice Department faculty to review specific certificate and degree work experience requirements.  
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340.  
Transferable: CSU

This course provides students with opportunities to develop marketable skills in preparation for employment or advancement within the field of administration of justice. It is designed for students interested in work experience and/or internships in transfer-level degree occupational programs. Course content includes understanding the application of education to the workforce, completion of Title 5 required forms which document the student’s progress and hours spent at an approved training site, and developing workplace skills and competencies.

During the semester, the student is required to complete 37.5 hours of related paid work experience, or 30 hours of related unpaid work experience for 0.5 unit. An additional 37.5 or 30 hours of related work experience is required for each additional 0.5 units. All students are required to attend the first course meeting, a mid-semester meeting, and a final meeting. Additionally, students who have not already successfully completed a Work Experience course will be required to individually with the instructor as needed. Students may take up to 16 units total across all Work Experience course offerings. This course may be taken up to four times when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

ADMJ 499 Experimental Offering in Administration of Justice

Units: 0.5 - 4  
Prerequisite: None.  
This is the experimental courses description.

Academic Rights and Responsibilities

The classroom (including laboratories, field trips, independent study, and so on) is the essential part of any college where freedom to learn should flourish. The instructor has the responsibility for the manner of instruction and the conduct of the classroom. The instructor should not act in any way that denies the rights of students as set forth below (Administration Regulation R-2411: Student Rights and Responsibilities (shared/doc/board/regulations/R-2411.pdf)).

Student Academic Rights

Student Publications

In preparing student publications, the editorial staff and faculty advisors shall be free from censorship and advance copy approval except as provided by published district policy, statutes, or college regulation. These publications should do the following:

- Adhere to canons of responsible journalism, such as avoidance of libel, indecency, undocumented allegations, attacks on personal integrity, and the techniques of harassment and innuendo.
- State on the editorial page that the opinions expressed are not necessarily those of the college or the student body.

Support Causes

Students shall have the right to:

- Take stands on issues
- Examine and discuss questions of interest to them
- Support causes by orderly means which are in harmony with the regular functioning of the institution

Free Assembly and Free Speech

Students shall have the right to hear speakers on any subject and college recognized student organizations shall have the right to present speakers on any subject. In addition, students shall have the right of free assembly on each campus subject to regulations that assure the regular functioning of the institution.
The policies and regulations shall include reasonable provisions for the time, place, and manner of conducting these activities, but shall not prohibit the right of students to exercise free expression including, but not limited to, the use of bulletin boards, the distribution of printed materials or petitions, and the wearing of buttons, badges, and other insignia.

Expression which is obscene, libelous, or slanderous according to current legal standards, or which so incites students as to create a clear and present danger of the commission of unlawful acts on college premises, or the violation of lawful district or college regulations, or the substantial disruption of the orderly operation of the college, shall be prohibited.

**Free to Organize**

Students shall have the right to form an organization around any particular interest. This right includes the freedom to organize and to join student organizations subject to published college and district regulations.

**Voice in Decision-Making**

Students shall have the right to be informed on all college matters that can be shown to be directly relevant to them by having a voice in decision making that affects their academic future, with the exception of staff appointment, termination, and tenure.

In case of conflict in determining what college matters are relevant to students, the determination will be made by a college-designated student, faculty, and administrative committee.

In addition, student representatives shall be members of all faculty and administrative committees related to students' concerns; such student representatives shall have a vote as committee members.

**Confidentiality**

Students shall have the right to have their academic records treated in a confidential and responsible manner with due regard to the personal nature of the information these records contain. Students’ records will be released only on the written consent of the students or as provided by law. Learn more about access to student records (https://arc.losrios.edu/access-to-student-records).

**Academic Evaluation**

Students shall have the right of protection against prejudiced or capricious academic evaluation. At the same time, students are responsible for maintaining standards of academic performance established in advance for each course in which they are enrolled.

**Grievance Procedure**

Students shall have the right to file a grievance as outlined in Administrative Regulation R-2412: Student Grievance Procedures (shared/doc/board/regulations/R-2412.pdf), in the event of an alleged breach of their rights. American River College's designated grievance officer will hear grievances of students who believe their academic rights have been denied or violated.

Go to Class-Related Concerns (https://arc.losrios.edu/class-related-concerns)

**Student Responsibilities**

**The Expectations of the College**

Admission to college assumes the expectation that the student will:

- Be a responsible member of the college community
- Obey the law
- Comply with the published rules and regulations of the college
- Respect the rights, privileges, and property of the other members of the college community
- Not interfere with legitimate college affairs

Students enrolled in a class are responsible for meeting standards of performance and conduct established by the Los Rios Community College District and the instructor. Students are responsible for registering, “adding,” and “dropping” classes in a timely fashion to make sure that other students have an opportunity to take classes. Students are responsible for completing and submitting all class assignments, examinations, tests, projects, reports, and so on by scheduled due dates, or face penalties.

If any problem arises regarding coursework or attendance, the student will be held responsible for initiating communication and contact with the instructor. In addition, students will be held responsible for behavior and conduct adverse to the preservation of order as established by the college and the instructor. Students are responsible for meeting their degree requirements as provided in the college catalog.

See Students Standards of Conduct (https://arc.losrios.edu/standards-of-conduct)

Students also have the responsibility to use information technology resources effectively. Each user has the responsibility to:

- Use the resources appropriately and efficiently
- Respect the freedom and privacy of others
• Protect the stability and security of the resources
• Understand and fully abide by established college policies and applicable public laws

In the case of student conduct that involves an alleged or proven violation of criminal law, the disciplinary authority of the college will not be used to duplicate the function of criminal authority. Disciplinary action may be taken if the conduct also involves a violation of district or college policy.

See Student Disciplinary Procedures (https://arc.losrios.edu/student-discipline)
Anthropology

Anthropology is the study of humankind around the world and throughout time, with the goal of understanding our evolutionary origins, our biological distinction as a species, and our diverse manifestations of culture. This degree provides students with basic skills in critical analysis, application of the scientific method, and cross-cultural understanding.

Our curriculum includes introductory courses, archeology, world prehistory, cultures, and current issues in anthropology.

Degrees Offered

A.A.-T. in Anthropology
A.S. in Anthropology
A.S. in General Science

Associate Degrees for Transfer

A.A.-T. in Anthropology

The Associate in Arts degree in Anthropology for Transfer provides students with a major that fulfills the general requirements of the California State University for transfer. Students with this degree will receive priority admission with junior status to the California State University system. The Associate in Arts degree in Anthropology for Transfer (AA-T) may be obtained by the completion of 60 transferable, semester units with a minimum 2.0 GPA, including (a) the major or area of emphasis described in the Required Program outlined below (earning a C or better in these courses) and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education Breadth Requirements.

Anthropology is the study of humankind around the world and throughout time, with the goal of understanding our evolutionary origins, our biological distinction as a species, and our diverse manifestations of culture. A degree in anthropology provides the student with basic skills in critical analysis, application of the scientific method, and cross-cultural understanding.

A minimum of 6 units from the following: 6

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- apply the science of anthropology towards a holistic understanding of human nature.
- synthesize the principles that form the foundation of anthropology.
- analyze social and ethical issues using anthropological concepts and methods.
- assess the cultural, physical, and linguistic diversity expressed in our species.

Career Information

The AA-T degree provides students with a solid foundation in anthropology as well as the standard prerequisites for upper division coursework leading to the baccalaureate degree. Anthropologists with graduate degrees work in archaeological excavation and museum management, the analysis of cultures, linguistics, forensics, primatology, and education. They also consult with governmental, business, and educational institutions.
Associate Degrees

A.S. in Anthropology

Anthropology is the study of humankind around the world and throughout time, with the goal of understanding our evolutionary origins, our biological distinction as a species, and our diverse manifestations of culture. This degree provides students with basic skills in critical analysis, application of the scientific method, and cross-cultural understanding.

The Anthropology Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- apply the science of anthropology towards a holistic understanding of human nature.
- synthesize the principles that form the foundation of anthropology.
- analyze social and ethical issues related to the field of anthropology and its practical applications.
- analyze the cultural, physical, and linguistic diversity expressed in our species.

Career Information

This degree provides students with a solid foundation in anthropology as well as the standard prerequisites for upper division coursework leading to the baccalaureate degree. Anthropologists with graduate degrees work in occupations ranging from archaeological excavation, exploration, and museum management to the analysis of cultures, linguistics, forensics, primatology, teaching, and consulting with governmental and educational institutions.

A.S. in General Science

This program provides a broad study in the fields of biological and physical sciences in preparation for transfer to a four-year program and continuation of studies in upper division science courses.

**Total Units:** 18

1 must be transfer-level and must include one laboratory course in a physical science and one laboratory course in a biological science.

The General Science Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

**Student Learning Outcomes**

Upon completion of this program, the student will be able to:

- evaluate new and accepted ideas about the natural universe using scientific methods.
- analyze a wide variety of natural phenomena using basic definitions and fundamental theories of biological or physical sciences.
- apply appropriate quantitative and qualitative methods to interpret and analyze pertinent data.
- outline the basic concepts and fundamental theories of a natural science.
- articulate orally and/or in writing the importance of continuous examination and modification of accepted ideas as a fundamental element in the progress of science.
- discuss ethical components of scientific decision making and apply personal and social values within the process of decision making in scientific endeavors.

**Anthropology (ANTH) Courses**

**ANTH 300 Biological Anthropology**

Units: 3  
Hours: 54 hours LEC  
Prerequisite: None.  
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340
ANTH 301 Biological Anthropology Laboratory

Units: 1
Hours: 54 hours LAB
Prerequisite: None.
Corequisite: ANTH 300 or 480
Transferable: CSU; UC
General Education: CSU Area B3; Cal-GETC Area 5C (effective Fall 2025); IGETC Area 5C
C-ID: C-ID ANTH 115L

This introductory laboratory course provides opportunities to become familiar with the scientific methods of biological anthropology by investigating topics in laboratory and field situations. Topics covered in the course include the scientific method, sources of biological variation and forces of evolution, human osteology, human variation, taxonomy and comparative osteology of the primates, and the fossil evidence for evolution. Field trips may be required.

ANTH 303 Introduction to Forensic Anthropology

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: BIOL 102, BIOL 115, BIOL 430, OR ANTH 300 and 301; AND eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340.
Transferable: CSU; UC
General Education: AA/AS Area IV; CSU Area B2; Cal-GETC Area 5B (effective Fall 2025); IGETC Area 5B
C-ID: C-ID ANTH 110

This course covers the concepts, methods, and theory of biological evolution and its application to the human species. There is a specific focus on molecular, Mendelian, and population genetics as well as on the mechanisms of evolution, primatology, paleoanthropology, biocultural adaptations, human variation, and current bioethical issues. The philosophy of science and the scientific method serve as foundations to this course. This course is not open to students who have completed ANTH 480.

ANTH 319 Visual Anthropology: Introduction to Ethnographic Film

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340
Transferable: CSU; UC
General Education: AA/AS Area V(b); CSU Area D1; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4

This course introduces the use of film by anthropologists as a research and educational tool. A series of films depicting different cultures from around the world are viewed and evaluated. Various attributes of ethnographic film and its treatment by a number of anthropological filmmakers are examined.

ANTH 320 Introduction to Archaeology and World Prehistory

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340
Transferable: CSU; UC
General Education: AA/AS Area V(b); CSU Area D; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4
C-ID: C-ID ANTH 150

This course is an introduction to the theories, concepts, and methods employed by the archaeologist in the study of human history and prehistory. It emphasizes the development and diverse evolution of social and cultural systems. It also explores the challenges and achievements of non-literate and traditional cultures, diverse communities, and social classes over time.

ANTH 321 Ancient Technology

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: ANTH 320; Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340
Transferable: CSU; UC
General Education: AA/AS Area V(b)

This course examines technological capabilities of pre-industrial societies using ethnographic and archaeological examples and an experimental approach. Topics include construction techniques of temporary and permanent structures, pottery construction, glassmaking, metallurgy, textile production, as well as bone, stone, wood, and other technologies crucial to human survival. Field trips may be required.

ANTH 330 Magic, Witchcraft, and Religion

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300 or ESLW 340
Transferable: CSU; UC
General Education: AA/AS Area V(b); AA/AS Area VI; CSU Area D1; Cal-GETC Area 4

This course is a cross-cultural study of supernatural beliefs and associated rituals in various societies around the world. Emphasis is on understanding the role of beliefs within their sociocultural context and in broad comparison to understand the general functions of beliefs and
rituals in human life. Similarities and differences between traditional beliefs and world religions are also explored. Field trips may be required.

**ANTH 333 American Indians of California**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLR 340 AND ESLW 340.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area V(b); AA/AS Area Vi; CSU Area D; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4

This course surveys the sociocultural systems of California Indians from the prehistoric period to the present. In addition to offering an overview of the diversity and complexity of aboriginal California, it includes environmental adaptations, material culture, social structure, ideology, and response to change. Field trips may be required.

**ANTH 334 Native Peoples of North America**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLR 340 AND ESLW 340.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area V(b); AA/AS Area Vi; CSU Area D1; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4A

This course is an introductory survey of traditional Native American societies. It describes the peoples and cultures of North America and emphasizes native ecological adaptations, languages, social organizations, religions, mythologies and world views, and artistic representations. It also explores the interrelatedness of Indigenous Native American groups through trade, intermarriage, and other forms of cultural exchange. Field trips may be required.

**ANTH 335 Research Methods in Anthropology**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** ANTH 300 or 310 with a grade of "C" or better  
**Transferable:** CSU; UC  
**General Education:** CSU Area D; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4

This course introduces research methods for the field of anthropology. It emphasizes familiarization with specific observational research methods and the practical application of these methods in a contemporary setting. Field trips may be required.

**ANTH 336 Anthropology of Sex, Sexuality and Gender**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLR 340 AND ESLW 340.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area V(b); AA/AS Area Vi; CSU Area D1; CSU Area D3; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4A

The course is an introductory overview from a global anthropological perspective of the relationship between sexual behavior and sexuality as well as gender and other socially ascribed statuses. Diverse modern and past human and non-human primate communities are compared bioculturally. Integrating the basic branches of anthropology -- cultural, biological, linguistic and archaeological anthropology -- the course examines the role, function, and evolution of sex in the human primate. It examines the relationship between sex, sexuality, gender to adaptation as well as to social behavior and to cultural variation. The implications of research methodologies and theory in investigating sex, sexuality, culture and biology are evaluated.

**ANTH 337 The Anthropology of Food**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area V(b); CSU Area D; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4

This course examines eating, drinking, and consuming behaviors around the world through time. The roles of rituals, taboos, and belief systems are reviewed. It includes a basic anthropological approach to the search for and explanation of human universals and variations. Comparing the habits of apes and monkeys, as well as the fossil record, this course addresses the evolution of the modern human body. Shifts in social and environmental conditions, as well as the impact of innovations in methods of preparation over time and in radically diverse communities are analyzed.

**ANTH 341 Introduction to Linguistics**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLR 340 AND ESLW 340  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area V(b); AA/AS Area II(b); AA/AS Area Vi; CSU Area D1; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4A  
**C-ID:** C-ID ANTH 130

This introductory course serves as a foundation for understanding language from an anthropological perspective. It addresses such core questions as how, what, when, where, why, and with whom humans communicate. The course topics are formed around three core areas: (1) structural linguistics, which include phonetics, phonology, morphology, syntax, and semantics; (2) historical linguistics, which include language origin and evolution, structural change, and language genetics; and (3) sociocultural linguistics, which include child and adult language acquisition, and cultural and psychological constraints within the context of linguistic ethnography.

**ANTH 370 Primatology**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** ANTH 300  
**Transferable:** CSU; UC

This course provides an analysis of nonhuman primate comparative morphology, behavior, and ecology. Areas of study include general primate morphology, diet and ecology, behavior including reproduction and social systems, cognition and intelligence, and primate conservation issues. Primates in both captive and free-ranging settings are examined. Field trips for primate observations may be required.

**ANTH 391 Life and Culture Study Abroad**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Enrollment Limitation:** The student must complete the pre-enrollment process into the Los Rios Community College District Study Abroad program as required by the American Institute for Foreign Studies (AIFS).  
**Transferable:** CSU

This course allows students to acquire a level of global competence while enrolled in the Los Rios Study Abroad program. Global competence is a continuing process of acquiring specific economic, historical, and geopolitical knowledge, which supports the intercultural communication
skills and authentic lived experiences that allow a person to function in another culture, and result in attitudes of cultural appreciation and interdependence. While participating in a specific Study Abroad program the student will have opportunities to study and generally survey the host country's historical, cultural, and geopolitical influences, as well as the societal structures, to develop an understanding and appreciation of the host culture as different from U.S. American culture. Students may find information about the pre-enrollment meetings at the Study Abroad website, located at: http://www.arc.losrios.edu/Study_Abroad.htm

**ANTH 480 Honors Biological Anthropology**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Enrollment Limitation:** Eligibility for the Honors Program.  
**Transferable:** CSU; UC (ANTH 300 & 480 combined: maximum credit - one course)  
**General Education:** AA/AS Area IV; CSU Area B2; Cal-GETC Area 5B (effective Fall 2025); IGETC Area 5B  
**C-ID:** C-ID ANTH 110

This course is an introduction to the science of biological anthropology. It is a seminar-style honors course which approaches the topical material through class discussion which encourages problem solving techniques focusing on current anthropological issues. Weekly topical issues are presented in a case study format. Critical thinking skills are emphasized in responding to these issues. Topics include evolutionary theory, heredity, human variation, taxonomy and behavior of the living primates, and the fossil evidence of human evolution. This course differs from ANTH 300 in that it is offered as a seminar-style class with an emphasis on academic journal articles. This course is not open to students who have completed ANTH 300.

**ANTH 481 Honors Cultural Anthropology**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** Placement into ENGRD 480 through the assessment process.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area V(b); AA/AS Area Vi; CSU Area D1; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4A  
**C-ID:** C-ID ANTH 120

This course is an introduction to the various customs, traditions, and forms of social organization in both Western and non-Western societies. Multicultural perspectives are examined for such topics as subsistence methods, belief and religious systems, linguistics, trade and economic systems, arts, kinship systems, marriage and family systems, technology, and changes due to internal and external forces. This seminar-style honors course approaches the topical material through class discussion which encourages problem-solving techniques focusing on current anthropological issues. This course is not open to students who have completed ANTH 310.

**ANTH 494 Topics in Anthropology**

**Units:** 1 - 3  
**Hours:** 18 - 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** ENGWR 102 or 103, and ENGRD 116; OR ESLR 320 and ESLW 320; OR placement through assessment process.  
**Transferable:** CSU

This course is a concentrated study of current anthropological issues. Topics reflect contemporary issues and problems in the four traditional fields as well as an applied approach where appropriate. Issues in the area of physical anthropology are approached from a biological and ecological perspective; issues in cultural anthropology, linguistics, and archaeology are approached from a multi-cultural and international platform.

**ANTH 495 Independent Studies in Anthropology**

**Units:** 1 - 3  
**Hours:** 54 - 162 hours LAB  
**Prerequisite:** None.  
**Transferable:** CSU

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

**ANTH 499 Experimental Offering in Anthropology**

**Units:** 0.5 - 4  
**Prerequisite:** None.  
**Transferable:** CSU

This is the experimental courses description.

---

**Access to Student Records (FERPA)**

**Use and Release of Student Information**

The Family Educational Rights and Privacy Act of 1974 (FERPA) was designed to protect the privacy of educational records and to establish the rights of students to inspect and review their educational records. It also provides control over the release of educational record information. The original intent of this legislation was to keep elementary and high school records private and to give parents access to their child's school records. After a student turns eighteen or attends an institution of higher education (a college or university), the rights of access to the student's records transfer to the student. This means that all academic information regarding a college student goes directly to the student unless the student has given specific, written permission to release that information to someone else.

Though parents understandably have an interest in their child's academic progress, they are not automatically granted access to a student's records without the written consent of the student. Parents are encouraged to consult with the student if academic information is needed.

A student can give permission for a third party to access their records by filing a Student Consent for Release of Records Form (shared/doc/admissions-records/forms/student-consent-for-release-of-student-records.pdf) with the Admissions and Records office.
Legal Sanctions
The Los Rios Standards of Student Conduct prohibit the use, sale, or possession on campus of, or presence on campus under the influence of, any controlled substance. Controlled substances include cocaine, marijuana, LSD, heroin, methadone, mescaline, peyote, and methaqualone, among others.

If you abuse drugs or alcohol on campus, or appear on campus or at a college-sponsored function under the influence of drugs or alcohol, you can be suspended, expelled, and/or criminally prosecuted. The penalties for the more common offenses are:

- Possession or use of alcohol: year in jail and/or fine
• Possession of marijuana: criminal citation and fine
• Possession of cocaine: imprisonment in a state prison
• Sales of any illegal drug: imprisonment in a state prison
• Possession or use of alcohol by a minor: one year in jail and/or fine
• If you are a student employee, you may be terminated
• You are required to report any convictions within five days of the occurrence
• You will be ineligible for financial aid

Smoking Policy

Per section 2.23 of Regulation R-1411: Use of Facilities (shared/doc/board/regulations/R-1411.pdf), smoking, vaping, and the use of tobacco is prohibited on all district/college property. Smoking is defined as inhaling, exhaling, burning, or carrying any lighted or heated cigar, cigarette, pipe, or any other lighted or heated tobacco or other product intended for inhalation, in any matter or in any form. Smoking also includes the use of e-cigarettes. An e-cigarette is any oral device that provides a vapor of nicotine or any other substance for inhalation. E-cigarettes do not include products approved by the United States Department of Food and Drug Administration for medical treatment.

Computer and Internet Use Policy

Computer Use Policy

The following rules apply to all computer labs on campus. Specific labs may have additional rules.

General Rules

• Equipment use in the lab is intended for class assignments only – use of computers is closely monitored for compliance with acceptable use standards
• Computers are available on a first-come, first-served basis
• Food and/or drinks (including water bottles) are not allowed in computer labs at any time
• Children (under 18) are not allowed to use computer equipment unless they are current American River College students
• Report problems with computers and/or printers to computer lab staff
• A valid login may be used for assigned purposes only – sharing access with others is not permitted
• All downloading and saving must be to removable media
• Playing games on college computers is prohibited except for class assignments
• When you’re done, log off the computer but don’t turn the computer off
• Directions from any lab assistant or instructor concerning equipment/facilities or student conduct must be followed in order to continue use of the facilities

Respect Those Around You

• Bring your own headphones for sound control.
• Pets are not allowed, except for service animals.
• Keep noise to a minimum
• Use one workstation per person
• Keep backpacks out of the walkways
• Turn off or silence cell phones and pagers and answer phone calls outside of the lab

Software

• Software may not be copied from computers or network drives
• Installing software or games on computers is prohibited

Internet Use Policy

Internet access is limited to classroom assignments only.

The acceptable use standards concerning internet use must be followed where applicable. The following activities are not allowed:

• Transmitting unsolicited information, which contains profane language or panders to bigotry, sexism, or other forms of discrimination
• Using the internet to gain unauthorized access to any computer
• Engaging in personal attacks (writing bullying, intimidating, threatening, or harassing entries)
• Making threats (directed towards others or yourself) without expecting the recipients of those threats, the college, and the police to consider them real
• Transmitting information that contains obscene, indecent, lewd, or lascivious material or other material that explicitly or implicitly refers to sexual conduct. This includes displaying such material where other individuals could potentially view it
• Inappropriate mass mailing, which includes multiple mailing to news groups, mailing lists, or individuals

Attempts by students to obtain, manipulate, delete, or change the contents of another user's files, passwords, etc. are regarded as infractions of the California Computer Crime Penal Code. Attempts to "break" the operating system constitute a felony under this law.

Copyright and Piracy Policy

What is a Copyright?

A copyright is a legal protection that gives the developer of an original piece of work (intellectual or artistic) exclusive rights for a certain time period. Copyright infringement is the unauthorized use of copyrighted material.

What is Piracy?

Piracy is the recreational downloading of copyrighted materials. Piracy is a violation of both federal law and college policy. The Recording Industry Association of America (RIAA) and Motion Pictures Association of America (MPAAP) have been cracking down on piracy in the US and targeting university and college networks, since this is where the highest amount of copyright infringements occur.

What is Peer-to-Peer (P2P) Software?

Peer-to-Peer (P2P) software allows users to download and distribute files from computer to computer across networks using P2P protocols, regardless of whether the user has paid for the files. When users have not paid for these files, they break federal and international copyright laws.

Piracy is not the only downside of using P2P software. P2P software allows users to access your computer and potentially hack into your private data. The result is exposure of your computer to significant security risks from viruses, worms, and hackers that could lead to possible loss of data, identity theft, and other liabilities.

College Actions for Violation

Sharing music, videos, or other copyrighted materials using Peer-to-Peer (P2P) applications over the network exposes you and anyone you share files with to legal action.

If a notice is sent from a trusted agency to American River College, then the student's account will be blocked from accessing the WiFi network. The student in question may have to go through the college's disciplinary process to regain access.

Summary of Civil and Criminal Penalties for Violation of Federal Copyright Laws

Copyright infringement is the act of exercising, without permission or legal authority, one or more of the exclusive rights granted to the copyright owner under section 106 of the Copyright Act (Title 17 of the United States Code). These rights include the right to reproduce or distribute a copyrighted work. In the file-sharing context, downloading or uploading substantial parts of a copyrighted work without authority constitutes an infringement.

Penalties for copyright infringement include civil and criminal penalties. In general, anyone found liable for civil copyright infringement may be ordered to pay either actual damages or “statutory” damages affixed at not less than $750 and not more than $30,000 per work infringed. For “willful” infringement, a court may award up to $150,000 per work infringed. A court can, in its discretion, also assess costs and attorneys' fees. For details, see Title 17, United States Code, Sections 504, 505.

Willful copyright infringement can also result in criminal penalties, including imprisonment of up to five years and fines of up to $250,000 per offense.

Apprenticeship

American River College conducts, in cooperation with industry, a number of apprenticeship programs. An apprenticeship program is a formal system of occupational training from one to five years, that combines paid employment, on-the-job training and job related college instruction in order to develop skilled workers.

Apprenticeship programs are a cooperative effort between employers, the Department of Labor (DOL) and/or the Division of Apprenticeship Standards (DAS), and the college.

Enrollment in an apprenticeship course is limited to registered apprentices. Information on admission to apprenticeship status can be obtained from the local trade in which you are interested, or from the office of the Dean of Technical Education.

Degrees and Certificates Offered

A.A. in Acoustical Installer Apprenticeship
A.A. in Carpenter Apprenticeship
A.A. in Drywall/Lathing Apprenticeship
A.A. in Electrical Apprenticeship
A.A. in Elevator Apprenticeship
A.A. in Ironworkers Apprenticeship
A.A. in Mill and Cabinet Maker Apprenticeship
A.S. in Millwright Apprenticeship
A.A. in Pile Driver Apprenticeship
A.S. in Plumbers/Pipefitters Apprenticeship
A.S. in Refrigeration Service Technician Apprenticeship
A.A. in Scaffold Erector Apprenticeship
A.A. in Sheet Metal Apprenticeship
A.A. in Sheet Metal Service Technician Apprenticeship
Acoustical Installer Apprenticeship Certificate
Acoustical Installer Level I Certificate
Acoustical Installer Level II Certificate
Acoustical Installer Level III Certificate
Carpenter Apprenticeship Level I Certificate
Carpenter Apprenticeship Level II Certificate
Carpenter Apprenticeship Level III Certificate
Carpenter Apprenticeship Certificate
Drywall/Lathing Apprenticeship Certificate
Drywall/Lathing Level I Certificate
Drywall/Lathing Level II Certificate
Drywall/Lathing Level III Certificate
Electrical Apprenticeship Level I Certificate
Electrical Apprenticeship Level II Certificate
Electrical Apprenticeship Level III Certificate
Electrical Apprenticeship Level IV Certificate
Electrical Apprenticeship Certificate
Elevator Apprenticeship Level I Certificate
Elevator Apprenticeship Level II Certificate
Elevator Apprenticeship Level III Certificate
Elevator Apprenticeship Level IV Certificate
Elevator Apprenticeship Certificate
Enterprise Software Engineering and Development Apprenticeship Certificate
Hardwood Floor Layer Apprenticeship Certificate
Insulator Apprenticeship Certificate
Ironworkers Apprenticeship Certificate
Ironworkers Apprenticeship Level I Certificate
Ironworkers Apprenticeship Level II Certificate
Ironworkers Apprenticeship Level III Certificate
Ironworkers Apprenticeship Certificate
Mill and Cabinet Maker Apprenticeship Certificate
Mill and Cabinet Maker Level I Certificate
Mill and Cabinet Maker Level II Certificate
Mill and Cabinet Maker Level III Certificate
Millwright Apprenticeship Certificate
Millwright Level I Certificate
Millwright Level II Certificate
Millwright Level III Certificate
Office Modular Systems Apprenticeship Certificate
Office Modular Systems Level I Certificate
Pile Driver Apprenticeship Certificate
Pile Driver Level I Certificate
Pile Driver Level II Certificate
Pile Driver Level III Certificate
Plumbers/Pipefitters Apprenticeship Certificate
Plumbers/Pipefitters Apprenticeship Level I Certificate
Plumbers/Pipefitters Apprenticeship Level II Certificate
Plumbers/Pipefitters Apprenticeship Level III Certificate
Plumbers/Pipefitters Apprenticeship Level IV Certificate
Pre-Apprenticeship Certificate
Refrigeration Service Technician Apprenticeship Certificate
Refrigeration Service Technician Apprenticeship Level I Certificate
Refrigeration Service Technician Apprenticeship Level II Certificate
Refrigeration Service Technician Apprenticeship Level III Certificate
Refrigeration Service Technician Apprenticeship Level IV Certificate
Scaffold Erector Apprenticeship Certificate
Scaffold Erector Level I Certificate
Scaffold Erector Level II Certificate
Scaffold Erector Level III Certificate
Sheet Metal Apprenticeship Certificate
Sheet Metal Apprenticeship Level I Certificate
Sheet Metal Apprenticeship Level II Certificate
Sheet Metal Apprenticeship Level III Certificate
Sheet Metal Apprenticeship Level IV Certificate
Sheet Metal Apprenticeship Certificate
Sheet Metal Service Technician Apprenticeship Certificate
Sheet Metal Service Technician Apprenticeship Level I Certificate
Sheet Metal Service Technician Apprenticeship Level II Certificate
Sheet Metal Service Technician Apprenticeship Level III Certificate
Sheet Metal Service Technician Apprenticeship Level IV Certificate
Sheet Metal Service Technician Certificate
Shingler Certificate
Green Technology Pre-Apprenticeship Certificate
Infrastructure Pre-Apprenticeship Certificate
Utilities Worker Pre-Apprenticeship Certificate

Associate Degrees

A.A. in Acoustical Installer Apprenticeship

This degree concentrates on training apprentices to the specific levels required for the acoustical installer industry and has been approved by the State of California Department of Apprenticeship Standards. Training emphasis includes safety, blueprint reading, residential and commercial acoustical installer processes, building codes, estimation, and various carpentry topics.

Degree Requirements

The Acoustical Installer Apprenticeship Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Enrollment Eligibility

To be eligible for enrollment in the program, the student must meet the following criteria:

• Be a registered Acoustical Installer apprentice.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

• identify the components of a personal fall protection system (PFPS) and a personal fall arrest system (PFAS).
• calculate elevations from information obtained from residential plot and foundation plans.
• calculate contributory leg loads.
• formulate proper layout, cutting, and material installation procedures for the installation of braced and unbraced softits.
• explain how to install stringer system reinforced perimeter locations, bridge obstructions, and additional bracing.
• extract the information necessary to construct a Photovoltaic support structure using a set of blueprints.
• install an acoustical ceiling conforming with the regulations of the Office of Statewide Health Planning and Development.
• analyze and perform methods of joining and welding plastic materials.
• describe the importance of a construction schedule and daily job log and organize labor in conjunction with the construction schedule.

Career Information

Acoustical technicians are in high demand. The acoustical industry is not able to hire the amount of certified employees needed to fill the workforce and meet the needs of the industry. Students that are in this apprenticeship program are currently working in the acoustical industry.

A.A. in Carpenter Apprenticeship

This program concentrates on training apprentices to the specific levels required for the construction industry and has been approved by the State of California Department of Apprenticeship Standards. Training emphasis includes safety, blueprint reading, residential and commercial construction processes, building codes, estimation, and various carpentry topics.

The Carpenter Apprenticeship Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Enrollment Eligibility

To be eligible for enrollment in the program, the student must meet the following criteria:

• Be a registered Carpenter apprentice.
Student Learning Outcomes

Upon completion of this program, the student will be able to:

- demonstrate safe working practices in a field construction environment.
- demonstrate proper selection, use, care, preparation, and handling of the carpenter's tools of the trade.
- analyze, interpret, and apply national building codes relating to carpentry.
- analyze and interpret residential and commercial construction blueprints.
- evaluate, layout, and construct various systems such as floor, wall, roof, and concrete form.
- evaluate and layout a building site using architectural drawings.
- calculate elevations by using an engineer's rod and various leveling devices.
- estimate and order material for construction projects.
- identify and select appropriate materials for each phase of construction.
- develop interpersonal skills with customers, co-workers, and different trades-workers.
- plan projects with given information such as blueprints, specifications, and contract documents.

Career Information

Carpenter technicians are in high demand. The carpenters industry is not able to hire the amount of certified employees needed to fill the workforce and meet the needs of the industry. Students that are in this apprenticeship program are currently working in the carpenters industry.

A.A. in Drywall/Lathing Apprenticeship

This drywall/lathing apprenticeship degree concentrates on training apprentices to the specific levels required for the drywall/lathing industry and has been approved by the State of California Department of Apprenticeship Standards. Training emphasis includes safety, metal framing, blueprint reading, exterior/interior wall finishes, welding, residential and commercial construction process, building codes, estimation, and various construction topics.

The Drywall/Lathing Apprenticeship Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Enrollment Eligibility

To be eligible for enrollment in the program, the student must meet the following criteria:

- Be a registered Drywall/Lathing apprentice.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- demonstrate safe working practices in a field construction environment.
- demonstrate proper selection, use, care, preparation, and handling of the drywall/lathing craftsman's tools of the trade.
- analyze, interpret, and apply national building codes relating to the drywall/lathing profession.
- analyze and interpret residential commercial construction blueprints.
- evaluate, lay out, and construct various metal framing systems such as floor, wall, roof, and arches.
- calculate elevations using various leveling devices.
- identify and select appropriate material for each phase of construction.
- estimate and order material for construction projects.
- plan projects using information gathered from sources such as verbal information, written information, customer specifications, and project blueprints.
- install advanced lathing and drywall systems.

Career Information

Drywall/lathing technicians are in high demand. The drywall/lathing industry is not able to hire the amount of certified employees needed to fill the workforce and meet the needs of the industry. Students that are in this apprenticeship program are currently working in the drywall/lathing industry.

A.A. in Electrical Apprenticeship

This program provides instruction in the installation, operation, and maintenance of the electrical distribution systems in commercial and industrial sites. Topics include safety training, AC and DC electrical theory, metering, electronics, use of electrical codes, raceways, conductors, grounding, motors, transformers, fire alarm systems, fiber optics, instrumentation, building automation and heating, ventilating and air conditioning (HVAC) systems.

Total Units: 48

The Electrical Apprenticeship Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

**Enrollment Eligibility**

To be eligible for enrollment in the program, the student must meet the following criteria:

- Be a registered electrical apprentice.

**Student Learning Outcomes**

Upon completion of this program, the student will be able to:

- apply commercial and industrial safety procedures on job sites.
- analyze, interpret and apply national, state and local electrical codes.
- apply electrical mathematics in calculating resistance, current, voltage, and power in a DC series circuit.
- demonstrate use of meters to confirm electrical calculations and to troubleshoot AC and DC circuits.
- analyze, identify, and evaluate electrical mathematics in RL, RC, LC, and RLC series, parallel, and combination circuits.
- describe and apply the requirements of Occupational Safety and Health Administration (OSHA) and National Fire Protection Association (NFPA) 70E work practices.
- define principles of basic AC and DC motor theory.
- compare basic magnetism and electromagnetism, including Domain Theory.
- solve mathematical and algebraic equations that pertain to elevator equipment.
- demonstrate material handling and how to rig and hoist heavy elevator equipment.
- research how capacitors and capacitance, inductors and inductance, and diodes pertain to the elevator industry.
- interpret the electrical inductance of transformers and the functions of step-down and step-up transformers.
- define relays and timers, power and power control, as well as logic controls pertaining to elevator control systems.
- describe the components and installation procedures for installing and maintaining escalators.

**Career Information**

Upon completion of the electrical program, students may find employment in the following industry sectors: government, commercial and industrial construction and maintenance, utilities, and facilities management. Students may further their career as a licensed contractor.

**A.A. in Elevator Apprenticeship**

This program includes training for Field Ironworkers and Reinforcing Ironworkers, provided in major ironworker components to meet Division of Apprenticeship Standards (DAS) guidelines.

2023-2024 Catalog

AMERICAN RIVER COLLEGE
The Ironworkers Apprenticeship Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Enrollment Eligibility
To be eligible for enrollment in the program, the student must meet the following criteria:

• Student must be a registered Ironworker apprentice.

Student Learning Outcomes
Upon completion of this program, the student will be able to:

• demonstrate safe working practices in a field construction environment.
• analyze and interpret blueprints.
• interpret and apply welding codes.
• demonstrate proper selection, use, care, preparation, and handling of fiber lines, steel cables, wire ropes, chains, slings, cranes, ladders, scaffolds, and helicopter rigging.
• define, identify, interpret, and analyze Uniform Building Codes (UBC), classifications, plans, schedules, charts, and specifications commonly used in the ironworker trade.
• describe and apply reinforcing techniques and principles to concrete structures using steel, bar supports, bar splicing, and welding.
• perform proper structural steel erection on bridges, overpasses, and large buildings.
• weld various ferrous metals using common welding processes and safety guidelines.
• set cable tensions and pre-stress reinforcing steel to industry standards.

A.A. in Mill and Cabinet Maker Apprenticeship
This program trains apprentices on the specific levels required for the construction industry and has been approved by the State of California Department of Apprenticeship Standards. It includes safety, blueprint reading, construction processes, building codes, estimation, and various mill and cabinet carpentry topics.

Total Units: 39.5

The Mill and Cabinet Maker Apprenticeship Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Enrollment Eligibility
To be eligible for enrollment in the program, the student must meet the following criteria:

• Must be a state registered Mill and Cabinet apprentice.

Student Learning Outcomes
Upon completion of this program, the student will be able to:

• demonstrate safe working practices in a field construction environment.
• demonstrate proper selection, use, care, preparation, and handling of mill and cabinet carpenter's tools of the trade.
• analyze, interpret, and apply national building codes relating to mill and cabinet carpentry.
• analyze and interpret residential and commercial construction blueprints.
• identify and select appropriate materials for each phase of construction.
• construct and complete an advanced project demonstrating journeymen-level skills.
• apply design elements and principles to create functional and attractive cabinets.

Career Information
Mill and cabinet maker technicians are in high demand. The industry is not able to hire the amount of certified employees needed to fill the workforce and meet the needs of the industry. Students that are in this apprenticeship program are currently working in the mill and cabinet maker industry.

A.S. in Millwright Apprenticeship
This degree includes the training required to meet the Division of Apprenticeship Standards (DAS) Journey Worker guidelines for the Millwright apprenticeship program.

The Millwright Apprenticeship Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Enrollment Eligibility

To be eligible for enrollment in the program, the student must meet the following criteria:

• Be a registered Millwright apprentice.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

• demonstrate proper procedure for working on turbines.
• prepare a one-inch-thick vertical groove joint that meets AWS standards.
• produce the AWS 3G and 4G unlimited thickness practice test with FCAW.
• distinguish alternative energy sources, such as wind, nuclear, and tidal power.
• install machinery safely and effectively at the proper elevation.
• explain the layout and fabrication of header steel and methods for connecting and attaching support steel.
• explain the layout and fabrication of a monorail system.
• identify and explain plasma welding and cutting processes, components, and safety issues.
• demonstrate safe rigging practices, including hand and voice signals.

Career Information

Millwright technicians are in high demand. The millwright industry is not able to hire the amount of certified employees needed to fill the workforce and meet the needs of the industry. Students that are in this apprenticeship program are currently working in the millwright industry.

A.A. in Pile Driver Apprenticeship

This program concentrates on training pile driver apprentices to the specific levels required for the construction industry and has been approved by the State of California Division of Apprenticeship Standards. It includes safety, blueprint reading, commercial construction processes, building codes, estimation, welding, and various pile driving topics.

The Plumbers/Pipefitters Apprenticeship Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

**Enrollment Eligibility**

To be eligible for enrollment in the program, the student must meet the following criteria:

- Be a registered Plumbers and Pipefitters apprentice.

**Student Learning Outcomes**

Upon completion of this program, the student will be able to:

- apply hot pass and cover pass procedures.
- identify personality traits to work effectively with others.
- negotiate difficult workplace situations.
- practice conflict resolution.
- evaluate and develop project schedules.
- draft and properly complete construction documents.
- demonstrate uphill pipe welding method.
- list National Inspection Testing Certification (NITC) requirements for medical gas systems.
- demonstrate ability to apply applicable plumbing codes.

**Career Information**

Plumbers and pipefitters are in high demand. The plumber and pipefitters industry is not able to hire the amount of certified employees needed to fill the workforce and meet the needs of the industry. Students that are in this apprenticeship program are currently working in the plumbing industry.

The Refrigeration Service Technician Apprenticeship Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

**Enrollment Eligibility**

To be eligible for enrollment in the program, the student must meet the following criteria:

- Be a registered Refrigeration Service Technician apprentice.

**Student Learning Outcomes**

Upon completion of this program, the student will be able to:

- explain safety hazards with Heating Ventilation Air Conditioning Refrigeration (HVACR) systems.
- explain proper design, testing, and balancing of air distribution.
- demonstrate the testing of fluid flow in piping systems.
- explain electrical principles necessary for startup and testing.
- identify proper documentation requirements to report findings during start, test, and balance operations.
- prepare for the proctored UA STAR exam.
- describe methods of maximizing energy efficiency of existing Heating Ventilation Air Conditioning Refrigeration (HVACR) equipment.
- demonstrate a service technician's role in customer service.
- list conditions of air on a psychrometric chart.
- identify jobsite hazards.

**Career Information**

Refrigeration technicians are in high demand. The refrigeration industry is not able to hire the amount of employees needed to fill the workforce.
and meet the needs of the industry. Students that are in this apprenticeship program are currently working in the refrigeration industry.

*The Sheet Metal Apprenticeship Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.*

**Enrollment Eligibility**

To be eligible for enrollment in the program, the student must meet the following criteria:

- Student must be a registered Sheet Metal apprentice.

**Student Learning Outcomes**

Upon completion of this program, the student will be able to:

- Demonstrate safe working practices in a field construction environment.
- Demonstrate proper selection, use, care, preparation, and handling of the sheet metal worker's tools of the trade.
- Analyze, interpret, and apply national building codes relating to sheet metal construction.
- Analyze and interpret residential and commercial construction blueprints.
- Acquire skills and knowledge to make a successful transition to a journey-level position in the sheet metal worker trade.
- Demonstrate the ability to apply mathematical concepts to the sheet metal trade.
- Demonstrate proficiency in the principles, concepts and applications in metal fabrication methods.
Career Information

Upon completion of the Sheet Metal Apprenticeship certificate, students may find employment in the following sectors: government, residential and commercial construction and maintenance, utilities, and facilities management. Students may further their career as a licensed contractor.

A.A. in Sheet Metal Service Technician Apprenticeship

The Sheet Metal Service Technician Apprenticeship Associate of Arts concentrates on training apprentices to the specific levels required for the construction and the heating, ventilation, and air conditioning (HVAC) industries. This program has been approved by the State of California Department of Apprenticeship Standards. Training emphasis includes safety, blueprint reading, residential and commercial processes, building codes, estimation, and various sheet metal topics. It includes the servicing, start-up, and balancing of HVAC systems.

Total Units: 55

The Sheet Metal Service Technician Apprenticeship Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Enrollment Eligibility

To be eligible for enrollment in the program, the student must meet the following criteria:

• Student must be a registered Sheet Metal Service Technician apprentice.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

• analyze and interpret residential and commercial construction blueprints.
• demonstrate the proper start-up and balancing of different HVAC systems.
• demonstrate troubleshooting techniques on various HVAC systems.

Career Information

Upon completion of the Sheet Metal Service Technician Apprenticeship certificate, students may find employment in the following sectors: government, residential and commercial construction and maintenance, HVAC servicing, utilities, facilities management, and central plant operations. Students may further their career as a licensed contractor.

Certificates of Achievement

Acoustical Installer Apprenticeship Certificate

This program concentrates on training apprentices to the specific levels required for the acoustical installer industry and has been approved by the State of California Department of Apprenticeship Standards. Training emphasis includes safety, blueprint reading, residential and commercial acoustical installer processes, building codes, estimation, and various carpentry topics.

Total Units: 36

Enrollment Eligibility

To be eligible for enrollment in the program, the student must meet the following criteria:

• Be a registered Acoustical Installer apprentice.
**Student Learning Outcomes**

Upon completion of this program, the student will be able to:

- identify the components of a personal fall protection system (PFPS) and a personal fall arrest system (PFAS).
- calculate elevations from information obtained from residential plot and foundation plans.
- calculate contributory leg loads.
- formulate proper layout, cutting, and material installation procedures for the installation of braced and unbraced soffits.
- explain how to install stringer system reinforced perimeter locations, bridge obstructions, and additional bracing.
- extract the information necessary to construct a Photovoltaic support structure using a set of blueprints.
- install an acoustical ceiling conforming with the regulations of the Office of Statewide Health Planning and Development.
- analyze and perform methods of joining and welding plastic materials.
- describe the importance of a construction schedule and daily job log and organize labor in conjunction with the construction schedule.

**Career Information**

Acoustical technicians are in high demand. The acoustical industry is not able to hire the amount of certified employees needed to fill the workforce and meet the needs of the industry. Students that are in this apprenticeship program are currently working in the acoustical industry.

**Acoustical Installer Level I Certificate**

This program concentrates on training apprentices to the level I requirements for the acoustical installer industry and has been approved by the State of California Department of Apprenticeship Standards. Training emphasis includes safety, blueprint reading, residential and commercial acoustical installer processes, building codes, estimation, and various carpentry topics.

Total Units: 36

Enrollment Eligibility
To be eligible for enrollment in the program, the student must meet the following criteria:

- Be a registered Carpenter apprentice.

Student Learning Outcomes
Upon completion of this program, the student will be able to:

- Demonstrate safe working practices in a field construction environment.
- Demonstrate proper selection, use, care, preparation, and handling of the carpenter's tools of the trade.
- Analyze, interpret, and apply national building codes relating to carpentry.
- Analyze and interpret residential and commercial construction blueprints.
- Evaluate, layout, and construct various systems such as floor, wall, roof, and concrete form.
- Evaluate and layout a building site using architectural and other related drawings.
- Calculate elevations by using an engineer's rod and various leveling devices.
- Identify and select appropriate materials for each phase of construction.

Career Information
Carpenter technicians are in high demand. The carpenters industry is not able to hire the amount of certified employees needed to fill the workforce and meet the needs of the industry. Students that are in this apprenticeship program are currently working in the carpenters industry.

Drywall/Lathing Apprenticeship Certificate
This drywall/lathing apprenticeship certificate concentrates on training apprentices to the specific levels required for the construction industry and has been approved by the State of California Department of Apprenticeship Standards. Training emphasis includes safety, metal framing, blueprint reading, exterior/interior wall finishes, welding, residential and commercial construction process, building codes, estimation, and various construction topics.

- Be a registered Drywall/Lathing apprentice.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- demonstrate safe working practices in a field construction environment.
- demonstrate proper selection, use, care, preparation, and handling of the drywall/lathing craftsman's tools of the trade.
- analyze, interpret, and apply national building codes relating to the drywall/lathing profession.
- analyze and interpret residential commercial construction blueprints.
- evaluate, lay out, and construct various metal framing systems such as floor, wall, roof, and arches.
- calculate elevations using various leveling devices.
- identify and select appropriate material for each phase of construction.
- estimate and order material for construction projects.
- plan projects using information gathered from sources such as verbal information, written information, customer speciﬁcations, and project blueprints.
- install advanced lathing and drywall systems.

Career Information

Drywall/lathing technicians are in high demand. The drywall/lathing industry is not able to hire the amount of certiﬁed employees needed to ﬁll the workforce and meet the needs of the industry. Students that are in this apprenticeship program are currently working in the drywall/lathing industry.

Total Units: | 12 |

**Enrollment Eligibility**
To be eligible for enrollment in the program, the student must meet the following criteria:

- Be a registered electrical apprentice.

**Student Learning Outcomes**
Upon completion of this program, the student will be able to:

- apply commercial and industrial safety procedures on job sites.
- analyze, interpret and apply national, state and local electrical codes.
- apply electrical mathematics in calculating resistance, current, voltage, and power in a DC series circuit.

**Career Information**
Upon completion of this certificate, students may find employment in the following sectors: government, residential and commercial construction, and utilities.

**Electrical Apprenticeship Level III Certificate**
This program concentrates on training apprentices to the level III requirements for the electrical industry and has been approved by the State of California Department of Apprenticeship Standards. Training emphasis includes safety, blueprint reading, residential and commercial electrical processes, building codes, estimation, and various electrical topics.

**Total Units:** 32

**Enrollment Eligibility**
To be eligible for enrollment in the program, the student must meet the following criteria:

- Be a registered electrical apprentice.

**Student Learning Outcomes**
Upon completion of this program, the student will be able to:

- describe and apply the requirements of Occupational Safety and Health Administration (OSHA) and National Fire Protection Association (NFPA) 70E work practices.
- draw a basic 8-pin and 11-pin relay wiring layout and properly wire it in a simple motor control circuit.
- demonstrate proper terminations of a three-phase transformer.

**Career Information**
Upon completion of this certificate, students may find employment in the following sectors: government, residential and commercial construction, and utilities.

**Electrical Apprenticeship Level IV Certificate**
This program concentrates on training apprentices to the level IV requirements for the electrical industry and has been approved by the State of California Department of Apprenticeship Standards. Training emphasis includes safety, blueprint reading, residential and commercial electrical processes, building codes, estimation, and various electrical topics.

**Certificate Requirements**

Enrollment Eligibility
To be eligible for enrollment in the program, the student must meet the following criteria:

• Be a registered electrical apprentice.

Student Learning Outcomes
Upon completion of this program, the student will be able to:

• demonstrate proper wiring of motor control systems.
• define principles of basic AC and DC motor theory.
• apply National Electrical Manufacturers Association (NEMA) standards for sizing motor starters and controllers.
• develop a basic programmable logic controller (PLC) program to control a motor control process.

Career Information
Upon completion of this program, students may find employment in the following sectors: government, commercial and industrial construction and maintenance, utilities, and facilities management.

Electrical Apprenticeship Certificate
This program provides instruction in the installation, operation, and maintenance of the electrical distribution systems in commercial and industrial sites. Topics include safety training, AC and DC electrical theory, metering, electronics, use of electrical codes, raceways, conductors, grounding, motors, transformers, fire alarm systems, fiber optics, instrumentation, building automation and heating, ventilating and air conditioning (HVAC) systems.

</tr>
</tbody>
</table>

Total Units: 42

Student Learning Outcomes
Upon completion of this program, the student will be able to:

• Apply commercial and industrial safety procedures on job sites.
• Analyze, interpret and apply national, state and local electrical codes.
• Apply mathematics in calculating AC and DC series, parallel, and combination circuits.
• Identify different wiring methods for conductors, cables, and conduits.
• Analyze functions of blueprints, specifications, schedules, addenda and revisions in construction.
• Describe the function, operation and characteristics of a system and individual components of the system such as burglar alarms, fire alarms, information transport, HVAC, etc.
• Describe the functions of instrumentation in industrial process control systems.

Career Information
Upon completion of the electrical program, students may find employment in the following sectors: government, commercial and industrial construction and maintenance, utilities, and facilities management.

Elevator Apprenticeship Level I Certificate

<td>48</td>
</tr>
</tbody>
</table>

Enrollment Eligibility

To be eligible for enrollment in the program, the student must meet the following criteria:

- Be a registered elevator apprentice.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- demonstrate appropriate behavior in the workplace to prevent harassment and discrimination.
- demonstrate material handling and how to rig and hoist heavy elevator equipment.
- solve mathematical and algebraic equations that pertain to voltage, current, and resistance in electrical theory (Ohm’s Law).
- compare basic magnetism and electromagnetism, including Domain Theory.
- interpret the electrical inductance of transformers and the functions of step-down and step-up transformers.
- research how capacitors and capacitance, inductors and inductance, and diodes pertain to the elevator industry.
- define relays and timers, power and power control, as well as logic controls pertaining to elevator control systems.
- describe the components and installation procedures for installing and maintaining escalators.
Career Information

Upon completion of this certificate, students may find employment in the following sectors: government, residential and commercial construction, and utilities.

Enterprise Software Engineering and Development Apprenticeship Certificate

State of California Enterprise Software Engineering and Development Apprenticeship for the occupations of Enterprise Software Engineers and Enterprise Software Developers. In this program, apprentices shall satisfactorily complete the prescribed related and supplemental instruction (RSI) identified in the Apprenticeship Standards (File No. 100451) developed by the JAC while receiving on-the-job training in the designated occupation.

Enrollment Eligibility

To be eligible for enrollment in the program, the student must meet the following criteria:

• Must be a state registered Hardwood Floor Layer apprentice.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

• analyze enterprise data to identify problems or room for improvement.

Hardwood Floor Layer Apprenticeship Certificate

This program concentrates on training hardwood floor layer apprentices to the specific levels required for the construction industry and has been approved by the State of California Division of Apprenticeship Standards. It includes safety, blueprint reading, commercial construction processes, building codes, estimation, and various hardwood floor layer topics.

Total Units: 19.5

Enrollment Eligibility

To be eligible for enrollment in the program, the student must meet the following criteria:

• At least 18 years of age.
• Meets the requirements under the selection procedures of participating California state agencies.
• Engaged in learning a designated occupation and who has entered into a written apprentice agreement to participate in an apprenticeship program for a designated occupation under Department of Apprenticeship Standards' File No. 100451. Apprentice agreement must be approved by the apprenticeship committee.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

• demonstrate safe working practices in a field construction environment.
• demonstrate proper selection, use, care, preparation, and handling of the hardwood floor layer tools of the trade.
• analyze, interpret, and apply national building codes relating to hardwood floor laying.
• analyze and interpret construction blueprints.
• evaluate, lay out, and construct various project types.
• identify and select appropriate materials for each phase of construction.

Career Information

Hardwood floor layer technicians are in high demand. The hardwood floor layer industry is not able to hire the amount of certified employees needed to fill the workforce and meet the needs of the industry. Students that are in this apprenticeship program are currently working in the hardwood floor layer industry.

Insulator Apprenticeship Certificate

This program concentrates on training insulator apprentices to the specific levels required for the construction industry and has been approved by the State of California Division of Apprenticeship Standards. It includes safety, blueprint reading, commercial construction processes, building codes, estimation, and various insulator topics.

Total Units: 20

Enrollment Eligibility
To be eligible for enrollment in the program, the student must meet the following criteria:

- Be a registered ironworkers apprentice.

Student Learning Outcomes
Upon completion of this program, the student will be able to:

- demonstrate safely working in a field construction environment.
- analyze and interpret blueprints.
- interpret and apply welding codes.
- demonstrate proper selection, use, care, preparation, and handling of fiber lines, steel cables, wire ropes, chains, slings, cranes, ladders, scaffolds, and helicopter rigging.
- define, identify, interpret, and analyze uniform building codes (UBC), classifications, plans, schedules, charts, and specifications commonly used in the ironworker trade.
- describe and apply reinforcing techniques and principles to concrete structures using steel, bar supports, bar splicing, and welding.
- perform proper structural steel erection on bridges, overpasses, and large buildings.

Career Information
Ironworker technicians are in high demand. The ironworkers industry is not able to hire the amount of certified employees needed to fill the workforce and meet the needs of the industry. Students that are in this apprenticeship program are currently working in the ironworkers industry.

Ironworkers Apprenticeship Level III Certificate
This program concentrates on training apprentices to the level III requirements for the ironworkers industry and has been approved by the State of California Department of Apprenticeship Standards. Training emphasis includes safety, blueprint reading, residential and commercial ironworkers processes, building codes, estimation, and various ironworkers topics.

- Must be a state registered Mill and Cabinet Maker apprentice.

Student Learning Outcomes
Upon completion of this program, the student will be able to:

- demonstrate safe working practices in a field construction environment.
- demonstrate proper selection, use, care, preparation, and handling of the mill and cabinet carpenter's tools of the trade.
- analyze, interpret, and apply national building codes relating to mill and cabinet carpentry.
- identify and select appropriate materials for each phase of construction.

Career Information
Mill and cabinet maker technicians are in high demand. The industry is not able to hire the amount of certified employees needed to fill the workforce and meet the needs of the industry. Students that are in this apprenticeship program are currently working in the mill and cabinet maker industry.

Millwright Apprenticeship Certificate
This certificate includes the training required to meet the Division of Apprenticeship Standards (DAS) Journey Worker guidelines for the Millwright apprenticeship program.

- Work Experience in Carpenters Apprenticeship (0.5 - 4)

Total Units: 38

Enrollment Eligibility
To be eligible for enrollment in the program, the student must meet the following criteria:

- Be a registered Millwright apprentice.

Student Learning Outcomes
Upon completion of this program, the student will be able to:

- demonstrate proper procedure for working on turbines.
- prepare a one-inch-thick vertical groove joint that meets AWS standards.
- produce the AWS 3G and 4G unlimited thickness practice test with FCAW.
- distinguish alternative energy sources, such as wind, nuclear, and tidal power.
- install machinery safely and effectively at the proper elevation.
- explain the layout and fabrication of header steel and methods for connecting and attaching support steel.
- explain the layout and fabrication of a monorail system.
- identify and explain plasma welding and cutting processes, components, and safety issues.
- demonstrate safe rigging practices, including hand and voice signals.

Career Information
Millwright technicians are in high demand. The millwright industry is not able to hire the amount of certified employees needed to fill the workforce and meet the needs of the industry. Students that are in this apprenticeship program are currently working in the millwright industry.

Enrollment Eligibility
To be eligible for enrollment in the program, the student must meet the following criteria:

- Be a state registered Millwright apprentice

Student Learning Outcomes
Upon completion of this program, the student will be able to:

- demonstrate basic safety practices with hand and power tools, scaffold and fall protection use, fire protection, respiratory protection, and confined spaces as required by the Occupational Safety and Health Administration's regulations.
- describe the responsibilities of the apprentice as required by Joint Apprenticeship and Training Committee (JATC) and other governing agencies.
- demonstrate basic layout methods for establishing a right angle.
- describe fall protection anchorage points for scaffolding.
- identify the characteristics of a variety of shapes of structural materials and appropriate applications of each.
- calculate and lay out angles using appropriate methods.

Enrollment Eligibility

To be eligible for enrollment in the program, the student must meet the following criteria:

- Must be a state registered Office Modular Systems apprentice.
Student Learning Outcomes

Upon completion of this program, the student will be able to:

- demonstrate safe working practices in a field construction environment.
- demonstrate proper selection, use, care, preparation, and handling of the pile driver's tools of the trade.
- identify and select appropriate materials for each phase of construction.
- analyze, interpret, and apply national building codes relating to pile driving.
- analyze and interpret construction blueprints.
- evaluate, lay out, and construct various project types.
- identify and select appropriate materials for each phase of construction.

Career Information

Office modular systems technicians are in high demand. The office modular systems industry is not able to hire the amount of certified employees needed to fill the workforce and meet the needs of the industry. Students that are in this apprenticeship program are currently working in the office modular systems industry.

Enrollment Eligibility

To be eligible for enrollment in the program, the student must meet the following criteria:

• Be a registered Pile Driver apprentice.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

• demonstrate safe working practices in a field construction environment.
• demonstrate proper selection, use, care, preparation, and handling of the pile driver’s tools of the trade.
• identify and select appropriate materials for each phase of construction.
• analyze and interpret construction blueprints.

Career Information

Upon completion of this certificate, students may find employment in the following sectors: government, residential and commercial construction, and utilities.

Pile Driver Level III Certificate

This certificate includes the training for pile driver to meet the Division of Apprenticeship Standards (DAS) level III guidelines for the pile driver apprenticeship program.

Total Units: 56.5

**Enrollment Eligibility**

To be eligible for enrollment in the program, the student must meet the following criteria:

- Be a registered Plumbers and Pipefitters apprentice.

**Student Learning Outcomes**

Upon completion of this program, the student will be able to:

- demonstrate use of mathematics related to the plumbing industry.
- calculate pipe measurements.
- understand basic safety practices on the jobsite as required by the Occupational Safety and Health Administration’s regulations.
- demonstrate safe rigging practices, including hand and voice signals.
- understand scientific and mechanical principles applicable to plumbing.
- describe the operating principles of plumbing fixtures.

**Career Information**

Plumbers and pipe-fitters are in high demand. The plumber and pipefitters industry is not able to hire the amount of certified employees needed to fill the workforce and meet the needs of the industry.

---

**Plumbers/Pipefitters Apprenticeship Level I Certificate**

This certificate includes the training for plumbers to meet the Division of Apprenticeship Standards (DAS) Level I guidelines for the plumbers apprenticeship program.

**Enrollment Eligibility**

To be eligible for enrollment in the program, the student must meet the following criteria:

- Be a registered Plumbers and Pipefitters apprentice.

**Student Learning Outcomes**

Upon completion of this program, the student will be able to:

- apply hot pass and cover pass procedures.
- identify personality traits to work effectively with others.
- negotiate difficult workplace situations.
- practice conflict resolution.
- evaluate and develop project schedules.
- draft and properly complete construction documents.
- demonstrate uphill pipe welding method.
- list National Inspection Testing Certification (NITC) requirements for medical gas systems.
- demonstrate ability to apply applicable plumbing codes.

**Career Information**

Plumbers and pipefitters are in high demand. The plumber and pipefitters industry is not able to hire the amount of certified employees needed to fill the workforce and meet the needs of the industry.

2023-2024 Catalog
Enrollment Eligibility
To be eligible for enrollment in the program, the student must meet the following criteria:

• Be a registered Plumbers and Pipefitters apprentice.

Student Learning Outcomes
Upon completion of this program, the student will be able to:

• demonstrate safety procedures related to welding, brazing, burning, and soldering.
• demonstrate proper welding skills per industry standards.
• interpret blueprint drawings and welding symbols.
• classify piping layouts.
• create isometric drawings of piping systems.
• identify piping and fixture support.

Career Information
Plumbers and pipefitters are in high demand. The plumber and pipefitters industry is not able to hire the amount of certified employees needed to fill the workforce and meet the needs of the industry. Students that are in this apprenticeship program are currently working in the plumbing industry.

Plumbers/ Pipefitters Apprenticeship Level IV Certificate
This certificate includes the training for plumbers to meet the Division of Apprenticeship Standards (DAS) Level IV guidelines for the plumbers apprenticeship program.

Certificate Requirements

</tbody>
</table>

Enrollment Eligibility
To be eligible for enrollment in the program, the student must meet the following criteria:

• Be a registered Plumbers and Pipefitters apprentice.

Student Learning Outcomes
Upon completion of this program, the student will be able to:

• identify water treatment purification practices.
• design, lay out, and build commercial water supply systems.
• define thermal expansion and pressure control.

Career Information
Plumbers and pipefitters are in high demand. The plumber and pipefitters industry is not able to hire the amount of certified employees needed to fill the workforce and meet the needs of the industry. Students that are in this apprenticeship program are currently working in the plumbing industry.

Pre-Apprenticeship Certificate
This program prepares students for entry into an apprenticeship program in the commercial and industrial building and construction industries. Topics include Leadership in Energy and Environmental
Design (LEED) processes, green technologies, green building techniques, infrastructure, and transportation projects.

Certificate Requirements

<table>

<td></td>
<td>16</td>
</tr>
</tbody>
</table>

Student Learning Outcomes

Upon completion of this program, the student will be able to:

• describe basic skills required for the construction of roads, bridges, levees, and rail.
• describe the Leadership in Energy and Environmental Design (LEED) rating process.
• identify green alternatives to conventional building practices and describe the pros and cons of those alternatives.
• apply proper lifting/movement techniques applicable to green technology workforce occupations.
• determine the validity of fitness and health information using the scientific method and the relationship between scientific research and established knowledge.
• implement a personal fitness plan using proper strength and cardiovascular training.

Refrigeration Service Technician Apprenticeship Certificate

This certificate includes the training for refrigeration to meet the Division of Apprenticeship Standards (DAS) journey worker guidelines for the refrigeration apprenticeship program.

</tbody>
</table>

Enrollment Eligibility

To be eligible for enrollment in the program, the student must meet the following criteria:

• Be a registered Refrigeration Service Technician apprentice.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

• classify piping layouts.
• create isometric drawings of piping systems.
• demonstrate working knowledge of Heating Ventilation Air Conditioning Refrigeration (HVACR) related science.
• understand the EPA 608 certification requirements.
Career Information

Refrigeration technicians are in high demand. The refrigeration industry is not able to hire the amount of certified employees needed to fill the workforce and meet the needs of the industry. Students that are in this apprenticeship program are currently working in the refrigeration industry.

Refrigeration Service Technician Apprenticeship Level II Certificate

This certificate includes the training for refrigeration to meet the Division of Apprenticeship Standards (DAS) Level II guidelines for the refrigeration apprenticeship program.

</tr>
</tbody>
</table>

Enrollment Eligibility

To be eligible for enrollment in the program, the student must meet the following criteria:

• Be a registered Refrigeration Service Technician apprentice.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

• explain the fundamentals of the vapor refrigeration cycle.
• demonstrate the use of the pressure enthalpy diagram.
• list appropriate customer relation behaviors.
• read schematic electrical diagrams.
• compare direct and alternating currents.
• identify symbols in an electrical wire diagram.

Career Information

Refrigeration technicians are in high demand. The refrigeration industry is not able to hire the amount of certified employees needed to fill the workforce and meet the needs of the industry. Students that are in this apprenticeship program are currently working in the refrigeration industry.

Refrigeration Service Technician Apprenticeship Level III Certificate

This certificate includes the training for refrigeration to meet the Division of Apprenticeship Standards (DAS) Level III guidelines for the refrigeration apprenticeship program.

Certificate Requirements

<table>

<tr>
<td></td>
<td>Total Units:</td>
<td>48.5</td>
</tr>
</tbody>
</table>

Enrollment Eligibility

To be eligible for enrollment in the program, the student must meet the following criteria:

• Be a registered Refrigeration Service Technician apprentice.
Student Learning Outcomes
Upon completion of this program, the student will be able to:
- adjust and calibrate a variable air volume (VAV) box.
- build control panels.
- design a pneumatic control system.
- create a wiring ladder diagram.
- demonstrate the use of automatic systems inputs and outputs.
- perform building automation system (BAS) installation, wiring, and testing.
- apply safety guidelines to electrical control systems.

Career Information
Refrigeration technicians are in high demand. The refrigeration industry is not able to hire the amount of certified employees needed to fill the workforce and meet the needs of the industry. Students that are in this apprenticeship program are currently working in the refrigeration industry.

Scaffold Erector Apprenticeship Certificate
This program concentrates on training scaffold erector apprentices to the specific levels required for the construction industry and has been approved by the State of California Division of Apprenticeship Standards. It includes safety, blueprint reading, commercial construction processes, building codes, estimation, welding, and proper scaffold erection.

Certificate Requirements

Total Units: 11

Enrollment Eligibility

To be eligible for enrollment in the program, the student must meet the following criteria:

- Be a registered sheet metal apprentice.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- Analyze and avoid unsafe conditions and unsafe acts, and observe safety laws and regulations.
- Describe general Occupational Safety & Health Administration (OSHA) and Environmental Protection Agency (EPA) requirements on construction job sites.
- Demonstrate basic drafting skills and use of drafting tools.
- Demonstrate proper soldering on sheet metal fabrication.
- Identify and define plan view, elevation view and develop a profile in a sheet metal layout project.

Career Information

Sheet metal technicians are in high demand. The sheet metal industry is not able to hire the amount of certified employees needed to fill the workforce and meet the needs of the industry. Students that are in this apprenticeship program are currently working in the sheet metal industry.

Sheet Metal Apprenticeship Level II Certificate

This program concentrates on training apprentices to the level II requirements for the sheet metal industry and has been approved by the State of California Department of Apprenticeship Standards. Training emphasis includes safety, blueprint reading, residential and commercial sheet metal processes, building codes, estimation, and various sheet metal topics.

Enrollment Eligibility

To be eligible for enrollment in the program, the student must meet the following criteria:

- Be a registered sheet metal apprentice.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- Apply mathematics to fabricate complex sheet metal fittings.
- Draft and fabricate round duct fittings.
- Identify hidden job costs and assemble a simple bid.
- Demonstrate proper mitering of flashing and gutter products.
- Identify and demonstrate proper installation procedures for fire and smoke dampers.
- Identify safe rigging practices.

Career Information

Sheet metal technicians are in high demand. The sheet metal industry is not able to hire the amount of certified employees needed to fill the workforce and meet the needs of the industry. Students that are in this apprenticeship program are currently working in the sheet metal industry.

Sheet Metal Apprenticeship Level III Certificate

Enrollment Eligibility

To be eligible for enrollment in the program, the student must meet the following criteria:

- Be a registered sheet metal apprentice.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- Measure the moisture content of air and relative humidity using a sling psychrometer and a psychometric chart.
• calculate ventilation requirements for a given space.
• demonstrate the use of an air duct calculator to design a duct system.
• identify and avoid unsafe conditions and unsafe acts, and observe safety laws and regulations on construction job sites.
• demonstrate proper layout of a roof curb and duct penetrations.

Career Information
Sheet metal technicians are in high demand. The sheet metal industry is not able to hire the amount of certified employees needed to fill the workforce and meet the needs of the industry. Students that are in this apprenticeship program are currently working in the sheet metal industry.

Sheet Metal Apprenticeship Level IV Certificate
This program concentrates on training apprentices to the level IV requirements for the sheet metal industry and has been approved by the State of California Department of Apprenticeship Standards. Enrollment Eligibility
To be eligible for enrollment in the program, the student must meet the following criteria:
• Be a registered sheet metal apprentice.

Student Learning Outcomes
Upon completion of this program, the student will be able to:
• calculate air system pressure, balancing and sizing to specified requirements.
• assemble a shop fabrication order from given drawings, blueprints and specifications.
• demonstrate the drafting, layout and installation of rooftop steel.
• demonstrate testing of an HVAC system to calculate specified air balance.
• identify code violations in mechanical design based on the Uniform Mechanical Code (UMC).

Career Information
Sheet metal technicians are in high demand. The sheet metal industry is not able to hire the amount of certified employees needed to fill the workforce and meet the needs of the industry. Students that are in this apprenticeship program are currently working in the sheet metal industry.

Sheet Metal Apprenticeship Certificate
The Sheet Metal Apprenticeship certificate concentrates on training apprentices to the specific levels required for the construction industry and has been approved by the State of California Department of Apprenticeship Standards. Training emphasis includes safety, blueprint reading, residential and commercial processes, building codes, estimation, and various sheet metal topics.

Total Units: 58

Enrollment Eligibility
To be eligible for enrollment in the program, the student must meet the following criteria:
• Student must be a registered Sheet Metal apprentice.

Student Learning Outcomes
Upon completion of this program, the student will be able to:
• demonstrate safe working practices in a field construction environment.
• demonstrate proper selection, use, care, preparation, and handling of the sheet metal worker's tools of the trade.
• analyze, interpret, and apply national building codes relating to sheet metal construction.
• analyze and interpret residential and commercial construction blueprints.
• acquire skills and knowledge to make a successful transition to a journey-level position in the sheet metal worker trade.
• demonstrate the ability to apply mathematical concepts to the sheet metal trade.
• demonstrate proficiency in the principles, concepts and applications in metal fabrication methods.

Career Information
Upon completion of the Sheet Metal Apprenticeship certificate, students may find employment in the following sectors: government, residential and commercial construction and maintenance, utilities, and facilities management.
Sheet Metal Service Technician Apprenticeship Level I Certificate

This program concentrates on training apprentices to the level I requirements for the sheet metal service technician industry and has been approved by the State of California Department of Apprenticeship Standards. Training emphasis includes safety, blueprint reading, residential and commercial sheet metal processes, building codes, estimation, and various sheet metal topics.

Enrollment Eligibility

To be eligible for enrollment in the program, the student must meet the following criteria:

- Be a registered sheet metal service technician apprentice.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- demonstrate use of tools and instruments used by sheet metal service technicians.
- define and calculate the enthalpy necessary for refrigeration systems.
- explain the basic refrigeration cycle.
- diagnose a refrigeration system on a small HVAC package unit.
- demonstrate proper recovery of refrigerant.

Career Information

Sheet metal service technicians are in high demand. The sheet metal industry is not able to hire the amount of certified employees needed to fill the workforce and meet the needs of the industry. Students that are in this apprenticeship program are currently working in the sheet metal service industry.

Sheet Metal Service Technician Apprenticeship Level II Certificate

This program concentrates on training apprentices to the level II requirements for the sheet metal service technician industry and has been approved by the State of California Department of Apprenticeship Standards. Training emphasis includes safety, blueprint reading, residential and commercial sheet metal processes, building codes, estimation, and various sheet metal topics.

Enrollment Eligibility

To be eligible for enrollment in the program, the student must meet the following criteria:

- Be a registered sheet metal service technician apprentice.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- analyze control diagrams in a packaged air conditioning unit.
- demonstrate measuring for electricity with a voltage meter in an air conditioning package unit.
- demonstrate wiring a basic hermetically sealed motor.
- demonstrate the servicing of a hermetically sealed motor.
- calculate the overload protection for a motor.

Career Information

Sheet metal service technicians are in high demand. The sheet metal industry is not able to hire the amount of certified employees needed to fill the workforce and meet the needs of the industry. Students that are in this apprenticeship program are currently working in the sheet metal service industry.

Sheet Metal Service Technician Apprenticeship Level III Certificate

This program concentrates on training apprentices to the level III requirements for the sheet metal service technician industry and has been approved by the State of California Department of Apprenticeship Standards. Training emphasis includes safety, blueprint reading, residential and commercial sheet metal processes, building codes, estimation, and various sheet metal topics.

Enrollment Eligibility

To be eligible for enrollment in the program, the student must meet the following criteria:

- Be a registered sheet metal service technician apprentice.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- measure the moisture content of air and relative humidity using a sling psychrometer and psychrometric chart.
- demonstrate the use of an air duct calculator to analyze an air duct system design.
• calculate ventilation requirements for a given building space.
• calculate the heat load for a cooling system.
• describe the various operating cycles of a heat pump system.

Career Information

Sheet metal service technicians are in high demand. The sheet metal industry is not able to hire the amount of certified employees needed to fill the workforce and meet the needs of the industry. Students that are in this apprenticeship program are currently working in the sheet metal service industry.

Sheet Metal Service Technician Apprenticeship Level IV Certificate

This program concentrates on training apprentices to the level IV requirements for the sheet metal service technician industry and has been approved by the State of California Department of Apprenticeship Standards. Training emphasis includes safety, blueprint reading, residential and commercial sheet metal processes, building codes, estimation, and various sheet metal topics.

Enrollment Eligibility

To be eligible for enrollment in the program, the student must meet the following criteria:

• Be a registered sheet metal service technician apprentice.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

• summarize the applications of a computerized building management system.
• describe the various methods used in charging commercial refrigeration systems.
• measure a digital signal with the proper measurement instrument.
• explain the basic logic and function of a analog to digital and digital to analog converter.
• demonstrate the setup and balancing of a variable-air volume system.

Career Information

Sheet metal service technicians are in high demand. The sheet metal industry is not able to hire the amount of certified employees needed to fill the workforce and meet the needs of the industry. Students that are in this apprenticeship program are currently working in the sheet metal service industry.

Sheet Metal Service Technician Apprenticeship Certificate

The Sheet Metal Service Technician Apprenticeship certificate concentrates on training apprentices to the specific levels required for the construction and the heating, ventilation, and air conditioning (HVAC) industries. This program has been approved by the State of California Department of Apprenticeship Standards. Training emphasis includes safety, blueprint reading, residential and commercial processes, building codes, estimation, and various sheet metal topics. It includes the servicing, start-up, and balancing of HVAC systems.

Enrollment Eligibility

To be eligible for enrollment in the program, the student must meet the following criteria:

• Student must be a registered Sheet Metal Service Technician apprentice.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

• demonstrate safe working practices in a field construction environment.
• demonstrate proper selection, use, care, preparation, and handling of the sheet metal worker's tools of the trade.
• analyze, interpret, and apply national building codes relating to sheet metal and mechanical construction.
• analyze and interpret residential and commercial construction blueprints.
• demonstrate the proper start-up and balancing of different HVAC systems.
• demonstrate troubleshooting techniques on various HVAC systems.

Career Information

Upon completion of the Sheet Metal Service Technician Apprenticeship certificate, students may find employment in the following sectors: government, residential and commercial construction and maintenance,
HVAC servicing, utilities, facilities management, and central plant operations.

**Shingler Certificate**

This program concentrates on training shingler apprentices to the specific levels required for the construction industry and has been approved by the State of California Division of Apprenticeship Standards. It includes safety, blueprint reading, commercial construction processes, building codes, estimation, and various shingler topics.

**Enrollment Eligibility**

To be eligible for enrollment in the program, the student must meet the following criteria:

- Must be a state registered Carpenter's apprentice.

**Student Learning Outcomes**

Upon completion of this program, the student will be able to:

- Demonstrate safe working practices in a field construction environment.
- Demonstrate proper selection, use, care, preparation, and handling of the tools used in the shingler trade.
- Analyze, interpret, and apply national building codes relating to a shingler.
- Analyze and interpret construction blueprints.
- Evaluate, lay out, and construct various project types.
- Identify and select appropriate materials for each phase of construction.

**Career Information**

Upon completion of this certificate, students may find employment in the following sectors: government, residential, and commercial construction.

**Certificates**

**Green Technology Pre-Apprenticeship Certificate**

This certificate prepares students for entry into an apprenticeship program in the commercial and industrial building and construction industries. Topics include green building practices, construction job site safety requirements, construction mathematics, and apprenticeship entry requirements.

**Certificate Requirements**

\[1\] This course replaces FITNS 358

**Student Learning Outcomes**

Upon completion of this program, the student will be able to:

- Explain safety regulations and safe working conditions for apprenticeship training.
- Identify construction practices used by different building trades such as sheet metal workers, electricians, plumbers, pipe-fitters, and carpenters.
- Describe the life cycle phases of a building and impacts on the green environment over its life cycle.

**Infrastructure Pre-Apprenticeship Certificate**

This certificate prepares students for entry into an apprenticeship program in the infrastructure industries such as bridge, levee, and road construction. Topics include bridge construction practices, construction job site safety requirements, construction mathematics, and apprenticeship entry requirements.

**Student Learning Outcomes**

Upon completion of this program, the student will be able to:

- Explain safety regulations and safe working conditions for apprenticeship training.
- Identify construction practices used by different building trades such as carpenters, bricklayers, pile-drivers, cement masons, laborers, operating engineers, and surveyors.
- Describe the construction processes involved in a typical bridge building.

**Utilities Worker Pre-Apprenticeship Certificate**

This certificate prepares students for entry into an apprenticeship program in the utility industry. Topics include job-site safety requirements, electrical and gas principles, blueprint reading, electrical power distribution, utility pole climbing, and apprenticeship preparation.

**Certificate Requirements**

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- explain electrical fundamentals such as Ohm’s and Watt’s Law.
- define terms and vocabulary used in the utility industry.
- explain electrical and gas distribution for the utility industry.
- identify safety laws, regulations, and safe working conditions for apprenticeship.
- describe effective conflict resolution methods.
- describe the functions of transformers, electrical generators, and electrical equipment.

Career Information

This program provides opportunities for entry into the utility industry where there is high demand for trained entry level workers.

Apprenticeship (APPRT) Courses

APPRT 298 Work Experience in Apprenticeable (Occupation)

Units: 0.5 - 4
Hours: 37.5 - 300 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be indentured in an apprenticeship program.
General Education: AA/AS Area III(b)

This course provides apprentices the opportunity to participate in an apprenticeship program for the purpose of developing specific skills to meet the goals and objectives of the Joint Apprenticeship Committee (J.A.C.) or the Unilateral Training Committee (U.T.C.). Apprentices complete work experience hours at an approved training site. Apprentices may take up to 16 units total across all Work Experience course offerings. This course may be repeated when there are new or expanded occupational competencies and performance criteria. Only one Work Experience course may be taken per semester.

APPRT 299 Experimental Offering in Apprenticeship

Units: 0.5 - 4
Prerequisite: None.

This is the experimental courses description.

APPRT 498 Work Experience in Apprenticeable (Occupation)

Units: 0.5 - 4
Hours: 37.5 - 300 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be indentured in an apprenticeship program.
Transferable: CSU
General Education: AA/AS Area III(b)

This course provides apprentices the opportunity to participate in an apprenticeship program for the purpose of developing specific skills to meet the goals and objectives of the Joint Apprenticeship Committee (J.A.C.) or the Unilateral Training Committee (U.T.C.). It is designed for students interested in apprenticeship programs in transfer-level degree occupational programs.

Apprentices complete work experience hours at an approved training site. Apprentices may take up to 16 units total across all Work Experience course offerings. This course may be repeated when there are new or expanded occupational competencies and performance criteria. Only one Work Experience course may be taken per semester.

APPRT 499 Experimental Offering in Apprenticeship

Units: 0.5 - 4
Prerequisite: None.

This is the experimental courses description.

CAL-JACs Firefighter Apprenticeship (CALJA) Courses

CALJA 100 Fire Fighter 100

Units: 2.5
Hours: 31.5 hours LEC; 40.5 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be a Registered Fire Fighter Apprentice.

This course is the second in a series for an apprentice Fire Fighter. It provides information on jobs and duties of an apprentice Fire Fighter. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Firefighter Joint Apprenticeship Committee (CAL-JAC).

CALJA 101 Fire Fighter 101

Units: 2.5
Hours: 31.5 hours LEC; 40.5 hours LAB
Prerequisite: None.
Enrollment Limitation: Registered Fire Fighter Apprentice.

This course is the first in a series for an apprentice Fire Fighter. This course provides information on jobs and duties of an apprentice Fire Fighter. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Firefighter Joint Apprenticeship Committee (CAL-JAC).

CALJA 102 Fire Fighter 102

Units: 2.5
Hours: 31.5 hours LEC; 40.5 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be a Registered Fire Fighter Apprentice.

This course is the third in a series for an apprentice Fire Fighter. It provides information on jobs and duties of an apprentice Fire Fighter. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Firefighter Joint Apprenticeship Committee (CAL-JAC).

CALJA 103 Fire Fighter 103

Units: 2.5
Hours: 31.5 hours LEC; 40.5 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be a Registered Fire Fighter Apprentice.

This course is the fourth in a series for an apprentice Fire Fighter. It provides information on jobs and duties of an apprentice Fire Fighter. Topics covered in the course are based on the needs of the apprentice.
and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Firefighter Joint Apprenticeship Committee (CAL-JAC).

**CALJA 104 Fire Fighter 104**

*Units*: 2.5  
*Hours*: 31.5 hours LEC; 40.5 hours LAB  
*Prerequisite*: None.  
*Enrollment Limitation*: Student must be a Registered Fire Fighter Apprentice.

This course is the fifth in a series for an apprentice Fire Fighter. It provides information on jobs and duties of an apprentice Fire Fighter. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Firefighter Joint Apprenticeship Committee (CAL-JAC).

**CALJA 105 Fire Fighter 105**

*Units*: 2.5  
*Hours*: 31.5 hours LEC; 40.5 hours LAB  
*Prerequisite*: None.  
*Enrollment Limitation*: Student must be a Registered Fire Fighter Apprentice.

This course is the sixth in a series for an apprentice Fire Fighter. It provides information on jobs and duties of an apprentice Fire Fighter. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Firefighter Joint Apprenticeship Committee (CAL-JAC).

**CALJA 110 Fire Fighter 110**

*Units*: 2.5  
*Hours*: 31.5 hours LEC; 40.5 hours LAB  
*Prerequisite*: None.  
*Enrollment Limitation*: Student must be a Registered Fire Fighter II Apprentice.

This course is the first in a series for an apprentice Fire Fighter II. It provides information on jobs and duties of an apprentice Fire Fighter II. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Firefighter Joint Apprenticeship Committee (CAL-JAC).

**CALJA 111 Fire Fighter 111**

*Units*: 2.5  
*Hours*: 31.5 hours LEC; 40.5 hours LAB  
*Prerequisite*: None.  
*Enrollment Limitation*: Student must be a Registered Fire Fighter II Apprentice.

This course is the second in a series for an apprentice Fire Fighter II. It provides information on jobs and duties of an apprentice Fire Fighter II. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Firefighter Joint Apprenticeship Committee (CAL-JAC).

**CALJA 112 Fire Fighter 112**

*Units*: 2.5  
*Hours*: 31.5 hours LEC; 40.5 hours LAB  
*Prerequisite*: None.  
*Enrollment Limitation*: Student must be a Registered Fire Fighter II Apprentice.

This course is the third in a series for an apprentice Fire Fighter II. It provides information on jobs and duties of an apprentice Fire Fighter II. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Firefighter Joint Apprenticeship Committee (CAL-JAC).

**CALJA 113 Fire Fighter 113**

*Units*: 2.5  
*Hours*: 31.5 hours LEC; 40.5 hours LAB  
*Prerequisite*: None.  
*Enrollment Limitation*: Student must be a Registered Fire Fighter II Apprentice.

This course is the fourth in a series for an apprentice Fire Fighter II. It provides information on jobs and duties of an apprentice Fire Fighter II. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Firefighter Joint Apprenticeship Committee (CAL-JAC).

**CALJA 114 Fire Fighter 114**

*Units*: 2.5  
*Hours*: 31.5 hours LEC; 40.5 hours LAB  
*Prerequisite*: None.  
*Enrollment Limitation*: Student must be a Registered Fire Fighter II Apprentice.

This course is the fifth in a series for an apprentice Fire Fighter II. It provides information on jobs and duties of an apprentice Fire Fighter II. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Firefighter Joint Apprenticeship Committee (CAL-JAC).

**CALJA 115 Fire Fighter 115**

*Units*: 2.5  
*Hours*: 31.5 hours LEC; 40.5 hours LAB  
*Prerequisite*: None.  
*Enrollment Limitation*: Student must be a Registered Fire Fighter II Apprentice.

This course is the sixth in a series for an apprentice Fire Fighter II. It provides information on jobs and duties of an apprentice Fire Fighter II. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Firefighter Joint Apprenticeship Committee (CAL-JAC).

**CALJA 120 Wildland Fire Fighter Specialist 120**

*Units*: 2.5  
*Hours*: 31.5 hours LEC; 40.5 hours LAB  
*Prerequisite*: None.  
*Enrollment Limitation*: Student must be a Registered Wildland Fire Fighter Specialist Apprentice.

This course is the first in a series for an apprentice Wildland Fire Fighter Specialist. It provides information on jobs and duties of an apprentice Wildland Fire Fighter Specialist. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Firefighter Joint Apprenticeship Committee (CAL-JAC).

**CALJA 121 Wildland Fire Fighter Specialist 121**

*Units*: 2.5  
*Hours*: 31.5 hours LEC; 40.5 hours LAB  
*Prerequisite*: None.  
*Enrollment Limitation*: Student must be a Registered Wildland Fire Fighter Specialist Apprentice.
This course is the second in a series for an apprentice Wildland Fire Fighter Specialist. It provides information on jobs and duties of an apprentice Wildland Fire Fighter Specialist. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Firefighter Joint Apprenticeship Committee (CAL-JAC).

**CALJA 122 Wildland Fire Fighter Specialist 122**

**Units:** 2.5  
**Hours:** 31.5 hours LEC; 40.5 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Student must be a Registered Wildland Fire Fighter Specialist Apprentice.

This course is the third in a series for an apprentice Wildland Fire Fighter Specialist. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Firefighter Joint Apprenticeship Committee (CAL-JAC).

**CALJA 130 Fire Suppression Technician 130**

**Units:** 2.5  
**Hours:** 31.5 hours LEC; 40.5 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Student must be a Registered Fire Suppression Technician Apprentice.

This course is the first in a series for an apprentice Fire Suppression Technician. It provides information on jobs and duties of an apprentice Fire Suppression Technician. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC).

**CALJA 131 Fire Suppression Technician 131**

**Units:** 2.5  
**Hours:** 31.5 hours LEC; 40.5 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Student must be a Registered Fire Suppression Technician Apprentice.

This course is the second in a series for an apprentice Fire Suppression Technician. It provides information on jobs and duties of an apprentice Fire Suppression Technician. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC).

**CALJA 132 Fire Suppression Technician 132**

**Units:** 2.5  
**Hours:** 31.5 hours LEC; 40.5 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Student must be a Registered Fire Suppression Technician Apprentice.

This course is the third in a series for an apprentice Fire Suppression Technician. It provides information on jobs and duties of an apprentice Fire Suppression Technician. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC).

**CALJA 133 Fire Suppression Technician 133**

**Units:** 2.5  
**Hours:** 31.5 hours LEC; 40.5 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Student must be a Registered Fire Suppression Technician Apprentice.

This course is the fourth in a series for an apprentice Fire Suppression Technician. It provides information on jobs and duties of an apprentice Fire Suppression Technician. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC).

**CALJA 140 Fire Fighter Diver 140**

**Units:** 2.5  
**Hours:** 31.5 hours LEC; 40.5 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Student must be a Registered Fire Fighter Diver Apprentice.

This course is the first in a series for an apprentice Fire Fighter Diver. It provides information on jobs and duties of an apprentice Fire Fighter Diver. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC).

**CALJA 141 Fire Fighter Diver 141**

**Units:** 2.5  
**Hours:** 31.5 hours LEC; 40.5 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Student must be a Registered Fire Fighter Diver Apprentice.

This course is the second in a series for an apprentice Fire Fighter Diver. It provides information on jobs and duties of an apprentice Fire Fighter Diver. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC).

**CALJA 142 Fire Fighter Diver 142**

**Units:** 2.5  
**Hours:** 31.5 hours LEC; 40.5 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Student must be a Registered Fire Fighter Diver Apprentice.

This course is the third in a series for an apprentice Fire Fighter Diver. It provides information on jobs and duties of an apprentice Fire Fighter Diver. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC).

**CALJA 143 Fire Fighter Diver 143**

**Units:** 2.5  
**Hours:** 31.5 hours LEC; 40.5 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Student must be a Registered Fire Fighter Diver Apprentice.

This course is the fourth in a series for an apprentice Fire Fighter Diver. It provides information on jobs and duties of an apprentice Fire Fighter Diver. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC).
CALJA 144 Fire Fighter Diver 144

Units: 2.5  
Hours: 31.5 hours LEC; 40.5 hours LAB  
Prerequisite: None.  
Enrollment Limitation: Student must be a Registered Fire Fighter Diver Apprentice.

This course is the fifth in a series for an apprentice Fire Fighter Diver. It provides information on jobs and duties of an apprentice Fire Fighter Diver. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC).

CALJA 145 Fire Fighter Diver 145

Units: 2.5  
Hours: 31.5 hours LEC; 40.5 hours LAB  
Prerequisite: None.  
Enrollment Limitation: Student must be a Registered Fire Fighter Diver Apprentice.

This course is the sixth in a series for an apprentice Fire Fighter Diver. It provides information on jobs and duties of an apprentice Fire Fighter Diver. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC).

CALJA 146 Fire Fighter Diver 146

Units: 2.5  
Hours: 31.5 hours LEC; 40.5 hours LAB  
Prerequisite: None.  
Enrollment Limitation: Student must be a Registered Fire Fighter Diver Apprentice.

This course is the seventh in a series for an apprentice Fire Fighter Diver. It provides information on jobs and duties of an apprentice Fire Fighter Diver. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC).

CALJA 150 Firefighter EMT 150

Units: 2.5  
Hours: 31.5 hours LEC; 40.5 hours LAB  
Prerequisite: None.  
Enrollment Limitation: Student must be a Registered Firefighter EMT Apprentice.

This course is the first in a series for an apprentice Firefighter EMT. It provides information on jobs and duties of an apprentice Firefighter EMT. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC).

CALJA 151 Firefighter EMT 151

Units: 2.5  
Hours: 31.5 hours LEC; 40.5 hours LAB  
Prerequisite: None.  
Enrollment Limitation: Student must be a Registered Firefighter EMT Apprentice.

This course is the second in a series for an apprentice Firefighter EMT. It provides information on jobs and duties of an apprentice Firefighter EMT. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC).

CALJA 152 Firefighter EMT 152

Units: 2.5  
Hours: 31.5 hours LEC; 40.5 hours LAB  
Prerequisite: None.  
Enrollment Limitation: Student must be a Registered Firefighter EMT Apprentice.

This course is the third in a series for an apprentice Firefighter EMT. It provides information on jobs and duties of an apprentice Firefighter EMT. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC).

CALJA 153 Firefighter EMT 153

Units: 2.5  
Hours: 31.5 hours LEC; 40.5 hours LAB  
Prerequisite: None.  
Enrollment Limitation: Student must be a Registered Firefighter EMT Apprentice.

This course is the fourth in a series for an apprentice Firefighter EMT. It provides information on jobs and duties of an apprentice Firefighter EMT. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC).

CALJA 154 Firefighter EMT 154

Units: 2.5  
Hours: 31.5 hours LEC; 40.5 hours LAB  
Prerequisite: None.  
Enrollment Limitation: Student must be a Registered Firefighter EMT Apprentice.

This course is the fifth in a series for an apprentice Firefighter EMT. It provides information on jobs and duties of an apprentice Firefighter EMT. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC).

CALJA 155 Firefighter EMT 155

Units: 2.5  
Hours: 31.5 hours LEC; 40.5 hours LAB  
Prerequisite: None.  
Enrollment Limitation: Student must be a Registered Firefighter EMT Apprentice.

This course is the sixth in a series for an apprentice Firefighter EMT. It provides information on jobs and duties of an apprentice Firefighter EMT. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC).

CALJA 156 Firefighter EMT 156

Units: 2.5  
Hours: 31.5 hours LEC; 40.5 hours LAB  
Prerequisite: None.  
Enrollment Limitation: Student must be a Registered Firefighter EMT Apprentice.

This course is the seventh in a series for an apprentice Firefighter EMT. It provides information on jobs and duties of an apprentice Firefighter EMT. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC).
CALJA 160 Emergency Medical Technician (EMT Basic) 160

Units: 2.5  
Hours: 31.5 hours LEC; 40.5 hours LAB  
Prerequisite: None  
Enrollment Limitation: Student must be a Registered Emergency Medical Technician Apprentice.

This course is the first in a series for an apprentice Emergency Medical Technician. It provides information on jobs and duties of an apprentice Emergency Medical Technician. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the Related and Supplemental Instruction specified by the Rules and Regulations of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC).

CALJA 161 Emergency Medical Technician (EMT Basic) 161

Units: 2.5  
Hours: 31.5 hours LEC; 40.5 hours LAB  
Prerequisite: None  
Enrollment Limitation: Student must be a Registered Emergency Medical Technician Apprentice.

This course is the second in a series for an apprentice Emergency Medical Technician. It provides information on jobs and duties of an apprentice Emergency Medical Technician. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the Related and Supplemental Instruction specified by the Rules and Regulations of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC).

CALJA 162 Paramedic 162

Units: 2.5  
Hours: 31.5 hours LEC; 40.5 hours LAB  
Prerequisite: Possess a current EMT-Basic certificate or have possessed a valid EMT-Basic certificate within the past 12 months -or- meet all requirements imposed by the local EMS Agency and the California Emergency Medical Services Authority.  
Enrollment Limitation: Student must be a Registered Paramedic Apprentice.

This course is the first in a series for an apprentice Paramedic. It provides information on jobs and duties of an apprentice Paramedic. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the Related and Supplemental Instruction specified by the Rules and Regulations of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC).

CALJA 163 Paramedic 163

Units: 2.5  
Hours: 31.5 hours LEC; 40.5 hours LAB  
Prerequisite: Possess a current EMT-Basic certificate or have possessed a valid EMT-Basic certificate within the past 12 months -or- meet all requirements imposed by the local EMS Agency and the California Emergency Medical Services Authority.  
Enrollment Limitation: Student must be a Registered Paramedic Apprentice.

This course is the second in a series for an apprentice Paramedic. It provides information on jobs and duties of an apprentice Paramedic. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the Related and Supplemental Instruction specified by the Rules and Regulations of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC).

CALJA 164 Paramedic 164

Units: 2.5  
Hours: 31.5 hours LEC; 40.5 hours LAB  
Prerequisite: Possess a current EMT-Basic certificate or have possessed a valid EMT-Basic certificate within the past 12 months -or- meet all requirements imposed by the local EMS Agency and the California Emergency Medical Services Authority.  
Enrollment Limitation: Student must be a Registered Paramedic Apprentice.

This course is the third in a series for an apprentice Paramedic. It provides information on jobs and duties of an apprentice Paramedic. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the Related and Supplemental Instruction specified by the Rules and Regulations of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC).

CALJA 165 Paramedic 165

Units: 2.5  
Hours: 31.5 hours LEC; 40.5 hours LAB  
Prerequisite: Possess a current EMT-Basic certificate or have possessed a valid EMT-Basic certificate within the past 12 months -or- meet all requirements imposed by the local EMS Agency and the California Emergency Medical Services Authority.  
Enrollment Limitation: Student must be a Registered Paramedic Apprentice.

This course is the fourth in a series for an apprentice Paramedic. It provides information on jobs and duties of an apprentice Paramedic. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the Related and Supplemental Instruction specified by the Rules and Regulations of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC).

CALJA 168 Paramedic Pre-apprenticeship I

Units: 15  
Hours: 180 hours LEC; 270 hours LAB  
Prerequisite: High School Diploma or GED; and Current CPR card equivalent to AHA Guidelines for Cardiopulmonary Resuscitation and Emergency Cardiovascular Care at the healthcare provider level; and one of the following: 1. Possess a current EMT certificate or NREMT-Basic registration; or 2. Possess a current AEMT certificate in the State of California; or 3. Be currently registered as an EMT-Intermediate with NREMT.  
Enrollment Limitation: Student must be a Registered Firefighter Paramedic Pre-Apprentice.

This course is the first of two pre-apprentice courses for Firefighter Paramedic. It provides information and training necessary to become an apprentice Firefighter Paramedic. Topics covered in the course are based on the needs of the pre-apprentice and the fire agency, with focus on the academy training for the Paramedic occupation or Firefighter Paramedic specified by the Rules and Regulations of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC). Upon completion of both courses, the student will be able to successfully complete the National Registry of Emergency Medical Technicians (NREMT) exams required for paramedic licensure.

CALJA 169 Paramedic Pre-apprenticeship II

Units: 11.5  
Hours: 640 hours LAB  
Prerequisite: CALJA 168 with a grade of “C” or better; High School Diploma or GED; and Current CPR card equivalent to AHA Guidelines for Cardiopulmonary Resuscitation and Emergency Cardiovascular Care at the healthcare provider level; and one of the following: 1. Possess a current EMT certificate or NREMT-Basic registration; or 2. Possess a current AEMT certificate in the State of California; or 3. Be currently registered as an EMT-Intermediate with NREMT.  
Enrollment Limitation: Student must be a Registered Firefighter Paramedic Pre-Apprentice.

This course is the second of two pre-apprentice courses for Firefighter Paramedic. It provides information and training necessary to become an apprentice Firefighter Paramedic. Topics covered in the course are based on the needs of the pre-apprentice and the fire agency, with focus on
the academy training for the Paramedic occupation or Firefighter Paramedic specified by the Rules and Regulations of the California Firefighter Joint Apprenticeship Committee (CAL-JAC). Upon completion of both courses, the student will be able to successfully complete the National Registry of Emergency Medical Technicians (NREMT) exams required for paramedic licensure.

**CALJA 170 Hazardous Material Response Technician 170**

**Units:** 2.5  
**Hours:** 31.5 hours LEC; 40.5 hours LAB  
**Prerequisite:** Applicants for an apprentice Hazardous Material Response Technician must be a qualified Journeyperson Fire Fighter or be eligible for equivalent recognition.  
**Enrollment Limitation:** Student must be a Registered Hazardous Material Response Technician Apprentice.

This course is the first in a series for an apprentice Hazardous Material Response Technician. It provides information on jobs and duties of an apprentice Hazardous Material Response Technician. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC).

**CALJA 171 Hazardous Material Response Technician 171**

**Units:** 2.5  
**Hours:** 31.5 hours LEC; 40.5 hours LAB  
**Prerequisite:** Applicants for an apprentice Hazardous Material Response Technician must be a qualified Journeyperson Fire Fighter or be eligible for equivalent recognition.  
**Enrollment Limitation:** Student must be a Registered Hazardous Material Response Technician Apprentice.

This course is the second in a series for an apprentice Hazardous Material Response Technician. It provides information on jobs and duties of an apprentice Hazardous Material Response Technician. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC).

**CALJA 172 Hazardous Material Response Technician 172**

**Units:** 2.5  
**Hours:** 31.5 hours LEC; 40.5 hours LAB  
**Prerequisite:** Applicants for an apprentice Hazardous Material Response Technician must be a qualified Journeyperson Fire Fighter or be eligible for equivalent recognition.  
**Enrollment Limitation:** Student must be a Registered Hazardous Material Response Technician Apprentice.

This course is the third in a series for an apprentice Hazardous Material Response Technician. It provides information on jobs and duties of an apprentice Hazardous Material Response Technician. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC).

**CALJA 173 Hazardous Material Response Technician 173**

**Units:** 2.5  
**Hours:** 31.5 hours LEC; 40.5 hours LAB  
**Prerequisite:** Applicants for an apprentice Hazardous Material Response Technician must be a qualified Journeyperson Fire Fighter or be eligible for equivalent recognition.  
**Enrollment Limitation:** Student must be a Registered Hazardous Material Response Technician Apprentice.

This course is the fourth in a series for an apprentice Hazardous Material Response Technician. It provides information on jobs and duties of an apprentice Hazardous Material Response Technician. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC).

**CALJA 180 Fire Officer 180**

**Units:** 2.5  
**Hours:** 31.5 hours LEC; 40.5 hours LAB  
**Prerequisite:** In addition to the minimum qualifications for apprenticeship as stated in Section 8 of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC) Rules and Regulations, applicants must be a Journeyperson Fire Fighter or Fire Apparatus Engineer or meet the standards for recognition as a Journeyperson Fire Fighter or Fire Apparatus Engineer.  
**Enrollment Limitation:** Student must be a Registered Fire Officer Apprentice.

This course is the first in a series for an apprentice Fire Officer. It provides information on jobs and duties of an apprentice Fire Officer. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC).

**CALJA 181 Fire Officer 181**

**Units:** 2.5  
**Hours:** 31.5 hours LEC; 40.5 hours LAB  
**Prerequisite:** In addition to the minimum qualifications for apprenticeship as stated in Section 8 of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC) Rules and Regulations, applicants must be a Journeyperson Fire Fighter or Fire Apparatus Engineer or meet the standards for recognition as a Journeyperson Fire Fighter or Fire Apparatus Engineer.  
**Enrollment Limitation:** Student must be a Registered Fire Officer Apprentice.

This course is the second in a series for an apprentice Fire Officer. It provides information on jobs and duties of an apprentice Fire Officer. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC).

**CALJA 182 Fire Officer 182**

**Units:** 2.5  
**Hours:** 31.5 hours LEC; 40.5 hours LAB  
**Prerequisite:** In addition to the minimum qualifications for apprenticeship as stated in Section 8 of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC) Rules and Regulations, applicants must be a Journeyperson Fire Fighter or Fire Apparatus Engineer or meet the standards for recognition as a Journeyperson Fire Fighter or Fire Apparatus Engineer.  
**Enrollment Limitation:** Student must be a Registered Fire Officer Apprentice.

This course is the third in a series for an apprentice Fire Officer. It provides information on jobs and duties of an apprentice Fire Officer. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC).

**CALJA 183 Fire Officer 183**

**Units:** 2.5  
**Hours:** 31.5 hours LEC; 40.5 hours LAB  
**Prerequisite:** In addition to the minimum qualifications for apprenticeship as stated in Section 8 of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC) Rules and Regulations, applicants must be a Journeyperson Fire Fighter or Fire Apparatus Engineer or meet the standards for recognition as a Journeyperson Fire Fighter or Fire Apparatus Engineer.  
**Enrollment Limitation:** Student must be a Registered Fire Officer Apprentice.
the standards for recognition as a Journeyperson Fire Fighter or Fire Apparatus Engineer.

**Enrollment Limitation:** Student must be a Registered Fire Officer Apprentice.

This course is the fourth in a series for an apprentice Fire Officer. It provides information on jobs and duties of an apprentice Fire Officer. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC).

**CALJA 184 Fire Officer 184**

**Units:** 2.5  
**Hours:** 31.5 hours LEC; 40.5 hours LAB  
**Prerequisite:** In addition to the minimum qualifications for apprenticeship as stated in Section 8 of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC) Rules and Regulations, applicants must be a Journeyperson Fire Fighter or Fire Apparatus Engineer or meet the standards for recognition as a Journeyperson Fire Fighter or Fire Apparatus Engineer.  
**Enrollment Limitation:** Student must be a Registered Fire Officer Apprentice.

This course is the fifth in a series for an apprentice Fire Officer. It provides information on jobs and duties of an apprentice Fire Officer. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC).

**CALJA 185 Fire Officer 185**

**Units:** 2.5  
**Hours:** 31.5 hours LEC; 40.5 hours LAB  
**Prerequisite:** In addition to the minimum requirements for apprenticeship as stated in Section 8 of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC) Rules and Regulations, applicants must be a Journeyperson Fire Fighter or Fire Apparatus Engineer or meet the standards for recognition as a Journeyperson Fire Fighter or Fire Apparatus Engineer.  
**Enrollment Limitation:** Student must be a Registered Fire Officer Apprentice.

This course is the sixth in a series for an apprentice Fire Officer. It provides information on jobs and duties of an apprentice Fire Officer. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC).

**CALJA 190 Fire Engineer 190**

**Units:** 2.5  
**Hours:** 31.5 hours LEC; 40.5 hours LAB  
**Prerequisite:** In addition to the minimum qualifications for apprenticeship as stated in Section 8 of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC) Rules and Regulations, applicants must meet the minimum requirements for Fire Engineer of the individual employer; and possess a Class C California Driver's License and a signed verification of driving fire apparatus on a public way signed by the fire fighter and the Fire Chief, or hold a California Class A, B, or C driver's license with the fire fighter endorsement.  
**Enrollment Limitation:** Student must be a Registered Fire Engineer Apprentice.

This course is the first in a series for an apprentice Fire Engineer. It provides information on jobs and duties of an apprentice Fire Engineer. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC).

**CALJA 191 Fire Engineer 191**

**Units:** 2.5  
**Hours:** 31.5 hours LEC; 40.5 hours LAB  
**Prerequisite:** In addition to the minimum qualifications for apprenticeship as stated in Section 8 of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC) Rules and Regulations, applicants must meet the minimum requirements for Fire Engineer of the individual employer; and possess a Class C California Driver's License and a signed verification of driving fire apparatus on a public way signed by the fire fighter and the Fire Chief, or hold a California Class A, B, or C driver's license with the fire fighter endorsement.  
**Enrollment Limitation:** Student must be a Registered Fire Engineer Apprentice.

This course is the second in a series for an apprentice Fire Engineer. It provides information on jobs and duties of an apprentice Fire Engineer. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC).

**CALJA 192 Fire Engineer 192**

**Units:** 2.5  
**Hours:** 31.5 hours LEC; 40.5 hours LAB  
**Prerequisite:** In addition to the minimum qualifications for apprenticeship as stated in Section 8 of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC) Rules and Regulations, applicants must meet the minimum requirements for Fire Engineer of the individual employer; and possess a Class C California Driver's License and a signed verification of driving fire apparatus on a public way signed by the fire fighter and the Fire Chief, or hold a California Class A, B, or C driver's license with the fire fighter endorsement.  
**Enrollment Limitation:** Student must be a Registered Fire Engineer Apprentice.

This course is the third in a series for an apprentice Fire Engineer. It provides information on jobs and duties of an apprentice Fire Engineer. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC).

**CALJA 193 Fire Engineer 193**

**Units:** 2.5  
**Hours:** 31.5 hours LEC; 40.5 hours LAB  
**Prerequisite:** In addition to the minimum qualifications for apprenticeship as stated in Section 8 of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC) Rules and Regulations, applicants must meet the minimum requirements for Fire Engineer of the individual employer; and possess a Class C California Driver's License and a signed verification of driving fire apparatus on a public way signed by the fire fighter and the Fire Chief, or hold a California Class A, B, or C driver's license with the fire fighter endorsement.  
**Enrollment Limitation:** Student must be a Registered Fire Engineer Apprentice.

This course is the fourth in a series for an apprentice Fire Engineer. It provides information on jobs and duties of an apprentice Fire Engineer. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC).

**CALJA 200 Fire Apparatus Engineer 200**

**Units:** 2.5  
**Hours:** 31.5 hours LEC; 40.5 hours LAB  
**Prerequisite:** In addition to the minimum qualifications for apprenticeship as stated in Section 8 of the California Firefighter Joint Apprenticeship Committee (CAL-JAC) Rules and Regulations, applicants must possess a valid California driver’s license and have either eight months of firefighting experience of two months experience as a certified volunteer firefighter -OR- Meet the minimum requirements for Fire Engineer of the individual employer and possess a Class C California driver’s license and a signed verification of driving fire apparatus on a public way signed by the firefighter and the Fire Chief, or hold a
California Class A, B or C driver’s license with the firefighter endorsement.

**Enrollment Limitation:** Student must be a Registered Fire Apparatus Engineer Apprentice

This course is the first in a series for an apprentice Fire Apparatus Engineer. It provides information on jobs and duties of an apprentice Fire Apparatus Engineer. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Firefighter Joint Apprenticeship Committee (CAL-JAC).

**CALJA 201 Fire Apparatus Engineer 201**

**Units:** 2.5
**Hours:** 31.5 hours LEC; 40.5 hours LAB

**Prerequisite:** In addition to the minimum qualifications for apprenticeship as stated in Section 8 of the California Firefighter Joint Apprenticeship Committee (CAL-JAC) Rules and Regulations, applicants must possess a valid California driver’s license and have either eight months of firefighting experience of two months experience as a certified volunteer firefighter -OR- Meet the minimum requirements for Fire Engineer of the individual employer and possess a Class C California driver’s license and a signed verification of driving fire apparatus on a public way signed by the firefighter and the Fire Chief, or hold a California Class A, B or C driver’s license with the firefighter endorsement.

**Enrollment Limitation:** Student must be a Registered Fire Apparatus Engineer Apprentice

This course is the second in a series for an apprentice Fire Apparatus Engineer. It provides information on jobs and duties of an apprentice Fire Apparatus Engineer. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Firefighter Joint Apprenticeship Committee (CAL-JAC).

**CALJA 202 Fire Apparatus Engineer 202**

**Units:** 2.5
**Hours:** 31.5 hours LEC; 40.5 hours LAB

**Prerequisite:** In addition to the minimum qualifications for apprenticeship as stated in Section 8 of the California Firefighter Joint Apprenticeship Committee (CAL-JAC) Rules and Regulations, applicants must possess a valid California driver’s license and have either eight months of firefighting experience of two months experience as a certified volunteer firefighter -OR- Meet the minimum requirements for Fire Engineer of the individual employer and possess a Class C California driver’s license and a signed verification of driving fire apparatus on a public way signed by the firefighter and the Fire Chief, or hold a California Class A, B or C driver’s license with the firefighter endorsement.

**Enrollment Limitation:** Student must be a Registered Fire Apparatus Engineer Apprentice

This course is the third in a series for an apprentice Fire Apparatus Engineer. It provides information on jobs and duties of an apprentice Fire Apparatus Engineer. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Firefighter Joint Apprenticeship Committee (CAL-JAC).

**CALJA 203 Fire Apparatus Engineer 203**

**Units:** 2.5
**Hours:** 31.5 hours LEC; 40.5 hours LAB

**Prerequisite:** In addition to the minimum qualifications for apprenticeship as stated in Section 8 of the California Firefighter Joint Apprenticeship Committee (CAL-JAC) Rules and Regulations, applicants must possess a valid California drivers license and have either eight months of firefighting experience of two months experience as a certified volunteer firefighter -OR- Meet the minimum requirements for Fire Engineer of the individual employer and possess a Class C California drivers license and a signed verification of driving fire apparatus on a public way signed by the firefighter and the Fire Chief, or hold a California Class A, B or C drivers license with the firefighter endorsement.

**Enrollment Limitation:** Student must be a Registered Fire Apparatus Engineer Apprentice

This course is the fourth in a series for an apprentice Fire Apparatus Engineer. It provides information on jobs and duties of an apprentice Fire Apparatus Engineer. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Firefighter Joint Apprenticeship Committee (CAL-JAC).

**CALJA 204 Fire Apparatus Engineer 204**

**Units:** 2.5
**Hours:** 31.5 hours LEC; 40.5 hours LAB

**Prerequisite:** In addition to the minimum qualifications for apprenticeship as stated in Section 8 of the California Firefighter Joint Apprenticeship Committee (CAL-JAC) Rules and Regulations, applicants must possess a valid California driver’s license and have either eight months of firefighting experience of two months experience as a certified volunteer firefighter -OR- Meet the minimum requirements for Fire Engineer of the individual employer and possess a Class C California driver’s license and a signed verification of driving fire apparatus on a public way signed by the firefighter and the Fire Chief, or hold a California Class A, B or C driver’s license with the firefighter endorsement.

**Enrollment Limitation:** Student must be a Registered Fire Apparatus Engineer Apprentice

This course is the fifth in a series for an apprentice Fire Apparatus Engineer. It provides information on jobs and duties of an apprentice Fire Apparatus Engineer. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Firefighter Joint Apprenticeship Committee (CAL-JAC).

**CALJA 205 Fire Apparatus Engineer 205**

**Units:** 2.5
**Hours:** 31.5 hours LEC; 40.5 hours LAB

**Prerequisite:** In addition to the minimum qualifications for apprenticeship as stated in Section 8 of the California Firefighter Joint Apprenticeship Committee (CAL-JAC) Rules and Regulations, applicants must possess a valid California driver’s license and have either eight months of firefighting experience of two months experience as a certified volunteer firefighter -OR- Meet the minimum requirements for Fire Engineer of the individual employer and possess a Class C California driver’s license and a signed verification of driving fire apparatus on a public way signed by the firefighter and the Fire Chief, or hold a California Class A, B or C driver’s license with the firefighter endorsement.

**Enrollment Limitation:** Student must be a Registered Fire Apparatus Engineer Apprentice

This course is the sixth in a series for an apprentice Fire Apparatus Engineer. It provides information on jobs and duties of an apprentice Fire Apparatus Engineer. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Firefighter Joint Apprenticeship Committee (CAL-JAC).

**CALJA 210 Fire Equipment Specialist 210**

**Units:** 2.5
**Hours:** 31.5 hours LEC; 40.5 hours LAB

**Prerequisite:** None.

**Enrollment Limitation:** Student must be a Registered Fire Equipment Specialist Apprentice.

This course is the first in a series for an apprentice Fire Equipment Specialist. It provides information on jobs and duties of an apprentice Fire Equipment Specialist. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Firefighter Joint Apprenticeship Committee (CAL-JAC).
CALJA 211 Fire Equipment Specialist 211
Units: 2.5
Hours: 31.5 hours LEC; 40.5 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be a Registered Fire Equipment Specialist Apprentice.
This course is the second in a series for an apprentice Fire Equipment Specialist. It provides information on jobs and duties of an apprentice Fire Equipment Specialist. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC).

CALJA 212 Fire Equipment Specialist 212
Units: 2.5
Hours: 31.5 hours LEC; 40.5 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be a Registered Fire Equipment Specialist Apprentice.
This course is the third in a series for an apprentice Fire Equipment Specialist. It provides information on jobs and duties of an apprentice Fire Equipment Specialist. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC).

CALJA 213 Fire Equipment Specialist 213
Units: 2.5
Hours: 31.5 hours LEC; 40.5 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be a Registered Fire Equipment Specialist Apprentice.
This course is the fourth in a series for an apprentice Fire Equipment Specialist. It provides information on jobs and duties of an apprentice Fire Equipment Specialist. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC).

CALJA 214 Fire Equipment Specialist 214
Units: 2.5
Hours: 31.5 hours LEC; 40.5 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be a Registered Fire Equipment Specialist Apprentice.
This course is the fifth in a series for an apprentice Fire Equipment Specialist. It provides information on jobs and duties of an apprentice Fire Equipment Specialist. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC).

CALJA 215 Fire Equipment Specialist 215
Units: 2.5
Hours: 31.5 hours LEC; 40.5 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be a Registered Fire Equipment Specialist Apprentice.
This course is the sixth in a series for an apprentice Fire Equipment Specialist. It provides information on jobs and duties of an apprentice Fire Equipment Specialist. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC).

CALJA 216 Fire Equipment Specialist 216
Units: 2.5
Hours: 31.5 hours LEC; 40.5 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be a Registered Fire Equipment Specialist Apprentice.
This course is the seventh in a series for an apprentice Fire Equipment Specialist. It provides information on jobs and duties of an apprentice Fire Equipment Specialist. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC).

CALJA 217 Fire Equipment Specialist 217
Units: 2.5
Hours: 31.5 hours LEC; 40.5 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be a Registered Fire Equipment Specialist Apprentice.
This course is the eighth in a series for an apprentice Fire Equipment Specialist. It provides information on jobs and duties of an apprentice Fire Equipment Specialist. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC).

CALJA 270 Fire Fighter Paramedic 270
Units: 2.5
Hours: 31.5 hours LEC; 40.5 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be a Registered Fire Fighter Paramedic Apprentice.
This course is the first in a series for an apprentice Fire Fighter Paramedic. It provides information on jobs and duties of an apprentice Fire Fighter Paramedic. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC).

CALJA 271 Fire Fighter Paramedic 271
Units: 2.5
Hours: 31.5 hours LEC; 40.5 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be a Registered Fire Fighter Paramedic Apprentice.
This course is the second in a series for an apprentice Fire Fighter Paramedic. It provides information on jobs and duties of an apprentice Fire Fighter Paramedic. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC).

CALJA 272 Fire Fighter Paramedic 272
Units: 2.5
Hours: 31.5 hours LEC; 40.5 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be a Registered Fire Fighter Paramedic Apprentice.
This course is the third in a series for an apprentice Fire Fighter Paramedic. It provides information on jobs and duties of an apprentice Fire Fighter Paramedic. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC).
CALJA 273 Fire Fighter Paramedic 273
Units: 2.5
Hours: 31.5 hours LEC; 40.5 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be a Registered Fire Fighter Paramedic Apprentice.

This course is the fourth in a series for an apprentice Fire Fighter Paramedic. It provides information on jobs and duties of an apprentice Fire Fighter Paramedic. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC).

CALJA 274 Fire Fighter Paramedic 274
Units: 2.5
Hours: 31.5 hours LEC; 40.5 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be a Registered Fire Fighter Paramedic Apprentice.

This course is the fifth in a series for an apprentice Fire Fighter Paramedic. It provides information on jobs and duties of an apprentice Fire Fighter Paramedic. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC).

CALJA 275 Fire Fighter Paramedic 275
Units: 2.5
Hours: 31.5 hours LEC; 40.5 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be a Registered Fire Fighter Paramedic Apprentice.

This course is the sixth in a series for an apprentice Fire Fighter Paramedic. It provides information on jobs and duties of an apprentice Fire Fighter Paramedic. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC).

CALJA 276 Fire Fighter Paramedic 276
Units: 2.5
Hours: 31.5 hours LEC; 40.5 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be a Registered Fire Fighter Paramedic Apprentice.

This course is the seventh in a series for an apprentice Fire Fighter Paramedic. It provides information on jobs and duties of an apprentice Fire Fighter Paramedic. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC).

CALJA 277 Fire Fighter Paramedic 277
Units: 2.5
Hours: 31.5 hours LEC; 40.5 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be a Registered Fire Fighter Paramedic Apprentice.

This course is the eighth in a series for an apprentice Fire Fighter Paramedic. It provides information on jobs and duties of an apprentice Fire Fighter Paramedic. Topics covered in the course are based on the needs of the apprentice and the fire agency, with focus on the related and supplemental instruction specified by the Rules and Regulations of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC).

CALJA 298 Work Experience in CAL-JACs Fire Fighter Apprenticeship
Units: 0.5 - 4
Hours: 37.5 - 300 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be indentured in the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC) apprenticeship program.
General Education: AA/AS Area III(b)

This course provides CAL-JACs Firefighter apprentices the opportunity to participate in an apprenticeship program for the purpose of developing specific skills to meet the goals and objectives of the California Fire Fighter Joint Apprenticeship Committee (CAL-JAC). Apprentices complete work experience hours at an approved training site. Apprentices may take up to 16 units total across all Work Experience course offerings. This course may be repeated when there are new or expanded occupational competencies and performance criteria. Only one Work Experience course may be taken per semester.

CALJA 299 Experimental Offering in CAL-JACs Firefighter Apprenticeship
Units: 0.5 - 4
Prerequisite: None.

This is the experimental courses description.

CARPT 101 Intro to Apprenticeship II and Math Review
Units: 1.5
Hours: 22.5 hours LEC; 13.5 hours LAB
Prerequisite: None.
Enrollment Limitation: Must be a registered carpenter apprentice.

This course introduces the beginning carpenter apprentice to industry safety procedures for aerial lift use, and hand and power tool safety and maintenance. It also covers construction math, financial literacy, and the role and responsibilities of the apprentice.

CARPT 103 OSHA 10-hour Construction Training Course
Units: 0.5
Hours: 10 hours LEC
Prerequisite: None.
Enrollment Limitation: Student must be a Registered Carpenter Apprentice.

This course is designed with Occupational Safety and Health Administration (OSHA) recommendations for the 10-Hour Construction Training Program. It covers recognition, avoidance, abatement, and prevention of occupational hazards in the construction industry which satisfies regulatory and employment requirements in the construction sector.
CARPT 105 CPR for Carpenters Apprentices

Units: 0.5
Hours: 9 hours LEC
Prerequisite: None.
Enrollment Limitation: Student must be a Registered Carpenter's Apprentice

Adhering to American Red Cross guidelines, this course meets the training requirements of the Carpenter's Apprenticeship for adult Cardiopulmonary Resuscitation (CPR). It provides knowledge and skills for emergency life-saving techniques. Respiratory and cardiovascular distress, non-breathing, unconsciousness, choking, and cardiac arrest are addressed. Students receive a certificate upon successful completion of the course.

CARPT 106 Introduction to Apprenticeship

Units: 1.5
Hours: 22 hours LEC; 15 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be a registered Carpenter Apprentice

This course is an introduction to apprenticeship, tools, safety, and construction job sites in the commercial and industrial building sectors.

CARPT 107 Rigging

Units: 1.5
Hours: 22 hours LEC; 15 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be a registered Carpenter Apprentice

This course familiarizes apprentices with the equipment and the procedures to safely rig and hoist various loads on the job-site. Topics include tying knots, splicing rope, calculating loads, hand signals for cranes, and inspecting rigging hardware.

CARPT 108 Modular System Installer Safety

Units: 1.5
Hours: 24 hours LEC; 12 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be a registered Carpentry Modular Systems Installer Apprentice.

This course is an introduction to apprenticeship, tools, safety, and construction job sites in the commercial and industrial building sectors. It also covers discrimination and harassment on the job-site.

CARPT 109 Introduction to Office Modular Systems Installation

Units: 1
Hours: 18 hours LEC; 18 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be a registered Carpentry Modular Systems Installer Apprentice.

This course introduces the installation of modular systems including major manufacturers of modular systems, applicable math, blueprints, specifications, and the creation of a realistic installation mockup. It also covers site logistics, layout of components, and personal financial literacy.

CARPT 110 Foundations and Floors

Units: 1.5
Hours: 22 hours LEC; 15 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be a registered Carpenter Apprentice.

This course covers layout, forming, framing, joist, sub-flooring, and foundation construction.

CARPT 111 Modular Systems Applications

Units: 1
Hours: 15 hours LEC; 21 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be a registered Carpentry Modular Systems Installer Apprentice.

This course introduces the Modular Systems Installer Apprentice to proper tool and equipment applications required while assembling and disassembling modular office furniture systems. It also covers personal financial literacy.

CARPT 112 Structural Framing

Units: 1.5
Hours: 22 hours LEC; 15 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be a registered Carpenter Apprentice.

This course covers basic framing systems and layout of walls, ceilings, and stairwells with wood as well as metal and alternative "green" materials such as manufactured panels.

CARPT 114 Form Detailing, Construction & Erection

Units: 1.5
Hours: 22 hours LEC; 15 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be a registered Carpenter Apprentice.

This course covers planning and building of form work, construction and erection of various concrete forms, and construction materials and methods. It also explores new types of building materials such as recycled and alternative materials.

CARPT 115 Floor to Ceiling Wall System Construction

Units: 1
Hours: 11 hours LEC; 25 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be a registered Carpentry Modular Systems Installer Apprentice.

This course introduces the Modular Systems Installer Apprentice to floor to ceiling modular wall construction. It also covers blueprint reading and understanding manufacturers' system components and parts.

CARPT 120 Exterior Finish

Units: 1.5
Hours: 22 hours LEC; 15 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be a registered Carpenter Apprentice.
This course covers exterior design, materials, finishes, and methods of application in exterior building construction. Topics include an overview of the hazards of Volatile Organic Compounds (VOCs) and pathogens.

**CARPT 122 Interior Finish**

*Units:* 1.5  
*Hours:* 22 hours LEC; 15 hours LAB  
*Prerequisite:* None.  
*Enrollment Limitation:* Student must be a registered Carpenter Apprentice.

This course covers interior designs, materials, and methods of application in building construction. Topics include techniques of indoor air quality practices in order to reduce Volatile Organic Compounds (VOCs) and pathogens.

**CARPT 124 Commercial Door Hardware**

*Units:* 1.5  
*Hours:* 22 hours LEC; 15 hours LAB  
*Prerequisite:* None.  
*Enrollment Limitation:* Student must be a registered Carpenter Apprentice.

This course covers the basic skills necessary to successfully install commercial door hardware. Topics include selecting hardware, hanging and adjusting a door, and installing locks, closers, rim devices, door holders, and various accessories. It also covers codes that govern doors and hardware in commercial buildings.

**CARPT 125 Fine Furnishings, Drapery, and Window Coverings**

*Units:* 1  
*Hours:* 13 hours LEC; 23 hours LAB  
*Prerequisite:* None.  
*Enrollment Limitation:* Student must be a registered Carpenter Modular Systems Installer Apprentice.

This course introduces the Modular Systems Installer Apprentice to high-end and custom furniture, wall installations, draperies, and window coverings. It also covers tool selection, skills for proper installation, and manufacturers’ specifications.

**CARPT 130 Layout/Leveling Construction Site Practice**

*Units:* 1.5  
*Hours:* 22.5 hours LEC; 13.5 hours LAB  
*Prerequisite:* None.  
*Enrollment Limitation:* Student must be a registered Carpenter Apprentice.

This course covers the use of leveling devices. It includes reading and interpreting an engineer’s rod, horizontal and vertical setting circles, and vernier scaling. Additional topics include construction layout of horizontal and vertical angles, and Leadership in Energy and Environmental Design (LEED) practices for erosion control.

**CARPT 131 Introduction to Working Drawings, Construction Math and Fire Stop Installation**

*Units:* 1.5  
*Hours:* 24 hours LEC; 12 hours LAB  
*Prerequisite:* None.  
*Enrollment Limitation:* Student must be a registered Insulator Apprentice.

This course introduces Insulator Apprentices to construction math, basic blueprint reading, and fire stop installation. It also covers safe use and maintenance of hand tools.

**CARPT 132 Residential Blueprint Reading and Forklift Safety**

*Units:* 1.5  
*Hours:* 24 hours LEC; 12 hours LAB  
*Prerequisite:* None.  
*Enrollment Limitation:* Student must be a registered Insulator Apprentice.

This course introduces Insulator Apprentices to residential blueprint terminology and interpretation. Forklift safety is also included.

**CARPT 133 Residential Insulation and Weatherization**

*Units:* 1.5  
*Hours:* 24 hours LEC; 12 hours LAB  
*Prerequisite:* None.  
*Enrollment Limitation:* Student must be a registered Insulator Apprentice.

This course introduces the Insulator Apprentice to insulation and weatherization installation. Topics include environmental impact on traditional construction and organizations that provide guidelines and certification for residential insulation and weatherization.

**CARPT 134 Commercial Blueprint Reading and Mobile Tower Scaffolds**

*Units:* 1.5  
*Hours:* 24 hours LEC; 12 hours LAB  
*Prerequisite:* None.  
*Enrollment Limitation:* Student must be a registered Insulator Apprentice.

This course introduces Insulator Apprentices to commercial blueprint terminology and interpretation. It also covers the erection of and safe practices for welded frame mobile and rolling tower scaffolds.

**CARPT 135 Commercial and Industrial Insulation and Aerial Lift**

*Units:* 1.5  
*Hours:* 24 hours LEC; 12 hours LAB  
*Prerequisite:* None.  
*Enrollment Limitation:* Student must be a registered Insulator Apprentice.

This course introduces the Insulator Apprentice to commercial and industrial insulation installation. It also covers the rules and regulations governing the safe use of aerial lifts.

**CARPT 136 Energy Conservation Codes and Standards**

*Units:* 1.5  
*Hours:* 24 hours LEC; 12 hours LAB  
*Prerequisite:* None.  
*Enrollment Limitation:* Student must be a registered Insulator Apprentice.

This course introduces the Insulator Apprentice to energy conservation codes and standards. It also covers Green Advantage certification and CalGreen building code requirements.

**CARPT 137 Modular Systems Construction I**

*Units:* 1  
*Hours:* 18 hours LEC; 18 hours LAB  
*Prerequisite:* None.
**Enrollment Limitation:** Student must be a registered Carpentry Modular Systems Installer Apprentice.

This course introduces the Modular Systems Installer Apprentices to safe and productive ways to handle modular components on a job site using the proper equipment. It also covers the proper way to lift and move modular components, protection of office equipment, basic furniture assembly, and manufacturers' specifications.

**CARPT 138 Modular System Construction II**

- **Units:** 1.5
- **Hours:** 22.5 hours LEC; 13.5 hours LAB
- **Prerequisite:** None.
- **Enrollment Limitation:** Student must be a registered Carpentry Modular Systems Installer Apprentice.

This course introduces the Modular Systems Installer Apprentices to advanced modular system construction with a focus on panelized furniture and cubicle partitions including electrical diagrams. It also covers forklift operation and safety per regulations mandated by the Occupational Safety and Health Administration (OSHA).

**CARPT 140 Interior Systems**

- **Units:** 1.5
- **Hours:** 22 hours LEC; 15 hours LAB
- **Prerequisite:** None.
- **Enrollment Limitation:** Student must be a registered Carpenter Apprentice.

This course is a comprehensive study of materials, work processes, and the proper use of tools necessary to install gypsum wallboard and interior metal studs. Topics include green practices used in construction.

**CARPT 141 Suspended Framing Ceiling Systems**

- **Units:** 1.5
- **Hours:** 24 hours LEC; 12 hours LAB
- **Prerequisite:** None.
- **Enrollment Limitation:** Student must be a registered Acoustical Apprentice.

This course introduces the Acoustical Apprentice to the installation of suspended framing ceiling systems and situations which require special installation techniques. It also covers industry standards and manufacturers' recommendations for proper installation of engineered ceilings utilizing the proper tools while following recommended safety procedures.

**CARPT 142 Engineered Structural Systems**

- **Units:** 1.5
- **Hours:** 22.5 hours LEC; 13.5 hours LAB
- **Prerequisite:** None.
- **Enrollment Limitation:** Student must be a registered Carpenter Apprentice.

This course covers heavy timber construction in dams, bridges, and trusses. Topics include lamination and the proper disposal and recycling of materials.

**CARPT 144 Introduction to Grid Ceiling Installation**

- **Units:** 1.5
- **Hours:** 24 hours LEC; 12 hours LAB
- **Prerequisite:** None.
- **Enrollment Limitation:** Student must be a registered Acoustical Installer Apprentice.

This course introduces the Acoustical Apprentice to the installation of grid ceilings. It also covers rolling scaffold and tool safety.

**CARPT 145 Specialty Ceiling Systems**

- **Units:** 1.5
- **Hours:** 24 hours LEC; 12 hours LAB
- **Prerequisite:** None.
- **Enrollment Limitation:** Student must be a registered Acoustical Installer Apprentice.

This course introduces the Acoustical Apprentice to the installation of special ceiling systems. It also covers aerial lift use and safety.

**CARPT 146 Integrated Ceilings and Special Techniques**

- **Units:** 1.5
- **Hours:** 24 hours LEC; 12 hours LAB
- **Prerequisite:** None.
- **Enrollment Limitation:** Student must be a registered Acoustical Apprentice.

This course introduces the Acoustical Apprentice to the installation of integrated ceiling systems and situations which require special installation techniques. It also covers industry standards and manufacturers' recommendations for proper installation of engineered ceiling and proper tool selection and safety.

**CARPT 147 Advanced Grid Ceilings**

- **Units:** 1.5
- **Hours:** 24 hours LEC; 12 hours LAB
- **Prerequisite:** None.
- **Enrollment Limitation:** Student must be a registered Acoustical Apprentice.

This course introduces the Acoustical Apprentice to advanced techniques in suspended framing and grid ceiling systems. It also covers industry standards, manufacturers' recommendations for proper installation of engineered ceilings utilizing the proper tools while following recommended safety procedures.

**CARPT 148 Access Floor Systems**

- **Units:** 1.5
- **Hours:** 22.5 hours LEC; 13.5 hours LAB
- **Prerequisite:** None.
- **Enrollment Limitation:** Student must be a registered Acoustical Installer apprentice.

This course is an introduction to the installation of Access Floor Systems. It also covers hand tool ergonomics, safety, and maintenance.

**CARPT 150 Concrete - Precast and Prestressed**

- **Units:** 1.5
- **Hours:** 22 hours LEC; 15 hours LAB
- **Prerequisite:** None.
- **Enrollment Limitation:** Student must be a registered Carpenter Apprentice.

This course covers the use and placement of concrete in residential and commercial construction. Topics include mixing, testing, aggregate, curing, and construction designs, as well as precast and prestressed concrete, materials, forms, molds, handling, lifting devices, and the proper disposal and recycling of materials.

**CARPT 155 Commercial Concrete**

- **Units:** 1.5
- **Hours:** 22.5 hours LEC; 13.5 hours LAB
- **Prerequisite:** None.
Enrollment Limitation: Must be a registered Carpenter Apprentice.

This course covers concepts and practices of commercial concrete construction. Topics include layout and construction of bolt patterns, concrete columns, and gang forms, as well as the types and methods used to safely build, shore, and place column caps and concrete decks.

**CARPT 160 Blueprint Reading—Residential**

*Units: 1.5*

*Hours: 22 hours LEC; 15 hours LAB*

*Prerequisite: None.*

*Enrollment Limitation: Student must be a registered Carpenter Apprentice.*

This course covers residential blueprints. Topics include "green" practices, conventions, lines, symbols, measurements, and specifications used for residential construction.

**CARPT 162 Blueprint Reading—Commercial**

*Units: 1.5*

*Hours: 22 hours LEC; 15 hours LAB*

*Prerequisite: None.*

*Enrollment Limitation: Student must be a registered Carpenter Apprentice.*

This course covers commercial and industrial blueprints. Topics include conventions, lines, symbols, measurements, and specifications used for commercial and industrial construction. It also covers CalGreen codes.

**CARPT 163 Modular System Blueprint Reading**

*Units: 1*

*Hours: 13 hours LEC; 23 hours LAB*

*Prerequisite: None.*

*Enrollment Limitation: Student must be a registered Carpenter Apprentice Modular Systems Installer Apprentice.*

This course is an introduction to blueprint reading, project specifications, and layout for modular systems. It also covers union trust fund benefits.

**CARPT 164 Acoustical Blueprint Reading**

*Units: 1.5*

*Hours: 24 hours LEC; 12 hours LAB*

*Prerequisite: None.*

*Enrollment Limitation: Student must be a registered Carpenter Acoustical Apprentice.*

This course introduces the Acoustical Apprentice to advanced specialized blueprint reading. It also covers basic construction documents, project scheduling, and labor cost estimation.

**CARPT 170 Roof Framing**

*Units: 1.5*

*Hours: 22 hours LEC; 15 hours LAB*

*Prerequisite: None.*

*Enrollment Limitation: Student must be a registered Carpenter Apprentice.*

This course covers roof framing, layout, and construction. Topics include industry terminology, technical information, and construction materials and methods, all of which are used in planning and building several types of roofs. It also covers industry standards and codes.

**CARPT 180 Stair Building**

*Units: 1.5*

*Hours: 22 hours LEC; 15 hours LAB*

Prerequisite: None.

Enrollment Limitation: Student must be a registered Carpenter Apprentice.

This course covers types, designs, nomenclature, and Uniform Building Code (UBC) requirements for building stairs. Topics include mathematical calculations and layout procedures for constructing stairs, landings, newels, and handrails.

**CARPT 181 Tools of the Trade and Installation of Hardwood Floors**

*Units: 1.5*

*Hours: 24 hours LEC; 12 hours LAB*

*Prerequisite: None.*

*Enrollment Limitation: Student must be a registered Hardwood Floor Layer Apprentice.*

This course introduces Hardwood Floor Layer Apprentices to the installation of hardwood floors per industry standards. It covers tool and equipment identification, safety, and proper maintenance procedures.

**CARPT 182 Finishing and Repairing Floors**

*Units: 1.5*

*Hours: 24 hours LEC; 12 hours LAB*

*Prerequisite: None.*

*Enrollment Limitation: Student must be a registered Hardwood Floor Layer Apprentice.*

This course introduces Hardwood Floor Layer Apprentices to the process of finishing and repairing hardwood floors per industry standards. It also covers installation of athletic and parquet flooring.

**CARPT 190 Introduction to Welding and Cutting**

*Units: 1.5*

*Hours: 22 hours LEC; 15 hours LAB*

*Prerequisite: None.*

*Enrollment Limitation: Must be a registered Carpenter Apprentice.*

This course covers welding methods, brazing, and flame cutting. Topics include thermoforming and thermosetting plastics applicable to the building construction industry.

**CARPT 210 The Acoustical Apprentice, Safety, and the Trade**

*Units: 1.5*

*Hours: 22.5 hours LEC; 13.5 hours LAB*

*Prerequisite: None.*

*Enrollment Limitation: Must be a registered carpentry acoustical apprentice.*

This course introduces the acoustical apprentice to fall protection, tool safety and maintenance, and scaffold safety and maintenance. It also covers Occupational Safety and Health Administration (OSHA) 10, First Aid and CPR certifications.

**CARPT 211 Acoustical Installer Safety**

*Units: 1.5*

*Hours: 22.5 hours LEC; 13.5 hours LAB*

*Prerequisite: None.*

*Enrollment Limitation: Must be a registered carpentry acoustical apprentice.*

This course introduces the beginning acoustical apprentice to safe work practices in the use of rolling scaffold systems, lasers, and hand and power tools. It also covers the necessary skills to obtain a welded frame scaffold qualification card from the United Brotherhood of Carpenters.
This course introduces the acoustical installer apprentice to the safety procedures for hospital work Infection Control Risk Assessment (ICRA). It also covers applicable building codes of acoustical ceiling systems used in hospitals.

**CARPT 213 Acoustical Exterior Systems**

**Units:** 1.5  
**Hours:** 22.5 hours LEC; 13.5 hours LAB  
**Prerequisite:** None.

This course introduces the Acoustical Apprentice to the installation of acoustical exterior systems. It also covers industry standards and manufacturers' recommendations for proper installation and safety for exterior systems.

**CARPT 215 Acoustical Specialty Systems**

**Units:** 1.5  
**Hours:** 22.5 hours LEC; 13.5 hours LAB  
**Prerequisite:** None.

This course introduces the Acoustical Apprentice to the installation of advanced and specialty ceiling systems. It also covers hand and power tool safety and aerial lift safety.

**CARPT 220 Millwright Safety and Tool Skills**

**Units:** 1.5  
**Hours:** 22.5 hours LEC; 13.5 hours LAB  
**Prerequisite:** None.

This course is an introduction to the safety rules and regulations required to work on job sites. It also provides Millwright 16-hour Safety certification.

**CARPT 221 The Millwright Apprentice and the Trade**

**Units:** 2  
**Hours:** 36 hours LEC  
**Prerequisite:** None.

This course informs Millwright Apprentices about the structure of their union, as well as their responsibilities and rights. It also covers union history and the development of a proper work ethic.

**CARPT 222 Millwright Math Applications and Fall Protection**

**Units:** 1.5  
**Hours:** 22.5 hours LEC; 13.5 hours LAB  
**Prerequisite:** None.

This course reviews math applications needed by Millwright Apprentices and introduces the United Brotherhood of Carpenters (UBC) Fall Protection certification.

**CARPT 223 Cutting and Welding I**

**Units:** 1.5  
**Hours:** 22.5 hours LEC; 13.5 hours LAB  
**Prerequisite:** None.

This course introduces the safe use of hand and power tools to perform shielded metal arc welding (SMAW), oxy-fuel welding, and plasma cutting. It also covers proper ergonomics.

**CARPT 224 Materials of Construction**

**Units:** 1.5  
**Hours:** 22.5 hours LEC; 13.5 hours LAB  
**Prerequisite:** None.

This course introduces the hardware Millwrights encounter on the job site. It also covers different seals, structural materials, and appropriate application.

**CARPT 225 Layout Procedures for Millwrights**

**Units:** 1  
**Hours:** 9 hours LEC; 27 hours LAB  
**Prerequisite:** None.

This course introduces the Millwright Carpentry Apprentice to layout procedures using applied blueprint techniques. It also covers the safe use of lift trucks and rough terrain lift practices.

**CARPT 226 Precision Optical Instruments**

**Units:** 1.5  
**Hours:** 22.5 hours LEC; 13.5 hours LAB  
**Prerequisite:** None.

This course introduces the Millwright Apprentice to the precision optical instruments currently used by contractors for shaft alignment. It also covers General Electric (GE) turbine familiarization as well as blueprint reading.

**CARPT 227 Blueprint Reading and Aerial Lift**

**Units:** 1.5  
**Hours:** 22.5 hours LEC; 13.5 hours LAB  
**Prerequisite:** None.

This course introduces Millwright Apprentices to blueprint terminology and interpretation. It also covers the rules and regulations governing the safe use of aerial lifts.

**CARPT 228 Millwright Rigging**

**Units:** 2  
**Hours:** 35 hours LEC; 5 hours LAB  
**Prerequisite:** None.

This course introduces the Millwright Apprentice to rigging. It addresses the safety regulations and practices related to rigging and rigging hardware.
CARPT 229 Cutting and Welding II

Units: 1.5
Hours: 22.5 hours LEC; 13.5 hours LAB
Prerequisite: None.
Enrollment Limitation: Must be a registered Millwright Apprentice.

This course expands on CARPT 223 and furthers the Millwright Apprentice’s knowledge of shielded metal arc welding (SMAW) procedures and welding equipment. It also covers the safe use of welding and cutting with plasma and carbon arc equipment, as well as the American Welding Society (AWS) requirements for welding 2G, 3G, and 4G, horizontal, vertical, and overhead groove joints with SMAW.

CARPT 230 Monorails

Units: 1.5
Hours: 22.5 hours LEC; 13.5 hours LAB
Prerequisite: None.
Enrollment Limitation: Must be a registered Millwright Apprentice.

This course introduces Millwright Apprentices to various types of monorails, the materials, safety hazards, and the safe use of hand and power tools on job sites.

CARPT 231 Conveyors for Millwrights

Units: 1
Hours: 9 hours LEC; 27 hours LAB
Prerequisite: None.
Enrollment Limitation: Must be a registered Millwright Apprentice.

This course introduces the Millwright Apprentice to various types of conveyor systems including the major components and applications. It covers the methods and components used to install conveyor systems per industry standards.

CARPT 232 Machinery Installation

Units: 1.5
Hours: 22.5 hours LEC; 13.5 hours LAB
Prerequisite: None.
Enrollment Limitation: Must be a registered Millwright Apprentice.

This course introduces the Millwright Apprentice to the proper installation of machinery per industry standards.

CARPT 233 Machinery Maintenance for Millwrights

Units: 1.5
Hours: 22.5 hours LEC; 13.5 hours LAB
Prerequisite: None.
Enrollment Limitation: Must be a registered Millwright Apprentice.

This course covers the basics of millwright machinery maintenance, troubleshooting, and repair.

CARPT 234 Precision Tools for Millwrights

Units: 1.5
Hours: 22.5 hours LEC; 13.5 hours LAB
Prerequisite: None.
Enrollment Limitation: Must be a registered Millwright Apprentice.

This course introduces Millwright Apprentices to precision tools, accurate measurements for layout, leveling practices, and alignment per manufacturer and industry standards.

CARPT 235 Turbines

Units: 1.5
Hours: 22.5 hours LEC; 13.5 hours LAB
Prerequisite: None.
Enrollment Limitation: Must be a registered Millwright Apprentice.

This course introduces Millwright Apprentices to precision tools, accurate measurements for layout, leveling practices, and alignment per manufacturer and industry standards.

CARPT 236 Cutting and Welding III

Units: 1.5
Hours: 22.5 hours LEC; 13.5 hours LAB
Prerequisite: None.
Enrollment Limitation: Must be a registered Millwright Apprentice.

This course expands on CARPT 229 and furthers the Millwright Apprentice’s knowledge of shielded Flux Core Arc Welding (FCAW) procedures and welding equipment. It also covers the safe use of welding and cutting with plasma and carbon arc equipment, as well as the American Welding Society (AWS) requirements for welding 3G and 4G, horizontal, vertical, and overhead groove joints with FCAW.

CARPT 240 Pile Driver Safety and Tools

Units: 1.5
Hours: 22.5 hours LEC; 13.5 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be a registered Pile Driver Apprentice.

This course introduces Pile Driver Apprentices to the ergonomics, safety, and maintenance of hand and power tools. It also covers hazard recognition in fall protection.

CARPT 241 Pile Driver Math Applications

Units: 2
Hours: 36 hours LEC
Prerequisite: None.
Enrollment Limitation: Must be a registered Pile Driver Apprentice.

This course covers mathematical processes in the construction trade with specific focus on the pile driving industry. It also covers personal financial responsibilities.

CARPT 242 Pile Driver Rigging

Units: 2
Hours: 34 hours LEC; 6 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be a registered Pile Driver Apprentice.

This course addresses the safety regulations and practices related to rigging and rigging hardware. It exceeds the requirements of OSHA Subpart CC, American National Standards Institute (ANSI) A10.42.2000 “Qualified Rigger,” and ANSI B30.

CARPT 243 Form Detailing, Construction, and Erection for Pile Drivers

Units: 1.5
Hours: 22.5 hours LEC; 13.5 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be a registered Pile Driver Apprentice.

This course introduces the Pile Driver Apprentice to planning and building of form work, construction and erection of various concrete forms, and the materials and methods used. It also covers new building materials such as recycled and alternative materials.

CARPT 244 Welding I: Introduction to SMAW

Units: 1.5
CARPT 245 Introduction to Land and Water Pile Driving

**Units:** 1.5  
**Hours:** 22.5 hours LEC; 13.5 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Student must be a registered Pile Driver Apprentice.

This course introduces the Pile Driver Apprentice to pile driving practices on land and in water. Topics covered include safety, pile driving equipment, aerial lifts, cranes, and booms.

CARPT 246 Welding II: SMAW Flat Position and Forklift Certification

**Units:** 1.5  
**Hours:** 22.5 hours LEC; 13.5 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Student must be a registered Piledriver Apprentice.

This course expands on CARPT 244 and the Piledriver Apprentice's knowledge of the appropriate safety procedures when using shielded metal arc welding (SMAW) and oxy-fuel cutting and the associated components. This course focuses on welding groove joints, flat V-groove (1G), and horizontal V-groove (2G). It also provides certification as a Power Industrial Truck Operator.

CARPT 247 Advanced Land and Water Pile Driving

**Units:** 1  
**Hours:** 9 hours LEC; 27 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Student must be a registered Pile Driver Apprentice.

This course introduces the Pile Driver Apprentice to advanced pile driving practices on land and in water. Topics covered include understanding pile driving equipment, cranes and booms, rigs, accessories, and pile driving hammers.

CARPT 248 Wharfage and Marine Structures

**Units:** 1  
**Hours:** 18 hours LEC; 18 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Student must be a registered Pile Driver Apprentice.

This course introduces the Pile Driver Apprentice to pile driving practices used in bridge erection, and the construction of wharf and marine structures. Topics include various types of lumber and heavy timber, their selection, proper application, natural defects, and basic repair work.

CARPT 249 Welding III: Advanced SMAW

**Units:** 1.5  
**Hours:** 22.5 hours LEC; 13.5 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Student must be a registered Pile Driver Apprentice.

This course expands on CARPT 246 and the Pile Driver Apprentice's knowledge of the appropriate safety procedures when using Shielded Metal Arc Welding (SMAW) and oxy-fuel cutting and the associated components. This course focuses on welding vertical groove joints (3G). It also covers American Welding Society (AWS) requirements for achieving a welder certification in 3G with SMAW.

CARPT 250 Introduction to Structural Blueprints & Layout Instruments

**Units:** 1.5  
**Hours:** 22.5 hours LEC; 13.5 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Student must be a registered Piledriver Apprentice.

This course introduces Pile Driver Apprentices to structural blueprint reading and layout.

CARPT 251 Advanced Structural Blueprints and Bridge Building

**Units:** 1.5  
**Hours:** 22.5 hours LEC; 13.5 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Student must be a registered Pile Driver Apprentice.

This course introduces Pile Driver Apprentices to advanced structural blueprint reading and bridge building. Topics include bridge building practices, safety, pre-stressing, post-tensioning, and steel reinforcement of concrete. Basic concrete testing is also covered.

CARPT 252 Falsework, Shoring, and Heavy Timber Framing

**Units:** 1.5  
**Hours:** 22.5 hours LEC; 13.5 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Student must be a registered Pile Driver Apprentice.

This course introduces Pile Driver Apprentices to the construction of advanced concrete forms for bridges and shoring with the use of heavy timbers for support, known as falsework. It also covers the various building materials used to create formwork for elaborate decorative architectural designs.

CARPT 253 Advanced Formwork

**Units:** 1.5  
**Hours:** 22.5 hours LEC; 13.5 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Student must be a registered Pile Driver Apprentice.

This course introduces Pile Driver Apprentices to the construction of advanced concrete forms used in all types of installations.

CARPT 254 Welding IV: SMAW 4G Certification

**Units:** 1.5  
**Hours:** 22.5 hours LEC; 13.5 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Student must be a registered Pile Driver Apprentice.

This course expands the Pile Driver Apprentice's knowledge of the appropriate safety procedures when using shielded metal arc welding (SMAW) and oxy-fuel cutting and the associated components. It covers the American Welding Society (AWS) requirements for 4G certification, overhead groove joints with SMAW.
CARPT 255 Welding V: FCAW 3G Certification

Units: 1.5  
Hours: 22.5 hours LEC; 13.5 hours LAB  
Prerequisite: None.  
Enrollment Limitation: Student must be a registered Pile Driver Apprentice.

This course expands on CARPT 254 and furthers the Pile Driver Apprentice's knowledge of appropriate safety procedures when using flux core arc welding (FCAW) and oxy-fuel cutting and the associated components. It covers the American Welding Society (AWS) requirements for 3G certification, vertical groove joints with FCAW.

CARPT 256 Welding VI: FCAW 4G Certification

Units: 1.5  
Hours: 22.5 hours LEC; 13.5 hours LAB  
Prerequisite: None.  
Enrollment Limitation: Student must be a registered Pile Driver Apprentice.

This course expands on CARPT 256 and the Pile Driver Apprentice's knowledge of the appropriate safety procedures when using flux core arc welding (FCAW) and oxy-fuel cutting and the associated components. This course focuses on welding vertical groove joints (4G). It also covers American Welding Society (AWS) requirements for achieving a welder certification in 4G with FCAW.

CARPT 260 Introduction to Scaffolds and Confined Space

Units: 1.5  
Hours: 22.5 hours LEC; 13.5 hours LAB  
Prerequisite: None.  
Enrollment Limitation: Student must be a registered Scaffold Erector Apprentice.

This course introduces Scaffold Erector Apprentices to the appropriate safety procedures when using scaffolds and working in a confined space. It also covers the proper use and maintenance of hand tools.

CARPT 261 Welded Frame and Mobile Tower Scaffold

Units: 1.5  
Hours: 22.5 hours LEC; 13.5 hours LAB  
Prerequisite: None.  
Enrollment Limitation: Student must be a registered Scaffold Erector Apprentice.

This course introduces the Scaffold Erector Apprentice to the industry safety procedures when assembling welded frame and rolling scaffolds.

CARPT 262 System Scaffold

Units: 1.5  
Hours: 22.5 hours LEC; 13.5 hours LAB  
Prerequisite: None.  
Enrollment Limitation: Student must be a registered Scaffold Erector Apprentice.

This course introduces the Scaffold Erector Apprentice to industry safety procedures when erecting system scaffold, rolling scaffold, and supported scaffold.

CARPT 263 Hazard Awareness for Scaffold Erectors

Units: 1.5  
Hours: 22.5 hours LEC; 13.5 hours LAB  
Prerequisite: None.  
Enrollment Limitation: Student must be a registered Scaffold Erector Apprentice.

This course introduces the Scaffold Erector Apprentice to hazards of erecting and dismantling scaffolds. It also covers aerial lift rules and regulations per industry standards.

CARPT 264 Suspended Scaffolds and Shoring Systems

Units: 1  
Hours: 9 hours LEC; 27 hours LAB  
Prerequisite: None.  
Enrollment Limitation: Student must be a registered Pile Driver Apprentice.

This course introduces the Scaffold Erector Apprentice to the safety procedures and industry rules and regulations for suspended scaffolds.

CARPT 265 Tube and Clamp Scaffold

Units: 1  
Hours: 9 hours LEC; 27 hours LAB  
Prerequisite: None.  
Enrollment Limitation: Student must be a registered Scaffold Erector Apprentice.

This course introduces the Scaffold Erector Apprentice to the safety procedures and industry rules and regulations for erecting tube and clamp scaffold systems.

CARPT 266 Blueprint Reading for Scaffold Erectors

Units: 1.5  
Hours: 22.5 hours LEC; 13.5 hours LAB  
Prerequisite: None.  
Enrollment Limitation: Student must be a registered Scaffold Erector Apprentice.

This course introduces the Scaffold Erector Apprentice to scaffold blueprint reading.

CARPT 268 Welding II

Units: 1.5  
Hours: 22.5 hours LEC; 13.5 hours LAB  
Prerequisite: None.  
Enrollment Limitation: Student must be a registered Scaffold Erector Apprentice.

This course introduces the Scaffold Erector Apprentice to light gauge welding using shielded metal arc welding (SMAW) and flux core arc welding (FCAW). It also covers safety, ergonomics, the safe use of hand and power tools, and tool maintenance.

CARPT 270 Mill Cabinet Safety and Tool Skills

Units: 1.5  
Hours: 22.5 hours LEC; 13.5 hours LAB  
Prerequisite: None.  
Enrollment Limitation: Student must be a registered Mill Cabinet Apprentice.

This course introduces Mill Cabinet Apprentices to materials, safety hazards, and the safe use of hand and power tools on job sites.

CARPT 271 The Mill Cabinet Apprentice and the Trade

Units: 1.5
**CARPT 272 Math for the Trades**

*Units:* 2  
*Hours:* 36 hours LEC  
*Prerequisite:* None.  
*Enrollment Limitation:* Student must be a registered Mill Cabinet Apprentice.  

This course covers mathematics applications in the mill cabinet trade with specific focus on mathematical processes related to the production requirements of the industry.

**CARPT 273 Basic Cabinet Making**

*Units:* 1.5  
*Hours:* 22.5 hours LEC; 13.5 hours LAB  
*Prerequisite:* None.  
*Enrollment Limitation:* Student must be a registered Mill Cabinet Apprentice.  

This course introduces Mill Cabinet Apprentices to basic cabinetry building procedures per industry standards.

**CARPT 274 Basic Blueprint Reading Mill Cabinet**

*Units:* 1.5  
*Hours:* 22.5 hours LEC; 13.5 hours LAB  
*Prerequisite:* None.  
*Enrollment Limitation:* Student must be a registered Mill Cabinet Apprentice.  

This course introduces Mill Cabinet Apprentices to blueprint terminology and interpretation.

**CARPT 275 Machinery Maintenance for Mill Cabinet**

*Units:* 1.5  
*Hours:* 22.5 hours LEC; 13.5 hours LAB  
*Prerequisite:* None.  
*Enrollment Limitation:* Student must be a registered Mill Cabinet Apprentice.  

This course covers the basics of mill cabinet machinery maintenance, troubleshooting, and repair.

**CARPT 276 Cabinet Hardware Installation**

*Units:* 1.5  
*Hours:* 22.5 hours LEC; 13.5 hours LAB  
*Prerequisite:* None.  
*Enrollment Limitation:* Student must be a registered Mill Cabinet Apprentice.  

This course introduces new Mill Cabinet Apprentices to basic cabinetry hardware installation procedures.

**CARPT 277 Sanding, Stains, and Finish Preparation**

*Units:* 1.5  
*Hours:* 22.5 hours LEC; 13.5 hours LAB  
*Prerequisite:* None.  
*Enrollment Limitation:* Student must be a registered Mill Cabinet Apprentice.  

This course introduces the Mill Cabinet Apprentice to the processes of surface preparation for the staining and finishing of solid wood and veneered cabinetry.

**CARPT 278 Advanced Machinery Operation**

*Units:* 1.5  
*Hours:* 22.5 hours LEC; 13.5 hours LAB  
*Prerequisite:* None.  
*Enrollment Limitation:* Student must be a registered Mill Cabinet Apprentice.  

This course introduces new Mill Cabinet Apprentices to advanced machinery operation procedures.

**CARPT 279 Advanced Blueprint Reading for Mill Cabinet**

*Units:* 1.5  
*Hours:* 22.5 hours LEC; 13.5 hours LAB  
*Prerequisite:* None.  
*Enrollment Limitation:* Student must be a registered Mill Cabinet Apprentice.  

This course introduces Mill Cabinet Apprentices to advanced blueprint terminology and interpretation.

**CARPT 280 Advanced Cabinet Making**

*Units:* 1.5  
*Hours:* 22.5 hours LEC; 13.5 hours LAB  
*Prerequisite:* None.  
*Enrollment Limitation:* Student must be a registered Mill Cabinet Apprentice.  

This course introduces Mill Cabinet Apprentices to advanced cabinetry building procedures.

**CARPT 281 Veneers, Laminate, and Finishing**

*Units:* 1.5  
*Hours:* 22.5 hours LEC; 13.5 hours LAB  
*Prerequisite:* None.  
*Enrollment Limitation:* Student must be a registered Mill Cabinet Apprentice.  

This course introduces the Mill Cabinet Apprentice to the processes of surface preparation for the finishing of laminate, and veneered cabinetry.

**CARPT 282 CAD Basics for Mill Cabinetry**

*Units:* 1.5  
*Hours:* 22.5 hours LEC; 13.5 hours LAB  
*Prerequisite:* None.  
*Enrollment Limitation:* Student must be a registered Mill Cabinet Apprentice.  

This course introduces the Mill Cabinet Apprentice to computer-aided design and drafting using AutoCAD, Cabinet Vision, and Alphacam software systems.
CARPT 283 Introduction to CNC

Units: 1.5
Hours: 22.5 hours LEC; 13.5 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be a registered Mill Cabinet Apprentice.

This course introduces the Mill Cabinet Apprentice to the operation processes, maintenance, and tooling of Computer Numeric Controlled (CNC) machines.

CARPT 284 Solid Surface Material, Fabrication, and Installation

Units: 1.5
Hours: 22.5 hours LEC; 13.5 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be a registered Mill Cabinet Apprentice.

This course introduces the Mill Cabinet Apprentice to constructing countertops and back splashes, and finishing products according to industry standards.

CARPT 285 Advanced Project for Mill Cabinet

Units: 1.5
Hours: 22.5 hours LEC; 13.5 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be a registered Mill Cabinet Apprentice.

This course introduces the Mill Cabinet Apprentice to advanced cabinetry building procedures per industry standards.

CARPT 298 Work Experience in Carpenters Apprenticeship

Units: 0.5 - 4
Hours: 37.5 - 300 hours LAB
Prerequisite: None.
Enrollment Limitation: Indentured in the carpenters apprenticeship program.
General Education: AA/AS Area III(b)

This course provides students the opportunity to work in the carpenters apprenticeship program for the purpose of developing specific skills to meet the goals and objectives of the carpenters Joint Apprenticeship and Training Committee (J.A.T.C.). Students complete work experience hours at approved training sites. Students may take up to 16 units total across all Work Experience course offerings. This course may be repeated when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

Drywall/Lathers (DRLTH) Courses

DRLTH 100 Introduction to the Trade

Units: 2
Hours: 36 hours LEC
Prerequisite: None.
Enrollment Limitation: Student must be a Registered Drywall/Lathing Apprentice.

This course is an introduction to drywall/lathing apprenticeship, state and federal apprenticeship laws, apprenticeship record keeping, apprentice evaluation procedures, general safety, work ethic, sexual harassment issues, and basic tools of the trade.

DRLTH 102 Basic Applications

Units: 1.5
Hours: 24 hours LEC; 12 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be a Registered Drywall/Lathing Apprentice.

This course is an introduction to basic gypsum wall covering and ceiling applications. It also includes taping installations, knot recognition, and application to rigging on construction job sites.

DRLTH 103 Drywall Lathing Trade Safety

Units: 1.5
Hours: 24 hours LEC; 12 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be a Registered Drywall-Lathing Apprentice.

This course covers trade safety for drywall lathing apprentices including hospital safety, rough terrain lift truck operation, and first aid and CPR.

DRLTH 105 Mathematics for Drywall/Lathers

Units: 2
Hours: 36 hours LEC
Prerequisite: None.
Enrollment Limitation: Student must be a Registered Drywall/Lathing Apprentice.

This course covers mathematical applications for the drywall and lathing trades. Topics include whole numbers, fractions, decimals, ratios, proportions, percentages, angles and degrees, areas, and volumes.

DRLTH 110 Residential Metal Framing

Units: 1.5
Hours: 24 hours LEC; 12 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be a Registered Drywall/Lathing Apprentice.

This course covers basic residential metal framing. It includes framing of floors, walls, doors, windows, roofs, trusses, and stairs.

DRLTH 112 Doors, Windows, Exterior Systems/Building Documents

Units: 1.5
Hours: 24 hours LEC; 12 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be a Registered Drywall/Lathing Apprentice.

This course covers the hardware, installation, and framing of doors and windows and exterior wall covering systems. It also covers blueprints and building codes.

DRLTH 120 Blueprint Reading I

Units: 1.5
Hours: 24 hours LEC; 12 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be a Registered Drywall/Lathing Apprentice.

This course covers job specifications, blueprint structure, and basic blueprint reading and interpretation. It also covers construction drawings and sketching.
DRLTH 121 Blueprint Reading II
Units: 1.5
Hours: 24 hours LEC; 12 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be a Registered Drywall/Lathing Apprentice.

This course is a continuation of DRLTH 120. Topics include interpretation, problem solving, correlating specifications, prints, addenda, notes, sections, and mathematics used with blueprints.

DRLTH 122 Blueprint Reading III
Units: 1.5
Hours: 24 hours LEC; 12 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be a Registered Drywall/Lathing Apprentice.

This course is a continuation of DRLTH 121. Topics include take-offs, material estimates, material requisition, job costs, and layout from blueprints.

DRLTH 130 Welding I
Units: 1.5
Hours: 24 hours LEC; 12 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be a Registered Drywall/Lathing Apprentice.

This course covers welding and welding concepts for construction job sites. Topics include welding safety, basic welding terms, definitions, positions, and cutting operations.

DRLTH 131 Welding II
Units: 1.5
Hours: 24 hours LEC; 12 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be a Registered Drywall/Lathing Apprentice.

This course is a continuation of DRLTH 130. Topics include safety, concepts, processes, symbols, and certification performance of welding.

DRLTH 140 Exterior/Advanced Fire Control System and Partitions
Units: 1.5
Hours: 24 hours LEC; 12 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be a Registered Drywall/Lathing Apprentice.

This course covers safety, principles, theory, and application of advanced fire control systems. Topics include principles and applications of partitions and metal framing.

DRLTH 142 Exterior Systems and Trims
Units: 1.5
Hours: 24 hours LEC; 12 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be a Registered Drywall/Lathing Apprentice.

This course covers principles and application of exterior wall framing, coverings, and trims.

DRLTH 150 Interior Metal Lathing System, Sound Control
Units: 1.5
Hours: 24 hours LEC; 12 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be a Registered Drywall/Lathing Apprentice.

This course covers materials, principles, theory, and application of lath and plaster interior hollow walls and partitions. Topics include principles and application of sound control systems, an introduction to mathematics, and layout for building arches.

DRLTH 160 Ceilings, Shaft Protection and Demountable Partitions
Units: 1.5
Hours: 24 hours LEC; 12 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be a Registered Drywall/Lathing Apprentice.

This course covers safety, materials, principles, theory, and installation of ceiling systems, demountable partitions, and shaft systems.

DRLTH 162 Arches, Furring and Advanced Systems
Units: 1.5
Hours: 24 hours LEC; 12 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be a Registered Drywall/Lathing Apprentice.

This course covers safety, materials, principles, theory, and installation of furring, arch systems, and fire retardant materials.

DRLTH 170 Advanced Construction Techniques
Units: 1.5
Hours: 24 hours LEC; 12 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be a Registered Drywall/Lathing Apprentice.

This course covers safety, materials, principles, and theory of advanced construction techniques. Topics also include following written and verbal directions, construction directly from blueprints, and research techniques.

DRLTH 298 Work Experience Drywall/Lathing Apprenticeship
Units: 0.5 - 4
Hours: 37.5 - 300 hours LAB
Prerequisite: None.
Enrollment Limitation: Indenitured in the drywall/lathing apprenticeship program.
General Education: AA/AS Area III(b)

This course provides students the opportunity to work in the drywall/lathing apprenticeship program for the purpose of developing specific skills to meet the goals and objectives of the drywall/lathing Joint Apprenticeship and Training Committee (J.A.T.C.). Students complete work experience hours at approved training sites. Students may take up to 16 units total across all Work Experience course offerings. This course may be repeated when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.
Electrical Apprenticeship (ELECT) Courses

ELECT 110 Electrical Apprenticeship I

Units: 5
Hours: 54 hours LEC; 108 hours LAB
Prerequisite: None.
Enrollment Limitation: Registered Electrical Apprentice

This course is an introduction to electrical apprenticeship, electrical shop practices, basic electrical layout, tools of the trade, and construction materials. Topics include working with electrical related mathematics and basic electrical formulas.

ELECT 111 Electrical Apprenticeship II

Units: 3
Hours: 21 hours LEC; 99 hours LAB
Prerequisite: None.
Enrollment Limitation: Registered Electrical Apprentice

This course covers direct current (DC) theory, DC series and parallel circuits, DC combination circuits, principles of electromagnetism, and power generation. Topics include an introduction to the National Electrical Code (NEC) and basic blueprint reading.

ELECT 120 Electrical Apprenticeship III

Units: 3
Hours: 21 hours LEC; 99 hours LAB
Prerequisite: None.
Enrollment Limitation: Registered Electrical Apprentice

This course covers alternating current (AC) theory, AC generation, use of instruments, and phase and circuit calculations. Topics include codeology and how it applies to the National Electrical Code (NEC).

ELECT 121 Electrical Apprenticeship IV

Units: 3
Hours: 21 hours LEC; 99 hours LAB
Prerequisite: None.
Enrollment Limitation: Registered Electrical Apprentice

This course covers AC theory in series, parallel, and combination resistive-inductive (RL), resistive-capacitive (RC), inductive-capacitive (LC), and resistive-inductive-capacitive (RLC) circuits. Topics include conduit bending using a ratcheting and mechanical bender, transformer construction and installation, and applications of the National Electrical Code (NEC).

ELECT 130 Electrical Apprenticeship V

Units: 3
Hours: 21 hours LEC; 99 hours LAB
Prerequisite: None.
Enrollment Limitation: Registered Electrical Apprentice

This course covers electrical safety-related work practices specified by the National Fire Protection Agency publication 70E (NFPA 70E). It covers industrial blueprint reading, conduit bending using electro-hydraulic benders, and introductions to motor control and semiconductors. Additional topics include applying the National Electrical Code (NEC) with emphasis on grounding and bonding.

ELECT 131 Electrical Apprenticeship VI

Units: 3
Hours: 21 hours LEC; 99 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be a Registered Electrical Apprentice.

This course covers advanced grounding topics, transformer operation and theory, and advanced industrial blueprint reading. Topics include applying the National Electrical Code (NEC) and emphasis on over-current protection, transformers, and ground fault protection.

ELECT 140 Electrical Apprenticeship VII

Units: 3
Hours: 21 hours LEC; 99 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be a Registered Electrical Apprentice

This course covers lightning protection systems, AC and DC motors, motor control systems. Topics include advanced blueprints and electrical room layout, as well as building take-offs.

ELECT 141 Electrical Apprenticeship VIII

Units: 3
Hours: 21 hours LEC; 99 hours LAB
Prerequisite: None.
Enrollment Limitation: Registered Electrical Apprentice

This course covers AC motor speed controls, National Electrical Manufacturing Association (NEMA) standards, motor control troubleshooting, digital electronics, and programmable logic controllers (PLCs). Topics include use of the National Electrical Code (NEC) with cable trays, electric welders, phase converters, hazardous locations, and special occupancies.

ELECT 150 Electrical Apprenticeship IX

Units: 3
Hours: 21 hours LEC; 99 hours LAB
Prerequisite: None.
Enrollment Limitation: Registered Electrical Apprentice

This course covers fire alarms, security, power quality, stewardship training, and photo-voltaic systems. It also includes preparation for the California Electrician Certification examination.

ELECT 151 Electrical Apprenticeship X

Units: 3
Hours: 21 hours LEC; 99 hours LAB
Prerequisite: None.
Enrollment Limitation: Registered Electrical Apprentice

This course covers building automation, structured cabling systems, and an introduction to instrumentation used on industrial process controls. It also covers advanced programmable logic controllers (PLCs) used in motor-controlled circuits.

ELECT 281 Green Technology High Efficiency Lighting

Units: 2
Hours: 27 hours LEC; 27 hours LAB
Prerequisite: None.
Enrollment Limitation: Must be a current California State Certified General Electrician.

This course covers installing, troubleshooting, commissioning and maintaining advanced lighting controls, switching controls, dimming controls, occupancy sensors, photo-sensors and controllers, distribution relay systems, remote controlled circuit breakers, and wireless systems. Pass/No Pass only.

ELECT 298 Work Experience in Electricians Apprenticeship

Units: 0.5 - 4
Hours: 37.5 - 300 hours LAB
This course provides students the opportunity to work in the electricians apprenticeship program for the purpose of developing specific skills to meet the goals and objectives of the electricians Joint Apprenticeship and Training Committee (J.A.T.C.). Students complete work experience hours at approved training sites. Students may take up to 16 units total across all Work Experience course offerings. This course may be repeated when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

Elevator (ELEVA) Courses

**ELEVA 100 Elevator New Hire Program**

- **Units:** 4
- **Hours:** 72 hours LEC
- **Prerequisite:** None.

The course is intended to introduce probationary employees to National Elevator Industry Educational Program (NEIEP). NEIEP is structured to provide students with an opportunity to become acquainted with the different learning approaches available to them as students in the program. This course provides the fundamental tools required of an apprentice to become successful in their career as an elevator constructor.

**ELEVA 101 Elevator Trade Skills**

- **Units:** 3
- **Hours:** 45 hours LEC; 27 hours LAB
- **Prerequisite:** None.

This course introduces the responsibilities of an elevator apprentice. It includes the elevator apprenticeship rules and regulations, record keeping, evaluations and advancement, work ethic, safety, and basic tools. It acquaints the elevator apprentice with specifications that constitute a safe working environment under the Occupational Safety and Health Administration (OSHA); including an introduction to the rights and obligations that OSHA imposes. In addition, this course provides an orientation and overview of the history of the elevator trade.

**ELEVA 102 Elevator Hoistway Structures**

- **Units:** 3
- **Hours:** 45 hours LEC; 27 hours LAB
- **Prerequisite:** None.

This course reinforces the responsibilities of an elevator apprentice. It includes the elevator apprenticeship rules and regulations, and proper use of tools used in the elevator trade. This course helps the elevator apprentice understand how to build and install essential elevator hoistway, pit, and machine room structures.

**ELEVA 103 Elevator Electrical Fundamentals**

- **Units:** 4
- **Hours:** 72 hours LEC
- **Prerequisite:** None.

This course covers an in-depth review of mathematics needed for electrical fundamentals and the basic theory of DC electrical, AC electrical, circuits, electromagnetism, and testing equipment.

**ELEVA 104 Elevator Electrical Theory and Application**

- **Units:** 3

**ELEVA 105 Elevator Installation**

- **Units:** 4
- **Hours:** 72 hours LEC
- **Prerequisite:** None.

This course takes the apprentice from a simple platform and bare hoistway to the piping, planning, and wiring of the elevator system. It finishes with an overview of preventative and scheduled maintenance.

**ELEVA 106 Elevator Solid State Electronics**

- **Units:** 4
- **Hours:** 72 hours LEC
- **Prerequisite:** None.

This course covers advanced electrical and solid state electronics. It emphasizes solid state components and hands-on labs to build the apprentice’s electrical knowledge.

**ELEVA 107 Elevator Power and Logic**

- **Units:** 3
- **Hours:** 45 hours LEC; 27 hours LAB
- **Prerequisite:** None.

This course covers the fundamental circuits found in elevators control systems. It also covers basic control logic through complex logic and troubleshooting.

**ELEVA 108 Advanced Topics in Elevators**

- **Units:** 4
- **Hours:** 72 hours LEC
- **Prerequisite:** None.

This course covers hydraulic elevators and non-traditional types of elevators. It also covers escalators, residential, and rack and pinion systems.

**ELEVA 298 Work Experience in Elevator Apprenticeship**

- **Units:** 0.5 - 4
- **Hours:** 37.5 - 300 hours LAB
- **Prerequisite:** None.
- **Enrollment Limitation:** Indentured in the Elevator apprenticeship program.
- **General Education:** AA/AS Area III(b)

This course provides students the opportunity to work in the Elevator Apprenticeship program for the purpose of developing specific skills to meet the goals and objectives of the Elevator Joint Apprenticeship and Training Committee (J.A.T.C.). Students complete work experience hours at approved training sites. Students may take up to 16 units total across all Work Experience course offerings. This course may be repeated when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

**ELEVA 299 Experimental Offering in Elevator**

- **Units:** 0.5 - 4
- **Prerequisite:** None.
**Iron Workers (IW) Courses**

**IW 100 Orientation and History of the Trade**

**Units:** 2  
**Hours:** 26 hours LEC; 30 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Student must be a Registered Ironworkers Apprentice.

This course introduces the responsibilities of an Ironworker's Apprentice. It includes the Ironworker's rules and regulations, record keeping, evaluations and advancement, work ethic, sexual harassment issues, and basic tools. It acquaints the Ironworker Apprentice with specifications that constitute a safe working environment under the Occupational Safety and Health Administration (OSHA), including an introduction to the rights and obligations that OSHA imposes. In addition, this course provides an orientation and overview of the history of the ironworker trade.

**IW 101 OSHA 30 for Ironworkers**

**Units:** 2  
**Hours:** 26 hours LEC; 30 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Student must be a Registered Ironworkers Apprentice.

This course provides the ironworker apprentice with the safety standards and regulations for construction project sites as required by the Occupational Safety and Health Administration (OSHA). Topics include general safety and health provisions, OSHA citation policies, fire protection and prevention, fall protection, personal protection equipment (PPE), safe handling and storage of materials, steel erection, and lifesaving practices and equipment.

**IW 110 Mixed Base**

**Units:** 1.5  
**Hours:** 12 hours LEC; 45 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Student must be a Registered Ironworkers Apprentice.

This course provides an overview of the type of construction blueprints commonly used with emphasis on function and interpretation. It offers a brief review of basic math skills and provides an opportunity to apply these skills in solving typical problems relevant to the Ironworker trade.

**IW 120 Rigging**

**Units:** 1.5  
**Hours:** 12 hours LEC; 45 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Student must be a Registered Ironworkers Apprentice.

This course introduces rigging applications such as wire rope, chains, slings, cranes, helicopters, ladders, and scaffolds. It also includes rigging safety, knot recognition and strength identification, and knot applications within rigging.

**IW 130 Reinforcing I**

**Units:** 1.5  
**Hours:** 12 hours LEC; 45 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Student must be a Registered Ironworkers Apprentice.

This course introduces standard codes, code classifications, plans, schedules, charts, and specifications commonly used by Ironworkers. Topics include construction techniques used in reinforcing concrete members with steel, use of bar supports, placement of reinforcing iron, and general principles of bar splicing and welding. This course also introduces post-tensioning and pre-stressing techniques.

**IW 131 Reinforcing II/Post Tensioning**

**Units:** 1.5  
**Hours:** 12 hours LEC; 45 hours LAB  
**Prerequisite:** IW 130 with a grade of "C" or better  
**Enrollment Limitation:** Student must be a Registered Ironworkers Apprentice.

This course expands the interpretation of standard codes, code classifications, plans, schedules, charts, and specifications commonly used in the Ironworker trade. It provides an in-depth presentation on construction techniques, use of bar supports, placement of reinforcing iron, general principles of bar splicing, and welding.

**IW 140 Precast Concrete and Metal Buildings**

**Units:** 1.5  
**Hours:** 12 hours LEC; 45 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Student must be a Registered Ironworkers Apprentice.

This course covers the erection of precast concrete and metal buildings. Topics include rigging, handling, and installing of structures in a safe and economical manner. It also covers reading and interpreting charts, tables, and blueprints.

**IW 150 Welding I**

**Units:** 1.5  
**Hours:** 12 hours LEC; 45 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Student must be a Registered Ironworkers Apprentice.

This course introduces the structure of ferrous metals and their reaction to heat. It covers the equipment and materials used for shielded metal-arc welding including safety hazards, charts, key terms, electrodes, and welding current controls.

**IW 151 Welding II**

**Units:** 1.5  
**Hours:** 12 hours LEC; 45 hours LAB  
**Prerequisite:** IW 150 with a grade of "C" or better  
**Enrollment Limitation:** Student must be a Registered Ironworkers Apprentice.

This course continues the study of ferrous metals and their reactions to heat. It includes equipment and materials employed in the use of shielded metal-arc and gas shielded-arc welding.

**IW 152 Welding III**

**Units:** 1.5  
**Hours:** 12 hours LEC; 45 hours LAB  
**Prerequisite:** IW 151 with a grade of "C" or better  
**Enrollment Limitation:** Student must be a Registered Ironworkers Apprentice.
This course focuses on skill development in shielded metal arc and flux core arc welding on ferrous and non-ferrous metals. It covers vertical and overhead welding positions on all types of joints as they relate to structural stability.

**IW 160 Lead Hazard**

**Units:** 2  
**Hours:** 26 hours LEC; 30 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Student must be a Registered Ironworkers Apprentice.

This course describes the health effects caused by lead exposure. Topics include the Occupational Safety and Health Administration (OSHA) regulations, sampling methods, legal rights of workers, and the use of proper protective equipment and work methods.

**IW 170 Structural I**

**Units:** 1.5  
**Hours:** 12 hours LEC; 45 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Student must be a Registered Ironworkers Apprentice.

This course covers the theory and practice of blueprint reading, structural erection procedures, and proper steel structure construction.

**IW 171 Structural II**

**Units:** 1.5  
**Hours:** 12 hours LEC; 45 hours LAB  
**Prerequisite:** IW 170 with a grade of "C" or better  
**Enrollment Limitation:** Student must be a Registered Ironworkers Apprentice.

This course addresses the theory and practice of blueprint reading related to structure construction. Topics include structural erection procedures including the operation of mobile and tower cranes and proper construction of various steel structures.

**IW 180 Architectural/Ornamental I**

**Units:** 1.5  
**Hours:** 12 hours LEC; 45 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Student must be a Registered Ironworkers Apprentice.

This course covers the procedures and practices employed by the ironworker in architectural and ornamental iron working. Topics include tools, anchors, fasteners, and various layout instruments. Additionally, it covers constructing curtain wall systems, applying sealants, and glazing systems.

**IW 183 The History of Ironworkers**

**Units:** 3  
**Hours:** 56 hours LEC  
**Prerequisite:** None.  
**Enrollment Limitation:** Student must be a Registered Ironworkers Apprentice.

This course covers the history of iron-working and the Ironworker Union movement from its birth in 1896 to the present.

**IW 186 Architectural/Ornamental II**

**Units:** 1.5  
**Hours:** 12 hours LEC; 45 hours LAB  
**Prerequisite:** IW 180 with a grade of "C" or better  
**Enrollment Limitation:** Student must be a Registered Ironworkers Apprentice.

This course is a continuation of IW 180 and provides detailed information on knowledge, procedures, and practices employed by the ironworker in architectural and ornamental iron working. Topics include tools, anchors, fasteners, and various layout instruments. Additionally, constructing curtain wall systems, applying sealants, and glazing systems are covered. This course is not open to students who have taken IW 181.

**IW 298 Work Experience in Ironworkers Apprenticeship**

**Units:** 0.5 - 4  
**Hours:** 37.5 - 300 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Indentured in the ironworkers apprenticeship program.

**General Education:** AA/AS Area III(b)

This course provides the opportunity to work in the ironworkers apprenticeship program for the purpose of developing specific skills to meet the goals and objectives of the ironworkers Joint Apprenticeship and Training Committee (J.A.T.C.). Students complete work experience hours at approved training sites. Students may take up to 16 units total across all Work Experience course offerings. This course may be repeated when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

**Operating Engineers Apprenticeship (OE3) Courses**

**OE3 101 Introduction to Operators**

**Units:** 8  
**Hours:** 120 hours LEC; 72 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Registered Operating Engineer Apprentice.

This course introduces the skills and knowledge required to be a Construction Equipment Operator in the Operating Engineers Apprenticeship. Topics include an introduction to grade checking and the operation of a compactor, bulldozer, scraper, and backhoe.

**OE3 102 Introduction to Heavy Duty Repair**

**Units:** 8  
**Hours:** 120 hours LEC; 72 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Registered Operating Engineer Apprentice.

This course is an introduction to the Heavy Equipment Operator in the Operating Engineers Apprenticeship. Topics include an introduction to electrical, pneumatic, hydraulic, and power train systems for heavy duty construction equipment. Additional topics include engines and safety.

**OE3 103 Introduction to Crane Operators**

**Units:** 12  
**Hours:** 164 hours LEC; 156 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Registered Operating Engineer Apprentice.

This course introduces the skills and knowledge to be a Crane Operator in the Operating Engineers Apprenticeship. Topics include rigging, crane operations, lubrication, booms, loading, and safety regulations.

**OE3 104 Introduction to Grade Setter**

**Units:** 8  
**Hours:** 120 hours LEC; 72 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Registered Operating Engineer Apprentice.
This course introduces the skills and knowledge to be a Grade Setter in the Operating Engineers Apprenticeship. Topics include an introduction to grade checking and the operations of compactors, bulldozers, scrapers, and loaders.

**OE3 110 Introduction to Dredge Operation**

- **Units:** 3
- **Hours:** 41 hours LEC; 39 hours LAB
- **Prerequisite:** None.
- **Enrollment Limitation:** Registered Operating Engineer Apprentice.

This course introduces dredge operations. Topics include principles of dredging, water safety, knot tying, hand signals, and crane operations for dredging operations.

**OE3 112 Seamanship I**

- **Units:** 3
- **Hours:** 41 hours LEC; 39 hours LAB
- **Prerequisite:** None.
- **Enrollment Limitation:** Registered Operating Engineer Apprentice.

This course covers seamanship as it is required for dredge operations. Topics include boat handling, use of nautical charts, piloting, signaling, buoy safety, and general water safety requirements for dredge operations.

**OE3 115 Seamanship II**

- **Units:** 3
- **Hours:** 41 hours LEC; 39 hours LAB
- **Prerequisite:** OE3 112 with a grade of "C" or better
- **Enrollment Limitation:** Registered Operating Engineer Apprentice.

This course is a continuation of OE3 112. Advanced topics include marine rescue, lifeboat seamanship, dredging material handling, shipboard fire suppression, and shore operations.

**OE3 120 Plant Operations**

- **Units:** 3
- **Hours:** 41 hours LEC; 39 hours LAB
- **Prerequisite:** None.
- **Enrollment Limitation:** Registered Operating Engineer Apprentice.

This course covers the operation, maintenance, and troubleshooting of batch, crushing, screening, and washing plants in the construction industry. Topics include maintenance procedures, erecting and dismantling, and types of materials.

**OE3 121 Welding and Cutting**

- **Units:** 3
- **Hours:** 41 hours LEC; 39 hours LAB
- **Prerequisite:** None.
- **Enrollment Limitation:** Registered Operating Engineer Apprentice.

This course covers welding and oxy-acetylene used in batch, crushing, screening, and washing application plants. Topics include shop safety practices, proper selection of welding equipment, use of oxy-acetylene equipment, and proper welding techniques.

**OE3 130 Backhoe & Excavator Operations**

- **Units:** 3
- **Hours:** 41 hours LEC; 39 hours LAB
- **Prerequisite:** None.
- **Enrollment Limitation:** Registered Operating Engineer Apprentice.

This course covers the safe operation of a backhoe and/or excavator. Topics include trenching safety, hazards of underground construction, sloping, grade checking, and excavation for a manhole.

**OE3 131 Grade Checking**

- **Units:** 3
- **Hours:** 41 hours LEC; 39 hours LAB
- **Prerequisite:** None.
- **Enrollment Limitation:** Registered Operating Engineer Apprentice.

This course covers grade checking for the construction equipment operator. Topics include grade setting terminology, stake marking, laser levelers, street section grading, Global Positioning System (GPS) devices, plan reading, metric conversions, and locating underground infrastructure.

**OE3 132 Scrapers**

- **Units:** 3
- **Hours:** 41 hours LEC; 39 hours LAB
- **Prerequisite:** None.
- **Enrollment Limitation:** Registered Operating Engineer Apprentice.

This course covers the operation of a scraper. Topics include equipment safety, grading, dumping and spreading, grade checking, and operation with a scraper.

**OE3 133 Loaders**

- **Units:** 3
- **Hours:** 41 hours LEC; 39 hours LAB
- **Prerequisite:** None.
- **Enrollment Limitation:** Registered Operating Engineer Apprentice.

This course covers the safe operation of a loader. Topics include equipment safety, loading, transporting, stockpiling, and hand signals.

**OE3 134 Motor Grader**

- **Units:** 3
- **Hours:** 41 hours LEC; 39 hours LAB
- **Prerequisite:** None.
- **Enrollment Limitation:** Registered Operating Engineer Apprentice.

This course covers the operation of a motor grader. Topics include equipment safety, grading, mixing, compaction density, grade checking, and v-ditching.

**OE3 135 Dozers**

- **Units:** 3
- **Hours:** 41 hours LEC; 39 hours LAB
- **Prerequisite:** None.
- **Enrollment Limitation:** Registered Operating Engineer Apprentice.

This course covers the operation of dozers. Topics include equipment safety, grading, dumping and spreading, grade checking, and v-ditching.

**OE3 136 Directional Drilling**

- **Units:** 3
- **Hours:** 41 hours LEC; 39 hours LAB
- **Prerequisite:** None.
- **Enrollment Limitation:** Registered Operating Engineer Apprentice.

This course covers the operation, maintenance, and troubleshooting of directional boring machines. Topics include safety, tracker control, maintenance, and drilling fluids.

**OE3 140 Boom Pumps**

- **Units:** 3
- **Hours:** 41 hours LEC; 39 hours LAB
- **Prerequisite:** None.
- **Enrollment Limitation:** Registered Operating Engineer Apprentice.
This course introduces boom pumps, such as those for overhead concrete pumping. Topics include safety, maintenance, components, controls, hand signals, and blockages.

**OE3 141 Line Pumps**

- **Units:** 3
- **Hours:** 41 hours LEC; 39 hours LAB
- **Prerequisite:** OE3 140 with a grade of "C" or better
- **Enrollment Limitation:** Registered Operating Engineer Apprentice.

This course introduces line pumps, such as those for ground concrete pumping. Topics include safety, maintenance, components, controls, hand signals, and blockages.

**OE3 142 Advanced Boom Pumps**

- **Units:** 3
- **Hours:** 41 hours LEC; 39 hours LAB
- **Prerequisite:** OE3 140 with a grade of "C" or better
- **Enrollment Limitation:** Registered Operating Engineer Apprentice.

This course covers advanced boom pumps such as those used for overhead concrete pumping. Topics include advanced safety, preventative maintenance, components, controls, hand signals, blockages, and troubleshooting procedures.

**OE3 143 Advanced Line Pumps**

- **Units:** 3
- **Hours:** 41 hours LEC; 39 hours LAB
- **Prerequisite:** OE3 141 with a grade of "C" or better
- **Enrollment Limitation:** Registered Operating Engineer Apprentice.

This course covers advanced line pumps, such as those used for ground concrete pumping. Topics include advanced safety, preventative maintenance, components, controls, hand signals, blockages, and troubleshooting procedures.

**OE3 150 Introduction to Mobile Drilling**

- **Units:** 3
- **Hours:** 41 hours LEC; 39 hours LAB
- **Prerequisite:** None.
- **Enrollment Limitation:** Registered Operating Engineer Apprentice.

This course introduces how to operate, maintain, and troubleshoot mobile drilling machines. Topics include safety, horizontal and vertical drilling, lubrication, and maintenance.

**OE3 151 Horizontal & Vertical Drilling Machine Operator I**

- **Units:** 3
- **Hours:** 41 hours LEC; 39 hours LAB
- **Prerequisite:** OE3 150 with a grade of "C" or better
- **Enrollment Limitation:** Registered Operating Engineer Apprentice.

This course covers the operation, maintenance, and troubleshooting of mobile drilling machines. Topics include safety, horizontal and vertical drilling, lubrication, and maintenance.

**OE3 152 Horizontal & Vertical Drilling Machine Operator II**

- **Units:** 3
- **Hours:** 41 hours LEC; 39 hours LAB
- **Prerequisite:** OE3 151 with a grade of "C" or better
- **Enrollment Limitation:** Registered Operating Engineer Apprentice.

This operator level II course covers the operation, maintenance, and troubleshooting of mobile drilling machines. Topics include safety, horizontal and vertical drilling, lubrication, and maintenance.

**OE3 153 Horizontal & Vertical Drilling Machine Operator III**

- **Units:** 3
- **Hours:** 41 hours LEC; 39 hours LAB
- **Prerequisite:** OE3 152 with a grade of "C" or better
- **Enrollment Limitation:** Registered Operating Engineer Apprentice.

This operator level III course covers the operation, maintenance, and troubleshooting of mobile drilling machines. Topics include safety, horizontal and vertical drilling, lubrication, maintenance, regulatory requirements, and difficult terrains.

**OE3 160 Grade Setting I**

- **Units:** 3
- **Hours:** 41 hours LEC; 39 hours LAB
- **Prerequisite:** None.
- **Enrollment Limitation:** Registered Operating Engineer Apprentice.

This course introduces the skills and knowledge required to be a grade setter in the Operating Engineer Apprenticeship. Topics include surveying principles, plan reading, global positioning systems (GPS), cut/fill slope staking, street section grading, and pad layout.

**OE3 161 Grade Setting II**

- **Units:** 3
- **Hours:** 41 hours LEC; 39 hours LAB
- **Prerequisite:** OE3 160 with a grade of "C" or better
- **Enrollment Limitation:** Registered Operating Engineer Apprentice.

This course covers the advanced skills and knowledge required to be a grade setter in the Operating Engineer Apprenticeship. Topics include slope staking using global positioning systems (GPS) for Trimble systems.

**OE3 182 Heavy Duty Equipment Hydraulics**

- **Units:** 3
- **Hours:** 41 hours LEC; 39 hours LAB
- **Prerequisite:** None.
- **Enrollment Limitation:** Registered Operating Engineer Apprentice.

This course covers hydraulic systems of heavy duty equipment. Topics include pumps, actuators, hoses, schematic drawings, and similar systems.

**OE3 183 Engines**

- **Units:** 3
- **Hours:** 41 hours LEC; 39 hours LAB
- **Prerequisite:** None.
- **Enrollment Limitation:** Registered Operating Engineer Apprentice.

This course covers the principles, operation, and diagnosis of heavy duty engines commonly used in construction equipment, such as earth moving equipment. Topics include fuel systems, specialty tool usage, and troubleshooting techniques.

**OE3 184 Power Trains**

- **Units:** 3
- **Hours:** 41 hours LEC; 39 hours LAB
- **Prerequisite:** None.
- **Enrollment Limitation:** Registered Operating Engineer Apprentice.

This covers the principles, operation, and diagnosis of heavy duty power trains commonly used in construction equipment such as earth moving equipment. Topics include shop safety, transmissions, drive-lines, differentials, and troubleshooting techniques.
OE3 185 Equipment Welding

Units: 3
Hours: 41 hours LEC; 39 hours LAB
Prerequisite: None.
Enrollment Limitation: Registered Operating Engineer Apprentice

This course covers welding and oxyacetylene processes used in heavy construction equipment, such as bulldozers, backhoes, or earth moving equipment. Topics include shop safety practices, proper selection of welding equipment, use of oxyacetylene equipment, and proper welding techniques.

OE3 186 Lubrication Preventative Maintenance

Units: 3
Hours: 41 hours LEC; 39 hours LAB
Prerequisite: None.
Enrollment Limitation: Registered Operating Engineer Apprentice

This course covers lubrication preventative maintenance for the construction lube technician. Topics include lubricants, air filters, engine oils, and manufacturer services on heavy construction equipment.

OE3 187 Oils, Lubricants, and Coolants

Units: 3
Hours: 41 hours LEC; 39 hours LAB
Prerequisite: None.
Enrollment Limitation: Registered Operating Engineer Apprentice

This course covers oils, lubricants, and coolants for the construction lube technician. Topics include lubricants, engine oils, gear oils, transmission oils, grease, and coolants.

OE3 188 Servicing and Inspections

Units: 3
Hours: 41 hours LEC; 39 hours LAB
Prerequisite: None.
Enrollment Limitation: Registered Operating Engineer Apprentice

This course covers servicing and inspection skills for the construction lube technician. Topics include minor repairs, performing services, and inspecting for prevention.

OE3 298 Work Experience in Operating Engineers Apprenticeship

Units: 0.5 - 4
Hours: 37.5 - 300 hours LAB
Prerequisite: None.
Enrollment Limitation: Indentured in the operating engineers apprenticeship program.
General Education: AA/AS Area III(b)

This course provides students the opportunity to work in the operating engineers apprenticeship program for the purpose of developing specific skills to meet the goals and objectives of the operating engineers joint Apprenticeship and Training Committee (J.A.T.C.). Students complete work experience hours at approved training sites. Students may take up to 16 units total across all Work Experience course offerings. This course may be repeated when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

Plumbers and Pipe-fitters Apprenticeship (PLUMB) Courses

PLUMB 100 Introduction to the Trade

Units: 4.5
Hours: 69 hours LEC; 39 hours LAB
Prerequisite: None.
Enrollment Limitation: Must be a registered Plumber and Pipefitter Apprentice.

This course introduces the Plumber and Pipefitter Apprentice to the history of the trade and the role and responsibilities of an apprentice. It also covers tool and equipment safety and rigging.

PLUMB 101 Introduction to the Refrigeration Fitter Apprenticeship

Units: 4.5
Hours: 69 hours LEC; 39 hours LAB
Prerequisite: None.
Enrollment Limitation: Must be a registered Plumber and Pipefitter Apprentice.

This course introduces the Plumber and Pipefitter specializing in Refrigeration Fitter to the history of the trade and the role and responsibilities of an apprentice. It also covers tool and equipment safety and applied mathematics.

PLUMB 110 Plumbing Science, Fixtures, and Rigging

Units: 4
Hours: 62 hours LEC; 46 hours LAB
Prerequisite: None.
Enrollment Limitation: Must be a registered Plumber and Pipefitter Apprentice.

This course introduces the Plumber and Pipefitter Apprentice to plumbing science and mechanics. It also covers various plumbing fixtures and rigging operations.

PLUMB 120 Gas Welding and Brazing

Units: 2
Hours: 6 hours LEC; 102 hours LAB
Prerequisite: None.
Enrollment Limitation: Must be a registered Plumber and Pipefitter Apprentice.

This course introduces the Plumber and Pipefitter Apprentice to welding techniques and principles of Oxygen/Acetylene burning, brazing, soldering, and welding.

PLUMB 121 Basic Arc Welding and Drawings

Units: 4
Hours: 60 hours LEC; 48 hours LAB
Prerequisite: None.
Enrollment Limitation: Must be a registered Plumber and Pipefitter Apprentice.

This course introduces the Plumber and Pipefitter Apprentice to welding techniques and principles of arc and oxy-fuel welding and basic working drawings.
PLUMB 122 Advanced Arc Welding

Units: 2
Hours: 8 hours LEC; 100 hours LAB
Prerequisite: None.
Enrollment Limitation: Must be a registered Plumber and Pipefitter Apprentice.

This course introduces the Plumber and Pipefitter Apprentice to advanced welding techniques and principles of arc and oxy-fuel welding.

PLUMB 130 Gas and Water Supply

Units: 4.5
Hours: 63 hours LEC; 45 hours LAB
Prerequisite: None.
Enrollment Limitation: Must be a registered Plumber and Pipefitter Apprentice.

This course introduces the Plumber and Pipefitter Apprentice to the supply and treatment of potable water and the design and construction of potable water conveyance systems. It also covers the use of natural gas and liquid propane systems as applied to the plumbing industry.

PLUMB 140 Advanced Drawings and Drainage

Units: 4
Hours: 63 hours LEC; 45 hours LAB
Prerequisite: None.
Enrollment Limitation: Must be a registered Plumber and Pipefitter Apprentice.

This course introduces the Plumber and Pipefitter Apprentice to advanced building plans and specifications. It also covers drainage systems in residential and commercial settings.

PLUMB 150 Steamfitting and Pipefitting

Units: 6
Hours: 108 hours LEC
Prerequisite: None.
Enrollment Limitation: Must be a registered Plumber and Pipefitter Apprentice.

This course introduces the Plumber and Pipefitter Apprentice to working knowledge of design, layout, components, safety hazards, and accepted engineering practices with steam heating and hydronic heating and cooling systems.

PLUMB 160 Uniform Plumbing Code and Medical Gas

Units: 5.5
Hours: 98 hours LEC; 10 hours LAB
Prerequisite: None.
Enrollment Limitation: Must be a registered Plumber and Pipefitter Apprentice.

This course introduces the Plumber and Pipefitter Apprentice to plumbing system code requirements. It also covers installation, testing, and inspection procedures for medical gas and vacuum systems.

PLUMB 161 HVACR Start, Test, and Balance

Units: 4
Hours: 65 hours LEC; 43 hours LAB
Prerequisite: None.
Enrollment Limitation: Must be a registered Plumber and Pipefitter Apprentice.

This course introduces the Plumber and Pipefitter Apprentice to the knowledge of start, test, and balance practices for Heating Ventilation Air Conditioning and Refrigeration (HVACR) systems and equipment.

PLUMB 162 Refrigeration and Customer Service

Units: 6
Hours: 108 hours LEC
Prerequisite: None.
Enrollment Limitation: Must be a registered Plumber and Pipefitter Apprentice.

This course introduces the Plumber and Pipefitter Apprentice to basic refrigeration, EPA certification, safety, and customer service.

PLUMB 170 Job Supervision and Foreman Training

Units: 4
Hours: 58 hours LEC; 50 hours LAB
Prerequisite: None.
Enrollment Limitation: Must be a registered Plumber and Pipefitter Apprentice.

This course introduces the Plumber and Pipefitter Apprentice to the knowledge and skills necessary to properly supervise, schedule, and document a construction project.

PLUMB 180 Supermarket Refrigeration

Units: 4
Hours: 60 hours LEC; 48 hours LAB
Prerequisite: None.
Enrollment Limitation: Must be a registered Plumber and Pipefitter Apprentice.

This course introduces the Plumber and Pipefitter Apprentice to the fundamentals of oil return and oil separators, electric and hot gas exhaust, multi-stage compressor systems, and pump down systems.

PLUMB 181 Refrigeration Controls and Electrical Troubleshooting

Units: 3.5
Hours: 42 hours LEC; 66 hours LAB
Prerequisite: None.
Enrollment Limitation: Must be a registered Plumber and Pipefitter Apprentice.

This course introduces the Plumber and Pipefitter Apprentice to refrigeration controls. It also covers electrical troubleshooting in refrigeration systems.

PLUMB 182 Refrigeration and Hydronics Piping

Units: 4.5
Hours: 70 hours LEC; 38 hours LAB
Prerequisite: None.
Enrollment Limitation: Must be a registered Plumber and Pipefitter Apprentice.

This course introduces the Plumber and Pipefitter Apprentice to the theory and application of psychrometrics, refrigerant piping design, advanced refrigeration, hydronic piping systems, and jobsite hazards. This course also covers customer service and relations as well as preparation for the UA STAR certification exam.

PLUMB 190 Air Conditioning Pneumatic and Process Controls

Units: 4.5
This course introduces the Plumber and Pipefitter Apprentice to welding techniques and principles of air conditioning pneumatic and process controls.

**PLUMB 191 Electrical and Direct Digital Controls**

- **Units:** 4
- **Hours:** 58 hours LEC; 50 hours LAB
- **Prerequisite:** None.
- **Enrollment Limitation:** Must be a registered Plumber and Pipefitter Apprentice.

This course introduces the Plumber and Pipefitter Apprentice to electrical control and direct digital control (DDC) systems as they apply to comfort air and building control management.

**PLUMB 192 Pneumatic Controls and Computer Literacy**

- **Units:** 4
- **Hours:** 65 hours LEC; 43 hours LAB
- **Prerequisite:** None.
- **Enrollment Limitation:** Must be a registered Plumber and Pipefitter Apprentice.

This course introduces the Plumber and Pipefitter Apprentice to working knowledge of pneumatic control systems. It also covers computer literacy as related to the Heating Ventilation and Air Conditioning (HVAC) industry.

**PLUMB 298 Work Experience in Plumbers and Pipefitters Apprenticeship**

- **Units:** 0.5 - 4
- **Hours:** 37.5 - 300 hours LAB
- **Prerequisite:** None.
- **Enrollment Limitation:** Indentured in the Plumbers and Pipefitters apprenticeship program.
- **General Education:** AA/AS Area III(b)

This course provides students the opportunity to work in the plumbers and pipefitters apprenticeship program for the purpose of developing specific skills to meet the goals and objectives of the Plumbers and Pipefitters Joint Apprenticeship and Training Committee (J.A.T.C.). Students complete work experience hours at approved training sites. Students may take up to 16 units total across all Work Experience course offerings. This course may be repeated when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

**Pre-Apprenticeship (PREAP) Courses**

**PREAP 111 Infrastructure Pre-Apprenticeship**

- **Units:** 7
- **Hours:** 77 hours LEC; 147 hours LAB
- **Prerequisite:** None.
- **Corequisite:** Concurrent enrollment in FITNS 102.
- **Enrollment Limitation:** Students must have a high school diploma or GED.
- **Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340.

This course provides an introduction to infrastructure apprenticeships. It covers tools, equipment, materials, and techniques used for building roads, bridges, levees, and rail. Topics also include job safety, physical requirements for different job sites, employability skills for apprenticeship, and California apprenticeship laws. Field trips may be required.

**PREAP 112 Infrastructure Pre-Apprenticeship I**

- **Units:** 3
- **Hours:** 27 hours LEC; 81 hours LAB
- **Prerequisite:** None.

This course provides an introduction to infrastructure construction trades apprenticeships. It covers tools, and equipment used for building and maintaining the facilities and systems that create America's infrastructure. Topics also include OSHA/jobsite safety, the safe use of hand and power tools, applied construction math, and employability skills for apprenticeship. This course is not open to students who have completed PREAP 111. Field trips may be required.

**PREAP 113 Infrastructure Pre-Apprenticeship II**

- **Units:** 3
- **Hours:** 27 hours LEC; 81 hours LAB
- **Prerequisite:** None.

This course provides an overview of the commercial and industrial construction trades with an emphasis on America's infrastructure. It covers materials and techniques that are used in the infrastructure trades to construct and maintain buildings and related facilities. Topics also include an introduction to construction drawings, material handling simulators, multi-craft skills, and California apprenticeship regulations.

This course is not open to students who have completed PREAP 111. Field trips may be required.

**PREAP 122 Pre-Apprenticeship for Utility Workers**

- **Units:** 8
- **Hours:** 96 hours LEC; 144 hours LAB
- **Prerequisite:** None.
- **Corequisite:** FITNS 358
- **Advisory:** MATH 145

This course provides preparation for entry-level employment skills for the utility industry. Topics include safety, basic electrical fundamentals, gas principles, excavation, working at heights, industrial ergonomics, radio procedures, and knot tying. Field trips may be required.

**PREAP 130 Carpenter Pre-Apprenticeship I**

- **Units:** 3
- **Hours:** 27 hours LEC; 81 hours LAB
- **Prerequisite:** None.

This course provides an introduction to the carpentry apprenticeship. It is designed to teach the minimum skills for entry into the carpentry apprenticeship. It includes OSHA safety, carpentry math and the roles and responsibilities of an apprentice.

**PREAP 131 Carpenter Pre-Apprenticeship II**

- **Units:** 3
- **Hours:** 27 hours LEC; 81 hours LAB
- **Prerequisite:** None.

This course is a continuation of PREAP 131 and provides additional introductory training for the carpentry apprenticeship. It is designed to
continue teaching the minimum skills for entry into the carpentry apprenticeship. It includes OSHA safety, carpentry math and the roles and responsibilities of an apprentice.

**PREAP 141 Green Technology Pre-Apprenticeship**

**Units:** 7  
**Hours:** 27 hours LEC; 81 hours LAB  
**Prerequisite:** None.

This course provides an introduction to Green Technology Pre-Apprenticeship. It covers tools, equipment, materials, and techniques used in the green fields such as electrical, plumbing, heating ventilation and air conditioning (HVAC), and carpentry. Topics include commercial and industrial building energy efficiency, building codes, sustainability, renewable energy, green building, distributed generation systems, utilities, and smart grids. Additional topics include construction drawings, safety training, construction math, and basic communication and employability skills. Field trips may be required.

**PREAP 142 Green Technology Pre-Apprenticeship I**

**Units:** 3  
**Hours:** 27 hours LEC; 81 hours LAB  
**Prerequisite:** None.

This course provides an introduction to Green Technology Pre-Apprenticeship. It covers tools, equipment, materials, and techniques used in the green fields such as electrical, plumbing, heating ventilation and air conditioning (HVAC), and carpentry. Topics include reducing consumer waste, water and other natural resources, recycling, renewable energy, and green building procedures and materials. Additional topics include construction drawings, safety training, construction math, and basic communication and employability skills. This course is not open to students who have completed PREAP 141. Field trips may be required.

**PREAP 143 Green Technology Pre-apprenticeship II**

**Units:** 3  
**Hours:** 27 hours LEC; 81 hours LAB  
**Prerequisite:** None.

This course provides an introduction to Green Technology Pre-Apprenticeship. It covers tools, equipment, materials, and techniques used in the green fields such as electrical, plumbing, heating ventilation and air conditioning (HVAC), and carpentry. Topics include commercial and industrial building energy efficiency, building codes, sustainability, distributed generation systems, utilities, and smart grids. Additional topics include safety training, and construction math. This course is not open to students who have completed PREAP 141. Field trips may be required.

**PREAP 299 Experimental Offering in Pre-Apprenticeship**

**Units:** 0.5 - 8  
**Prerequisite:** None.

This is the experimental courses description.

---

### Sheet Metal (SHME) Courses

#### SHME 100 Sheet Metal Apprenticeship I

**Units:** 3.5  
**Hours:** 34.5 hours LEC; 85.5 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Student must be a Registered Sheet Metal Apprentice

This course is an introduction to the Sheet Metal Apprenticeship program. Topics include job-site safety practices, basic drafting, basic job-site drawings, and industry terminology.

#### SHME 101 Sheet Metal Apprenticeship II

**Units:** 3.5  
**Hours:** 34.5 hours LEC; 85.5 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Student must be a Registered Sheet Metal Apprentice

This course is an introduction to sheet metal field installation with an emphasis in basic sheet metal layout, parallel and radial line development, and an introduction to triangulation and use of true length lines. Topics include fabrication, soft soldering, and drafting of sheet metal prior to fabrication.

#### SHME 110 Sheet Metal Apprenticeship III

**Units:** 3.5  
**Hours:** 34.5 hours LEC; 85.5 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Student must be a Registered Sheet Metal Apprentice

This course introduces basic layout skills for advanced pattern development. Topics include the basic bidding process, trigonometry for the sheet metal industry, fabrication of round fittings, and drafting of pictorial drawings.

#### SHME 111 Sheet Metal Apprenticeship IV

**Units:** 3.5  
**Hours:** 34.5 hours LEC; 85.5 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Student must be a Registered Sheet Metal Apprentice

This course covers advanced pattern development, architectural sheet metal principles, flashing, and gutters. Topics include hoisting and rigging, as well as installation of fire and smoke dampers.

#### SHME 120 Sheet Metal Apprenticeship V

**Units:** 3.5  
**Hours:** 34.5 hours LEC; 85.5 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Student must be a Registered Sheet Metal Apprentice

This course is an introduction to heating, ventilating, and air conditioning (HVAC) systems. It includes an overview of the properties of air, heating, and cooling. In addition, this course covers fans and duct systems, and measuring airflow in ductwork.

#### SHME 121 Sheet Metal Apprenticeship VI

**Units:** 3.5  
**Hours:** 34.5 hours LEC; 85.5 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Student must be a Registered Sheet Metal Apprentice
This course is an introduction to Occupational Safety and Health Administration (OSHA) regulations and a review of safe rigging practices. Topics include job specifications, blueprint reading, field measuring, and installation of package units and built-up systems.

**SHME 130 Sheet Metal Apprenticeship VII**

- **Units:** 3.5
- **Hours:** 34.5 hours LEC; 85.5 hours LAB
- **Prerequisite:** None.
- **Enrollment Limitation:** Student must be a Registered Sheet Metal Apprentice

This course covers the design and construction of rooftop steel, advanced plans and specifications, and duct leakage detection. It includes basic electricity for sheet metal workers.

**SHME 131 Sheet Metal Apprenticeship VIII**

- **Units:** 3.5
- **Hours:** 34.5 hours LEC; 85.5 hours LAB
- **Prerequisite:** None.
- **Enrollment Limitation:** Student must be a Registered Sheet Metal Apprentice

This course covers testing, adjusting, and balancing of heating, ventilating, and air conditioning (HVAC) systems. Topics include advanced drafting elevation views of shaft duct systems and complete takeoff of an HVAC system with cost, quantity, and weight.

**SHME 140 Sheet Metal Apprenticeship IX**

- **Units:** 3.5
- **Hours:** 34.5 hours LEC; 85.5 hours LAB
- **Prerequisite:** None.
- **Enrollment Limitation:** Student must be a Registered Sheet Metal Apprentice

This course covers the installation of architectural metal, food service equipment, and commercial exhaust systems. It includes control wiring of these systems.

**SHME 141 Sheet Metal Apprenticeship X**

- **Units:** 3.5
- **Hours:** 34.5 hours LEC; 85.5 hours LAB
- **Prerequisite:** None.
- **Enrollment Limitation:** Student must be a Registered Sheet Metal Apprentice

This course covers shop foreman duties, procedures, and leadership training. In addition, the testing, adjusting, and balancing of blow pipe systems are addressed.

**SHME 150 Sheet Metal Welding I**

- **Units:** 3.5
- **Hours:** 34.5 hours LEC; 85.5 hours LAB
- **Prerequisite:** None.
- **Enrollment Limitation:** Student must be a Registered Sheet Metal Apprentice

This course covers oxyacetylene cutting, shielded metal arc (SMAW) and gas tungsten arc (GTAW) welding processes typically used in the sheet metal industry. Topics include welding safety procedures and maintenance techniques.

**SHME 151 Sheet Metal Welding II**

- **Units:** 3.5
- **Hours:** 34.5 hours LEC; 85.5 hours LAB
- **Prerequisite:** None.

This course covers advanced shielded metal arc (SMAW) and gas tungsten arc (GTAW) welding processes typically used in the sheet metal industry. Topics include welding safety procedures and maintenance techniques.

**SHME 298 Work Experience in Sheet Metal Apprenticeship**

- **Units:** 0.5 - 4
- **Hours:** 37.5 - 300 hours LAB
- **Prerequisite:** None.
- **Enrollment Limitation:** Indentured in the sheet metal apprenticeship program.
- **General Education:** AA/AS Area III(b)

This course provides students the opportunity to work in the sheet metal apprenticeship program for the purpose of developing specific skills to meet the goals and objectives of the sheet metal Joint Apprenticeship and Training Committee (J.A.T.C.). Students complete work experience hours at approved training sites. Students may take up to 16 units total across all Work Experience course offerings. This course may be repeated when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

**Sheet Metal Technology (SMTEC) Courses**

**SMTEC 100 Sheet Metal Service Technician Apprenticeship I**

- **Units:** 2.5
- **Hours:** 27 hours LEC; 54 hours LAB
- **Prerequisite:** None.
- **Enrollment Limitation:** Student must be a Registered Sheet Metal Apprentice

This course is an introduction to the Sheet Metal Service Technician Apprenticeship. Topics include environmental systems, basic refrigeration theory, balancing refrigeration systems, and field safety. It includes the testing, adjusting, and balancing of refrigeration systems.

**SMTEC 101 Sheet Metal Service Technician Apprenticeship II**

- **Units:** 2.5
- **Hours:** 27 hours LEC; 54 hours LAB
- **Prerequisite:** None.
- **Enrollment Limitation:** Student must be a Registered Sheet Metal Apprentice

This course covers diagnosing refrigeration systems, charging and recovery of small hermetic systems, and servicing small heating, ventilating, and air conditioning (HVAC) package units.

**SMTEC 110 Sheet Metal Service Technician Apprenticeship III**

- **Units:** 2.5
- **Hours:** 27 hours LEC; 54 hours LAB
- **Prerequisite:** None.
- **Enrollment Limitation:** Student must be a Registered Sheet Metal Apprentice

This course covers basic electrical fundamentals and control circuits in package air conditioning units. Topics include basic motor principles, construction, and motor control circuits.
SMTEC 111 Sheet Metal Service Technician Apprenticeship IV

Units: 2.5
Hours: 27 hours LEC; 54 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be a Registered Sheet Metal Apprentice

This course covers hermetically sealed electric motors, motor control circuits and their protection. Topics include electrical schematics and diagrams relating to air conditioning equipment.

SMTEC 120 Sheet Metal Service Technician Apprenticeship V

Units: 2.5
Hours: 27 hours LEC; 54 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be a Registered Sheet Metal Apprentice

This course covers duct systems including design, selection, layout, and outlets. Topics include the properties of air, airflow, and heat in heating, ventilating, and air conditioning (HVAC) system design. Additionally, types of heating systems are covered.

SMTEC 121 Sheet Metal Service Technician Apprenticeship VI

Units: 2.5
Hours: 27 hours LEC; 54 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be a Registered Sheet Metal Apprentice

This course covers chilled water systems, air cooled condensers, water cooled condensers, refrigerant lines and flow control devices. Topics include heat load calculations for cooling systems and heat pump operation, components, and controls.

SMTEC 130 Sheet Metal Service Technician Apprenticeship VII

Units: 2.5
Hours: 27 hours LEC; 54 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be a Registered Sheet Metal Apprentice

This course covers commercial systems such as walk-in freezers, ice makers, multi-zone systems and an introduction to computerized building management. Topics include constant volume air conditioning systems, and an introduction to pneumatic and electronic environmental system controls.

SMTEC 131 Sheet Metal Service Technician Apprenticeship VIII

Units: 2.5
Hours: 27 hours LEC; 54 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be a Registered Sheet Metal Apprentice

This course covers variable air volume systems used in airflow regulation and their electronic control components. Topics include an introduction to the principles and components of direct digital controls (DDC) and energy management systems (EMS).

SMTEC 140 Sheet Metal Service Technician Apprenticeship IX

Units: 2.5
Hours: 27 hours LEC; 54 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be a Registered Sheet Metal Apprentice

This course covers the installation and application of direct digital control (DDC) systems in energy management systems (EMS). Topics include an introduction to blueprint reading for service technicians, and the testing and balancing of heating, ventilating, and air conditioning (HVAC) systems integrated with EMS.

SMTEC 141 Sheet Metal Service Technician Apprenticeship X

Units: 2.5
Hours: 27 hours LEC; 54 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be a Registered Sheet Metal Apprentice

This course covers commissioning of direct digital control (DDC) systems in energy management systems (EMS). Topics include demand controlled ventilation systems and advanced blueprint reading for service technicians.

Disciplinary Procedures and Due Process

The following are the disciplinary and due process procedures for when a student is referred to the Office of Student Conduct.

1. A student who is referred for discipline is required to meet with the Student Conduct Officer. This referral means the student’s alleged behavior is believed to have been a violation of the Los Rios Student Standards of Contact.
2. The student will receive a certified letter via US standard mail notifying them of their referral. In the notification, the student is instructed to make an appointment for an investigative meeting with the Student Conduct Officer.
3. At the informal, investigative meeting, the Student Conduct Officer shall interview the student for the purpose of discussing the alleged misconduct and the disciplinary action that should be taken (if any).
4. At the investigative meeting, the parties shall have the right to present statements, testimony, evidence, and witnesses, except that neither party shall have the right to be represented by an attorney.
5. The investigative meeting is mandatory. If the student fails to make an appointment and/or does not attend the meeting, then the Student Conduct Officer may review the case and initiate disciplinary action without input from the student.
6. After the investigative meeting, the Student Conduct Officer may initiate disciplinary action by filing a notice with the Vice President of Student Services and serving such notice on the student charged. This decision depends entirely on the information obtained during the investigation.
7. The student has the right to request an appeal to the disciplinary action with the Vice President of Student Services no later than seven (7) days after the service of the notice of disciplinary action. A copy of the appeal form will be mailed to you along with your notice of disciplinary action.

8. After an appeal hearing, a written decision will be mailed to the student from the Office of the President within ten days of the conclusion of the hearing.

9. At this point, the final decision for disciplinary action rests with the college president. The president may approve, reject, or modify the written decision. The decision of the college president for disciplinary action is final.

Refer to Regulation R-2442: Due Process (shared/doc/board/regulations/R-2442.pdf) for complete information regarding student standards of conduct and due process.

Contact

For additional information on student conduct, please contact the Student Conduct Officer:

Chad Funk (Associate Vice President, Student Services)
Email: funkc@arc.losrios.edu
Phone: (916) 484-8452

Photo and Video Policy

The Los Rios Community College District and its colleges take photos and video of students throughout the year. These images often include students in classrooms, study areas, athletic events, etc.

American River College reserves the right to use these photographs and/or videos as a part of its publicity and marketing efforts. Students who enroll at American River College do so with the understanding that these photographs and/or videos might include them and/or their family members and might be used in college publications, both printed and electronic, and for publicity.

Plagiarism and Cheating Policy

Academic Integrity and Responsibility

Academic integrity and responsibility mean acting honestly, conscientiously, and honorably in all academic endeavors. Students are accountable for all that they say and write. Since trust is the foundation of an intellectual community, and since student work is the basis for instructors to evaluate student performance in courses, students should not misrepresent their work nor give or receive unauthorized assistance.

Academic Dishonesty

In contrast to academic integrity and responsibility, academic dishonesty takes the form of plagiarism and/or cheating.

Plagiarism

The word plagiarism comes from the Latin word "plagiarius," meaning kidnapper. Plagiarism is generally the taking of words, sentences, organization, and ideas from another source without acknowledging that source.

Plagiarism may include:
- Submitting papers, examinations, or assignments written/completed entirely or in part by others
- Directly copying portions of another's work without enclosing the copied passage in quotation marks for written work or without citing appropriately in an oral presentation and without acknowledging the source in the appropriate scholarly convention whether the work is presented in written or oral form
- Using a unique term or concept without acknowledging the source
- Paraphrasing or summarizing a source's ideas without acknowledging the source
- Replicating a visual presentation, representation, or performance without acknowledging the source

Cheating

Cheating is similar to plagiarism in that it involves representing another's work as one's own. However, cheating often involves more overtly deceptive or fraudulent acts of academic dishonesty designed to gain credit for academic work that is not one's own.

Cheating may include:
- Giving or receiving unauthorized assistance during an examination
- Fabricating or altering a source of data in a laboratory or experiment
- Collaborating with others when collaboration is not permitted, or when the contributions of others are not made clear
• Using unauthorized materials or aids during an examination, including calculators, dictionaries, or information accessed via any electronic devices
• Acquiring, without permission, tests or other academic material belonging to a member of the college faculty or staff

Right-to-Know Program Completion

In compliance with the Student Right-to-Know and Campus Security Act of 1990, completion and transfer rates for students attending American River College can be found on the California Community College State Chancellor's Office Student Right-to-Know Rate Disclosure Website (http://srtk.cccco.edu/index.asp).

Service Animals on Campus

Students and employees with a disability* who need a service animal may use a service animal (including a service animal in training) on district and college property. Therapy animals and pets are not allowed.

*Disability must be consistent with guidelines set forth by the Americans with Disabilities Act (ADA) and the Fair Employment and Housing Act (FEHA).

Service Animal Guidelines

Service animals are subject to the following guidelines:

1. A service animal is any dog or a miniature horse that is trained to do work or perform tasks for an individual with a disability.
2. Faculty, staff or student owners of service animals that wish to bring the animal to campus, are requested, but not required, to register their service animal with the Vice President of Student Services or Vice President of Administrative Services. Registration provides a quick way to demonstrate the service animal is properly on campus.
3. If owner applies for registration, owner must provide documentation of their service animal’s current shot/vaccination records at the time of registration. Visitors should check in with the Vice President’s offices.
4. If owner applies for registration, owner must provide documentation of appropriate licenses.
5. If owner applies for registration, owner should carry proof of service animal registration when accompanied by that service animal on campus.
6. The service animal must be in good health, and free of fleas and external parasites.
7. The service animal must be on a leash at all times.
8. Owner is responsible for all cleanup of animal feces.
9. Service animals that disrupt the learning environment and the ability of others to learn may be excluded from campus.
10. Service animals that are ill, unclean, noisy, or bedraggled will not be allowed on campus.
11. Service animals that show unprovoked aggressive tendencies or are deemed potentially dangerous will not be allowed on campus.
12. Service animals are not permitted to be in the following areas: mechanical rooms/custodial closets, any room where protective gear is worn, or any room that poses a potential danger to the animal.
13. Owner will be financially responsible for any damage or cleaning costs resulting from the animal being brought on to campus. Animals that cause damage may be excluded from the campus.

Individuals who bring a service animal to campus must extend courtesy and respect to colleagues, students, and visitors in the area. Owners are required to keep service animals on a leash and should consider safety, health, and the possible fears others may have in the presence of animals.

Social Media Policy

Social Media Participation Guidelines

As an institution of higher learning, American River College – by its very nature – embraces the free and open exchange of ideas. To that end, we are committed to the community's First Amendment rights and the core values of free speech.

We believe in fostering a thriving online community. We support the various channels of social networking – Facebook, Twitter, YouTube, Instagram, and so on – as valuable tools for engaging students, staff, faculty, alumni, friends, and supporters in a constructive two-way dialogue about American River College and its mission.

At the same time, the long-term value, vibrancy, and success of any social media community depends on a shared philosophy of how to behave. It’s important that members of our community become familiar with Facebook’s Terms of Service (https://www.facebook.com/legal/terms), Twitter's Rules and Policies (https://help.twitter.com/en/rules-and-policies), YouTube's Policies (https://www.youtube.com/about/policies/#community-guidelines), Instagram’s Terms of Use (https://help.instagram.com/581066165581870), and similar support sites for social media. The emphasis for all participants – including site administrators – should always be transparency, honesty, respect, and civility.
All content, information, and views expressed on social media belong to the individuals posting the content. These views do not necessarily reflect the official policies or positions of the college, district, or Board of Trustees. We are not responsible for unanswered posts or inaccurate information posted by others.

Here are guidelines for engaging in American River College social media platforms:

- Be respectful of the rights and opinions of others. Be willing to agree to disagree and move on.
- Stay on topic. Our social media sites are established as forums for the open and honest discussion of matters and developments related to - and limited to - our mission (https://arc.losrios.edu/about-us/our-values).
- Be transparent and honest.
- Add value. Be part of the conversation but don’t take it over.
- Avoid hateful speech, personal attacks, flaming, profanity, vulgarity, pornography, nudity, and abusive language.
- Keep personal information (for example, your phone number and address) out of your posts.
- Think before you post. Almost everything you write or post to a social media site - words, pictures, video - is public or can be discovered. If you post on any of our social media sites, then you consent that what you post can be published and you waive any expectation of privacy regarding the post. What you choose to add to the conversation today will live on long after the subject matter has come and gone as a topic of conversation.
- We encourage you to post comments and "like" articles, photos, and videos you enjoy.

On our Facebook, Twitter, YouTube, and Instagram pages and other social media platforms, our goal is to post interesting, entertaining, and educational content. We welcome your comments and suggestions. We encourage conversation and dialogue, but we want to ensure a respectful online environment and invigorating conversation for the broader college community. Our page administrators review posts and comments regularly to ensure any issues or concerns are addressed in a timely manner.

We may or may not reply to comments, but if it’s provocative, fair, and insightful, chances are others will engage in the conversation.

We reserve the right to determine and remove from American River College social media sites any of the following:

- Comments, links, images, or videos that are illegal or encourage illegal activity, or are obscene, defamatory/libelous/slanderous, indecent, lewd, lascivious, sexually harassing or explicit in nature, or pose risks to the health or safety of individuals
- Comments that personally attack or threaten any person
- Comments that contain links to illegal activity
- For students, anything that would violate District policies regarding student regulations (https://losrios.edu/about-los-rios/board-of-trustees/policies-and-regulations)
- For staff and faculty, anything that would violate District policies regarding staff and faculty regulations (https://losrios.edu/about-los-rios/board-of-trustees/policies-and-regulations)
- Successive off-topic posts by one or more individuals or groups
- Repetitive posts copied and pasted or duplicated by one or more individuals or groups
- Solicitations or advertisements
- Any materials that infringe upon the intellectual property or other rights of any third party

Standards of Conduct

Code of Conduct

A student who enrolls at American River College may rightfully expect that students, faculty, and administrators will maintain an environment in which there is freedom to learn.

Student conduct must comply with federal and state laws, college rules and regulations, and Administrative Regulation R-2441: Standards of Conduct (shared/doc/board/regulations/R-2441.pdf). Students who violate such rules and regulations are subject to disciplinary action.

Disciplinary Offenses

Any student found to have committed, or to have attempted to commit, the following misconduct is subject to appropriate disciplinary action:

- Continued disruptive behavior, continued willful disobedience, habitual profanity or vulgarity, or the open and persistent defiance of the authority of, or persistent abuse of, members of the college community
- Assault, battery, or any threat of force or violence upon members of the college community
- Willful misconduct which results in injury or death to members of the college community, or which results in cutting, defacing, or other injury to any real or personal property owned by the district
- The use, sale, or possession on campus of, or presence on campus under the influence of, any controlled substance (See alcohol, drug, and smoking policies (https://arc.losrios.edu/about-us/our-values/student-rights-and-responsibilities/alcohol-drug-and-smoking-policies))
- Willful or persistent smoking in any area where smoking has been prohibited by law or district policy (See alcohol, drug, and smoking policies (https://arc.losrios.edu/about-us/our-values/student-rights-and-responsibilities/alcohol-drug-and-smoking-policies))
- Persistent, serious misconduct where other means of correction have failed to bring about proper conduct
- Violation of College rules and regulations including those concerning student organizations, the use of college facilities, or the time, place and manner of public expression and distribution of materials
• Obstruction or disruption of teaching, research, administrative disciplinary procedures or other college activities, including its community service activity, or of other authorized activities on college-controlled premises

• Theft of or non-accidental damage to property of the college or a member of the college community while on campus or at college-sponsored events

• Unauthorized entry to or use of college facilities

• Dishonesty, such as cheating, plagiarism, or furnishing false information to the college; forgery, alteration, or misuse of college documents, records, or identifications (See plagiarism and cheating policies (https://arc.losrios.edu/about-us/our-values/student-rights-and-responsibilities/plagiarism-and-cheating))

• Knowing possession or use of explosives, dangerous chemicals or deadly weapons on college property or at a college function without prior authorization of the college president or designated representative

• Use, possession, distribution or being under the influence of alcoholic beverages, narcotics or dangerous drugs on college property or at college-sponsored events (See alcohol, drug, and smoking policies (https://arc.losrios.edu/about-us/our-values/student-rights-and-responsibilities/alcohol-drug-and-smoking-policies))

• Soliciting or assisting another to do any act which would subject a student to expulsion, suspension, probation or other discipline pursuant to Regulation R-2441: Standards of Conduct (shared/doc/board/regulations/R-2441.pdf)

• Violation of any order of a college president, notice of which has been given prior to such violation, and which order is not inconsistent with any of the other provisions of this policy. This notice may be given by publication in the college newspaper, by posting on an official bulletin board designated for this purpose or by any other means reasonably calculated to inform students of its provisions.

• Attempting to commit an act that would be cause for disciplinary action identified above
Art

This degree provides a foundation in art principles and practices and is designed for those interested in transferring to a four-year college or university, and for someone interested in furthering his/her visual arts skills. Course work includes study in art history and a wide range of 2-D and 3-D studio practice courses. 2-D refers to drawing, painting, design, and photography; 3-D refers to ceramics, jewelry, and sculpture.

Degrees and Certificates Offered

A.A.-T. in Art History
A.A.-T. in Studio Art
A.A. in Art
Freelance Photography Certificate
Gallery Management Certificate
Sculpture Certificate

Associate Degrees for Transfer

A.A.-T. in Art History

The Associate in Arts in Art History for Transfer provides a clearly articulated curricular track for students who wish to transfer to a CSU campus, while also serving the diverse needs of students interested in the breadth and depth of the field of Art History. Additionally, this degree exposes students to the core principles and practices of the field in order to build a foundation for their future personal, academic, or vocational paths.

The Associate in Arts degree in Art History for Transfer provides students with a major that fulfills the general requirements of the California State University for transfer. Students with this degree will receive priority admission with junior status to the California State University system. The Associate in Arts degree in Art History Transfer (A.A.-T.) may be obtained by the completion of 60 transferable, semester units with a minimum 2.0 GPA, including (a) the major or area of emphasis described in the Required Program outlined below (earning a C or better in these courses) and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education-Breadth Requirements.

Total Units: 21

1Excluding any courses used to fulfill the degree requirements listed above.

The Associate in Arts in Art History for Transfer (AA-T) degree may be obtained by completion of 60 transferable, semester units with a minimum overall grade point average (GPA) of 2.0, including (a) a minimum grade of “C” (or “P”) for each course in the major or area of emphasis described in the Required Program, and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education-Breadth Requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

• assess and evaluate the contributions of artists throughout history.
• identify and evaluate works of art or architecture according to their appropriate style and time frame.
• analyze and critique art and architecture within the context of their functions and meanings.
• research and assess theoretical information concerning the meanings and purposes of art and architecture.
• explain the history of cultures and civilizations and how art and architecture is a reflection of that history.
Career Information

Art historians with undergraduate degrees are placed as registrars, preparators, and curatorial staff in art museums and galleries; they can also be employed as art critics in mass media publications, such as newspapers and magazines. An advanced degree allows an art historian a wider range of possible career applications, including museums directorships, curators, instructors, preservationists, researchers, and auction house personnel.

A.A.-T. in Studio Art

Completion of this degree provides a foundation in studio art methods. Program offerings include course work in art history, 2-D, and 3-D studio practices.

The Associate in Arts in Studio Art for Transfer provides students with a major that fulfills the general requirements of the California State University for transfer. Students with this degree will receive priority admission with junior status to the California State University system.

The Associate in Arts in Studio Art for Transfer (A.A.-T.) may be obtained by the completion of 60 transferable, semester units with a minimum of a 2.0 GPA, including (a) the major or area of emphasis described in the Required Program outline below (earning a C or better in these courses), and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education-Breadth Requirements.

The Associate in Arts in Studio Art for Transfer (AA-T) degree may be obtained by completion of 60 transferable, semester units with a minimum overall grade point average (GPA) of 2.0, including (a) a minimum grade of “C” (or “P”) for each course in the major or area of emphasis described in the Required Program, and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education-Breadth Requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- differentiate major historical movements and developments in the visual arts.
- compose or design works of art that utilize a combination of technique, materials, visual ideas, and experiences.
- construct and document an initial portfolio of artworks for professional presentation.
- critique artworks using correct terminology related to concepts, materials, and techniques.
- evaluate form, image, and artistic creation of visual artworks from different traditions, cultures, and civilizations.

Career Information

Individuals with four-year degrees in art may be placed in the K-12 educational field as well as in museums and galleries as registrars, preparators, and curatorial staff. Individuals may also work as fine artists, graphic artists or designers, illustrators, computer artists, and other commercial work such as freelance photographers. Advanced degrees in art may lead to careers as educators at the college or university level, art directors, art editors, curators, conservators, and restorers for museums and galleries.

Associate Degrees

A.A. in Art

This degree provides a foundation in art principles and practices and is designed for those interested in transferring to a four-year college or university, and for someone interested in furthering his/her visual arts skills. Course work includes study in art history and a wide range of 2-D and 3-D studio practice courses. 2-D refers to drawing, painting, design, and photography; 3-D refers to ceramics, jewelry, and sculpture.

Total Units: 32 - 33

The Art Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- differentiate major historical movements and developments in the visual arts.
- evaluate major trends and developments in contemporary works of art.
- compose works of art that utilize a combination of techniques, materials, visual ideas, and experiences.
- construct and document an initial portfolio of artworks for professional presentations.
- critique and analyze subject matter in the visual arts based on theory and technique.
- develop an aesthetic understanding and the ability to make value judgments within the context of images, form, and content of artistic creations.
- conceive and develop conceptual structures of art imagery within a specific technical process.
- assess aesthetic and visual traditions.

Career Information

An Associate Degree in art allows individuals to work in the educational field as well as in museums and galleries. Individuals may also work as graphic artists or designers, illustrators, computer artists, and other commercial work such as freelance photographers. Individuals could also work independently, producing works of art which are displayed in museums, galleries, and other exhibition spaces. Advanced degrees in art may lead to careers as educators, directors, curators, conservators, and restorers.

Certificates of Achievement

Freelance Photography Certificate

This certificate provides training for beginning careers in freelance photography. Topics include basic skills necessary for entry level photography positions or small studio businesses in photography.

Certificate Requirements

Course Code | Course Title | Units
--- | --- | ---
ART 101 | Lightroom and Photoshop Basics | 0.5
ART 320 | Design: Fundamentals (3) | 3
or ARTPH 340 | Alternative Process Photography (3) | 
ARTH 300 | Art Appreciation (3) | 3
or ARTH 335 | Survey of Photography (3) | 
or ARTPH 345 | Survey of Photography (3) | 
ARTPH 300 | Basic Film and Darkroom Photography (3) | 3
ARTPH 305 | Digital Photography | 3
ARTPH 310 | Intermediate Photography (3) | 
ARTPH 322 | Color Photography (3) | 
ARTPH 340 | Alternative Process Photography (3) | 
ARTPH 350 | Documentary Photography (3) | 
ARTPH 360 | Studio Lighting (3) | 
ARTPH 370 | Fashion, Wedding, and Portrait Photography (3) | 
ARTPH 376 | Photography Lab: Portfolio Development (1) | 0.5 - 4
or ARTPH 498 | Work Experience in Art Photography (0.5 - 4) | 

Total Units: 30 - 33.5

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- select appropriate digital and film camera equipment and software for various client-based shooting assignments
- utilize a variety of studio lighting techniques for fine art photography or commercial photography
- organize a workflow for storing and editing photographs
- apply design knowledge and skill in the use of photo editing on the computer
- evaluate digital and film photographs for aesthetic quality
- design and create photographic compositions using the principles of visual organization: unity, balance, harmony, variety, rhythm, pattern, proportion/scale, movement, and economy

2023-2024 Catalog
• compare and contrast historical works of art as they relate to an overall formal assessment of photography
• analyze the different photographic genres throughout history
• develop portfolios of photographs for specific clients
• develop a plan for launching a career in freelance photography
• make effective decisions, use workforce information, and manage his/her personal career plans

Career Information

Job opportunities include, but are not limited to, studio assistant, studio photographer, freelance photographer, editor, photographer, stock photographer, and photo lab manager.

Gallery Management Certificate

This certificate provides a foundation of knowledge, and experience in, the everyday working practices of art museums and galleries.

<sup>1</sup>or any other studio course from the ART, ARTNM, or ARTPH designators.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

• analyze compositional principles as they apply to three-dimensional form and space.
• create sculpture utilizing basic traditional and contemporary techniques.
• demonstrate the proper and safe use of a gas forge, the anvil, and other related metal working equipment.
• demonstrate blacksmith techniques such as punching, twisting, drawing out, and upsetting.
• utilize tools and technology such as forms, molds, crucible, melting furnace, and metal pouring equipment.
• describe the proper technique for applying patinas.
• evaluate blue print drawings as they relate to foundry casting.
• define the properties of sculptural form and space.
• demonstrate creative abilities.
• generate sculpture(s) based on a variety of source material.
• cite traditional and non-traditional metal working techniques as they apply to three-dimensional functional and non-functional art forms.
• express creativity through a process of conception, design, execution, finish, and presentation.

Certificate

Sculpture Certificate

This certificate provides training for beginning careers in metal fabrication and sculpture. Topics include the basic skills necessary for entry-level fabrication positions or small studio businesses in sculpture.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

• analyze compositional principles as they apply to three-dimensional form and space.
• create sculpture utilizing basic traditional and contemporary techniques.
• demonstrate the proper and safe use of a gas forge, the anvil, and other related metal working equipment.
• demonstrate blacksmith techniques such as punching, twisting, drawing out, and upsetting.
• utilize tools and technology such as forms, molds, crucible, melting furnace, and metal pouring equipment.
• describe the proper technique for applying patinas.
• evaluate blue print drawings as they relate to foundry casting.
• define the properties of sculptural form and space.
• demonstrate creative abilities.
• generate sculpture(s) based on a variety of source material.
• cite traditional and non-traditional metal working techniques as they apply to three-dimensional functional and non-functional art forms.
• express creativity through a process of conception, design, execution, finish, and presentation.

Art (ART) Courses

ART 101 Lightroom and Photoshop Basics

Units: 0.5
Hours: 27 hours LAB
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300.

This course provides fundamental skills in Adobe Lightroom and Photoshop that artists, gallery personnel, photographers, and fashion industry workers need to manage image and video files for print and web purposes. Topics include file import from cameras and devices, file format, file size, and file management. It also covers Photoshop editing of image files, video files, and Photoshop processing workflows. Drawing in Adobe Photoshop using brushes and layers is introduced.
ART 300 Drawing and Composition I

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Course Family: Drawing Fundamentals
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.
Transferable: CSU; UC
General Education: AA/AS Area I; CSU Area C1
C-ID: C-ID ARTS 110

This course introduces the use of drawing as a means of increasing visual awareness through the exploration of the creative process: observation, discovery, examination, interpretation, and response. Both historical and contemporary drawing practices will be explored. Students will use drawings as a means to make connections between the arts and cultural and social issues. Lectures will be used to introduce students to historical and contemporary Asian, African, European, Latin American and North American drawings and other two-dimensional art forms. The development of dynamic compositions will be studied through the various arrangements of subject matter. Students will be introduced to the principles and practices of drawing, employing a wide range of subject matter, and drawing media. This course emphasizes the ability to perceive and define both positive and negative shapes, contour, volume, space and value. It focuses on the clarity of observational skills and the ability to translate three-dimensional form and space into two-dimensional drawings. Both linear and atmospheric perspective will be studied and applied to drawings. Field trips may be required.

Cultural Impact: Discussions of the cultural and symbolic value of the elements of visual language throughout art history will be incorporated into each lesson. Examples of the symbolic value of light, composition and mark making from various cultures and time periods will be presented and discussed. These discussions will include examples of mark making techniques in expressionist drawing, Aboriginal painting, African textiles, and Islamic art. Symbolic light from various time periods such as the Italian renaissance and early American painting will be studied. Compositions will be analyzed with an emphasis of the arrangements of images and their political impact on various cultures. The politics of visual representation will be discussed using a wide array of examples from artists such as Kehinde Wiley, Njideka Akunyili Crosby, Juana Alicia, Hung Liu and Hannah Wilke.

ART 302 Drawing and Composition II

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Course Family: Drawing Fundamentals
Prerequisite: ART 300 with a grade of "C" or better
Transferable: CSU; UC
C-ID: C-ID ARTS 205

This course further develops the skills and concepts introduced in ART 300. It covers the relationships between formal elements such as line, shape, color, texture, value, perspective, and spatial relationships. It emphasizes the creative use of materials. It also includes critiques of student, historical, and contemporary works of art including works in all major genres with a conscious inclusion of artists representing Black, African American, Latinx, Native American, Asian American and Pacific Islander, and LGBTQIA+ communities. Virtual and in-person field trips may be required.

ART 304 Figure Drawing I

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Course Family: Figure Studies
Prerequisite: ART 300 with a grade of "C" or better
Transferable: CSU; UC
C-ID: C-ID ARTS 200

This course introduces and explores the human structure based on the history and traditions of the human figure in art. Skills are developed by critically analyzing, drawing, and composing the undraped figure in a representational manner from direct observation. A variety of media are introduced in the exploration of the human form. Field trips may be required.
This course introduces the visual development of characters based on archetypal patterns. Topics include backstory, personality, and physical attributes. Fundamental drawing skills such as shape, form, anatomical structure, and motion will be included. Both digital and traditional media are applied. It also covers the graphical development of characters for animation, games, comics, graphic novels, children's books, and illustrated novels. It is not open to students who have completed ARTNM 372.

**ART 320 Design: Fundamentals**

*Units: 3*

*Hours: 36 hours LEC; 54 hours LAB*

*Prerequisite: None.*

*Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; OR ESLR 340 AND ESLW 340.*

*Transferable: CSU; UC*

*C-ID: C-ID ARTS 100*

This course focuses on the fundamentals of design, establishing a foundation for intermediate and advanced art courses as well as developing a visual and verbal vocabulary essential to understanding and appreciating art and design esthetics. Design principles are applied through a series of studio projects that are derived from the study of both historical schools of art as well as contemporary theory. The elements of line, shape, form, spatial relationships, value, and color are analyzed in concert with their use by artists throughout history. Projects utilize a wide range of tools, media, and presentation techniques. This course is not open to students who have completed ARTNM 310.

**ART 323 Design: Color Theory**

*Units: 3*

*Hours: 36 hours LEC; 54 hours LAB*

*Prerequisite: ART 320 with a grade of "C" or better*

*Transferable: CSU; UC*

*C-ID: C-ID ARTS 270*

This course studies the principles, theories, and application of additive and subtractive color in two dimensions. It includes the use of color systems found in major historical and contemporary artistic styles. A portfolio of design projects in applied color systems is required. Field trips may be required.

**ART 324 Collage and Assemblage**

*Units: 3*

*Hours: 36 hours LEC; 54 hours LAB*

*Prerequisite: None.*

*Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; OR ESLR 340 AND ESLW 340.*

*Transferable: CSU; UC*

*General Education: AA/AS Area I; CSU Area C1*

This course investigates the creation of artworks using the technique of collage and assemblage (the process of assembling and adhering diverse materials and found objects onto another surface). The history of collage and assemblage and basic design theories are introduced. Development of a personal visual style is encouraged. Field trips may be required.

**ART 327 Painting I**

*Units: 3*

*Hours: 36 hours LEC; 54 hours LAB*

*Course Family: Painting*

*Prerequisite: ART 300 or 320 with a grade of "C" or better*

*Transferable: CSU; UC*

*C-ID: C-ID ARTS 210*

This course introduces basic techniques and materials of painting. It includes the survey of historical and contemporary development of painting with emphasis on perceptual and technical skills, such as, color theory, paint mixing and technique, and creative responses to materials and subject matter. Field trips may be required.

**ART 328 Painting II**

*Units: 3*

*Hours: 36 hours LEC; 54 hours LAB*

*Course Family: Painting*

*Prerequisite: ART 327 with a grade of "C" or better*

*Transferable: CSU; UC*

This course expands on the basic painting techniques and materials introduced in ART 327. It encourages the development of artistic style and general and specific criticism found in the history of painting. Field trips may be required.

**ART 329 Painting III**

*Units: 3*

*Hours: 36 hours LEC; 54 hours LAB*

*Prerequisite: ART 327 with a grade of "C" or better*

*Transferable: CSU; UC*

This course further develops the skills and concepts introduced in ART 327. Included is the survey of historical and contemporary styles in painting as this pertains to the development of individual style and self expression. Topics may include; post-modern expression, such as image and text; mixed-media; and combining varied styles and techniques within a single artwork. Field trips may be required.

**ART 330 Mural Painting**

*Units: 3*

*Hours: 36 hours LEC; 54 hours LAB*

*Prerequisite: ART 300 or 320 with a grade of "C" or better*

*Advisory: ART 327 with a grade of "C" or better*

*Transferable: CSU; UC*

This course provides a survey of mural painting as a public art form. It introduces the historical use of mural painting and examines the process of creating a mural painting by analyzing a site, researching, planning, and executing murals in public spaces, and working collaboratively with others. Field trips may be required to execute the work on location.

**ART 336 Watercolor Painting**

*Units: 3*

*Hours: 36 hours LEC; 54 hours LAB*

*Prerequisite: ART 300 or 320 with a grade of "C" or better*

*Transferable: CSU; UC*

This course introduces painting with transparent aqueous media and techniques focusing on watercolor and gouache. It emphasizes historical and contemporary development, technical skill, color relationship(s), and self-expression using aqueous media in painting. Field trips may be required.

**ART 337 Intermediate Watercolor Painting**

*Units: 3*

*Hours: 36 hours LEC; 54 hours LAB*

*Prerequisite: ART 336 with a grade of "C" or better*

*Transferable: CSU; UC*

This course continues the study of the aqueous medium in painting begun in ART 336. More complex methods, concepts, varying approaches, and techniques using the aqueous medium are developed. Personal style is emphasized. Field trips may be required.

**ART 339 Integrating Digital Media with Traditional Media I**

*Units: 3*

*Hours: 36 hours LEC; 54 hours LAB*
This course combines the materials and techniques used in both new media technology and traditional art practices. It explores a wide variety of ideas, tools, and resources. Topics include history, theory, and practice surrounding digital and traditional image generation, image manipulation, image transfer, and material exploration. The course emphasizes developing unique forms of portfolio quality projects demonstrating new approaches and methods of integrating digital media with traditional media forms.

This course is not available to students who have taken ARTNM 331.

**ART 361 Printmaking: Survey**

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Course Family:** Printmaking  
**Prerequisite:** None.  
**Transferable:** CSU; UC  
**C-ID:** C-ID ARTS 220

This course covers various printmaking techniques, including but not limited to: relief printing, (wood, linoleum, collagraph, and rubber), monotype, stencil and/or silkscreen printing, intaglio (drypoint etching), and basic pronto plate lithography. Different artists and/or visual examples are discussed each semester. Field trips may be required.

**ART 365 Printmaking II**

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Course Family:** Printmaking  
**Prerequisite:** ART 361 with a grade of "C" or better  
**Transferable:** CSU; UC

This course covers practices in various printmaking techniques. It expands on the four basic techniques taught in ART 361: relief printing, intaglio, screen printing, and lithography. It also encourages the development of a personal style and the creation of a cohesive body of work using those techniques. Field trips may be required.

**ART 370 Three Dimensional Design**

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340.  
**Transferable:** CSU; UC  
**General Education:** CSU Area C1  
**C-ID:** C-ID ARTS 101

This foundation course covers an analysis of historical and contemporary designs, primarily concerned with the visual dialogue between form and space, with focus on visual sensitivity for three-dimensional composition. Line, plane, and volume are utilized to construct 3-D forms using a variety of materials which may include, but is not limited to clay, metal, wood, fibers, mixed media, plaster, and paper. Students are responsible for providing their own materials for the course.

**ART 371 Foundry Casting for Sculpture**

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Course Family:** Sculpture  
**Prerequisite:** None.  
**Transferable:** CSU

This course introduces the techniques, metallurgy, and practice of casting bronze and aluminum for sculpture using the sand molding method. Emphasis is placed on historical examples, design, techniques, vocabulary, and safety. Patterns are utilized directly with sand to create sculptures in metal. Different artists and topics are covered each semester.

**ART 372 Sculpture**

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Course Family:** Sculpture  
**Prerequisite:** None.  
**Advisory:** ESL 325 with a grade of "C" or better; Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340  
**Transferable:** CSU; UC  
**General Education:** CSU Area C1

This is an introductory course in sculpture. It covers expressive use of form, color, and various sculptural methods, such as additive and subtractive media using clay and plaster, and constructive media like wood and steel; found objects and other materials may also be explored. This course utilizes a problem-solving format in order to develop knowledge of technical process, formal vocabulary, and individual expression. Both historical and contemporary approaches in developing form and content are included. Field trips may be required.

**ART 373 Intermediate Sculpture**

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Course Family:** Sculpture  
**Prerequisite:** ART 372 with a grade of "C" or better  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340.  
**Transferable:** CSU; UC

This is an intermediate course in the practice of the expressive use of form in three-dimensional space. It utilizes traditional additive and subtractive media, as well as constructive media, and other contemporary materials. This course utilizes a problem-solving format in order to develop knowledge of technical process, formal vocabulary, and individual expression. It examines both historical and contemporary approaches in developing form and content.

**ART 374 Sculpture Lab**

**Units:** 1 - 2  
**Hours:** 54 - 108 hours LAB  
**Prerequisite:** None.  
**Corequisite:** ART 324, 370, 371, 372, 373, or 375  
**Transferable:** CSU; UC (Credit granted only if concurrently enrolled in ART 372, 373 or 375)

This course offers laboratory experience to assist in completing complex sculpture projects. It focuses on the development of a personal creative vision furthering technical skills and complex problem solving.

**ART 375 Figure Sculpture**

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Course Family:** Figure Studies  
**Prerequisite:** None.  
**Advisory:** ART 304  
**Transferable:** CSU; UC

This course introduces figure sculpture, using the live undraped model as reference. Concepts of human anatomy are emphasized through the use of quick gestural studies and sustained sculptural projects. Field trips may be required.

**ART 376 Functional Sculpture**

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Course Family:** Sculpture  
**Prerequisite:** None.  
**Advisory:** ESL 325 with a grade of "C" or better; Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340
This course covers the hands-on basics of metal forming, design principles and materials used for sculpture, and functional art forms with emphasis on the use of the anvil and the gas forge. Topics include hand forging metal techniques, furniture and sculpture design, finishing processes, and the use of patinas.

**ART 390 Ceramics**

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Course Family:** Ceramics-Hybrid  
**Prerequisite:** None.  
**Transferable:** CSU; UC  
**General Education:** CSU Area C1

This course is a beginning ceramics class in hand building and throwing techniques. Elementary clay construction including pinch pot, coil, slab, and slump molds are covered as well as an introduction to the potter's wheel. Different methods of glazing and firing are studied. The history and theory of ceramics are examined.

**ART 391 Intermediate Ceramics**

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Course Family:** Ceramics-Hybrid  
**Prerequisite:** ART 390 with a grade of "C" or better  
**Transferable:** CSU; UC

This is an intermediate course in wheel-throwing and sculpture techniques. It explores the technical and creative processes of ceramic pottery making and sculpture including surface treatment and various firing processes. Focus is placed on an in-depth examination of contemporary ceramics. Different artists, techniques, and projects are explored each semester.

**ART 397 Alternative Firing Processes in Ceramics**

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Course Family:** Ceramics-Hybrid  
**Prerequisite:** ART 390 with a grade of "C" or better  
**Transferable:** CSU; UC

This course covers alternative firing processes in ceramics which include raku, wood, soda, saggar, sawdust, and pit firing. Ceramics is explored through hand-building and wheel-throwing techniques. Glaze formulation for the firing processes is included. Emphasis is placed on in-depth examinations of the history of kilns and firing techniques. Different firing processes are explored each semester. Field trips may be required.

**ART 398 Ceramic Murals and Tiles**

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Course Family:** Ceramics-Hybrid  
**Prerequisite:** ART 390 with a grade of "C" or better  
**Transferable:** CSU

This course introduces ceramic mural and tile methods and techniques. It explores the technical and creative process of site-specific mural and tile making including bas relief, press molds, various surface treatments, and installation methods. Focus is placed on an in-depth examination of the history of ceramic tiles and murals.

**ART 420 Film Making**

**Units:** 2  
**Hours:** 18 hours LEC; 54 hours LAB  
**Prerequisite:** None.  
**Transferable:** CSU; UC (ART 420 & 422 combined: maximum credit - one course)

**General Education:** CSU Area C1

This course involves completing a series of short, individual and/or group projects, focusing on various methods and techniques that can be used to create films/videos which are visually sophisticated and conceptually interesting. Work by contemporary and historically-significant filmmakers is also covered.

**ART 430 Art and Children**

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Prerequisite:** None.  
**Transferable:** CSU  
**General Education:** AA/AS Area I; CSU Area C1

This course introduces the use of artists' materials and techniques appropriate for teaching art to children. It includes the study of art history, including various movements (ism’s) and concepts in creating artwork. This course covers the processes of creating lesson plans, doing preparatory work for presenting art projects, and creation of drawings, paintings, and sculptures. It also covers how to identify and properly use, maintain, store, and clean commonly used art materials. Topics include proper identification, utilization, and presentation of basic art principles, and an understanding of age-specific capabilities in children. Field trips may be required.

**ART 440 Artists' Materials and Techniques**

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Course Family:** Studio Art and Practice  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; OR ESLR 340 AND ESLW 340.  
**Transferable:** CSU  
**General Education:** AA/AS Area I

This course focuses on analyzing and developing artists’ mediums and techniques. Historical information about various materials and their relationship to personal imagery and style are emphasized. The composition of pigments, their origins, and various binders are explored. The construction of various artists’ substrates and supports as well as the techniques of matting and framing art work are also covered. A supply fee may be required for this course. Field trips may be required.

**ART 442 Introduction to Art Gallery Operations**

**Units:** 2  
**Hours:** 18 hours LEC; 54 hours LAB  
**Course Family:** Gallery Management  
**Prerequisite:** Successful completion of two studio courses from ART, ARTNM, ARTPH.  
**Transferable:** CSU

This course introduces gallery operations to art students. It involves hands-on experience in curating, planning, and installing exhibitions. A portion of this course is offered in a TBA component of 16-30 hours, which may include work as a gallery attendant or gallery docent. Field trips may be required.

**ART 443 Art Gallery Operations**

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Course Family:** Gallery Management  
**Prerequisite:** ART 442 with a grade of "C" or better  
**Transferable:** CSU

This course is a continuation in art gallery operations building on the concepts of proper handling of artwork; installing art exhibits; interacting with artists, patrons, and the public; planning and curating; inventory and maintenance of artwork; and gallery and student outreach. A portion of this course is offered in a TBA component of
16-30 hours which may include work experience as a gallery attendant or docent. Field trips are required.

**ART 444 Art Gallery and Portfolio Preparation**

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Course Family:** Studio Art and Practice  
**Prerequisite:** ART 442 with a grade of "C" or better  
**Advisory:** ENGW 101 with a grade of "C" or better; Eligible for ENGRD 116 AND ENGRW 101; OR ESLR 320 AND ESLW 320.  
**Transferable:** CSU

This course offers study in both sides of the business world of art, including gaining entrance into galleries as an artist and finding, installing, and advertising professional gallery exhibitions. It emphasizes the creation of individual portfolios and portfolio management. Topics include selecting exhibitions, creating announcements, organizing receptions, and sending out press releases in addition to photographing art and preparing documents to accompany exhibitions. It also covers creating artist statements, digital portfolios properly formatted on a disk, business cards, cover letters, and resumes. Field trips are required.

**ART 445 Art Gallery Operations**

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Course Family:** Gallery Management  
**Prerequisite:** ART 443 with a grade of "C" or better  
**Transferable:** CSU

This course continues students' experiences in gallery operations. It provides additional exposure to gallery operations, including planning and installing exhibitions, techniques in maintaining a permanent art collection, introduction to conservation techniques, participation in staffing and docent activities, gallery and student outreach programs, and assistance with additional on- and off-campus exhibitions. A portion of this course is offered in a TBA component of 16-30 hours which may include work experience as a gallery attendant or docent. Field trips are required.

**ART 470 Art Lab**

**Units:** 1  
**Hours:** 54 hours LAB  
**Prerequisite:** None.  
**Corequisite:** Concurrent enrollment in ART 300, 302, 304, 305, 306, 312, 314, 317, 320, 328, 324, 327, 328, 329, 330, 336, 337, 339, 361, 440, ARTNM 320, 331, 370, OR 372.  
**Transferable:** CSU

This course offers additional lab hours to more fully develop creative vision and technical skills. It provides additional assistance in assignments and portfolio development.

**ART 494 Topics in Art**

**Units:** 0.5 - 4  
**Hours:** 6 - 48 hours LEC; 9 - 72 hours LAB  
**Prerequisite:** None.  
**Transferable:** CSU

This course is designed to offer unique, meaningful, or transient topics in art that are not included in current course offerings. Topics may include glass blowing; air brush, encaustic, fresco, or sumi painting technique; or bronze casting, for example.

**ART 495 Independent Studies in Art**

**Units:** 1 - 3  
**Hours:** 54 - 162 hours LAB  
**Prerequisite:** None.  
**Transferable:** CSU

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

**ART 498 Work Experience in Art**

**Units:** 0.5 - 4  
**Hours:** 30 - 300 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Students must be in a paid or unpaid internship, volunteer position, or job related to art with a cooperating site supervisor. Students are advised to consult with the Art Department faculty to review specific certificate and degree work experience requirements.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLW 340.  
**Transferable:** CSU  
**General Education:** AA/AS Area III(b)

This course provides students with opportunities to develop marketable skills in preparation for employment or advancement within the field of art. It is designed for students interested in work experience and/or internships in transfer-level degree occupational programs. Course content includes understanding the application of education to the workforce, completion of Title 5 required forms which document the student's progress and hours spent at the work site, and developing workplace skills and competencies.

During the semester, the student is required to complete 37.5 hours of related paid work experience, or 30 hours of related unpaid work experience for 0.5 unit. An additional 37.5 or 30 hours of related work experience is required for each additional 0.5 unit. All students are required to attend the first class meeting, a mid-semester meeting, and a final meeting. Additionally, students who have not already successfully completed a Work Experience course will be required to attend weekly orientations while returning participants may meet individually with the instructor as needed. Students may take up to 16 units total across all Work Experience course offerings. This course may be taken up to four times when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

**ART 499 Experimental Offering in Art**

**Units:** 0.5 - 4  
**Prerequisite:** None.  
**This is the experimental courses description.**

**Art Photography (ARTPH) Courses**

**ARTPH 300 Basic Film and Darkroom Photography**

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLW 340  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area I; CSU Area C1  
**C-ID:** C-ID ARTS 260

This course examines the formal and technical aspects of film photography. Topics include critiques of major movements in the history of photography and contemporary gelatin silver process artists. A problem-solving approach is utilized to explore compositional ideas. Camera operation, gelatin silver film developing, and gelatin silver printmaking are covered. Chromogenic color negative film (C-41 film)
and color reversal film (E-6 film) processing is also introduced. Digital photography file management and editing concepts are introduced through film scans. A film camera as well as darkroom and portfolio supplies are required. Virtual or in-person field trips and keynote artists' talks may be required.

**ARTPH 302 Black and White Silver Gelatin Photography Lab**

*Units: 1  
Hours: 54 hours LAB  
Course Family: Studio Art and Practice  
Prerequisite: None.  
Corequisite: ARTPH 300 or 340  
Transferable: CSU*

This course offers additional lab hours to more fully develop creative vision and technical skills in black and white silver gelatin photography. It also allows alternative process photographers additional lab hours for development of film and digital negatives. It provides additional assistance in assignments and portfolio development for ARTPH 300 and ARTPH 340.

**ARTPH 305 Digital Photography**

*Units: 3  
Hours: 36 hours LEC; 54 hours LAB  
Prerequisite: None.  
Advisory: ARTNM 302 with a grade of "C" or better; Eligible for ENGRD 310 or ENGRD 312 AND ENGR 300; OR ESLW 340.  
Transferable: CSU; UC  
General Education: AA/AS Area I*

This is a course in basic digital photography. Topics include digital camera functions, exposure systems using f-stop and shutter speed combinations, digital shooting practices, photographic composition and aesthetics, editing tools and software, and portfolio development. It also includes issues in contemporary photography and the history of photography. Digital cameras with full range of manually adjustable f-stops and shutter speeds, camera memory cards, and re-writable memory devices are required. Field trips may be required.

**ARTPH 306 Photography Lab: Digital Editing**

*Units: 1  
Hours: 54 hours LAB  
Course Family: Studio Art and Practice  
Prerequisite: None.  
Corequisite: ARTPH 305, 310, 322, or 360  
Transferable: CSU*

This course offers additional lab hours to more fully develop creative vision and technical skills in digital image editing, processing, and printing. It provides additional assistance in assignments and portfolio development in ARTPH 305, ARTPH 310, ARTPH 322, and ARTPH 360.

**ARTPH 310 Intermediate Photography**

*Units: 3  
Hours: 36 hours LEC; 54 hours LAB  
Prerequisite: ARTPH 300 or 305 with a grade of "C" or better  
Transferable: CSU*

This course covers the technical control of black and white photographic materials and equipment. Professional camera techniques and the creative aspects of photography are emphasized. A 35mm single lens reflex (SLR) or digital single lens reflex (DSLR) camera or digital camera with manual options is required. Darkroom and portfolio supplies are also required. Field trips may be required.

**ARTPH 315 Trends in Software and Social Media for Photographers**

*Units: 3  
Hours: 36 hours LEC; 54 hours LAB  
Prerequisite: ARTPH 300 or 305 with a grade of "C" or better  
Transferable: CSU*
This course provides instruction in documentary photography and photojournalism techniques and concepts. Image production and critical discussion are emphasized. A portfolio including an extensive photo essay or documentary project is required. A 35mm single lens reflex (SLR) camera or a digital camera (dSLR) with manual options as well as darkroom, digital, and portfolio supplies are required. Field trips may be required.

**ARTPH 360 Studio Lighting**

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Prerequisite:** ARTPH 300 or 305 with a grade of "C" or better  
**Transferable:** CSU; UC  

This course is a study in studio lighting techniques used in photography. Topics include lighting ratios, correct exposure using an electronic flash and metering, basic portraiture, choice of lighting equipment and modifiers, white balance adjustments, and color temperature. It also includes study of the history of studio photography. Black and white, color, and digital processes are included. A 35mm single lens reflex (SLR) or digital camera (dSLR) with manual options, lighting sync port, as well as darkroom or digital and portfolio supplies are required. Field trips may be required.

**ARTPH 361 Photography Lab: Studio Lighting**

**Units:** 1  
**Hours:** 54 hours LAB  
**Course Family:** Studio Art and Practice  
**Prerequisite:** None.  
**Corequisite:** ARTPH 360 or 370  
**Transferable:** CSU  

This course offers additional lab hours to more fully develop creative vision and technical skills in studio lighting and large format photography. It provides additional assistance in assignments and portfolio development for ARTPH 360 and ARTPH 370.

**ARTPH 370 Fashion, Wedding, and Portrait Photography**

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Prerequisite:** ARTPH 300 or 305 with a grade of "C" or better  
**Transferable:** CSU  

This course is an overview of basic fashion, wedding, and portrait photography concepts. Topics include major movements in fashion and portrait photography as well as the study of specific fashion photographers. This course also includes studio portrait lighting and styling techniques specific to fashion, wedding, and portrait photography. Wedding photojournalism is also covered. A 35mm digital camera (DSLR) with manual options is required. Field trips are required. Field trips may be required.

**ARTPH 375 Freelance Photography Careers**

**Units:** 2  
**Hours:** 36 hours LEC  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; OR ESLR 340 AND ESLW 340.  
**Transferable:** CSU  

This course covers careers in freelance photography including commercial photography, journalism, and fine art photography. It introduces the basic elements of implementing photography project plans, including necessary permits, aesthetic style choices, marketing, photography pricing, and portfolio presentations. This course also covers preparing, presenting, and implementing freelance photography career plans.

**ARTPH 376 Photography Lab: Portfolio Development**

**Units:** 1  
**Hours:** 54 - 162 hours LAB  
**Course Family:** Studio Art and Practice  
**Prerequisite:** None.  
**Corequisite:** Concurrent enrollment in ARTPH 300, ARTPH 305, ARTPH 310, ARTPH 320, ARTPH 340, ARTPH 350, ARTPH 360, ARTPH 370, ARTPH 375, or ARTPH 495  
**Transferable:** CSU; UC  

This course offers additional lab hours to more fully develop creative vision and technical skills. It provides additional assistance in assignments and portfolio development.

**ARTPH 495 Independent Studies in Art Photography**

**Units:** 1 - 3  
**Hours:** 54 - 162 hours LAB  
**Prerequisite:** None.  
**Transferable:** CSU  

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

**ARTPH 498 Work Experience in Art Photography**

**Units:** 0.5 - 4  
**Hours:** 30 - 300 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Students must be in a paid or unpaid internship, volunteer position, or job related to art photography with a cooperating site supervisor. Students are advised to consult with the Art Photography Department faculty to review specific certificate and degree work experience requirements.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; OR ESLW 340.  
**Transferable:** CSU  
**General Education:** AA/AS Area III(b)  

This course provides students with opportunities to develop marketable skills in preparation for employment or advancement within the field of art photography. It is designed for students interested in work experience and/or internships in transfer-level degree occupational programs. Course content includes understanding the application of education to the workforce, completion of Title 5 required forms which document the student's progress and hours spent at the work site, and developing workplace skills and competencies. During the semester, the student is required to complete 37.5 hours of related paid work experience, or 30 hours of related unpaid work experience for 0.5 unit. An additional 37.5 or 30 hours of related work experience is required for each additional 0.5 unit. All students are required to attend the first class meeting, a mid-semester meeting, and a final meeting. Additionally, students who have not already successfully completed a Work Experience course will be required to attend weekly orientations while returning participants may meet individually with the instructor as needed. Students may take up to 16 units total across all Work Experience course offerings. This course may be taken up to four times when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

**ARTPH 499 Experimental Offering in Art Photography**

**Units:** 0.5 - 4
Student Grievance and Class-Related Concerns

Students are provided opportunities to informally resolve problems or complaints related to their experience at American River College (ARC). In the event that informal resolution is not found, students may file a request for a formal grievance hearing. The Student Grievance Officer is available to help both students and college staff understand their rights and to advise them about the process.

Steps to Resolution

*Note: the informal process must begin within ten (10) days of the incident.*

1. Students should speak with their instructor about the concern and attempt to resolve the problem informally.
2. Students who feel as though they are unable to speak with their instructor or resolve the situation should contact the instructional division area dean.
3. If the issue is not resolved by meeting with the instructor and/or divisional dean, then the student should contact the Student Grievance Officer and initiate a formal grievance.
4. If applicable, there will be a student grievance hearing and the opportunity for a written appeal.

Filing a Formal Grievance

*There are specific timelines and date limitations to file a formal grievance.* The formal grievance process must begin within five (5) calendar days of the attempted informal resolution. File a Student Grievance Form (https://lrccd.formstack.com/forms/arc_incident_report) online.

What You Should Know About Student Grievance Procedures

- Students may not grieve grades unless they demonstrate “there is a mistake, fraud, bad faith, or incompetence” in the giving of the grade. (Education Code, section 76224(a) and Los Rios Community College District Policy 2412).
- If a student does not meet the specific grievance timelines, the grievance is deemed waived and may not be pursued further.
- The student must seek informal resolution of his or her complaint by meeting with the faculty or other staff member, and/or that individual's supervisor, within 10 calendar days of the alleged grievable act.
- If informal resolution is not achieved, the student must file a Grievance Form with the Grievance Officer within five (5) calendar days of that attempt at resolution. The process must be initiated by the student not later than 25 days after the date of the alleged grievable act.
- The college Grievance Officer will review the student's documentation and interview the student to determine whether the complaint is grievable.
- If the Grievance Officer determines that the complaint is not grievable (meaning that sufficient evidence of the alleged wrongdoing is not provided or that the action does not fall within the scope of the grievance process), then the student will receive a letter to that effect. The Grievance Officer's decision on this point is final.
- If the complaint is found to be grievable, a hearing will be scheduled. An independent Hearing Officer will be appointed.
- The decisions of the Hearing Officer can be appealed to the Chief Student Services Officer. The Chief Student Services Officer's determination is final.

Contact

For information on how to file a formal grievance, please contact the Student Grievance Officer:

Nisha Beckhorn (Dean of Student Services, Counseling and Transfer Services)
Email: andrewm2@arc.losrios.edu
Phone: (916) 484-8375

Additional Grievance Information

Issues that are not resolved at the college or district level may be presented via resources provided by the California Community Colleges Chancellor's Office. Complainants are encouraged to use the official form provided by the Chancellor's office (https://www.cccco.edu/Complaint-Process-Notice), however, that form is not required and complaints will not be considered defective or rejected if you do not use the form.

A student may file a grievance or grieve an action or decision of the district or one of its colleges when the student's status and/or rights have been adversely affected.

Grievances relating to grades are subject to Education Code Section 76224(a), which reads:
"When grades are given for any course of instruction taught in a community college district, the grade given to each student shall be the grade determined by the instructor of the course and the determination of the student's grade by the instructor, in the absence of mistake, fraud, bad faith, or incompetence, shall be final."

In addition to complaints being filed by students or employees, complaints may be initiated by other individuals or entities, such as a family member, representative, organization, or other third party wishing to file on behalf of an individual or group alleged to have suffered unlawful discrimination or harassment per Los Rios Regulation R-2423: Discrimination and Harassment Complaint Procedures (shared/doc/board/regulations/R-2423.pdf).
Art History

American River College’s Art History degree is designed to give students the foundation in art history necessary for transfer to a four-year college or university, and is also useful to those hoping to have a specialization in related fields such as art, history, archaeology, or anthropology. Coursework includes a range of survey classes in art history, as well as a choice between 2-D and 3-D fine arts electives.

The Art Department at American River College also offers students opportunities for enrichment including complimentary museum field trips, rotating exhibitions at the Kaneko Gallery on campus, and artist talks and demonstrations. Art history students who hope to pursue careers in gallery or museum work can take advantage of our related Gallery Certificate program to receive specialized training, and can apply for relevant local internships to further expand their experiences.

Associate Degree for Transfer

A.A.-T. in Art History

The Associate in Arts in Art History for Transfer provides a clearly articulated curricular track for students who wish to transfer to a CSU campus, while also serving the diverse needs of students interested in the breadth and depth of the field of Art History. Additionally, this degree exposes students to the core principles and practices of the field in order to build a foundation for their future personal, academic, or vocational paths.

The Associate in Arts degree in Art History for Transfer provides students with a major that fulfills the general requirements of the California State University for transfer. Students with this degree will receive priority admission with junior status to the California State University System. The Associate in Arts degree in Art History for Transfer (A.A.-T.) may be obtained by completion of 60 transferable, semester units with a minimum 2.0 GPA, including (a) the major or area of emphasis described in the Required Program outlined below (earning a C or better in these courses) and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education-Breadth Requirements.

Total Units: 21

1Excluding any courses used to fulfill the degree requirements listed above.

The Associate in Arts in Art History for Transfer (AA-T) degree may be obtained by completion of 60 transferable, semester units with a minimum overall grade point average (GPA) of 2.0, including (a) a minimum grade of “C” (or “P”) for each course in the major or area of emphasis described in the Required Program, and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education-Breadth Requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- assess and evaluate the contributions of artists throughout history.
- identify and evaluate works of art or architecture according to their appropriate style and time frame.
- analyze and critique art and architecture within the context of their functions and meanings.
- research and assess theoretical information concerning the meanings and purposes of art and architecture.
- explain the history of cultures and civilizations and how art and architecture is a reflection of that history.

Career Information

Art historians with undergraduate degrees are placed as registrars, preparators, and curatorial staff in art museums and galleries; they can also be employed as art critics in mass media publications, such as newspapers and magazines. An advanced degree allows an art historian a wider range of possible career applications, including museums directorships, curators, instructors, preservationists, researchers, and auction house personnel.

Art History (ARTH) Courses

**ARTH 300 Art Appreciation**

- **Units:** 3
- **Hours:** 54 hours LEC
- **Prerequisite:** None.
- **Advisory:** Eligible for ENGRD 310 or ENGRD 312, AND ENGWR 300 or ESLW 340.
- **Transferable:** CSU; UC (ARTH 300 & 480 combined: maximum credit - one course)
- **General Education:** AA/AS Area I; CSU Area C1; Cal-GETC Area 3A
- **C-ID:** C-ID ARTH 100

This course is a survey of the history and analysis of the visual arts, including drawing, painting, sculpture, architecture, and additional media. It offers a foundation for understanding art across time and in diverse cultures. Field trips to art galleries or museums may be required.

**ARTH 302 Art: Stone Age through the Middle Ages**

- **Units:** 3
- **Hours:** 54 hours LEC
- **Prerequisite:** None.
- **Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.
- **Transferable:** CSU; UC (ARTH 300 & 480 combined: maximum credit - one course)
- **General Education:** AA/AS Area I; CSU Area C1; Cal-GETC Area 3A
- **C-ID:** C-ID ARTH 110

This course is a study of the architecture, sculpture, and painting of the ancient Near East and Europe from the Stone Age through the Middle Ages. Art works of each period are discussed and related to respective cultures. Field trips and/or individual visitation to art galleries and museums may be required.

**ARTH 308 Renaissance Tradition in Art**

- **Units:** 3
- **Hours:** 54 hours LEC
- **Prerequisite:** None.
- **Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.
- **Transferable:** CSU; UC
- **General Education:** AA/AS Area I; CSU Area C1; Cal-GETC Area 3A
- **C-ID:** Part of C-ID ARTH 120

This course is a study of painting, sculpture, and architecture of European cultures from the 14th century early Renaissance to the late Baroque period. Outstanding art works of each major period are discussed, analyzed, and placed within historical context. A field trip to an art museum or art gallery may be required.

**ARTH 310 Modern Art**

- **Units:** 3
- **Hours:** 54 hours LEC
- **Prerequisite:** None.
- **Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.
- **Transferable:** CSU; UC
- **General Education:** AA/AS Area I; CSU Area C1; Cal-GETC Area 3A
- **C-ID:** C-ID ARTH 150; Part of C-ID ARTH 120

This course covers 18th, 19th, 20th and 21st century art forms including painting, sculpture, and architecture in Europe and America. It addresses styles including Rococo, Neoclassicism, Romanticism, Realism, Impressionism and Post-Impressionism, and the major movements of the 20th century. Postmodern art is also discussed. A field trip to an art museum or art gallery may be required.

**ARTH 318 History of American Art**

- **Units:** 3
- **Hours:** 54 hours LEC
- **Prerequisite:** None.
- **Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340
- **Transferable:** CSU; UC
- **General Education:** AA/AS Area I; CSU Area C1; Cal-GETC Area 3A
- **C-ID:** (effective Fall 2025); IGETC Area 3A

This course covers art in America from initial European contact to the present day. Topics include initial images of the New World made by Europeans; early art and architecture that reflects a synthesis of Native and European traditions; Colonial and early American art, architecture, and decorative arts; 19th-century portraits, landscapes, and history paintings; and regional and later modernism American art of the twentieth century. This course emphasizes the influence of European traditions as well as the history of a variety of cultures in the present day United States, the variety of styles and patrons in the country, and the way in which cultural values find expression in art, architecture, and decorative arts. An individual or group field trip to a museum or art gallery is required.

**ARTH 322 Art History of the Non-Western World**

- **Units:** 3
- **Hours:** 54 hours LEC
- **Prerequisite:** None.
- **Advisory:** Eligibility for ENGRD 310 or 312, AND ENGWR 300 or ESLW 340.
- **Transferable:** CSU; UC
- **General Education:** AA/AS Area I; AA/AS Area VI; CSU Area C1; Cal-GETC Area 3A
- **C-ID:** (effective Fall 2025); IGETC Area 3A

This is a survey of art history throughout India, Africa, the Americas, the Arctic, Australia, and Oceania. It covers the architecture, sculpture, and painting of the peoples in these parts of the world. The time period spans from the Stone Age to the 18th century. Field trips and/or individual visits to art galleries and museums are required.

**ARTH 333 Introduction to Islamic Art**

- **Units:** 3
- **Hours:** 54 hours LEC
- **Prerequisite:** None.
- **Transferable:** CSU; UC
- **General Education:** AA/AS Area I; CSU Area C1; Cal-GETC Area 3A
- **C-ID:** (effective Fall 2025); IGETC Area 3A

This course surveys the art and culture of the Middle East. It focuses on Islamic art and architecture and provides fundamental information on the formation of Islamic art, its history, and philosophy. It includes visual examples from Arabic, Persian, and Indian cultures.

**ARTH 334 International Contemporary Art**

- **Units:** 3
- **Hours:** 54 hours LEC
- **Prerequisite:** None.
- **Transferable:** UC
General Education: AA/AS Area I; CSU Area C1; Cal-GETC Area 3A (effective Fall 2025); IGETC Area 3A

This course is a worldwide survey of trends in art, including painting, sculpture, and architecture since 1980, with an emphasis on the diversity of contemporary global cultures. New art mediums, such as video, computer, street art, and performance art are highlighted. This course focuses on social and political commentary in art. A field trip to a local art exhibition may be required.

ARTH 335 Survey of Photography

Same As: ARTPH 345

Units: 3

Hours: 54 hours LEC

Prerequisite: None.

Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.

Transferable: CSU; UC

ARTH 499 Experimental Offering in Art History

Units: 0.5 - 4

Prerequisite: None.

Transferable: CSU

This is the experimental courses description.

Equal Opportunity, Equity, Discrimination, and Harassment
Art New Media

This degree emphasizes visual arts produced in a digital environment. Art New Media focuses on new technology and a strong foundation in the fundamentals of visual art. Coursework includes a wide spectrum of studies in traditional and new media fundamentals relevant to art and design.

Degrees and Certificates Offered

A.A. in Art New Media
3D Rigging Technical Director Certificate
3D Technical Director Certificate
ARTNM: 3D Animation Certificate
ARTNM: 3D Modeling and Texturing Certificate
ARTNM: Character Design Certificate
ARTNM: Commercial Illustration Certificate
ARTNM: Web Design Certificate
Art New Media: Illustration Certificate
Graphic Design: Intern Artist Certificate
Graphic Design: Junior Artist Certificate
Graphic Design: Production Artist Certificate
Technical Communications Certificate

The Art New Media Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- analyze design principles relevant to new media technology
- combine various technical skills in the field of art new media
- create visual images utilizing traditional and/or digital media
- synthesize concepts of modern art history and apply them to illustration, animation, graphic design, and web design
- conceive visual solutions for successful visual communication
- critique new media works

Career Information

Career opportunities include Graphic Designer, Character Designer, 3D Animator, Web Designer, 3D Modeler and Texture Artist, 3D Artist, Commercial Illustrator, and Print Designer.

Certificates of Achievement

3D Rigging Technical Director Certificate

This certificate offers training on the articulation of movement for 3D objects, environments, and characters. Rigging is the process of giving a character controls for movement, therein “articulating” its range of motion, or bringing the character to life. Standard rigs for vehicles, bipedal, and quadrupedal characters are created, as well as rig variations, such as cartoon rigs to maximize flexibility. In addition,
students are expected to increase efficiency of production by creating rig building tools. Also, interfacing tools are created to increase efficiency and usability of the rigs in production.

A minimum of 3 units from the following: 3

- ARTNM 431 Short Production (3)
- or WEXP 498 Work Experience in (Subject) (0.5 - 4)

Total Units: 21

Student Learning Outcomes

Upon completion of this program, the student will be able to:

• differentiate the types of deformers to achieve a specific deformation called for by animation.
• create a concise set of animation controls.
• analyze the animator's needs to provide and refine an articulation of the full range of expressions and body movement needed to support a character's acting range.
• create a portfolio quality demonstration reel of their rigs animated.
• proficiently use a programming language to solve rigging problems, create new tools, and create interfacing tools for the animator.
• proficiently use math to solve rigging problems.
• design and maintain master rigs that can be re-used as a basis for articulating similar characters, or applying existing rigs to newly created character sculptures.
• differentiate the deformation needs of realistic musculature and traditional cartoon movement.

Career Information

Students can apply their 3D rigging skills in film, game, and broadcast, as well as local industries, such as medical, legal, engineering, Web, and fine art. Students can continue their studies in 3D rigging at a four-year college or choose an entry-level position in any of the 3D animation industries.

3D Technical Director Certificate

This certificate offers a comprehensive understanding of the computer generated three-dimensional (CG 3D) production process. It is designed for self-learners, entrepreneurs, and developers of independent content or someone looking for a high level position in a 3D animation company. A broad range of topics are covered from traditional sculpting to digital rendering. In addition to technical direction, this certificate is ideal for any 3D Generalist position.

A minimum of 6 units from the following: 6

- ARTNM 421 3D Character Modeling (3)
- ARTNM 422 3D Animation (3)
- ARTNM 423 3D Texturing (3)
- ARTNM 431 Short Production (3)

Total Units: 33

3ARTNM 422 has a prerequisite of ARTNM 405

Student Learning Outcomes

Upon completion of this program, the student will be able to:

• plan a production pipeline and solve 3D production issues with a holistic understanding of 3D.
• create portfolio-quality demonstration reels with animation, modeling, texturing, and rigging.
• differentiate various 3D software strengths and weaknesses.
• apply for an entry-level 3D position calling for a 3D Technical Director or 3D Generalist.
• create digital textures and materials from observing and scanning real-world surfaces and materials.
• apply textures and materials to a computer-generated environment.

Career Information

Students can apply 3D skills in film, game, and broadcast, as well as local industries, such as medical, legal, engineering, Web, and fine art. Students can continue their studies in 3D at a four-year college or choose an entry-level position in any of the 3D animation industries.

ARTNM: 3D Animation Certificate

This certificate focuses on traditional animation principles to create believable animations. Animations created range from flying logos for broadcast television, to animated product placement, to characters used for the telling of fantastic stories. It focuses on skill sets in both the traditional arts and digital environments.

Certificate Requirements

<table>

- or ARTNM 320 Facial Expression and Anatomy (3)
- ART 317 Character Design (3)
- or ARTNM 372 Character Design (3)

A minimum of 3 units from the following: 3

- ARTNM 431 Short Production (3)
- WEXP 498 Work Experience in (Subject) (0.5 - 4)

Total Units: 18
Student Learning Outcomes

Upon completion of this program, the student will be able to:

- research and demonstrate application of the principles of animation to tell a story with meaning through movement.
- create the motions, gestures, and expressions of three-dimensional computer graphics characters and objects.
- critique animation and regularly improve upon demonstration reels.
- create high quality 3D models from live or image reference, and animate the models for use in demonstration reels.
- create a portfolio-quality 3D animation demonstration reel.
- create animation from live reference, video reference, and from hand-drawn imagery.
- create animation in various 2D and 3D software programs and apply the principles regardless of the software differences.
- block-in movements in rough animation and show for approval in a weekly review.
- finish work for approval in a timely manner.

Career Information

Students can apply 3D animation skills in film, game, and broadcast, as well as local industries, such as medical, legal, engineering, Web, and fine art, and entrepreneurial. Students can continue their studies in 3D animation at a four-year college or choose to apply their 3D modeling and texturing skills in the film, game, and broadcast industries, as well as other local industries, such as medical, legal, engineering, Web, and fine art.

ARTNM: 3D Modeling and Texturing Certificate

This certificate combines a foundation of traditional sculpture and painting with computer generated three dimensional digital modeling and painting. High polygon modeling techniques are used to create assets for any industry in need of 3D modeling and texturing. Texturing will focus primarily on the use of manipulated and painted imagery to create complex surfaces.

Total Units: 21

1. ART 302 (Drawing and Composition II) with a grade of “C” or better

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- create believable models of objects from life, photographs, or hand drawn reference.
- create accurate models of the human anatomy with a clear and clean polygon flow showing muscle, fat, skin, and bone topology.
- create believable textures from reference images.
- analyze and assess the needs of a project and determine the complexity of the models and textures to match the project.
- create clean, high polygon count, polygon meshes ready for production.
- create facial structures and shape targets preparing the character for facial animation.
- create a portfolio quality modeling and texturing demonstration reel.

Career Information

Students can continue their studies in 3D modeling and texturing at a four year college or choose to apply their 3D modeling and texturing skills in the film, game, and broadcast industries, as well as other local industries, such as medical, legal, engineering, Web, and fine art.

ARTNM: Character Design Certificate

This certificate focuses on the visual concept development of believable characters. Skills in traditional and digital illustration are applied to create characters for animation, games, comics, graphic novels, children's books, and illustrated novels.

Total Units: 21

1. ART 302 (Drawing and Composition II) with a grade of “C” or better

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- create complex 3D environments, characters, and props to be used in any production.
Career Information

Career opportunities include film, game, broadcast, and illustration industries.

**ARTNM: Commercial Illustration Certificate**

This certificate focuses on traditional visual art principles to clearly communicate the needs of a client and their target audience. It includes skill sets from both the traditional arts and digital media. Illustration skills are applied in areas of editorial, advertising, technical and book illustration, as well as 3D modeling and texturing, animation, set design, and product design.

**Certificate Requirements**

</tbody>
</table>

**Total Units:** 18

**Student Learning Outcomes**

Upon completion of this program, the student will be able to:

- create drawn and painted images using traditional and digital media
- research and develop visual content with an understanding of the client's target audience
- develop and produce visual solutions that meet the needs of a client within a deadline
- analyze and apply color schemes to communicate a message that meets the client's needs
- research modern art and illustration history, applying concepts to illustrations to effectively communicate visually within contemporary culture
- compile a portfolio that demonstrates skill with both traditional and digital media and client based concept development

**Career Information**

Career opportunities include editorial, advertising, technical and book illustration, 3D modeling and texturing, animation, set design, and product design.

**ARTNM: Web Design Certificate**

The Web Design certificate incorporates the fundamentals of visual communication with industry-standard work flow and tools to prepare creatives and talents for the web design industry. The certificate focuses on the visual language necessary for a web designer to produce compelling graphics in the web authoring environment. Students are encouraged to further their studies in interactive design by obtaining other Art New Media Certificates such as the Interactive Design Certificate, the Digital Imagery Certificate and the Video Certificate within the Art New Media department, or similar programs at a four-year college, or encouraged to choose an entry-level position in the web design industry.

**Total Units:** 24

**Student Learning Outcomes**

Upon completion of this program, the student will be able to:

- produce compelling graphics incorporating industry-standard work flow and tools
- design visually successful web pages/web sites using visual design concepts
- evaluate content needs for target audience
- assess the most effective navigation flow
- conceive and deliver visual solutions for a client within a defined time frame

**Career Information**

Web design skills are used in business, government, educational institutions, and the entertainment industry.

**Art New Media: Illustration Certificate**

This certificate focuses on using traditional visual art principles to clearly communicate the needs of a client and/or target a specific audience. It includes skill sets from both the traditional arts and digital media. Illustration skills are applied in animation, character design, 3D modeling and texturing, set design, product design, as well as areas of editorial, advertising, technical, and book illustration.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- create drawn and painted images using traditional and digital media
- research and develop visual content with an understanding of the target audience
- develop and produce visual solutions that meet the needs of a client within a deadline
- analyze and apply effective color schemes to enhance the viewer’s emotional response to the content of an illustration
- research modern art and illustration history, applying concepts to illustrations to effectively communicate visually within contemporary culture
- create a portfolio that demonstrates skill with traditional and digital media and concept development

Career Information

Career opportunities include animation, character design, 3D modeling and texturing, set design, product design, as well as areas of editorial, advertising, technical, and book illustration.

Graphic Design: Intern Artist Certificate

This certificate introduces the software and theory used by graphic designers in the design studio. It covers page layout, vector drawing, and photo manipulation basics. It also focuses on current industry trends in the digital marketplace.

Total Units: 21

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- develop digital files into one digital file.
- resolve digital production issues as they relate to industry standards.
- correlate deadline issues as they relate to production schedules.

Career Information

Students can apply their acquired skills for internship positions in graphic arts related jobs such as entry-level design positions, entry-level in-house design positions, and production artist positions. Or, with additional coursework, students can continue their studies at a qualified four-year college.

Graphic Design: Junior Artist Certificate

This certificate introduces software applications, industry-standard hardware, and the typographic/fundamental and technical skills necessary for today’s workplace. It focuses on visual communication through layout design, typography, and the dynamic relationship between image and type. It meets current marketplace demands by incorporating print/non-print media and the effect new technologies have on a changing communications field.

Total Units: 30

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- analyze and formulate visual communication concepts using graphic design principles and standards.
- evaluate the role of typography as a communication device and know how the graphic design field fits into today’s multimedia environment.
- design and produce two-dimensional media projects taking into account client needs, composition, color, and hierarchy of information.
- construct camera-ready art with industry standard graphic design software.
- evaluate problems generated by clients and execute visual concepts through research, thumbnails, roughs, design development and presentation.
- prioritize design and production deadlines for a deadline oriented industry.

Career Information

Students can apply their acquired skills in typography, software and concept development to apply for production artist or junior graphic designer positions.

Graphic Design: Production Artist Certificate

This certificate covers the process of digital production for printing and web. It focuses on the core software programs and current industry trends for digital media.

The Technical Communications Certificate prepares students for a variety of technical writing and professional communication careers. The certificate includes the theory, writing skills, design background, and computer applications knowledge needed for jobs in technical communication.

### Student Learning Outcomes

Upon completion of this program, the student will be able to:

- investigate the basics of digital software for vector- and pixel-based media
- analyze specific conditions which influence digital production decisions
- categorize raster-based images and vector-based art as they relate to print and web
- calculate resolution, color modes and file size as they relate to print and web production
- construct a series of projects which build knowledge of simple and complex production issues

### Career Information

This certificate offers an interdisciplinary program of courses in Technical Communications, Art/New Media, and Computer Information Systems to prepare students for a variety of technical writing and professional communication careers. The certificate includes the theory, writing skills, design background, and computer applications knowledge needed for jobs in technical communication.

### Art New Media (ARTNM) Courses

#### ARTNM 302 Digital Basics for Art New Media

Units: 1.5  
Hours: 18 hours LEC; 27 hours LAB  
Prerequisite: None.  
Transferable: CSU  

This course is an introduction to the digital environment for Art New Media. Topics include operating system(s), digital vocabulary, scanning, saving, and file formats. Distinctions between vector, bitmap, and page layout applications are made using Adobe Illustrator, Adobe Photoshop, and Adobe InDesign.

#### ARTNM 303 Graphic Design: Typography

Units: 3  
Hours: 36 hours LEC; 54 hours LAB  
Prerequisite: None.  
Transferable: CSU  

This course covers the art of visual communication and introduces the tools and concepts of visual thinking. It emphasizes the potential of typography as an effective communications tool. Additionally, it also covers historical overviews, portfolio development, and client presentations, paired with the terminology and visual language of design through the creation and evaluation of individual projects.

#### ARTNM 305 History of Graphic Design

Units: 3  
Hours: 54 hours LEC  
Prerequisite: None.  
Transferable: CSU; UC  

**General Education:** AA/AS Area J; CSU Area C1; Cal-GETC Area 3A (effective Fall 2025); IGETC Area 3A

This course covers the history of visual communications as developed by ancient cultures through the present with an emphasis on commercial design, illustration, typographic development, and technological invention. It includes modern graphic design movements of the 20th century through the expansive media innovations of today. This course focuses primarily on analysis of design from a range of sources and cultures, with an emphasis on Europe and some attention to Asia and northern Africa.

#### ARTNM 320 Facial Expression and Anatomy

Same As: ART 306  
Units: 3  
Hours: 36 hours LEC; 54 hours LAB  
Prerequisite: ART 300 with a grade of "C" or better  
Advisory: ART 304  
Transferable: CSU; UC

### Student Learning Outcomes

Upon completion of this program, the student will be able to:

- analyze audience information needs.
- compose concise, clearly written professional documents organized with the audiences' needs in mind.
- design print and online resources that communicate organizations' values, enhance readability, and are easy to use.
- demonstrate basic skills in the use of word processing, page design, and web design applications.
- evaluate organizations' communication goals and needs based on technical writing principles.
ARTNM 322 Beginning Digital Art

Units: 3  
Hours: 36 hours LEC; 54 hours LAB  
Prerequisite: None.  
Transferable: CSU; UC  
General Education: AA/AS Area I  
C-ID: C-ID ARTS 250

This introductory digital art course focuses on digital media processes, including software and hardware tools that facilitate creative visual and conceptual approaches to digital art making. A wide range of digital imaging techniques are explored, and time-based processes are introduced, leading to the creation of digital images, animations/videos, and mixed media objects. The course also explores artists’ uses of new technologies in contemporary art-making practices. A vocabulary of new media terms and practices is developed through discussions and critiques.

ARTNM 324 Digital Design

Units: 3  
Hours: 36 hours LEC; 54 hours LAB  
Prerequisite: None.  
Advisory: ARTNM 303; Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLR 340 AND ESLW 340; AND ART 300 OR ART 320 and ARTNM 302  
Transferable: CSU; UC (effective Fall 2024)

This course is an introduction to fundamental design principles using the basic tools of Adobe Illustrator. It applies design skills and the tools of the software application to produce individual portfolio-quality projects.

ARTNM 325 Intermediate Digital Design

Units: 3  
Hours: 36 hours LEC; 54 hours LAB  
Prerequisite: ARTNM 324 with a grade of “C” or better  
Transferable: CSU

This course is a continuation of ARTNM 324. It defines advanced elements of graphic design, composition, and gestalt visual principles as they relate to dominance, hierarchy, balance, and color. These topics are combined and applied to the tools and advanced imaging capabilities of Adobe Illustrator.

ARTNM 326 Digital Painting

Units: 3  
Hours: 36 hours LEC; 54 hours LAB  
Prerequisite: None.  
Advisory: ART 300 and ARTNM 302  
Transferable: CSU

This course introduces the fundamental principles of color, drawing, and painting using the basic tools of Corel Painter. Visual communication skills of color, drawing, and painting are applied to produce individual portfolio-quality projects.

ARTNM 328 Beginning Digital Photo Imagery

Units: 3  
Hours: 36 hours LEC; 54 hours LAB  
Prerequisite: None.  
Advisory: ART 300 and ARTNM 302  
Transferable: CSU; UC

This course is an introduction to computer-based photographic imaging with emphasis on utilizing cutting edge digital imaging tools to realize design objects. Basic operating principles of Adobe Photoshop are covered. Topics include scanning, basic photo correction, selections, layer basics, adjustment layers, basic masking and channels, typography, vector drawings, and compositing. Design fundamentals are discussed. Topics include positive and negative space relationship, unity, balance, and basic color theory. Concept development is also introduced.

ARTNM 330 Intermediate Digital Photo Imagery

Units: 3  
Hours: 36 hours LEC; 54 hours LAB  
Prerequisite: ARTNM 328 with a grade of “C” or better  
Transferable: CSU; UC

This course introduces the intermediate techniques of digital photo imagery in Adobe Photoshop. Topics include the terminology of digital photo imaging, intermediate masking, channel and curve techniques, photomontage history and techniques, intermediate black and white techniques, issues surrounding dynamic range, color correction, features of the Action and History palettes, exploration of Layer Blending Modes, printing and/or transferring images onto various different media, working with large format images, and commercial printers.

ARTNM 332 Digital Video

Units: 3  
Hours: 36 hours LEC; 54 hours LAB  
Prerequisite: None.  
Advisory: ARTNM 302  
Transferable: CSU; UC

This course applies the principles of cinematography and editing to the production of digital video. Industry standard software is employed to capture/import, edit, and produce high-end visual productions. The course includes transitions, multiple layers, alpha channels, and composite shot segments. Evaluation of multimedia projects containing video segments in terms of design aesthetics and technical competence is included. This course examines the genres of documentary, short narrative film, title sequencing, and experimental film.

ARTNM 352 Design for Publication

Units: 3  
Hours: 36 hours LEC; 54 hours LAB  
Prerequisite: None.  
Advisory: ART 320 or ARTNM 310 AND ARTNM 302  
Transferable: CSU

This course introduces the basic operating principles of digital page layout software using Adobe InDesign. Principles of typography and the development of the printed page are applied to individual portfolio-quality projects. Areas of focus include book, magazine, and newspaper design, as well as publications such as newsletters, journals, and catalogs. An overview of promotions, such as flyers, posters, and brochures is also included.

ARTNM 354 Digital Prepress

Units: 3  
Hours: 36 hours LEC; 54 hours LAB  
Prerequisite: ARTNM 352 with a grade of “C” or better  
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLW 340.  
Transferable: CSU

This course introduces digital prepress for graphic design using industry standard software, like Adobe InDesign. Areas of focus include desktop production for commercial offset printing, preparation of print-ready digital files, paper selection, and the language necessary to properly communicate with commercial printers.
ARTNM 358 College Magazine: Art Selection and Editing

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: None.
Advisory: ART 300 and ARTNM 302
Transferable: CSU

This course provides instruction in the editing of ARC's college magazine, the American River Review, for national competitions sponsored by organizations such as the Columbia Scholastic Press Association and the Associated Collegiate Press. The course focuses on the implementation of artistic elements. It provides the design staff a collaborative experience with the editorial staff taught by the English Department. It may be taken four times for credit.

ARTNM 359 College Magazine: Design and Production

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: None.
Advisory: ARTNM 302, 324, 328, 352, or 354
Transferable: CSU

This course provides instruction in the design and production of ARC's college magazine, the American River Review, for national competitions sponsored by organizations such as the Columbia Scholastic Press Association and the Associated Collegiate Press. The course focuses on the graphic design, digital production, and printing of a literary and fine art magazine as well as the publicity, marketing, fund-raising, and distribution of the magazine. It provides the design staff a collaborative experience with the editorial staff taught by the English Department. It may be taken four times for credit.

ARTNM 370 Introduction to Illustration

Same As: ART 314
Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: ART 300 with a grade of “C” or better
Transferable: CSU

This course is a survey of the history of illustration, defining areas of specialization and the illustrator’s role in visual communication. The appropriate use of materials, tools and methods is evaluated. Illustration is analyzed as a method of visual problem solving through a series of projects with varied applications. This course is not open to students who have taken ART 314.

ARTNM 372 Character Design

Same As: ART 317
Units: 3
Hours: 36 hours LEC; 54 hours LAB
Course Family: Applied Drawing
Prerequisite: ART 302 with a grade of “C” or better
Advisory: ART 304 and ARTNM 302
Transferable: CSU; UC

This course introduces the visual development of characters based on archetypal patterns. Topics include backstory, personality, and physical attributes. Fundamental drawing skills such as shape, form, anatomical structure, and motion will be included. Both digital and traditional media are applied. It also covers the graphical development of characters for animation, games, comics, graphic novels, children's books, and illustrated novels. It is not open to students who have completed ART 317.

ARTNM 373 Storyboarding

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: ART 300 with a grade of “C” or better
Advisory: ARTNM 372 with a grade of “C” or better
Transferable: CSU; UC

This course introduces the storyboarding process for a range of industries, from film and game entertainment to the industrial and medical industries. It includes creating artwork for the visual interpretation of scripts and provided concepts, as well as developing original ideas. In addition, conceptual exercises, drawing practice, and the use of cinematic rules used in the industry are covered. Topics also include scale and camera angle, character staging, composition, basic editing processes, creating animations, and story reels.

ARTNM 401 Introduction to Web Design

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: None.
Advisory: ARTNM 303, 324, and 328
Transferable: CSU

This course introduces technical and conceptual aspects of creating interactive visual media for screen-based delivery. It concentrates on designing standards-based web sites and applying standardized best practices to web design. This course introduces the basics of layout for visual communication by tightly integrating the design concepts with technical execution in a web environment. It also applies industry-standard authoring tools, and closely examines the meaning and validity of interactivity. Meaning and validity of interactivity are closely examined.

ARTNM 402 Intermediate Web Design

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: ARTNM 401 with a grade of “C” or better, or placement through the assessment process.
Transferable: CSU

This course covers production and intermediate design processes for the web with an emphasis on visual design. It employs various industry-standard software applications to create original graphics, control layout and type, process images, and publish professional web pages and/or sites. Topics include an in-depth discussion on the processes and the strategies of combining text, images, animation, video, and audio elements to create compelling visual experiences for web users.

ARTNM 404 Interactive Basics

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: None.
Advisory: ARTNM 328, ARTNM 401, or CISW 300
Transferable: CSU; UC

This course introduces the design and delivery of rich interactive content suitable for graphical experiences across personal computers, mobile devices, and screens. Topics include generating interactivity between vector-based graphics, animation, integration of digital audio, raster graphics, and digital video. Industry standard workflow from image authoring to interactive authoring is discussed in detail. Visual design principles and interface design concepts are integrated into the making of portfolio-quality projects.

ARTNM 405 Digital 2D Animation

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: None.
Advisory: ART 300 and ARTNM 302
Transferable: CSU; UC

This course introduces the design and delivery of rich interactive content suitable for graphical experiences across personal computers, mobile devices, and screens. Topics include generating interactivity between vector-based graphics, animation, integration of digital audio, raster graphics, and digital video. Industry standard workflow from image authoring to interactive authoring is discussed in detail. Visual design principles and interface design concepts are integrated into the making of portfolio-quality projects.
This course provides techniques for using the traditional principles of animation with industry-standard software. Topics include animating a bouncing ball, ball with a tail, ball with legs, full body bipedal, and a face synchronized to audio. Character animation topics include locomotion, such as walking and jumping, using the traditional principles. Technical issues, such as frame-by-frame animation (cell animation), rotoscoping, interpolated or f-curve animation, are discussed and applied. Projects will be published using Web media, such as Artstation and Youtube.

**ARTNM 406 Design for Tablets**

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Prerequisite:** None.  
**Advisory:** ARTNM 330, 352, and 402  
**Transferable:** CSU

This course introduces production and design processes of tablet-based media. Various industry standard software applications are employed to create compatible websites, digital documents, PDF presentations, and ePub creations. Topics include the processes and the strategies of combining text, images, animation, video, and audio elements to create compelling visual experiences for tablet-oriented mobile media.

**ARTNM 420 Introduction to 3D Modeling**

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Prerequisite:** None.  
**Advisory:** ART 320, ART 370, ARTNM 302, or ARTNM 370  
**Transferable:** CSU

This course introduces computer-generated three-dimensional, or CG 3D, modeling using industry standard software. The primary focus of this course is modeling using polygons, surfaces, and curves to produce quality demo reel renders of the models. Objects range from simplistic primitive shapes to sophisticated models of animals and plants. Software application tools, such as Autodesk Maya and Pixologic Zbrush, are applied to produce content for use in 3D printing, film, game, fine art, broadcast, medical and industrial animation, and more.

**ARTNM 421 3D Character Modeling**

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Prerequisite:** ARTNM 420 with a grade of “C” or better  
**Advisory:** ART 375  
**Transferable:** CSU; UC

This course is a continuation of ARTNM 420. Industry techniques and issues related to humanoid character modeling are analyzed and applied. Industry issues, such as the topology flow of human anatomy, facial blend targets, and joint correction, are developed. Clothing, hair, and accessories are added to the characters, strictly following concept designs. This course addresses representing gender, ethnic, racial, cultural, age, and ability diversity in the human form.

**ARTNM 422 3D Animation**

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Prerequisite:** ARTNM 405 with a grade of “C” or better  
**Advisory:** ART 375, DANCE 390, or TAP 300  
**Transferable:** CSU; UC

This course provides 3D animation techniques using industry standard software. It covers the traditional animation as they are applied and translated to the computer-generated 3D (CG 3D) environment, and also to characters that walk, breathe, and act according to the twelve principles of animation. Topics also include weight, thought processes, and the wave principle. Technical issues, such as walking along uneven ground, importing and blending MoCap data, and locomotion around obstacles, are addressed.

**ARTNM 423 3D Texturing**

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Prerequisite:** ARTNM 420 with a grade of “C” or better  
**Advisory:** ARTNM 328, ARTPH 300, and ARTPH 305  
**Transferable:** CSU

This course applies modeling and texturing techniques, or image mapping, to produce environments using industry standard software, such as Autodesk Maya and Substance Painter. Topics include modeling and unwrapping structures, vegetation, and detritus for environments. Also, creating a texture reference library and image preparation for repeating texture, custom alpha maps and brushes.

**ARTNM 429 3D Rigging and Rig Building**

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Prerequisite:** ARTNM 420 with a grade of “C” or better  
**Advisory:** ARTNM 421 and 422  
**Transferable:** CSU; UC

This course provides skills for the articulation of computer-generated three-dimensional, or CG 3D, objects. Projects include the creation of rigs for inanimate objects with the intent to animate, and the creation of a full body rig for bipedal and quadrupedal characters. Scripting languages and rig building tools are utilized to expedite the rigging process. 3D production issues, such as interfaces for animators, are addressed.

**ARTNM 431 3D Short Production**

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Prerequisite:** ARTNM 420 or 422 with a grade of “C” or better  
**Transferable:** CSU

This course surveys and practices the pipeline of computer generated three dimensional (CG 3D) imagery based on real world short production scenarios; productions that are three minutes or less. The essential skills needed to survive in the Sacramento Valley CG 3D markets are covered. Areas of focus include a variety of real world short production scenarios, such as court room scene reenactment, work-at-home online markets, small business CG 3D logo, as well as visualization projects in the medical, invention, architectural, and landscaping fields.

**ARTNM 450 Portfolio for Art New Media**

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Prerequisite:** Completion of 9 units from one Art New Media Certificate with a grade of “C” or better  
**Transferable:** CSU

The course provides essential skills, strategies and processes involved in organizing, selecting, writing and marketing one's creative work. Topics include file organization, file accessibility and backup, research techniques, target identification, resume building, letter of interest, portfolio construction, building resumes, interview techniques, interview body language, job research, and portfolio presentation. The portfolio can be tailored for application for jobs in the creative industry, transfer to 4-year art or graphics programs, graduate schools, gallery exhibitions, artist residencies, scholarships and artist grants.

**ARTNM 495 Independent Studies in Art New Media**

**Units:** 1 - 3  
**Hours:** 54 - 162 hours LAB  
**Prerequisite:** None.  
**Transferable:** CSU

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a
formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

**ARTNM 498 Work Experience in Art New Media**

*Units:* 0.5 - 4  
*Hours:* 30 - 300 hours LAB  
*Prerequisite:* None.  
*Enrollment Limitation:* Students must be in a paid or unpaid internship, volunteer position, or job related to art new media with a cooperating site supervisor. Students are advised to consult with the Art New Media Department faculty to review specific certificate and degree work experience requirements  
*Advisory:* Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.  
*Transferable:* CSU  
*General Education:* AA/AS Area III(b)  

This course provides students with opportunities to develop marketable skills in preparation for employment or advancement within the field of art new media. It is designed for students interested in work experience and/or internships in transfer-level degree occupational programs. Course content includes understanding the application of education to the workforce, completion of Title 5 required forms which document the student's progress and hours spent at the work site, and developing workplace skills and competencies.

During the semester, the student is required to complete 37.5 hours of related paid work experience, or 30 hours of related unpaid work experience for 0.5 unit. An additional 37.5 or 30 hours of related work experience is required for each additional 0.5 unit. All students are required to attend the first class meeting, a mid-semester meeting, and a final meeting. Additionally, students who have not already successfully completed a Work Experience course will be required to attend weekly orientations while returning participants may meet individually with the instructor as needed. Students may take up to 16 units total across all Work Experience course offerings. This course may be taken up to four times when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

**ARTNM 499 Experimental Offering in Art New Media**

*Units:* 0.5 - 4  
*Prerequisite:* None.  
*Transferable:* CSU  

This is the experimental courses description.

---

**Equal Opportunity**

**Equal Opportunity is the Law**

American River College is an equal opportunity employer/program. Auxiliary aids and services are available upon request to individuals with disabilities through Disability Services and Programs for Students (https://arc.losrios.edu/dsps).

As a recipient of federal financial assistance, it is against the law for American River College to discriminate against any individual in the US based on the following: race, color, religion, sex (including pregnancy, childbirth, and related medical conditions, sex stereotyping, transgender status, and gender identity), national origin (including limited English proficiency), age, disability, or political affiliation or belief, or, against any beneficiary of, applicant to, or participant in programs financially assisted under Title I of the Workforce Innovation and Opportunity Act, on the basis of the individual's citizenship status or participation in any WIOA Title I-financially assisted program or activity.

American River College must not discriminate in any of the following areas:

- Deciding who will be admitted, or have access, to any WIOA Title I-financially assisted program or activity  
- Providing opportunities in, or treating any person with regard to, such a program or activity  
- Making employment decisions in the administration of, or in connection with, such a program or activity

Recipients of federal financial assistance must take reasonable steps to ensure that communications with individuals are as effective as communications with others. This means that, upon request and at no cost to the individual, American River College is required to provide appropriate auxiliary aids and services to qualified individuals with disabilities.

**What to Do If You Believe You Have Experienced Discrimination**

If you think that you have been subjected to discrimination under a Workforce Innovation and Opportunity Act (WIOA) Title I financially assisted program or activity, then you may file a complaint within 180 days from the date of the alleged violation with either American River College's Equal Opportunity Officer (or the person whom the recipient has designated for this purpose) or the Civil Rights Center.

**American River College Equity Officer**

Contact Jeff Stephenson at (916) 484-8462 or stephej@arc.losrios.edu.

**Civil Rights Center** (https://www.dol.gov/agencies/oasam/centers-offices/civil-rights-center)

US Department of Labor  
200 Constitution Avenue NW, Room N-4123  
Washington, DC 20210
If you file your complaint with American River College, then you must wait either until American River College issues a written Notice of Final Action, or until 90 days have passed (whichever is sooner), before filing with the Civil Rights Center (see address above).

If American River College does not give you a written Notice of Final Action within 90 days of the day on which you filed your complaint, then you may file a complaint with Civil Rights Center before receiving that notice. However, you must file your Civil Rights Center complaint within 30 days of the 90-day deadline (in other words, within 120 days after the day on which you filed your complaint with the recipient).

If American River College does give you a written Notice of Final Action on your complaint, but you are dissatisfied with the decision or resolution, then you may file a complaint with the Civil Rights Center. You must file your Civil Rights Center complaint within 30 days of the date on which you received the Notice of Final Action.

**La Igualdad De Oportunidades Es La Ley**

Es contra la ley que este beneficiario de asistencia financiera federal discrimine de la siguiente manera: contra cualquier individuo en los Estados Unidos, sobre la base de raza, color, religión, sexo (incluyendo embarazo, parto y afecciones médicas relacionadas, estereotipos sexuales, estatus de transexuales e identidad de género), origen nacional (incluyendo la competencia limitada en inglés), edad, incapacidad, o afiliación o creencia política o contra cualquier beneficiario de, solicitante o participante en programas con asistencia financiera bajo el Título 1 del Workforce Innovation and Opportunity Act (WIOA), sobre la base del estatus de ciudadanía del individuo o la participación en cualquier programa o actividad con asistencia financiera del Título de WIOA.

El destinatario no debe discriminar en ninguna de las siguientes áreas: decidir quién será admitido, o tendrá acceso, a cualquier programa o actividad con asistencia financiera del Título 1 de WIOA; proporcionar oportunidades o el tratar a cualquier persona con respeto a dicho programa o actividad; o, tomar decisiones de empleo en la administración de, o en relación con, tal programa o actividad.

Los destinatarios de la asistencia financiera federal deben tomar medidas razonables para garantizar que las comunicaciones con las personas sean tan efectivas como las comunicaciones con los demás. Esto significa que, previa solicitud y sin costo para el individuo, se requiere que los destinatarios proporcionen ayuda y servicios auxiliares adecuados a personas calificadas con discapacidades.

**Qué Hacer Si Usted Cree Que Ha Experimentado Discriminación**

Si usted piensa que ha sido sometido a discriminación bajo una ley de Workforce Innovation and Opportunity Act I (WIOA) Título I programa o actividad asistida financieramente, usted puede presentar una queja dentro de 180 días a partir de la fecha de la presunta violación con cualquier.

El funcionario de Igualdad de Oportunidades del destinario (o la persona a la que el destinatario ha designado para este propósito):

### American River College Oficial de Equidad

Jeff Stephenson
(916) 484-8462
stephej@arc.losrios.edu

**Civil Rights Center** ([https://www.dol.gov/agencies/oasam/centers-offices/civil-rights-center](https://www.dol.gov/agencies/oasam/centers-offices/civil-rights-center))

US Department of Labor
200 Constitution Avenue NW, Room N-4123
Washington, DC 20210

Si presenta su queja con el destinatario, debe esperar hasta que el destinatario emita una Notificación por escrito de la Acción Final, o hasta que hayan pasado 90 días (lo que ocurra primero), antes de presentar su queja con el Civil Rights Center (véase la dirección anterior).

Si el destinatario le da una Notificación por escrito de la Acción Final dentro de los 90 días del día en que usted presento su queja, usted puede presentar una queja ante el Civil Rights Center antes de recibir ese aviso. Sin embargo, usted debe presentar su queja de Civil Rights Center dentro de 30 días de la fecha límite de 90 días (en otras palabras, dentro de los 120 días después del día en que usted presento su queja con el destinatario).

Si el destinatario le da una Notificación por escrito de la Acción Final sobre su queja, pero usted no está satisfecho con la decisión o resolución, usted puede presentar una queja ante el Civil Rights Center. Usted debe presentar su queja de Civil Rights Center dentro de 30 días de la fecha en que recibió Notificación de la Acción Final.

### Non-Discrimination Policy

At American River College, we value equity and diversity. That’s why we work toward just and fair inclusion into a society in which all people can participate, prosper, and reach their full potential.

No person shall be unlawfully discriminated against, harassed, or excluded from any benefits, activities, or programs because they possess of any of the following characteristics (actual or perceived):

- Ethnic group identification
- Race or color
- Sex, gender, gender identity, or gender expression
- Pregnancy or childbirth-related condition
• Sexual orientation or sexual identity
• Religion or religious creed
• Age (over forty)
• National origin or ancestry
• Physical or mental disability
• Medical condition
• Political affiliation or belief
• Military and veteran status
• Marital status

In addition, retaliation against a person who files a complaint, refers a matter for investigation, participates in an investigation, or serves as an advocate for a complainant or respondent is prohibited by district policy.

For more information or to file a complaint, contact the American River College Equity Officer at arc-equity@arc.losrios.edu.
ASL-English Interpreting

This program provides an integrated series of coursework in American Sign Language (ASL) and ASL-English interpretation to prepare students for entry-level positions. The series provides academic coursework based on a Deaf-centered framework that encourages students to embrace an empowered collaboration with Deaf people. A foundation in ASL discourse and interpretation is established through theoretical models. Emphasis is on the practical application of these models and knowledge in the areas of human relations, language skills, interpreting skills, cultural competence, service learning, and professionalism.

Total Units: 51

The ASL-English Interpreter Preparation Program Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Enrollment Eligibility

To be eligible for enrollment in the program, the student must meet the following criteria:

- At the time of application to the program, provide evidence of one of the following: a) Graduation from an accredited high school in the United States; b) General Educational Development (GED) Test; c) California High School Proficiency Examination (CHSPE); d) A high school diploma from a school outside the United States with transcripts evaluated by a National Association of Credential Evaluation Services (NACES) approved independent agency. Such cases will be evaluated on an individual basis; e) An Associate of Arts/Associate of Science degree or higher from a regionally accredited college; f) College attendance outside the United States with transcripts evaluated by a NACES approved independent agency, demonstrating A.A./A.S. degree or higher. Such cases will be evaluated on an individual basis.
- Completion of DEAF 316: American Sign Language IV or the equivalent, with a grade of “C” or better.
- Completion of DEAF 351: Introduction to American Deaf Culture or the equivalent, with a grade of “C” or better.
- A completed pre-enrollment application.

Enrollment Process

Eligible students are selected for the program according to the following steps:

- Pre-enrollment applications and deadlines for the ASL-English Interpreter Preparation Program (IPP) are available from the Humanities Division, the coordinator of the IPP or at the ARC IPP website. The Interpreter Preparation Program currently accepts students once per year for the Fall semester which begins in August. Applications for the Fall semester are available by February 15th and the deadline to submit the application is by the second Friday in April.
- Only qualified applicants who meet the educational requirements and follow the pre-enrollment procedures will be considered for the program. Meeting all these requirements does not guarantee acceptance into the program.
- Upon completion and acceptance of the pre-enrollment application, students will participate in an interview/screening process conducted by the Interpreter Preparation Program. Should the number of qualified applicants exceed available space in the program, selection will be based on the rankings from the interview/screening process.
Student Learning Outcomes

Upon completion of this program, the student will be able to:

• discuss and apply knowledge of linguistic, cross-cultural, and interpretation theories.
• demonstrate communicative competency in English and in ASL through effective communication in a variety of settings with Deaf and hearing participants of varying age, gender, and ethnicity.
• appraise, identify, and apply personal, professional, and ethical decisions in a manner consistent with theoretical models and standard professional practices that align in service with the goal of the setting and Deaf and hearing participants.
• demonstrate interpersonal competencies that foster effective communication and productive collaboration with colleagues, Deaf and hearing consumers, employers, and team members in an interpreting context.
• formulate effective interpretations both consecutively and simultaneously following a practice profession framework.
• develop an on-going professional action plan integrating interactions with Deaf related organizations, connections with interpreter employers, and the implications of certification on the provision of interpreting.

Career Information

American Sign Language-English interpreters are in demand locally, regionally, and nationally. A qualified American Sign Language-English interpreter enjoys a rewarding, highly flexible career. This field is expanding; growth in the job market is projected.

Certificate of Achievement

ASL-English Interpreter Preparation Program Certificate

This program provides an integrated series of coursework in American Sign Language (ASL) and ASL-English interpretation to prepare students for entry-level positions. The series provides academic coursework based on a Deaf-centered framework that encourages students to embrace an empowered collaboration with Deaf people. A foundation in ASL discourse and interpretation is established through theoretical models. Emphasis is on the practical application of these models and knowledge in the areas of human relations, language skills, interpreting skills, cultural competence, service learning, and professionalism.

Total Units: 51

Enrollment Eligibility

To be eligible for enrollment in the program, the student must meet the following criteria:

• Successful completion of one of the following: a) Graduation from an accredited high school in the United States; b) General Educational Development (GED) Test; c) California High School Proficiency Examination (CHSPE) prior to time of application; d) An Associate of Arts/Associate of Science degree or higher from a regionally accredited college; e) A high school diploma from a school outside the United States with transcripts evaluated by a National Association of Credential Evaluation Services (NACES) approved independent agency. Such cases will be evaluated on an individual basis; f) College attended outside the United States with transcripts evaluated by a NACES-approved independent agency, demonstrating A.A./A.S. degree or higher. Such cases will be evaluated on an individual basis.

• Completion of DEAF 316: American Sign Language IV or the equivalent, with a grade of “C” or better.

• Completion of DEAF 351: Introduction to American Deaf Culture or the equivalent, with a grade of “C” or better.

• A completed pre-enrollment application.

Enrollment Process

Eligible students are selected for the program according to the following steps:

• Pre-enrollment applications and deadlines for the ASL-English Interpreter Preparation Program (IPP) are available from the Humanities Division, the coordinator of the IPP or at the ARC IPP website. The Interpreter Preparation Program currently accepts students once per year for the Fall semester which begins in August. Applications for the Fall semester are available by February 15th and the deadline to submit the application is by the second Friday in April.

• Only qualified applicants who meet the educational requirements and follow the pre-enrollment procedures will be considered for the program. Meeting all these requirements does not guarantee acceptance into the program.

• Upon completion and acceptance of the pre-enrollment application, students will participate in an interview/screening process conducted by the Interpreter Preparation Program. Should the number of qualified applicants exceed available space in the program, selection will be based on the rankings from the interview/screening process.
Student Learning Outcomes

Upon completion of this program, the student will be able to:

- discuss and apply knowledge of linguistic, cross-cultural, and interpretation theories.
- demonstrate communicative competency in English and in ASL through effective communication in a variety of settings with Deaf and hearing participants of varying age, gender, and ethnicity.
- appraise, identify, and apply personal, professional, and ethical decisions in a manner consistent with theoretical models and standard professional practices that align in service with the goal of the setting and Deaf and hearing participants.
- demonstrate interpersonal competencies that foster effective communication and productive collaboration with colleagues, Deaf and hearing participants, employers, and team members in an interpreting context.
- formulate effective interpretations both consecutively and simultaneously following a practice profession framework.
- develop an on-going professional action plan integrating interactions with Deaf related organizations, connections with interpreter employers, and the implications of certification on the provision of interpreting.

Career Information

American Sign Language-English interpreters are in demand locally, regionally, and nationally. A qualified American Sign Language/English interpreter enjoys a rewarding, highly flexible career. This field is expanding; growth in the job market is projected.

ASL-English Interpreting (INTRP) Courses

**INTRP 300 Ethics and Professional Standards of Interpreting**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** INTRP 303 and 305 with grades of "C" or better  
**Transferable:** CSU

This course provides an exploration of personal ethics and values, the Registry of Interpreters for the Deaf (RID) Code of Professional Conduct, and interpersonal relations as they relate to professional and ethical decision-making. Emphasis is on professional integrity, managing personal and professional behaviors, and conflict resolution for interpreters.

**INTRP 301 Discourse Analysis & Translation**

**Units:** 4  
**Hours:** 68 hours LEC; 12 hours LAB  
**Prerequisite:** None  
**Enrollment Limitation:** Acceptance into the Interpreter Preparation Program through a pre-enrollment application and interview/screening process  
**Transferable:** CSU

This course provides a foundation in discourse analysis and an introduction to translation with a focus on understanding the context, intentions, and cultural norms used during various communication events. Topics include conversational signals, prosodic features, register variation, message analysis, and message transfer and translation.

**INTRP 303 Orientation to the Interpreting Profession**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None  
**Enrollment Limitation:** Acceptance into the Interpreter Preparation Program through a pre-enrollment application and interview/screening process  
**Advisory:** INTRP 309  
**Transferable:** CSU

This course provides a working knowledge of the interpreting profession. Topics include the history of the interpreting field, personal and professional demands, laws and regulations, certification and evaluation standards, extra linguistic knowledge, and the employment environment. Career-long learning, self-awareness, and intrapersonal and interpersonal skills are explored during this course.

**INTRP 305 Consecutive Interpreting from ASL**

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Prerequisite:** INTRP 301 and 303 with grades of "C" or better  
**Corequisite:** INTRP 307  
**Transferable:** CSU

This course provides basic skills in translation and consecutive interpreting from American Sign Language (ASL). Topics include a theoretical analysis of the interpreting process, application of academic and world knowledge, and an introduction to fundamental interpreting skills and techniques for professional interactions.

**INTRP 307 Consecutive Interpreting from English**

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Prerequisite:** INTRP 301 and 303 with grades of "C" or better  
**Corequisite:** INTRP 305  
**Transferable:** CSU

This course provides basic skills in translation and consecutive interpreting from English. Topics include a theoretical analysis of the interpreting process, application of academic and world knowledge, and an introduction to fundamental interpreting skills and techniques for professional interactions.

**INTRP 309 Introduction to the Interpreting Profession**

**Units:** 0.5  
**Hours:** 9 hours LEC  
**Prerequisite:** DEAF 310 with a grade of "C" or better  
**Transferable:** CSU

This course introduces general information about the field of American Sign Language (ASL)/English interpretation. Topics include regulations, certification and educational requirements, fundamental and requisite skills, the Code of Professional Conduct, and pay scale and job opportunities in the field of ASL/English interpretation. An overview of the Interpreter Preparation Program at American River College and introductory interpreting practice is incorporated. Pass/No Pass only. This course is formerly known as SILA 362 and DEAF 390.

**INTRP 310 Introduction to DeafBlind Interpreting**

**Units:** 0.5  
**Hours:** 9 hours LEC  
**Prerequisite:** INTRP 300 with a grade of "C" or better  
**Transferable:** CSU
This course provides an orientation to the DeafBlind community. Topics include modes of DeafBlind interpreting, modifications to the interpreting models, and additional responsibilities when interacting with DeafBlind individuals.

**INTRP 312 Introduction to Oral Transmission**

**Units:** 0.5  
**Hours:** 9 hours LEC  
**Prerequisite:** INTRP 301 with a grade of "C" or better  
**Transferable:** CSU

This course provides exposure to, background in, and techniques for oral transmission and interaction with oral Deaf people. Topics include speech reading skills, articulation, and support techniques.

**INTRP 314 Introduction to Multicultural Communication**

**Units:** 0.5  
**Hours:** 9 hours LEC  
**Prerequisite:** INTRP 301 with a grade of "C" or better  
**Advisory:** INTRP 305 and 307  
**Transferable:** CSU

This course focuses on the field of multicultural communication. It emphasizes cultural and linguistic diversity, and personal life experiences within the Deaf community. This course also covers enhancing racial and ethnic diversity in the interpreting profession.

**INTRP 320 Simultaneous Interpreting**

**Units:** 4  
**Hours:** 72 hours LEC  
**Prerequisite:** INTRP 305 and 307 with grades of "C" or better  
**Transferable:** CSU

This course provides intermediate knowledge and skill development in the area of simultaneous interpreting. Both American Sign Language (ASL) to English and English to ASL interpreting skills are incorporated. Topics include an application of the interpreting process, a focus on analytical and composition skills, incorporation of cultural considerations, and team interpreting.

**INTRP 325 Transliteration**

**Units:** 4  
**Hours:** 72 hours LEC  
**Prerequisite:** INTRP 320 with a grade of "C" or better  
**Transferable:** CSU

This course provides basic skills in transliteration. It incorporates both American Sign Language (ASL) to English and English to ASL literal to idiomatic transliteration skills. Topics include language and consumer assessment, contact signing forms, semantic appropriateness, syntactic considerations, prosodic features, lip shadowing, lipreading, and fingerspelling reception and production.

**INTRP 330 Introduction to Educational Interpreting, K-12**

**Units:** 1  
**Hours:** 18 hours LEC  
**Prerequisite:** INTRP 305 with a grade of "C" or better  
**Transferable:** CSU

This course introduces interpreting in the educational setting with a focus on the elementary and secondary levels of education. Emphasis is on vocabulary development and enrichment specific to educational interpreting, resource development, team building, ethical roles and responsibilities, communicating with children and marginalized populations, and power dynamics within the interpreting process.

**INTRP 332 Introduction to Educational Interpreting, Post Secondary**

**Units:** 1  
**Hours:** 18 hours LEC  
**Prerequisite:** INTRP 305 and 307 with grades of "C" or better  
**Transferable:** CSU

This course is an introduction to interpreting in post-secondary educational settings. Language development and enrichment, resource development, and team building, all specific to interpreting in a wide variety of post-secondary educational settings are examined while emphasizing the roles and responsibilities of the interpreter as an equitable practitioner. The application of an ethical framework to identify the constellation of demands and controls specific to the post-secondary educational setting will be explored.

**INTRP 334 Introduction to Medical Interpreting**

**Units:** 1  
**Hours:** 18 hours LEC  
**Prerequisite:** INTRP 305 and 307 with grades of "C" or better  
**Transferable:** CSU

This course is an introduction to interpreting in the medical setting. Logistics, role and ethics, and the impact of culture and language use are considered.

**INTRP 336 Introduction to Performing Arts Interpreting**

**Units:** 0.5  
**Hours:** 9 hours LEC  
**Prerequisite:** INTRP 305 and 307 with grades of "C" or better  
**Transferable:** CSU

This course is an introduction to interpreting in the performing arts setting. Character development, the function of space in American Sign Language (ASL), environmental considerations, team collaboration, and interpretation are considered.

**INTRP 338 Introduction to Social Services and Employment Interpreting**

**Units:** 1  
**Hours:** 18 hours LEC  
**Prerequisite:** INTRP 305 and 307 with grades of "C" or better  
**Transferable:** CSU

This course is an introduction to interpreting in social services and employment settings. Environmental considerations, interpretation, resource building, teamwork, and ethics are considered.

**INTRP 340 Introduction to Video Relay and Telephone Interpreting**

**Units:** 0.5  
**Hours:** 9 hours LEC  
**Prerequisite:** INTRP 305 and 307 with grades of "C" or better  
**Transferable:** CSU

This course is an introduction to video relay and telephone interpreting. Environmental considerations, vocabulary development, resource building, video relay and telephone processes, etiquette, and ethics are considered.

**INTRP 342 Introduction to Religious Interpreting**

**Units:** 0.5  
**Hours:** 9 hours LEC  
**Prerequisite:** INTRP 305 and 307 with grades of "C" or better
This course is an introduction to interpreting in the religious setting. Environmental considerations, vocabulary development, resource building, introductory knowledge, cultural considerations, and ethics are covered.

**INTRP 344 Introduction to Working in Deaf/Hearing Interpreter Teams**

- **Units:** 1
- **Hours:** 18 hours LEC
- **Prerequisite:** INTRP 305 and 307 with grades of "C" or better
- **Transferable:** CSU

This course is an introduction to working in Deaf/hearing interpreter teams. Topics include: language and communication variation; specialized skills of the CDI; explanation of the role, function, and process of Deaf/hearing teams; and an introduction to the conjoint work involved in the collaborative interpreting process.

**INTRP 349 Signing for Dependency Situations**

- **Units:** 0.5
- **Hours:** 9 hours LEC
- **Prerequisite:** INTRP 303 with a grade of "C" or better
- **Transferable:** CSU

This course provides an introduction to the signs used by Deaf people related to sex, alcohol, and drug abuse. It covers resources available to Deaf people including Deaf Hope, Deaf Safe, and sobriety meetings. The course also addresses methods for interpreting these resources.

**INTRP 350 Service Learning for Interpreters**

- **Units:** 2
- **Hours:** 27 hours LEC; 27 hours LAB
- **Prerequisite:** None.
- **Corequisite:** INTRP 301
- **Enrollment Limitation:** Acceptance into the ASL-English Interpreting program through a pre-enrollment application and interview/screening process.
- **Transferable:** CSU

This course provides an opportunity to collaborate to build relationships with the Deaf community. Topics include aligning goals and values of the Deaf community through a reciprocal, respectful, and mutually rewarding partnership, resulting in progress toward the Deaf community’s goals and enhanced learning of the responsibilities between future practitioners and the communities in which they work. A portion of this course may be offered in a TBA component of 27 hours which will include service learning placement. Placement sites are pre-selected by the instructor.

**INTRP 352 Mock Interpreting I**

- **Units:** 1
- **Hours:** 18 hours LEC
- **Prerequisite:** INTRP 305 and 307 with grades of "C" or better
- **Transferable:** CSU

This course provides an opportunity to interpret for live or taped presenters. Focus is on application of text analysis, assignment preparation, team interpreting, and information processing.

**INTRP 354 Mock Interpreting II**

- **Units:** 1
- **Hours:** 4.5 hours LEC; 40.5 hours LAB
- **Prerequisite:** INTRP 300 and 307 with grades of "C" or better
- **Corequisite:** INTRP 356
- **Transferable:** CSU

This course provides an opportunity to interpret for a variety of mock interpreting scenarios. The focus is on the application of text analysis, assignment preparation, information processing, the role of the educational interpreter, and giving and receiving feedback. A portion of this course may be offered in a TBA component of 40.5 hours which may include preparation for and interpreting in mock interpreting settings.

**INTRP 356 Fieldwork in Interpretation**

- **Units:** 5
- **Hours:** 54 hours LEC; 108 hours LAB
- **Prerequisite:** INTRP 300 and 320 with grades of "C" or better
- **Transferable:** CSU

This course provides an opportunity to apply academic learning to real-world practice in interpreting. It also provides an opportunity to take one of the national evaluation system examinations. A portion of this course may be offered in a TBA component of 108 hours that may include observation of interpreters and individual and team interpreting practice.

**INTRP 495 Independent Studies in Sign Language Studies - Interpreting**

- **Units:** 1 - 3
- **Hours:** 54 - 162 hours LAB
- **Prerequisite:** None.
- **Transferable:** CSU

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

**INTRP 499 Experimental Offering in Sign Language Studies - Interpreting**

- **Units:** 0.5 - 4
- **Prerequisite:** None.
- **Transferable:** CSU

This is the experimental courses description.
Sexual Harassment or Assault

Title IX (Sex Discrimination)

Title IX of the Educational Amendments of 1972 and subsequent amendments bans sex discrimination in schools, whether it be in academics or athletics. Title IX states: "No person in the United States shall, on the basis of sex, be excluded from participation in, be denied benefits of, or be subjected to discrimination under any education program or activity receiving federal financial assistance."

The underlying intent of Title IX is to eliminate any form of discrimination based on gender that may interfere with a student's physical well-being, emotional well-being, and academic performance. Colleges and universities receiving federal funds bear an affirmative duty to ensure that no student (male or female) is deprived of an educational opportunity or benefit due to such discrimination.

Gender Harassment

Sex discrimination in the form of gender harassment consists primarily of repeated comments, jokes, and innuendoes directed at persons because of their gender or sexual orientation. This behavior typically is not aimed at eliciting sexual cooperation, but, like racial harassment, it contaminates the learning and work environment and has no place at American River College.

Examples of gender harassment include the following:

- Disparaging women's intellectual abilities and potential
- Using sexist statements in classroom discussions
- Disparaging the lifestyles or behaviors of gays or lesbians

Sexual Harassment Policy

It is the desire of the Los Rios Community College District Board of Trustees to provide for all students and employees an educational environment and workplace free from sexual harassment. Sexual harassment in any situation is unacceptable and is in violation of state and federal laws and regulations. Where evidence of harassment is found, appropriate corrective action shall be taken.

Definition of Sexual Harassment

Sexual harassment means unwelcome sexual advances, requests for sexual favors, and other verbal, visual, or physical conduct of a sexual nature, made by someone from or in the work or educational setting, under any of the following conditions:

- Submission to the conduct is explicitly or implicitly made a term or a condition of an individual's employment, academic status, or progress
- Submission to, or rejection of, the conduct by the individual is used as the basis of employment or an academic decision affecting the individual
- The conduct has the purpose or effect of having a negative impact upon the individual's work or academic performance, or of creating an intimidating, hostile, or offensive work or educational environment
- Submission to, or rejection of, the conduct by the individual is used as the basis for any decision affecting the individual regarding benefits and services, honors, programs, or activities available at or through the educational institution.

Sexual harassment includes, but is not limited to:

- Making unsolicited written, verbal, visual, or physical contact with sexual overtones. Some examples are:
  - Epithets
  - Derogatory comments or slurs of a sexual nature
  - Impeding or blocking movements or any physical interference with normal work
  - Derogatory posters or cartoons
- Continuing to express sexual interest after being informed that the interest is unwelcome (reciprocal attraction is not considered sexual harassment)
- Within the work environment, engaging in explicit or implicit coercive sexual behavior which controls, influences, or affects the career, salary, and/or work environment, or any other term or condition of employment
- Within the educational environment, engaging in explicit or implicit coercive sexual behavior which controls, influences, or affects the educational opportunities, grades, and/or learning environment of the student
- Making reprisals, threats of reprisal, or implied threats of reprisal following a negative response to a sexual advance. For example, within the work environment, either suggesting or actually withholding support for an appointment, promotion, or change of assignment; suggesting a poor performance report will be prepared; or suggesting probation will be failed. Within the educational environment, either suggesting or actually withholding grades earned or deserved; suggesting a poor performance evaluation will be prepared; or suggesting a scholarship recommendation or college application will be denied
- Offering favors of educational or employment benefits, such as grades or promotions, favorable performance evaluations, favorable assignments, favorable duties or shifts, recommendations, reclassifications, and so on, in exchange for sexual favors.
Sexual Assault

Sexual assault includes, but is not limited to:

- Rape
- Forced sodomy
- Forced oral copulation
- Rape by a foreign object
- Sexual battery
- Domestic violence
- Dating violence
- Stalking
- Threat of sexual assault

Sexual assault is a form of sexual harassment and should be reported under the district’s Board Policy P-2423: Discrimination and Harassment Procedures (shared/doc/board/policies/P-2423.pdf) and Administrative Regulation R-2423: Discrimination and Harassment Procedures (shared/doc/board/regulations/R-2423.pdf).

Sexual Violence

Sexual violence means physical sexual acts perpetrated against a person's will or where a person is incapable of giving consent due to the victim's use of drugs or alcohol. An individual also may be unable to give consent due to an intellectual or other disability. Sexual violence includes, but is not limited to, rape, sexual assault, sexual battery, and sexual coercion.

Consent

Consent is the informed, affirmative, conscious decision by each participant to engage in mutually agreed-upon sexual activity.

Consent must be voluntary, and given without coercion, force, threats, or intimidation. Consent requires positive cooperation in a particular sexual act, or expression of intent to engage in that sexual act through the exercise of free will.

Consent can be withdrawn or revoked. Consent to one form of sexual activity (or one sexual act) does not constitute consent to other forms of sexual activity (or other sexual acts). Consent to sexual activity given on one occasion does not constitute consent to sexual activity on another occasion.

The fact that two people are, or were in, a dating or sexual relationship does not constitute consent to engage in sexual activity. There must always be mutual and affirmative consent to engage in sexual activity. Consent to a sexual act may be withdrawn or revoked at any time, including after penetration. The victim's request for the perpetrator to use a condom or birth control does not, in and of itself, constitute consent. Once consent is withdrawn or revoked, the sexual activity must stop immediately.

Consent cannot be given by a person who is incapacitated. For example, a person cannot give consent if she/he is unconscious or coming in and out of consciousness. A person is incapacitated if she/he lacks the physical and/or mental ability to make informed, rational judgments.

Domestic Violence

Domestic violence is a form of sexual violence and is abuse committed against someone who is a current or former spouse, current or former cohabitant, someone with whom the abuser has a child, someone with whom the abuser has or had a dating or engagement relationship, or a person similarly situated under California domestic or family violence law.

Cohabitant means two unrelated persons living together for a substantial period of time, resulting in some permanency of relationship. Factors that may determine whether persons are cohabiting include, but are not limited to:

1. Sexual relations between the parties while sharing the same living quarters
2. Sharing of income or expenses
3. Joint use or ownership of property
4. Whether the parties hold themselves out as husband and wife
5. The continuity of the relationship
6. The length of the relationship
Dating Violence

Dating violence is a form of sexual violence and is abuse committed by a person who is, or has been, in a social or dating relationship of a romantic or intimate nature with the victim. This may include someone the victim just met; for example, a person they met at a party, were introduced to through a friend, or met on a social networking website.

Stalking

Stalking means a repeated course of conduct directed at a specific person (when based on gender or sex) that places that person in reasonable fear for his/her or others' safety, or to suffer substantial emotional distress.

Policies and Regulations

- Board Policy P-2423: Discrimination and Harassment Procedures (shared/doc/board/policies/P-2423.pdf)
- Administrative Regulation R-2423: Discrimination and Harassment Procedures (shared/doc/board/regulations/R-2423.pdf)
- Administrative Regulation R-2423.5: Interim Title IX Guidelines (shared/doc/board/regulations/r-2423-5.pdf)

Resources

For issues regarding sexual harassment and assault, the following resources are available:

- Los Rios Police, (916) 558-2221
- WEAVE Confidential Advocate, (916) 568-3011 or WEAVE@losrios.edu
- Joshua Moon Johnson, Title IX Coordinator, (916) 484-8925 or johnsoj2@arc.losrios.edu
Astronomy

Astronomy is part of the general education program at American River College. The astronomy course offerings include Introduction to Astronomy, The Solar System, Stars/Galaxies/Cosmology, Introduction to Astrobiology, Honors Introduction to Astronomy, Independent Studies in Astronomy, and an Astronomy Laboratory. All courses comply with general education transfer requirements.

Degrees Offered

A.S. in General Science

Dean Joel Keebler
Department Chair Shih-Wen Young
Phone (916) 484-8107

Associate Degree

A.S. in General Science

This program provides a broad study in the fields of biological and physical sciences in preparation for transfer to a four-year program and continuation of studies in upper division science courses.

Upon completion of this program, the student will be able to:

- outline the basic concepts and fundamental theories of a natural science.
- articulate orally and/or in writing the importance of continuous examination and modification of accepted ideas as a fundamental element in the progress of science.
- discuss ethical components of scientific decision making and apply personal and social values within the process of decision making in scientific endeavors.

### Astronomy (ASTR) Courses

#### ASTR 300 Introduction to Astronomy

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None  
**Advisory:** MATH 100 or 132 with a grade of “C” or better, AND eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; or ESLW 340.  
**Transferable:** CSU; UC (ASTR 300, 310 and 320 combined: maximum credit, two courses)  
**General Education:** AA/AS Area IV; CSU Area B1; Cal-GETC Area 5A (effective Fall 2025); IGETC Area 5A

This course covers topics in modern planetary and stellar astronomy, such as dwarf, jovian, terrestrial, and extrasolar planets and the life cycle of stars, black holes, and supernovae. It also includes topics on cosmology and galactic astronomy, such as dark matter, dark energy, the Big Bang, and the expansion of the Universe.

#### ASTR 310 The Solar System

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None  
**Advisory:** MATH 100 or 132 with a grade of “C” or better, AND eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; or ESLW 340.  
**Transferable:** CSU; UC (ASTR 300, 310 and 320 combined: maximum credit, two courses)  
**General Education:** AA/AS Area IV; CSU Area B1; Cal-GETC Area 5A (effective Fall 2025); IGETC Area 5A

This course explores the nature and evolution of the solar system. Topics include the night-time sky, the history of astronomy, the tools of astronomy, and the origins and characteristics of planets, their satellites, and other components of the solar system. It emphasizes how astronomers gain and refine their knowledge of the Universe and interpret the latest results of planetary exploration.

#### ASTR 320 Stars, Galaxies, and Cosmology

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None  
**Advisory:** MATH 100 or 132 with a grade of “C” or better, AND eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; OR ESLW 340.  
**Transferable:** CSU; UC (ASTR 300, 310 and 320 combined: maximum credit, one course) ASTR 320 and 481 combined: maximum credit, one course)  
**General Education:** AA/AS Area IV; CSU Area B1; Cal-GETC Area 5A (effective Fall 2025); IGETC Area 5A

This course explores the nature and evolution of stars, galaxies, and the Universe. Topics include the history of astronomy, the tools of astronomy, star classification, stellar evolution, neutron stars, black holes, and the Big Bang. It emphasizes how astronomers gain and refine their knowledge of the Universe and interpret the latest results of space exploration.

#### ASTR 330 Introduction to Astrobiology

**Units:** 3  
**Hours:** 54 hours LEC

---

**Course Title**

- **Introduction to Biology: Biodiversity, Evolution, and Ecology (1)**
- **Principles of Zoology (1)**
- **Anatomy and Physiology (1)**
- **General Microbiology (1)**
- **General Microbiology and Public Health (1)**
- **Honors Marine Biology (1)**
- **Independent Studies in Biology (1 - 3)**
- **Biotechnology and Human Health (1)**
- **Introduction to Bioinformatics (1)**
- **Biotechnology and Society (1)**
- **Biotechnology Laboratory Methods - Molecular Techniques (1)**
- **Biotechnology Laboratory Methods - Microbial and Cell Culture Techniques (1)**
- **Experimental Offering in Biology (0.5 - 1)**
- **Introduction to Natural Resource Conservation and Policy (1)**
- **Introduction to Wildlife Biology (1)**
- **Energy and Sustainability (1)**
- **The Forest Environment (1)**
- **Fisheries Ecology and Management (1)**
- **Introduction to Rangeland Ecology and Management (1)**
- **Principles of Sustainability (1)**
- **Study Design and Field Methods (1)**
- **Principles of Ecology (1)**
- **Environmental Restoration (1)**
- **Field Studies: Birds and Plants of the High Sierra (1.5)**
- **Native Trees and Shrubs of California (1)**
- **Wildflowers of California (1)**
- **Water Resources and Conservation (1)**
- **Independent Studies in Natural Resources (1 - 3)**
- **Experimental Offering in Natural Resources (0.5 - 4)**
- **Biological Psychology (1)**
- **Biological Psychology Laboratory (1)**
- **Independent Studies in Psychology (1 - 3)**
- **Experimental Offering in Psychology (0.5 - 4)**

**Total Units:** 18

1 must be transfer-level and must include one laboratory course in a physical science and one laboratory course in a biological science.

The General Science Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education electives to meet a 60-unit total. See ARC graduation requirements.

### Student Learning Outcomes

Upon completion of this program, the student will be able to:

- evaluate new and accepted ideas about the natural universe using scientific methods.
- analyze a wide variety of natural phenomena using basic definitions and fundamental theories of biological or physical sciences.
- apply appropriate quantitative and qualitative methods to interpret and analyze pertinent data.
ASTR 400 Astronomy Laboratory

Units: 1  
Hours: 54 hours LAB  
Prerequisite: None.  
Corequisite: ASTR 300, 310, 320, or 330  
Transferable: CSU; UC  
General Education: CSU Area B3; Cal-GETC Area 5C (effective Fall 2025); IGETC Area 5C

This course provides access to telescopes, covering their practical use for visual observation of astronomical objects and the analysis of astronomical data. Topics may include constellation identification, stellar spectroscopy, solar and lunar observations, radio-physics and radio-astronomy, image analysis, measuring the properties of stars, and determining the age of the Universe. Night-time on-campus field trips may be required.

ASTR 481 Honors Astronomy: Stars, Galaxies, and Cosmology

Units: 4  
Hours: 54 hours LEC; 54 hours LAB  
Prerequisite: Placement into ENGWR 480 through the assessment process.

Types of Harassment

It is a priority of American River College to prevent and respond to all forms of harassment, including bullying, psychological harassment, racial harassment, religious harassment, stalking, mobbing, hazing, and backlash.

Bullying

Bullying is physical and psychological harassing behavior perpetrated against an individual, by one or more persons. Bullying can occur on the playground, in school, on the job, or any other place.

Workplace bullying is repeated, health-harming mistreatment of one or more persons (the targets) by one or more perpetrators that takes one or more of the following forms:

- Verbal abuse
- Offensive conduct/behaviors (including nonverbal) which are threatening, humiliating, or intimidating
- Work interference (sabotage) which prevents work from getting done

Psychological Harassment

Psychological harassment is humiliating or abusive behavior that lowers a person’s self-esteem or causes them torment. This can take the form of verbal comments, actions, or gestures. Workplace mobbing is considered psychological harassment.
Racial Harassment

Racial harassment is the targeting of an individual because of their race or ethnicity. The harassment includes words, deeds, and actions that are specifically designed to make the target feel degraded due to their race of origin or ethnicity.

Religious Harassment

Religious harassment is verbal, psychological, or physical harassment used against targets because they choose to practice a specific religion. Religious harassment can also include forced and involuntary conversions.

Stalking

Stalking is the unauthorized following and surveillance of an individual, to the extent that the person's privacy is unacceptably intruded upon and the victim fears for their safety.

Mobbing

Mobbing is violence committed directly or indirectly by a loosely affiliated and organized group of individuals to punish or even execute a person for an alleged offense without a lawful trial. The "offense" can range from a serious crime, like murder to simple expression of ethnic, cultural, or religious attitudes. The issue of the victim's actual guilt or innocence is often irrelevant to the mob, since the mob relies on contentions that are unverifiable, unsubstantiated, or completely fabricated.

Hazing

Hazing is persecuting, harassing, or torturing in a deliberate, calculated, planned manner. Typically the targeted individual is a subordinate, for example, a fraternity pledge, a first-year military cadet, or somebody who is considered "inferior" or an "outsider." Hazing is illegal in many instances.

Backlash

Backlash or "victim blaming" occurs when the harasser or other people in the environment blame the victim for the harassment or the resulting controversies and conflicts after the harassment is reported or discovered.

Backlash results when people erroneously believe the victim could stop the harassment if they really tried, or that the victim must have done something to cause the harassment. The victim may be accused of trying to get attention, covering for incompetence, or in cases where the harassment is proven, lying about the extent of the effects.

Outdated attitudes about certain kinds of harassment remain and there is often social pressure for victims to keep quiet about abuse or suffer the consequences.
Automotive Collision Technology

This degree or certificate provides an extended combination of classroom and hands-on shop experience to prepare for careers in all phases of automotive collision technology. Topics include component repairs, structural and non-structural repairs, and refinishing. It also covers various automotive systems, such as heating and air-conditioning, suspension steering, and electrical.

Degrees and Certificates Offered

A.S. in Automotive Collision Technology
Automotive Claims Estimator Certificate
Automotive Collision Technology Certificate
Automotive Collision Technology-Non-Structural Certificate
Automotive Collision Technology-Refinish Certificate
Automotive Collision Technology-Structural Certificate

Associate Degree

A.S. in Automotive Collision Technology

This degree provides an extended combination of classroom and hands-on shop experience to prepare for careers in all phases of automotive collision technology. Topics include component repairs, structural and non-structural repairs and refinishing. It also covers various automotive systems, such as heating and air-conditioning, suspension steering, and electrical.

| Total Units: |
| 50 |

The Automotive Collision Technology Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- identify and estimate automotive collision damage.
- develop a repair plan.
- repair automotive collision mechanical damage.
- repair frame/unibody automotive collision structural damage.
- repair automotive collision body damage.
- refinsh automotive collision damage.

Career Information

This program provides training and hands-on experience in high-demand skills that lead to promising careers with high wages. Students who have successfully completed this program are working as non-structural, structural, refinsh and estimating technicians. The U.S. Labor Department reports that job opportunities for auto collision specialists are excellent because of the large number of older workers who are expected to retire in the next 5 to 10 years. In addition, it points out that experienced technicians are rarely laid off and that employers prefer to hire graduates of a formal training program for which provides a foundation in the latest collision technology, including the techniques and equipment used on the job.

Certificates of Achievement

Automotive Claims Estimator Certificate

This program provides the technical and practical skills necessary to properly diagnose collision-damaged vehicles and to document the cost and time necessary to repair collision-damaged vehicles. The use of state-of-the-art, computer-generated estimating programs and video imaging are used to prepare itemized estimates on collision-damaged vehicles. The procedures to prepare itemized estimates detailing the required procedures and parts necessary to correctly repair the vehicle are also covered.

\(^*\)Keyboard proficiency test. This program can be completed in 19 units if student passes keyboarding test.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- complete an accurate repair estimate.
- apply technical skills necessary to remove, replace and align damaged cosmetic and mechanical related components.
- recognize and identify direct, indirect and secondary damage on collision-damaged vehicles.
Upon completion of this program, the student will be able to:

- create a marketing plan for a small business utilizing appropriate data.
- analyze the four functions of management: planning, organizing, directing, and evaluating.
- demonstrate methods for building effective customer service teams.
- create and edit documents using appropriate word processing functions.

Career Information

This program provides training and hands-on experience in high-demand skills that lead to promising careers with high wages. The U.S. Labor Department reports that job opportunities for auto collision specialists are excellent because of the large number of older workers who are expected to retire in the next 5 to 10 years. Student Learning Outcomes

Upon completion of this program, the student will be able to:

- identify collision damage
- repair vehicle sheet steel
- determine repair or replace based on I-CAR/ASE criteria
- repair hybrid vehicles to meet legal safely standards

Career Information

This certificate provides a combination of classroom and hands-on experience to prepare for careers in non-structural automotive collision technology. Topics include automotive collision basic, component and non-structural repairs. This certificate is intended for students who have completed the Automotive Collision Technology Certificate and need to obtain a higher skill level to obtain higher I-CAR pro levels.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- identify and estimate automotive collision damage
- repair automotive collision mechanical damage
- repair frame/unibody automotive collision structural damage
- repair automotive collision body damage
- refinish automotive collision damage

Career Information

This program provides training and hands-on experience in high-demand skills that lead to promising career with high wages. Students who have successfully completed this program are working as apprentice shop technicians. The U.S. Labor Department reports that job opportunities for auto collision specialists are excellent because of the large number of older workers who are expected to retire in the next 4 to 10 years. In addition, it points out that experienced technicians are rarely laid off and employers prefer to hire graduates of a formal training program because it provides a foundation in the latest collision technology, including the techniques and equipment used on the job.

Automotive Collision Technology-Refinish Certificate

This program provides a combination of classroom and hands-on shop experience to prepare for a career in automotive collision technology refinishing. Topics include component repair, non-structural repairs, and refinishing. This certificate is intended for students who are interested in exploring the field of Automotive Collision Refinish.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- identify color matching and solutions
- apply color blending procedures including application
- apply paint material with proficiency
- polish repaired surface to factory finish
- prepare surface in all application phases
- remove and install adjacent parts for quality refinishing preparation

Career Information

This program provides training and hands-on experience in high-demand skills that lead to promising careers with high wages. Students who have successfully completed this program are qualified candidates for refinishing apprenticeships. The U.S. Labor Department reports that job opportunities for auto collision specialists are excellent because of the large number of older workers who are expected to retire in the next 5 to 10 years. In addition, it points out that experienced technicians are rarely laid off and that employers prefer to hire graduates of a formal training program because it provides a foundation in the latest collision technology, including the techniques and equipment used on the job.

Automotive Collision Technology (ACT) Courses

ACT 100 Automotive Collision Basics

Units: 4
Hours: 54 hours LEC; 54 hours LAB
Prerequisite: None.

This course covers the basics of automotive collision repair of traditional, electric, and electric hybrid vehicles. Topics include use and disposal of hazardous materials; lighting, starting, and charging systems; and appropriate use and maintenance of tools and equipment.

ACT 110 Component Repairs

Units: 4
Hours: 54 hours LEC; 54 hours LAB
Prerequisite: ACT 100 with a grade of "C" or better

This course provides the technical principles and theories to perform limited and supervised repairs to collision-damaged vehicles. It covers how to safely remove, inspect, replace, and align bolt-on body components per vehicle manufacturers’ specifications. It covers protection of mechanical and electrical systems, removal of damaged parts, removal and reinstallation of movable glass, diagnosis of wind noise and water leaks, and techniques applicable to damaged vehicles.

ACT 120 Non-Structural Repair

Units: 4
Hours: 54 hours LEC; 54 hours LAB
Prerequisite: ACT 100 with a grade of "C" or better

This course introduces the technical principles and theories to perform limited and supervised repairs to collision-damaged vehicles. It covers the fundamentals and theory of automotive collision repair procedures including composite repairs and replacements. Foam application techniques pertaining to noise reduction and structural strength are implemented. Additionally, metal straightening theory and techniques for steel and aluminum repairs, and the decision to make repairs vs. replacement are included.

ACT 130 Structural Repair

Units: 4
Hours: 54 hours LEC; 54 hours LAB
Prerequisite: ACT 100 and 131 with grades of "C" or better

This course covers principles and theories of automotive collision repair, including component alignment, component replacement, structural panel repair or replacement, corrosion protection, and chassis/frame alignment. Sectioning and full-panel replacement techniques and procedures are covered, including welding and self-piercing rivet adhesive bonding. Required corrosion protection techniques are applied.

ACT 131 Automotive Collision Welding

Units: 4
Hours: 54 hours LEC; 54 hours LAB
**Prerequisite:** None.

This course covers the various processes of welding in automotive collision repairs using metal inert gas (MIG) and tungsten inert gas (TIG). Topics include preparation, welding, and finishing.

**ACT 140 Automotive Refinishing**

**Units:** 4  
**Hours:** 54 hours LEC; 54 hours LAB  
**Prerequisite:** ACT 100 and 120 with grades of "C" or better

This course covers the principles and theories of paint finish application, tinting, color evaluation, and color adjustments. Topics include paint application techniques, new and emerging paint technologies, color identification, and interpreting vehicle color codes. This course also addresses multiple compliances with regulations as determined by the Occupational Safety and Health Administration (OSHA), the Environmental Protection Agency (EPA), the Clean Air Act, and the Sacramento Municipal Air Quality Air Management District (SMAQMD) pertaining to Volatile Organic Compounds (VOC's).

**ACT 150 Advanced Collision Frame & Unibody**

**Units:** 4  
**Hours:** 54 hours LEC; 54 hours LAB  
**Prerequisite:** ACT 110, 120, 130, and 140 with grades of "C" or better

This course covers the principles and theories of advanced chassis design, development, and construction. Extensive bracket and frame fabrication and welding are emphasized.

**ACT 152 Advanced Collision Suspensions**

**Units:** 4  
**Hours:** 54 hours LEC; 54 hours LAB  
**Prerequisite:** ACT 110, 120, 130, and 140 with grades of "C" or better

This course covers the principles and theories of advanced suspension design, development, and construction. Topics include big brakes and air suspensions.

**ACT 154 Advanced Collision Drivetrain**

**Units:** 4  
**Hours:** 54 hours LEC; 54 hours LAB  
**Prerequisite:** ACT 110, 120, 130, and 140 with grades of "C" or better

This course covers the principles and theories of advanced engines and transmissions. Topics include engine performance tuning and transmission selection.

**ACT 156 Advanced Collision Refinish**

**Units:** 4  
**Hours:** 54 hours LEC; 54 hours LAB  
**Prerequisite:** ACT 110, 120, 130, and 140 with grades of "C" or better

This course covers the principles and theories of advanced custom show-quality automotive finishes. Topics include primers, color coats, special effects, clear coats, and polishing.

**ACT 161 Automotive Collision Software Systems, Estimating I**

**Units:** 4

**Prerequisite:** None.

This course provides the technical and practical skills necessary to properly diagnose collision-damaged vehicles and to document the cost and time necessary to repair collision-damaged vehicles. The use of state-of-the-art computer generated estimating programs and video imaging are used to prepare itemized estimates on collision-damaged vehicles. The procedures to prepare itemized estimates detailing the required procedures and parts necessary to correctly repair the vehicle are also covered.

**ACT 298 Work Experience in Collision Technology**

**Units:** 0.5 - 4  
**Hours:** 30 - 300 hours LAB  
**Prerequisite:** None.

**Enrollment Limitation:** Students must be in a paid or unpaid internship, volunteer position, or job related to the automotive collision field with a cooperating site supervisor. Students are advised to consult with the Automotive Collision Department faculty to review specific certificate and degree work experience requirements.

**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; OR ESLW 340.

**General Education:** AA/AS Area III(b)

This course provides students with opportunities to develop marketable skills in preparation for employment or advancement within the automotive collision field. It is designed for students interested in work experience and/or internships in associate degree level or certificate occupational programs. Course content includes understanding the application of education to the workforce, completion of Title 5 required forms which document the student's progress and hours spent at the work site, and developing workplace skills and competencies.

During the semester, the student is required to complete 37.5 hours of related paid work experience, or 30 hours of related unpaid work experience for 0.5 unit. An additional 37.5 or 30 hours of related work experience is required for each additional 0.5 units. All students are required to attend the first class meeting, a mid-semester meeting, and a final meeting. Additionally, students who have not already successfully completed a Work Experience course will be required to attend weekly orientations while returning participants may meet individually with the instructor as needed. Students may take up to 16 units total across all Work Experience course offerings. This course may be taken up to four times when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

**ACT 299 Experimental Offering in Automotive Collision Technology**

**Units:** 0.5 - 4  
**Hours:** 72 hours LEC  
**Prerequisite:** None.

This course presents ten integral and fundamental areas of knowledge and skill required for an I-CAR Certified technician in the automotive collision repair industry. It also prepares students to be eligible for the following I-CAR industry certifications: An overview of the collision repair process; An overview of personal safety; Vehicle construction materials; Vehicle parts terminology (parts 1 and 2); Safety systems; Tools, equipment and attachment methods (parts 1 and 2); Industry repair terms; Mechanical systems terminology (parts 1 and 2); Mechanical repair terms and vehicle protection; Refinishing and corrosion protection (parts 1 and 2); Resume building and professionalism in the collision industry. (Taking the I-CAR Certifications tests requires I-CAR membership, which costs $50.00, and is optional in this course).
Discrimination and Harassment Complaint Procedures

How to File a Complaint

To file a complaint, fill out a Discrimination Complaint Form (lrccd/shared/doc/legal/discrimination-complaint-form.pdf) and submit it to your equity officer. This form is not required and a complaint will not be rejected based on failure to use the form.

For more information or to file a complaint, contact the American River College Equity Officer at arc-equity@arc.losrios.edu.

Complaint Resolution

If it is determined that misconduct occurred, then American River College will take immediate steps to halt misconduct and remedy any effects of that misconduct.

An equity officer will hold an informal conference if the complainant wants to try and resolve the complaint informally. The equity officer will provide information about applicable laws and rules. If an informal resolution is not reached or if the complainant disagrees with the recommendation made, then the complainant may engage in a formal resolution process.

Regulations

- Administrative Regulation R-2423: Discrimination and Harassment Complaint Procedures (shared/doc/board/regulations/R-2423.pdf)
- Administrative Regulation R-2423.5: Interim Title IX Guidelines (shared/doc/board/regulations/r-2423-5.pdf)
Automotive Technology

The automotive technology program is a combination of classroom and hands-on shop experiences that prepare students for careers in all phases of automotive service and repair on all types of cars. Students are trained on the use of workshop manuals in traditional and computerized formats, hand held meters and scanners, and special shop tools including power and hand tools.

Highlights include:

• NATEF certified in: brakes, electrical/electronic systems, engine performance, suspension and steering, automatic transmission/transaxle, engine repair, heating and air conditioning, manual drive trains and axles.
• ASE certified instructors and programs.
• Students may begin 5-week courses 3 times during the semester.
• 5-week courses allow completion of some certificate programs in one semester.
• Small class size ensures individual attention and access to specialized equipment.
• Preparation for ASE and State Smog Certification (Emissions Control) exams.

Degrees and Certificates Offered

A.S. in Automotive Analysis
A.S. in Automotive Component Service Technician
A.S. in Automotive Technology
Air Conditioning Service Certificate
Automotive Analysis Certificate
Automotive Component Service Technician Certificate
Automotive Emissions Inspection and Repair Technician Certificate
Automotive Technology Certificate
Extreme Tuner Certificate
Green Vehicle Technology Certificate
Parts and Service Certificate
Small Engines Certificate
Snap-On™ Certification Certificate
Transmission Service Certificate
Undercar Service Certificate
Automotive Brakes Certificate
Automotive Suspension and Steering Certificate

Associate Degrees

A.S. in Automotive Analysis

This program prepares students for entry-level employment as smog and driveability service technicians. It also prepares students for Automotive Service Excellence (ASE) certification in Engine Repair A1, Automatic Transmissions/Transaxles A2, Electrical A6, Engine Performance A8, and Advanced Engine Performance L1. This program also fulfills the Bureau of Automotive Repair (BAR) requirements for California State Smog Check Inspector and California State Smog Check Repair Technician test candidates.

The Automotive Analysis Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

• identify and implement safety procedures involved in the diagnosis, service, and repair of all major automobile and light truck systems.
• describe the function, operation, and characteristics of all major components in the following automotive systems: engines, automatic transmissions, electrical, air conditioning, emission control and computerized engine controls.
• identify and follow manufacturer's standards for proper automobile diagnosis and repair.
• operate hand and power tools necessary for automobile and light truck repair.
• operate diagnostic equipment and interpret test results.
• analyze, diagnose, and repair automotive engines, automatic transmissions, electrical systems, fuel delivery systems, ignition systems, emissions control systems, and computerized engine controls.
• operate a variety of aftermarket and factory scan tools.

Career Information

Automotive Technician Smog Check Technician

A.S. in Automotive Component Service Technician

This degree prepares the student for employment repairing various automobile components including those requiring computer technology.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

• apply algebraic and mathematical concepts essential to advancement in the automotive industry.
• operate equipment and tools safely.
• evaluate, adjust, test, and diagnose components/system malfunctions.
• diagnose, assess, and repair manual and automatic transmissions and transaxles.
• locate, download, and analyze technical manuals from the Internet, digital, and text sources.
• analyze, diagnose, and repair automotive electrical and electronic systems to ASE performance level.
• diagnose, troubleshoot, and repair basic air conditioning (AC) systems.
• diagnose, disassemble, inspect, clean, and reassemble components of the steering and suspension system.
• analyze, diagnose, and repair engines to ASE performance levels.
• analyze and repair fuel injection systems to ASE standards.
• diagnose engine emission control systems to ASE standards.
• prepare for the State Smog Check Inspector and California State Smog Check Repair Technician tests.

Career Information

Employment as a technician, shop foreman, service manager for new car dealers, automotive repair shops, and fleet operators.

A.S. in Automotive Technology

This program prepares students for entry-level positions in the automotive industry with emphasis on engine management systems, emission controls, and complete automotive systems diagnosis and repair. Upon completion of this program, the student will be able to:

- identify and implement safety procedures involved in the service and repair of automotive components.
- describe the function, operation and characteristics of each component in automotive HVAC systems.
- operate diagnostic equipment and interpret results from the equipment.
- diagnose automotive HVAC systems including manual, semi-automatic, and automatic.
- repair automotive HVAC systems including manual, semi-automatic, and automatic.
- diagnose engine cooling systems.
- repair engine cooling systems.
- follow Federal Environmental Protection Agency (EPA) guidelines for the handling and use of refrigerants.

AT 332 Engine Performance & Electronic Engine Controls 6
AT 333 California State Smog Check Inspector Training 6
AT 334 BAR Specified Diagnostic and Repair Training 4

Total Units: 37

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- operate emission analyzers and tools safely.
- evaluate, adjust, test, and diagnose components/system malfunctions.
- research, download, and analyze technical manuals from the Internet, digital, and text sources.
- inspect, diagnose, and repair automotive electrical and electronic systems at Automotive Service Excellence (ASE) performance level.
- inspect, diagnose, and repair engines to ASE performance levels.
- inspect, diagnose, and repair fuel injection systems to ASE and BAR standards.
- diagnose engine emission systems to ASE and Bureau of Automotive Repair (BAR) standards.
- prepare for state smog inspector and repair technician certifications.

Career Information

California State Smog Inspector and California State Smog Repair Technician.

Automotive Technology Certificate

This program prepares students for entry-level positions in the automotive industry with emphasis on engine management systems, emission controls, and complete automotive systems diagnosis and repair. It prepares students for all nine Automotive Service Excellence (ASE) certifications including Advanced Engine Performance (L-1). This program also fulfills the Bureau of Automotive Repair (BAR) requirements for California State Smog Check Inspector and California State Smog Check Repair Technician test candidates.

- diagnose, disassemble, inspect, clean, and reassemble all components of the steering and suspension system.
- diagnose and repair engines to ASE performance levels.
- diagnose engine emission systems to ASE standards.
- prepare for the State Smog Check Inspector and California State Smog Check Repair Technician tests.

Extreme Tuner Certificate

This program covers advanced applications of emissions related principles including fuel control and efficiency management of modern automobiles. Topics include brakes, repair of electrical systems, suspension, steering, and engine repairs.

Certificate Requirements

Course Code Course Title Units
AT 110 Automotive Brakes 3

2023-2024 Catalog
Automotive Technology

Student Learning Outcomes
Upon completion of this program, the student will be able to:

- evaluate vehicle horsepower safely and effectively by use of diagnostic equipment.
- analyze and demonstrate safe operating practices both in the shop and track environment with stock and modified vehicles.
- validate and summarize outcomes of fuel, timing and power band modifications through hands-on exposure to live data derived before and after modifications.
- apply performance based principles to construct and operate a vehicle for competition, including classification divisions within a sanctioned racing organization.
- organize maintenance schedules and record keeping in order to keep vehicle competitive throughout a season.
- accurately interpret computer software data to make adjustments and modifications to improve performance and/or economy of a modern vehicle.

Career Information
The “Tuner” industry is a rapidly growing industry. Professional technicians today are modifying vehicles for both on and off road application. This certificate prepares the students for the following career opportunities: alternative fuels diagnostic technician, off-road performance tuner, and a racing team crew member.

Green Vehicle Technology Certificate
This program prepares students for entry-level positions in the automotive industry with emphasis on alternative fuel and electric vehicle drive systems and complete automotive systems diagnosis and repair. It covers the various technologies used in the alternative fuel and electric vehicles of today. Major emphasis is on electric vehicles, hybrid electric vehicles, and fuel cell technology. Alternative fuels such as compressed natural gas and biodiesel are also covered. It prepares students for Automotive Service Excellence (ASE) certifications A-2 through A-8, L-3, and F-1.

Student Learning Outcomes
Upon completion of this program, the student will be able to:

- demonstrate basic automotive system service procedures on alternative fuels vehicles.
- describe different alternative fuels vehicle designs.
- describe the process of making biodiesel.
- analyze electrical and electronic components and identify failures.
- use automotive test equipment such as digital multimeters and scan tools.
- demonstrate high voltage system disable procedures on hybrid electric vehicles.
- apply algebraic and mathematical concepts essential to advancement in the automotive industry.
- operate equipment and tools safely.
- assess, adjust, test, and diagnose components/system malfunctions.
- locate, download, and analyze technical manuals from the Internet, digital, and text sources.
- analyze, diagnose, and repair automotive electrical and electronic systems to ASE performance level.
- assemble a basic electric vehicle operating system.

Career Information
Alternative fuels is an emerging career field that is rapidly growing. This certificate prepares automotive technology students for entrance into this field, from servicing alternative fuels vehicles to developing alternative fuels technology. Additional career opportunities are likely as the industry continues to grow.

Parts and Service Certificate
This certificate provides training for automotive parts and service advisors. Topics include parts knowledge, integrated computer management software, scheduling, inventory control, hazardous materials and warranty documentation requirements.

### Student Learning Outcomes

Upon completion of this program, the student will be able to:

- demonstrate safe, accurate use of tools and equipment.
- apply accurate measurement techniques.
- explain screen orientation and how to navigate through different functions of the VERUS scanner.
- perform the proper procedure to do an oil change on a vehicle.
- locate and analyze technical manuals from online computerized databases.
- apply retrieved data to specific vehicle conditions.

### Career Information

The automotive industry is growing and in need of technicians. Snap-On™ certifications are in high demand.

### Transmission Service Certificate

This certificate program prepares the student for an entry-level position in the automotive industry. This program includes Automotive Service Excellence (ASE) certification in A-2 automatic transmission and A-3 manual drive-train.

**Total Units:** 24
Student Learning Outcomes

Upon completion of this program, the student will be able to:

- analyze an automotive transmission, applying elements of drive-train theory.
- investigate an automotive electrical malfunction by locating, testing and identifying the failure in order to make the necessary repairs.
- research automotive data sources in order to identify the correct repair procedure, and locate safety campaigns and bulletins.
- describe the operation of drive-train components in order to report and justify a recommended repair procedure.
- apply gear theory to drive-train malfunction.
- evaluate and recognize the drive-train malfunction.

Career Information

Entry-level positions in automatic transmission, clutch, and drive-train repair.

Undercar Service Certificate

The Undercar Service certificate provides entry-level training in performing repairs to automotive suspension, brake, and exhaust systems.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- describe shop orientation and safety issues.
- discuss the basics of vehicle service including oil, lubrication, inspection, and replacement of fluids.
- demonstrate proper handling, use, and disposal of hazardous materials in the automotive shop environment, combined with a safety test.
- practice safety precautions and procedures when inspecting and repairing braking systems.
- analyze the various brake components used on automobiles and describe the functions of each.
- evaluate and diagnose brake components/system malfunctions.
- reassemble and adjust all components of the brake system following service manual procedures.
- arrange, clean, inspect, and measure all components of brake systems following established service manual procedures.

Career Information

The automotive brakes industry is growing and in need of technicians.

Automotive Brakes Certificate

This certificate prepares students for employment in the automotive industry, specializing in brakes.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- develop a resume and cover letter to plan for future career opportunities.
- perform run-out and parallelism evaluations on brake rotors and machine to manufacturer's specifications.
- measure and analyze suspension angles of a modern automobile and make adjustments necessary to bring the angle within manufacturer's specifications.
- identify modern exhaust system components and demonstrate how they relate to California emission control laws.
- research and synthesize brake, suspension, and exhaust system information on electronic service manuals to provide information on repairs to meet industry standards.

Career Information

The automotive suspension and steering industry is growing and in need of technicians.

Automotive Suspension and Steering Certificate

This certificate prepares students for employment in the automotive industry, specializing in suspension and steering.

### Automotive Technology (AT) Courses

**AT 100 Technical Basics for the Automotive Professional**

- **Units:** 3
- **Hours:** 26 hours LEC; 84 hours LAB
- **Prerequisite:** None.

This course presents theoretical and practical training for entry-level automotive technicians. It presents basic automotive diagnosis and service procedures used in automotive shops. Projects performed in an automotive shop environment provide hands-on experience with industry shop tools. Shop service operations which meet Automotive Service Excellence (ASE) standards including safety, electrical, and other general automotive procedures are covered.

**AT 103 Basic Automotive Skills**

- **Units:** 3
- **Hours:** 54 hours LEC
- **Prerequisite:** None.

This course presents theoretical training for entry-level automotive technicians. It presents basic automotive diagnosis and service procedures used in automotive shops. Projects in an automotive shop environment, using industry shop tools are demonstrated. Shop service operations which meet Automotive Service Excellence (ASE) standards including safety, electrical, and other general automotive procedures are covered.

**AT 105 Mathematics for Automotive Technology**

- **Units:** 3

This course covers mathematics relative to the automotive trades. Course topics include the metric system, fractions, decimal equivalents, basic equations, ratio and proportion, gear ratio calculations, power, efficiency, and torque. This course is designed for Automotive Technology majors and covers all automotive-related mathematical areas from basic technician calculations to shop money management.

**AT 106 Automotive Shop Operations**

- **Units:** 2
- **Hours:** 36 hours LEC
- **Prerequisite:** None.

This course introduces operations of automotive dealerships, independent shops, and fleet shops. Emphasis is placed on the various influences that affect the technician's position within the operation. Topics include service, sales, parts, and financial operations. Customer Satisfaction Index (CSI) and the Bureau of Automotive Repair (BAR) are discussed. Field trips to local shops may be required.

**AT 107 Employability Skills for Technical Careers**

- **Units:** 1.5
- **Hours:** 27 hours LEC
- **Prerequisite:** None.

This course provides the opportunity to explore technical careers while developing valuable work and life skills. It is an introduction to automotive-related occupations, emphasizing technical careers in the Sacramento area. Activities are designed to enhance personal development, employability skills, and self-esteem through leadership, citizenship, and character development.

**AT 108 Successful Automobile Selling Skills**

- **Units:** 2
- **Hours:** 27 hours LEC
- **Prerequisite:** None.

This course covers successful automobile sales techniques. Topics include the process of selling cars, from greeting the consumer to closing the sale. It also covers understanding today's information age consumer.

**AT 110 Automotive Brakes**

- **Units:** 3
- **Hours:** 26 hours LEC; 84 hours LAB
- **Prerequisite:** None.

This course covers the theory, design, adjustment, and repair or overhaul of brake systems and components. It covers the proper operation of power and hand devices used in the servicing of brake systems and components. This course meets Automotive Service Excellence (ASE) A5 standards.

**AT 130 Manual Drive Trains and Axles**

- **Units:** 3
- **Hours:** 26 hours LEC; 84 hours LAB
- **Prerequisite:** None.

This course covers the theory, design, adjustment, and repair or overhaul of brake systems and components. It covers the proper operation of power and hand devices used in the servicing of brake systems and components. This course meets Automotive Service Excellence (ASE) A5 standards.
This course covers the basic principles of manual transmissions and transaxles and service. Topics include clutches, manual transmissions and transaxles, drive line and shafts, differentials/limited slip differentials, and four-wheel drive/all-wheel drive. This course meets Automotive Service Excellence (ASE) standard A3.

**AT 140 Advanced Automotive Skill and Speed Development**

Units: 3  
Hours: 22.5 hours LEC; 94.5 hours LAB  
Prerequisite: None.  
Corequisite: None.  
Advisory: AT 100

This course covers automotive component diagnosis and repair, including brakes, suspension, heating and air conditioning, engine, transmissions, and other areas in preparation for competing in the regional, state, and national Skills USA competition. This course may be taken up to four times with different competitions.

**AT 143 Automotive Parts**

Units: 3  
Hours: 45 hours LEC; 27 hours LAB  
Prerequisite: None.  
Corequisite: AT 100

This course introduces the key workings of automotive systems and their related parts. It also offers preparation for the Automotive Service Excellence (ASE) P-2 Parts Specialist test. Topics include suspension systems, hazardous waste regulations, and inventory management.

**AT 145 Automotive Exhaust System**

Units: 3  
Hours: 26 hours LEC; 84 hours LAB  
Prerequisite: AT 100 with a grade of "C" or better

This course is an introduction to the principles and service of exhaust systems, including pipe bending, cutting, welding, installation, repair, and inspection. It offers preparation to students for the Automotive Service Excellence (ASE) X1 exhaust systems test, which is required for the ASE Under-Car Specialist Certificate. Various welding techniques are covered during the semester.

**AT 146 Automotive Service Consultant**

Units: 3  
Hours: 45 hours LEC; 27 hours LAB  
Prerequisite: None.  
Corequisite: AT 180  
Advisory: AT 100

This course introduces the basic requirements needed to perform the duties of an automotive service consultant. It also offers preparation for the Automotive Service Excellence (ASE) C-1 Service Consultant exam. Topics include utilization of diagnostic flow charts, recruiting techniques, and small business operations.

**AT 156 Light Duty Diesel/Green Diesel Technology**

Units: 4  
Hours: 54 hours LEC; 54 hours LAB  
Prerequisite: None.  
Advisory: AT 314

This course introduces the diagnosis and repair of light duty diesel vehicles and covers the theory and operation of light duty diesel engines and their fuel delivery systems. Topics include diesel engine characteristics, early mechanical fuel delivery systems, early cylinder head design, and early engine construction. It also covers how to prepare these engines for conversion to green technology, such as low sulfur fuel, biodiesel, and alternative fuels. This course along with AT 157 is applicable for the field technician seeking training for ASE A9 certification and preparation for green technologies.

**AT 157 Advanced Light Duty Diesel/Green Diesel Technology**

Units: 4  
Hours: 54 hours LEC; 54 hours LAB  
Prerequisite: None.  
Advisory: AT 156 and 330

This course focuses on late model turbocharged light duty diesel vehicles operating on low sulfur, biodiesel, or alternative fuels. Topics include computer controlled injection, emission control systems, sensors, actuators, computer modules, exhaust gas recirculation (EGR) systems, particulate traps, selective catalytic reduction (SCR) systems, and lean oxides of nitrogen (NOx) traps. Diagnosis and repair of these systems are covered using computer diagnostic equipment to meet state emission compliance. This course along with AT 156 is applicable for the field technician seeking training for ASE A9 certification and preparation for green technologies.

**AT 177 Bureau of Automotive Repair (BAR) Emissions Update UT032**

Units: 1  
Hours: 18 hours LEC  
Prerequisite: None.  
Advisory: AT 332 with a grade of “C” or better

This course improves technicians’ abilities to diagnose and repair emissions failures on complex computer-controlled vehicles.

**AT 178 Bureau of Automotive Repair (BAR) Emissions Update UT055**

Units: 1  
Hours: 18 hours LEC  
Prerequisite: None.  
Advisory: None

This course improves automotive repair technicians’ abilities to diagnose and repair emissions failures on complex computer-controlled vehicles that use variable valve lift and valve timing technologies.

**AT 180 Automotive Data Acquisition**

Units: 3  
Hours: 54 hours LEC  
Prerequisite: None.  
Advisory: None

This course covers the skills needed to adequately retrieve and apply automotive data, including on-line technical manuals and computerized shop management programs. Computer-based automotive service repair order generation is covered as well as usage and application currently utilized in many automotive repair facilities.

**AT 181 Electrical Fundamentals and Multimeter Basics**

Units: 3  
Hours: 26 hours LEC; 84 hours LAB  
Prerequisite: None.  
Advisory: None

This course covers the principles, operation, and diagnosis of automotive electrical systems including fundamentals of electricity (DC), electrical circuits, battery operation, fundamentals of magnetism, and electrical schematics. It also explores the functionality and capability of the digital multimeter to improve technicians’ diagnostic expertise when working with electrical related problems. Along with completion of AT 330 and AT 331, this course meets Automotive Service Excellence (ASE) certification standards for the A6 Electrical Systems certification.
AT 182 General Motors Diagnostic Tools

Units: 2  
Hours: 27 hours LEC; 27 hours LAB  
Prerequisite: None.

This course explores the functionality and capability of General Motors diagnostic tools to improve technicians' expertise when working with On-Board computer-related problems.

AT 184 Manufacturer Specific Scan Tool Use and Operation

Units: 2  
Hours: 27 hours LEC; 27 hours LAB  
Prerequisite: None.

This course explores the functionality and capability of various manufacturer specific scan tools to improve the technician's diagnostic expertise when working with On-Board computer-related problems. Topics include generic and manufacturer specific codes and data, monitor status, code setting strategies, and basic troubleshooting techniques.

AT 186 Snap On Diagnostic Tool Use and Operation

Units: 2  
Hours: 27 hours LEC; 27 hours LAB  
Prerequisite: None.

This course explores the functionality and capability of Snap-On scan tools to improve the technician's diagnostic expertise when working with On-Board computer-related problems. Topics include generic and manufacturer specific codes and data, monitor status, code setting strategies, and basic troubleshooting techniques. Students enrolled in this course may also be able to receive Snap-On diagnostic tool certifications.

AT 188 Aftermarket Scan Tool Use and Operation

Units: 2  
Hours: 27 hours LEC; 27 hours LAB  
Prerequisite: None.

This course explores the functionality and capability of various aftermarket scan tools to improve the technician's diagnostic expertise when working with On-Board computer-related problems. Topics include generic and manufacturer specific codes and data, monitor status, code setting strategies, and basic troubleshooting techniques.

AT 189 Digital Storage Oscilloscope Use and Operation

Units: 2  
Hours: 27 hours LEC; 27 hours LAB  
Prerequisite: None.

This course explores the functionality and capability of various digital storage oscilloscopes (DSO) to improve the technician's diagnostic expertise when working with computer controlled vehicle systems. Topics include lab scope set up, navigation, functions, and operation.

AT 190 Advanced Student Projects

Units: 2  
Hours: 108 hours LAB  
Prerequisite: AT 100 with a grade of “C” or better

This course provides opportunities to pursue advanced laboratory projects in all eight of the Automotive Service Excellence (ASE) educational areas. Projects are selected by the Automotive Department.

AT 251 Automotive Electronic Accessories and Installation

Units: 3  
Hours: 36 hours LEC; 54 hours LAB  
Prerequisite: None.  
Corequisite: AT 330 or ET 302

This course covers the principles and processes involved in the installation of mobile entertainment, security, positioning, and other electrical and electronic related systems and components. Safety, circuit diagrams, inspection, wiring, installation, and troubleshooting techniques are covered along with the operational characteristics of the various electrical circuits. This course offers study to become a qualified Mobile Electronics Certified Professional (MECP) installer. This course is not open to students who have taken ET 251. Field trips are required.

AT 294 Topics in Automotive Technology

Units: 0.5 - 3  
Hours: 9 - 54 hours LEC; 27 - 162 hours LAB  
Prerequisite: None.

This course provides an opportunity to pursue current topics in automotive technology that are not included in existing courses.

AT 295 Independent Studies in Automotive Technology

Units: 1 - 3  
Hours: 54 - 162 hours LAB  
Prerequisite: None.

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

AT 298 Work Experience in Automotive Technology

Units: 0.5 - 4  
Hours: 30 - 300 hours LAB  
Prerequisite: None.  
Enrollment Limitation: Students must be in a paid or unpaid internship, volunteer position, or job related to the automotive industry with a cooperating site supervisor. Students are advised to consult with the Automotive Department faculty to review specific certificate and degree work experience requirements.  
Advisory: AT 100; AND either ENGRD 310 OR ENGRD 312 OR ENGW 300; OR ESLW 340;  
General Education: AA/AS Area III(b)

This course provides students with opportunities to develop marketable skills in preparation for employment or advancement within the automotive field. It is designed for students interested in work experience and/or internships in associate degree level or certificate occupational programs. Course content includes understanding the application of education to the workforce, completion of Title 5 required forms which document the student's progress and hours spent at the work site, and developing workplace skills and competencies. During the semester, the student is required to complete 37.5 hours of related paid work experience, or 30 hours of related unpaid work experience for 0.5 unit. An additional 37.5 or 30 hours of related work experience is required for each additional 0.5 units. All students are required to attend the first class meeting, a mid-semester meeting, and a final meeting. Additionally, students who have not already successfully completed a Work Experience course will be required to attend weekly orientations while returning participants may meet individually with the instructor as needed. Students may take up to 16 units total across all

AT 299 Work Experience in Automotive Technology

Units: 0.5 - 4  
Hours: 30 - 300 hours LAB  
Prerequisite: None.  
Enrollment Limitation: Students must be in a paid or unpaid internship, volunteer position, or job related to the automotive industry with a cooperating site supervisor. Students are advised to consult with the Automotive Department faculty to review specific certificate and degree work experience requirements.  
Advisory: AT 100; AND either ENGRD 310 OR ENGRD 312 OR ENGW 300; OR ESLW 340;  
General Education: AA/AS Area III(b)

This course provides students with opportunities to develop marketable skills in preparation for employment or advancement within the automotive field. It is designed for students interested in work experience and/or internships in associate degree level or certificate occupational programs. Course content includes understanding the application of education to the workforce, completion of Title 5 required forms which document the student's progress and hours spent at the work site, and developing workplace skills and competencies. During the semester, the student is required to complete 37.5 hours of related paid work experience, or 30 hours of related unpaid work experience for 0.5 unit. An additional 37.5 or 30 hours of related work experience is required for each additional 0.5 units. All students are required to attend the first class meeting, a mid-semester meeting, and a final meeting. Additionally, students who have not already successfully completed a Work Experience course will be required to attend weekly orientations while returning participants may meet individually with the instructor as needed. Students may take up to 16 units total across all.
Work Experience course offerings. This course may be taken up to four times when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

AT 299 Experimental Offering in Automotive Technology

Units: 0.5 - 4
Prerequisite: None.

This is the experimental courses description.

AT 301 Small Gas Engines, Outdoor Power Equipment

Same As: HORT 330
Units: 4
Hours: 55 hours LEC; 60 hours LAB
Prerequisite: None.
Transferable: CSU

This course covers the basic operational theory, servicing, adjusting, and maintenance of 2-cycle and 4-cycle small gas engines as they pertain to the automotive and horticulture industries. In addition, the small engine repair skill areas included in the regional, state, and national SkillsUSA competitions are covered. AT 301 and/or HORT 330 may be taken two times for credit for a maximum of 8 units, using different equipment.

AT 309 Introduction to Hybrid and Electric Vehicle Technology

Units: 4
Hours: 54 hours LEC; 54 hours LAB
Prerequisite: AT 331 with a grade of "C" or better
Advisory: AT 110, 310, 313, 314, and 322
Transferable: CSU

This course covers the theory and operation of hybrid and electric vehicle operation. Each of the major manufacturers' vehicles is discussed along with the safety and service procedures that apply to these vehicles. Hands-on activities include major service procedures and basic diagnostics on the most common hybrid and electric vehicles in the market today. It is recommended that a student take the electrical, brakes, and air conditioning courses or have previous field experience before taking this course.

AT 310 Heating and Air-Conditioning Systems

Units: 3
Hours: 26 hours LEC; 84 hours LAB
Prerequisite: None.
Corequisite: AT 100
Advisory: AT 181 and 188
Transferable: CSU

This course is an introduction to automotive heating and air conditioning theory. It meets Automotive Service Excellence (ASE) standard A7 and combines performance testing and repair practices as utilized in the industry.

AT 311 Suspension and Steering Systems

Units: 3
Hours: 26 hours LEC; 84 hours LAB
Prerequisite: None.
Corequisite: AT 100
Advisory: AT 181 and 188
Transferable: CSU

This course is an introduction to advanced principles and service of suspension and steering systems, including alignment of equipment, alignment procedures, and the diagnosis and repair of suspension components. It meets Automotive Service Excellence (ASE) A4 certification standards.

AT 313 Automatic Transmission and Transaxles

Units: 3
Hours: 26 hours LEC; 84 hours LAB
Prerequisite: None.
Corequisite: AT 100
Advisory: AT 181 and 188
Transferable: CSU

This course covers the basics of automatic transmission and transaxle principles and service. Topics include hydraulic principles, diagnosis and service, power conversion, and automatic transmission operation. AT 313 and AT 317 together meet Automotive Service Excellence (ASE) standard A2.

AT 314 Automotive Engine Repair

Units: 3
Hours: 26 hours LEC; 84 hours LAB
Prerequisite: None.
Corequisite: AT 100 and 105
Transferable: CSU

This course covers the principles, operation, and diagnosis of automotive engines, including basic engine operation and construction, parts identification and location, engine dis-assembly procedures, engine diagnosis, engine repair and rebuilding procedures, and engine reassembly procedures. Completion of AT 314 and AT 332 meet Automotive Service Excellence (ASE) A1 standards.

AT 316 Alternative Fuels and Advanced Technology Vehicles

Units: 4
Hours: 54 hours LEC; 54 hours LAB
Prerequisite: None.
Corequisite: AT 100
Transferable: CSU

This hands-on course provides an overview of both conventional and alternative fuels with their impact on vehicle emissions in both gasoline and diesel engines. In addition, advanced vehicle technologies such as hybrid electric, direct injection, and fuel cells are explored. Topics include gasoline, E85, M85, diesel, biodiesel, CNG, LPG, LNG, RNG, EVs, HEVs, fuel cells, and dynamometer testing. Completion of this course helps students prepare for the Automotive Service Excellence (ASE) F1 Alternative Fuels Certification in addition to the ASE L3 Hybrid/Electric Vehicle Specialist Certification. Field trips may be required.

AT 317 Advanced Drivetrain

Units: 3
Hours: 26 hours LEC; 84 hours LAB
Prerequisite: AT 313 with a grade of "C" or better
Transferable: CSU

This course covers advanced aspects of automatic transmissions, automatic transaxles, manual drivetrains, diagnosis, service, and repair. Topics include mechanical, electrical, and electronic diagnosis, diagnosis and repair of vibration problems, advanced scan tool operation, and dynamometer testing. AT 317 and AT 313 together meet Automotive Service Excellence (ASE) standard A2.

AT 325 Engine Performance Testing & Tuning

Units: 4
AT 333 California State Smog Check Inspector Training

Units: 6  
Hours: 81 hours LEC; 81 hours LAB  
Prerequisite: AT 314 with a grade of "C" or better  
Transferable: CSU  

This course covers the Bureau of Automotive Repair (BAR) certified Level 1 and Level 2 smog inspector training. Topics include smog check laws, rules and regulations; standards of practice; engine theory, design, and operation; emission control theory, design, identification, operation, and testing; smog inspection visual and functional testing procedures; and loaded mode emission testing. It is required for first-time licensed inspection technicians. Along with completion of AT 332, this course meets Automotive Service Excellence (ASE) certification standards for the A8 Engine Performance certification. This course is formerly known as AT 323.

AT 334 BAR Specified Diagnostic and Repair Training

Units: 4  
Hours: 72 hours LEC  
Prerequisite: None.  
Transferable: CSU  

State law currently requires that applicants for a Smog Check Repair license possesses Automotive Service Excellence (ASE) certifications in the following areas: A6 - Automotive Electrical/Electronic systems; A8 - Automotive Engine Performance; L1 - Advanced Engine Performance.  

This course is an intensive review of automotive electrical/electronic systems, engine mechanical systems, emission control systems, and computer control systems as they relate to automotive emissions controls. It satisfies the ASE certification requirement when applying for a Smog Check technician license and may be used by the applicant in lieu of the ASE certifications.

AT 341 Alternative Fuels and Advanced Technology Vehicles

Units: 3  
Hours: 26 hours LEC; 84 hours LAB  
Prerequisite: None.  
Corequisite: AT 100  
Transferable: CSU  

This hands-on course provides an overview of both conventional and alternative fuels in regards to vehicle emissions, fuel economy and performance. In addition, advanced vehicle technologies such as direct injection, and fuel cells are explored. Topics include: gasoline, ethanol and methanol based fuels (E85, M85), diesel, biodiesel, compressed natural gas (CNG), propane, electric vehicles, hybrids and fuel cell vehicles (FCV). Completion of this course helps students prepare for the Automotive Service Excellence (ASE) F1 Alternative Fuels Certification in addition to the ASE L3 Hybrid/Electric Vehicle Specialist Certification. Field trips may be required. This course is formerly known as AT 316.

AT 343 Electric Vehicle Construction, Diagnosis and Repair

Units: 3  
Hours: 26 hours LEC; 84 hours LAB  
Prerequisite: AT 100 with a grade of "C" or better, or placement through the assessment process.  
Transferable: CSU  

This course covers the operation, construction, diagnosis and repair of electric vehicles. Current production and specialty electric vehicles will be discussed along with the safety and service procedures that apply to these vehicles. Topics include electric vehicle charging stations, lead acid, nickel metal and lithium ion battery technology, permanent magnet and inductive drive motors and battery management systems. Hands-on activities include electric vehicle assembly, major service
procedures, and basic diagnostics. Successful completion of this course will help the student prepare for the ASE Light Duty Hybrid/Electric Vehicle Specialist certification ASE-L3. It is recommended that a student take the electrical and advanced electrical courses or have previous field experience before taking this course.

AT 345 Hybrid Electric Vehicle Technology, Service and Repair

Units: 3
Hours: 26 hours LEC; 84 hours LAB
Prerequisite: AT 100 with a grade of "C" or better
Advisory: AT 330
Transferable: CSU

This course covers the theory and operation of hybrid and electric vehicle operation. Each of the major manufacturers' vehicles is discussed along with the safety and service procedures that apply to these vehicles. Hands-on activities include major service procedures and basic diagnostics on the most common hybrid and electric vehicles in the market today. Successful completion of this course will help the student prepare for the ASE Hybrid/Electric Vehicle Specialist certification ASE-L3. It is recommended that a student take the electrical course or have previous field experience before taking this course. This course is formerly known as AT 309.

AT 347 Advanced Hybrid and Electric Vehicle Technology Service and Repair

Units: 3
Hours: 26 hours LEC; 84 hours LAB
Prerequisite: AT 100 with a grade of "C" or better
Advisory: AT 309
Transferable: CSU

This course covers in depth hybrid and electric vehicle diagnosis and repair beyond what is offered in factory training programs. Topics covered will include battery pack diagnosis and reconditioning, inverter diagnosis and repair, installation of plug in conversion systems, and powertrain management. Diagnostics requiring the use of manufacturer specific and aftermarket scan-tools along with other hybrid and electric vehicle specialty tools will also be covered. This course will prepare the student to diagnose and repair the most popular hybrid electric vehicles, plug-in hybrid electric vehicles and pure electric vehicles in the market today. Successful completion of this course will help the student prepare for the ASE Hybrid/Electric Vehicle Specialist certification ASE-L3.

AT 350 Automotive Engine Blueprinting, Machine Work and Manufacturing

Units: 4
Hours: 54 hours LEC; 66 hours LAB
Prerequisite: AT 314 with a grade of "C" or better
Advisory: AT 301
Transferable: CSU

This course examines the technical procedures to blueprint, machine, and properly assemble automotive engines. Course topics include: engine balancing, boring, honing and resurfacing using specialty machine equipment. Other topics include the manufacturing of custom engine components and performing specialty engine blueprinting measurements. This course will help prepare the student for Automotive Service Excellence, (ASE) and Automotive Engine Rebuilders Association, (AERA) certifications.

AT 495 Independent Studies in Automotive Technology

Units: 1 - 3
Hours: 54 - 162 hours LAB
Prerequisite: None.
Transferable: CSU

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

AT 499 Experimental Offering in Automotive Technology

Units: 0.5 - 4
Prerequisite: None.
Transferable: CSU

This is the experimental courses description.

Graduation and Transfer

Make a Plan for Transfer Success

Students who plan to transfer to the California State University (CSU) system, the University of California (UC) system, or to a private or out-of-state college or university should make an education plan with a counselor. This will ensure you meet the requirements for the specific institution you plan to attend.

Transfer eligibility is based on transferable college units and/or high school records and test scores. Each institution has its own admission requirements. To prepare for transfer:

1. Decide where you want to transfer
2. Talk to a counselor about that school's specific requirements
3. Create an education plan
Biology and Biotechnology

Biologists are fully engaged in meeting the challenges of the future, helping to improve the quality of human life and preserve our world’s biodiversity. The Biology courses at ARC provide students with the breadth and depth of knowledge necessary to more fully understand the living world. The Biology Department offers a wide range of lecture, laboratory, and field courses for majors and non-majors alike, whether for transfer, vocational training, or general interest.

Degrees and Certificates Offered

A.S.-T. in Biology
A.S. in Biotechnology
A.S. in General Science
Biotechnology Certificate

Dean Joel Keebler
Department Chair Dean Won
Phone (916) 484-8107

Associate Degrees for Transfer

A.S.-T. in Biology

The Associate in Science in Biology for Transfer degree provides students with a major that fulfills the general requirements of the California State University for transfer. Students with this degree will receive priority admission with junior status to the California State University system. The Associate in Science in Biology for Transfer (AS-T) degree may be obtained by completion of 60 transferable, semester units with a minimum 2.0 GPA, including (a) the major or area of emphasis described in the Required Program, and (b) the Intersegmental General Education Transfer Curriculum for Science, Technology, Engineering, and Mathematics (IGETC for STEM).

Student Learning Outcomes

Upon completion of this program, the student will be able to:

• apply the scientific method: define problems clearly, construct testable hypotheses, design and execute appropriate experiments, analyze data, and justify appropriate conclusions.
• demonstrate knowledge of scientific terminology and interpret principle concepts of biology.
• demonstrate content knowledge, laboratory skills, and study skills to be successful at a four-year institution.
• record and analyze data using appropriate laboratory skills and instrumentation.
• assemble and critically evaluate technical information from the scientific literature.
• apply safe laboratory practices.
• work effectively in groups, as leaders or team members, to solve problems and interact productively with a diverse group of peers.
• demonstrate awareness of the role of biology in contemporary societal and global issues.

Associate Degrees

A.S. in Biotechnology

This degree provides the theory and skills necessary for entry into the biotechnology field, which uses cellular and molecular processes for industry or research. Course work includes practical laboratory skills with emphasis on good laboratory practice, quality control, and regulatory issues in the biotechnology workplace. Completion of the degree also prepares the student for transfer at the upper division level to academic programs involving biotechnology.

Physical Sciences in pre-

**AMERICAN RIVER COLLEGE 2023-2024 Catalog**

**Degree Requirements**

This program provides a broad study in the fields of biological and physical sciences in preparation for transfer to a four-year program and continuation of studies in upper division science courses.

**Student Learning Outcomes**

Upon completion of this program, the student will be able to:

- apply biological and chemical concepts to biotechnology research and its practical applications.
- demonstrate biotechnology laboratory procedures involving protein and DNA techniques, cell culture methods, and solution preparation.
- design and interpret experiments involving biotechnology laboratory procedures.
- evaluate biotechnology laboratory practices in the context of good laboratory practice, quality control, and regulatory issues.
- analyze biotechnology data using mathematical and statistical methods.
- integrate laboratory skills and theory into job-related tasks in the biotechnology workplace.
- appraise social and ethical issues related to advances in biotechnology research and its practical applications.

**Career Information**

This degree prepares the student for entry-level work in the bioscience industry in the areas of research and development, production, clinical testing, and diagnostic work. Potential employers include biotechnology and pharmaceutical companies, as well as laboratories in hospitals, government, and universities.

**A.S. in General Science**

This program provides a broad study in the fields of biological and physical sciences in preparation for transfer to a four-year program and continuation of studies in upper division science courses.

The General Science Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- evaluate new and accepted ideas about the natural universe using scientific methods.
- analyze a wide variety of natural phenomena using basic definitions and fundamental theories of biological or physical sciences.
- apply appropriate quantitative and qualitative methods to interpret and analyze pertinent data.
- outline the basic concepts and fundamental theories of a natural science.
- articulate orally and/or in writing the importance of continuous examination and modification of accepted ideas as a fundamental element in the progress of science.
- discuss ethical components of scientific decision making and apply personal and social values within the process of decision making in scientific endeavors.

Certificate of Achievement

Biotechnology Certificate

This certificate provides the theory and skills necessary for entry into the biotechnology field, which uses cellular and molecular biology processes for industry or research. Course work includes practical laboratory skills with emphasis on good laboratory practice, quality control, and regulatory issues in the biotechnology workplace. This certificate is suitable for preparing the student for the biotechnology workplace at the support personnel level.

Total Units: 24 - 26

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- apply biological and chemical concepts to biotechnology research and its practical applications.
- demonstrate biotechnology laboratory procedures involving protein and DNA techniques, cell culture methods, and solution preparation.
- design and interpret experiments involving biotechnology laboratory procedures.
- evaluate biotechnology laboratory practices in the context of good laboratory practice, quality control, and regulatory issues.
- assess the impact of biotechnology on social and ethical issues.

Career Information

This certificate prepares the student for entry-level work in the bioscience industry in the areas of research and development, production, clinical testing, and diagnostic work. Potential employers include biotechnology and pharmaceutical companies, as well as laboratories in hospitals, government, and universities.

Biology (BIOL) Courses

BIOL 102 Essentials of Human Anatomy and Physiology

Units: 4  
Hours: 54 hours LEC; 54 hours LAB  
Prerequisite: None.

General Education: AA/AS Area IV

This course examines body systems from an anatomical and physiological point of view. The basic anatomy and physiology of all the body systems are covered with an emphasis on developing vocabulary in each area. This course meets the minimum science requirements for Paramedic, Healthcare Interpreting, Gerontology, Health Care, and Funeral Service programs.

BIOL 103 Human Anatomy for Funeral Services

Units: 4  
Hours: 54 hours LEC; 54 hours LAB  
Prerequisite: None.

Corequisite: FSE 300

Enrollment Limitation: An off-site clinical laboratory component of the course may require a background check, drug screening, and testing for hepatitis B.

General Education: AA/AS Area IV

This is an intensive study of the structure of the human body. It covers the basic terminology of anatomy, microscopic anatomy, the four major tissue types, and all the organ systems of the human body. Topics include the following systems: integumentary, skeletal, muscular, nervous, cardiovascular, respiratory, digestive, urinary, and reproductive. Laboratory assignments develop skills of observation, investigation, and identification of selected structures. It emphasizes the regions and structures relevant to embalming techniques through the dissection of a human cadaver. This course is designed for students preparing for a career in funeral service.

BIOL 130 Microbiology for Funeral Service

Units: 3  
Hours: 54 hours LEC  
Prerequisite: CHEM 130 with a grade of "C" or better

Corequisite: FSE 312 and 330

Advisory: BIOL 300 with a grade of "C" or better

This course covers a survey of the basic principles of microbiology. It relates these principles to Funeral Service Education especially as they pertain to sanitation, disinfection, public health, infectious disease, and embalming practice.

BIOL 295 Independent Studies in Biology

Units: 1 - 3  
Hours: 54 - 162 hours LAB  
Prerequisite: None.

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

BIOL 299 Experimental Offering in Biology

Units: 0.5 - 4  
Prerequisite: None.

This is the experimental courses description.

BIOL 300 The Foundations of Biology

Units: 3  
Hours: 54 hours LEC  
Prerequisite: None.

General Education: AA/AS Area IV; CSU Area B2; Cal-GETC Area 5B (effective Fall 2025); IGETC Area 5B

This course covers basic biological principles and how they relate to humans. Topics include an introduction to the philosophy of science and basic cell chemistry, structure, and physiology. An introduction to basic genetics (transmission and molecular) as well as some biotechnology principles are discussed. Additionally, human body systems, evolution, reproduction and development, as well as ecology and human impacts on the environment are addressed.

BIOL 301 Evolution

Units: 3
Biology and Biotechnology

Biology and Biotechnology

GETC Area 5B (e

General Education: If taken after BIOL 400.)

maximum credit, 1 course. No credit for BIOL 300, BIOL 303 or BIOL 310

CSU; UC (BIOL 300, BIOL 303 and BIOL 310 combined: Transferable:

ESLR 340 AND ESLW 340.

Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND EWSL 340.

Transferable: CSU; UC

General Education: AA/AS Area IV; CSU Area B2; Cal-GETC Area 5B (effective Fall 2025); IGETC Area 5B

This non-science majors course is an introduction to evolutionary biology. It explores the history of the life and the mechanisms that give rise to the diversity of life on earth. Topics include the scientific method, the history of evolutionary thought, the origins of life, population genetics, speciation, evolutionary developmental biology and systematics.

BIOL 303 Survey of Biology

Units: 4

Hours: 54 hours LEC; 54 hours LAB

Prerequisite: None.

Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLR 340 AND EWSL 340.

Transferable: CSU; UC (BIOL 300, BIOL 303 and BIOL 310 combined; maximum credit, 1 course. No credit for BIOL 300, BIOL 303 or BIOL 310 if taken after BIOL 400.)

General Education: AA/AS Area IV; CSU Area B2; CSU Area B3; Cal-GETC Area 5B (effective Fall 2025); Cal-GETC Area 5C (effective Fall 2025); IGETC Area 5B; IGETC Area 5C

This course covers the basic principles of cell biology, genetics (transmission and molecular), ecology, and evolution. It also emphasizes the process of science, interrelationships among living organisms, and the relationship of biological structures and functions. Laboratory activities may include plant and animal dissection. This course provides science preparation for those entering a Multiple Subject Teacher Credential Program. Field trips are required.

BIOL 305 Natural History

Units: 4

Hours: 54 hours LEC; 54 hours LAB

Prerequisite: None.

Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLR 340 AND EWSL 340.

Transferable: CSU; UC

General Education: AA/AS Area IV; CSU Area B2; CSU Area B3; Cal-GETC Area 5B (effective Fall 2025); Cal-GETC Area 5C (effective Fall 2025); IGETC Area 5B; IGETC Area 5C

This course covers basic biological and ecological principles to explain the origin and diversity of living organisms. Topics range from landscape formation and habitats to the adaptations organisms have evolved to live in their environment. Although this is a broad survey course, it emphasizes California environments. Dissection is not part of this curriculum. This course is designed as an introductory course and for non-majors who enjoy the outdoors. Field trips may be required.

BIOL 310 General Biology

Units: 4

Hours: 54 hours LEC; 54 hours LAB

Prerequisite: None.

Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLR 340 AND EWSL 340.

Transferable: CSU; UC (BIOL 300, BIOL 303 and BIOL 310 combined; maximum credit, 1 course. No credit for BIOL 300, BIOL 303 or BIOL 310 if taken after BIOL 400.)

General Education: AA/AS Area IV; CSU Area B2; CSU Area B3; Cal-GETC Area 5B (effective Fall 2025); Cal-GETC Area 5C (effective Fall 2025); IGETC Area 5B; IGETC Area 5C

This laboratory course for non-science majors covers basic biological principles and how they relate to humans. Concepts include cell chemistry, structure, and physiology; genetics (transmission and molecular); biotechnology; human body systems; evolution; reproduction and development; ecology; and human impacts on the environment.

BIOL 322 Ethnobotany

Units: 3

Hours: 36 hours LEC; 54 hours LAB

Prerequisite: None.

Transferable: CSU; UC

General Education: AA/AS Area VI

This course focuses on the multicultural use of plants. Emphasis is on the identification and use of plants from several cultures including the American Indians, Europeans, South Americans, and Chinese. Topics include the use of plants for food, medicine, basketry, technology, shelter, and music. Sight recognition of plants is emphasized. An analysis of ethnicity and ethnocentrism is also included. Field trips may be required.

BIOL 332 Introduction to Ornithology

Same As: NATR 301

Units: 4

Hours: 54 hours LEC; 54 hours LAB

Prerequisite: None.

Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLR 340 AND EWSL 340.

Transferable: CSU; UC

General Education: AA/AS Area IV; CSU Area B2; CSU Area B3; Cal-GETC Area 5B (effective Fall 2025); Cal-GETC Area 5C (effective Fall 2025); IGETC Area 5B; IGETC Area 5C

This introductory course covers the biology and natural history of birds. Topics include evolutionary origins of birds and of flight, avian anatomy and physiology, and bird behavior, such as migration, song, feeding ecology, and mating systems. Conservation strategies are also investigated. Laboratory work explores bird structure and function, taxonomic classification, and species identification, particularly of those found in California and the western United States. Field trips may be required. This course is not open to students who have completed NATR 301.

BIOL 342 The New Plagues: New and Ancient Infectious Diseases Threatening World Health

Units: 3

Hours: 54 hours LEC

Prerequisite: None.

Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLR 340 AND EWSL 340

Transferable: CSU; UC

General Education: CSU Area B2; Cal-GETC Area 5B (effective Fall 2025); IGETC Area 5B

This course explores the biology, epidemiology, and pathology of selected pathogens such as prions, viruses, bacteria, protozoa, fungi, and helminths that threaten public health on a global scale. It explores the interaction between human behavior and disease agents on the emergence of new infectious agents and the re-emergence of ancient plagues.

BIOL 352 Conservation Biology

Units: 3

Hours: 54 hours LEC

Prerequisite: None.

Transferable: CSU; UC

General Education: AA/AS Area IV; CSU Area B2; Cal-GETC Area 5B (effective Fall 2025); IGETC Area 5B

This course introduces biological and ecological principles involved in understanding and analyzing environmental problems and exploring scientifically sound conservation approaches. Major topics include forms and patterns of biodiversity, values of biodiversity, threats to biodiversity, conservation at the population and species levels, applied conservation biology, and conservation and sustainable development at the local, regional, national, and international levels. It places emphasis on scientific processes and methodology, while also examining the
Biology and Biotechnology

economic, social, political, and ethical aspects of conservation issues. Course themes are explored through extensive use of interactive case studies, discussion, and activities surrounding relevant current events. Field trips may be required.

**BIOL 370 Marine Biology**

*Units: 5*

*Hours: 54 hours LEC; 54 hours LAB*

*Prerequisite: None.*

*Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; OR ESLR 340 AND ESLW 340.*

*Transferable: CSU; UC (BIOL 370 & 482 combined: maximum credit - one course).*

**General Education:** AA/AS Area IV; CSU Area B2; CSU Area B3; Cal-GETC Area 5B (effective Fall 2025); Cal-GETC Area 5C (effective Fall 2025); IGETC Area 5B; IGETC Area 5C

This course is an introduction to marine biology. It includes the study of cell biology, evolution, physical oceanography, marine algae, marine vertebrate and invertebrate animals, and the ecology of various marine zones. Field trips focusing on the Central and Northern California coast are required and serve as the laboratory component of this course. Field experiences may include but are not limited to natural history of the rocky intertidal, invertebrate identification, salt marsh ecology, sandy beach ecology, or estuary ecology. This course is not open to students who have completed BIOL 482.

**BIOL 375 Marine Ecology**

*Units: 4*

*Hours: 54 hours LEC; 54 hours LAB*

*Prerequisite: None.*

*Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; OR ESLR 340.*

*Transferable: CSU; UC*  

**General Education:** AA/AS Area IV; CSU Area B2; CSU Area B3; Cal-GETC Area 5B (effective Fall 2025); Cal-GETC Area 5C (effective Fall 2025); IGETC Area 5B; IGETC Area 5C

This course focuses on the ecology and natural history of specific habitats of biological interest. Course content varies according to field destination but may include topics in botany, zoology, marine, conservation, and geography. Field study methodology and tools are also covered. Field trips are required and field trip expense fees may be required.

**BIOL 390 Natural History Field Study**

*Units: 0.5 - 4*

*Hours: 3 - 24 hours LEC; 18 - 144 hours LAB*

*Prerequisite: None.*

*Transferable: CSU*

This course focuses on the ecology and natural history of specific habitats of biological interest. Course content varies according to field destination but may include topics in botany, zoology, marine, conservation, and geography. Field study methodology and tools are also covered. Field trips are required and field trip expense fees may be required.

**BIOL 400 Principles of Botany**

*Units: 5*

*Hours: 54 hours LEC; 108 hours LAB*

*Prerequisite: BIOL 400 with a grade of “C” or better*

*Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; OR ESLW 340.*

*Transferable: CSU; UC*  

**General Education:** AA/AS Area IV; CSU Area B2; CSU Area B3; Cal-GETC Area 5B (effective Fall 2025); Cal-GETC Area 5C (effective Fall 2025); IGETC Area 5B; IGETC Area 5C

C-ID: C-ID BIOL 150; Part of C-ID BIOL 130S

This course for non-science majors is an introduction to the marine biology of specific habitats of biological interest. Course content may include topics in botany, zoology, marine, conservation, and geography. Field study methodology and tools are also considered. Field trips are required and field trip expense fees may be required.

**BIOL 410 Principles of Biology**

*Units: 5*

*Hours: 54 hours LEC; 108 hours LAB*

*Prerequisite: BIOL 400 with a grade of “C” or better*

*Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; OR ESLW 340.*

*Transferable: CSU; UC*  

**General Education:** CSU Area B2; CSU Area B3; Cal-GETC Area 5B (effective Fall 2025); Cal-GETC Area 5C (effective Fall 2025); IGETC Area 5B; IGETC Area 5C

C-ID: C-ID BIOL 140; Part of C-ID BIOL 135S

This course covers general principles of botany for science majors. It builds upon and applies concepts developed in cell and molecular biology to the study of plants. It covers the anatomy and physiology, morphology, ecology, diversity, and evolution of higher plants. Thorough cladistic analysis is used to study phylogenetic relationships among the cyanobacteria, protists, fungi, and all major plant phyla. It also covers general ecological principles. Field trips may be required.

**BIOL 415 Introduction to Biology: Biodiversity, Evolution, and Ecology**

*Units: 5*

*Hours: 54 hours LEC; 108 hours LAB*

*Prerequisite: BIOL 400 with a grade of “C” or better*

*Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; OR ESLW 340.*

*Transferable: CSU; UC*  

**General Education:** CSU Area B2; CSU Area B3; Cal-GETC Area 5B (effective Fall 2025); Cal-GETC Area 5C (effective Fall 2025); IGETC Area 5B; IGETC Area 5C

C-ID: C-ID BIOL 150; Part of C-ID BIOL 130S

This course, intended for science majors, introduces the ecological and evolutionary processes that shape biodiversity, relating the patterns of biodiversity to small and large scale environmental effects. The diversity of life on Earth (including animals, plants, fungi, protists, and additional unicellular organisms) is covered. Overarching themes include evolutionary mechanisms, phylogenetic analysis, interactions of organisms with the environment, and global processes and patterns. Not open for credit to students who have completed BIOL 410 and BIOL 420 with a grade of C or better. Field trips may be required.

**BIOL 420 Principles of Zoology**

*Units: 5*

*Hours: 54 hours LEC; 108 hours LAB*

*Prerequisite: BIOL 400 with a grade of “C” or better*

*Transferable: CSU; UC*  

**General Education:** CSU Area B2; CSU Area B3; Cal-GETC Area 5B (effective Fall 2025); Cal-GETC Area 5C (effective Fall 2025); IGETC Area 5B; IGETC Area 5C

C-ID: C-ID BIOL 150; Part of C-ID BIOL 130S

This course covers general principles of zoology. Topics covered include a survey of the animal kingdom, embryology, evolution, systematics, ecology, and comparative anatomy and physiology. Field trips may be required.

**BIOL 430 Anatomy and Physiology**

*Units: 5*

*Hours: 54 hours LEC; 108 hours LAB*

*Prerequisite: CHEM 305, 309, or 400 with a grade of “C” or better*

*Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; OR ESLW 340.*

*Transferable: CSU; UC*  

**General Education:** AA/AS Area IV; CSU Area B2; CSU Area B3; Cal-GETC Area 5B (effective Fall 2025); Cal-GETC Area 5C (effective Fall 2025); IGETC Area 5B; IGETC Area 5C

This course introduces biological concepts important for a general understanding and background for biology majors and pre-professional programs. Emphasis is on the scientific method and basic processes common to all forms of life. Topics include cell structure and function, cell physiology, cell reproduction, Mendelian and molecular genetics, evolution, and ecology.
C-ID: Part of C-ID BIOL 115S

This course emphasizes the integration of structure and function of the human body. It is built on the study of anatomical terminology, cells, and tissues, followed by expansion into the integumentary, skeletal, muscular, and nervous systems. Laboratory study is enhanced by the microscopic investigation of tissues, examination of anatomical models, cadavers, and the dissection of preserved material. Laboratory activities may also include both wet-lab experiments and computer simulations. BIOL 431 must be subsequently taken to complete the study of all major body systems.

BIOL 431 Anatomy and Physiology

Units: 5
Hours: 54 hours LEC; 108 hours LAB
Prerequisite: BIOL 430 with a grade of “C” or better
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340
Transferable: CSU; UC
General Education: AA/AS Area IV
C-ID: Part of C-ID BIOL 115S

This lecture and laboratory course in human anatomy and physiology emphasizes the integration of structure and function. It provides students with an understanding of the structure, function, and regulation of the human body through the physiological integration of the following systems: cardiovascular, lymphatic, respiratory, digestive, urinary, endocrine, and reproductive. Laboratory study is enhanced by the microscopic study of tissues, examination of anatomical models, and the dissection of preserved material. Laboratory activity is also enhanced by the examination of whole cadavers as well as prosected head, torso, upper and lower extremities, and individual organs. Laboratory activities also include both wet-lab experiments and computer simulations. Both BIOL 430 and BIOL 431 must be taken to complete the study of all major body systems.

BIOL 440 General Microbiology

Units: 4
Hours: 54 hours LEC; 72 hours LAB
Prerequisite: CHEM 305, 309, or 400 with a grade of “C” or better
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; ESLW 340; AND Completion of BIOL 300 or CHEM 306 with a grade of “C” or better.
Transferable: CSU; UC
General Education: CSU Area B2; CSU Area B3; IGETC Area 5B (effective Fall 2025); Cal-GETC Area 5C (effective Fall 2025); IGETC Area 5B; IGETC Area 5C

This course introduces microorganisms and their effects on human health. It examines the structure, physiology, metabolism, and genetics of microorganisms. Laboratory work includes aseptic techniques, morphological and biochemical properties of microorganisms, and medically relevant issues regarding microorganisms.

BIOL 442 General Microbiology and Public Health

Units: 5
Hours: 54 hours LEC; 108 hours LAB
Prerequisite: CHEM 305 with a grade of “C” or better and one of the following: BIOL 300, BIOL 303, BIOL 310, or BIOL 431 with a grade of “C” or better.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340 with a grade of “C” or better.
Transferable: CSU; UC
General Education: CSU Area B2; CSU Area B3; IGETC Area 5B (effective Fall 2025); Cal-GETC Area 5C (effective Fall 2025); IGETC Area 5B; IGETC Area 5C

This course provides a survey of bacteria, viruses, fungi, protozoa, and helminths that are associated with human infectious diseases and public health. It examines their cellular and molecular structure, physiology, metabolism, and genetics. Laboratory work introduces methods for cultivating and characterizing microorganisms.

BIOL 482 Honors Marine Biology

Units: 4
Hours: 54 hours LEC; 54 hours LAB
Prerequisite: Eligibility for the ARC Honors Program.
Transferable: CSU; UC (BIOL 370 & 482 combined: maximum credit - one course)
General Education: AA/AS Area IV; CSU Area B2; CSU Area B3; Cal-GETC Area 5B (effective Fall 2025); Cal-GETC Area 5C (effective Fall 2025); IGETC Area 5B; IGETC Area 5C

This course is an honors level introduction to marine biology. It differs from the non-honors course primarily in 3 ways. First, it frequently employs a seminar style, requiring that students take a larger role in presentation of course content. Second, it uses an expanded reading list, supplementing the textbook with journal articles. Third, its exams use entirely subjective questions, requiring a deeper level of analysis. The course explores physical oceanography, marine algae, marine vertebrate and invertebrate animals, and the ecology of various marine zones. Field trips focusing on intertidal organisms of the Central and Northern California Coast are required. Field experiences may include but are not limited to designing and conducting experiments in the rocky intertidal, invertebrate identification, salt marsh ecology, sandy beach ecology, estuary ecology, or comparative anatomy of fishes. The course is not open to students who have completed BIOL 370.

BIOL 491 Science Skills and Applications II

Units: 0.5
Hours: 27 hours LAB
Prerequisite: None.
Corequisite: Current enrollment in a science, nutrition, or nursing course.
Transferable: CSU

This course offers individualized instructional modules designed to acquire or improve study strategies for science, nursing, or nutrition courses. Strategies include goal setting, the intensive study cycle, graphic organizers, constructing and interpreting graphs, mastering science vocabulary, self-monitoring while reading, coding method of reading, and advanced problem solving. This course is offered in a flexible TBA format of 27 laboratory hours to accommodate the student’s schedule. Registration is open through the ninth week of the semester. Pass/No Pass only.

BIOL 495 Independent Studies in Biology

Units: 1 - 3
Hours: 54 - 162 hours LAB
Prerequisite: None.
Transferable: CSU

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

BIOL 499 Experimental Offering in Biology

Units: 0.5 - 4
Prerequisite: None.
Transferable: CSU

This is the experimental courses description.
Biology - Field Studies (BIOLFS) Courses

BIOLFS 499 Experimental Offering in Biology Field Studies
Units: 0.5 - 4
Prerequisite: None.
This is the experimental courses description.

Biotechnology (BIOT) Courses

BIOT 301 Biotechnology and Human Health
Units: 3
Hours: 54 hours LEC
Prerequisite: BIOL 303, BIOL 310, BIOL 400, BIOL 440, BIOL 442, or BIOT 307 with a grade of "C" or better
Transferable: CSU
This course introduces biotechnology as it pertains to human health and disease. Topics include an introduction to molecular biology and genetics, recombinant DNA technology, biopharmaceutical products, forensics and genetic testing, stem cells and regenerative medicine, genomics and bioinformatics, and ethical issues arising from biotechnology disease diagnosis and treatment.

BIOT 305 Introduction to Bioinformatics
Units: 1
Hours: 14 hours LEC; 14 hours LAB
Prerequisite: BIOL 303, BIOL 310, BIOL 400, BIOL 440, BIOL 442, BIOT 301, or BIOT 307 with a grade of "C" or better
Transferable: CSU
This course examines the basic concepts and techniques in bioinformatics, the computer analysis of nucleic acids and proteins. Topics include biotechnology databases, database searching, structure and function analysis of biological molecules, sequence alignment and analysis, and biological applications of bioinformatics.

BIOT 307 Biotechnology and Society
Units: 2
Hours: 36 hours LEC
Prerequisite: None.
Transferable: CSU; UC
This course examines the scientific and social impact of biotechnology by introducing basic technical concepts to examine recent advances. Topics include biotechnology applications in medicine, agriculture, industry, and the environment, and their ethical implications and public perception.

BIOT 311 Biotechnology Laboratory Methods - Molecular Techniques
Units: 2
Hours: 18 hours LEC; 54 hours LAB
Prerequisite: BIOL 300, BIOL 303, BIOL 310, BIOL 400, BIOL 440, BIOL 442, or BIOT 307 with a grade of "C" or better
Transferable: CSU
This course covers basic concepts and techniques to work effectively in a bioscience laboratory. Topics include laboratory solution preparation, recombinant DNA methods and nucleic acid analysis techniques, protein separation and analytical techniques, good laboratory practice, and product quality issues.

BIOT 312 Biotechnology Laboratory Methods - Microbial and Cell Culture Techniques
Units: 2
Hours: 18 hours LEC; 54 hours LAB
Prerequisite: BIOL 300, BIOL 303, BIOL 310, BIOL 400, BIOL 440, BIOL 442, or BIOT 307 with a grade of "C" or better
Transferable: CSU
This course covers basic concepts and techniques to work effectively in a bioscience laboratory. Topics include media preparation, microbial and plant cell culture techniques, biosafety guidelines, and DNA and enzyme diagnostic techniques.

BIOT 498 Work Experience in Biotechnology
Units: 0.5 - 4
Hours: 30 - 300 hours LAB
Prerequisite: None.
Enrollment Limitation: Students must be in a paid or unpaid internship, volunteer position, or job related to biotechnology with a cooperating site supervisor. Students are advised to consult with the Biotechnology Department faculty to review specific certificate and degree work experience requirements.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.
Transferable: CSU
General Education: AA/AS Area III(b)
This course provides students with opportunities to develop marketable skills in preparation for employment or advancement within the field of biotechnology. It is designed for students interested in work experience and/or internships in transfer-level degree occupational programs. Course content includes understanding the application of education to the workforce, completion of Title 5 required forms which document the student's progress and hours spent at the work site, and developing workplace skills and competencies.
During the semester, the student is required to complete 37.5 hours of related paid work experience, or 30 hours of related unpaid work experience for 0.5 unit. An additional 37.5 or 30 hours of related work experience is required for each additional 0.5 unit. All students are required to attend the first class meeting, a mid-semester meeting, and a final meeting. Additionally, students who have not already successfully completed a Work Experience course will be required to attend weekly orientations while returning participants may meet individually with the instructor as needed. Students may take up to 16 units total across all Work Experience course offerings. This course may be taken up to four times when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

BIOT 499 Experimental Offering in Biology
Units: 0.5 - 4
Prerequisite: None.
Transferable: CSU
This is the experimental courses description.
Associate Degree Graduation Requirements

Students may graduate from American River College with the Associate in Arts (AA) or the Associate in Science (AS) degree by fulfilling the following requirements:

1. Satisfactory completion of 60 units of collegiate work with a ‘C’ (2.0) grade point average (GPA) in a curriculum that the district accepts toward the degree. (This does not include courses numbered 200 to 299 if taken between fall 1989 and spring 2003, and courses numbered 1 to 99 and numbered 1000 or higher if taken after spring 2003.) At least 12 of the 60 units must be earned at American River College.

2. Major: completion of an AA or AS program of study offered at American River College. Courses used to complete requirements for the major must be completed with a grade of ‘C’ or better.

3. Completion of American River College’s general education requirements (https://arc.losrios.edu/2023-2024-catalog/graduation-and-transfer/associate-degree-graduation-requirements#ge) with a minimum GPA of 2.0 in courses used for general education (21 units minimum) or possession of a bachelor’s degree (BA/BS) or higher from a regionally accredited college or university in the US. Degrees from accredited institutions outside of the US will be evaluated on a case-by-case basis.

5. Catalog rights: students are held to the graduation requirements established at the time they begin college as long as they maintain their associate-degree-graduation-requirements#catalog-rights).

2023-2024 Graduation Competency Requirements

Demonstrate college-level competence in reading, written expression, and mathematics by completing the following:

A. Written Expression Competency (one of the following) –
   - Completion with a grade of ‘C’ or better of one of the following: BUS 310; ENGW 300, 480; ESLW 340
   - Possession of a bachelor’s degree or higher from a regionally accredited college in the US¹

B. Reading Competency (one of the following) –
   - Completion of American River College’s General Education pattern (https://arc.losrios.edu/2023-2024-catalog/graduation-and-transfer/associate-degree-graduation-requirements#ge) or any local general education pattern offered in the Los Rios Community College District
   - Completion and certification of the CSU GE Breadth pattern
   - Completion and certification of the IGETC pattern
   - Possession of an associate degree (AA/AS) or higher from a regionally accredited college in the US¹

C. Mathematics Competency (one of the following) –

¹ See District Policy P-7241: Graduation Requirements (shared/doc/board/policies/P-7241.pdf) and Regulation R-7241: Graduation Requirements (shared/doc/board/regulations/R-7241.pdf).

2023-2024 General Education Requirements for AA/AS Degrees

I. Humanities

Choose one course for a minimum of three semester units (four quarter units).

<table>
<thead>
<tr>
<th>Area</th>
<th>Courses</th>
</tr>
</thead>
</table>

* Courses appearing in more than one category may be used to satisfy only one category.

* These ethnic/multicultural courses can also satisfy general education category requirements.
II. Language and Rationality

Choose two courses for a minimum of six semester units (eight quarter units). Complete one course (three semester or four quarter units minimum) in each area.

<th>Courses</th>
</tr>
</thead>
</table>

* These ethnic/multicultural courses can also satisfy general education category requirements.

Catalog Rights

For the purpose of graduating or earning a certificate from any college in the Los Rios Community College District, a student who attends at least one session (whether quarter, semester, or summer) in each calendar year at any California community college, California State University, University of
California, or any regionally accredited institution of higher education, may choose to meet the requirements in effect at the Los Rios college from which the student intends to graduate, as follows:

- Requirements that were in effect at the time the student was admitted to a Los Rios college
- Requirements that were in effect at the time the student originally enrolled in an accredited college
- Requirements that were in effect at the intended date of graduation from a Los Rios college

Please note:

- A college may authorize or request substitution for discontinued courses.
- Students who change their major field of study may be required to complete those requirements for the major in effect at the point of change.
- For purposes of this section, “attendance” means taking classes in at least one session (semester or summer session) in each calendar year. Absence for attendance at another regionally accredited institution shall not be considered an interruption in attendance, per Los Rios Policy P-7242: Establishing Catalog Rights (shared/doc/board/policies/P-7242.pdf).
### Business

Our business degrees, certificates, and courses are designed to provide an entrance into exciting careers, opening doors to immediate employment and/or career advancement. We offer a variety of degrees and certificates to meet students’ present and future needs.

Depending on the course of study, our programs provide the skills for career opportunities as an: account executive, analyst, bank employee, buyer, clerk, data-entry clerk, data-entry specialist, entrepreneur, financial planner, government service, insurance representative, technical writer, investment counselor, manager, market research, office assistant, public administration, purchasing agent, retail/industrial sales, and stockbroker, along with many others.

### Degrees and Certificates Offered

- **A.S.-T. in Business Administration 2.0**
- **A.A. in Entrepreneurship**
- **A.A. in General Business**
- **Business Information Worker Certificate**
- **Computer Applications for Small Business Certificate**
- **Cross-Cultural Conflict Resolution Certificate**
- **Entrepreneurship/Small Business Management Certificate**
- **General Business Certificate**
- **Internet Marketing Certificate**
- **Marketing Essentials Certificate**
- **Technical Communications Certificate**
- **Soft Skills for the Global Environment Certificate**

**Division Dean** Kirsten Corbin  
**Department Chair** Rachna Nagi-Condos  
**Phone** (916) 484-8361

### Associate Degrees for Transfer

#### A.S.-T. in Business Administration 2.0

The Associate in Science in Business Administration 2.0 for Transfer (AS-T) degree provides students with a major that fulfills the general requirements for transfer to the California State University system. Students with this degree will receive priority admission with junior status to the California State University system. The Associate in Science in Business Administration 2.0 for Transfer (AS-T) degree may be obtained by the completion of 60 transferable, semester units with a minimum of a 2.0 GPA, including (a) a minimum grade of “C” (or “P”) for each course in the major or area of emphasis described in the Required Program, and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education-Breadth Requirements.

Students should work closely with their ARC counselor to ensure that they are taking the appropriate coursework to prepare for majoring in Business at the four-year college they wish to transfer to.

• communicate effectively with a diverse customer population.
• analyze organization challenges to formulate solutions to improve communication.
• describe elements of a sound customer service program.

Business (BUS) Courses

BUS 100 English for the Professional

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: BUSTEC 300.1 with a grade of "C" or better

This course prepares students for professional business communication and BUS 310: Business Communications. It presents principles of correct and effective English usage as applied in business. Included are skills and techniques of written communication, sentence structure, word usage, punctuation, spelling, business vocabulary, and business and employment document formatting. It emphasizes critical thinking and effective writing techniques by analyzing written communication and composing and organizing paragraphs into effective business documents. Proofreading skills are stressed throughout the course.

BUS 105 Business Mathematics

Units: 3
Hours: 54 hours LEC
Prerequisite: None.

This course covers the theory, writing skills, design background, and computer applications knowledge needed for jobs in technical communication.
This course reviews basic mathematical skills and introduces equations and formulas in solving for unknowns. Calculations for banking, commercial discounts, retail and wholesale markup-markdown, payroll computations, simple and compound interest, bank discount, present value, taxes, insurance, depreciation, and financial statements are explored. This course is recommended for business majors.

BUS 110 Business Economics

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340.
General Education: AA/AS Area II(b)

This course covers the sources and methods of raising capital for small businesses. It explores how much money is needed and where it can be obtained, start-up costs, and projecting monthly and yearly costs. Financial ratios and key financial statements are also covered.

BUS 210 The Business Plan

Units: 1
Hours: 18 hours LEC
Prerequisite: None.
Advisory: BUS 350; and eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340.
General Education: AA/AS Area V(b)

This course offers an organized, step-by-step approach to preparing a business plan. All sections of the business plan are covered.

BUS 212 Marketing for Small Businesses

Units: 1
Hours: 18 hours LEC
Prerequisite: None.
Advisory: BUS 350; and eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340.

This course covers how small businesses market products and services to consumers through the creation of a marketing plan. Topics include identifying target markets and utilizing the marketing mix to most effectively reach customers.

BUS 214 Financing a Small Business

Units: 1
Hours: 18 hours LEC
Prerequisite: None.

This course covers the sources and methods of raising capital for small businesses. It explores how much money is needed and where it can be obtained, start-up costs, and projecting monthly and yearly costs. Financial ratios and key financial statements are also covered.

BUS 216 Essential Records for the Small Business

Units: 1
Hours: 18 hours LEC
Prerequisite: None.
Advisory: BUS 105 and 350 with a grade of “C” or better.

This course emphasizes the various types of records that small businesses must keep. The focus is on financial, employment, and tax records. Simple, easy-to-use record-keeping systems are covered.

BUS 218 Management Skills for the Small Business

Units: 1
Hours: 18 hours LEC
Prerequisite: None.
Advisory: BUS 350 with a grade of “C” or better.

A small business owner must understand and motivate others to help the business reach its objectives. This course covers planning and organizing work flow, delegating responsibilities, leadership styles, decision making, stress management, and working with employee organizations, all of which help the business reach its objectives.

BUS 220 Retailing and Merchandising for the Small Business

Units: 1
Hours: 18 hours LEC
Prerequisite: None.
Advisory: BUS 105 and 350 with a “C” grade or better.

This course emphasizes retailing concepts, such as inventory control and turnover rates, selecting merchandise sources, using trade and cash discounts, pricing, markup and markdown, and shrinkage control. It also includes how to develop a merchandising plan, inventory control system, and assessing consumer behavior and demographics.

BUS 224 Customer Service

Units: 1
Hours: 18 hours LEC
Prerequisite: None.
Advisory: BUS 350

This course introduces a study of the principles involved in building and delivering effective customer service. It focuses on providing value-added service through improved attitude, improved listening, conflict management, problem solving, and successful customer service interactions.

BUS 228 Selling Techniques for the Small Business

Units: 1
Hours: 18 hours LEC
Prerequisite: None.
Advisory: BUS 350

This course focuses on those skills needed to successfully engage in the sales process of products/services. Special emphasis is given to small business owners and their needs.

BUS 250 Survey of International Business

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: BUS 300

This course is a comprehensive overview of international business, designed to provide both beginners and experienced business people with a global perspective on international trade, including foreign investments, impact of financial markets, international marketing, and the operation of multi-national corporations.

BUS 294 Topics in Business

Units: 0.5 - 4
Hours: 9 - 72 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340.
This course provides opportunities to study topics in business that are not included in current course offerings. Individualized topics may be developed in cooperation with business and industry to meet specialized training needs.

**BUS 295 Independent Studies in Business**

**Units:** 1 - 3  
**Hours:** 54 - 162 hours LAB  
**Prerequisite:** None.

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

**BUS 299 Experimental Offering in Business**

**Units:** 0.5 - 4  
**Prerequisite:** None.

This is the experimental courses description.

**BUS 300 Introduction to Business**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; OR ESLR 340 AND ESLW 340.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area V(b)  
**C-ID:** C-ID BUS 110

This course provides a multidisciplinary examination of how culture, society, economic systems, legal, international, political, financial institutions, and human behavior interact to affect a business organization's policy and practices within the U.S. and a global society. It covers specific areas such as management, marketing, finance, accounting, economics, and computer information systems. It is a core requirement for business majors. This course provides an overview that is helpful for selecting a specific career and/or major in the field of business.

**BUS 310 Business Communications**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** BUS 100 or ENGW 300 with a grade of "C" or better  
**Advisory:** BUSTEC 300.1  
**Transferable:** CSU  
**General Education:** AA/AS Area II(a)  
**C-ID:** C-ID BUS 115

This course provides the basic concepts for understanding communication in a changing business environment and focuses on practicing the strategies and principles of effective communication in business situations. Tools to communicate effectively in a fast-paced technological, global marketplace are emphasized. This experience provides opportunities to create, edit, evaluate, and critique business documents and reports. A formal research paper using research and analytical skills, and drawing conclusions and making recommendations is required. A business presentation is prepared and delivered.

**BUS 312 Workplace Behavior and Ethics**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.

Advisory: BUSTEC 300.1 and CISC 300 with a grade of "C" or better; and eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; OR ESLR 340 AND ESLW 340.  
**Transferable:** CSU  
**General Education:** AA/AS Area III(b)

This course introduces basic procedures that promote effective workplace practices. Specific topics include communicating effectively, working on teams, problem-solving, preparing and processing information, understanding business ethics, researching ethical business standards, and implementing ethical principles. Active techniques help to develop competencies needed in the workplace to communicate with coworkers and customers effectively.

**BUS 317 Managing Workplace Conflict**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Transferable:** CSU

This course focuses on identifying and understanding the underlying causes of workplace conflict and strategies for managing conflict effectively. It explores the impact of conflict on workplace communication, decision making, and leadership. It includes practical and strategic skills to prevent escalation of conflict and defuse disruptive behaviors.

**BUS 320 Concepts in Personal Finance**

**Same As:** ECON 320  
**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; OR ESLR 340 AND ESLW 340.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area V(b); AA/AS Area III(b); CSU Area D2

This course covers how to analyze financial affairs for lifelong decision making. It examines the basics of financial planning, analysis, and decision making in areas of budgeting, taxes, credit, money management, insurance, investments, and retirement with an emphasis on principles to develop economic decision-making skills. This course is not open to students who have completed ECON 320.

**BUS 330 Managing Diversity in the Workplace**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Transferable:** CSU  
**General Education:** AA/AS Area V(b); AA/AS Area VI; CSU Area D3

The course examines the leadership skills and abilities needed to manage a multicultural workplace. It focuses on the workplace impact of various historical, social, and cultural experience/perspectives related to gender, age, ethnicity, and disability. Workplace issues related to the diversity of the American consumer and global consumer impact on the United States are analyzed.

**BUS 332 Cross-Cultural Customer Service**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Transferable:** CSU

This course focuses on defining and developing skills to ensure customer service satisfaction and success. Emphasis is placed on dealing with difficult situations and people from a cross-cultural perspective, and on bringing out the best in others. It provides practical, hands-on techniques for those engaged in customer contact.
BUS 340 Business Law  
**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** ENGW 102 and ENGRD 116 with a grade of “C” or better; OR ESLR 320 and ESLW 320 with a grade of “C” or better.  
**C-ID:** C-ID BUS 125  
This course focuses on the law in its relationship to the environment of business. Topics covered include the American legal system as an instrument of economic, social, and political control, sources and processes of law, contracts and sales, agency, business organizations, ethics, and the regulatory process.

BUS 350 Small Business Management/Entrepreneurship  
**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Transferable:** CSU  
This course provides an overview of the various elements involved in starting and operating a small business. It covers developing a business plan, finding financial resources, meeting legal requirements, understanding marketing concepts, and other topics of interest to the entrepreneur.

BUS 495 Independent Studies in Business  
**Units:** 0.5 - 4  
**Hours:** 27 - 216 hours LAB  
**Prerequisite:** None.  
**Transferable:** CSU  
Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

BUS 498 Work Experience in Business  
**Units:** 0.5 - 4  
**Hours:** 30 - 300 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Students must be in a paid or unpaid internship, volunteer position, or job related to business with a cooperating site supervisor. Students are advised to consult with the Business Department faculty to review specific certificate and degree work experience requirements.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; OR ESLW 340.  
**Transferable:** CSU  
This course provides students with opportunities to develop marketable skills in preparation for employment or advancement within the field of business. It is designed for students interested in work experience and/or internships in transfer-level degree occupational programs. Course content includes understanding the application of education to the workforce, completion of Title 5 required forms which document the student’s progress and hours spent at the work site, and developing workplace skills and competencies.  
During the semester, the student is required to complete 37.5 hours of related paid work experience, or 30 hours of related unpaid work experience for 0.5 unit. An additional 37.5 or 30 hours of related work experience is required for each additional 0.5 units. All students are required to attend the first class meeting, a mid-semester meeting, and a final meeting. Additionally, students who have not already successfully completed a Work Experience course will be required to attend weekly orientations while returning participants may meet individually with the instructor as needed. Students who have not already successfully completed a Work Experience course will be required to attend weekly orientations while returning participants may meet individually with the instructor as needed. Students may take up to 16 units total across all Work Experience course offerings. This course may be taken up to four times when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

BUS 499 Experimental Offering in Business  
**Units:** 0.5 - 4  
**Prerequisite:** None.  
**Transferable:** CSU  
This is the experimental courses description.

General Education and Institutional Student Learning Outcomes

Philosophy

The primary function of education is to transmit from each generation to the next the knowledge and skills requisite to enlarge the comprehension of our place in the universe. General Education gives breadth to the college experience, enhances the ability to learn and develops critical thinking skills.

American River College is committed to the principle of providing general education which includes: Humanities, Languages and Rationality, Living Skills, Natural Sciences, Social and Behavioral Sciences and Ethnic/Multicultural Studies. All of these are basic and necessary to participate in and contribute to a balanced life in a democratic society that is diverse in its social, cultural and educational backgrounds.
Description of General Education Areas and Alignment with Institutional Student Learning Outcomes

Humanities (3 units minimum)

Courses in the humanities are those which study the cultural activities and artistic expressions of human beings. To satisfy the general education requirement in the humanities, a course should help the student develop an awareness of the ways in which people throughout the ages and in different cultures have responded to themselves and the world around them in artistic and cultural creation and help the student develop an aesthetic understanding and an ability to make value judgments. This category includes introductory or integrative courses in the arts, foreign languages, literature, philosophy, religion, and related disciplines.

Institutional Student Learning Outcomes Aligned with Humanities

- Demonstrate skills and behaviors which contribute to inclusive and respectful communication of diverse ideas and beliefs.
- Critically evaluate information to develop informed perspectives on a variety of issues, problems, and challenges.
- Contribute to society using personal knowledge, resources, and skills.
- For students earning degrees, demonstrate an understanding of basic content and methodology for the major areas of knowledge: arts and humanities, mathematics, natural sciences, and social sciences.

Languages and Rationality (6 units: 3 units each from (a) and (b))

Courses in language and rationality are those which use and examine principles and guidelines of clear and logical thinking and communication. Courses in this category should build upon rather than remediate verbal and quantitative skills.

a. English Composition: Courses fulfilling the written composition requirement should include both expository and argumentative writing.

b. Communication and Analytical Thinking: Courses fulfilling the communication and analytical thinking requirement include oral and written communication, mathematics, logic, statistics, computer language and programming, and related disciplines.

Institutional Student Learning Outcomes Aligned with Languages and Rationality

**English Composition Component**

- Utilize a variety of methods to communicate effectively.
- Use various technologies to collect information and solve problems.
- Critically evaluate information to develop informed perspectives on a variety of issues, problems, and challenges.

**Communication and Analytical Thinking Component**

- Use various technologies to collect information and solve problems.
- Critically evaluate information to develop informed perspectives on a variety of issues, problems, and challenges.
- For students earning degrees, demonstrate an understanding of basic content and methodology for the major areas of knowledge: arts and humanities, mathematics, natural sciences, and social sciences.

Living Skills (3 units minimum)

One physical education activity course (with ADAPT, DANCE, FITNS, PACT, SPORT, or TM ACT designators) must be taken in this area and a minimum of 2 units from the other courses included in this category. Adapted physical education courses are available for students with documented physical disabilities. These Adapted courses will fulfill the graduation requirement.

Courses in this area may be selected from a number of different disciplines that help students to acquire skills and knowledge to understand themselves as whole persons (integral to their environment). This category includes the study of courses that develop and maintain personal, social, physical and emotional well-being. It is the intent that this area includes such courses as health education, human sexuality, marriage and family, nutrition, and personal adjustment.

Institutional Student Learning Outcomes Aligned with Living Skills

- Demonstrate personal and professional readiness for career and/or academic advancement.
- Demonstrate skills and behaviors which contribute to inclusive and respectful communication of diverse ideas and beliefs.
- Utilize a variety of methods to communicate effectively.
- Work cooperatively and effectively with others.
- Use various technologies to collect information and solve problems.
- Critically evaluate information to develop informed perspectives on a variety of issues, problems, and challenges.
Natural Sciences (3 units minimum)

Courses in the natural sciences are those which examine the physical universe, its life forms and its natural phenomena. To satisfy the general education requirement in natural sciences, a course should help the student develop an appreciation and understanding of the scientific method, and encourage an understanding of the relationships between science and other human activities. This category includes introductory or integrative courses in astronomy, biology, chemistry, general physical science, geology, physical geography, physical anthropology, physics and other scientific disciplines.

Institutional Student Learning Outcomes Aligned with Natural Sciences

- Use various technologies to collect information and solve problems.
- Critically evaluate information to develop informed perspectives on a variety of issues, problems, and challenges.
- For students earning degrees, demonstrate an understanding of basic content and methodology for the major areas of knowledge: arts and humanities, mathematics, natural sciences, and social sciences.

Social and Behavioral Sciences (3 units minimum)

Courses in the social and behavioral sciences are those which focus on people as members of society. To satisfy the general education requirement in social and behavioral sciences, a course should help the student develop an awareness of the method of inquiry used by the social and behavioral sciences. It should stimulate critical thinking about the ways people act and have acted in response to their societies and should promote appreciation of how societies and social subgroups operate. This category includes introductory or integrative survey courses in anthropology, economics, history, political science, psychology, sociology and related disciplines, exclusive of those which fulfill the American Institutions requirement.

Institutional Student Learning Outcomes Aligned with Social and Behavioral Sciences

- Demonstrate skills and behaviors which contribute to inclusive and respectful communication of diverse ideas and beliefs.
- Utilize a variety of methods to communicate effectively.
- Work cooperatively and effectively with others.
- Use various technologies to collect information and solve problems.
- Critically evaluate information to develop informed perspectives on a variety of issues, problems, and challenges.
- For students earning degrees, demonstrate an understanding of basic content and methodology for the major areas of knowledge: arts and humanities, mathematics, natural sciences, and social sciences.

American Institutions Requirement (3 units minimum)

Courses in American Institutions are those which focus on the historical development of American institutions and ideals, the operation of representative democratic government under the Constitution of the United States, and the principles of state and local government established under the Constitution of this State. To satisfy the general education requirement in American Institutions, a course should help the student develop an appreciation and understanding of the basic institutions, ideals, knowledge, and skills necessary for intelligent and loyal citizenship. It should stimulate critical thinking, problem solving, and literacy skills in regard to American historical, political, governmental, economic, social, and intellectual issues as they relate to both domestic and foreign affairs. This category includes introductory or integrative survey courses in history and political science which qualify under the guidelines of either “a” or “b” below.

a. Any course which addresses the historical development of American Institutions and ideals, inclusive of the following:
   - Significant events occurring in the entire area now included in the United States of America, including the relationships of regions within that area and with external regions and powers as appropriate to the understanding of those events within the United States during the period under study.
   - The role of major ethnic and social groups in such events and the contexts in which the events have occurred.
   - The events presented within a framework which illustrates the continuity of the American experience and its derivation from other cultures including consideration of three or more of the following: politics, economics, social movements, and geography.

b. Any course which addresses the U.S. Constitution, representative democratic government operation, and the process of California State and local government, inclusive of the following:
   - The political philosophies of the framers of the Constitution and the nature and operation of United States political institutions and processes under that Constitution as amended and interpreted.
   - The rights and obligations of citizens in the political system established under the Constitution.
   - The Constitution of the State of California within the framework of evolution of Federal-State relations and the nature and processes of State and local government under that Constitution.
   - Contemporary relationships of State and local government with the Federal government, the resolution of conflicts and the establishment of cooperative processes under the constitutions of both the State and nation, and the political processes involved.

Institutional Student Learning Outcomes Aligned with American Institutions

- Utilize a variety of methods to communicate effectively.
- Work cooperatively and effectively with others.
• Use various technologies to collect information and solve problems.
• Critically evaluate information to develop informed perspectives on a variety of issues, problems, and challenges.
• Contribute to society using personal knowledge, resources, and skills.
• For students earning degrees, demonstrate an understanding of basic content and methodology for the major areas of knowledge: arts and humanities, mathematics, natural sciences, and social sciences.

Ethnic/Multicultural Studies

Ethnic studies will be offered in at least one of the required general education areas.

Students may fulfill the District’s Ethnic/Multicultural Studies course requirement through completion of one 3 unit course. Significant and substantial elements of the course must examine multicultural matters as specified by the criteria below.

• The course examines significant aspects of culture, contributions, and social experiences of under-represented ethnic/racial minority groups in the United States such as: African American, Asian American, Chicano, Latino, Hispanic Americans, and Native Americans; Non-western, Non-Eurocentric cultures.
• The course examines multiple groups, one of which may include European Americans and is comparative in nature.
• The course should include analysis of ethnicity, ethnocentrism, and/or racism, and how they shape and explain ethnic experience.

Institutional Student Learning Outcomes Aligned with Ethnic/Multicultural Studies

• Demonstrate skills and behaviors which contribute to inclusive and respectful communication of diverse ideas and beliefs.
• For students earning degrees, demonstrate an understanding of basic content and methodology for the major areas of knowledge: arts and humanities, mathematics, natural sciences, and social sciences.
Business Technology

The degree is designed to develop advanced skills needed for upper-level administrative support and office management careers. The course work includes communication skills, organizational management, business documents and projects, teamwork, financial data, ethics, and a variety of computer and office technologies.

Total Units: 33 - 34

The Administrative Professional Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- manage office operations including employee supervision, records management, supplies and equipment, administrative support, financial statements, and customer service.
- evaluate business projects, generate task lists, and prioritize completion of work.
- integrate word processing, spreadsheet, database, presentation, and electronic information management systems to complete business projects.
- create, revise, and evaluate verbal and written business messages demonstrating business communication techniques.
- utilize critical thinking, problem solving, and organizational management skills to complete work independently or in a group.
- analyze ethical dilemmas, utilize ethical decision-making processes, and determine appropriate ethical behavior.

Career Information

Typical career opportunities include clerical, administrative support, and executive assistant positions with private industry, non-profit organizations, and government entities.

A.A. in Virtual Administrative Professional

This degree offers enterprising individuals an opportunity to develop their own business ventures to perform administrative tasks using new technology and the Internet. The current trend toward "outsourcing" work supports the growing need for virtual professionals. Confidence in being customer focused and creative are essential activities of this program. The goal of the virtual administrative professional degree is to assist students in developing a niche that meets the needs of today's employers.

### Student Learning Outcomes

Upon completion of this program, the student will be able to:

- demonstrate basic keyboarding skills.
- solve common office problems using current business technology and software applications.
- practice effective communication with law office personnel and clients.
- apply appropriate ethical standards to the special situations encountered in a law office.
- produce written documents in appropriate formats using typical legal office technology.

### Career Information

Typical career opportunities are entry-level clerical positions in a law office. In order to earn an A.A. or a Certificate to become a Legal Assistant/Paralegal, see the Legal Studies Program requirements in the Behavior and Social Sciences Division.
Office Technology Certificate

This certificate offers technological skills in preparation for first-time employment, re-entry, or career advancement in a variety of office careers. Program topics include keyboarding/word processing, integrated office applications, organization and supervision of office activities, office procedures, business communications, critical thinking, and report writing.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- compose and format business documents demonstrating effective writing techniques and utilizing electronic technologies.
- follow procedures and guidelines for communicating with people over the telephone, through email, and with other technologies.
- analyze the purpose of a business project, select software, and follow procedures to complete the project.
- describe the different types of virtual environments.
- list the skills and work habits necessary for success in a virtual office career.
- identify and select job and career opportunities in virtual environments.
- determine requirements for setting up a virtual office.

Career Information

Typical career opportunities include administrative professional, executive and/or personal assistant, real estate virtual assistant, online assistant, meeting planner, travel planner, desktop publisher, graphic designer, clerical recruiter, newsletter editor, virtual meetings organizer, and virtual office assistant.

Certificate

Office Assistant Certificate

This certificate provides training in clerical procedures for entry-level office positions.

1 Individuals who hold a certificate as a Certified Administrative Professional (CAP) may receive credit for this option with evidence of completion of the CAP certification.
Student Learning Outcomes

Upon completion of this program, the student will be able to:

- perform keyboarding tasks successfully and competently in the workplace.
- solve business problems using current business technology and software applications.
- appropriately apply rules and procedures for the business environment.
- produce job search documents and demonstrate job search skills.

Career Information

Typical career opportunities are entry-level clerical positions.

Business Technology (BUSTEC) Courses

BUSTEC 100.1 Keyboarding Skills: Beginning

Units: 1
Hours: 12 hours LEC; 18 hours LAB
Prerequisite: BUSTEC 300.1 with a grade of "C" or better, or placement through the assessment process.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300 or BUS 310; OR ESLR 340 AND ESWL 340.

This course helps students improve their keyboarding speed and accuracy. Individualized skill improvement plans are based on a computerized assessment of computer keyboarding speed and accuracy. This course is not open to students who have previously completed the third module of BUSTEC 100. This course is for students who know how to correctly touch type and want to improve their keyboarding speed and accuracy. Students who want to learn to correctly touch type should take BUSTEC 300.1. Pass/No Pass only.

BUSTEC 100.2 Keyboarding Skills: Intermediate

Units: 1
Hours: 12 hours LEC; 18 hours LAB
Prerequisite: BUSTEC 100.1
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300 or BUS 310; OR ESLR 340 AND ESWL 340.

This course helps students improve their keyboarding speed and accuracy. Individualized skill improvement plans are based on a computerized assessment of computer keyboarding speed and accuracy. This course is not open to students who have previously completed the second module of BUSTEC 100. This course is for students who know how to correctly touch type and want to improve their keyboarding speed and accuracy. Pass/No Pass only.

BUSTEC 100.3 Keyboarding Skills: Advanced

Units: 1
Hours: 12 hours LEC; 18 hours LAB
Prerequisite: BUSTEC 100.2
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300 or BUS 310; OR ESLR 340 AND ESWL 340.

This course helps students improve their keyboarding speed and accuracy and builds upon the skills learned in BUSTEC 100.2. Individualized skill improvement plans are based on a computerized assessment of computer keyboarding speed and accuracy. This course is not open to students who have previously completed the third module of BUSTEC 100. This course is for students who know how to correctly touch type and want to improve their keyboarding speed and accuracy. Pass/No Pass only.

BUSTEC 101 Computer Keyboarding: 10-Key

Units: 1
Hours: 12 hours LEC; 18 hours LAB
Prerequisite: None.
Advisory: BUSTEC 300.1 with a grade of "C" or better

This course introduces the numeric keypad and alphanumeric data entry. Course content focuses on developing proper 10-key technique, speed, and accuracy. Simulated employment tests based on industry standards are included. Ten-key certification testing is completed at the end of the course.

BUSTEC 110 Business Procedures for Professional Success

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: BUSTEC 300.3 and 310

This course prepares business professionals to use office systems, technologies, and sustainable procedures to support today’s digital work environments. Topics include business communication, records management, and business document preparation, and storage. Critical thinking, problem solving, teamwork, supervision skills, administrative procedures, and information processing technologies are used to complete assignments and activities as a business professional. Primary emphasis is on processing documents using skills in word processing, spreadsheets, presentation graphics, database, digital storage, and communication media. These skills provide the background for advancement to supervisory and management positions.

BUSTEC 125 Clerical Assistant

Units: 6
Hours: 90 hours LEC; 54 hours LAB
Prerequisite: BUSTEC 300.1 with a grade of "C" or better; or ability to touch type at 25 wpm.
Corequisite: BUSTEC 101
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; or ESLR 340 AND ESWL 340.

This course covers the skills needed for entry-level clerical positions. Topics include word processing and spreadsheet applications; American Records Management Association (ARMA) filing procedures; office procedures and communications, including telephone, mail, email, and internet; soft-skills; and employability skills.

BUSTEC 126 Outlook: Basics

Same As: CISA 126
Units: 1
Hours: 18 hours LEC
Prerequisite: None.
Advisory: BUSTEC 300.1

This course introduces Microsoft Outlook, the industry-leading personal information management software. Topics include understanding and navigating the Outlook environment, creating and sending email, using email special features, managing Outlook contacts, using an electronic calendar, and creating tasks and to-do items. Completion of BUSTEC 126/CISA 126 and BUSTEC 127/CISA 127 prepares students to pass the Microsoft Office Specialist (MOS) certification for the Microsoft Outlook application. This course is not open to students who have completed CISA 126.
BUSTEC 127 Outlook: Tools

**Same As:** CISA 127  
**Units:** 1  
**Hours:** 18 hours LEC  
**Prerequisite:** BUSTEC 126 or CISA 126 with a grade of "C" or better  
**Advisory:** BUSTEC 300.1 with a grade of "C" or better

This course presents the advanced personal information management tools in Outlook. Topics include working with multiple email accounts, using rules and folders, incorporating advanced calendar and contact features, collaborating using sharing and delegate features, and customizing the Outlook user interface. In addition, the course covers the integration of Outlook with other applications in the Microsoft Office suite. Completion of BUSTEC 126/CISA 126 and BUSTEC 127/CISA 127 prepares students to pass the Microsoft Office Specialist (MOS) certification for the Microsoft Outlook application. This course is not open to students who have completed CISA 127.

BUSTEC 298 Work Experience in Business Technology

**Units:** 0.5 - 4  
**Hours:** 30 - 300 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Students must be in a paid or unpaid internship, volunteer position, or job related to the business technology field with a cooperating site supervisor. Students are advised to consult with the Business Technology Department faculty to review specific certificate and degree work experience requirements.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300 or BUS 310; OR ESLR 340 AND ESLW 340.  
**General Education:** AA/AS Area III(b)

This course provides students with opportunities to develop marketable skills in preparation for employment or advancement within the field of business technology. It is designed for students interested in work experience and/or internships in associate degree level or certificate occupational programs. Course content includes understanding the application of education to the workforce, completion of Title V required forms which document the student's progress and hours spent at an approved training site, and developing workplace skills and competencies.

During the semester, the student is required to complete 37.5 hours of related paid work experience, or 30 hours of related unpaid work experience for 0.5 unit. An additional 37.5 or 30 hours of related work experience is required for each additional 0.5 units. All students are required to attend the first course meeting, a mid-semester meeting, and a final meeting. Additionally, students who have not already successfully completed a Work Experience course will be required to attend weekly orientations while returning participants may meet individually with the instructor as needed. Students may take up to 16 units total across all Work Experience course offerings. This course may be taken up to four times when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

BUSTEC 299 Experimental Offering in Business Technology

**Units:** 0.5 - 4  
**Prerequisite:** None.  

This is the experimental courses description.

BUSTEC 300.1 Keyboarding/Applications: Beginning

**Units:** 1  
**Hours:** 12 hours LEC; 18 hours LAB  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300 or BUS 310; OR ESLR 340 AND ESLW 340.  
**Transferable:** CSU

This course introduces touch typing of alphabetic, numeric, and symbol keys. It covers keyboarding techniques, speed-and-accuracy development, and essential computer-keyboarding information. This course is specifically designed for the beginning typist as well as those who have been typing for a long time using improper technique. This course is not open to students who have previously completed the first module of BUSTEC 300.

BUSTEC 300.2 Keyboarding/Applications: Document Formatting

**Units:** 1  
**Hours:** 12 hours LEC; 18 hours LAB  
**Prerequisite:** BUSTEC 300.1 with a grade of "C" or better  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300 or BUS 310; OR ESLR 340 AND ESLW 340.  
**Transferable:** CSU

This course provides beginning to intermediate document formatting and skill development for academic, employment, personal, and businesses purposes. This course builds upon skills learned in BUSTEC 300.1 to provide students with additional computer keyboarding skills in the creation and modification of word processing documents. It covers use of an office-level word processing program to create and format business correspondence, academic reports, business reports, and tables. English grammar, spelling, punctuation, and proofreading are reinforced throughout. Timed writing tests are used to increase keyboarding speed and accuracy. This course is not open to students who have previously completed the second module of BUSTEC 300.

BUSTEC 300.3 Keyboarding/Applications: Advanced Document Formatting

**Units:** 1  
**Hours:** 12 hours LEC; 18 hours LAB  
**Prerequisite:** BUSTEC 300.2 with a grade of "C" or better  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300 or BUS 310; OR ESLR 340 AND ESLW 340.  
**Transferable:** CSU

This course provides advanced skill development of documents for business, academic, employment, or personal use. This course builds upon skills learned in BUSTEC 300.2. This course includes enhancing proofreading proficiency, reinforcing communication skills, increasing speed and accuracy, and using features of a current office-level word processing program to create a variety of business documents with advanced formatting. This course is not open to students who have previously completed the third module of BUSTEC 300.

BUSTEC 305 Introduction to Business Information Technology

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Transferable:** CSU

This course prepares business professionals to use office systems, technologies, and sustainable procedures to support today's digital work environments. Topics include the use of business-related hardware and software, business communication, electronic calendars, project management, records management, business document preparation, cloud-based applications, information storage, and team collaboration. Critical thinking, problem-solving, administrative procedures, and information processing technologies are used to complete assignments and activities applicable in a business environment. Skills learned will provide a foundation in information and communications technology used in administration and management positions. This course is not open to students who have previously taken BUSTEC 110.

BUSTEC 310 Introduction to Word/Information Processing

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB
Prerequisite: None.
Advisory: BUSTEC 100.1 or 300.1 with a grade of "C" or better
Transferable: CSU

This course is a review of basic word/information processing and introduces intermediate and advanced formatting for correspondence, tables, reports, newsletters, and other business-related documents. It emphasizes formatting and document production techniques to produce professional business documents used in today's workplace. Intermediate and advanced word processing topics include tables, columns, themes and styles, merge, graphics, macros, collaboration, and templates.

BUSTEC 313 Web-based Conferencing and Presentations for the Business Professional

Units: 2
Hours: 36 hours LEC
Prerequisite: None.
Advisory: BUS 310 and CISA 340
Transferable: CSU

This course develops business presentation skills indispensable in today's job market. Topics include data evaluation, content planning and organizing, visual aid development, and methods of presentation including web (video) conferencing and podcasting. Strategies for interviews, meetings, training, and group presentations typically found in a business environment are explored.

BUSTEC 332 Integrated Business Projects

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: BUSTEC 310, CISA 315, and CISA 320
Transferable: CSU

This course applies office administration skills and procedures using a suite of software. Course content integrates word processing, spreadsheet, database, presentation, and communication software to create, format, revise, share, and maintain business documents and data. Hands-on business projects require use of current office systems and incorporate problem-solving skills and real world business simulations.

BUSTEC 350 Virtual Careers and Technologies

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Transferable: CSU

This course explores careers in a virtual environment and identifies techniques and technologies needed by virtual workers. Specific topics include types of virtual environments, technologies and skills needed in a virtual office, ways to establish and manage a virtual career, effective communication, and job opportunities. This course also examines issues for career preparation in a virtual environment.

BUSTEC 499 Experimental Offering in Business Technology

Units: 0.5 - 4
Prerequisite: None.
Transferable: CSU

This is the experimental courses description.
Petition for a Certificate

How to Petition for a Certificate of Achievement

Students can file a petition for a Certificate of Achievement using our online graduation petition form (https://apps.arc.losrios.edu/GraduationPetition). Be prepared to fill out your personal information and each course that satisfies the major requirements. All requirements must be met by the end of the term in which you petition.

Our counseling team is here to help you succeed! You may meet with a counselor (https://arc.losrios.edu/student-resources/counseling/meet-with-a-counselor) before you submit your graduation petition to ensure that you have met all the requirements for your program.

Requirements

To petition for a certificate, students must:

1. Know their catalog year.*
2. Complete all certificate requirements with a minimum grade point average (GPA) of 2.0.
3. Complete at least 12 degree-applicable units toward the certificate at American River College. (This does not apply to Departmental Certificate programs that are less than 12 units.)

* Usually, students follow the current catalog year. However, if you are following certificate requirements from an old catalog, then you must have maintained catalog rights (https://arc.losrios.edu/2023-2024-catalog/graduation-and-transfer/petition-for-a-certificate#catalog-rights).

Required Documentation

The following must be on file in the Admissions and Records Office for a certificate petition to be processed:

- Official transcripts of all coursework completed at colleges outside of the Los Rios Community College District#
- Official copies of AP/IB/CLEP test scores, if applicable
- A copy of DD214-military discharge papers, if the veteran desires credit for military units
- List of courses in progress if attending another college
- Official final transcripts will be required at the end of the semester for the final certificate evaluation
- Copy of any required competency tests, if applicable

Students must complete all certificate requirements by the end of the semester in which they petition for a certificate.

# For coursework transferred to ARC from any institution other than a California community college, it is required that students make an appointment with an academic counselor and develop a curriculum planning sheet prior to submitting the graduation petition. External coursework may require a petition for course substitution/waiver approval through the department and use towards your program.

Petition Deadlines for 2023-2024

- Fall 2023: Friday, October 6, 2023
- Spring 2024: Friday, March 1, 2024
- Summer 2024: Friday, July 5, 2024

Approval or Denial

Final evaluations begin after final grades are posted at the end of each respective term/semester.

You will be notified via email if your petition is approved or denied.

If denied, then you will be notified of the missing requirements and advised to submit a new petition. If approved, then your certificate will be posted to your transcript within three to four months after the end of the semester.

All certificates will be mailed to the student’s address on file. If you need an accommodation to pick up a certificate in person, then contact the Admissions and Records office.

Catalog Rights

For the purpose of graduating or earning a certificate from any college in the Los Rios Community College District, a student who attends at least one session (whether quarter, semester, or summer) in each calendar year at any California community college, California State University, University of California, or any regionally accredited institution of higher education, may choose to meet the requirements in effect at the Los Rios college from which the student intends to graduate, as follows:

- Requirements that were in effect at the time the student was admitted to a Los Rios college
- Requirements that were in effect at the time the student originally enrolled in an accredited college
- Requirements that were in effect at the intended date of graduation from a Los Rios college

Please note:

- A college may authorize or request substitution for discontinued courses.
- Students who change their major field of study may be required to complete those requirements for the major in effect at the point of change.
- For purposes of this section, "attendance" means taking classes in at least one session (semester or summer session) in each calendar year. Absence for attendance at another regionally accredited institution shall not be considered an interruption in attendance, per Los Rios Policy P-7242: Establishing Catalog Rights (shared/doc/board/policies/P-7242.pdf).

Certificate Programs

American River College offers two types of certificates:

Certificate of Achievement

The Certificate of Achievement certifies that a student has completed all required courses and is prepared to enter the career designated on their certificate. Certificate of Achievement programs are developed to provide vocational training for students who are not necessarily seeking a college degree. Certificates of Achievement require a grade of "C" or better in each course with a minimum of 12 degree-applicable units completed at American River College.

Departmental Certificate

Departmental Certificates are intended to certify that students are prepared to meet specific occupational needs, upgrade skills, or advance in an existing career. A grade of "C" or better is required in each course leading to the Departmental Certificate. Departmental Certificates are not noted on transcripts.

Departmental Certificates require 15.99 units or fewer. For Departmental Certificates requiring one to 11 units, all units must be completed at American River College. For Departmental Certificates requiring 12 to 15.99 units, a minimum of 12 units must be completed at American River College.

Note: Department Certificates are also listed as Certificates under the program requirement.

Petition for a Degree

How to Petition for a Degree

Students can file a petition for a degree using our online graduation petition form (https://apps.arc.losrios.edu/GraduationPetition). Be prepared to fill out your personal information and each course that satisfies the general education areas and major requirements. All requirements must be met by the end of the term in which you petition.

We highly recommend that you meet with a counselor (https://arc.losrios.edu/student-resources/counseling/meet-with-a-counselor) before you submit your graduation petition to ensure that you have met all the requirements for your program.

Requirements

To petition for a degree, students must:

1. Know their catalog year*
2. Complete all degree requirements with a minimum grade point average (GPA) of 2.0
3. Complete at least 12 units toward the degree at American River College

* Usually, students follow the catalog year from which they began and maintained enrollment or the current catalog year. If you have questions about your catalog year, then please consult the information about catalog rights (https://arc.losrios.edu/2023-2024-catalog/graduation-and-transfer/petition-for-a-degree#catalog-rights) or a counselor.
Required Documentation

The following must be on file in the Admissions and Records Office for a degree petition to be processed:

- Official transcripts of all coursework completed at colleges outside of the Los Rios Community College District*
- Official copies of AP/IB/CLEP test scores, if applicable
- A copy of DD214-military discharge papers, if veteran desires credit for military units
- List of courses in progress if attending another college and official final transcripts will be required at the end of the semester for final degree evaluation
- Copy of any required competency tests, if applicable

Students must complete all degree requirements by the end of the semester in which they petition for a degree.

* External coursework may require a petition for course substitution/waiver approval through the department and use towards your program. Please check with your counselor for more information.

Petition Deadlines for 2023-2024

- Fall 2023: Friday, October 6, 2023
- Spring 2024: Friday, March 1, 2024
- Summer 2024: Friday, July 5, 2024

Approval or Denial

Final evaluations begin after final grades are posted at the end of each respective term/semester.

You will be notified via email if your petition is approved or denied.

If denied, then you will be notified of the missing requirements and advised to submit a new petition. If approved, then your degree will be posted to your transcript within three to four months after the end of the semester.

All diplomas will be mailed to the student's address on file. If you need an accommodation to pick up your diploma in person, then please contact the Admissions and Records office.

Chemistry

American River College’s chemistry program offers you a high quality education whether you are seeking to transfer to a four-year college, obtain an Associate’s Degree, or seeking to obtain career technical education. The highly trained faculty in the Chemistry Department is committed to rigorous academic standards, offering a large selection of classes at a variety of day and night times, a student-friendly atmosphere, and interactive classes. Our diverse faculty is dedicated to teaching and learning. They have backgrounds that cover all aspects of chemistry. The department provides hands-on experiential learning as well as access to a nationally award-winning peer assisted tutorial program (Beacon).

Degrees Offered

A.S. in General Science

The General Science Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- evaluate new and accepted ideas about the natural universe using scientific methods.
- analyze a wide variety of natural phenomena using basic definitions and fundamental theories of biological or physical sciences.
- apply appropriate quantitative and qualitative methods to interpret and analyze pertinent data.
- outline the basic concepts and fundamental theories of a natural science.
- articulate orally and/or in writing the importance of continuous examination and modification of accepted ideas as a fundamental element in the progress of science.
- discuss ethical components of scientific decision making and apply personal and social values within the process of decision making in scientific endeavors.

Chemistry (CHEM) Courses

**CHEM 83 Strategies for Problem Solving in General, Organic and Biological Chemistry**

**Units:** 0.75  
**Hours:** 40.5 hours LAB  
**Prerequisite:** None.  
**Corequisite:** CHEM 309

This course develops analytical reasoning strategies, critical thinking skills, and problem-solving abilities for both quantitative and qualitative problems in chemistry. It is designed to support students enrolled in CHEM 400 at American River College. Pass/No Pass only.

**CHEM 84 Strategies for Problem Solving in General Chemistry I**

**Units:** 0.75  
**Hours:** 40.5 hours LAB  
**Prerequisite:** None.  
**Corequisite:** CHEM 400

This course develops analytical reasoning strategies, critical thinking skills, and problem-solving abilities for both quantitative and qualitative problems in chemistry. It is designed to support students enrolled in CHEM 400 at American River College, with content that will be specific to CHEM 400. Pass/No Pass only.

**CHEM 86 Strategies for Problem Solving in Organic Chemistry I**

**Units:** 0.75  
**Hours:** 40.5 hours LAB  
**Prerequisite:** None.  
**Corequisite:** CHEM 420

This course develops analytical reasoning strategies, critical thinking skills, and problem-solving abilities for both quantitative and qualitative problems in chemistry. It is designed to support students enrolled in CHEM 420 at American River College. Pass/No Pass Only.

**CHEM 87 Strategies for Problem Solving in Organic Chemistry II**

**Units:** 0.75  
**Hours:** 40.5 hours LAB  
**Prerequisite:** None.  
**Corequisite:** CHEM 421

This course develops analytical reasoning strategies, critical thinking skills, and problem-solving abilities for both quantitative and qualitative problems in chemistry. It is designed to support students enrolled in CHEM 421 at American River College.
CHEM 88 Strategies for Problem Solving in Short Survey Organic Chemistry

Units: 0.75
Hours: 40.5 hours LAB
Prerequisite: None.
Corequisite: CHEM 423

This course develops analytical reasoning strategies, critical thinking skills, and problem-solving abilities for both quantitative and qualitative problems in organic chemistry. It is designed to support students enrolled in CHEM 423 at American River College.

CHEM 130 Chemistry for Funeral Service

Units: 4
Hours: 72 hours LEC
Prerequisite: None.
Corequisite: BUS 340, FSE 310, and FSE 320
Enrollment Limitation: Acceptance into the Funeral Service Education program.

This course is a survey of the basic principles of chemistry as they relate to funeral service. Topics include chemical principles involved in sanitation, disinfection, public health, and embalming practices. It also covers the development and use of personal, professional, and community sanitation practices, as well as use of and precautions related to potentially harmful chemicals that are currently used in the field of funeral service.

CHEM 305 Introduction to Chemistry

Units: 5
Hours: 72 hours LEC; 54 hours LAB
Prerequisite: MATH 100 or 122 with a grade of "C" or better
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLW 340.
Transferable: CSU; UC (Credit Limitation: No credit if taken after CHEM 400)
General Education: AA/AS Area IV; CSU Area B1; CSU Area B3; IGETC Area 5A; IGEC Area 5C
C-ID: C-ID CHEM 101; Part of C-ID PHYS 140

This course covers general principles of chemistry, such as unit analysis, atomic structure, nomenclature, mole concept, stoichiometry, and gases. It also introduces organic chemistry and biochemistry. This course is primarily designed for allied health majors.

CHEM 306 Introduction to Organic and Biological Chemistry

Units: 5
Hours: 72 hours LEC; 54 hours LAB
Prerequisite: CHEM 305 with a grade of "C" or better
Transferable: CSU; UC (Credit Limitation: No credit if taken after CHEM 400)
C-ID: C-ID CHEM 102

This course is a continuation of CHEM 305. It covers the organic functional groups and reactions involved in the chemistry of life (biochemistry) as applied to the health sciences.

CHEM 309 Integrated General, Organic, and Biological Chemistry

Units: 5
Hours: 72 hours LEC; 54 hours LAB
Prerequisite: MATH 100, 129, or 132 with a grade of "C" or better, or placement through the assessment process.
Corequisite: CHEM 83
Advisory: One year of high school chemistry with a grade of "C" or better; AND MATH 120 or MATH 133; AND eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300, OR ESLW 340.
Transferable: CSU; UC

CHEM 310 Chemical Calculations

Units: 4
Hours: 54 hours LEC; 42 hours LAB
Prerequisite: Completion of elementary algebra with a "C" or better.
Transferable: CSU; UC
General Education: AA/AS Area IV; CSU Area A1; CSU Area A3; IGETC Area 5A (effective Fall 2025); Cal-GETC Area 5C (effective Fall 2025); IGETC Area 5A; IGETC Area 5C
C-ID: C-ID CHEM 100

This course introduces calculations, terminology, chemical techniques, and laboratory techniques. It provides intensive problem solving skills necessary for CHEM 400.

CHEM 338 Chemistry In Your World

Units: 3
Hours: 40 hours LEC; 42 hours LAB
Prerequisite: Completion of elementary algebra with a "C" or better.
Transferable: CSU; UC
General Education: AA/AS Area IV; CSU Area A1; CSU Area A3; IGETC Area 5A (effective Fall 2025); Cal-GETC Area 5C (effective Fall 2025); IGETC Area 5A; IGETC Area 5C
C-ID: C-ID CHEM 110

This course forms links between chemistry and various academic disciplines. It explores the connection of chemistry to each and every one of us. This course begins with an introduction to the periodic table, basic atomic structure, and compounds. It covers fundamental concepts by analyzing environmental, health, social, historical, economic, cultural, and current scientific problems in chemical contexts. It applies the scientific method, introduces essential chemical laboratory techniques, and enhances research, written and oral communication skills.

CHEM 400 General Chemistry I

Units: 5
Hours: 54 hours LEC; 108 hours LAB
Prerequisite: MATH 120, 125, 129, or 133 with a grade of "C" or better AND one of the following: 1) CHEM 310 with a grade of "C" or better; or, 2) Previous chemistry course with a grade of "C" or better AND a passing score on the Chemistry Assessment Test from the Assessment Center at American River College.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLR 340 AND ESLW 340.
Transferable: CSU; UC
General Education: AA/AS Area IV; CSU Area A1; CSU Area A3; IGETC Area 5A; IGEC Area 5C
C-ID: C-ID CHEM 120S

This course covers the basic principles of chemistry with an emphasis on chemical calculations, chemical reactions including balancing of complicated reduction-oxidation (REDOX) reactions, stoichiometry, gas laws, thermochemistry, atomic structure and bonding theories, ionic equations, solutions, intermolecular forces and phases of matter, and acid/base chemistry including titrations and pH. Laboratory work is devoted to investigations of the theoretical work discussed in lecture.

CHEM 401 General Chemistry II

Units: 5
Hours: 54 hours LEC; 108 hours LAB
Prerequisite: CHEM 400 with a grade of "C" or better
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLR 340 AND ESLW 340.
CHEM 420 Organic Chemistry I

Units: 5
Hours: 54 hours LEC; 108 hours LAB
Prerequisite: CHEM 401 with a grade of "C" or better
Transferable: CSU; UC (CHEM 420 & 423 combined: maximum credit - one course)
C-ID: C-ID CHEM 150; Part of C-ID CHEM 160S

This course is designed to prepare students who are majoring in chemistry or chemical engineering, for transfer to a four-year institution, or to prepare students for entrance into professional schools in the fields of medicine, pharmacy, or dentistry. Emphasis is on the application of modern principles regarding structure, reactivity, methods of synthesis and physical properties of carbon compounds.

CHEM 421 Organic Chemistry II

Units: 5
Hours: 54 hours LEC; 108 hours LAB
Prerequisite: CHEM 420 with a grade of "C" or better
Transferable: CSU; UC
C-ID: Part of C-ID CHEM 160S

This course covers general physical and chemical properties of aromatic compounds, ethers, carbonyl compounds, amines, carbonyl derivatives, and biological compounds of interest. It also includes mass spectrometry, ultraviolet-visible (UV-VIS) spectroscopy, and carbon-13 nuclear magnetic resonance (NMR). Special attention is given to development of reaction mechanisms, methods of organic synthesis, and instrumental analysis as they apply to organic chemistry.

CHEM 423 Organic Chemistry - Short Survey

Units: 5
Hours: 72 hours LEC; 108 hours LAB
Prerequisite: CHEM 401 with a grade of "C" or better
Transferable: CSU; UC ((CHEM 420 & 423 combined: maximum credit - one course))
General Education: CSU Area B1; CSU Area B3; Cal-GETC Area 5A (effective Fall 2025); Cal-GETC Area 5C (effective Fall 2025); IGETC Area 5A; IGETC Area 5C

This course is a survey of carbon containing compounds with emphasis on organic compounds of biological interest. Topics include the chemistry of organic functional groups, Infrared spectroscopy, and mechanisms of reactions. This course is designed primarily for students majoring in the life sciences, nutrition/dietetics, and related fields. This course is not recommended for students majoring in chemistry, chemical engineering, medicine, dentistry, pharmacy, or chiropractics.

CHEM 495 Independent Studies in Chemistry

Units: 1 - 3
Hours: 54 - 162 hours LAB
Prerequisite: None.
Transferable: CSU

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

CHEM 499 Experimental Offering in Chemistry

Units: 0.5 - 4
Prerequisite: None.
Transferable: CSU

This is the experimental courses description.

Commencement

American River College has one commencement ceremony in May of each year, at the end of the spring semester. Students who meet and satisfy the graduation requirements during the prior summer term (August), prior fall semester (December), or during the spring semester may participate in the graduation commencement exercise.

The 2023-2024 commencement ceremony will be held on May 16, 2024.

All students who are eligible for an associate degree must petition for graduation.
Communication

The number-one skill identified by employers is the ability to communicate clearly in both oral and written form. The number-two skill identified by employers is the ability to work effectively as a member of a group or team. Communication courses are vital to developing the communication skills necessary for personal and professional success.

Communication courses offer instruction and practice in a variety of communication settings. The program includes theory and practice in public speaking, group work, and interpersonal relationships. Critical thinking, listening, and communicating across cultures are also part of the program.

Degrees Offered

A.A.-T. in Communication Studies

Dean (Interim) Corinne Arrieta Katzorke
Department Chair David Austin
Phone (916) 484-8653

Associate Degree for Transfer

A.A.-T. in Communication Studies

This degree provides a foundation for students to transfer to a CSU campus with a major in Communication, Speech Communication, Communications, or Communication Studies.

The Associate in Arts degree in Communication Studies for Transfer provides students with a major that fulfills the general requirements of the California State University for transfer. Students with this degree will receive priority admission with junior status to the California State University system.

The Associate in Arts degree in Communication Studies for Transfer (A.A.-T) may be obtained by the completion of 60 transferable, semester units with a minimum overall grade point average (GPA) of 2.0, including (a) a minimum grade of "C" (or "P") for each course in the major or area of emphasis described in the Required Program, and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education-Breadth Requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

• assess the factors which contribute to communication competency.
• generate strategies to communicate effectively with others in dyads, groups, and public situations.
• evaluate the role of communication in human interactions.
• analyze evidence, reasoning, and persuasive appeals for credibility, logic, and relevance.
• demonstrate skills and behaviors which contribute to open and respectful communication of diverse ideas and beliefs.

Career Information

A primary skill employers in all fields seek is effective communication. A degree in Communication Studies enriches personal development and enhances opportunities for employment and promotion in such diverse professional fields as education, law, law enforcement, health, science, management, organizational development, psychology, public service, sales, training, entertainment, and social services.

Communication (COMM) Courses

COMM 301 Introduction to Public Speaking

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGW 300; OR ESLW 340
Transferable: CSU; UC
General Education: AA/AS Area II(b); CSU Area A1; IGETC Area 1C
C-ID: C-ID COMM 110

This course covers oral composition and delivery of messages in public speaking situations. It focuses on how to manage anxieties about speaking in front of a live audience, organize ideas when speaking to inform and persuade, use supporting materials to increase the effectiveness of messages, appeal to different audiences, and critically evaluate messages. By the end of the course, students will be more confident and effective in oral communication situations. Audio/video recording equipment may be used as an aid to self-analysis and improvement.

This course is formerly known as SPEECH 301.

COMM 302 Persuasive Speech

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
COMM 311 Argumentation and Debate

Units: 3  
Hours: 54 hours LEC  
Prerequisite: None.  
Advisory: SPEECH 301, ENGWR 300, or ENGWR 480  
Transferable: CSU; UC  
General Education: AA/AS Area III(b); CSU Area A1  
C-ID: C-ID COMM 130

This course focuses on critical thinking with an emphasis on building and analyzing logical arguments. Rhetorical strategies are discussed and practiced. The course covers organization, supporting materials, delivery of effective arguments, and the use of questioning in critical thinking. This course is formerly known as SPEECH 311.

COMM 321 Interpersonal Communication

Units: 3  
Hours: 54 hours LEC  
Prerequisite: None.  
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.  
Transferable: CSU; UC  
General Education: AA/AS Area VI; CSU Area D; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4  
C-ID: C-ID COMM 150

This course focuses on communication between individuals, with emphasis on the acquisition of techniques and skills essential to self-actualization and to establishing authentic personal, social, familial, and professional relationships over a lifetime. Effective communication strategies are discussed, practiced, and reflected upon. This course is formerly known as SPEECH 321.

COMM 325 Intercultural Communication

Units: 3  
Hours: 54 hours LEC  
Prerequisite: None.  
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.  
Transferable: CSU; UC  
General Education: AA/AS Area II(b); CSU Area A1; IGETC Area 1C  
C-ID: C-ID COMM 130

This course is an introduction to the challenges and rewards of intercultural communication in everyday situations. It is designed to increase understanding of variations in communication patterns across cultures and prepares individuals for more effective communication. The course emphasizes both international culture variance and sub-cultural group-based experiential background variance. This course is formerly known as SPEECH 325.

COMM 331 Group Discussion

Units: 3  
Hours: 54 hours LEC  
Prerequisite: None.  
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.  
Transferable: CSU; UC  
General Education: AA/AS Area III(b); CSU Area A1; IGETC Area 1C  
C-ID: C-ID COMM 130

This course is a detailed study of persuasive discourse through an understanding of basic communication principles. Emphasis is placed on the use of proofs, language, and logical thinking. Audio- and/or video-recording equipment may be used as an aid for self-analysis and improvement. This course is formerly known as SPEECH 302.
While You Are Here

Make a Plan for Transfer Success

Students who plan to transfer to the California State University (CSU) system, the University of California (UC) system, or to a private or out-of-state college or university should make an education plan with a counselor. This will ensure you meet the requirements for the specific institution you plan to attend.

Transfer eligibility is based on transferable college units and/or high school records and test scores. Each institution has its own admission requirements. To prepare for transfer:

1. Decide where you want to transfer
2. Talk to a counselor about that school's specific requirements
3. Create an education plan
Community Services Education

Community Services offerings enable you to improve the quality of your life through lifelong learning. This program of fee-based classes is designed to serve individuals with educational goals that do not require college credit.

Community Services Education (CSERV) Courses

CSERV 2040 Medical Spanish: Part 1

Units: 0
Prerequisite: None.

This course is designed to help community members and people who are interested in helping the sick by providing the following: Medical Spanish Terminology and phrases for non-native speakers of Spanish wishing to enhance their ability to communicate with their Spanish-speaking patients, as well as for native speakers of Spanish wishing to broaden their use of medical terminology in order to be able to communicate more effectively with their family members in a variety of health settings. Emphasizes oral communication in a variety of medical settings by focusing on basic language exchange between doctor/nurse and patient. No prior knowledge of Spanish required. *Provider Approved by the Board of Registered Nursing for 32 Contact Hours per 8-week course. Provider #CEP15540.

CSERV 2041 Medical Spanish: Part 2

Units: 0
Prerequisite: None.

This course is designed to help community members and people who are interested in helping the sick by providing the following: Medical Spanish Terminology and phrases for non-native speakers of Spanish wishing to enhance their ability to communicate with their Spanish-speaking patients, as well as for native speakers of Spanish wishing to broaden their use of medical terminology in order to be able to communicate more effectively with their family members in a variety of health settings. Emphasizes oral communication in a variety of medical settings by focusing on vocabulary and phrases used by specialists and their patients. Basic prior knowledge of Spanish recommended. *Provider Approved by the Board of Registered Nursing for 32 Contact Hours per 8-week course. Provider #CEP15540.

CSERV 2042 Medical Spanish: Part 3

Units: 0
Prerequisite: None.

This course is designed to help community members and people who are interested in helping the sick by providing the following: Medical Spanish Terminology and phrases for non-native speakers of Spanish wishing to enhance their ability to communicate with their Spanish-speaking patients, as well as for native speakers of Spanish wishing to broaden their use of medical terminology in order to be able to communicate more effectively with their family members in a variety of health settings. Emphasizes oral communication in a variety of medical settings by focusing on vocabulary and phrases used at medical centers and hospitals. Some prior knowledge of Spanish, along with the ability to converse in both the present and the past, recommended. *Provider Approved by the Board of Registered Nursing for 32 Contact Hours per 8-week course. Provider #CEP15540.

CSERV 2043 Medical Spanish: Part 4

Units: 0
Prerequisite: None.

This course is designed to help community members and people who are interested in helping the sick by providing the following: Medical Spanish Terminology and phrases for non-native speakers of Spanish wishing to enhance their ability to communicate with their Spanish-speaking patients, as well as for native speakers of Spanish wishing to broaden their use of medical terminology in order to be able to communicate more effectively with their family members in a variety of health settings. Emphasizes oral communication in a variety of medical settings by focusing on different health problems current to society. Some prior knowledge of Spanish with the ability to converse in the present, past and future recommended. *Provider Approved by the Board of Registered Nursing for 32 Contact Hours per 8-week course. Provider #CEP15540.

CSERV 2080 BAR A-6 Alternative - Electrical and Electronic Systems Training

Units: 0
Prerequisite: None.

This course is an intensive Bureau of Automotive Repair-approved review of automotive electrical/electronic systems. It partially satisfies the ASE certification requirement when applying for a Smog Check technician license.

CSERV 2081 BAR A-8 Alternative - Engine Performance Systems

Units: 0
Prerequisite: None.

This course is an intensive Bureau of Automotive Repair-approved review of automotive engine performance systems. It partially satisfies ASE certification requirement when applying for a Smog Check technician license.

CSERV 2082 BAR Approved L-1 Alternative

Units: 0
Prerequisite: None.

This course is preparation for the Bureau of Automotive Repair (BAR) – approved Advanced Engine Performance Exam. Topics covered include Power Train Diagnosis, Computer Control Diagnostics, Ignition System Diagnostics, Fuel and Air Induction Diagnostics, Emission Control Diagnostics, and I/M Failure Diagnosis. The BAR L-1 Alternative test is administered at the end of the class.

CSERV 2083 Bureau of Automotive Repair Emissions Update

Units: 0
Prerequisite: None.

This course is required for all licensed smog technicians who need to meet California emissions control smog license renewal standards.

CSERV 2087 California Council on Diesel Education and Technology 1 (CCDET 1)

Units: 0
Prerequisite: None.

This course is a review of automotive engine performance systems. It partially satisfies the ASE certification requirement when applying for a Smog Check technician license.
This course is offered to individuals who have received emissions code violations. It covers the California Council on Diesel Education and Technology, or CCDET requirements for Heavy Duty Vehicle Inspection and Periodic Smoke Detection Programs. Topics include common causes of high diesel smoke levels and smoke diagnostic information.

**CSERV 2089 California Council on Diesel Education and Technology 2 (CCDET 2)**

**Units:** 0

**Prerequisite:** None.

This course is offered to individuals who have received emissions code violations. It covers the California Council on Diesel Education and Technology, or CCDET requirements for After-treatment and Maintenance as it applies to Diesel exhaust. Topics include strategies to reduce diesel particulate matter and Heavy Duty Diesel Engine certification standards.

---

**Transfer to California State University**

**Transfer Requirements**

A maximum of 70 transferable units completed at California community colleges can be applied to a baccalaureate degree. Coursework completed that exceeds the 70-unit maximum may be given "subject credit" after transfer. Consult with a counselor.

You may be eligible for transfer to the California State University (CSU) system after you complete the following at a California community college:

1. A minimum of 60 transferable units with a 2.0 grade point average*
2. Either of the following general education requirements:
   1. At least 30 units of CSU general education requirements (https://arc.losrios.edu/catalog/csu-ge), including:
      1. Area A1, A2, and A3
      2. Area B4
   2. Intersegmental General Education Transfer Curriculum (IGETC) requirements (https://arc.losrios.edu/catalog/igetc)

In addition to general education and graduation requirements, we encourage you to complete lower-division preparatory courses for your major as required by the CSU to which you want to transfer. You can find lower-division major requirements at assist.org (https://assist.org), the official state-wide repository for transfer and course articulation information.

* GPA requirements are higher for campuses or majors that are impacted or more competitive. The minimum GPA for international or non-resident students is 2.4 instead of 2.0.

**Application Dates and Deadlines**

Priority application deadlines for CSU:

- For fall admission, October 1 to November 30 of the prior year
- For spring admission, August 1 to 31 of the prior year
Computer Information Science

Certificates and degree programs pull from multiple categories to make up a concentration of courses designed to help you succeed.

Computer Information Science Department courses at American River College are broken down into categories, including:

- CISA - Computer Applications
- CISC - Computer Core Classes
- CISN - Computer Networking
- CISP - Computer Programming
- CISS - Computer Security
- CISW - Web

Degrees and Certificates Offered

A.S. in CIS: Computer Networking Management
A.S. in CIS: Computer Programming
A.S. in CIS: Database Management
A.A. in CIS: Microcomputer Applications
A.S. in CIS: PC Support Management
A.S. in Computer Science
A.S. in Cybersecurity and Information Assurance
CIS: Computer Networking Management Certificate
CIS: Computer Programming Certificate
CIS: Database Management Certificate
CIS: Microcomputer Applications Certificate
CIS: PC Support Certificate
Computer Information Security Essentials Certificate
Cybersecurity and Information Assurance Certificate
Enterprise Mainframe System Administration Certificate
Enterprise Software Engineering and Development Apprenticeship Certificate
Guided Pathways Milestone Certificate for Multilingual Speakers: Pathway to Computer Info Science Certificate
Internet Marketing Certificate
Network Administration Essentials - Windows Certificate
Technical Communications Certificate
Web Developer Certificate
Web Publishing (Front-End) Certificate

Division Dean Kirsten Corbin
Department Chair Tak Auyeung
Phone (916) 484-8361

Associate Degrees

A.S. in CIS: Computer Networking Management

This degree covers network administration technologies, techniques, and the hardware and software used in today's business/enterprise networking environment. Major topics covered include installation, configuration, and troubleshooting of network operating systems. The degree stresses the knowledge and skills required for the day-to-day operation, business aspects, security and management of computer networks. This degree has three distinct concentrations with specific courses for each concentration track:

1. Microsoft Windows networking concentration, focusing on preparing for the Microsoft Certified Systems Engineer (MCSE) and/or the Microsoft Certified Systems Administrator (MCSE) certification.
2. Linux/Unix networking concentration, focusing on preparing for the administration of commercial Linux/Unix servers and network environments.
3. Cisco router and network administration concentration, which covers all the objectives of the Cisco Certified Network Associate (CCNA) certification exam.

### Career Information

This degree is designed for career/technical students who plan to enter the workforce as well as working IT professionals that wish to upgrade their skills. Typical careers a student could expect to pursue include network technical support staff, network administrators, network designers, network systems engineer, network troubleshooters, and information systems security specialists.

### A.S. in CIS: Computer Programming

This degree includes general topics in the field of computer programming, including but not limited to, programming language, the use of an operating system, and the translation of a problem statement into a generic program solution. Programming language-specific topics include syntax, program structuring, language constructs and proper programming methods.

**Total Units:** 12 - 14

The CIS: Computer Programming Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

### Student Learning Outcomes

Upon completion of this program, the student will be able to:

- **WINDOWS CONCENTRATION:** Install, configure, monitor, manage, backup, and customize a Microsoft server.
- Design, construct and apply group policies and NTFS file system permissions to secure files and network resources.
- Design, construct and troubleshoot a Microsoft Active Directory network using Microsoft workstation and server operating systems.
- **CISCO CONCENTRATION:** Design, evaluate, construct and implement a routed IP network using industry standard routing protocols and routing equipment, in a wired or wireless configuration.
- Design, evaluate, construct and implement a multilayer switching network using switching protocols, such as Ethernet, in a wired or wireless configuration.
- Design, install and test Wide Area Network (WAN) connectivity solutions.
- Design and evaluate basic security and access solutions in a switched or routed LAN or WAN.
- Design, evaluate, specify, and install various types of network media.
- **LINUX/UNIX CONCENTRATION:** Install, configure, monitor, manage, backup, and customize a Linux server.
- Design, evaluate and implement and troubleshoot typical Linux server services in the areas of user accounts and security, printing, web server, telnet server, firewall, email server, domain name service, dynamic host configuration protocol, network file system, and Microsoft Windows compatibility.
Student Learning Outcomes
Upon completion of this program, the student will be able to:

- describe how programming relates to the development of an information system.
- develop programs using the top-down method.
- apply structured programming techniques.
- translate a detailed design document into a computer programming language solution.
- verify the syntactic correctness of a program.
- verify the logical correctness of a program.
- analyze the behavior of a program and locate defects.

Career Information
Upon completion of the computer programming degree, a student meets the minimum qualifications as an entry-level programmer/developer.

A.S. in CIS: Database Management
The CIS: Database Management degree focuses on relational database technology used in the business environment. The emphasis is on selecting the appropriate system platform for database deployment. Course work includes database system design and programming for desktop, enterprise and Internet platforms, structure query language (SQL) programming, introductory principles of modular programming, system design and problem solving, desktop operating systems, electronic spreadsheets and a variety of introductory business courses.

The CIS: Database Management Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Student Learning Outcomes
Upon completion of this program, the student will be able to:

- describe relational database technologies for desktop, enterprise and Internet platforms.
- explain and discuss database theory and principles.
- employ relational database technologies for either desktop, enterprise and Internet platforms to solve common business problems using standard database principles and practices.
- assess and document information system requirements.
- employ modular programming concepts in program development.
- design and code elementary programs encountered in business and government.
- identify interactive web publishing situations requiring database solutions.
- create interactive web database.
- analyze practical business problems and utilize critical thinking in the determination of alternative solutions.
- apply communication theory, effective writing techniques, and interpersonal communication skills to business situations.
- analyze and explain the nature and purpose of accounting and its function in business.

A.A. in CIS: Microcomputer Applications
This degree focuses on the use of the microcomputer and current, commonly used software to solve problems in a business environment. Course work includes microcomputer applications in database management, desktop publishing, electronic spreadsheets, presentation graphics, operating systems, word processing, and at least one programming language.

Total Units: 37

The CIS: Microcomputer Applications Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

• design and manage database tables, queries and forms.
• produce reports for use in a typical business environment.
• evaluate the basic computing needs of a business by developing associated documentation and presentations.
• create spreadsheet formulas and manipulate business data.
• compose and format typical business communications documents according to industry standards.
• combine data from different software applications into one document.
• compose simple computer programs using basic logic.
• apply file management techniques in organizing computer data.

A.S. in CIS: PC Support Management

The CIS: PC Support Management degree covers the use and maintenance of a microcomputer’s hardware, software and network connections in today’s business environment. Course work includes learning basic computer skills in configuration, use, and troubleshooting major hardware components, different operating systems, and applications in a standalone and network environment. Additionally, the degree introduces basic business and project management skills. This program covers all the objectives of the Computing Technology Industry Association (CompTIA) A+ certification exam.

1Taken on the Windows operating system.

The CIS: PC Support Management Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

• Identify the names, purpose, and characteristics of system components.
• Evaluate and demonstrate basic procedures for adding and removing field replaceable components for desktop computers.
• Analyze and demonstrate the installation and troubleshooting of current operating systems, applications and basic networking technology used in industry.
• Formulate back-up, recovery, and system protection plans for the operating system in a network environment.
• Develop proficiency in customer service skills to effectively diagnose and communicate microcomputer software and hardware-related problems and solutions at the user level.
• Demonstrate the techniques to manage a project, control costs, and schedule resources employing management software.
• Recognize within the information technology (IT) field the diverse business environment associated with support issues.
• Configure and implement data security methods for protecting computers and networks from unauthorized access.

A.S. in Computer Science

This degree provides a comprehensive exposure to programming languages, algorithms and problem solving in preparation for upper division computer science courses. The Computer Science degree includes substantial course work in mathematics required by most university computer science programs.

Degree Requirements

<table>
<thead>
<tr>
<th>Course Code</th>

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- evaluate various programming language solutions to a proposed problem.
- recommend tools and techniques for each step in the development of a computer program.
- integrate the basic mathematical knowledge that is fundamental to computer science into the solutions of proposed problems.
- evaluate the theories and core techniques of computer science using scientific methods.

A.S. in Cybersecurity and Information Assurance

This program prepares IT professionals to apply knowledge and experience in network security, risk management, intrusion detection, remediation, and digital forensics to safeguard infrastructure and secure data and business operations. Courses deliver proven methods for information security using software analysis techniques, web engineering, cloud management, and networking strategies to prevent, detect, and mitigate cyberattacks. This program also provides preparation for several nationally recognized, high demand certifications in the field of Cybersecurity.

Career Information

Certificates of Achievement

CIS: Computer Networking Management Certificate

The CIS: Computer Networking Management certificate provides instruction for entry-level and IT professionals aiming for skill enhancement on the specific knowledge and skills required to master one of three industry standard network technologies:

- Microsoft Windows networking concentration, focusing on preparing for the Microsoft Certified Systems Engineer (MCSE) and/or the Microsoft Certified Systems Administrator (MCSA) certification.
- Linux/Unix networking concentration, focusing on preparing for the administration of commercial Linux/Unix servers and network environments.
- Cisco router and network administration concentration, which covers all the objectives of the Cisco Certified Network Associate (CCNA) certification exam.

</table>
Upon completion of this program, the student will be able to:

- demonstrate competency in basic Microsoft Windows and Linux operating system terminology, command line interface commands, account management, and file management and storage.
- define networking terminology, protocols, industry standard models, and best practices for configuring network operating system services.
- configure and implement basic data security methods for protecting servers, workstations and networks from unauthorized access.
- evaluate and demonstrate basic procedures for troubleshooting and replacing field replaceable components in microcomputers.
- implement, evaluate and troubleshoot a transmission control protocol/internet protocol (TCP/IP) addressing scheme.
- define, implement, evaluate and troubleshoot the most common utilities and protocols of the TCP/IP suite.

• CISCO CONCENTRATION:
  - design, evaluate, construct and implement a routed network using TCP/IP and industry standard routing protocols and state of the technology routing equipment, in a wired or wireless configuration.
  - design, evaluate, construct and implement a multi-layer switching network using switching protocols, such as Ethernet, in a wired or wireless configuration.
  - design, install and test Wide Area Network (WAN) connectivity solutions.
  - design and evaluate basic security and access solutions in a switched or routed LAN or WAN.
  - evaluate, specify, and install various types of network media.

• LINUX/UNIX CONCENTRATION:
  - install, configure, monitor, manage, backup, and customize a Linux server.
  - design, evaluate and implement and troubleshoot typical Linux server services in the areas of user accounts and security, printing, web server, telnet server, firewall, email server, domain name service, dynamic host configuration protocol, network file system, and Microsoft Windows compatibility.

• WINDOWS CONCENTRATION:
  - install, configure, monitor, manage, backup, and customize a Microsoft Windows server.
  - design, construct and apply group policies and NTFS file system permissions to secure files and network resources.
  - design, construct and troubleshoot a Microsoft Active Directory network using Microsoft workstation and server operating systems.

### CIS: Computer Programming Certificate

This certificate includes general topics in the field of computer programming, including but not limited to, programming language, the use of an operating system, and the translation of a problem statement into a generic program solution. Programming language-specific topics include syntax, program structuring, language constructs and proper programming methods.

Java concentration Units: 14 - 16

Total Units: 18 - 20

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- apply techniques of structured programming.
- design programs using object-oriented methodology.
- analyze problems related to computer programming.
- design algorithms to solve problems related to programming.
- develop specifications of an information system based on requirements.
- compare alternative implementations of programmed solutions using a variety of criteria.
- describe how programming fits in the context of the development of an information system.

Career Information

This programming certificate enables people who are already in the information technology or computer fields to develop or supplement their skills with the experience of an additional programming language.

CIS: Database Management Certificate

The CIS: Database Management certificate involves the study of relational database technology used in the business environment. The emphasis is on selecting the appropriate system platform for database deployment. Course work includes database system design and programming for desktop, enterprise and Internet platforms, structure query language (SQL) programming, introductory principles of modular programming, system design and problem solving, desktop operating systems, and electronic spreadsheets.

</tbody>
</table>

Total Units: 21

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- describe relational database technologies for desktop, enterprise and Internet platforms.
- explain and discuss database theory and principles.
- employ relational database technologies for either desktop, enterprise and Internet platforms to solve common business problems using standard database principles and practices.
- assess and document information system requirements.
- employ modular programming concepts in program development.
- design and code elementary programs encountered in business and government.
- identify interactive web publishing situations requiring database solutions.
- create interactive web database applications.

CIS: Microcomputer Applications Certificate

This certificate involves the use of the microcomputer and current, commonly used software to solve problems in a business environment. Course work includes microcomputer applications in database management, desktop publishing, electronic spreadsheets, presentation graphics, operating systems, and word processing.

</tbody>
</table>

Total Units: 21

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- design and manage database tables, queries and forms.
- produce reports for use in a typical business environment.
- evaluate the basic computing needs of a business by developing associated documentation and presentations.
- create spreadsheet formulas and manipulate business data.
Upon completion of this program, the student will be able to:

- compose and format typical business communications documents according to industry standards.
- combine data from different software applications into one document.
- apply file management techniques in organizing computer data.
- take on the Windows operating system.
- apply for ENGWR 310 College Composition (3)
- develop proficiency in customer service skills to effectively diagnose and communicate microcomputer software and hardware-related problems and solutions at the user level.
- configure and implement data security methods for protecting computers and networks from unauthorized access.

**CIS: PC Support Certificate**

The CIS: PC Support certificate covers the use and maintenance of a microcomputer's hardware, software and network connections in today's business environment. Course work includes basic computer skills in configuration, use, and troubleshooting major hardware components, different operating systems, and applications in a standalone and network environment. This program covers all the objectives of the Computer Technology Industry Associates (CompTIA) A+ certification exam.

Total Units: 32

1^Taken on the Windows operating system.

**Student Learning Outcomes**

Upon completion of this program, the student will be able to:

- describe the fundamental concepts of the cyber security discipline and use to provide system security.
- identify the Federal, State and Local Cyber Defense partners/structures.
- compare and contrast different types of standards including: laws, regulations, policies, voluntary, and framework-based standards.
- assess the impact of legal/regulatory standards on a given system.
- discuss the rules, laws, policies, and procedures that affect digital forensics.
- describe the steps in performing digital forensics from the initial recognition of an incident through the steps of evidence gathering, preservation and analysis, through the completion of legal proceedings.
- plan, organize, and perform penetration testing on a simple network.
- describe the role of cybersecurity in supporting and encouraging ethics, as well as where cybersecurity practices can cause ethical conflicts.
- evaluate the effectiveness of applications of cybersecurity in preventing crime and abuse.
- assess the effectiveness of a security program.
- develop contingency plans for various size organizations to include: business continuity, disaster recovery and incident response.
- evaluate responsibilities related to the handling of data as it pertains to legal, ethical and/or agency auditing issues.
- evaluate and categorize risk 1) with respect to technology; 2) with respect to individuals, and 3) in the enterprise, and recommend appropriate responses.

**Computer Information Security Essentials Certificate**

This program provides basic cyber operations knowledge of internal and external threats to information assets, compliance requirements, risk management, disaster recovery, and computer forensics. It also provides preparation for the Computing Technology Industry Association (CompTIA) Security+ exam. It is a stackable certificate pathway to the CISS certificate and degree.

Cybersecurity Engineer Cyber Operations Planner IT Security Specialist Information Security Analyst IT Privacy Analyst IT Risk Analyst Information Security Auditor

Cybersecurity and Information Assurance Certificate
This certificate prepares IT professionals to apply knowledge and experience in network security, risk management, intrusion detection, remediation, and digital forensics to safeguard infrastructure and secure data and business operations. Courses deliver proven methods for information security using software analysis techniques, web engineering, cloud management, and networking strategies to prevent, detect, and mitigate cyberattacks. This program also provides preparation for several nationally recognized, high demand certifications in the field of Cybersecurity.

Student Learning Outcomes
Upon completion of this program, the student will be able to:

- define best practices for configuring cyber defense and countermeasures.
- design organizational plans for securing data and while maintaining the confidentiality, integrity, and availability (CIA) of the information transmitted over communication networks.
- explain how security principles and cyber defense concepts impact organizational policies and practices.
- analyze security risks mitigation processes to identify, evaluate, prioritize, and prevent potential security threats.
- critique plans to secure and manage physical and virtual infrastructures for legal and secure cloud operations.
- outline legal issues that should be included within the security awareness training and education program of an organization.
- analyze applicable laws and policies to legally protect the organization against security incident.
- determine how to address vulnerabilities and threats in cellular and mobile network technologies.
- prioritize and establish a disaster recovery plan for the enterprise.
- develop security incident response plans that align to an organization’s security goals and objectives and maintain business continuity.

Career Information

Enterprise Mainframe System Administration Certificate
The enterprise mainframe system administration certificate provides the Related Supplemental Instruction (RSI) of a structured training program to develop individuals into journey-workers in the mainframe industry.

Enrollment Eligibility
To be eligible for enrollment in the program, the student must meet the following criteria:

- Student must be a registered Enterprise Mainframe System Administration apprentice.
- At least 18 years of age.
- Meets the requirements under the selection procedures of participating California state agencies.
- Engaged in learning a designated occupation and who has entered into a written apprentice agreement to participate in an apprenticeship program for a designated occupation under the Department of Apprenticeship Standards’ File No. 100451. Apprentice agreement must be approved by the apprenticeship committee.

Enrollment Process
Eligible students are selected for the program according to the following steps:

- Apprentice selection process - Facilitated by the Joint Apprenticeship Committee (JAC): Application, aptitude assessment, interview with JAC and participating department, selection and confirmation, apprentice and department notification, signing ceremony.

Student Learning Outcomes
Upon completion of this program, the student will be able to:

- perform hardware-software upgrades.
- plan capacity.
- monitor systems.
- install an operating system.
- maintain system software or products running on a mainframe.
Career Information

Mainframe system administrator.

Enterprise Software Engineering and Development Apprenticeship Certificate

State of California Enterprise Software Engineering and Development Apprenticeship for the occupations of Enterprise Software Engineers and Enterprise Software Developers. In this program, apprentices shall satisfactorily complete the prescribed related and supplemental instruction (RSI) identified in the Apprenticeship Standards (File No. 100451) developed by the JAC while receiving on-the-job training in the designated occupation.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- perform day to day operations of the environment including change and problem management.
- utilize techniques and principles such as Agile and DevOps.
- synthesize enterprise level software solutions.
- analyze enterprise data to identify problems or room for improvement.
- explain how a computer system works and differentiate between hardware and software components.
- utilize techniques that are unique to enterprise level software engineering and development.

Guided Pathways Milestone Certificate for Multilingual Speakers: Pathway to Computer Info Science Certificate

This Guided Pathways Milestone Certificate for Multilingual Speakers: Pathway to Computer Information Science offers advanced reading and writing skills at a post secondary level for English learners combined with introductory computer information skills. The combination of these skills can be used along their pathways to degrees, certificates, or transfer, and for use in multilingual office environments.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- write formal academic essays as well as apply techniques of written communication, sentence structure, word usage, punctuation, and spelling.
- employ reading strategies, such as summarizing, paraphrasing, and quoting and integrating outside sources into writing.
- analyze written communication and compose and organize paragraphs into effective documents.
- convey intended meaning, including accuracy in sound production, syllabiﬁcation, and intonation.
- formulate and use a variety of interactive strategies effectively such as clariﬁcation, polite interruption, and agreement/disagreement strategies.
- participate in in-depth discussions effectively, take clear notes, and give oral presentations in a business environment.
- write formal academic essays as well as apply techniques of written communication, sentence structure, word usage, punctuation, and spelling.
• demonstrate the secure utilization of internet resources.
• demonstrate an understanding of the development and use of information systems in business.
• manipulate databases using database management software.
• build software solutions to business problems using internet technology.

Career Information

This certificate supports course work in a variety of computer science professions, including in multilingual work environments.

Internet Marketing Certificate

This certificate offers a program of study for students seeking jobs that require skills in technical marketing applications. It provides opportunities to combine traditional marketing theory with the technical skills needed in today's business environment. Courses address current technology-based business communications, marketing, Internet strategies, applications, and trends.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

• identify and create effective Internet marketing strategies that enhance business relationships with present and future customers.
• apply communication theory, effective writing techniques, and presentation skills to business situations.
• utilize software applications designed to present and promote business in print and visual media.
• devise a marketing plan using social media applications and content platforms for marketing both small and large businesses.
• analyze various software applications for Search Engine Optimization (SEO), analytic tools, web-building and blog applications, email marketing, and other technical marketing tools.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

• Define best practices for configuring network operating system services.
• Construct and apply group policy settings at the Organizational Unit (OU), domain, site or local machine level.
• Apply Windows group policy and NTFS file system permissions to secure the workstations, the internal network and shared resources.

Technical Communications Certificate

This certificate offers an interdisciplinary program of courses in Technical Communications, Art/New Media, and Computer Information Systems to prepare students for a variety of technical writing and professional communication careers. The certificate includes the theory, writing skills, design background, and computer applications knowledge needed for jobs in technical communication.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

• analyze audience information needs.
• compose concise, clearly written professional documents organized with the audiences' needs in mind.
• design print and online resources that communicate organizations' values, enhance readability, and are easy to use.
• demonstrate basic skills in the use of word processing, page design, and web design applications.
• evaluate organizations' communication goals and needs based on technical writing principles.
Career Information

Technical communicators find employment in medical, scientific, high tech, business, university, and government settings. They may write white papers, tutorials, reference and procedure manuals, help systems, user assistance video scripts, grants and proposals, and more.

Web Developer Certificate

This certificate offers a program of study for students seeking jobs in the fields of web-based programming and web application development. It provides opportunities to develop the necessary skills and aptitudes for creating and maintaining interactive, database-driven web applications.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- analyze how an interactive web application is developed using static web pages, forms, client-side scripts, server-side scripts, subroutine or class libraries, and relational databases.
- evaluate informational or business needs that could benefit from a web application and design an appropriate web application that addresses those needs.
- create and debug scripts in at least one client-side and at least one server-side scripting language.
- construct embedded Structured Query Language (SQL) commands to access, display, modify, add, and delete information via a web application.
- integrate graphic principles and programming functionality with a web application.
- demonstrate basic use of both Linux and Windows Operating System command-line interface.
- devise or choose efficient algorithms for the solution of problems using the control structures of structured programming.
- design software using object-oriented methods to develop event-driven programs for both applets and applications.

Web Publishing (Front-End) Certificate

This certificate offers a program of study for students seeking jobs in the field of front-end web publishing. It provides opportunities to develop the necessary skills for creating, maintaining, and managing client sites. Program will include building websites with HyperText Markup Language (HTML), software applications using WYSIWYG (what you see is what you get) interfaces, and template sites using Content Management Systems (CMS). Program will also include Internet marketing skills using social media, creating video and graphics for web media, and search engine optimization (SEO) techniques.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- plan and build websites using HyperText Markup Language (HTML) and Cascading Style Sheets (CSS).
- create and edit websites using software application programs that provide a WYSIWYG (what you see is what you get) interface.
- build and manage websites using content management systems (CMS).
- design and manipulate graphics using software for photo editing, compressing, and retouching for numerous image and video file formats.
- develop marketing strategies using SEO (search engine optimization) techniques to achieve high results in organic Internet searches. This will include creative, technical, and analytical work.
- utilize social media applications to build audience with cloud based marketing tools such as blogs, social networking services, photo and video sharing apps, podcasts, eBooks, webinars, and more.
- analyze website stats, social media, apps and integration, link building, and monetization.
- identify web accessibility issues when designing web sites and social media posts.

Career Information

Web Designer Front End Web Developer Web And Media Design Specialist Content Editor Solutions Engineer-Media Manager Media Campaign Strategist/Specialist Internet Media Administrator Digital Marketing Director Marketing/Events Coordinator Social Media
Computer Information Science - Applications (CISA) Courses

CISA 126 Outlook: Basics
Same As: BUSTEC 126
Units: 1
Hours: 18 hours LEC
Prerequisite: None.
Advisory: BUSTEC 300.1

This course introduces Microsoft Outlook, the industry-leading personal information management software. Topics include understanding and navigating the Outlook and sending email, using email special features, managing Outlook contacts, using an electronic calendar, and creating tasks and to-do items. Completion of BUSTEC 126/CISA 126 and BUSTEC 127/CISA 127 prepares students to pass the Microsoft Office Specialist (MOS) certification for the Microsoft Outlook application. This course is not open to students who have completed BUSTEC 126.

CISA 127 Outlook: Tools
Same As: BUSTEC 127
Units: 1
Hours: 18 hours LEC
Prerequisite: BUSTEC 126 or CISA 126 with a grade of "C" or better
Advisory: BUSTEC 300.1 with a grade of "C" or better

This course presents the advanced personal information management tools in Outlook. Topics include working with multiple email accounts, using rules and folders, incorporating advanced calendar and contact features, collaborating using sharing and delegate features, and customizing the Outlook user interface. In addition, the course covers the integration of Outlook with other applications in the Microsoft Office suite. Completion of BUSTEC 126/CISA 126 and BUSTEC 127/CISA 127 prepares students to pass the Microsoft Office Specialist (MOS) certification for the Microsoft Outlook application. This course is not open to students who have completed BUSTEC 127.

CISA 160 Project Management Techniques and Software
Same As: MGMT 142
Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: ENGW 102 or 103, and ENGRD 116; OR ESLR 320 and ESLW 320; CISC 300

This introductory course covers the responsibilities of a project manager. It includes the knowledge needed to manage a project, control costs, and schedule resources. It also introduces the use of project management software to track project resources, tasks, and milestones. This course is not open to students who have taken MGMT 142.

CISA 299 Experimental Offering in Computer Information Science - Applications
Units: 0.5 - 4
Prerequisite: None.

This is the experimental courses description.

CISA 305 Beginning Word Processing
Units: 2
Hours: 27 hours LEC; 27 hours LAB
Prerequisite: None.
Advisory: CISC 300
Transferable: CSU
General Education: AA/AS Area II(b)

This course introduces professional word processing skills and techniques that are essential to the entire document production process and global information sharing. Topics include basic skills such as creating, editing, and formatting word documents; as well as higher-level features such as creating tables, working with themes and graphics, and merging multiple documents.

CISA 306 Intermediate Word Processing
Units: 2
Hours: 27 hours LEC; 27 hours LAB
Prerequisite: CISA 305 with a grade of "C" or better
Transferable: CSU

This course builds upon previous instruction in the use of a word processing application with an emphasis on advanced information documents and reports. It includes creating a business letter and flyer, editing an academic document according to MLA style, writing a business report, enhancing page layout and design in a newsletter.

CISA 315 Introduction to Electronic Spreadsheets
Units: 2
Hours: 27 hours LEC; 27 hours LAB
Prerequisite: CISA 315 with a grade of "C" or better
Advisory: CISC 100 or 300
Transferable: CSU
General Education: AA/AS Area II(b)

This course introduces professional electronic spreadsheet skills that cover the entire spreadsheet production process. Topics include basic skills such as creating a worksheet, entering data, adding formulas and functions, formatting the worksheet, and checking for errors. This course also introduces similar skills essential to creating professional charts from a worksheet. These skills include planning and creating a chart, formatting a chart, summarizing data with sparklines, and identifying data trends.

CISA 316 Intermediate Electronic Spreadsheets
Units: 2
Hours: 27 hours LEC; 27 hours LAB
Prerequisite: CISA 315 with a grade of "C" or better
Transferable: CSU

This course is a continuation of CISA 315 (Introduction to Electronic Spreadsheets) with an emphasis on worksheet automation and summarization, pivot tables, data management, analysis tools, and higher-level formulas and functions.

CISA 320 Introduction to Database Management
Units: 1
Hours: 9 hours LEC; 27 hours LAB
Prerequisite: None.
Advisory: BUSTEC 300.1 and CISC 300
Transferable: CSU
General Education: AA/AS Area II(b)

This course introduces the use of database management programs on the microcomputer. It includes designing a database; storing, searching, and updating files; and designing and producing printed reports.
CISA 322 Design and Development of Desktop Database Applications

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: CISA 320 with a grade of "C" or better
Transferable: CSU

This course covers strategies for the design and development of desktop database applications. Topics include database objects, data types, data integrity, relational tables, joins, relationships, domain constraints, complex queries, forms, reports, sharing data with other applications, and data maintenance.

CISA 330 Desktop Publishing

Units: 2
Hours: 27 hours LEC; 27 hours LAB
Prerequisite: None.
Advisory: BUS 101 and CISC 300
Transferable: CSU

This course provides an overview of desktop publishing (DTP) and a major desktop publishing application program. It includes page layout skills needed to produce newsletters, brochures, flyers, reports, and other marketing material. Additionally, it covers importing and placing graphics and text, using layers, master pages, frames, creating graphics using the pen tool, and working with color both digitally and in print.

CISA 331 Intermediate Desktop Publishing

Units: 2
Hours: 27 hours LEC; 27 hours LAB
Prerequisite: CISA 330 with a grade of "C" or better
Advisory: BUS 100
Transferable: CSU

This course builds upon previous desktop publishing software concepts and study. Topics include working with effects and advanced techniques, applying styles, importing and linking graphics, tabs and tables, and working with transparency effects. It also covers producing long documents and book features, output and exporting to PDF format, and creating interactive documents for online use.

CISA 340 Presentation Graphics

Units: 2
Hours: 27 hours LEC; 27 hours LAB
Prerequisite: None.
Advisory: CISC 300
Transferable: CSU

This course introduces the basic concepts and applications of a presentation program that is used to present information in the form of a slide show. Topics include elements of good presentation design, slide organization, transition and animation effects, the integration of various software applications and media, plus the production of slide show presentations. In addition, the course introduces techniques for creating informational slides that can be printed, displayed on a monitor, shared in real time on the web, or saved as a video for others to watch.

CISA 345 Technical Marketing Applications

Units: 2
Hours: 27 hours LEC; 27 hours LAB
Prerequisite: None.
Advisory: CISC 305
Transferable: CSU

This course provides an overview of online marketing applications. It includes creating websites using cloud based software, building media-rich content for blogs, and developing marketing strategies using Search Engine Optimization (SEO) tools such as Google Analytics. It also covers email marketing software to create and manage mailing lists, newsletters, and automated campaigns. Additionally, it covers audience building with other cloud based marketing tools such as podcasts, ebooks, webinars, and more. All software used in this course is free, cloud based, and mobile.

CISA 346 Social Media Applications

Units: 1
Hours: 18 hours LEC; 18 hours LAB
Prerequisite: None.
Advisory: CISC 305
Transferable: CSU

This course introduces a variety of social media applications and content platforms for marketing both small and large businesses. It includes popular applications for online social networking services (Facebook Pages for business), microblogging (Twitter), visual bookmark boards (Pinterest), video-sharing websites and YouTube channels, Internet based photo and video sharing apps (Instagram and Snapchat), and image editing mobile apps specifically for marketing. It also includes tracking social media, apps and integration, link building, and monetization.

CISA 348 Exploring Presentation Graphics

Units: 1
Hours: 18 hours LEC
Prerequisite: None.
Transferable: CSU

This course provides students with sufficient knowledge and skills to prepare presentations in a variety of courses. Topics include planning, designing, and preparing presentations; enhancing presentations with media; creating posters, tables, and statistical charts; interactivity, advanced animation, and hyperlinks; customizing a slide show; and collaborating, securing, and sharing a presentation.

CISA 499 Experimental Offering in Computer Information Science - Applications

Units: 0.5 - 4
Prerequisite: None.
Transferable: CSU

This is the experimental courses description.

Computer Information Science - Core (CISC) Courses

CISC 100 Computer Fundamentals with Hands-on Lab

Units: 2
Hours: 27 hours LEC; 27 hours LAB
Prerequisite: None.

This introductory course develops basic computer skills needed for college-level courses, workplace productivity, and personal enrichment. It provides individuals who are new to computing or who have very little computing experience with slower paced, general, non-technical information as well as in-class hands-on instruction reinforcement. This course introduces common computer terminology and concepts, file management, electronic mail, online course management, productivity application software, and the Internet.
CISC 294 Topics in Computer Information Science - Core
Units: 0.5 - 5
Hours: 9 - 72 hours LEC
Prerequisite: None.
This course introduces how the Internet works and how to transferable:
CSU presentation software.
Current topics in computer science and information systems not covered by regular catalog offerings are examined. Topics and locations vary, including advanced subjects related to computer science, networking, programming, database, applications, PC support, security, communications, and web development and publishing. Field trips may be required.

CISC 295 Independent Studies in Computer Information Science - Core
Units: 1 - 3
Hours: 54 - 162 hours LAB
Prerequisite: None.
Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

CISC 299 Experimental Offering in Computer Information Science - Core
Units: 0.5 - 4
Prerequisite: None.
This is the experimental courses description.

CISC 300 Computer Familiarization
Units: 1
Hours: 18 hours LEC
Prerequisite: None.
Advisory: ENGRD 116 and the ability to touch type.
Transferable: CSU
General Education: AA/AS Area II(b); AA/AS Area III(b)
This course introduces fundamental and basic computer skills necessary for college-level courses, workplace productivity, and personal enrichment. Fundamental skills include computer terminology and concepts, online learning, and the Internet. Basic skills include word processing, electronic spreadsheets, database management, and presentation software.

CISC 305 Introduction to the Internet
Units: 1
Hours: 18 hours LEC; 18 hours LAB
Prerequisite: None.
Advisory: CISC 300 and 320
Transferable: CSU
This course introduces how the Internet works and how to effectively use basic Internet services. Topics include browser basics, search engines and search techniques, e-mail, the World Wide Web, Internet security, Internet resources, the Cloud, social networking, and building basic web pages using Hypertext Markup Language (HTML).

CISC 306 Introduction to Web Page Creation
Units: 1
Hours: 18 hours LEC; 18 hours LAB
Prerequisite: None.
Advisory: CISC 323 with a grade of “C” or better
Transferable: CSU
This course introduces the production of web pages, including design, layout, construction, and presentation. A web authoring tool is used to format a web page and Extensible Hypertext Markup Language (XHTML) is introduced.

CISC 310 Introduction to Computer Information Science
Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Transferable: CSU; UC
C-ID: C-ID BUS 140; C-ID ITIS 120
This course examines information technology and its role in solving business problems. Topics include information systems, database management systems, networking, e-commerce, ethics and security, and computer systems hardware and software components. These concepts and related methods are applied through hands-on projects to develop computer-based solutions to business problems.

CISC 320 Operating Systems
Units: 1
Hours: 18 hours LEC; 18 hours LAB
Prerequisite: None.
Transferable: CSU
This course introduces the basic features of the Windows operating system for the PC. Topics include managing files, folders, and libraries, operating system services, program management, maintenance of disks and storage media, Windows desktop, browser basics, and the Windows help system. A brief introduction to security and the command prompt is also covered.

CISC 323 Linux Operating System
Units: 1
Hours: 18 hours LEC; 18 hours LAB
Prerequisite: None.
Transferable: CSU
This course introduces the Linux operating system for microcomputers. Concepts include the kernel, file structures, daemons, graphical user interfaces (GUI), open source, file security and permissions. It also covers procedures for installing software, basic system administration and utilities, the Bourne again shell (BASH), command line interface utilities, and introduction to scripting topics.

CISC 324 Intermediate Linux Operating System
Units: 1
Hours: 18 hours LEC; 18 hours LAB
Prerequisite: CISC 323 with a grade of “C” or better
Transferable: CSU
This course is a continuation of CISC 323. Topics include boot loaders, Linux devices, and command line interface (CLI) system management utilities. It also covers advanced Bourne Again Shell (BASH) shell scripting, including looping and decision making logic structures. Alternatives to the BASH shell and regular expressions and text stream editors are introduced.

CISC 330 z System Familiarization
Units: 4.5
Hours: 81 hours LEC
Prerequisite: None.
Transferable: CSU
This course introduces the IBM z System's software and hardware. It covers the following IBM skills: Introduction to the z/OS (z Operating System) environment, fundamental system skills in z/OS, and z/OS Job Control Language (JCL) and utilities.

CISC 331 z/OS Facilities

Units: 2
Hours: 36 hours LEC
Prerequisite: CISC 330 with a grade of “C” or better
Transferable: CSU

This course introduces the base elements, optional features, and servers that are provided in z/OS. It focuses on the system service facilities that are provided by the z/OS Base Control Program (BCP). Topics include the functions of major software base elements in the management of jobs, tasks, storage, data, and problems. This course also addresses how these functions can be affected by the system programmer.

It also covers the services provided by the servers which execute in the z/OS environments, such as the Communications Server and the Security Server. Installation packaging options and steps to install the z/OS environments also are introduced.

CISC 332 z/OS System Services Structure

Units: 2
Hours: 36 hours LEC
Prerequisite: CISC 331 with a grade of “C” or better
Transferable: CSU

This course presents the structure and control blocks of the z/OS BCP (base control program) and system services. It prepares the new z/OS system programmer to identify potential bottlenecks and performance problems, perform initial error symptom gathering, and identify opportunities and requirements for tailoring a z/OS system. This course also provides prerequisite information needed for further training in specialized areas such as system measurement and tuning and system problem determination.

CISC 333 SMP/E (System Modification Program Extended) for z/OS

Units: 2
Hours: 36 hours LEC
Prerequisite: CISC 330 with a grade of “C” or better
Transferable: CSU

This course covers the SMP/E skills needed in the installation and maintenance of optional features and maintenance in the z/OS operating environment. Topics include the SMP/E database and invoke SMP/E to add, modify, or replace system elements.

This course also covers the SMP/E tasks involved in installing a z/OS product. It emphasizes interpreting results of SMP/E processing. Additional SMP/E concepts include modification control statements, the consolidated software inventory, zone structure, and error analysis. SMP/E commands such as RECEIVE, APPLY, ACCEPT, RESTORE, REPORT, and LST are discussed.

More advanced topics include automated SMP/E delivery of z/OS and product maintenance over the Internet with an automated SMP/E process that downloads and installs IBM preventive and corrective service over the Internet.

CISC 350 Introduction to Data Communications

Units: 1
Hours: 18 hours LEC
Prerequisite: None.
Advisory: CISC 100
Transferable: CSU

This course introduces business data communication concepts, systems, technology, protocols, theory, and basic terminology. Specific topics include analog and digital data encoding and transmission; media; interfaces; packet, circuit, and broadcast networks; and data multiplexing.

CISC 351 Introduction to Local Area Networks

Units: 1
Hours: 18 hours LEC; 18 hours LAB
Prerequisite: None.
Advisory: CISC 320 and 350
Transferable: CSU

This course introduces local area networks (LAN) and provides hands-on training in LAN applications and network administration. Topics include planning, installing, and maintaining a LAN, responsibilities of the system administrator, and basic network security principles.

CISC 361 Information Technology Fundamentals

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: CISC 310, 320, and 350
Transferable: CSU

This course aligns with the Computer Technology Industry Association (CompTIA) A+ core 1 certification objectives. This course covers information technology topics related to mobile devices, networking, computer hardware, virtualization, and cloud computing.

CISC 362 Microcomputer and Applications Support

Units: 2
Hours: 36 hours LEC
Prerequisite: None.
Advisory: CISC 361 and 363
Transferable: CSU

This course is an in-depth investigation of the technical, business, soft, and self-management skills technicians need to provide effective customer service and support in an information technology (IT) environment. It introduces customer service and problem solving skills needed for success in a small- or large-business environment.

CISC 363 Microcomputer Support Technical - Preparation for A+ Certification

Units: 3
Hours: 42 hours LEC; 36 hours LAB
Prerequisite: CISC 361 with a grade of "C" or better
Transferable: CSU

This course is the second of two courses providing a foundation in personal computer (PC) support. Hands-on skills include advanced component installation and configuration, troubleshooting component hardware, and configuring and troubleshooting major operating systems and networking hardware. This course along with CISC 361 prepares students for the Computing Technology Industry Association (CompTIA) A+ Certification exam.

CISC 495 Independent Studies in Computer Information Science - Core

Units: 1 - 3
Hours: 54 - 162 hours LAB
Prerequisite: None.
Transferable: CSU
Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

CISC 498 Work Experience in Computer Information Science - Core

Units: 0.5 - 4
Hours: 30 - 300 hours LAB
Prerequisite: None.
Enrollment Limitation: Students must be in a paid or unpaid internship, volunteer position, or job related to computer information science with a cooperating site supervisor. Students are advised to consult with the Computer Information Science Department faculty to review specific certificate and degree work experience requirements.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.
Transferable: CSU
General Education: AA/AS Area III(b)

This course provides students with opportunities to develop marketable skills in preparation for employment or advancement within the field of computer information science. It is designed for students interested in work experience and/or internships in transfer-level degree occupational programs. Course content includes understanding the application of education to the workforce, completion of Title 5 required forms which document the student’s progress and hours spent at the work site, and developing workplace skills and competencies.

During the semester, the student is required to complete 37.5 hours of related paid work experience, or 30 hours of related unpaid work experience for 0.5 unit. An additional 37.5 or 30 hours of related work experience is required for each additional 0.5 units. All students are required to attend the first class meeting, a mid-semester meeting, and a final meeting. Additionally, students who have not already successfully completed a Work Experience course will be required to attend weekly orientations while returning participants may meet individually with the instructor as needed. Students may take up to 16 units total across all Work Experience course offerings. This course may be taken up to four times when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

CISC 499 Experimental Offering in Computer Information Science - Core

Units: 0.5 - 4
Prerequisite: None.
Transferable: CSU

This is the experimental courses description.

Computer Information Science - Data Science (CISD) Courses

CISD 299 Experimental Offering in Computer Information Science - Data Science

Units: 0.5 - 4
Prerequisite: None.

This is the experimental courses description.

Computer Information Science - Networking (CISN) Courses

CISN 110 Networking Technologies - Preparation for N+ Certification

Units: 2
Hours: 36 hours LEC
Prerequisite: None.
Advisory: CISC 361 and 363

This is an introductory course in networking software and hardware. Topics include communication protocols; local, wide area, and virtual networks; intra- and inter-networks; network architectures; topologies; cloud computing; security; and the Open Systems Interconnect (OSI) model. This course, along with CISN 111, provides preparation for the Computer Technology Industry Association N+ certification test.

CISN 111 Intermediate Networking Technologies

Units: 2
Hours: 36 hours LEC
Prerequisite: CISN 110 with a grade of "C" or better

This is an intermediate course in networking software and hardware. Topics include network operating systems setup, analyzing network performance, diagnosing and repairing of network problems, and network security techniques. This course, along with CISN 110, provides preparation for the Computer Technology Industry Association N+ certification test.

CISN 117 Wireshark TCP/IPv4 and 6 Network Analysis

Units: 3
Hours: 45 hours LEC; 27 hours LAB
Prerequisite: None.
Advisory: CISC 350

This course introduces the Wireshark protocol analyzer for use in diagnosing and troubleshooting poor performance or security-related problems in IPv4 and IPv6 networks. It focuses on Wireshark functionality and analysis of captured IPv4 and IPv6 traffic streams such as Dynamic Host Configuration Protocol (DHCP), Domain Name Systems (DNS), and Hypertext Transfer Protocol (HTTP). This course begins preparation for the Wireshark Certified Network AnalystTM certification exam.

CISN 119 TCP/IP Protocols

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: CISC 350

This course covers the TCP/IP protocol suite for the Internet. Information to support and manage TCP/IP is provided. Additional topics include routing; tunneling; IP addressing and subnetting; IP version 4 and IP version 6;
virtual private networks; network address translation; ports and sockets; and many other individual protocols.

CISN 120 Red Hat Linux System Administration I (RH124)

Units: 2
Hours: 27 hours LEC; 27 hours LAB
Prerequisite: None.
Advisory: CISC 323 and 324
This is the first of two courses covering the core system administration tasks needed to manage Red Hat Enterprise Linux servers and introducing key command-line concepts and enterprise-level tools. Topics covered also include essential Linux administration tasks, including installation, establishing network connectivity, managing physical storage, and basic security administration. This course is based on Red Hat® Enterprise Linux 8. This is the first course in preparation for the Red Hat Certified System Administrator (RHCSA) and Engineer (RHCE) certification examinations. ARC is a Red Hat Academy academic partner.

CISN 121 Red Hat Linux System Administration II (RH134)

Units: 2
Hours: 27 hours LEC; 27 hours LAB
Prerequisite: CISN 120 with a grade of "C" or better
This is the second of two courses covering system administration tasks introducing more advanced administrative topics, such as storage management using LVM, SELinux management, and automated installation. This course goes deeper into Linux administration, including file systems and partitioning, logical volumes, SELinux, firewall configuration, and troubleshooting. This course is based on Red Hat® Enterprise Linux 8. This is the second course in preparation for the Red Hat Certified System Administrator (RHCSA) Engineer (RHCE) certification examinations. ARC is a Red Hat Academy academic partner.

CISN 122 Red Hat Linux System Administration III (RH254): Data Center Services

Units: 2
Hours: 27 hours LEC; 27 hours LAB
Prerequisite: CISN 120 with a grade of "C" or better
The course is focused on deploying and managing network servers running caching domain name service (DNS), MariaDB, Apache HyperText Transport Protocol Daemon (HTTPD), Postfix SMTP nullclients, network file sharing with network file system (NFS) and server message block (SMB), iSCSI initiators and targets, advanced networking and firewall configurations, and the use of bash shell scripting to help automate, configure, and troubleshoot the system. This course is based on Red Hat® Enterprise Linux 7. This is the third course in preparation for the Red Hat Certified Engineer (RHCE) certification examination. ARC is a Red Hat Academy academic partner.

CISN 123 Red Hat Linux System Administration III (RH294): Automation with Ansible

Units: 2
Hours: 27 hours LEC; 27 hours LAB
Prerequisite: CISN 121 with a grade of "C" or better
This course covers the use of Ansible® to automate system administration tasks such as provisioning, configuration, application deployment, and orchestration. Topics focus on how to install and configure Ansible® on a management workstation; prepare managed hosts for automation; write Ansible® Playbooks to automate tasks; and run playbooks to ensure servers are correctly deployed and configured. This course is based on Red Hat® Enterprise Linux 8 and Red Hat® Ansible® Engine 2.8. This is the third course in preparation for the Red Hat Certified Engineer (RHCE) certification examination. ARC is a Red Hat Academy academic partner.

CISN 140 CISCO Networking Academy (CCNA)tm: Networking Fundamentals

Units: 3
Hours: 54 hours LEC; 18 hours LAB
Prerequisite: None.
Advisory: CISC 310, 320, or 350
This course introduces the architecture, structure, functions, components, and methods of the Internet and other computer networks. It surveys data communication protocols, standards, hardware and software components and basic networking concepts. Topics include the Open Systems Interconnection (OSI) and TCP/IP models, IP addressing and subnetting, routing concepts, LAN media, Ethernet, and network configuration, troubleshooting and analysis. This is the first course in preparation for Cisco CCNA certification examination. ARC is a certified Cisco Networking Academy and all courses are taught by Cisco Certified Academy Instructors (CCAI).

CISN 141 CISCO Networking Academy (CCNA)tm: Routing Protocols and Concepts

Units: 3
Hours: 54 hours LEC; 18 hours LAB
Prerequisite: CISN 140 with a grade of "C" or better
This course describes the architecture, components, and operation of routers, and explains the principles of routing and routing protocols. Topics include configuring, verifying, and troubleshooting Routing Information Protocol (RIP) version 1 and 2, Enhanced Interior Gateway Routing Protocol (EIGRP), and Open Shortest Path First (OSPF) routing protocols. Basic router configuration and troubleshooting, networking theory, and IP addressing are also covered. This is the second course in preparation for Cisco CCNA certification examination. ARC is a certified Cisco Networking Academy and all courses are taught by Cisco Certified Academy Instructors (CCAI).

CISN 142 CISCO Networking Academy (CCNA)tm: LAN Switching and Wireless

Units: 3
Hours: 54 hours LEC; 18 hours LAB
Prerequisite: CISN 140 with a grade of "C" or better
This course focuses on Layer 2 switching protocols, concepts and technologies. Topics include hierarchy LAN design, basic switch concepts and configuration, Virtual LANs (VLANs), Virtual Trunking Protocol (VTP), Spanning Tree Protocol (STP), Inter-VLAN routing, basic wireless concepts and configuration. Implementing, verifying, securing and troubleshooting converged switching technologies in a small-to-medium network, including integrating wireless devices into a LAN, are also covered. This is the third course in preparation for Cisco CCNA certification examination. ARC is a certified Cisco Networking Academy and all courses are taught by Cisco Certified Academy Instructors (CCAI).

CISN 143 CISCO Networking Academy (CCNA)tm: Accessing the Wide Area Network

Units: 3
Hours: 54 hours LEC; 18 hours LAB
Prerequisite: CISN 141, 141, and 142 with grades of "C" or better
This course covers wide area networks (WAN) technologies to connect small- to medium-sized business networks. It focuses on Point to Point Protocol (PPP), Frame Relay, and broadband links. Topics include network security, traffic control and access control lists (ACLs), Virtual Private
Networks (VPN) and network troubleshooting. IP addressing services, Network Address Translation (NAT) and Dynamic Host Configuration Protocol (DHCP) are covered, and IPv6 is introduced. This is the fourth course in preparation for Cisco CCNA certification examination. ARC is certified to teach Cisco Networking Academy and all courses are taught by Cisco Certified Academy Instructors (CCAI).

**CISN 299 Experimental Offering in Computer Information Science - Networking**

*Units: 0.5 - 4*  
*Prerequisite: None.*

This is the experimental courses description.

**CISN 300 Network Systems Administration**

*Units: 3*  
*Hours: 45 hours LEC; 27 hours LAB*  
*Prerequisite: CISN 302 with a grade of "C" or better*  
*Transferable: CSU*

This course covers the installation and configuration of a Windows server in a client/server network. Topics include: introduction to Active Directory, local storage, file and print services, Group Policy, and basic security. Additional topics include: implementing IPv4 and IPv6, Dynamic Host Configuration Protocol (DHCP), and Domain Name System (DNS) in Windows. It also introduces server virtualization using Hyper-V. This is one of three courses preparing students for the Microsoft Certified Solutions Associate MCSA: Windows Server certification exams.

**CISN 302 Intermediate Network Systems Administration**

*Units: 3*  
*Hours: 45 hours LEC; 27 hours LAB*  
*Prerequisite: CISN 300 with a grade of "C" or better*  
*Transferable: CSU*

This course covers intermediate system administration in a Windows client/server network. Topics include core services such as user and group management, network access, and data security. Additional topics include patch management, file services, system monitoring and auditing, Active Directory and Domain Name System, and Network Policy and Group Policy. This is one of three courses preparing students for the Microsoft Certified Solutions Associate MCSA: Windows Server 2019 certification exams.

**CISN 306 Advanced Network Systems Administration**

*Units: 3*  
*Hours: 45 hours LEC; 27 hours LAB*  
*Prerequisite: CISN 302 with a grade of "C" or better*  
*Transferable: CSU*

This course covers advanced server services and system administration in a Windows client/server network. Topics include advanced configuration tasks necessary to deploy, manage, and maintain a Windows Server infrastructure. It also covers advanced network and file services, Dynamic Access Control (DAC), fault tolerance, network load balancing, failover clustering, disaster recovery, Active Directory Certificate Services (AD CS), and Federation Services (AD FS). This is one of three courses preparing students for the Microsoft Certified Solutions Associate (MCSD): Windows Server 2012 certification exams.

**CISN 307 Windows Active Directory Services**

*Units: 3*  
*Prerequisite: None.*  
*Transferable: CSU*

This is the experimental courses description.

**CISN 308 Internetworking with TCP/IP**

*Units: 3*  
*Hours: 45 hours LEC; 27 hours LAB*  
*Prerequisite: CISN 302 with a grade of "C" or better*  
*Transferable: CSU*

This course covers how to install, configure, and support a network infrastructure using the Microsoft Windows Server products. It focuses on TCP/IP and related services, including Dynamic Host Configuration Protocol (DHCP), Domain Name System (DNS), Windows Internet Naming Service (WINS), Internet Information Server (IIS), Public Key Infrastructure (PKI) and certificate service, Internet protocol security (IPSec), Network Address Translation (NAT), and remote access. It also covers configuring Windows as a network router, Virtual Private Network (VPN) connectivity and managing a Windows deployment using Remote Installation Services (RIS).

**CISN 320 Designing Windows Directory Services**

*Units: 3*  
*Hours: 45 hours LEC; 27 hours LAB*  
*Prerequisite: CISN 302 with a grade of "C" or better*  
*Transferable: CSU*

This course covers how to design and administer Microsoft Windows Active Directory services, including Group Policy. Group Policies are used to configure and manage the user desktop environment, configure and manage software, and implement and manage security settings. Additional topics include virtual machine management, Dynamic Host Configuration Protocol (DHCP), Domain Name System (DNS), Web Proxy, Virtual Private Network (VPN), and Branch Office infrastructure. This is one of two courses preparing students for the Microsoft Certified Solutions Expert (MCSE): Windows Server 2012 certification exams.

**CISN 325 Windows Server Infrastructure: High Availability and Virtualization**

*Units: 3*  
*Hours: 45 hours LEC; 27 hours LAB*  
*Prerequisite: CISN 302 with a grade of "C" or better*  
*Transferable: CSU*

This course covers the design, implementation, and maintenance of a Windows Server infrastructure in an enterprise scaled, highly virtualized environment. Topics include monitoring, failover, high availability, virtualization using Hyper-V, and certificate infrastructure. This is one of two courses preparing students for the Microsoft Certified Solutions Expert (MCSE): Windows Server 2019 certification exams.

**CISN 499 Experimental Offering in Computer Information Science - Networking**

*Units: 0.5 - 4*  
*Prerequisite: None.*  
*Transferable: CSU*

This is the experimental courses description.
Computer Information Science - Programming (CISP) Courses

CISP 299 Experimental Offering in Computer Information Science - Programming

Units: 0.5 - 4
Prerequisite: None.

This is the experimental courses description.

CISP 300 Algorithm Design/Problem Solving

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: CISC 310
Transferable: CSU; UC
General Education: AA/AS Area II(b)

This course introduces methods for solving typical computer problems through algorithm design. Topics include assessing and analyzing computer problems in a top-down, divide-and-conquer approach that leads to a programming solution. It also covers programming plans and detailed design documents from which source code versions of programs are created.

CISP 310 Assembly Language Programming for Microcomputers

Units: 4
Hours: 54 hours LEC; 54 hours LAB
Prerequisite: CISP 360 or 480 with a grade of "C" or better
Transferable: CSU; UC ((CISP 310 & 319 combined: maximum credit - one course))
C-ID: C-ID COMP 142

This course covers the organization and behavior of real computer systems at the assembly-language level. Topics include the mapping of statements and constructs in a high-level language onto sequences of machine instructions, as well as the internal representation of simple data types and structures. Numerical computation is examined, noting the various data representation errors and potential procedural errors.

CISP 332 Introduction to REXX (REstructured Extended Executor) Programming

Units: 2
Hours: 36 hours LEC
Prerequisite: CISC 330 with a grade of "C" or better
Transferable: CSU

This course is designed to teach the basic skills required to write programs using the REstructured eXtended eXecutor (REXX) language in z/OS. The course covers the Time Share Option (TSO) extensions to REXX and interaction with other environments such as the Multiple Virtual Storage (MVS) console, running REXX in batch jobs, and compiling REXX.

CISP 350 Database Programming

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: None.
Advisory: CISA 320 and CISC 310

Transferable: CSU
General Education: AA/AS Area II(b)

This is an introductory course in Structured Query Language (SQL) database programming. Topics include database normalization, subqueries, joins, import/export, privileges, and Procedural Language (PL)/SQL programming.

CISP 360 Introduction to Structured Programming

Units: 4
Hours: 54 hours LEC; 54 hours LAB
Prerequisite: CISP 300 or 370 with a grade of "C" or better
Transferable: CSU; UC
General Education: AA/AS Area II(b)
C-ID: C-ID COMP 112

This course is an introduction to structured programming and objects. Topics include program design, documentation, testing, and debugging, as well as data representation, data types, variables, constants, and operators. It also includes control structures, functions, interactive and file input/output, standard libraries, arrays, pointers, structures, classes, and objects.

CISP 370 Beginning Visual Basic

Units: 4
Hours: 54 hours LEC; 54 hours LAB
Prerequisite: None.
Advisory: CISC 310 and CISP 300
Transferable: CSU

This introductory programming course covers the development of Windows-based desktop applications using Visual Basic (VB). Topics include best practices for Graphical User Interface (GUI) design, use of the VB application development software, organizing code into procedures and functions, variable scope, structures, arrays, input data validation, calculation, file input and output, and multiple-window applications. This course is designed for those who want a strong foundation in basic programming and building GUI applications.

CISP 400 Object Oriented Programming with C++

Units: 4
Hours: 54 hours LEC; 54 hours LAB
Prerequisite: CISP 360 or 480 with a grade of "C" or better
Advisory: CISC 323
Transferable: CSU; UC
General Education: AA/AS Area II(b)
C-ID: C-ID COMP 122

This course is an introduction to the C++ programming language and object-oriented programming in the Linux/UNIX environment. Topics include a programming languages overview, program analysis and design, encapsulation, overloading, classes, inheritance, virtual functions, polymorphism, templates, exception handling, and the standard template library. In addition, it covers basic Linux/UNIX commands and make files are covered.

CISP 401 Object Oriented Programming with Java

Units: 4
Hours: 54 hours LEC; 54 hours LAB
Prerequisite: CISP 360 with a grade of "C" or better
Transferable: CSU; UC

This course introduces object-oriented programming using the Java programming language. Topics include objects, inheritance, polymorphism, interfaces, abstract classes, inner classes, error handling, graphical user interfaces (GUI), applets, threads, files, databases, and packages.
CISP 430 Data Structures

Units: 4
Hours: 54 hours LEC; 54 hours LAB
Prerequisite: CISP 400 or 401 with a grade of "C" or better
Transferable: CSU; UC
C-ID: C-ID COMP 132

This course applies object-oriented techniques for systematic problem analysis and the managing of program complexity using abstraction. Specification, design, coding, testing, and documentation of large multi-file programs are covered. It uses advanced language features such as classes, strings, non-text files, pointers, and recursion. Abstract data types such as stacks, queues, lists, binary trees, heaps/priority queues, hash tables, and graphs are examined. Various sorting and searching algorithms are presented and analyzed using Big-O notation.

CISP 440 Discrete Structures for Computer Science

Units: 3
Hours: 54 hours LEC
Prerequisite: CISP 360 and MATH 372 with grades of "C" or better
Corequisite: CISP 430
Transferable: CSU; UC
General Education: AA/AS Area II(b); CSU Area B4
C-ID: C-ID COMP 152

This course is an introduction to the discrete structures used in computer science with an emphasis on their applications. Topics include functions, relations, and sets; basic logic; proof techniques; basics of counting; graphs and trees; and discrete probability.

CISP 451 Introduction to Enterprise Software Development and Engineering

Units: 4.5
Hours: 81 hours LEC
Prerequisite: CISP 300, 370, or 480 with a grade of "C" or better
Transferable: CSU

This is the first in a series of two courses that prepares students for development and engineering software products in an enterprise environment. This course introduces agile practices, introductory level programming and web development concepts and basic DevOps philosophy.

CISP 455 Intermediate Enterprise Software Development and Engineering

Units: 4.5
Hours: 81 hours LEC
Prerequisite: CISP 451 with a grade of "C" or better
Transferable: CSU

This is the second in a series of two courses that focus on the development and engineering of software products in an enterprise environment. This course introduces DevOps practices, introductory level programming, web development, and design patterns.

CISP 480 Honors Introduction to Structured Programming

Units: 5
Hours: 72 hours LEC; 54 hours LAB
Prerequisite: Placement into ENGWR 480 through the assessment process.
Advisory: CISC 310
Transferable: CSU; UC
General Education: AA/AS Area II(b)
C-ID: C-ID COMP 112

This honors course combines the content of both CISP 300 and CISP 360 and presents it in an accelerated fashion emphasizing projects and collaborative work. It introduces methods for solving typical computer problems by assessing and analyzing computing problems, performing algorithm design using a top-down, divide and conquer approach, and continues with implementation, documentation, testing, and debugging. Topics include structured programming, data representation, data types, variables, constants, operators, and expression evaluation. It also includes control structures, functions, interactive and file input/output, standard libraries, arrays, pointers, structures, classes, and objects. Pseudocode and an object-oriented programming language are used to create program solutions. This course is not open to students who have completed CISP 300 or CISP 360.

CISP 499 Experimental Offering in Computer Information Science - Programming

Units: 0.5 - 4
Prerequisite: None.
Transferable: CSU

This is the experimental courses description.

Computer Information Science - Security (CISS) Courses

CISS 300 Introduction to Information Systems Security

Units: 1
Hours: 18 hours LEC
Prerequisite: None.
Advisory: CISC 320, 350, and 351
Transferable: CSU

This course provides an introduction to network-based and Internet-based security applications and standards. Topics include encryption, security protocols, network security applications, digital signatures, protecting computers and the network from viruses, Trojans, spyware, unsolicited email, and public and private key exchange.

CISS 302 Essential Personal Computer and Device Security

Units: 1
Hours: 18 hours LEC; 18 hours LAB
Prerequisite: None.
Advisory: CISC 320 and 350
Transferable: CSU

This course covers the knowledge and hands-on techniques needed to implement basic levels of computer security. Topics include configuring users, passwords, anti-malware, firewalls, updates, web browsers, email, backups, and networking for privacy and security.

CISS 310 Network Security Fundamentals

Units: 3
Hours: 45 hours LEC; 27 hours LAB
Prerequisite: None.
Advisory: CISP 300 or 140
Transferable: CSU

This course is an introduction to the fundamental principles and skills of Information Technology security and risk management at the organizational level. Topics include network security, compliance and operational security, threats and vulnerabilities, application and data security, host security, access control and identity management, and
Cryptography. It also covers the required content of the Computing Technology Industry Association (CompTIA) Security+.

**CISS 315 Ethical Hacking**

**Units:** 3  
**Hours:** 45 hours LEC; 27 hours LAB  
**Prerequisite:** None.  
**Corequisite:** CISS 310  
**Advisory:** CISC 300  
**Transferable:** CSU

This course introduces the network security specialist to the various methodologies for attacking a network. Topics include the concepts, principles, and techniques necessary to attack and disable a network within the context of properly securing a network. It emphasizes network attack techniques and methodologies, and appropriate defenses and countermeasures. Supplementary hardware and software may be required.

**CISS 316 Cisco Networking Academy™: CCNA Cybersecurity Operations**

**Units:** 3  
**Hours:** 45 hours LEC; 27 hours LAB  
**Prerequisite:** None.  
**Advisory:** CISS 310 with a grade of "C" or better  
**Transferable:** CSU

This course provides the knowledge and skills needed by today's organizations that are challenged with rapidly detecting cybersecurity breaches and effectively responding to security incidents. It provides an introduction to the knowledge and skills needed for a Security Analyst working with a Security Operations Center team. This course also covers core security skills needed for monitoring, detecting, investigating, analyzing and responding to security events, to protect systems and organizations from cybersecurity risks, threats, and vulnerabilities.

**CISS 321 Scripting for Cyber Security**

**Units:** 3  
**Hours:** 45 hours LEC; 27 hours LAB  
**Prerequisite:** CISN 140, CISS 310, or CISS 315 with a grade of "C" or better  
**Transferable:** CSU  
**General Education:** AA/AS Area II(b)

This course is designed to cover tools that are commonly used by Information Security Professionals. Modern Operating Systems and scripting languages will be discussed as well as utilities and technologies that enable them. Topics including securing, hardening systems, incident response, automating tasks, auditing, and vulnerability assessment will be covered.

**CISS 330 Implementing Internet Security and Firewalls**

**Units:** 3  
**Hours:** 45 hours LEC; 27 hours LAB  
**Prerequisite:** CISS 310 with a grade of "C" or better  
**Transferable:** CSU

This course covers network and internet security and deployment of industry standard countermeasures, including configuring Virtual Private Network (VPN) connections. Topics include the evaluation, implementation, and management of secure remote-access technologies. Also covered is the configuration of network firewalls, and allowing access to key services while maintaining security. This course is not open to students who have completed CISS 325.

**CISS 341 Implementing Windows Operating System Security**

**Units:** 3  
**Hours:** 45 hours LEC; 27 hours LAB  
**Prerequisite:** CISS 310 with a grade of "C" or better  
**Advisory:** CISC 324 and CISS 350  
**Transferable:** CSU

This course introduces methods used to conduct computer forensics investigation. Topics include an overview of computer forensics as a profession, the computer investigation process, operating systems' boot processes and disk structures, data acquisition and analysis, ethics, and a review of standard computer forensic tools. The course topics map to the objectives of the International Association of Computer Investigative Specialists (IACIS) certification.

**CISS 342 Implementing Linux Operating System Security**

**Units:** 3  
**Hours:** 45 hours LEC; 27 hours LAB  
**Prerequisite:** None.  
**Advisory:** CISS 323 and CISS 310  
**Transferable:** CSU

This course provides in-depth information on the Microsoft Windows desktop operating system security features, as well as step-by-step configuration for effective operating system security. The techniques needed in order to maintain the integrity, authenticity, availability, and privacy of the system and user data are covered.

**CISS 350 Disaster Recovery**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** CISS 310  
**Transferable:** CSU

This course provides methods for identifying vulnerabilities and implementing countermeasures to prevent and mitigate failure risks in the information technology infrastructure for the business enterprise. Topics include disaster recovery, development of a disaster recovery plan, risk assessment, and development and implementation of disaster recovery policies and procedures.

**CISS 352 Information Systems Governance and Auditing**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** CISS 310 with a grade of "C" or better  
**Transferable:** CSU

This course is an introduction to the fundamental principles and skills of providing and governing audit services in accordance with Information Systems (IS) audit standards to assist the organization in protecting and controlling information systems. The required content of the ISACA Certified Information Systems Auditor (CISA) is covered.

**CISS 360 Computer Forensics and Investigation**

**Units:** 3  
**Hours:** 45 hours LEC; 27 hours LAB  
**Prerequisite:** None.  
**Corequisite:** CISS 310  
**Advisory:** CISC 324 and CISS 350  
**Transferable:** CSU

This course introduces the methods used to conduct a computer forensics investigation. Topics include an overview of computer forensics as a profession, the computer investigation process, operating systems' boot processes and disk structures, data acquisition and analysis, ethics, and a review of standard computer forensic tools. The course topics map to the objectives of the International Association of Computer Investigative Specialists (IACIS) certification.
Computer Information Science - Web (CISW) Courses

CISW 299 Experimental Offering in Computer Information Science - Web

Units: 0.5 - 4
Prerequisite: None.
Transferable: CSU

This is the experimental courses description.

CISW 300 Web Publishing

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: None.
Advisory: CISC 300 and 305
Transferable: CSU

This course is an introduction to publishing on the World Wide Web. Topics include creating web pages with Hyper Text Markup Language (HTML) and Cascading Style Sheets (CSS), organizing a series of pages into a website, and uploading web pages to a server. This course makes extensive use of the computer tools necessary to insert HTML tags, create images, and view web documents. It takes beginning web designers through the process of designing, building, and publishing a working website.

CISW 304 Cascading Style Sheets

Units: 2
Hours: 27 hours LEC; 27 hours LAB
Prerequisite: CISW 300 with a grade of "C" or better
Transferable: CSU

This course continues the study of technical aspects of standards-based web design for experienced students and web professionals. Topics include the separation of content from presentation, dynamic user interaction, and designing for alternative devices using Cascading Style Sheets (CSS) in combination with Hypertext Markup Language (HTML).

CISW 310 Advanced Web Publishing

Units: 4
Hours: 54 hours LEC; 54 hours LAB
Prerequisite: CISW 300 with a grade of "C" or better
Transferable: CSU

This course builds upon previous web publishing concepts and study. It focuses on learning the JavaScript language and the development of interactive web pages. Topics include jQuery libraries, cascading style sheets, HTML, forms, and client-side scripting with JavaScript.

CISW 321 Web Site Development using Dreamweaver

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: None.
Advisory: CISC 305 and CISW 300
Transferable: CSU

This course covers the use of Adobe Dreamweaver, a visual web-authoring tool, to develop and publish websites. Topics include creating responsive web pages that contain text, images, links, tables, forms, and multimedia. Additional topics include developing effective website design and layout, how to use templates, Search Engine Optimization (SEO) techniques, and using HTML/CSS with the Dreamweaver interface.

CISW 350 Imaging for the Web

Units: 1
Hours: 18 hours LEC; 18 hours LAB
Prerequisite: None.
Advisory: CISC 306 or CISW 300
Transferable: CSU

This course covers, in depth, graphics for the Web. It uses industry standard graphic software to technically develop original graphics as well as to manipulate found imagery. Topics include a review of Web file formats, compressing graphics for use on the Web, photo corrections, editing and enhancing graphics, extracting elements, and using layers. This course also covers more advanced editing such as working with masks and channels and creating simple animation/video.

CISW 355 Web Imaging Projects

Units: 2
Hours: 27 hours LEC; 27 hours LAB
Prerequisite: CISW 350 with a grade of "C" or better
Transferable: CSU

This course is a continuation of CISW 350. It covers the creation of graphics and videos for the Web for marketing and advertising, and it introduces the steps, procedures, and common problems encountered when producing quality graphics for professional websites and social media. Topics include compressing and upload times, cropping and resizing, digital camera imaging, retouching and fixing photographs, photographic special effects and filters, rasterizing text, image maps, and videos. Popular industry photo editing applications will be used to compose, edit, and save graphic images.

CISW 370 Designing Accessible Websites

Units: 1
Hours: 18 hours LEC
Prerequisite: CISW 300 with a grade of "C" or better
Transferable: CSU

This course provides an overview of the methods that are used to design websites for people with disabilities. Current legal requirements for accessible websites, especially the Americans with Disabilities Act (ADA), are emphasized.

CISW 400 Client-side Web Scripting

Units: 4
Hours: 54 hours LEC; 54 hours LAB
Prerequisite: CISW 300 with a grade of "C" or better
Advisory: CISP 300 and CISW 310
Transferable: CSU

This course emphasizes the creation of dynamic and interactive web sites using a client-side scripting language such as JavaScript/Ajax. Topics include the Document Object Model of web pages, core features of the client-side scripting language, event handling, control of windows and frames, functions, and form validation.

CISW 410 Database-Driven Web Applications

Units: 4
Hours: 54 hours LEC; 54 hours LAB
Prerequisite: CISW 300 with a grade of "C" or better
Advisory: CISW 300 completed with a grade of "C" or better. <b>&lt;cb&gt;</b>&lt;cb&gt;one of the following completed with a grade of "C" or better&lt;/cb&gt;&lt;/cb&gt;&lt;b&gt;&lt;/b&gt;&lt;cb&gt;&lt;cb&gt;CISP 300&lt;/cb&gt;&lt;cb&gt;CISP 370&lt;/cb&gt;&lt;/cb&gt;
Transferable: CSU

This course emphasizes the creation of interactive web sites using a server side scripting environment. Topics include core features of a scripting language, embeding server commands in HTML pages, control structures, functions, arrays, form validations, cookies, environmental variables, email applications, and database-driven web applications.
CISW 499 Experimental Offering in Computer Information Science - Web

Units: 0.5 - 4
Prerequisite: None.
This is the experimental courses description.

Transfer to University of California

Transfer Requirements
Students who plan to transfer to the University of California (UC) system must meet certain requirements.

A maximum of 70 UC-transferable units completed at California community colleges can be applied to a baccalaureate degree. Coursework completed that exceeds the 70-unit maximum may be given "subject credit" after transfer. Consult with a counselor.

Transfer Eligibility

Subject Requirement
If you met the scholarship requirement but not the subject requirement, then you must do all of the following to transfer to a UC:

1. Take transferable college courses in the missing subject areas
2. Earn a C or better in each required course
3. Have a 2.0 grade point average (GPA) in all transferable coursework

Examination Requirement
If you met the scholarship requirement but not the examination requirement, then you must complete a minimum of 12 semester units of transferable work and maintain a 2.0 grade point average in transferable coursework.

Scholarship Requirement
If you did not meet the scholarship requirement, then you must do the following:

1. Complete 60 units of UC-transferable college credit with a grade point average of at least 2.4 (for California residents) or 2.8 (for non-residents)
2. Complete the following course pattern, earning a grade of C or better in each course: 1
   - Two transferable courses (three units each) in English composition
   - One transferable course (three units) in mathematical concepts and quantitative reasoning
   - Four transferable courses (three units each) chosen from at least two of the following subject areas: the arts and humanities, the social and behavioral sciences, or the physical and biological sciences

1 Students who satisfy the Intersegmental General Education Transfer Curriculum prior to transferring to UC will satisfy number 2 above.

Intersegmental General Education Transfer Curriculum (IGETC)

When you complete the Intersegmental General Education Transfer Curriculum (IGETC) pattern (https://arc.losrios.edu/catalog/igetc), you partially fulfill the 60-unit requirement for transfer to UC and complete the lower division general education breadth requirements. You should request your IGETC certification from the community college you last attended when your final transcript is sent to the UC campus.

The IGETC is best if you have not yet chosen a major or a campus. Once you have selected a major, it is important to begin fulfilling any required preparatory classes for that major. This is especially true for professional or "high-unit" majors. If you are preparing for an engineering or a high-unit science major at a UC campus, then it is not advisable to use the IGETC. Instead you should concentrate on fulfilling the 60-unit admission requirement by completing lower division major preparation courses as well as the basic admission requirements listed above.

Helpful Hints

• Connect with a counselor regularly to monitor your transfer progress.
• Many courses other than the ones listed in the IGETC will transfer to UC. The units from those other courses will count toward the 60 units required to transfer as a junior. Check the catalog for the transfer status of any course.
• Though transfers do not require an associate degree, it is easy to complete one while preparing to transfer. Learn about associate degree graduation requirements (https://arc.losrios.edu/2020-2021-catalog/graduation-and-transfer/graduation-requirements/associate-degree-graduation-requirements).
• Check with your counselor about other courses needed for your major. In many cases, it is to your advantage to complete all pre-major requirements as well as general education requirements before you transfer.

Transfer to Private Colleges

Even if American River College does not have a transfer agreement with a private or out-of-state college to which you want to transfer, you can probably receive academic credit for most of your community college classes. Most four-year institutions give full credit for general education courses and other courses designated for transfer at community college.

In addition, many out-of-state colleges participate in the Western Undergraduate Exchange (WUE) (https://www.wiche.edu/WUE/students), which offers discounts to California students in certain majors.

Find Out Transfer Requirements

Many colleges require transfer students to have completed a certain number of units, so make sure you check the requirements of the college to which you want to transfer. Transfer requirements are generally outlined in a college's catalog.
Dance

ARC’s Dance program offers a diverse line-up of course offerings, including belly dancing, Polynesian dance, ballet, modern dance, ballroom dance, hip hop, and more. We offer an associate degree in dance. In addition, ARC Dance students have opportunities to perform at live concerts every spring and fall.

Degrees Offered

A.A. in Dance

Dean Steven Roberson
Phone (916) 484-8201

Associate Degree

A.A. in Dance

This degree provides an educational and practical foundation for students pursuing a professional career in dance. It is designed to create avenues toward further study and employment in educational dance, choreography, cultural dance, and dance performance. Topics include cultural dance forms, intermediate dance technique, performance studies, and nutrition. Students interested in transferring to a four-year college should meet with a counselor to determine the appropriate coursework.

The Dance Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- describe the basic structure of the human body and its potential for movement
- recount the historical and personal significance of cultural dance
- list the educational requirements for employment as a dance educator
- compare the standards of class etiquette required for participation in ballroom, urban Hip Hop, modern, and ballet dance courses
- discuss the level of training and commitment required for a concentration in dance performance
- evaluate current trends, philosophies, and companies in professional dance
- examine twelve areas for improvement in performance level
- justify the importance of visualization, creativity, and critical feedback in dance education
- demonstrate the necessary technique and performance skill for audition into a four-year institution or application to entry level employment in a professional dance setting
- notate choreography and transpose from video into movement

Career Information

This degree is designed for those pursuing a career in professional dance. It prepares dancers for entry-level positions and for transfer to four-year colleges and universities.
Dance (DANCE) Courses

DANCE 300 Diverse Cultures in Dance

Units: 1
Hours: 54 hours LAB
Course Family: Dance
Prerequisite: None.
Transferable: CSU; UC
General Education: AA/AS Area III(a); AA/AS Area VI; CSU Area E2

This course compares and contrasts three forms of indigenous, ethnic, and culturally derived dance. Students learn the traditional significance, origins, movement patterns, and basic steps of the dance form. Field trips may be required.

DANCE 301 Belly Dancing

Units: 1
Hours: 54 hours LAB
Course Family: Cultural Dance
Prerequisite: None.
Transferable: CSU; UC
General Education: AA/AS Area III(a); CSU Area E2

This course covers the basic movements, cultural values, and history of belly dance. It includes warmups, movement across the floor, center floor work, combinations, dances, and performance technique. Musical instruments, rhythms, costumes, and choreography are also covered. Field trips may be required.

DANCE 302 African Dance

Units: 1
Hours: 54 hours LAB
Course Family: Cultural Dance
Prerequisite: None.
Transferable: CSU; UC
General Education: AA/AS Area III(a); CSU Area E2

This course covers basic movement from African and West African styles of dance. Afro-Haitian and Afro-Caribbean styles may also be included, as well as an investigation of the Dunham technique and process of African dance. It includes beginning level warmup, across the floor movement, and center combinations to varied drum rhythms. No previous dance experience is necessary. Field trips may be required.

DANCE 304 Polynesian Dance I

Units: 1
Hours: 54 hours LAB
Course Family: Cultural Dance
Prerequisite: None.
Transferable: CSU; UC
General Education: AA/AS Area III(a); CSU Area E2

This course covers basic dances from Polynesia, including dances from Tahiti, Hawaii, and New Zealand. Topics include: warm ups, center dances, and cultural vocabulary. The origin, history, and cultural importance of Polynesian dance is presented. No dance experience is necessary for this course. Field trips may be required.

DANCE 305 Hawaiian Dance I

Units: 1
Hours: 54 hours LAB
Course Family: Cultural Dance
Prerequisite: None.
Transferable: CSU; UC
General Education: AA/AS Area III(a); CSU Area E2

This course covers the basic components of Hawaiian dance within its traditional context. It provides an opportunity to study the history, origin, and cultural importance of hula. Topics include: basic Hawaiian vocabulary for dance and the creation of floral adornments. This course is for students with little or no experience in Hawaiian dance. Field trips may be required.

DANCE 306 Polynesian Dance II

Units: 1
Hours: 54 hours LAB
Course Family: Culture
Prerequisite: None.
Enrollment Limitation: DANCE 304 with a grade of "C" or better or by audition.
Transferable: CSU; UC
General Education: AA/AS Area III(a); CSU Area E2

This course offers further study of Polynesian dance within its traditional context. It continues the basic technique of Polynesian dance begun in DANCE 304 with a more rigorous training approach by adding faster tempos and more complex components. This course includes more intricate rhythms, timing, and footwork, with the original meanings and historical content intact. The origin, history, and vocabulary of Polynesian dances are explored with an emphasis on the current cultural importance of Polynesian dance within a changing society. This course is for students with previous training in Polynesian dance. Field trips may be required.

DANCE 307 Hawaiian Dance II

Units: 1
Hours: 54 hours LAB
Course Family: Cultural Dance
Prerequisite: DANCE 305 with a grade of "C" or better or by audition.
Enrollment Limitation: DANCE 304 with a grade of "C" or better or by audition.
Transferable: CSU; UC
General Education: AA/AS Area III(a); CSU Area E2

This course offers further study of Hawaiian dance within its traditional context. It continues the basic hula technique begun in DANCE 305 with a more rigorous training approach by adding faster tempos and more complex components. This course includes more intricate rhythms, timing, and footwork, with the original meanings and historical content intact. The origin, history, and vocabulary of Hawaiian dances are explored with an emphasis on the current cultural importance of hula in a changing Hawaiian population. This course is for students with previous training in Hawaiian dance. Field trips may be required.

DANCE 310 Jazz Dance I

Units: 1
Hours: 54 hours LAB
Course Family: Jazz Dance Technique
Prerequisite: None.
Transferable: CSU; UC
General Education: AA/AS Area III(a); CSU Area E2

This course covers the concepts of beginning alignment, simple balance, single turns, and basic technique for jazz dance. It provides a foundation in the basic steps, vocabulary, history, and traditions of various jazz dance styles. The focus is on small group dances that use space in a full-out and presentational style. This course is for students without previous dance training. Field trips may be required.

DANCE 312 Jazz Dance II

Units: 1
Hours: 54 hours LAB
Course Family: Jazz Dance Technique
Prerequisite: None.
Enrollment Limitation: DANCE 310 with a grade of "C" or better or by audition.
Transferable: CSU; UC
General Education: AA/AS Area III(a); CSU Area E2

This course continues to refine the basic skills begun in DANCE 310 and further instills proper alignment and technique for jazz dance. This course offers students an opportunity to explore new learning styles.
through the continued study of jazz dance with more complex rhythms, new vocabulary, varied methods of counting, and new spatial problems to be solved. This course is for students with some previous jazz dance training. Field trips may be required.

**DANCE 313 Jazz Dance III**

**Units:** 1  
**Hours:** 54 hours LAB  
**Course Family:** Jazz Dance Technique  
**Prerequisite:** None.  
**Enrollment Limitation:** DANCE 312 with a grade of “C” or better or by audition.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area III(a); CSU Area E2

This course continues the foundation of basic steps and turns begun in DANCE 312 and further instills proper alignment and technique. It introduces more complex combinations in center, a greater vocabulary of movement across the floor, and a better understanding of technique for multiple jazz turns. This course is for students with previous jazz dance training. Field trips may be required.

**DANCE 314 Jazz Dance IV**

**Units:** 1  
**Hours:** 54 hours LAB  
**Course Family:** Jazz Dance Technique  
**Prerequisite:** None.  
**Enrollment Limitation:** DANCE 313 with a grade of “C” or better or by audition.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area III(a); CSU Area E2

This course continues the study of jazz dance focusing on allegro movement studies with quicker, more complex combinations in center, a more difficult vocabulary of movement across the floor, and progressive technique for multiple jazz turns. It emphasizes changes of directions, dynamics, and levels. This course is for students with previous jazz dance training. Field trips may be required.

**DANCE 315 Jazz Dance V**

**Units:** 1  
**Hours:** 54 hours LAB  
**Course Family:** Jazz Dance Technique  
**Prerequisite:** None.  
**Enrollment Limitation:** DANCE 314 with a grade of “C” or better or by audition.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area III(a); CSU Area E2

This course continues the study of jazz dance with rigorous emphasis on allegro movement, jumps, leaps, and technique for multiple turns. Topics include the propensity of jazz dance to absorb the movements of many cultures and to utilize the current social climate in reflecting the era in dance. This course is for students with previous jazz dance training. Field trips may be required.

**DANCE 320 Ballet I**

**Units:** 1  
**Hours:** 54 hours LAB  
**Course Family:** Ballet Technique  
**Prerequisite:** None.  
**Enrollment Limitation:** DANCE 320 with a grade of “C” or better or by audition.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area III(a); CSU Area E2

This course covers the basic alignment, steps, and technique suitable for beginners in ballet. It provides a foundation in the etiquette, vocabulary, and traditions of classical ballet and allows for certain physical modifications to the turnout that is required in more advanced coursework. Included is a progression of barré exercises designed to develop alignment, strength, range of motion, and balance. This course is for students with little or no ballet training. Field trips may be required.

**DANCE 321 Ballet II**

**Units:** 1  
**Hours:** 54 hours LAB  
**Course Family:** Ballet Technique  
**Prerequisite:** None.  
**Enrollment Limitation:** DANCE 320 with a grade of “C” or better or by audition.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area III(a); CSU Area E2

This course reinforces the foundation begun in DANCE 320 and offers an opportunity to perfect basic steps while introducing new combinations at the barre. The origins and purpose of ballet are introduced, along with new vocabulary words, more complex barre combinations and more intricate steps across the floor. The emphasis is on balance, using plié, and extending range of motion. This course is for students with some basic ballet training. Field trips may be required.

**DANCE 322 Ballet III**

**Units:** 1  
**Hours:** 54 hours LAB  
**Course Family:** Ballet Technique  
**Prerequisite:** None.  
**Enrollment Limitation:** DANCE 321 with a grade of “C” or better or by audition.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area III(a); CSU Area E2

This course refines the technique begun in DANCE 321 and introduces more complex steps, new vocabulary, and longer, more difficult combinations. The emphasis is on technique for vertical jumps, multiple turns, and higher extensions with focus also on the continued development of strength. This course is for students with previous ballet training. Field trips may be required.

**DANCE 323 Ballet IV**

**Units:** 1  
**Hours:** 54 hours LAB  
**Course Family:** Ballet Technique  
**Prerequisite:** None.  
**Enrollment Limitation:** DANCE 322 with a grade of “C” or better or by audition.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area III(a); CSU Area E2

This course continues the study of ballet begun in DANCE 322, focusing on concepts for improved technique, better balance, and stronger placement for the upper body. Allegro and adagio combinations are introduced and warm ups are designed to prepare for more difficult center work. This course is for students with previous ballet training. Field trips may be required.

**DANCE 324 Ballet V**

**Units:** 1  
**Hours:** 54 hours LAB  
**Course Family:** Ballet Technique  
**Prerequisite:** None.  
**Enrollment Limitation:** DANCE 323 with a grade of “C” or better or by audition.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area III(a); CSU Area E2

This course continues the study of ballet technique begun in DANCE 323 and promotes greater learning by offering a wider variety of steps, new vocabulary, more difficult barre, turns, leaps, historical information, and the introduction of basic partner dances. This course is designed for students with previous ballet technique and experience. Field trips may be required.
DANCE 326 Ballet: Variations and Combinations

Units: 2
Hours: 18 hours LEC; 54 hours LAB
Course Family: Ballet Technique
Prerequisite: None.
Enrollment Limitation: DANCE 324 or DANCE 325 or by audition.
Transferable: CSU; UC
General Education: AA/AS Area III(a); CSU Area E2

This course utilizes technique and history covered in all previous ballet courses and initiates the process of studying and interpreting ballet variations and combinations. Combinations are newly created and appropriate for each dancer, while performance of variations, traditionally given as a reward for hard work, will be assigned by individual merit and group ability. New vocabulary, variation details, shocking dance history, famous performances, and the ballets that they sprang from are covered. This course may only be taken en pointe by permission and is designed for more experienced dancers. Field trips may be required.

DANCE 330 Modern Dance I

Units: 1
Hours: 54 hours LAB
Course Family: Modern Dance Technique
Prerequisite: None.
Enrollment Limitation: DANCE 330 or by audition.
Transferable: CSU; UC
General Education: AA/AS Area III(a); CSU Area E2

This course provides a solid foundation in technique, alignment, and vocabulary for modern dance. It offers study in the history and traditions of modern dance and an appreciation for its importance in American dance. Individual expression and creativity are encouraged with an emphasis on problem solving and techniques for dealing with basic design, time, shape, and energy concepts for modern dance movement. This course is for students with little or no modern dance training. Field trips may be required.

DANCE 332 Modern Dance II

Units: 1
Hours: 54 hours LAB
Course Family: Modern Dance Technique
Prerequisite: None.
Enrollment Limitation: DANCE 332 with a grade of "C" or better or by audition.
Transferable: CSU; UC
General Education: AA/AS Area III(a); CSU Area E2

This course furthers the study of modern dance begun in DANCE 332 and extends the technique to include studies of time and distance. It encourages technique that results in full out movement, better alignment for strength and balance, and concepts for hopping, jumping, and leaping the ground. The study of modern dance innovators is included. This course is for students with some experience in modern dance technique. Field trips may be required.

DANCE 334 Modern Dance IV

Units: 1
Hours: 54 hours LAB
Course Family: Modern Dance Technique
Prerequisite: None.
Enrollment Limitation: DANCE 333 with a grade of "C" or better or by audition.
Transferable: CSU; UC
General Education: AA/AS Area III(a); CSU Area E2

This course furthers the technique of modern dance studied in DANCE 333 and places the emphasis on explorations of percussive, sustained, and suspended movement qualities with time and effort changes. Utilizing exact repetition, gradual changes, and the human breath, exercises to maintain technique are developed for strength training and imagery as well as inspiration for choreography. This course requires prior modern dance training. Field trips may be required.

DANCE 335 Modern Dance V

Units: 1
Hours: 54 hours LAB
Course Family: Modern Dance Technique
Prerequisite: None.
Enrollment Limitation: DANCE 334 with a grade of "C" or better or by audition.
Transferable: CSU; UC
General Education: AA/AS Area III(a); CSU Area E2

This course furthers the concepts and technique used in DANCE 334 and places the emphasis on explorations of percussive, sustained, and suspended movement qualities with time and effort changes. Utilizing exact repetition, gradual changes, and the human breath, exercises to maintain technique are developed for strength training and imagery as well as inspiration for choreography. This course requires prior modern dance training. Field trips may be required.

DANCE 340 Ballroom Dance

Units: 1
Hours: 54 hours LAB
Course Family: Ballroom Dance Technique
Prerequisite: None.
Transferable: CSU; UC
General Education: AA/AS Area III(a); CSU Area E2

This course provides a foundation for ballroom dance that includes the etiquette, vocabulary, history, and traditions of ballroom dance. The emphasis is on thoughtful partner work, basic ballroom technique, and basic dances. This course is for students with little or no experience in ballroom dance.

DANCE 341 Ballroom Dance II

Units: 1
Hours: 54 hours LAB
Course Family: Ballroom Dance Technique
Prerequisite: None.
Transferable: CSU; UC
General Education: AA/AS Area III(a); CSU Area E2

This course furthers the study of ballroom dance technique begun in DANCE 340 and emphasizes swift execution and new partnering concepts. It includes more complex movement and introduces the potential for improvisation. It also refines the basic skills and builds on them to allow for a greater understanding of ballroom dance forms. This course is designed for students with some experience in ballroom dance.

DANCE 342 Ballroom Dance III: Club Dancing

Units: 1
Dance

DANCE 343 Ballroom Dance IV: Latin

Units: 1
Hours: 54 hours LAB
Course Family: Ballroom Dance Technique
Prerequisite: None.
Enrollment Limitation: DANCE 341 with a grade of “C” or better or by audition.
Transferable: CSU; UC
General Education: AA/AS Area III(a); CSU Area E2

This course continues the foundation in alignment, etiquette, and ballroom dance styles begun in DANCE 341. It allows for more advanced study and builds confidence and ability in competitive forms of ballroom. The focus is on the execution of those dances known as Club Dances in the competitive ballroom field. These dances introduce showmanship and require more skill, better timing, and specific use of non-verbal communication. This course is designed for students with ballroom dance experience.

DANCE 344 Ballroom Dance V: Swing

Units: 1
Hours: 54 hours LAB
Course Family: Ballroom Dance Technique
Prerequisite: None.
Enrollment Limitation: DANCE 342 with a grade of “C” or better or by audition.
Transferable: CSU; UC
General Education: AA/AS Area III(a); CSU Area E2

This course continues the foundation in alignment, etiquette, and technique that was begun in DANCE 341. It allows for more advanced study specifically in Latin styles of dance. These dances introduce professional showmanship and fluent use of non-verbal communication with a focus on more complicated rhythms. This course is designed for those students with experience in ballroom dance technique.

DANCE 345 Ballroom Dance VI: Tango

Units: 1
Hours: 54 hours LAB
Course Family: Ballroom Dance Technique
Prerequisite: None.
Enrollment Limitation: DANCE 343 with a grade of “C” or better or by audition.
Transferable: CSU; UC
General Education: AA/AS Area III(a); CSU Area E2

This course builds on the foundation of DANCE 343. It challenges the student to master difficult forms of tango and requires a comprehensive effort to perfect quick-study, execution, balance, and technical ability. The emphasis is on complex steps that require keen timing, focus, showmanship and partnering skills. This course is designed for students with previous ballroom dance training.

DANCE 348 Ballroom Challenge: Competition and Performance

Units: 1

DANCE 351 Urban Hip Hop I

Units: 1
Hours: 54 hours LAB
Course Family: Hip Hop Technique and Competition
Prerequisite: None.
Enrollment Limitation: DANCE 350 with a grade of “C” or better or by audition.
Transferable: CSU; UC
General Education: AA/AS Area III(a); CSU Area E2

This course includes basic urban-style Hip Hop moves with rapid level changes and strong floor work. Choreography is provided on a bare bones theme and developed according to individual style, ability, and personal interpretation. The history of this genre and the traditional competitive elements of Hip Hop dance are examined, as well as the role of dance in Hip Hop culture. An opportunity for exploration of Freestyle, Old Style, Poppin’, Lockin’ is provided. This course is for students with little or no experience in Hip Hop dance technique. Field trips may be required.

DANCE 352 Urban Hip Hop II

Units: 1
Hours: 54 hours LAB
Course Family: Hip Hop Technique and Competition
Prerequisite: None.
Enrollment Limitation: DANCE 351 with a grade of “C” or better or by audition.
Transferable: CSU; UC
General Education: AA/AS Area III(a); CSU Area E2

This course continues the technique and alignment begun in DANCE 351 on a more comprehensive level. It presents rigorous exercises for the development of strength and kinesthetic awareness. It also uses a vocabulary of intricate steps. The focus is on locomotor movements across the floor to improve smooth execution and center combinations to develop hard-hitting percussive styles. This course is for students with some previous urban Hip Hop dance training. Field trips may be required.

DANCE 353 Urban Hip Hop III

Units: 1
Hours: 54 hours LAB
Course Family: Hip Hop Technique and Competition
Prerequisite: None.
Enrollment Limitation: DANCE 352 with a grade of “C” or better or by audition.
Transferable: CSU; UC
General Education: AA/AS Area III(a); CSU Area E2

This course builds on the styles and technique studied in DANCE 352. The emphasis is on exercises to encourage strength and agility, developing a dance persona, and on combinations that introduce new styles and increase the degree of difficulty with floor work. This course is for dancers with previous urban Hip Hop dance training. Field trips may be required.

DANCE 354 Urban Hip Hop IV

Units: 1
Hours: 54 hours LAB
Course Family: Hip Hop Technique and Competition
Prerequisite: None.
Enrollment Limitation: DANCE 353 with a grade of "C" or better or by audition.
Transferable: CSU; UC
General Education: AA/AS Area III(a); CSU Area E2

This course builds on the foundation provided in DANCE 353. The focus is on improvisation, Freestyle, Cyphering, and battling. Musicality and storytelling are explored along with floor work, rapid tempos, and building upper body strength. This course is for students with previous urban Hip Hop dance training. Field trips may be required.

DANCE 360 Tap Dance I

Units: 1
Hours: 54 hours LAB
Course Family: Tap Dance Technique
Prerequisite: None.
Transferable: CSU; UC
General Education: AA/AS Area III(a); CSU Area E2

This course introduces the basic rhythms, walks, technique, alignment, and footwork of tap dance. It provides a foundation in the history, etiquette, and traditions of tap dance and uses tap dance vocabulary words to focus on step and riff names, their origins and meaning. This course is for students with little or no tap dance training. Field trips may be required.

DANCE 361 Tap Dance II

Units: 1
Hours: 54 hours LAB
Course Family: Tap Dance Technique
Prerequisite: None.
Transferable: CSU; UC
General Education: AA/AS Area III(a); CSU Area E2

This course offers an opportunity to continue the study of tap dance with more complex rhythms, new vocabulary, and varied methods of counting. It furthers the basic technique begun in DANCE 360 and instills tap rhythms, walks, alignment for balance, counts, and footwork. This course is for students with some previous tap dance training. Field trips may be required.

DANCE 362 Tap Dance III

Units: 1
Hours: 54 hours LAB
Course Family: Tap Dance Technique
Prerequisite: None.
Transferable: CSU; UC
General Education: AA/AS Area III(a); CSU Area E2

This course builds on technique studied in DANCE 361 and includes new vocabulary and steps that refine the ability for quick heel or toe balances as well as new exercises for progress in speed and intricacy of taps. Clarity of sounds and timing will be emphasized. This course requires previous experience in tap dance technique. Field trips may be required.

DANCE 363 Tap Dance IV

Units: 1
Hours: 54 hours LAB
Course Family: Tap Dance Technique
Prerequisite: None.
Transferable: CSU; UC
General Education: AA/AS Area III(a); CSU Area E2

This course continues the study of tap dance technique provided in DANCE 362. It furthers instruction with more sounds to each step and introduces the concepts of origin for tap dance. The emphasis is on Irish-based tap and the relaxation of the upper body during performance. This course is designed for students with a background in tap dance technique. Field trips may be required.

DANCE 364 Tap Dance V

Units: 1
Hours: 54 hours LAB
Course Family: Tap Dance Technique
Prerequisite: None.
Enrollment Limitation: DANCE 363 with a grade of "C" or better or by audition.
Transferable: CSU; UC
General Education: AA/AS Area III(a); CSU Area E2

This course combines the elements of tap dance begun in DANCE 363 with the foundation of Shuffle Stride or rhythm tap dance styles of the Harlem Renaissance. The taps sounds are completed very close or into the ground. Along with theatrical jumps, turns, and isolations, steps from an African American Vaudeville dance heritage are included. This course requires previous tap dance training. Field trips may be required.

DANCE 377 Musical Theatre Dance I

Units: 2
Hours: 18 hours LEC; 54 hours LAB
Course Family: Musical Theatre Dance
Prerequisite: None.
Enrollment Limitation: Completion of DANCE 310, 320, 330, 340, or 360, with a grade of "C" or better or by audition.
Transferable: CSU; UC
General Education: AA/AS Area III(a); CSU Area E2

This course provides an opportunity to explore dance for musical theatre and builds on the basic technique covered in DANCE 310, 320, 330, 340, or 360. This course begins with a mock audition and relies upon many basic dance styles in order to provide preparation for dancing in theatrical productions. Choreographed routines and production numbers are utilized, along with monologues, audition technique, vocabulary, and guides for singing while dancing. The emphasis is on authentic era dance styles, basic partnering, and using dance to shape and define a character. This course is designed for students with some previous dance experience. Field trips may be required.

DANCE 390 Contemporary Dance I

Units: 1
Hours: 54 hours LAB
Course Family: Contemporary Dance Technique
Prerequisite: None.
Enrollment Limitation: DANCE 310, 320, and 330 with a grade of "C" or better, or audition.
Transferable: CSU; UC
General Education: AA/AS Area III(a); CSU Area E2

This course builds upon the technique covered in DANCE 310, 320, and 330. Abilities drawn from jazz, ballet, and modern dance are required to pursue this new integrated style. Dancers select and merge three dance techniques and incorporate the vocabulary of gestural movement and non-verbal communication. Development of smooth transitions and learning to use dance steps and elements to communicate an emotional state or story line. This course is intended for students with a knowledge of ballet, modern, and jazz dance technique. Field trips may be required.

DANCE 401 Pre-Pointe and Conditioning

Units: 1
Hours: 54 hours LAB
Course Family: Foundations of Dance
Prerequisite: None.
Enrollment Limitation: DANCE 321, 322, 323, 324, or 325, with a grade of "C" or better, or audition.
Transferable: CSU; UC
General Education: AA/AS Area III(a); CSU Area E2

2023-2024 Catalog
This course covers the technique and conditioning for dancing on pointe and combined with DANCE 322, 323, 324, or 325, builds the strength needed for pointe work. The emphasis is on insuring that the strength and structure of the body is appropriate for pointe work. The course can be taken on flat to increase balance, strength, and alignment for ballet. It is designed for serious students of ballet with previous and on-going ballet training.

**DANCE 403 Choreographic Studies**

**Units:** 2  
**Hours:** 18 hours LEC; 54 hours LAB  
**Course Family:** Foundations of Dance  
**Prerequisite:** None.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area III(a); CSU Area C1; CSU Area E2  

This course allows for the study of choreography from an artistic, historical, and personal perspective and encourages students of choreography to mature by providing deeper source materials. Field trips may be required. It includes the study of selected influential choreographers and their work. This course is for students with previous dance training. Field trips may be required.

**DANCE 406 Introduction to Improvisation**

**Units:** 2  
**Hours:** 18 hours LEC; 54 hours LAB  
**Course Family:** Foundations of Dance  
**Prerequisite:** None.  
**Enrollment Limitation:** DANCE 312, 320, or 330 with a grade of "C" or better, or audition.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area III(a); CSU Area E2  

This course builds on the technique covered in DANCE 312, DANCE 320, and DANCE 330. It introduces strategies for achieving improvisation without self auditing and utilizes concepts for initiating the impulse to move in any dance style. Dancers work through menus and pre-planned improvisational spring boards towards the complete freedom of dancing in a way that is not preconceived. Confidence is developed through repetition, encouragement, facing the emotional risk, and finding a sense of joy by dancing in the moment. This course is designed for students with a background in dance. Field trips may be required.

**DANCE 415 Dance Production: Rehearsal and Backstage Organization**

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Course Family:** Dance Composition and Production  
**Prerequisite:** None.  
**Enrollment Limitation:** Audition  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area III(a); CSU Area E2  

This course provides an opportunity to perform with an emphasis on production technique for dance. Choreography for production and costuming for the choreography are covered as well as how to communicate choreographic ideas and costuming goals. Technique is presented through historical study and choreographic necessity. Production problems in choreography are analyzed for multiple solutions, and safe rehearsals, and performances. Field trips may be required.

**DANCE 417 Dance Production: Studio and Stage**

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Course Family:** Dance Composition and Production  
**Prerequisite:** None.  
**Enrollment Limitation:** Audition  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area III(a); CSU Area E2  

This course is a lecture-demo and production group and is designed for dancers with performance proficiency in several styles of dance. There is an emphasis on public contact with several different performance space configurations and settings. It provides for an opportunity to choreograph, perform, and convert a dance production into three or more different kinds of space configurations. Field trips may be required.

**DANCE 430 Jazz Dance Performance Group**

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Course Family:** Dance Performance Group  
**Prerequisite:** None.  
**Enrollment Limitation:** Audition  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area III(a); CSU Area E2  

This course is a lecture-demo and performance group and is designed for dancers with performance proficiency in several styles of dance. There is an emphasis on public contact, community outreach, dance demonstrations, and a concert performance. The history of jazz dance is covered and ethnic styles are compared. An opportunity to choreograph is offered as well. Field trips may be required.

**DANCE 431 Performance Group: SunDance Project**

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Course Family:** Dance Performance Group  
**Prerequisite:** None.  
**Enrollment Limitation:** By audition. Student must be able to do a double pirouette right and left, kick at least 90 degrees, exhibit floor-work proficiency, glissade assembled landing in a proper position, and demonstrate proficiency in at least two styles of dance.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area III(a); CSU Area E2  

This course provides an opportunity for performing in a variety of dance styles in a theatre setting. It presents performance experience as a situational learning experience in a non-competitive venue. This course facilitates an understanding of how to perform by using both improvised and choreographed material. The focus is on commitment to performance training for presentational dance and includes dance anatomy, basic injury prevention, planning for success, and how to handle errors made on stage as they happen. Topics include strict focus, professional attitudes, and theatre etiquette. This course is designed for students with considerable backgrounds in more than one genre of dance including classical and cultural dance technique.
DANCE 432 Dance Performance:
Contemporary Dance Alliance

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Course Family: Dance Performance Group
Prerequisite: None.
Enrollment Limitation: Audition
Transferable: CSU; UC
General Education: AA/AS Area III(a); CSU Area E2

This course provides techniques and performance opportunities in contemporary dance. It emphasizes public performance using the strategies, rules, and language of contemporary dance. Small group works are developed using subtext, gestural movements, abstract story lines, and movement for movement's sake. Creating complex contemporary dance steps and building short dance pieces to be performed in several public venues develops better performance abilities. Individual portfolios are included and field trips may be required.

DANCE 433 Performance Group: ARCH
Dance Company

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Course Family: Dance Performance Group
Prerequisite: None.
Enrollment Limitation: Audition
Transferable: CSU; UC
General Education: AA/AS Area III(a); CSU Area C1; CSU Area E2

This course provides performance opportunities based on "classic" short stories, fables, and myths. The emphasis is on communicating the ideas and sentiments of well-known stories through dance. How characters might move to convey who they are and what they want is covered, as well as making transition choices to build the story line through dance. Individual portfolios are stressed and field trips may be required.

DANCE 495 Independent Studies in Dance

Units: 1 - 3
Hours: 54 - 162 hours LAB
Prerequisite: None.
Transferable: CSU
General Education: AA/AS Area III(a)

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

DANCE 498 Work Experience in Dance

Units: 0.5 - 4
Hours: 30 - 300 hours LAB
Prerequisite: None.
Enrollment Limitation: Students must be in a paid or unpaid internship, volunteer position, or job related to dance with a cooperating site supervisor. Students are advised to consult with the Dance Department faculty to review specific certificate and degree work experience requirements.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.
Transferable: CSU
General Education: AA/AS Area III(b); AA/AS Area III(a)

This course provides students with opportunities to develop marketable skills in preparation for employment or advancement within the field of dance. It is designed for students interested in work experience and/or internships in transfer-level degree occupational programs. Course content includes understanding the application of education to the workforce, completion of Title 5 required forms which document the student's progress and hours spent at an approved training site, and developing workplace skills and competencies.

During the semester, the student is required to complete 37.5 hours of related paid work experience, or 30 hours of related unpaid work experience for 0.5 unit. An additional 37.5 or 30 hours of related work experience is required for each additional 0.5 units. All students are required to attend the first course meeting, a mid-semester meeting, and a final meeting. Additionally, students who have not already successfully completed a Work Experience course will be required to attend weekly orientations while returning participants may meet individually with the instructor as needed. Students may take up to 16 units total across all Work Experience course offerings. This course may be taken up to four times when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

DANCE 499 Experimental Offering in Dance

Units: 0.5 - 4
Prerequisite: None.
Transferable: CSU
General Education: AA/AS Area III(a)

This is the experimental courses description.
2023-2024 California State University General Education Requirements

Minimum Requirements for Transfer to a California State University (CSU) With Junior Standing

1. Complete 60 transferable semester units. Complete as many of the lower division requirements in your major as possible. These requirements can be found at assist.org (https://assist.org).
   - Complete at least 30 semester units of CSU general education (GE) courses with a grade of "C-" or better.
2. Have a 2.0 grade point average (GPA) in all transferable units attempted.
3. Be in good standing at the last college or university attended.
4. Complete the following CSU GE areas with a grade of "C-" or better:
   - Area A1: Oral Communication
   - Area A2: Written Communication
   - Area A3: Critical Thinking
   - Area B4: Quantitative Reasoning

Tips for Using the CSU GE Pattern

- Each year, a few courses are added or deleted on these patterns. If you take a course during the semester/term it appears on the CSU GE pattern, then it counts for CSU GE. If you take a course after it has been deleted or before it appears on the pattern, then it doesn't count for CSU GE.
- Meet with your counselor before attempting to take courses at another college to fulfill CSU GE requirements. Approved courses vary from college to college.
- The CSU GE pattern may change each year. It is the student's responsibility to check with a counselor for the updated CSU GE pattern.

General Education Certification

Most CSU campuses require that the CSU GE pattern be certified. You must meet with a counselor to have your CSU GE certified. Certification should be done in your last term of enrollment prior to transfer.

A. English Language Communication and Critical Thinking

Choose one course (three units minimum) from each area for a minimum of nine semester units.

<table>

Associate Degrees for Transfer (ADT)

American River College offers associate degrees for transfer to CSU. These include associate in arts (AA-T) or associate in science (AS-T) degrees. These degrees are designed to provide a clear pathway to a CSU major and baccalaureate degree. Students who earn an ADT degree are guaranteed admission with junior standing at a campus in the CSU system and are given priority admission consideration to their local CSU campus or to a program that is deemed similar to their community college major.

Earning an ADT does not guarantee admission to specific majors or campuses. Students who earn an ADT degree are able to complete the remaining requirements for the major in which the ADT was earned with not more than 60 semester or 90 quarter units after transfer.

Current and prospective community college students are encouraged to meet with a counselor to review their options for transfer and to develop an educational plan that best meets their goals and needs.

CSU Requirements for a Bachelor's Degree

Degree requirements at a CSU consist of:

1. General education requirements, which are required of all degree candidates
2. Major requirements, which are part of the student's field of specialization
3. Individual campus graduation requirements
4. State law requirements

These requirements are classified in two levels – lower division and upper division. Students may transfer a maximum of 70 lower division semester units from a community college, which may involve preparation for the major and all lower division general education courses.

To be eligible for graduation with a bachelor's degree from a CSU, students must complete a minimum of 48 semester units of general education. American River College will certify completion of 39 lower division general education units for students if they follow the pattern of requirements outlined here. The remaining nine (9) units required in general education must be upper division courses completed at the four-year university.

A minimum of 60 transferable semester units are required for a student to transfer with junior standing. It is important that lower division major course requirements be completed prior to transfer. Major requirements can be found at assist.org (https://assist.org/).

Review Advanced Placement (https://arc.losrios.edu/2023-2024-catalog/while-you-are-here/credit-for-prior-learning-and-alternative-study-options/advanced-placement-test-scores) (AP), College Level Examination Program (https://arc.losrios.edu/2023-2024-catalog/while-you-are-here/credit-for-prior-learning-and-alternative-study-options/college-level-examination-program-scores) (CLEP), and International Baccalaureate (https://arc.losrios.edu/2023-2024-catalog/while-you-are-here/credit-for-prior-learning-and-alternative-study-options/international-baccalaureate-test-scores) (IB) examinations that are appropriate for fulfillment of specific areas of the CSU GE breadth pattern.
Deaf Culture and American Sign Language Studies

Academic coursework based on a Deaf-centered framework that encourages students to embrace an empowered collaboration with Deaf people.

Main core studies: Present Deaf Studies subjects based on Deafhood framework such as American Sign Language, Sign Linguistics, Deaf Education, Literature, Deaf psychology, Mental Health and Wellness, and Interpreting and maintain current trends in Deaf Culture & ASL Studies; expand further much needed subjects and fields in Deaf Studies, such as culture, sociology, anthropology, history, arts, business, politics, and media doing so through a Deaf-centered lens.

Degrees and Certificates Offered

A.A. in Deaf Culture and American Sign Language Studies
Degree Requirements

Course Code Course Title Units
DEAF 310 American Sign Language I 4
DEAF 312 American Sign Language II 4
DEAF 314 American Sign Language III 4
DEAF 316 American Sign Language IV 4
DEAF 320 Fingerspelling, Classifiers and Numbers 0.5 -1
DEAF 351 Introduction to American Deaf Culture 3
DEAF 352 Introduction to American Deaf Education 3
DEAF 355 Audism and Inequality of the Deaf 3
DEAF 370 Linguistics of American Sign Language 3
A minimum of 3 units from the following: 3
DEAF 318 American Sign Language V (4)
DEAF 380 American Sign Language Literature (3)
Total Units: 31.5 - 32

Certificate of Achievement

Deaf Culture and American Sign Language Studies Certificate

This certificate provides academic coursework based on a Deaf-centered framework that encourages students to embrace an empowered collaboration with Deaf people. It provides an introductory overview of the Deaf community and American Sign Language in a cultural context, with the psychosocial dynamics of people working in the Deaf community. It also emphasizes the development of skills related to paraprofessional services in an individual or group setting, in an educational or social services agency which serves Deaf clients.

Certificate Requirements

Course Code Course Title Units
DEAF 310 American Sign Language I 4
DEAF 312 American Sign Language II 4
DEAF 314 American Sign Language III 4
DEAF 316 American Sign Language IV 4
DEAF 320 Fingerspelling, Classifiers and Numbers 0.5 -1
DEAF 351 Introduction to American Deaf Culture 3
DEAF 352 Introduction to American Deaf Education 3
DEAF 355 Audism and Inequality of the Deaf 3
DEAF 370 Linguistics of American Sign Language 3
A minimum of 3 units from the following: 3
DEAF 318 American Sign Language V (4)
DEAF 380 American Sign Language Literature (3)
Total Units: 31.5 - 32
Student Learning Outcomes
Upon completion of this program, the student will be able to:

• compare and contrast characteristics that impact a Deaf person’s life in the following areas: the world of work, education, family, language, and social development.
• demonstrate ability to carry on American Sign Language conversation consistent with the ability of a 4th semester second language learner with a Deaf individual or groups of Deaf people.
• apply to entry-level positions working with the Deaf community.
• demonstrate characteristics related to personal growth and adjustment in various populations within and outside of the Deaf community.
• apply skills in working with various Deaf participants within and outside of the Deaf community.
• demonstrate skills in working with school-age Deaf children in an educational setting.
• compare and differentiate the Deaf individual to individuals of diverse populations when comparing human development.
• demonstrate appropriate cultural interaction within the Deaf community.
• demonstrate ability to communicate respectfully in a Deaf culture setting.

Career Information
This certificate prepares students for entry-level positions such as paraprofessional services in an individual or group setting, in an educational or social services agency which serves Deaf clients.

Deaf Culture and American Sign Language Studies
(DEAF) Courses

DEAF 310 American Sign Language I
Units: 4
Hours: 72 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312; OR ESLW 340.
Transferable: CSU; UC
General Education: AA/AS Area I; IGETC Area 6

This is the first course in a series of five courses in American Sign Language (ASL). The instructional activities are based on an immersion approach, in which the learners develop language competency in source and target language. It focuses on non-speech communication. Topics include grammatical features such as adjective descriptors, temporal aspect markers and temporal sequencing, conversational skills, narrative skills, and discussions with peers. This course is formerly known as SILA 305.

DEAF 312 American Sign Language II
Units: 4
Hours: 72 hours LEC
Prerequisite: DEAF 310 (formerly SILO 305) with a grade of “C” or better.
Advisory: Eligible for ENGRD 310 AND ENGRD 312; OR ESLW 340.
Transferable: CSU; UC
General Education: AA/AS Area I; IGETC Area 6

This is the second in a series of five courses in American Sign Language (ASL). The emphasis is on nonverbal communication. Topics include grammatical features such as adjective descriptors, differentiation between cardinal/ordinal numbers, contrastive structure, temporal aspect markers and temporal sequencing, conversational skills, narrative skills, and discussions with peers. This course is formerly known as SILA 306.

DEAF 314 American Sign Language III
Units: 4
Hours: 72 hours LEC
Prerequisite: DEAF 312 (formerly SILA 306) with a grade of “C” or better.
Advisory: Eligible for ENGRD 310 or ENGRD 312; OR ESLW 340.
Transferable: CSU; UC
General Education: AA/AS Area I; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B; IGETC Area 6

This course is the third in a series of five courses in American Sign Language. It emphasizes expressive and receptive nonverbal communication skills between signers who have preliminary American Sign Language syntactical and lexical skills. In addition, it provides an understanding of deaf cultural processes by identifying behaviors and norms through assigned activities. It also includes dialogues that involve asking, empathizing, negotiating and agreeing or disagreeing. It emphasizes non-speech communication. This course is formerly known as SILA 315.

DEAF 316 American Sign Language IV
Units: 4
Hours: 72 hours LEC
Prerequisite: DEAF 314 (formerly SILO 315) with a grade of “C” or better.
Advisory: Eligible for ENGRD 310 or ENGRD 312; OR ESLW 340.
Transferable: CSU; UC
General Education: AA/AS Area I; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B; IGETC Area 6

This course is the fourth in a series of five courses in American Sign Language (ASL). It emphasizes expressive communication skills that involve locating and signing interesting facts, making major life decisions, discussing health conditions, and using money. It incorporates information and activities previously learned about Deaf culture into these narratives. The course is conducted entirely in non-speech communication. This course is formerly known as SILA 316.

DEAF 318 American Sign Language V
Units: 4
Hours: 72 hours LEC
Prerequisite: DEAF 316 with a grade of “C” or better
Advisory: Eligible for ENGRD 310 or ENGRD 312; OR ESLW 340.
Transferable: CSU; UC
General Education: AA/AS Area I; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B; IGETC Area 6

This is the last course in a series of five courses in American Sign Language (ASL). It emphasizes effective communication with Deaf people, including expressive communication skills that include narrating unforgettable moments, telling about accidents, and storytelling. This course incorporates information and activities previously learned about Deaf culture into these narratives. It focuses on non-speech communication. This course is formerly known as SILA 318.

DEAF 320 Fingerspelling, Classifiers and Numbers
Units: 0.5 - 1
Hours: 27 - 54 hours LAB
Prerequisite: DEAF 310 with a grade of “C” or better
Transferable: CSU

This course provides hands-on experiences with fingerspelling, classifiers, and American Sign Language (ASL) numbers. Topics include expressive and receptive fingerspelling, classifiers, and ASL numbers techniques. This laboratory course enables ASL learners to develop, expand, and reinforce hands-on experiences with fingerspelling, classifiers, and ASL numbers skills while working independently, in small
groups, and with media and recorded video clips in ASL that incorporate fingerspelling, classifiers and numbers. Coursework includes study topics integrated with expressive and receptive fingerspelling, classifiers, and ASL numbers techniques.

DEAF 351 Introduction to American Deaf Culture

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.
Transferable: CSU; UC
General Education: AA/AS Area V(b); AA/AS Area VI; CSU Area D3; CSU Area D7; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4

This course is a survey of four institutions which have critical impact on the psycho-social development of Deaf people: family, education, work, and society. Topics include awareness of and sensitivity to the unique challenges of deafhood and how they influence personal-social and communication competencies of the Deaf person. This course is formerly known as SILA 330.

DEAF 352 Introduction to American Deaf Education

Units: 3
Hours: 54 hours LEC
Prerequisite: DEAF 351 with a grade of "C" or better
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.
Transferable: CSU; UC
General Education: AA/AS Area V(b)

This course surveys topics related to educating Deaf children, adults, and individuals with additional disabilities. It also covers teaching methods and philosophies, school placement issues, child development, and methods of addressing developmental and linguistic stages. This course is formerly known as SILA 332.

DEAF 355 Audism and Inequality of the Deaf

Units: 3
Hours: 54 hours LEC
Prerequisite: DEAF 351 with a grade of "C" or better
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.
Transferable: CSU; UC
General Education: AA/AS Area V(b); AA/AS Area VI; CSU Area D3; CSU Area D7

This course focuses on topics in the field of race and ethnicity in Deaf community. It provides theoretical background and contexts of audism and oppression. It also covers the contribution of minorities including Deaf people to the United States as well as the sociological reasons for the inequality of Deaf people in the United States.

DEAF 370 Linguistics of American Sign Language

Units: 3
Hours: 54 hours LEC
Prerequisite: DEAF 316 with a grade of "C" or better, or placement through the assessment process.
Transferable: CSU; UC
General Education: AA Area II(b)

This course provides a foundation in American Sign Language (ASL) linguistics. Topics include theoretical knowledge and practical application of phonology, morphology, syntax, and sociolinguistics aspects of ASL usage. This course is formerly known as SILA 317.

DEAF 380 American Sign Language Literature

Units: 3
Hours: 54 hours LEC
Prerequisite: DEAF 314 with a grade of "C" or better
Transferable: CSU; UC
General Education: AA/AS Area I; AA/AS Area VI; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B

This course introduces American Sign Language (ASL) literature genres such as folklore and folktales, storytelling, visual vernacular, personification, classifier story, poetry, ABC and number stories, and non-fiction narrative. Topics include analyzing and applying ASL usage in ASL literature genres.

DEAF 495 Independent Study

Units: 1 - 3
Hours: 54 - 162 hours LAB
Prerequisite: None.
Transferable: CSU

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

DEAF 499 Experimental Offering in Deaf Culture & ASL Studies

Units: 0.5 - 4
Prerequisite: None.
Transferable: CSU

This is the experimental courses description.
2023-2024 Intersegmental General Education Transfer Curriculum Requirements

Completion of all the requirements in the Intersegmental General Education Transfer Curriculum (IGETC) meet lower-division general education requirements at either a California State University (CSU) or University of California (UC) without the need after transfer to take additional lower division general education courses. All courses must be completed with grades of "C" or better.

Students can also visit assist.org (https://assist.org/) to see which courses will complete lower-division major preparation requirements. Students must see a counselor to have the IGETC pattern certified before transferring. Students who have selected a specific campus for transfer should consult with a counselor before following the IGETC pattern.

The IGETC requirements may change each year. It is the student’s responsibility to check with a counselor each year for updated IGETC information.

Advanced Placement (AP) and International Baccalaureate (IB) examinations are appropriate for inclusion on the IGETC pattern.

Area 1: English Communication

For CSU, choose one course from each area for a total of three courses (three units each for a total of nine units). For UC, choose two courses, one from area 1A and one from area 1B (three units each for a total of six units). Complete area 1C if you are completing an associate degree for transfer (ADT).

<table>

</tbody>
</table>

+ Courses may be counted in two areas.

Area 6: Language Other Than English

This is a UC requirement only. Students may fulfill this requirement by one of the following:

- Completion of two years of the same foreign language in high school level work with a grade of "C" or better
- Completion of two years of formal schooling at the sixth grade level or higher in an institution where the language of instruction is not English with a grade of "C" or better (appropriate documentation must be presented to substantiate that the required coursework was completed)
- Earn a score of 3 or higher on the Foreign Language Advanced Placement test
- Complete one of the following courses at American River College

<table>
<thead>
<tr>
<th>Area</th>
<th>Courses</th>

Design & Engineering Technology

Note to Transfer Students

This program is intended to provide skills and experiences that will help students transition directly into the workforce after obtaining a certificate or a degree. Students who may later wish to transfer to a four-year college often find that the portfolio developed in this program, and experiences gained in the workplace, can be used to aid in the transfer process. However, the courses specific to this degree are generally not designed to meet a specific college transfer pathway. Should a student wish to pursue a plan to transfer, it is critical that they meet with an ARC counselor to select and plan the additional courses required for transfer to the specific four-year college or university in order to pursue a bachelor’s degree. Colleges vary widely in terms of the required preparation. The courses that ARC requires for an associate’s degree in this major are often different from the requirements needed for a bachelor’s degree at a specific college. It is recommended that students keep a portfolio of all design/engineering technology coursework completed at ARC to present for evaluation by four-year college program advisors.

Degrees and Certificates Offered

A.A. in Design Technology
A.S. in Engineering Technology
A.S. in Mechatronics
Design Technology Certificate
Engineering Technology Certificate
Mechatronics Certificate
Basic Mechatronics Certificate
CADD Operator - Entry Level Certificate

Dean
Gary Aguilar
Department Chair
Randy Schuster
Phone (916) 484-8588

Associate Degrees

A.A. in Design Technology

This degree emphasizes the knowledge and skills required for entry-level success in the architectural, civil, and mechanical engineering professions. These include graphic standards and practices, technical analysis and communication, material sciences, and the design and critique processes. In addition, projects include environmental (sustainable) design, product economics, and legal considerations.

Current computer technologies and various design software for three dimensional modeling and two dimensional drafting are used throughout the program. Graphic documentation and a portfolio of work are created for each course.

NOTE TO TRANSFER STUDENTS:
It is critical that students meet with an ARC counselor to select and plan the courses required for transfer to a four-year college or university in order to pursue a bachelor’s degree in Architecture and/or Engineering Technology. Colleges vary widely in terms of the required preparation. The courses that ARC requires for an associate’s degree in this major may be different from the requirements needed for the bachelor’s degree.

Admission to accredited Schools of Architecture/Engineering technologies is highly competitive. It is recommended that students keep a portfolio of all design/engineering technology coursework completed at ARC to present for evaluation by college program advisors.

Some colleges require portfolios prior to granting transfer credit or gaining admission.

Total Units: 37 - 38

The Design Technology Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

• solve architectural and engineering technical problems by applying design and engineering process methodologies; critique and analyze the success or failure of the process and the solutions.
• apply the appropriate use of representational media, including study and presentation models (electronic and physical), freehand and conceptual drawing, technical documentation, and diagramming, to convey envisioned ideas at each stage of the design process.
• organize a set of documents for land planning and site development, commercial and residential buildings, and product assemblies that include material selections, cross-referencing, code review, checklists, and coordination.
• create design solutions that demonstrate knowledge and understanding of historical, cultural, human, aesthetic, environmental (sustainable) and social issues.
• communicate architectural and engineering design solutions effectively through individual and cooperative group efforts including speaking, writing, presentation, and the use of various design graphics and technical software.

Career Information

A student who has earned a degree in design technology is well prepared to enter the architecture or engineering field as a design technician. Design technicians are involved in all phases of the design process and duties may include the preparation of technical and presentation drawings, specifications, reports and cost estimates. Design technicians primarily work with architects, mechanical engineers, structural engineers and civil engineers.

A.S. in Engineering Technology

This degree emphasizes the knowledge and skills required for entry-level success in the engineering professions. These include a basic preparation within mathematics and the scientific fields including physics, chemistry, and material sciences. These sciences are applied to technical analysis and graphic communication standards and practices. In addition, projects include environmental and sustainable design issues, product economics, and legal considerations. Current computer technologies and various analytical design and documentation software
are emphasized throughout the program.

NOTE TO TRANSFER STUDENTS:
It is critical that students meet with an ARC counselor to select and plan the courses required for transfer to a four-year college or university in order to pursue a bachelor's degree in Engineering Technology. Colleges vary widely in terms of the required preparation. The courses that ARC requires for an associate's degree in this major may be different from the requirements needed for the bachelor's degree.

Admission to accredited Schools of Engineering Technologies is highly competitive. It is recommended that students keep a portfolio of all design/engineering technology coursework completed at ARC to present for evaluation by college program advisors. Some colleges require portfolios prior to granting transfer credit or gaining admission.

### Degree Requirements

**Course Code** | **Course Title** | **Units**
--- | --- | ---
CHEM 305 | Introduction to Chemistry (5) | 4 - 5
or CHEM 310 | Chemical Calculations (4) | 
CISA 315 | Introduction to Electronic Spreadsheets | 2
CISA 316 | Intermediate Electronic Spreadsheets | 2
DESGN 300 | Introduction to Design Resources | 3
DESGN 302 | Technical Documentation with CADD | 3
DESGN 310 | Graphic Analysis and Documentation (3) | 3
or ENGR 312 | Engineering Graphics (3) | 
deIGN 328 | Engineering Modeling and Design | 3
DESGN 330 | Engineering Systems and Design | 5
DESGN 340 | Architecture and Construction (5) | 5
or DESGN 360 | Commercial Engineering Design and Drafting (5) | 
DESGN 350 | Surveying and Land Planning (5) | 4 - 5
or ENGR 310 | Engineering Survey Measurements (4) | 
PHYS 310 | Conceptual Physics (3) | 3 - 4
or PHYS 350 | General Physics (4) | 
**Total Units:** | **37 - 40**

The Engineering Technology Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

**Student Learning Outcomes**

Upon completion of this program, the student will be able to:

- solve technical engineering problems by applying design and engineering process methodologies; critique and analyze the success or failure of the process and the solutions.
- apply the appropriate use of representational media, including study and presentation models (electronic and physical), freehand and conceptual drawing, technical documentation, and diagramming.
- organize a set of engineering product development documents and technical reports per industry standards.
- research and design for engineering products that demonstrate knowledge and understanding of historical, cultural, human, aesthetic, environmental (sustainable) and social issues.
- communicate engineering design solutions effectively through individual and cooperative group efforts including speaking, writing, presentation, and the use of various design graphics and technical software.

**Career Information**

Upon completion of the degree program the engineering technician will be prepared to go directly into the employment market as a technical assistant to engineers, or other technical employment. For every engineer, several support technicians are required. Engineering technicians are needed in the fields of manufacturing, architecture, construction, materials testing, public utilities, and many other fields.

### A.S. in Mechatronics

This degree provides training in a multi-disciplinary field focusing on industrial automation. Topics include electricity, electronics, industrial motor controls, programmable logic controllers, robotics, AC/DC drives, mechanical design, and manufacturing technologies.

**Degree Requirements**

**Course Code** | **Course Title** | **Units**
--- | --- | ---
DESGN 301 | Introduction to Computer Aided Drafting and Design (CADD) | 3
ET 302 | Principles of Electricity and Electronics | 4
WELD 300 | Introduction to Welding | 3
**Other Semesters:**
DESGN 302 | Technical Documentation with CADD (3) | 3
or ENGR 312 | Engineering Graphics (3) | 
ET 193 | Introduction to Robotics and Sensors | 4
ET 197 | Introduction to Mechatronics | 4
ET 253 | Industrial Communication Systems Support | 4
**Total Units:** | **25**

The Mechatronics Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

**Student Learning Outcomes**

Upon completion of this program, the student will be able to:

- integrate the principles of mechanical, electronic, and electrical technologies into the design of mechatronic systems.
- evaluate mechanical and electrical solutions to technological problems.
- apply industry-appropriate design techniques to develop technical design documents from a conceptual design.
- design robotic and machine automation systems using mechatronic principles.
- evaluate welding projects in accordance with welding procedures and specifications.
- contrast DC, AC, brushless, servo, and stepper motor operation.
- create technical documentation/presentations of models from the mechanical engineering discipline in both technically correct and visually pleasing solid, orthographic, and section view formats.
- design programmable logic controller (PLC) programs demonstrating input/output capabilities.
- design programs for an operator interface terminal (OIT) demonstrating input/output capabilities.

**Career Information**

This degree prepares students for the following technical and supervisory career opportunities: industrial mechanical/electrical systems technician, food processing machine service technician, facilities systems technician, waste water systems technician, manufacturing coordinator, field service technician, and mechanical electrical machine systems installer.
Certificates of Achievement

Design Technology Certificate

This certificate emphasizes the knowledge and skills required for entry level success in the architectural, civil, and mechanical engineering professions. These include graphic standards and practices, technical analysis and communication, material sciences, and the design and critique processes. In addition, projects include environmental (sustainable) design, product economics, and legal considerations. Current computer technologies and various design software for three dimensional modeling and two dimensional drafting are used throughout the program. Graphic documentation and a portfolio of work are created for each course.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

• solve architectural and engineering technical problems by applying design and engineering process methodologies. Critique and analyze the success or failure of the process and the solutions.
• apply the appropriate use of representational media, including study and presentation models (electronic and physical), freehand and conceptual drawing, technical documentation, and diagramming, to convey envisioned ideas at each stage of the design process.
• organize a set of documents for land planning and site development, commercial and residential buildings, and product assemblies that include material selections, cross-referencing, code review, checklists, and coordination.
• create design solutions that demonstrate knowledge and understanding of historical, cultural, human, aesthetic, environmental (sustainable) and social issues.
• communicate architectural and engineering design solutions effectively through individual and cooperative group efforts including speaking, writing, presentation, and the use of various design graphics and technical software.

Career Information

A student who has earned a certificate in design technology is well prepared to enter the architecture or engineering field as a design technician. Design technicians are involved in all phases of the design process and duties may include the preparation of technical and presentation drawings, specifications, reports and cost estimates. Design technicians primarily work with architects, mechanical engineers, structural engineers and civil engineers.

Engineering Technology Certificate

This certificate emphasizes the knowledge and skills required for entry level success in the engineering professions. These include a basic preparation within the scientific fields including physics, mathematics, chemistry, and material sciences. These sciences are applied to technical analysis and graphic communication standards and practices. In addition, projects include environmental and sustainable design issues, product economics, and legal considerations. Current computer technologies and various analytical design and documentation software are emphasized throughout the program.

• apply the appropriate use of representational media, including study and presentation models (electronic and physical), freehand and conceptual drawing, technical documentation, and diagramming.
• organize a set of engineering product development documents and technical reports per industry standards.
• research and design for engineering products that demonstrate knowledge and understanding of historical, cultural, human, aesthetic, environmental (sustainable) and social issues.
• communicate engineering design solutions effectively through individual and cooperative group efforts including speaking, writing, presentation, and the use of various design graphics and technical software.

Career Information

Upon completion of this certificate program the engineering technician will be prepared to go directly into the employment market as a technical assistant to engineers, or other technical employment. For every engineer, several support technicians are required. Engineering technicians are needed in the fields of manufacturing, architecture, construction, materials testing, public utilities, and many other fields.
Mechatronics Certificate
This certificate provides training in a multi-disciplinary field focusing on industrial automation. Topics include electricity, electronics, industrial motor controls, programmable logic controllers, robotics, AC/DC drives, mechanical design, and manufacturing technologies.

Student Learning Outcomes
Upon completion of this program, the student will be able to:

- integrate the principles of mechanical, electronic, and electrical technologies into the design of mechatronic systems.
- evaluate mechanical and electrical solutions to technological problems.
- apply industry-appropriate design techniques to develop technical design documents from a conceptual design.
- design robotic and machine automation systems using mechatronic principles.
- evaluate welding projects in accordance with welding procedures and specifications.
- contrast DC, AC, brushless, servo, and stepper motor operation.
- create technical documentation/presentations of models from the mechanical engineering discipline in both technically correct and visually pleasing solid, orthographic, and sectional view formats.
- design programmable logic controller (PLC) programs demonstrating input/output capabilities.
- design programs for an operator interface terminal (OIT) demonstrating input/output capabilities.

Career Information
This certificate prepares students for the following career opportunities: industrial mechanical/electrical systems technician, food processing machine service technician, facilities systems technician, waste water systems technician, manufacturing coordinator, field service technician, and mechanical electrical machine systems installer.

Certificates

Basic Mechatronics Certificate
This certificate provides introductory training in the multidisciplinary field of mechatronics, which combines mechanical and electronic technologies. Topics include introductory courses in electronics, programmable logic controllers, basic CAD design, and welding.

Student Learning Outcomes
Upon completion of this program, the student will be able to:

- modify and revise redlined drawings in support of a senior drafter or an engineer.
- perform common file management and document preparation activities in support of timely project submittals.
- create drawings for new projects based on representative samples or templates.
- assist in the preparation of specifications, cost estimates, and sheet sets.

Career Information
A student who has earned a CADD Operator - Entry Level certificate is well prepared to enter the architecture or engineering field as a CADD Drafter. CADD Drafters are involved in all phases of the design process and duties may include the preparation of technical and visualization drawings, specifications, reports and cost estimates. CADD Drafters
Design Technology (DESGN) Courses

DESGN 270 Intro to Applied Drone Technology

Units: 0.5
Hours: 8 hours LEC; 4 hours LAB
Prerequisite: None.

Drones are widely used as data collection tools (image, thermal, laser imaging, detection, and ranging) in many industries and disciplines. This course provides an introduction to the different applications of drones in design disciplines as well as an introduction to the rules governing the use of the drones. The class includes both lecture and hands-on activities.

DESGN 271 Survey of Applied Drone Tech in Design

Units: 0.5
Hours: 6 hours LEC; 10 hours LAB
Prerequisite: DESGN 270 with a grade of "C" or better

Drones and their sensors can capture many different types of data including image, thermal, laser imaging, detection, and ranging. This course provides an opportunity to learn about the applications for different types of drones and the specific sensors that are currently applied in the architectural, civil, and mechanical design disciplines.

DESGN 295 Independent Studies in Design Technology

Units: 1 - 3
Prerequisite: None.

DESGN 298 Work Experience in Design Technology

Units: 0.5 - 4
Hours: 30 - 300 hours LAB
Prerequisite: None.
Enrollment Limitation: Students must be in a paid or unpaid internship, volunteer position, or job related to the architectural and engineering field with a cooperating site supervisor. Students are advised to consult with the Design Technology Department faculty to review specific certificate and degree work experience requirements.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.
General Education: AA/AS Area III(b)

This course provides students with opportunities to develop marketable skills in preparation for employment or advancement within the architectural and engineering field. It is designed for students interested in work experience and/or internships in associate degree level or certificate occupational programs. Course content includes understanding the application of education to the workforce, completion of Title 5 required forms which document the student's progress and hours spent at the work site, and developing workplace skills and competencies.

During the semester, the student is required to complete 37.5 hours of related paid work experience, or 30 hours of related unpaid work experience for 0.5 unit. An additional 37.5 or 30 hours of related work experience is required for each additional 0.5 unit. All students are required to attend the first class meeting, a mid-semester meeting, and a final meeting. Additionally, students who have not already successfully completed a Work Experience course will be required to attend weekly orientations while returning participants may meet individually with the instructor as needed. Students may take up to 16 units total across all Work Experience course offerings. This course may be taken up to four times when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

DESGN 299 Experimental Offering in Design Technology

Units: 0.5 - 4
Prerequisite: None.

This is the experimental courses description.

DESGN 300 Introduction to Design Resources

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: ENGRD 116, ENGWR 101, and ESL 325 with grades of "C" or better
Transferable: CSU

This course is a survey of the resources used in the architectural and engineering professions. It introduces construction materials and their properties and characteristics affecting construction processes. Environmental and sustainable materials, sustainable building certification, and rating systems are also covered.

DESGN 301 Introduction to Computer Aided Drafting and Design (CADD)

Units: 3
Hours: 34 hours LEC; 63 hours LAB
Prerequisite: None.
Transferable: CSU; UC

This course covers the fundamentals of AutoCAD, a design and drafting software used to create a wide variety of technical drawings. It includes engineering layout, site and landscape drawings, as well as drawings used in architecture and interior design such as floor and space plans, elevations, and details. This course is not open to students who have completed DESGN 100.

DESGN 302 Technical Documentation with CADD

Units: 3
Hours: 36 hours LEC; 72 hours LAB
Prerequisite: DESGN 301 with a grade of "C" or better
Advisory: ENGWR 101 and ENGRD 116 with a grade of "C" or better; OR ESL 325 with a grade of "C" or better
Transferable: CSU

This course emphasizes using various electronic graphical media software to create standardized technical documentation for architectural, civil, and mechanical applications. A wide range of methods are used to create, print and save 2D, 3D, orthographic, and isometric presentations in a wide variety of output formats using AutoCAD as the primary tool. Section views for mechanical and architectural applications are covered, as well as a variety of drawing and file management topics. This course was formerly DESGN 102.

DESGN 310 Graphic Analysis and Documentation

Units: 3
Hours: 36 hours LEC; 72 hours LAB
Prerequisite: DESGN 301 with a grade of "C" or better
Transferable: CSU
This course covers the application of orthographic projection and geometric construction principles as they are used to solve technical problems. Additionally, graphical analysis is used to determine design characteristics such as strength, deflection, cost, volume, and green technology ratings. These analyses may utilize design characteristics such as forces, moments, ratios, and areas as well as distance, bearing, and grade. These characteristics are then used in the solution of engineering and architectural problems.

**DESGN 320 Three Dimensional Graphics and Design**

*Units*: 3  
*Hours*: 36 hours LEC; 72 hours LAB  
*Prerequisite*: None  
*Advisory*: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; or ESLW 340.  
*Transferable*: CSU; UC

This course is an introduction to the fundamentals of the design process for architecture and engineering. It includes the application of programming, environmental analysis, sustainable (green) considerations, code guidelines and restrictions, market analysis, and economic considerations on design projects. Technical design solutions with perspective graphics, mass modeling prototyping, and virtual concept computer modeling are also covered. The course also includes individual and team studio situations, presentations, and formal critiques.

**DESGN 325 Architectural Modeling and Design**

*Units*: 3  
*Hours*: 36 hours LEC; 63 hours LAB  
*Prerequisite*: DESGN 301 with a grade of "C" or better  
*Transferable*: CSU

This course covers the concepts and applications of three dimensional graphic design using various visualization, modeling, and Building Information Modeling (BIM) programs, such as AutoCAD, SketchUp and Revit. Topics include the procedures and techniques for producing architectural models and associated technical documentation and presentation.

**DESGN 328 Engineering Modeling and Design**

*Units*: 3  
*Hours*: 36 hours LEC; 72 hours LAB  
*Prerequisite*: DESGN 301 with a grade of "C" or better  
*Advisory*: DESGN 320; Eligible for ENGRD 301 or 312 AND ENGWR 300  
*Transferable*: CSU; UC

This course covers the concepts and applications of three dimensional graphic design using various visualization, modeling, and Building Information Modeling (BIM) programs, such as AutoCAD, SketchUp, and Revit MEP. Topics include the procedures and techniques for producing surface models, solid models, and their associated technical documentation/presentation components as well as their application to civil engineering, mechanical engineering and green technology. This course was formerly DESGN 308.

**DESGN 330 Engineering Systems and Design**

*Units*: 5  
*Hours*: 54 hours LEC; 108 hours LAB  
*Prerequisite*: DESGN 302; AND either DESGN 300 or DESGN 320; AND either DESGN 325 or DESGN 328 with grades of "C" or better.  
*Advisory*: ENGWR 101 and ENGRD 116 with a grade of "C" or better; OR ESL 325 with a grade of "C" or better.  
*Transferable*: CSU

This course covers machine and mechanical system design and analysis through the study of Mechanical Electrical Plumbing (MEP) system applications. The topics include the application of Basic Building Information Modeling (BIM) techniques and technical documentation to a variety of industrial and commercial products utilizing orthographics, sections, auxiliaries, tolerance reviews, Geometric Dimension and Tolerancing (GDT), as well as the creation of facility and production plans. It emphasizes the current American National Standards Institute (ANSI) standard for geometric dimension and tolerancing and its application to working drawings. It also emphasizes green technology concerns, such as water and energy conservation in industrial, commercial, or municipal settings.

**DESGN 331 Machine Design**

*Units*: 2  
*Hours*: 18 hours LEC; 54 hours LAB  
*Prerequisite*: DESGN 301, 302, 310, and 328 with grades of "C" or better  
*Advisory*: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340  
*Transferable*: CSU

This course includes many common design and documentation activities for components and assemblies used in machines. Machine design commonly applies to products such as pumps, valves, power transmission devices, and motion control devices. This course also includes an introduction to production control and how that aspect of design integrates with the other design processes.

**DESGN 340 Architecture and Construction**

*Units*: 5  
*Hours*: 54 hours LEC; 108 hours LAB  
*Prerequisite*: DESGN 302; AND either DESGN 300 or DESGN 320; AND either DESGN 325 or DESGN 328 with grades of "C" or better.  
*Advisory*: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300 AND ESLW 340.  
*Transferable*: CSU

This course is an introduction to the residential architectural design process. It covers the fundamentals of construction materials and methodology, basic code requirements, and the introduction of applied engineering concepts for light construction. It also includes the application of a predefined program, environmental analysis, sustainable design, building mass prototyping, and graphical technical documentation.

**DESGN 350 Surveying and Land Planning**

*Units*: 5  
*Hours*: 54 hours LEC; 108 hours LAB  
*Prerequisite*: DESGN 302; AND either DESGN 300 or DESGN 320; AND either DESGN 325 or DESGN 328 or HORT 329 with grades of "C" or better.  
*Advisory*: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.  
*Transferable*: CSU

This course examines elementary surveying principles and basic civil design and drafting techniques. It covers the instruments, methods, and theories necessary for the measurement of distance, direction, angles, and elevations. Surveyed data is applied to create site layouts, site models, profiles, cut and fill volumes, and traverse computations. Additionally, environmental and sustainable design practices are applied to a variety of projects.

**DESGN 360 Commercial Engineering Design and Drafting**

*Units*: 5  
*Hours*: 54 hours LEC; 108 hours LAB  
*Prerequisite*: DESGN 302; AND either DESGN 300 or DESGN 320; AND either DESGN 325 or DESGN 328 with grades of "C" or better.  
*Transferable*: CSU
This course employs exercises simulating typical design and engineering problems in commercial structures, commercial building systems, and environmental systems in buildings. Topics include the fundamentals of construction materials and methodology, and basic code requirements. Also included is an introduction of applied engineering concepts for heavy construction. Activities include review and application of program definitions, environmental analysis, sustainable design applications, and mass prototyping. Design solutions are presented by various concept drawings, physical modeling, and electronic media applications.

DESGN 361 Commercial MEP Design

Units: 2
Hours: 18 hours LEC; 54 hours LAB
Prerequisite: DESGN 300, 301, 302, 310, and 328 with grades of "C" or better
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340
Transferable: CSU

This course introduces commercial building system design and analysis through the study of Mechanical Electrical Plumbing (MEP) system applications. The topics include the application of basic Building Information Modeling (BIM) techniques and technical documentation to a variety of industrial and commercial building concept development projects. Plan, elevation, section and detail views are incorporated into a conceptual plan set. BIM tools are used to perform preliminary building performance analysis related to energy and water consumption.

DESGN 495 Independent Studies in Design Technology

Units: 1 - 3
Hours: 54 - 162 hours LAB
Prerequisite: None.
Transferable: CSU

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

DESGN 498 Work Experience in Design Technology

Units: 0.5 - 4
Hours: 30 - 300 hours LAB
Prerequisite: None.
Enrollment Limitation: Students must be in a paid or unpaid internship, volunteer position, or job related to the advanced manufacturing field or the architectural and engineering field with a cooperating site supervisor. Students are advised to consult with the Design Technology Department faculty to review specific certificate and degree work experience requirements.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.
Transferable: CSU
General Education: AA/AS Area III(b)

This course provides students with opportunities to develop marketable skills in preparation for employment or advancement within the advanced manufacturing field or the architectural and engineering field. It is designed for students interested in work experience and/or internships in transfer-level occupational programs. Course content includes understanding the application of education to the workforce, completion of Title 5 required forms which document the student's progress and hours spent at the work site, and developing workplace skills and competencies.

During the semester, the student is required to complete 37.5 hours of related paid work experience, or 30 hours of related unpaid work experience for 0.5 unit. An additional 37.5 or 30 hours of related work experience is required for each additional 0.5 unit. All students are required to attend the first class meeting, a mid-semester meeting, and a final meeting. Additionally, students who have not already successfully completed a Work Experience course will be required to attend weekly orientations while returning participants may meet individually with the instructor as needed. Students may take up to 16 units total across all Work Experience course offerings. This course may be taken up to four times when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

DESGN 499 Experimental Offering in Design Technology

Units: 0.5 - 4
Prerequisite: None.
Transferable: CSU

This is the experimental courses description.
Transfer Degree Requirements

Associate degrees for transfer (also called ADTs or transfer degrees) are designed to provide a clear pathway for California community college students to California State University (CSU) degrees. California community college students who earn an associate degree for transfer are guaranteed admission with junior standing to select CSU campuses and are given priority admission consideration over other transfer students. Students who have completed a transfer degree in a major deemed similar to a CSU major are able to complete the remaining requirements at that CSU within 60 units after transfer. For more information, consult a counselor.

Students can visit the I Can Go to College (https://icangotocollege.com/) website to learn more.

Requirements for a Transfer Degree

Transfer degrees require the following:

1. Complete all required courses for a major with a grade of "C" or better (or "P" if taking a class Pass/No Pass).
2. Complete one of the following general education (GE) patterns (check with your counselor to determine the appropriate pattern for the degree you are pursuing):
   - Intersegmental General Education Transfer Curriculum (IGETC) – CSU option
   - CSU General Education Breadth Requirements
3. Complete 60 CSU-transferable units. At least 12 of the 60 units must be earned at American River College.

Transfer Degrees at American River College

There are two types of transfer degrees: Associate of arts for transfer (AA-T) and associate of science for transfer (AS-T). American River College offers the following transfer degrees:

- AA-T in Anthropology
- AA-T in Art History
- AS-T in Biology
- AS-T in Business Administration 2.0
- AA-T in Communication Studies
- AS-T in Early Childhood Education for Transfer
- AA-T in Economics
- AA-T in Elementary Teacher Education
- AA-T in English
- AA-T in Geography
- AS-T in Geology
- AA-T in Global Studies
- AA-T in History
- AA-T in Journalism and Mass Communications
- AA-T in Kinesiology
- AS-T in Mathematics
- AA-T in Music
- AS-T in Nutrition and Dietetics
- AA-T in Philosophy
- AS-T in Physics
- AA-T in Political Science
- AA-T in Psychology
- AA-T in Social Justice Studies: Race and Ethnicity
- AA-T in Social Justice Studies: Women, Gender, and LGBTQ Studies
- AA-T in Sociology
- AA-T in Spanish
- AA-T in Studio Art
- AA-T in Theatre Arts

- AS-T in Administration of Justice
Diesel/Clean Diesel Technology

American River College offers a wide variety of programs to appeal to a diverse group of students. Our Automotive Technology, Automotive Collision Technology, and Diesel/Clean Diesel Technology programs are a combination of classroom and hands-on shop experiences that prepare students for careers in all phases of the transportation industry. Students are trained in the use of workshop manuals in traditional and computerized formats, hand-held meters and scanners and special shop tools including power and hand tools.

Degrees and Certificates Offered

A.S. in Diesel Technology
- Clean Diesel Hybrid Technology Certificate
- Clean Diesel Industrial Certificate
- Clean Diesel Management Systems Certificate
- Clean Diesel Technology Certificate
- Diesel Engine Technology Certificate
- Diesel Technology Certificate
- Light Duty Diesel Truck Certificate
- Preventive Maintenance Certificate

Dean: Gary Aguilar
Faculty Contact: Mikhail Drobot
Phone: (916) 484-8588

Associate Degree

A.S. in Diesel Technology

This degree provides training in diesel technology. Topics include an introduction to diesel technology, diesel engine repair, basic hydraulic principles of diesel technology, diesel brake systems, and diesel power trains.

Degree Requirements

<table>

The Diesel Technology Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:
- apply proper techniques for complete engine removal, disassembly, cleaning, and reassembly of diesel engine.
- identify and explain brake system components, as well as application of proper technique for removal and repair of diesel brake system components.
- select and use proper test equipment to evaluate electrical systems, including voltmeters, ammeters, and ohmmeters.
- identify and explain diesel power train components and their functions to assist in diagnosis of drive train failure.

Career Information

This degree prepares the students as diesel technicians in the following areas of specialty: brakes, engine repair, hydraulics, and electrical.

Certificates of Achievement

Clean Diesel Hybrid Technology Certificate

This program covers hybrid-diesel components. Topics include heavy duty hybrid-diesel component application, diesel-hybrid motor generators, clean diesel software, and industrial software and systems.

Certificate Requirements

Student Learning Outcomes

Upon completion of this program, the student will be able to:
- apply basic principles of hybrid diesel component application to proper troubleshooting procedures.
- explain electronic control in diesel hybrid vehicles.
- apply procedural information, illustrations, diagnostic information, and wiring diagrams to Cummins INSITE and Eaton diesel systems.
- locate, download, and apply retrieved data to diesel tractor conditions.

Career Information

Various entry-level positions exist in the hybrid diesel repair industry, such as entry-level technician and hybrid service advisor.

Clean Diesel Industrial Certificate

This certificate prepares students for entry-level positions in the diesel technology industry. Topics include fabrication in the diesel technology industry.

**Total Units:** |                                    | **26**

**Student Learning Outcomes**

Upon completion of this program, the student will be able to:

- apply safety precautions while working in a fabrication environment.
- describe the basic steps in the fabrication process.
- show how to sheet and .120 aluminum welding with metal inert gas (MIG) and tungsten inert gas (TIG).
- outline basic frame fabrication techniques.
- explain popular uses of different metals.

**Career Information**

Entry level positions in the diesel fabrication, suspension, and frame repair industry. Additional career opportunities are likely as the fabrication industry continues to grow.

**Clean Diesel Management Systems Certificate**

This program covers hybrid diesel technology. Topics include hybrid diesel power trains, hybrid diesel high voltage systems, clean diesel software support, and industrial software systems.

**Certificate Requirements**

**Student Learning Outcomes**

Upon completion of this program, the student will be able to:

- describe and explain power flow of hybrid diesel power trains.
- diagnose and repair high voltage cables, connectors, and components.
- locate, download, and apply retrieved information to diesel tractor conditions.
- communicate technical information about Cummins INSITE and Eaton diesel systems.

**Career Information**

Various entry-level positions exist in the hybrid diesel repair industry, such as entry-level technician, hydraulic technician, and heavy equipment service advisor.

**Clean Diesel Technology Certificate**

This program covers the diesel engine systems. Topics include biodiesel fuel and fuel systems, clean diesel technology, and clean diesel software support.

**Certificate Requirements**

**Student Learning Outcomes**

Upon completion of this program, the student will be able to:

- access requirements for converting fossil fuel to biodiesel vehicles.
- apply basic principles to the modern diesel engine.
- apply technical information for repowering, rebuilding, and replacing diesel engine components.
- locate, download, and print information specific to diesel tractor manufacturers.
- apply manufacturer specifications for diesel engine retrofit.

**Career Information**

Various entry level positions exist in the diesel repair industry, such as entry level technician, hydraulic technician, and heavy equipment service advisor.

**Diesel Engine Technology Certificate**

This certificate is designed for students seeking employment in the diesel industry specializing in diesel engine repair.

**Certificate Requirements**

<table>

</tr>
</tbody>
</table>

**Student Learning Outcomes**

Upon completion of this program, the student will be able to:

- comply with safety and environmental regulations and standards required in the diesel repair environment.
- explain and identify natural gas diesel engines, including the proper cleaning, assembly, and disassembly.
- demonstrate correct welding techniques for diesel application.
- utilize safety precautions that apply to diagnose and repair electrical/electronic components.
- locate, download, and print information specific to diesel tractor manufacturers and apply it to the diesel tractor conditions.

**Career Information**

The diesel industry is growing and is in need of highly trained/skilled technicians that can step into the workforce.
Diesel Technology Certificate

This certificate provides training in diesel technology. Topics include diesel brakes, hydraulics, electrical systems, and power trains.

Certificate Requirements

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- apply established procedures in the diesel repair industry.
- inspect and maintain various diesel engine systems.
- diagnose and repair diesel engine systems.

Career Information

Entry level positions in light duty diesel technology, agriculture, and construction industry. Additional career opportunities are likely as the light duty diesel industry continues to grow.

Preventive Maintenance Certificate

This certificate prepares students for entry-level positions in the diesel technology industry. The topics include safety and environmental regulations and standards, as well as the ability to identify various diesel engine applications.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- comply with safety and environmental regulations and standards
- explain the operation of diesel engine components and systems
- identify various diesel engine applications
- demonstrate complete engine reassembly
- apply basic state and federal regulations including Occupational Safety and Health Association (OSHA) and the Environmental Protection Agency (EPA)
- apply basic principles of preventive maintenance to diesel repair

Career Information

Entry level positions in the diesel repair industry.

Light Duty Diesel Truck Certificate

This certificate prepares students for entry-level positions in the diesel technology industry. Topics include theory and operation of light duty diesel engines, computer controlled injection, and emission control systems.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- describe the basic operations of diesel fueled vehicles.
- perform basic diesel engine turbo charger diagnostic procedures.
- test diesel engine emissions and emission control systems.
- apply procedural information, illustrations, diagnostic information, and wiring diagrams to diesel tractors.
- analyze and evaluate the advantages and disadvantages of working in dealerships, independent shops, and fleet shops.

Career Information

Entry level positions in the diesel repair industry.

Diesel/Clean Diesel Technology (DCDT) Courses

DCDT 100 Diesel Technology Basics

Units: 4
Hours: 72 hours LEC
Prerequisite: None.

This course introduces diesel technology. Topics include shop safety, hazardous waste handling and disposal, and engine components and their function.

DCDT 101 Diesel Preventive Maintenance

Units: 4
Hours: 54 hours LEC; 54 hours LAB
Prerequisite: None.

This course presents theoretical and practical training for entry-level diesel technicians. It covers the basic diesel diagnosis and service procedures used in diesel shops. Projects performed in a diesel shop environment provide hands-on experience with industry shop tools. Topics include shop service operations that meet the diesel industry standards, safety, electrical, and other general diesel procedures.
DCDT 102 Biodiesel Fuel and Fuel Systems

Units: 4
Hours: 54 hours LEC; 54 hours LAB
Prerequisite: None.

This course covers the chemistry, production, and impact of biodiesel technology. It also covers how to convert vehicle fuel systems to biodiesel and how this process affects warranties.

DCDT 103 Clean Diesel Systems

Units: 4
Hours: 54 hours LEC; 54 hours LAB
Prerequisite: None.

This course provides a complete overview of the clean diesel engine system. Topics include fuel injection systems and diesel electronic control systems.

DCDT 104 Clean Diesel Rebuild, Retrofit, Repower, Retire

Units: 4
Hours: 54 hours LEC; 54 hours LAB
Prerequisite: None.

This course covers clean diesel rebuilding, repowering, retrofitting, and retiring of equipment decisions. Topics include inspection, rebuilding, replacement, and retirement of diesel systems and components.

DCDT 107 Hybrid Diesel Power Trains

Units: 4
Hours: 54 hours LEC; 54 hours LAB
Prerequisite: None.

This course covers diesel hybrid powertrains found in current hybrid technology. Topics include basic diesel hybrid powertrains, hybrid power modes, and power electronic carriers.

DCDT 108 Hybrid Diesel High Voltage Systems

Units: 4
Hours: 54 hours LEC; 54 hours LAB
Prerequisite: None.

This course covers high voltage power systems on diesel hybrid powered vehicles. Topics include high voltage main component identification and inspection, inspection of high voltage cables, testing, re-use, and end-of-service decisions.

DCDT 109 Hybrid Diesel Component Application

Units: 4
Hours: 54 hours LEC; 54 hours LAB
Prerequisite: None.

This course covers testing and replacement of diesel hybrid components. Topics include electronic shifting theory and diesel hybrid component application.

DCDT 110 Diesel Engine Repair

Units: 4
Hours: 54 hours LEC; 54 hours LAB
Prerequisite: None.

This course covers the principles, operation, and diagnosis of diesel engines. Topics include basic engine operation and construction, parts identification and location, engine disassembly procedures, engine diagnosis, engine repair and rebuilding procedures, and engine reassembly procedures.

DCDT 111 Clean Natural Gas Engine Repair

Units: 4
Hours: 54 hours LEC; 54 hours LAB
Prerequisite: None.

This course introduces clean natural gas engine repair. Topics include engine application and principles of engine operation, disassembly and reassembly of engine components and systems, and various engine systems as they relate to clean natural gas engines.

DCDT 112 Clean Diesel Retrofit

Units: 4
Hours: 54 hours LEC; 54 hours LAB
Prerequisite: None.

This course covers the diesel engine retrofit needs for older diesel engines. Topics include troubleshooting, fault codes, welding, and diesel particulate filter systems.

DCDT 113 Diesel Hybrid Motor Generators

Units: 4
Hours: 54 hours LEC; 54 hours LAB
Prerequisite: None.

This course covers diesel hybrid motor/generators found in current hybrid technologies. Topics include basic diesel hybrid motor/generators, hybrid power modes, and power electronic components.

DCDT 120 Basic Hydraulic Principles of Diesel Technology

Units: 4
Hours: 54 hours LEC; 54 hours LAB
Prerequisite: None.

This course introduces basic hydraulic principles and functions of the diesel engine. Topics include hydraulic fundamentals and principles, functions of hydraulic fluids, directional and flow control valves, welding, and machine hydraulic overview.

DCDT 130 Diesel Brake Systems

Units: 4
Hours: 54 hours LEC; 54 hours LAB
Prerequisite: None.

This course covers the theory, design, adjustment, and repair or overhaul of diesel brake systems and components. Topics include the proper operation of power and hand devices used in the servicing of diesel brake systems and components.

DCDT 140 Diesel Electrical Systems

Units: 4
Hours: 54 hours LEC; 54 hours LAB
Prerequisite: None.

This course covers the principles, operation, and diagnosis of diesel electrical systems. Topics include fundamentals of electricity, electrical circuits, battery operation, fundamentals of magnetism, charging systems, starting systems, and electrical schematics.
DCDT 142 Diesel Emission Control Systems

**Units:** 4  
**Hours:** 54 hours LEC; 54 hours LAB  
**Prerequisite:** None.

This course covers the emission control system of the diesel engine. Topics include performing maintenance and emissions control within the emission limits.

DCDT 150 Diesel Power Trains

**Units:** 4  
**Hours:** 54 hours LEC; 54 hours LAB  
**Prerequisite:** None.

This course covers the diesel power train. Topics include inspection and adjustment of clutch linkage, flywheel, and replacement of clutch brakes.

DCDT 162 Clean Diesel Software Support

**Units:** 4  
**Hours:** 72 hours LEC  
**Prerequisite:** None.

This course covers the skills needed to adequately retrieve and apply system information using Internet-based technical manuals specifically geared toward diesel tractor emission control systems.

DCDT 163 Industrial Software and Systems

**Units:** 4  
**Hours:** 72 hours LEC  
**Prerequisite:** None.

This course covers the skills needed to adequately retrieve and apply Cummins INSITE and Eaton diesel engine information using Internet-based technical manuals specifically geared toward diesel tractor emission control systems.

DCDT 180 Industrial Fabrication I

**Units:** 4  
**Hours:** 54 hours LEC; 54 hours LAB  
**Prerequisite:** None.

This course covers the various processes of welding in transportation and industrial repairs using metal inert gas (MIG) and tungsten inert gas (TIG). Topics include proper safety procedures pertaining to the fabrication of metallic and nonmetallic materials, metallic and nonmetallic fabrication techniques, and various metals and plastics used in fabrication.

DCDT 181 Industrial Fabrication II

**Units:** 4  
**Hours:** 54 hours LEC; 54 hours LAB  
**Prerequisite:** None.

This course covers fabrication which involves cutting, altering, and shaping steel or other materials through the use of different tools, techniques, and processes. Topics include hot-gas and airless fabrication techniques, vehicle frames in relation to fabrication, tack welding, and filler material.

DCDT 190 Applied Projects in Clean Diesel Technology

**Units:** 2  
**Hours:** 108 hours LAB

**Prerequisite:** DCDT 101, 110, 120, 130, 140, or 150 with a grade of "C" or better

This course provides opportunities to pursue advanced laboratory projects in all eight of the Automotive Service Excellence (ASE) for the Medium/Heavy-Duty Technician educational areas. Projects are selected by the Diesel Department.

DCDT 191 Speed and Skill Development

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Prerequisite:** None.

This course covers diesel component diagnosis and repair, including electrical, hydraulics, engine, fabrication, and other areas in preparation for competing in the state fair. This course may be taken up to four times for credit.

DCDT 200 Light Duty Diesel/Green Diesel Technology

**Same As:** AT 156  
**Units:** 4  
**Hours:** 54 hours LEC; 54 hours LAB  
**Prerequisite:** None.

This course introduces the diagnosis and repair of light duty diesel vehicles and covers the theory and operation of light duty diesel engines and their fuel delivery systems. Topics include diesel engine characteristics, early mechanical fuel delivery systems, early cylinder head design, and early engine construction. It also covers how to prepare these engines for conversion to green technology, such as low sulfur fuel, biodiesel, and alternative fuels. This course along with DCDT 201 is applicable for the field technician seeking training for Automotive Service Excellence (ASE) A9 certification and preparation for green technologies.

DCDT 201 Advanced Light Duty Diesel/ Green Diesel Technology

**Same As:** AT 157  
**Units:** 4  
**Hours:** 54 hours LEC; 54 hours LAB  
**Prerequisite:** None.

This course focuses on late model turbocharged light duty diesel vehicles operating on low sulfur, biodiesel, or alternative fuels. Topics include computer controlled injection, emission control systems, sensors, actuators, computer modules, exhaust gas recirculation (EGR) systems, particulate traps, selective catalytic reduction (SCR) systems, and lean oxides of nitrogen (NOx) traps. It covers diagnosis and repair of these systems using computer diagnostic equipment to meet state emission compliance. This course along with DCDT 200 is applicable for the field technician seeking training for Automotive Service Excellence (ASE) A9 certification and preparation for green technologies.

DCDT 280 Professionalism in the Industry

**Units:** 3  
**Hours:** 45 hours LEC; 27 hours LAB  
**Prerequisite:** None.

This course introduces students to the professionalism and soft skills in the heavy duty clean diesel workplace. It provides an in-depth review of skills needed, ranging from applying for jobs, interviewing by panel, professional behavior, proper diesel technology phrases used in the workplace, how to communicate professionally with clients and other employees, and many other topics for the professional diesel technician work etiquette.

DCDT 281 Diesel Shop Operations

**Units:** 4

2023-2024 Catalog
Diesel/Clean Diesel Technology

**DCDT 1002 ASE Brakes (T4)**
- **Units:** 0.25
- **Hours:** 4.5 hours LEC
- **Prerequisite:** None.

This course prepares the Medium/Heavy Duty Truck Technician for taking the Automotive Service Excellence (ASE) Exam for the Brakes T4 certification test.

**DCDT 1003 ASE Suspension & Steering (T5)**
- **Units:** 0.25
- **Hours:** 4.5 hours LEC
- **Prerequisite:** None.

This course prepares the Medium/Heavy Duty Truck Technician for taking the Automotive Service Excellence (ASE) Exam for the Suspension and Steering T5 certification test.

**DCDT 1004 ASE Electrical/Electronic Systems (T6)**
- **Units:** 0.25
- **Hours:** 4.5 hours LEC
- **Prerequisite:** None.

This course prepares the Medium/Heavy Duty Truck Technician for taking the Automotive Service Excellence (ASE) Exam for the Electrical/Electronic Systems T6 certification test.

**DCDT 1005 ASE Industrial Refrigeration Systems (T7)**
- **Units:** 0.25
- **Hours:** 4.5 hours LEC
- **Prerequisite:** None.

This course prepares the Medium/Heavy Duty Truck Technician for taking the Automotive Service Excellence (ASE) Exam for the Industrial Refrigeration Systems T7 certification test.

**DCDT 1006 ASE Preventive Maintenance Inspection (T8)**
- **Units:** 0.25
- **Hours:** 4.5 hours LEC
- **Prerequisite:** None.

This course prepares the Medium/Heavy Duty Truck Technician for taking the Automotive Service Excellence (ASE) Exam for the Preventive Maintenance T8 certification test.

**DCDT 1007 ASE Light Vehicle Diesel Engines (A9)**
- **Units:** 0.25
- **Hours:** 4.5 hours LEC
- **Prerequisite:** None.

This course prepares the Medium/Heavy Duty Truck Technician for taking the Automotive Service Excellence (ASE) Exam for the Light Vehicle Diesel Engine A9 certification test.
Course Transferability and C-ID

Transfer Credit
Courses accepted for transfer by the University of California (UC) and/or California State University (CSU) systems are identified as such in the course details next to "Transferable." Students who have questions regarding transferability of credit for specific courses to specific institutions should consult a counselor.

Course Identification Numbering System (C-ID)
The C-ID system is a statewide numbering system designed to identify comparable courses and facilitate articulation. Any community college course that bears a C-ID number signifies that it is equivalent in content, rigor, and student learning outcomes. Any course with a C-ID number can be assured that it will be accepted at other participating community college or CSU campuses. For example: C-ID COMM 110 at American River College will be accepted by any other college that has been approved for the same C-ID COMM 110 number.

Students should consult a counselor for specific information and help evaluating course transferability. In addition, students should visit assist.org (https://assist.org) to confirm how each college’s course will be accepted for the following:

1. Majors at CSU and UC campuses
2. CSU general education requirements
3. IGETC general education requirements

Please consult a counselor to find out if your courses meet requirements at private and out-of-state colleges and universities. See an up-to-date listing of American River College C-ID approved courses at www.c-id.net (https://www.c-id.net).
Early Childhood Education

The earliest years of life are critical to building a foundation for lifelong learning. Young children need settings in which they can learn and explore in a nurturing and educationally rich environment, with teachers who understand how to foster their social, emotional and cognitive development. If you want to become an early childhood educator and create quality educational programs for young children, then welcome to the American River College (ARC) Early Childhood Education (ECE) Program.

How to Prepare for a Career in Early Childhood Education

Course offerings in ARC’s ECE program align closely with California Community Care Licensing regulations and the requirements for the Child Development Permit granted by the California Commission on Teacher Credentialing. Courses also align with Child Development and Early Childhood Education majors offered by several California State Universities. The number of units/degrees required to work with young children vary by place of employment.

The Associate in Arts (AA) and Associate in Sciences for Transfer (AS-T) degrees at ARC combine a background in the science of child development and theories of learning, as well as hands-on experience working with children.

ARC ECE alumni are currently working throughout California in early childhood education settings including family child care, Head Start, state preschool programs, and public elementary schools. We are proud of our former students, many of whom return after completing their degrees to take classes for professional development or as preparation to become site supervisors and program directors.

What to Expect as a Student in the Early Childhood Education Program

The ECE department strives to bring innovative research-based, current information and knowledge to students. The department believes in the importance of promoting an anti-bias, engaging, intellectually challenging, and creative learning environment. Reflective practices and opportunities to practice critical thinking skills are woven into all coursework. Emphasis is placed on developing professional and ethical practices and opportunities to practice critical thinking skills are woven into all coursework. Emphasis is placed on developing professional and ethical practices and opportunities to practice critical thinking skills are woven into all coursework. Emphasis is placed on developing professional and ethical practices and opportunities to practice critical thinking skills are woven into all coursework.

After you complete the required course work for a certificate, you will need to petition for the certificate (https://apps.arc.losrios.edu/GraduationPetition).

Associate Degrees for Transfer

A.S.-T. in Early Childhood Education for Transfer

The Associate in Science degree in Early Childhood Education (ECE) for Transfer provides a clearly articulated curricular track for students who wish to transfer to a CSU campus, while also serving the diverse needs of students interested in the breadth and depth of the field of early childhood education. Additionally, this degree exposes students to the core principles and practices of the field in order to build a foundation for their future personal, academic, or vocational paths.

The degree is designed to facilitate students’ successful transfer to certain California State University (CSU) campuses that prepare them for advanced study in a variety of graduate programs, as well as a variety of careers such as teaching, Child Development Specialist, Program Directors, and Child Life Specialists. With a BA in ECE/Child Development, students are eligible for the Master Teacher and Site Supervisor levels of the CA Child Development Permit, using the Alternative Qualifications category.

The Associate in Science degree in ECE for Transfer provides students with a major that fulfills the general requirements of the California State University for transfer. Students with this degree will receive priority admission with junior status to certain California State University campuses.

The Associate in Science degree in ECE for Transfer (A.S.-T.) may be obtained by the completion of 60 transferable, semester units with a minimum 2.0 GPA, including (a) the major or area of emphasis described in the Required Program outlined below (earning a C or better in these courses) and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education Breadth Requirements. The ECE courses required in this program are part of the CA Curriculum Alignment Project, Lower Division 8 coursework.

Total Units: 26

The Associate in Science in Early Childhood Education for Transfer (AS-T) degree may be obtained by completion of 60 transferable, semester units with a minimum overall grade point average (GPA) of 2.0, including (a) a minimum grade of “C” (or “P”) for each course in the major or area of emphasis described in the Required...
Student Learning Outcomes

Upon completion of this program, the student will be able to:

- synthesize child development research with principles and practices for early childhood teaching to create early learning environments that are respectful, supportive, and challenging for all children, from infancy through adolescence.
- design inclusive, culturally and linguistically appropriate learning environments, based on child development, child observations, family information and knowledge of culturally diverse child rearing practices.
- incorporate strategies for building respectful, reciprocal family and community relationships in order to support families with their children’s development and learning.
- assess children’s learning through observation, documentation, and interpretation, using results to guide curriculum and teaching strategies.
- recommend developmentally appropriate and culturally relevant approaches to teaching and learning that include respectful, supportive relationships with children and families, and curriculum that support foundational skills and concepts in language, math, science, art, and social relationships.
- demonstrate practices that maintain standards of health, nutrition, and safety in group care early childhood settings.
- apply ethical standards of behavior accepted by the profession of early childhood education.

Associate Degrees

A.A. in Early Childhood Education

This program provides a foundation for in-depth early childhood teacher preparation both through general education and through introductory studies in child development and in early childhood curriculum and pedagogy. Topics include an introduction to the profession, observation techniques, age-appropriate curriculum, the child in the context of family and culture, and health and safety practices for early childhood educators.

- ECE 420 Administration I: Programs in Early Childhood Education (3)
- ECE 422 Administration II: Personnel and Leadership in Early Childhood Education (3)
- ECE 424 Adult Supervision: Mentoring in a Collaborative Learning Setting (2)

Total Units: 38

The Early Childhood Education Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- synthesize child development research with principles and practices for early childhood teaching to create early learning environments that are respectful, supportive, and challenging for all children, from infancy through adolescence.
- design inclusive, culturally and linguistically appropriate learning environments, based on child development, child observations, family information, and knowledge of culturally diverse child rearing practices.
- incorporate strategies for building respectful, reciprocal family and community relationships in order to support families with their children’s development and learning.
- assess children’s learning through observation, documentation, and interpretation, using results to guide curriculum and teaching strategies.
- recommend developmentally appropriate and culturally relevant approaches to teaching and learning that include respectful, supportive relationships with children and families, and curriculum that support foundational skills and concepts in language, math, science, art, and social relationships.
- demonstrate practices that maintain standards of health, nutrition, and safety in early childhood settings.
- apply ethical standards of behavior accepted by the profession of early childhood education.

Career Information

Upon completion of this degree, students possess the competencies required to work as a teacher in both private and public early care and education settings, serving infants through preschool-age children. Additionally, the individual can work as a teacher in before-and-after school programs, serving school-age children.
Certicates of Achievement

Associate Teacher Certificate

This certificate provides the educational coursework that serves as the core curriculum for the early childhood education field. Topics include an introduction to the profession, observation techniques, age-appropriate curriculum, and the child in the context of the family and community. Additionally, there is a focus on practicing these concepts in a supervised field/lab environment. With documented work experience, the student is also eligible to apply to the Commission on Teacher Credentialing for the Associate Teacher Child Development Permit.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- analyze the influence of family, community and culture on the child and identify local resource agencies that support families.
- plan and implement developmentally appropriate indoor and outdoor environments that support children’s learning through play, exploration, and problem-solving.
- build on systematic observations of children’s behavior to design, implement, and evaluate developmentally appropriate learning activities for young children.
- distinguish and apply positive guidance and conflict-resolution strategies that teach children self-discipline and effective, respectful social skills within a diverse group of peers.

Career Information

This certificate allows the student to work as a teacher in a partially funded (Title 22) early care and education (Title 22) program, serving infants/toddlers, preschool-age children, and school-age children in before-and-after school programs. With the Associate Teacher Child Development Permit, an individual can work as an assistant or associate teacher in a publicly funded (Title 5) early care and education program.

Children with Disabilities and Developmental Differences Specialist Certificate

This certificate provides the educational coursework that serves as the core curriculum for the early childhood education field. Topics include an introduction to principles and practices in early childhood education, child development, the study of the child in the context of family and community, anti-bias curriculum, working with children with disabilities, and an introduction to communication disorders. Additionally, this certificate includes a supervised field/lab experience in an inclusive classroom which can be used towards the experience requirement for a Child Development Permit issued by the California Commission on Teacher Credentialing. Upon completion of this certificate, the individual is eligible to be a teacher in a partially funded (Title 22) early care and education program.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- evaluate and apply knowledge of typical and atypical development to create early childhood classrooms that are inclusive, developmentally appropriate, respectful, and supportive for all children.
- design curriculum and programs for children with disabilities and developmental differences that build respectful, reciprocal family relationships and support optimal development and learning, both at home and in group care settings.
- incorporate reflective assessment strategies using observation, documentation, and interpretation in order to guide decisions about support for children with disabilities and developmental differences.

Career Information

Upon completion of this certificate, the student is eligible to be a teacher in a partially funded (Title 22) early care and education program. Additionally, the field experience can be used towards the experience requirement for a Child Development Permit issued by the California Commission on Teacher Credentialing, and meets the demand for early childhood educators who are trained and have experience working with children with disabilities.

Diversity, Equity, and Inclusion Specialist Certificate

This certificate provides the educational coursework that serves as the core curriculum for the early childhood education field. Topics include an introduction to principles and practices in early childhood education, child development, the study of the child in the context of family and community, and anti-bias curriculum. Additionally, it offers a specialization in diversity, equity, and inclusion within early childhood education settings, including the study of the values, issues, and counseling needs of diverse populations, and the influences of stereotypes, bias, discrimination and inequitable systems as they relate to young children’s learning, development, and educational access. Upon completion of this certificate, the individual is eligible to be a teacher in a partially funded (Title 22) early care and education program. With verified work experience and the completion of ECE 320, the student is also eligible to apply to the California Commission on Teacher Credentialing for an Associate Teacher Child Development Permit to work as an associate teacher in a publicly funded (Title 5) early care and education program.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- analyze the influence of family, community, and culture on the child’s development and identify ways to respond to the diversity of cultures represented in an early childhood education setting.
- plan and implement a developmentally appropriate, anti-bias, and culturally supportive classroom environment that supports children’s learning through play, exploration, and problem-solving.
- build on systematic observations of children’s behavior and the classroom environment to design, implement, and evaluate developmentally appropriate, anti-bias, and culturally supportive learning activities for young children.
- describe and apply positive guidance and conflict-resolution strategies that teach children self-discipline and effective, respectful social skills within a diverse group of peers.
- analyze how one’s own racial and cultural background, societal beliefs, and values impact their work with children and families.
- advocate for and promote culturally supportive, anti-bias education in the early childhood education community.
- identify and examine specific values, beliefs, and experiences of diverse populations by race, ethnicity, socioeconomic status, gender identity, sexual orientation, developmental ability, and age.
- identify the cognitive and emotional aspects of institutional discrimination and individual prejudice.

Career Information

Upon completion of this certificate, the student is eligible to be a teacher in a privately funded (Title 22) early care and education program. With verified work experience, and the completion of ECE 320, the student is also eligible to apply to the California Commission on Teacher Credentialing for an Associate Teacher Child Development Permit to work as an associate teacher in a publicly funded (Title 5) early care and education program. In addition, this certificate meets the demand for early childhood educators who are trained in teaching for equity and anti-bias education.

Family Child Care Certificate

This certificate prepares students to operate early care and education programs within their own homes. The courses listed exceed the course requirements for the Department of Social Services, Community Care Licensing. In addition to courses specific to the operation of a licensed family child care home, additional topics include child development theories and principles, the child in the context of the family, anti-bias education principles and practices, and general health and safety practices.

Enrollment Eligibility

To be eligible for enrollment in the program, the student must meet the following criteria:

- Students should be aware they may need to show proof of negative Tuberculosis as well as immunizations or immunity to Tetanus, Pertussis, and Diphtheria. Annual flu shots or physician’s exemption from the flu shot are also required prior to volunteering or being employed to work with children.
- Students should have the ability to pass a background check through the Department of Justice and the Federal Bureau of Investigation prior to employment. Exemptions are granted by the Department of Social Services and the Commission on Teacher Credentialing on an individual basis.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- design the policies and regulations for their family child care home.
- demonstrate culturally respectful and reciprocal interactions with children and their families.
- organize and plan a developmentally appropriate and anti-bias program for the children attending the family child care home.
- evaluate components of a quality family child care program and operate within the regulations of the Department of Social Services, Community Care Licensing for their family child care home.
- assess needs of families and refer them to appropriate community resources.
Career Information

Upon completion of this certificate, the student will have the required units to open and operate a family child care business in their home. In addition to these units, Community Care Licensing requires additional criteria be met, including background checks and home inspection. These courses are also acceptable for work in licensed early childhood education centers and count toward the Child Development Permit. These courses are also acceptable for work in licensed early childhood education centers and count toward the Child Development Permit.

Infant and Toddler Specialist Certificate

This certificate provides the educational coursework that serves as the core curriculum for the early childhood education field. Topics include an introduction to the profession, observation techniques, and age-appropriate curriculum. Additionally, it focuses on infant and toddler development and the care of education of infants and toddlers in group settings.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- evaluate and apply knowledge of infant and toddler development to create infant and toddler programs that are anti-bias, relationship-based, respectful, and inclusive for children from the prenatal period through the first three years after birth.
- design infant and toddler programs that build respectful, reciprocal family relationships and support optimal infant and toddler development and learning, both at home and in group settings.
- incorporate reflective assessment strategies using observation, documentation, and interpretation in order to guide decisions about support for infant and toddler development and curriculum.
- design, implement, and evaluate culturally and developmentally appropriate curriculum and teaching plans that connect knowledge of academic content to meaningful learning environments for infants and toddlers.
- demonstrate practices in maintaining health and safety standards, and managing infectious disease in group settings.
- develop a continuing professional growth plan and advocate for public policy that supports infants, toddlers, their families, and the profession of early childhood education.

Career Information

Upon completion of this certificate, the student exceeds the minimum requirements to be a teacher of infants and toddlers in a publicly funded (Title 5) early care and education program.

Master Teacher Certificate

This certificate builds on the teacher level certificate with additional coursework on adult supervision, emphasizing the mentor’s role in the development of early childhood education professionals. It also includes six units of specialized study, allowing students to select a particular focus (i.e. curriculum, infant and toddler, and children with disabilities and developmental differences). Upon completion of this certificate, with verified work experience teaching children and supervising staff, the student is eligible to apply to the California Commission on Teacher Credentialing for a Master Teacher Child Development Permit to work as a lead teacher in a public (Title 5) early care and education program.

Early Childhood Education

Upon completion of this program, the student will be able to:

- apply child development principles to lead a teaching team in the design and evaluation of environments that are developmentally appropriate, anti-bias, respectful, inclusive, and supportive for all children, from infancy through adolescence.
- design early childhood programs that build respectful, reciprocal, and culturally informed family relationships with the intention of engaging families in their children's development and learning.
- select and utilize reflective child, program, and staff assessment tools to lead a teaching team in developing curriculum and teaching strategies.
- demonstrate practices in maintaining health and safety standards and preventing infectious disease in group-care settings.
- evaluate and implement curriculum and teaching plans, as evidenced through documentation, that support foundational skills and concepts in language, math, science, the arts, and social relationships.
- apply principles and practices for curriculum and instruction that draw from current early childhood education and child development research
- create a continuing professional growth plan and advocate for public policy that supports children and families, equity in education, and the profession of early childhood education.
- examine the role and development of early childhood education professionals as mentors and leaders in creating and leading anti-bias early childhood education programs.

Career Information

Upon completion of this certificate, the student meets the requirements for employment as a lead teacher in a privately funded (Title 22) early care and education program. In addition, with verified work experience teaching children and supervising staff, the student is eligible to apply to the California Commission on Teacher Credentialing for a Master Teacher Child Development Permit to work as a lead teacher in a publicly funded (Title 5) early care and education program.

Site Supervisor Certificate

Administration of early care and education programs is the main focus of this certificate. Topics include administration, supervision and coordination of staff in early childhood settings. Additionally, it provides the educational coursework that serves as the core curriculum for the early childhood education field. Along with documented experience, this certificate leads to the Site Supervisor Permit issued by the California Commission on Teacher Credentialing and is required of those individuals supervising a publicly funded early childhood education site.

Career Information

Upon completion of this certificate, the student exceeds the minimum requirements to work as a director/site supervisor in a privately funded early care and education program. With documented experience supervising staff, the student also meets the requirements to work as a director/site supervisor in a publicly funded early care and education program.

A minimum of 23 units from the following:

- A minimum of 16 units that fulfill the ARC General Education units must be completed in all four of the following areas: Language/Rationality; Humanities; Behavioral Social Science; and Math OR Science. The additional 7 units may also be courses that fulfill the General Education requirement OR any other ECE units.

Total Units: 60

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- formulate an educational philosophy to guide the operation of an early childhood program.
- support culturally respectful interactions among children, parents, teachers and the community.
- evaluate curriculum for sound pedagogy, content, and breadth, including planning for the learning environment, the daily routines, and the individual needs of children.
- manage program planning, budgeting, governing boards, enrollment, and personnel in accordance with the regulations of Title 5 (California Education Code of Regulations) and Title 22 (California Social Services Code of Regulations).
- create procedures for implementing standards of health, nutrition, and safety in group care early childhood education settings.
- plan professional and personal growth and advocacy activities to support children, families and teachers.
Teacher Certificate

This certificate provides a foundation for in-depth early childhood teacher preparation both through general education and through introductory studies in child development and in early childhood curriculum and pedagogy. Additionally, it covers culture and diversity issues in early childhood and health and safety practices. Students must verify required teaching experience to be recommended to the Commission on Teacher Credentialing for issuance of the Teacher Child Development Permit.

A minimum of 16 units from the following: 16

At least one course from each of the following four areas listed in the ARC graduation requirements: (1) Math/Science: Natural Science or a course satisfying the Mathematics Competency requirement; (2) English: Language & Rationality; (3) Humanities; and (4) Social Sciences: Social & Behavioral Sciences.

Total Units: 45

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- confirm child development principles in creating environments that are healthy, respectful, supportive, and challenging for all children, from infancy through adolescence.
- design early childhood programs that build respectful, reciprocal family relationships with the intention of involving families in their children’s development and learning.
- utilize systematic child assessment strategies in order to guide decisions about curriculum and teaching strategies.
- evaluate and implement curriculum and teaching plans, as evidenced through documentation, that support foundational skills and concepts in language, math, science, art, and social relationships.
- demonstrate practices in maintaining health/safety standards and preventing infectious disease in group-care settings.
- analyze principles of culturally relevant and anti-biased education in developing and analyzing early childhood curriculum and environments that respond to and respect diverse cultures and individual needs of children.
- develop a continuing professional growth plan and advocate for public policy that supports children, families and the profession of early childhood education.

Career Information

Upon completion of this certificate and with appropriate documented experience, the student meets the requirement for employment as a teacher in publicly funded early care and education programs, serving infants through preschool-age children. The student also meets the requirements to work as a teacher in a privately funded early care and education program, as well as in a before-and-after school-age program.

Early Childhood Education (ECE) Courses

ECE 294 Topics in Early Childhood Education

Units: 0.5 - 4  
Hours: 9 - 54 hours LEC  
Prerequisite: None.

This course provides opportunity to study current topics in early childhood education which are either not included in current offerings, or require emphasis beyond that offered in existing courses.

ECE 295 Independent Studies in Early Childhood Education

Units: 1 - 3  
Prerequisite: None.

ECE 299 Experimental Offering in Early Childhood Education

Units: 0.5 - 4  
Prerequisite: None.

This is the experimental courses description.

ECE 300 Introduction to Principles and Practices in Early Childhood Education

Units: 3  
Hours: 54 hours LEC  
Prerequisite: None.  
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; OR ESLR 340 AND ESLW 340.  
Transferable: CSU  
C-ID: C-ID ECE 120

This course is an introduction to early childhood education, including an overview of the history of the field, evolution of professional practices and ethics, educational principles that support child development from birth through the school-age years, and teaching practices based on observation, documentation, and interpretation of children’s behavior. Site visits may be required.

ECE 305 Introduction to Family Child Care

Units: 1  
Hours: 18 hours LEC  
Prerequisite: None.  
Transferable: CSU

This course examines the operation of a family child care business, including developmentally appropriate teaching practices in Early Childhood Education. It includes California licensing regulations, health and safety standards, business practices, and appropriate practices and curriculum for children in a family child care setting.
Early Childhood Education

ECE 312 Child Development

Same As: PSYC 372
Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGRWR 300; OR ESLR 340 AND ESLW 340.
Transferable: CSU; UC (UC credit limitation: PSYC 372, 373, and ECE 312 combined: maximum credit, one course )
General Education: AA/AS Area V(b); CSU Area D9; CSU Area E1; CalGETC Area 4I
C-ID: C-ID CDEV 110

This course is a study of the growth and development of children from the prenatal stage through adolescence. For each stage of development, the physical, cognitive, linguistic, social-moral, and emotional aspects of development, with attention to both typical as well as atypical development in each area, are discussed in reference to relevant research and theories. The course covers research methods and data collection approaches. The influences of culture, family, and the interaction of maturational and environmental factors are studied. The material in this course is designed as a foundation for early child care and education, teaching, and parenting. This course is not open to students who have completed PSYC 372.

ECE 314 The Child, the Family and the Community

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGRWR 300; OR ESLW 340.
Transferable: CSU; UC
General Education: AA/AS Area V(b); CSU Area D; IGETC Area 4G
C-ID: C-ID CDEV 110

This course is an examination of the processes of socialization focusing on the interrelationship of family, school, and community. It examines the influence of multiple societal contexts, and explores the role of collaboration between family, community, and schools in supporting children’s development, birth through adolescence. This course offers the opportunity to research and review the diverse community resources available to support the child and the family, and identify ways to advocate for children and families.

ECE 320 Curriculum and Interactions in Early Childhood Education

Units: 4
Hours: 36 hours LEC; 108 hours LAB
Prerequisite: ECE 300 AND ECE 312 or PSYC 372 with a grade of "C" or better.
Enrollment Limitation: Students must show proof of negative tuberculosis as well as immunizations for influenza, pertussis, measles and other immunizations required by the Los Rios Community College District prior to participating in the lab. If the TB test is positive, the test shall be followed by an X-ray of the lungs.
Transferable: CSU
C-ID: C-ID ECE 130

This course includes principles of curriculum development, classroom design, and child guidance, with opportunities to apply these key teaching principles in practical situations. This course provides the opportunity for supervised experience working with children in an early childhood education setting, when placements are available.

ECE 321 Advanced Practicum in Early Childhood Education

Units: 4
Hours: 36 hours LEC; 108 hours LAB
Prerequisite: ECE 320 with a grade of "C" or better
Enrollment Limitation: Students must show proof of negative tuberculosis as well as immunizations for influenza, pertussis, measles and other immunizations required by the Los Rios Community College District prior to participating in the lab. If the TB test is positive, the test shall be followed by an X-ray of the lungs.
Transferable: CSU
C-ID: C-ID ECE 210

This advanced course is aimed at leadership development in the areas of creating effective learning environments, child observation and assessment, documentation of children’s work, behavior guidance, group management, collaborative teaching, building relationships with families, and effective preparation and implementation of curriculum. This course provides the opportunity for supervised experience working with children in an early childhood setting, when placements are available.

ECE 325 Positive Guidance Strategies with Young Children

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Transferable: CSU

This course introduces strategies that teachers and parents can use to help young children develop social and emotional skills. It examines theories, research, and practical applications for teachers in early childhood classrooms and parents at home. Developmental stages of children’s behavior, positive discipline techniques, and promotion of social-emotional skills are also covered.

ECE 326 Making Learning Visible Through Observation and Documentation

Units: 3
Hours: 54 hours LEC
Prerequisite: ECE 300 and 312 with grades of “C” or better
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGRWR 300; OR ESLR 340 AND ESLW 340.
Transferable: CSU
C-ID: C-ID ECE 200

This course links critical and reflective thinking to observation and assessment of young children’s development. It prepares teachers of young children to use observation, documentation, and interpretation strategies to improve program quality in early childhood settings. Multiple forms of child assessment and early childhood program assessment are explored. Site visits may be required.

ECE 330 Infant and Toddler Development

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Transferable: CSU

This course provides a study of infants and toddlers from pre-conception to age three including physical, cognitive, language, social, and emotional growth and development. It applies theoretical frameworks to interpret behavior and interactions between heredity and environment. Additionally, it emphasizes the role of family and relationships in development.

ECE 331 Care and Education of Infants and Toddlers

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Transferable: CSU

This course analyzes the application of current theory and research to the care and education of infants and toddlers in group settings. It examines essential policies, principles, and practices that lead to quality
care and developmentally appropriate curriculum for children from birth through 36 months of age.

**ECE 342 Constructive Math and Science in Early Childhood Education**

*Units: 3*
*Hours: 54 hours LEC*
*Prerequisite: None.*
*Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340.*
*Transferable: CSU*

The course is an introduction to the constructivist approach to teaching math and science concepts in early childhood education. The content and teaching techniques support the perspective that children construct knowledge through a dynamic, interactive process that facilitates their development of working theories related to math and science. Topics include an overview of the role of the teacher in developing appropriate experiences for children and review of current standards and guidelines, including California's Early Learning Foundations and Frameworks.

**ECE 343 Language and Literacy Development in Early Childhood**

*Units: 3*
*Hours: 54 hours LEC*
*Prerequisite: None.*
*Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340.*
*Transferable: CSU*

This course prepares early childhood educators and others working with young children to recognize, understand, and enhance the emergent language and literacy experiences and skills of young children. The knowledge of developmentally appropriate language and literacy practices improves early childhood educators' ability to support young children in the early years (birth to five years) to build a strong foundation for learning to read and write in the primary grades. Topics include an overview of the teachers' role in developing appropriate language and literacy experiences for young children, including ways to support the child learning English as a second language.

**ECE 350 Introduction to Elementary Teaching with Field Experience**

*Same As: ENGED 324*

*Units: 3*
*Hours: 36 hours LEC; 54 hours LAB*
*Prerequisite: None.*
*Enrollment Limitation: All students must complete fingerprint clearances if required by the cooperating school district. Students completing their fieldwork at elementary school sites must comply with those schools' policies regarding proof of vaccinations and TB clearance.*
*Advisory: ECE 312 or PSYC 372*
*Transferable: CSU*

*General Education: AA/AS Area III(b)*
*C-ID: C-ID EDUC 200*

This course introduces the concepts and issues related to teaching diverse learners in today's contemporary schools, kindergarten through grade 12 (K-12). Topics include teaching as a profession and career, historical and philosophical foundations of the American education system, contemporary educational issues, California's content standards and frameworks, and teacher performance standards. In addition, this course requires a minimum of 45 hours of structured fieldwork in public school elementary school settings that represent California's diverse student population, and includes cooperation with campus-approved certificated elementary school teachers.

This course is not open to students who have completed ENGED 324.

**ECE 361 Introducing Young Children to Visual Arts**

*Units: 3*
*Hours: 54 hours LEC*
*Prerequisite: None.*
*Transferable: CSU*

*General Education: AA/AS Area I*

This course prepares teachers in early childhood education with strategies for introducing young children to the media and tools of drawing, painting, sculpting, and other visual arts commonly used by young children to represent and understand the world around them. It focuses on observing children's natural ways of exploring each medium and learning strategies to facilitate and document children's emerging skills and relationship with each medium. It includes strategies for designing early childhood environments that promote children's exploration of visual arts.

**ECE 363 Music and Movement with Young Children**

*Units: 3*
*Hours: 54 hours LEC*
*Prerequisite: None.*
*Transferable: CSU*

*General Education: AA/AS Area I*

This course introduces students to theoretical principles and practical applications for integrating appropriate music and movement experiences in early childhood settings. It focuses on using music and movement as strategies for forming a classroom community of learners, and managing behaviors, routines, and transitions. This course also explores incorporating culturally diverse music and movement activities to support children's understanding and acceptance of differences.

**ECE 401 Field Experience in Inclusive Settings**

*Units: 1*
*Hours: 54 hours LAB*
*Prerequisite: None.*
*Corequisite: ECE 404*

*Enrollment Limitation: Students must show evidence of a negative test or chest X-ray clearance for tuberculosis as well as required immunizations as required from the local school district or education agency. Students may need to submit fingerprints as a requirement for entry into a school setting. A fee will be required.*
*Transferable: CSU*

This course provides experience working in a school environment with children and youth who have disabilities. It is designed as a laboratory for those who have completed or are concurrently enrolled in ECE 404. The course covers skills for students who want to be general educators, special educators, school and social service providers, and/or other community workers who are essential in providing inclusive/integrated environments for children and youth with disabilities. Environmental modifications in educational, agency, and community settings are studied. Classroom modifications in curriculum, assessment, behavior management, and instructional methods are examined. When taken after or concurrently with ECE 404, it is designed to meet the Special Education requirement for clear multiple and single subject credentials in California. Students must supply their own transportation to selected elementary school placements.

**ECE 402 Infants with Atypical Development**

*Units: 3*
*Hours: 54 hours LEC*
*Prerequisite: None.*
*Advisory: ECE 312 with a grade of "C" or better; ECE 330 with grades of "C" or better*
*Transferable: CSU*
This course is designed to acquaint the student with the characteristics of atypical infant assessment procedures and techniques for intervention in the developmental areas of sensory stimulation and integration, motor development, cognition, language, social, and self-help skills. It explores community services, agencies, and career opportunities in fields related to the infant with atypical development.

**ECE 404 Children with Special Needs**

*Units: 3*
*Hours: 54 hours LEC*
*Prerequisite: ECE 312 or PSYC 372 with a grade of "C" or better*
*Transferable: CSU*

This course is an overview of the developmental characteristics and learning differences of children with disabilities from birth through adolescence. It includes an overview of historical and societal influences, laws relating to children with disabilities, the identification and referral process, and current educational strategies including assessment and curriculum design. Community resources, advocacy, and challenges for children with disabilities and their families will be examined. When taken concurrently with ECE 401, it is designed to meet the Special Education requirement for clear multiple and single subject credentials in California.

**ECE 415 Children’s Health, Safety and Nutrition**

*Same As: NUTRI 320*
*Units: 3*
*Hours: 54 hours LEC*
*Prerequisite: None.*
*Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; OR ESLR 340 AND ESLW 340.*
*Transferable: CSU*
*C-ID: C-ID ECE 220*

This course examines basic nutrition, health, and safety needs of children from the prenatal period through school age. Topics include introduction to early childhood curriculum, laws, regulations, standards, policies, and procedures related to child health, safety, and nutrition. It emphasizes integrating and maintaining the optimal health, safety, and nutritional concepts in everyday planning and program development for all children, along with the importance of collaboration with families and health professionals. This course is not open to students who have taken NUTRI 320.

**ECE 420 Administration I: Programs in Early Childhood Education**

*Units: 3*
*Hours: 54 hours LEC*
*Prerequisite: ECE 300 with a grade of "C" or better; and either ECE 312 or PSYC 372 with grades of "C" or better; Or, BA in Child Development or related field from a regionally accredited college or university.*
*Advisory: ECE 320*
*Transferable: CSU*

This course is an introduction to the administration of early childhood programs. It covers program types, budgets, management, regulations, laws, and the development and implementation of policies and procedures. It also examines various administrative tools, philosophies, and techniques needed to open, organize, and operate an early care and education program.

**ECE 422 Administration II: Personnel and Leadership in Early Childhood Education**

*Units: 3*
*Hours: 54 hours LEC*
*Prerequisite: ECE 420 with a grade of "C" or better*

**ECE 424 Adult Supervision: Mentoring in a Collaborative Learning Setting**

*Units: 2*
*Hours: 36 hours LEC*
*Prerequisite: ECE 314 and 320 with grades of "C" or better*
*Transferable: CSU*

This course covers principles and methods of supervising and mentoring teachers, volunteers, staff, and other adults in early childhood education settings. Emphasis is on the roles and development of early childhood professionals as mentors and teachers working collaboratively to guide a teaching team or individual within an early childhood education setting. This course satisfies the adult supervision requirement for the CA Child Development Master Teacher Permit and Site Supervisor permit issued by the CA Commission on Teacher Credentialing.

**ECE 430 Culture and Diversity in Early Childhood Education**

*Units: 3*
*Hours: 54 hours LEC*
*Prerequisite: None.*
*Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; OR ESLW 340.*
*Transferable: CSU*
*C-ID: C-ID ECE 230*
*General Education: AA/AS Area V(b); AA/AS Area VI*
*C-ID: C-ID ECE 230*

This course examines the historical and current perspectives on diversity and inclusion and the impact of systemic societal influences on children’s development, learning, and school experiences. Strategies for developmentally, culturally, and linguistically appropriate anti-bias curriculum will be explored as well as approaches to promote inclusive and anti-racist classroom communities. This course also includes self-reflection on the influence of teachers’ own culture and life experiences on teaching and interactions with children and families.

**ECE 495 Independent Studies in Early Childhood Education**

*Units: 1 – 3*
*Hours: 54 - 162 hours LAB*
*Prerequisite: None.*
*Transferable: CSU*

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

**ECE 499 Experimental Offering in Early Childhood Education**

*Units: 0.5 - 4*
*Prerequisite: None.*
*Transferable: CSU*

This is the experimental courses description.
Order Official Transcripts From American River College

Order Transcripts Online

American River College has contracted with Parchment to provide transcript ordering and electronic delivery of PDF transcripts. Parchment can send PDF transcripts through an encrypted and secure service to any valid email address (another college or university, third-party recipient, or the requestor).

Current students, former students, and alumni can request a PDF transcript online anytime and from virtually anywhere. Submit separate orders for each Los Rios college attended.

Cost

The first two transcripts requests are free for each Los Rios college attended. After that, each transcript request costs $5.00. New Parchment users need to set up an account for the first order.

Current Students

Order official transcripts online through eServices. Click Academic Records, then Request Official Transcript.

Go to eServices (https://ps.losrios.edu/student/signon.html)

Alumni and Former Students

Alumni and former students can order official transcripts online directly through Parchment.

Alumni Transcript Order (https://www.parchment.com/u/registration/32214/account)

Check Order Status Online

Current and former students can check the status of a transcript order (https://www.parchment.com/u/order/track) online via their Parchment account.

Advantages of Ordering Transcripts Online

- You can order transcripts anytime, anywhere, through our partner, Parchment.
- Sending digital transcripts gets your credentials there almost instantaneously – it’s the fastest way!
- Check your order status and order history online, through your Parchment Credential Profile.
- Parchment sends automatic order updates via email. From receipt of the order to order completion, the requestor is automatically notified each step of the way.
- You can send transcripts digitally to professional application services such as LSAC and AMCAS.

Important Order Information

Orders Needed Quickly

If you need your transcript quickly, then we recommend that you select the PDF delivery option. PDF transcripts are official transcripts. However, please be aware that when sending a PDF transcript to yourself, it cannot then be forwarded to a different email address. Forwarding a PDF transcript makes it unofficial. If your transcript is going to a third party, then you should have it sent directly to their email address.

Student and Alumni Responsibilities

Students and alumni assume responsibility for the following:

- Providing the correct mailing address and/or email address.
- Ensuring the recipient accepts your chosen method of delivery.
- Ordering with enough time to meet the recipient’s deadline.
• Following up with the recipient to ensure the order’s arrival.

**Current Semester Transcripts**

Official transcripts for the current semester will be processed after final grades are submitted. At the end of the semester, you can check that your current grades are included by viewing your unofficial transcript in eServices (https://ps.losrios.edu/student/signon.html). Work-In-Progress grades will be included for current courses.

**Third Party Authorization**

Student records are protected by the Family Educational Rights and Privacy Act (FERPA). If a third party is picking up your transcripts, they must provide an authorization signed by you. Online requests that are automatically verified through eServices (or another automated authentication) are the exception to this rule.

**Lost Transcripts**

We are not responsible if your transcript is lost by the US Postal Service, FedEx, or the school or agency it was sent to. We are also not responsible if you provide the wrong mailing address and your transcript is lost as a result. You will have to pay the normal fees for new transcript orders.

**Order Transcripts by Mail**

Submit a completed transcript request form to American River College. Make a check or money order payable to Los Rios Community College District (the fee is $5.00 per transcript request). Mail to:

American River College  
Attn: Admissions  
4700 College Oak Drive  
Sacramento, CA 95841

Download the ARC Transcript Request Form (shared/doc/admissions-records/forms/arc-official-transcript-request-form.pdf).

**Questions?**

Visit the Parchment Help Center (https://parchmentsupport.force.com/s/?language=en_US) if you have questions about ordering or email notifications, experience login issues, or need help. You can also engage with ParchieBot, an intelligent chat function designed to answer your questions and provide order information.
Programs of Study

American River College offers associate degrees, certificates, and transfer opportunities, as well as courses in general education.

Degree Programs

Associate in Arts Degree (AA)

The Associate degree may be obtained by the completion of all required courses for a major (18 units or more) with grades of "C" or better in each course, fulfillment of general education requirements, satisfaction of competencies, and completion of sufficient electives to meet a minimum total of 60 units with a grade point average of 2.0 ("C" average). At least 12 units toward the degree must be completed at American River College.

Associate in Science Degree (AS)

The Associate degree may be obtained by the completion of all required courses for a major (18 units or more) with grades of "C" or better in each course, fulfillment of general education requirements, satisfaction of competencies, and completion of sufficient electives to meet a minimum total of 60 units with a grade point average of 2.0 ("C" average). At least 12 units toward the degree must be completed at American River College. An Associate in Science Degree includes all science, technology, engineering, and mathematics (STEM) disciplines and career education (CE) fields.

Associate in Arts for Transfer (AA-T) and Associate in Science for Transfer (AS-T)

The following are the Associate Degree for Transfer (ADT) student completion requirements (as stated in SB 1440 law):

1. Completion of a minimum of 60 semester units or 90 quarter units that are eligible for transfer to the California State University, including both of the following:
   A. The Intersegmental General Education Transfer Curriculum (IGETC) or the California State University (CSU) General Education Breadth Requirements.
   B. A minimum of 18 semester units or 27 quarter units in a major or area of emphasis, as determined by the community college district.

2. Obtaintment of a minimum grade point average of 2.0. ADTs also require that students must earn a "C" or better in all courses required for the major or area of emphasis.

At least 12 units toward the degree must be completed at American River College.

Visit A Degree With A Guarantee: Associate Degree for Transfer (https://adegreewithaguarantee.com) to learn more.

Certificate Programs

American River College offers two types of certificates:

Certificate of Achievement

The Certificate of Achievement certifies that a student has completed all required courses and is prepared to enter the career designated on their certificate. Certificate of Achievement programs are developed to provide vocational training for students who are not necessarily seeking a college degree. Certificates of Achievement require a grade of "C" or better in each course with a minimum of 12 degree-applicable units completed at American River College.

Departmental Certificate

Departmental Certificates are intended to certify that students are prepared to meet specific occupational needs, upgrade skills, or advance in an existing career. A grade of "C" or better is required in each course leading to the Departmental Certificate. Departmental Certificates are not noted on transcripts.

Departmental Certificates require 15.99 units or fewer. For Departmental Certificates requiring one to 11 units, all units must be completed at American River College. For Departmental Certificates requiring 12 to 15.99 units, a minimum of 12 units must be completed at American River College.

Note: Department Certificates are also listed as Certificates under the program requirement.
Economics

Economics is the study of how individuals and societies choose to use limited resources for production of goods and services and how they distribute them for current and future consumption. Economics is divided into two major areas: macroeconomics and microeconomics. Macroeconomics studies decision-making at the national level. Microeconomics topics include gross domestic product, unemployment, inflation, and money and banking. Microeconomics studies decision-making at the individual household, business firm, and industry levels. Microeconomics topics include theories of the firm and consumer behaviors.

Courses offered by the Economics Department are designed to satisfy general education requirements at American River College, and they are transferable to the CSU system, the UC system, and other fine institutions of higher learning in the United States. Furthermore, these economics courses will provide students with essential tools to analyze contemporary national and international economic issues.

Degrees Offered

A.A.-T. in Economics

Division Dean Kirsten Corbin
Department Chair Chiuping Chen
Phone (916) 484-8283

Associate Degree for Transfer

A.A.-T. in Economics

The Associate in Arts degree in Economics for Transfer provides students with a major that fulfills the general requirements of the California State University for transfer. Students with this degree will receive priority admission with junior status to the California State University system. The Associate in Arts degree in Economics for Transfer (AA-T) may be obtained by the completion of 60 transferable, semester units with a minimum overall grade point average (GPA) of 2.0, including (a) a minimum grade of "C" (or "P") for each course in the major or area of emphasis described in the Required Program outlined below (earning a C (or "P") or better in these courses) and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education-Breadth Requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- explain terms and concepts used in macroeconomics and microeconomics.
- evaluate models to explore consequences of economic policy proposals for households and businesses.
- evaluate economic models to explore the consequences of macroeconomic events and the probable consequences of macroeconomic policy proposals for the whole economy.
- solve problems requiring the application of economics, statistics, and mathematics.
- apply accounting and economic concepts and principles in making decisions about firm operations.

Economics (ECON) Courses

ECON 302 Principles of Macroeconomics

Units: 3
Hours: 54 hours LEC
Prerequisite: MATH 100 or 132 with a grade of "C" or better, or placement through the assessment process.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340.
Transferable: CSU; UC
General Education: AA/AS Area V(b); CSU Area D2; Cal-GETC Area 4
(C-ID: ECON 202)

This course is an introduction to macroeconomics. It is concerned with the economic well-being of the national economy. Topics include supply, demand, aggregate supply, aggregate demand, equilibrium, money, banking, taxation, inflation, employment, and economic growth.

ECON 304 Principles of Microeconomics

Units: 3
Hours: 54 hours LEC
Prerequisite: MATH 100 or 132 with a grade of "C" or better, or placement through the assessment process.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340.
Transferable: CSU; UC
General Education: AA/AS Area V(b); CSU Area D2; Cal-GETC Area 4
(effective Fall 2025); IGETC Area 4B

Course Code Course Title Units
CISC 310 Introduction to Computer Information Science (3)
CISP 360 Introduction to Structured Programming (4)
CISP 400 Object Oriented Programming with C++ (4)
CISP 440 Discrete Structures for Computer Science (3)
MATH 355 Calculus for Biology and Medicine I (4)
MATH 370 Pre-Calculus Mathematics (5)
or MATH 375 Pre-Calculus (6)
MATH 401 Calculus II (5)
MATH 402 Calculus III (5)
MATH 410 Introduction to Linear Algebra (3)

Total Units: 18 - 21

The Associate in Arts in Economics for Transfer (AA-T) degree may be obtained by completion of 60 transferable, semester units with a minimum overall grade point average (GPA) of 2.0, including (a) a minimum grade of "C" (or "P") for each course in the major or area of emphasis described in the Required Program, and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education-Breadth Requirements.

Course Code Course Title Units
CISC 310 Introduction to Computer Information Science (3)
CISP 360 Introduction to Structured Programming (4)
CISP 400 Object Oriented Programming with C++ (4)
CISP 440 Discrete Structures for Computer Science (3)
MATH 355 Calculus for Biology and Medicine I (4)
MATH 370 Pre-Calculus Mathematics (5)
or MATH 375 Pre-Calculus (6)
MATH 401 Calculus II (5)
MATH 402 Calculus III (5)
MATH 410 Introduction to Linear Algebra (3)

A minimum of 6 units from the following: 6
ACCT 301 Financial Accounting (4)
ACCT 311 Managerial Accounting (4)
BUS 300 Introduction to Business (3)
BUS 310 Business Communications (3)
This course covers the interaction with individuals and business firms in the marketplace to determine prices, output, employment, and efficient utilization of economic resources. Topics include marginal utility, costs of production, and natural resource economics. This course also covers resource allocation under conditions of competition, monopoly, oligopoly, and monopolistic competition.

ECON 305 Introduction to Economies of Africa

Units: 3  
Hours: 54 hours LEC  
Prerequisite: None.  
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340.  
Transferable: CSU; UC  
General Education: AA/AS Area V(b); CSU Area D; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4

This course introduces various topics on Africa's economies, such as indigenous economic systems, why Africa remains poor, pre- and post-colonial development strategies, the cold war factor, development finance, and new theories on development. Additionally, the politics of international development including China's expanding role in Africa are examined.

ECON 310 Statistics for Business and Economics

Units: 3  
Hours: 54 hours LEC  
Prerequisite: MATH 120, 125, 129, or 133 with a grade of "C" or better, or placement through the assessment process.  
Transferable: CSU; UC  
General Education: AA/AS Area II(b); CSU Area B4; Cal-GETC Area 2 (effective Fall 2025); IGETC Area 2

This course focuses on statistical concepts commonly used in economics, business, and other behavioral sciences. It covers the collection, organization, presentation, analysis, and interpretation of numerical data. Major topics include organizing and describing data using graphs, tables, and charts; calculating and interpreting descriptive statistics including measures of central tendency and measures of dispersion; probability and sampling distributions; statistical inference; correlation and linear regression; analysis of variance, chi-square and t-tests. Computer software and/or hand calculations will be used in this course to calculate, organize, and display statistical information. Results generated either by hand calculation, the use of computer software, articles or textbook examples will be used to analyze and interpret statistical findings.

ECON 320 Concepts in Personal Finance

Same As: BUS 320  
Units: 3  
Hours: 54 hours LEC  
Prerequisite: None.  
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340.  
Transferable: CSU; UC  
General Education: AA/AS Area V(b); AA/AS Area III(b); CSU Area D2

This course covers how to analyze financial affairs for lifelong decision making. It examines the basics of financial planning, analysis, and decision making in areas of budgeting, taxes, credit, money management, insurance, investments, and retirement with an emphasis on principles to develop economic decision-making skills. This course is not open to students who have completed BUS 320.

ECON 495 Independent Studies in Economics

Units: 1 - 3  
Hours: 54 - 162 hours LAB  
Prerequisite: None.  
Transferable: CSU

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College (ARC). They must also discuss the study with a professor from the Department of Economics at ARC in this subject and secure approval. Only one independent study for each catalog course will be allowed.

ECON 499 Experimental Offering in Economics

Units: 0.5 - 4  
Prerequisite: None.  
Transferable: CSU

This is the experimental courses description.
List of Degrees and Certificates

American River College offers degree and certificate options. Requirements are identified for each career and general education program. Students must complete the program requirements to earn the desired degree or certificate, regardless of the order of completion.

Accounting

Degree

- AA in Accounting

Certificates of Achievement

- Accounting
- Accounting Clerk
- Financial Services Apprenticeship
- Taxation

Administration of Justice

Degrees

- AS in Administration of Justice
- AS-T in Administration of Justice

Anthropology

Degrees

- AS in Anthropology
- AA-T in Anthropology

Apprenticeship

Degrees

- AA in Acoustical Installer Apprenticeship
- AA in Carpenter Apprenticeship
- AA in Drywall/Lathing Apprenticeship
- AA in Electrical Apprenticeship
- AA in Elevator Apprenticeship
- AA in Ironworkers Apprenticeship
- AA in Mill and Cabinet Maker Apprenticeship
- AS in Millwright Apprenticeship
- AA in Pile Driver Apprenticeship
- AS in Plumbers/Pipefitters Apprenticeship
- AS in Refrigeration Service Technician Apprenticeship
- AA in Scaffold Erector Apprenticeship
- AA in Sheet Metal Apprenticeship
- AA in Office Modular Systems Apprenticeship
- AA in Pre-Apprenticeship
- AA in Refrigeration Service Technician Apprenticeship

Certificates of Achievement

- Acoustical Installer Apprenticeship
- Acoustical Installer Level I
- Acoustical Installer Level II
- Acoustical Installer Level III
- Carpenter Apprenticeship
- Carpenter Apprenticeship Level I
- Carpenter Apprenticeship Level II
- Carpenter Apprenticeship Level III
- Drywall/Lathing Apprenticeship
- Drywall/Lathing Level I
- Drywall/Lathing Level II
- Drywall/Lathing Level III
- Electrical Apprenticeship
- Electrical Apprenticeship Level I
- Electrical Apprenticeship Level II
- Electrical Apprenticeship Level III
- Electrical Apprenticeship Level IV
- Elevator Apprenticeship
- Elevator Apprenticeship Level I
- Elevator Apprenticeship Level II
- Elevator Apprenticeship Level III
- Elevator Apprenticeship Level IV
- Hardwood Floor Layer Apprenticeship
- Insulator Apprenticeship
- Ironworkers Apprenticeship
- Ironworkers Apprenticeship Level I
- Ironworkers Apprenticeship Level II
- Ironworkers Apprenticeship Level III
- Mill and Cabinet Maker Apprenticeship
- Mill and Cabinet Maker Level I
- Mill and Cabinet Maker Level II
- Mill and Cabinet Maker Level III
- Millwright Apprenticeship
- Millwright Level I
- Millwright Level II
- Millwright Level III
- Office Modular Systems Apprenticeship
- Office Modular Systems Level I
- Pile Driver Apprenticeship
- Pile Driver Level I
- Pile Driver Level II
- Pile Driver Level III
- Plumbers/Pipefitters Apprenticeship
- Plumbers/Pipefitters Apprenticeship Level I
- Plumbers/Pipefitters Apprenticeship Level II
- Plumbers/Pipefitters Apprenticeship Level III
- Plumbers/Pipefitters Apprenticeship Level IV
- Pre-Apprenticeship
- Refrigeration Service Technician Apprenticeship
- Refrigeration Service Technician Apprenticeship Level I
- Refrigeration Service Technician Apprenticeship Level II
- Refrigeration Service Technician Apprenticeship Level III
- Refrigeration Service Technician Apprenticeship Level IV
- Residential/Commercial Electrician Trainee
- Scaffold Erector Apprenticeship
- Scaffold Erector Level I
- Scaffold Erector Level II
- Scaffold Erector Level III
- Sheet Metal Apprenticeship
- Sheet Metal Apprenticeship Level I
- Sheet Metal Apprenticeship Level II
- Sheet Metal Apprenticeship Level III
- Sheet Metal Apprenticeship Level IV
- Sheet Metal Service Technician Apprenticeship
- Sheet Metal Service Technician Apprenticeship Level I
- Sheet Metal Service Technician Apprenticeship Level II
- Sheet Metal Service Technician Apprenticeship Level III
- Sheet Metal Service Technician Apprenticeship Level IV
- Shingler

**Certificates**
- Green Technology Pre-Apprenticeship
- Infrastructure Pre-Apprenticeship
- Utilities Worker Pre-Apprenticeship

**Art Degrees**
- AA in Art
- AA-T in Art History
- AA-T in Studio Art

**Certificates of Achievement**
- Freelance Photography
- Gallery Management

**Certificate**
- Sculpture

**Art History Degree**
- AA-T in Art History

**Art New Media Degree**
- AA in Art New Media

**Certificates of Achievement**
- 3D Rigging Technical Director
- 3D Technical Director
- Art New Media: Illustration
- ARTNM: 3D Animation
- ARTNM: 3D Modeling and Texturing
- ARTNM: Character Design
- ARTNM: Commercial Illustration
- ARTNM: Web Design
- Graphic Design: Intern Artist
- Graphic Design: Junior Artist
- Graphic Design: Production Artist

**ASL-English Interpreting Degree**
- AA in ASL-English Interpreter Preparation Program

**Certificate of Achievement**
- ASL-English Interpreter Preparation Program

**Automotive Collision Technology Degree**
- AS in Automotive Collision Technology

**Certificates of Achievement**
- Automotive Claims Estimator
- Automotive Collision Technology

**Certificates**
- Automotive Collision Technology-Non-Structural
- Automotive Collision Technology-Refinish
- Automotive Collision Technology-Structural

**Automotive Technology Degrees**
- AS in Automotive Analysis
- AS in Automotive Component Service Technician
- AS in Automotive Technology

**Certificates of Achievement**
- Air Conditioning Service
Alternative Fuels and Green Vehicle Technology
Automotive Analysis
Automotive Component Service Technician
Automotive Emissions Inspection and Repair Technician
Automotive Technology
Extreme Tuner
Parts and Service
Small Engines
Snap-On™ Certification
Transmission Service
Undercar Service

Certificates
- Automotive Brakes
- Automotive Suspension and Steering

Biology and Biotechnology

Degrees
- AS-T in Biology
- AS in Biotechnology

Certificate of Achievement
- Biotechnology

Business

Degrees
- AS-T in Business Administration 2.0
- AA in Entrepreneurship
- AA in General Business

Certificates of Achievement
- Computer Applications for Small Business
- Cross-Cultural Conflict Resolution
- Entrepreneurship/Small Business Management
- General Business

Certificates
- Soft Skills for the Global Environment

Business Technology

Degrees
- AA in Administrative Professional
- AA in Virtual Administrative Professional

Certificates of Achievement
- Business Information Worker
- Office Technology
- Virtual Office Professional

Certificate
- Office Assistant

Computer Information Science

Degrees
- AS in CIS: Computer Networking Management
- AS in CIS: Computer Programming
- AS in CIS: Database Management
- AS in CIS: Microcomputer Applications
- AA in CIS: PC Support Management
- AA in Computer Science
- AS in Cybersecurity and Information Assurance

Certificates of Achievement
- CIS: Computer Networking Management
- CIS: Computer Programming
- CIS: Database Management
- CIS: Microcomputer Applications
- CIS: PC Support
- Computer Information Security Essentials
- Cybersecurity and Information Assurance
- Internet Marketing
- Network Administration Essentials - Windows
- Web Developer
- Web Publishing (Front-End)

Dance

Degree
- AA in Dance

Deaf Culture and American Sign Language Studies

Degree
- AA in Deaf Culture and American Sign Language Studies
Certificate of Achievement
• Deaf Culture and American Sign Language Studies

Design & Engineering Technology

Degrees
• AA in Design Technology
• AS in Engineering Technology

Certificates of Achievement
• Design Technology
• Engineering Technology

Certificate
• CADD Operator - Entry Level

Diesel/Clean Diesel Technology

Degree
• AS in Diesel Technology

Certificates of Achievement
• Clean Diesel Hybrid Technology
• Clean Diesel Industrial
• Clean Diesel Management Systems
• Clean Diesel Technology
• Diesel Engine Technology
• Diesel Technology
• Light Duty Diesel Truck
• Preventive Maintenance

Early Childhood Education

Degrees
• AA in Early Childhood Education
• AS-T in Early Childhood Education for Transfer

Certificates of Achievement
• Associate Teacher
• Children with Disabilities and Developmental Differences Specialist
• Diversity, Equity, and Inclusion Specialist

Economics

Degree
• AA-T in Economics

Education/Teaching

Degree
• AA-T in Elementary Teacher Education

Electrician Trainee Program

Certificate of Achievement
• Residential/Commercial Electrician Trainee

Electronics Technology

Degrees
• AS in Electronic Systems Technology
• AS in Mechatronics

Certificates of Achievement
• Advanced Electronics and Telecommunications
• Biomedical Equipment Technology
• Digital Home Technology Integration
• Electronic Systems Technology
• Fiber Optics
• Mechatronics
• Robotics
• Telecommunication Specialist

Certificates
• Basic Electronics and Telecommunications
• Basic Mechatronics
• Soldering and Cabling
Emergency Medical Technology

Certificate
- Emergency Medical Technician (EMT)

Energy

Certificates of Achievement
- Solar Energy Systems Design, Estimation, and Sales
- Solar Energy Technology

Certificate
- Basic Solar

Engineering

Degrees
- AS in Civil Engineering
- AS in Electrical Engineering
- AS in Mechanical Engineering

English

Degree
- AA-T in English

Certificate
- Literary Publishing

English as a Second Language

Certificates of Achievement
- Intermediate-High Proficiency in English as a Second Language
- Intermediate-Low Proficiency in English as a Second Language
- Intermediate-Mid Proficiency in English as a Second Language

Fashion

Degrees
- AA in Fashion Design
- AA in Fashion Merchandising

Certificates of Achievement
- Fashion Design
- Fashion Merchandising

Certificates
- Apparel Construction
- Fashion Entrepreneur
- Fashion Illustration
- Fashion Retailing Certificate
- Patternmaking and Draping
- Runway Design

Fire Technology

Degree
- AA in Fire Technology

Certificates of Achievement
- Fire Technology
- Firefighter Recruit Academy

Certificates
- Fire Investigation 1A
- Fire Investigation 1B
- Fire Investigation 2A
- Fire Investigation 2B

Funeral Service Education

Degree

General Education - Transfer

Certificate of Achievement
• Honors Transfer

General Science

Degree
• AS in General Science

Geography and GIS

Degrees
• AS in Geographic Information Systems (GIS)
• AS in Geography
• AA-T in Geography

Certificate of Achievement
• Geographic Information Systems (GIS)

Healthcare Interpreting

Certificate of Achievement
• Healthcare Interpreting

History

Degree
• AA-T in History

Homeland Security

Certificate
• Homeland Security

Horticulture

Degrees
• AS in Horticulture
• AS in Landscape Design Technology

Certificates of Achievement
• Horticulture
• Landscape Design Technology

Certificates
• Floristry
• Horticulture Skills
• Landscape Design
• Plant Production
• Sustainable Landscaping

Gerontology

Degrees
• AA in Gerontology
• AA in Gerontology: Administrative
• AA in Gerontology: Advocacy and Social Policy
• AA in Gerontology: Case Management and Social Services
• AA in Gerontology: Geriatric Health Care
• AA in Gerontology: Recreation

Certificates of Achievement
• Gerontology: Administrative
• Gerontology: Advocacy and Social Policy
• Gerontology: Case Management and Social Services
• Gerontology: Geriatric Health Care
• Gerontology: Recreation

Hospitality Management

Degree
• AA in Hospitality Management: Culinary Arts/Restaurant Management

Certificates of Achievement
• Baking and Pastry
• Culinary Arts/ Restaurant Management
• Hospitality Management: Restaurant Management

Human Services

 Degrees
 • AA in Chemical Dependency Studies
 • AA in Human Services

 Certificates of Achievement
 • Chemical Dependency Studies
 • Human Services

 Interdisciplinary Studies

 Degrees
 • AA in English Communication and Literature
 • AA in History of the Creative Arts
 • AA in Language Studies
 • AA in The Individual and Society

 Certificates of Achievement
 • CSU General Education Certificate of Achievement
 • Intersegmental General Education Transfer (IGETC) Certificate of Achievement

 Interior Design

 Degree
 • AA in Interior Planning and Design

 Certificates of Achievement
 • Para Professional Interior Planning and Design

 Certificates
 • Designed 4 Life
 • Event Design Coordinator
 • Green Building and Sustainable Design for Interiors
 • Interior Retail Merchandising
 • Sacramento Design History
 • Universal Design

 International Studies

 Degrees
 • AA-T in Global Studies
 • AA in International Studies

 Journalism

 Degrees
 • AA in Journalism and Mass Communication
 • AA-T in Journalism and Mass Communications

 Kinesiology and Athletics

 Degrees
 • AA-T in Kinesiology
 • AS in Physical Education
 • AS in Sports Medicine

 Certificates of Achievement
 • Fitness Specialist
 • Senior Fitness Specialist

 Legal Studies

 Degree
 • AA in Paralegal Studies

 Certificates of Achievement
 • Law Office Clerical Assistant
 • Paralegal Studies

 Management

 Degrees
 • AA in Management

 Certificates of Achievement
 • Conflict Management
 • Leadership
 • Management
 • Project Management
Marketing

 Degrees
 • AA in Advertising and Sales Promotion
 • AA in Marketing
 • AA in Retail Management

 Certificates of Achievement
 • Marketing Essentials
 • Retail Management (WAFC)

 Mathematics & Statistics

 Degrees
 • AS in Mathematics
 • AS-T in Mathematics

 Music

 Degrees
 • AA in Commercial Music: Business
 • AA in Commercial Music: Recording
 • AA in Jazz Studies
 • AA-T in Music
 • AA in Music

 Certificates of Achievement
 • Commercial Music: Business
 • Commercial Music: Recording
 • Digital Audio Production
 • Music Management and Promotion

 Certificates
 • Music Instructional Assistant
 • Studio Jazz/Pop Voice Instructor
 • Studio Music Instructor
 • Studio Voice Instructor

 Natural Resources

 Degree
 • AS in Environmental Conservation

 Certificate of Achievement

 Nursing and Allied Health

 Degrees
 • AS in LVN to RN Career Mobility
 • AS in Pre-Health Occupations
 • AS in Registered Nursing

 Certificate of Achievement
 • Licensed Vocational Nurse (LVN) 30-unit option

 Certificates
 • Certified Nurse Assistant
 • Home Health Aide

 Nutrition and Foods

 Degree
 • AS-T in Nutrition and Dietetics

 Certificate of Achievement
 • Dietary Manager/Dietary Service Supervisor

 Paramedic

 Degree
 • AS in Paramedic

 Certificate of Achievement
 • Paramedic

 Economics

 Certificates of Achievement
 • Environmental Conservation
 • Environmental Conservation Technician (Fisheries)
 • Environmental Conservation Technician (Sustainability)
 • Environmental Conservation Technician (Vegetation)
 • Environmental Conservation Technician (Wildlife)

 Certificates
 • Environmental Conservation Technician (Conservation/Restoration)
 • Environmental Conservation Technician (Forest/Rangeland)
 • Environmental Conservation Technician (Water Resources)
Philosophy

Degree
• AA-T in Philosophy

Physics

Degrees
• AS in Physical Science/Mathematics
• AS-T in Physics

Political Science

Degrees
• AA in Political Science
• AA-T in Political Science

Psychology

Degrees
• AA in Psychology
• AA-T in Psychology

Real Estate

Degree
• AA in Real Estate

Certificate of Achievement
• Real Estate

Certificate
• Real Estate Sales

Recreation

Degree
• AA in Recreation

Respiratory Care

Degree
• AS in Respiratory Care

Social Justice Studies

Degrees
• AA-T in Social Justice Studies: Race and Ethnicity
• AA-T in Social Justice Studies: Women, Gender, and LGBTQ Studies

Social Science

Degree
• AA in Social Science

Sociology

Degree
• AA-T in Sociology

Speech Communication

Degree
• AA-T in Communication Studies

Speech-Language Pathology

Degree
• AS in Speech-Language Pathology Assistant Program

Certificates of Achievement
• SLPA Core Curriculum
• SLPA Specialization: Adult Neurogenic
• SLPA Specialization: Early Intervention
• SLPA Specialization: School Age

Technical Communication

Certificate of Achievement
• Technical Communications
Theatre Arts

Degrees

• AA-T in Theatre Arts
• AA in Theatre Arts: Acting
• AA in Theatre Arts: Technical Production

Certificates of Achievement

• Acting
• Children's Theatre
• Costuming

Certificates

• Musical Theatre
• Theatre Production

Welding Technology

Degree

• AS in Welding Technology

Certificates of Achievement

• Shielded Metal Arc Plate and Pipe
• Welding Metallurgy and Inspection (270 hours)
• Welding Technology

Certificates

• Gas Metal Arc and Flux Core Arc Welding Plate (252 hours)
• Gas Tungsten Arc Plate and Pipe Welding (180 hours)
• Pipe Welding
• Welding Equipment Maintenance and Blueprint Interpretation (234 hours)

World Languages

Degree

• AA-T in Spanish
Education/Teaching

If you have ever thought that you might want to be a teacher, then we have great news for you. Thanks to a program of courses offered by the Los Rios College – American River, Cosumnes River, Folsom Lake, and Sacramento City – you now can get your two year AA or AA-T degree and transfer to a CSU or UC to complete your BA degree. You then will be ready to enter the teaching credential program.

The first two years at a Los Rios Community College offer all the courses you need, including the two field experience courses – ENGED 320 and ECE 350 – to be eligible for transfer to the CSU system.

The unique opportunity of the two field experience courses places prospective teachers in schools working alongside credentialed teachers. In this way, you quickly discover if teaching is the profession for you.

Degrees Offered

A.A.-T. in Elementary Teacher Education

Dean Douglas Herndon
Phone (916) 484-8101

Associate Degree for Transfer

A.A.-T. in Elementary Teacher Education

The Associate in Elementary Teacher Education for Transfer provides a clearly articulated curricular track for students who wish to transfer to a CSU campus, while also serving the diverse needs of students interested in the breadth and depth of the field of Elementary Teacher Education. Additionally, this degree exposes students to the core principles and practices of the field in order to build a foundation for their future personal, academic, or vocational paths.

The Associate in Arts degree in Elementary Teacher Education for Transfer provides students with a major that fulfills the general requirements of the California State University for transfer. Students with this degree will receive priority admission with junior status to the California State University system. The Associate in Arts degree in Elementary Teacher Education for Transfer (AA-T) may be obtained by completion of 60 transferable, semester units with a minimum 2.0 GPA, including (a) the major or area of emphasis described in the Required Program outlined below (earning a C or better in these courses) and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education-Breadth Requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- apply the scientific method using inquiry, data collection, quantitative reasoning, and basic mathematical concepts to analyze results
- assess teaching practices and learning conditions through application of child development theories
- evaluate attitudes, actions, and behaviors indicative of a professional educator
- apply analytical reading and writing, research, and critical thinking essential for completing assigned tasks
- explain relationships and interactions between humans and the earth
- apply knowledge of world history and cultures to identify the values of a culture and work with others of diverse cultures
- analyze statistical data
- present information effectively to an intended audience
- compare and contrast various forms and styles of music, artworks, and theatrical performances

Career Information

Public or private instructional assistant or classroom aide, grades K-8; private tutor; publishing and textbook salesperson; curriculum and test developer; teacher, grades K-12 with additional education
Description of Courses
Electrician Trainee Program

This program provides instruction in the installation, operation, and maintenance of residential and commercial electrical distribution systems. Topics include safety training, AC/DC electrical theory, metering, electronics, use of electrical codes, raceways, conductors, grounding, motors, transformers, fire alarm systems, fiber optics, and Heating, Ventilation, and Air Conditioning (HVAC) systems. It complies with state regulations to become an electrician trainee – see the California Department of Industrial Relations’ electrician trainee guide (https://www.dir.ca.gov/dlse/ecu/Guide_for_Electricians_and_Trainees_2-07.pdf). Upon completion of the program, students may find employment in the following industry sectors: government, residential and commercial construction and maintenance, utilities, and facilities management.

Certificates Offered
Residential/Commercial Electrician Trainee Certificate

Total Units: 28.5

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- apply residential and commercial safety procedures on job-sites.
- analyze, interpret, and apply national, state, and local electrical codes.
- apply electrical mathematics in calculating AC/DC series, parallel, and combination circuits.
- identify different wiring methods for conductors, cables, and conduits.
- analyze functions of blueprints, specifications, schedules, addenda, and revisions in construction.
- describe the function, operation, and characteristics of a system and individual components of the system such as burglar alarms, fire alarms, information transport, HVAC, etc.

Career Information

Upon completion of the Residential/Commercial Electrician Trainee program, students may find employment in the following industry sectors: government, residential and commercial construction and maintenance, utilities, and facilities management.

Electrician Trainee (ELTRN) Courses

ELTRN 110 Electrician Trainee I
Units: 4
Hours: 63 hours LEC; 27 hours LAB
Prerequisite: None.
Advisory: MATH 100 or 132 with a grade of "C" or better

This course is an introduction to the Commercial/Residential Electrician Trainee Program. It includes safety procedures, Occupational Safety and Health Administration (OSHA) requirements, Environmental Protection Agency (EPA) requirements, basic rigging, basic electrical mathematics, Ohm’s Law, Direct Current (DC) theory, and construction related CPR and First Aid. This course meets the State of California requirement to obtain an electrician trainee license. This course was previously known as ELECT 210.

ELTRN 111 Electrician Trainee II
Units: 4
Hours: 63 hours LEC; 27 hours LAB
Prerequisite: ELTRN 110 with a grade of "C" or better

This course covers Alternating Current (AC) theory, including AC and Direct Current (DC) generation, phase, and circuit mathematical calculations. It also covers the use of meters in different applications of alternating current, and provides a basic introduction to electronics and applications of the National Electrical Code (NEC) to jobsite electrical installations. This course meets the State of California requirement to obtain an electrician trainee license. This course was formerly known as ELECT 211.

ELTRN 120 Electrician Trainee III
Units: 4
Hours: 63 hours LEC; 27 hours LAB
Prerequisite: ELTRN 111 with a grade of "C" or better

This is the third course of the Commercial/Residential Electrician Trainee Program. Topics include conductors, cables, conduits, lighting systems, panelboard, switchboard, and overcurrent devices for residential and commercial installations. This course also covers reading blueprint drawings, making sketches, drawing architectural views, and identifying common blueprint scales and electrical symbols. This course as formerly ELECT 220.

ELTRN 121 Electrician Trainee IV
Units: 4
Hours: 63 hours LEC; 27 hours LAB
Prerequisite: ELTRN 111 with a grade of "C" or better

This is the fourth course required for the Commercial/Residential Electrician Trainee Program. Topics include electrical grounding systems and lightning protection systems. It also includes jobsite personnel development and jobsite management. This course was formerly known as ELECT 221.
ELTRN 130 Electrician Trainee V

**Units:** 4  
**Hours:** 63 hours LEC; 27 hours LAB  
**Prerequisite:** ELTRN 111 with a grade of "C" or better

This is the fifth course required for the Commercial/Residential Electrician Trainee Program. Topics include fundamentals of motors, motor controllers, process controllers, generators, and transformers. Topics also include testing of cables, generators, and motors. This course meets the State of California requirement to obtain an electrician trainee license. This course was formerly known as ELECT 230.

ELTRN 131 Electrician Trainee VI

**Units:** 4  
**Hours:** 63 hours LEC; 27 hours LAB  
**Prerequisite:** ELTRN 111 with a grade of "C" or better

This is the sixth course required for the Commercial/Residential Electrician Trainee Program. Topics include fire alarm systems, burglar alarm systems, and information transport systems (ITS). This course also covers basic electrical requirements for heating, air conditioning, and refrigeration systems. It meets the State of California requirement to obtain an electrician trainee license. This course was formerly known as ELECT 231.

ELTRN 180 Electrical Workers State Certification Preparation

**Units:** 4.5  
**Hours:** 81 hours LEC  
**Prerequisite:** None.  
**Advisory:** ELTRN 111 with a grade of "C" or better

This is a preparatory course for the Electricians' State Licensing Certification for California. It reviews basic electrical formulas and provides an in-depth review of the National Electrical Code (NEC) and safety. This course was formerly known as ELECT 280.

ELTRN 295 Independent Study for the Electrician Trainee Program

**Units:** 1 - 3  
**Hours:** 54 - 162 hours LAB  
**Prerequisite:** None.

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog allowing students to gain college credit while learning in-the-field.

ELTRN 298 Work Experience for Electrician Trainee

**Units:** 0.5 - 4  
**Hours:** 37.5 - 300 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Enrolled in the American River College Electrician Trainee Program.  
**General Education:** AA/AS Area III(b)

This course provides students the opportunity to work in the American River College Electrician Trainee Program to develop specific skills to meet the goals and objectives of the Division of Industrial Relations General Electrician Trainee Program. Students complete work experience hours at approved training sites. Students may take up to 16 units total across all Work Experience course offerings. This course may be repeated when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

**Course Numbering**

**Course Numbering System**

American River College has a standardized course numbering system. The following numbers are designed to provide students with general information regarding the focus and intent of courses.

**Course Number 1 to 99**

Courses numbered 1 to 99 are credit courses that are considered developmental or basic skills and are not acceptable for the associate degree or transfer credit.

**Course Number 100 to 299**

Courses numbered 100 to 299 are applicable to an associate degree, but not transferable to a four-year institution.

**Course Number 300 to 499**

Courses numbered 300 to 499 are articulated for transfer with four-year institutions and are intended to meet major, general education, or elective credit requirements.
Electronics Technology

Electronic equipment is present everywhere in our lives. From computerized traffic signals to personal computers and cellular telephones, modern electronic systems make our everyday lives easier, safer, and more efficient. Electronic technicians design, develop, build, install, repair and maintain many different types of sophisticated electronic devices.

The American River College Electronics program combines broad based Electronic and Telecommunications training with the newest specialty areas (such as Robotics, Fiber Optics, Programmable Interface Controllers and Stamp Microcontrollers). By working closely with our industry partners, we ensure our curriculum is relevant and meets industry current and future needs. This relevant and up-to-date education prepares graduates for excellent career opportunities in the Electronics, Robotics or Telecommunications fields.

American River College is an official NARTE (National Association of Radio and Television Engineers) Federal Communication Commission (FCC) test site and offers an FCC license preparation course.

Degrees and Certificates Offered

A.S. in Electronic Systems Technology
A.S. in Mechatronics
Advanced Electronics and Telecommunications Certificate
Biomedical Equipment Technology Certificate
Digital Home Technology Integration Certificate
Electronic Systems Technology Certificate
Fiber Optics Certificate
Mechatronics Certificate
Robotics Certificate
Telecommunication Specialist Certificate
Basic Electronics and Telecommunications Certificate
Basic Mechatronics Certificate
Soldering and Cabling Certificate

Dean Gary Aguilar
Department Chair Gary George

Total Units: 36

The Electronic Systems Technology Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- design and build several of the most common circuits used in electronics technology.
- calculate the mathematical relationships among voltage, current, resistance, capacitance, inductance, reactance, frequency, and phase angle as they relate to electronic circuits.
- analyze aviation, marine, and commercial communications systems that are covered in the FCC General Class Radiotelephone license examination.
- analyze operating and defective electronic circuits by interpreting data from a variety of test and measurement equipment.
- differentiate and diagram schematic symbols used in electronic and industrial applications.
- use common hand tools in the mechanical installation of copper and fiber optic cabling used in sophisticated communication systems.
- research and interpret basic electronic components using manufacturers' data manuals, library resources, and the Internet.
- evaluate electrical parameters using various types of test and measurement equipment used in the analysis of power supply, amplifier, and general electronic circuits.

Career Information

This degree provides students with the knowledge to successfully enter a variety of electronics and telecommunication careers. Working closely with our industry partners and contacts ensures our curriculum is relevant and meets the current and future needs of the Electronics and Telecommunications Industry. American River College is an official test site of the National Association of Radio and Television Engineers (NARTE) for the Federal Communication Commission (FCC) General Radio Telephone License. Obtaining the Associate of Science degree and the certificate improves the opportunities for quality employment and career advancement.

A.S. in Mechatronics

This degree provides training in a multi-disciplinary field focusing on industrial automation. Topics include electricity, electronics, industrial motor controls, programmable logic controllers, robotics, AC/DC drives, mechanical design, and manufacturing technologies.

**Total Units:** 25

The Mechatronics Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

**Student Learning Outcomes**

Upon completion of this program, the student will be able to:

- integrate the principles of mechanical, electronic, and electrical technologies into the design of mechatronic systems.
- evaluate mechanical and electrical solutions to technological problems.
- apply industry-appropriate design techniques to develop technical design documents from a conceptual design.
- design robotic and machine automation systems using mechatronic principles.
- evaluate welding projects in accordance with welding procedures and specifications.
- contrast DC, AC, brushless, servo, and stepper motor operation.
- create technical documentation/presentations of models from view formats.
- design programmable logic controller (PLC) programs demonstrating input/output capabilities.
- design programs for an operator interface terminal (OIT) demonstrating input/output capabilities.

**Career Information**

This degree prepares students for the following technical and supervisory career opportunities: industrial mechanical/electrical systems technician, food processing machine service technician, facilities systems technician, waste water systems technician, manufacturing coordinator, field service technician, and mechanical electrical machine systems installer.

**Certificates of Achievement**

**Advanced Electronics and Telecommunications Certificate**

This certificate provides training in electronic system component identification and characteristics, semiconductor theory and application, power supply design and operation, telecommunication copper and fiber optic systems, the mathematics for circuit analysis, and advanced troubleshooting. It is designed to be completed in two semesters.

**Certificate Requirements**

**Student Learning Outcomes**

Upon completion of this program, the student will be able to:

- analyze circuit operating characteristics by applying Ohm's, Watt's, and Kirchhoff's laws.
- research and interpret basic electronic components using manufacturers' data manuals, library resources, and the Internet.
- analyze and apply mathematics, including logarithms and decibels to determine, analyze, and control outputs when problem solving transistor and field effect transistor (FET) circuits.
- evaluate electrical parameters using various types of test and measurement equipment used in the analysis of power supply and amplifier circuits.
- apply mathematics and semiconductor theory to identify, evaluate, and troubleshoot electronic circuits.
- calculate the mathematical relationships among voltage, current, resistance, capacitance, inductance, reactance, frequency, and phase angle as they relate to electronic circuits.
- construct and test circuits on prototyping boards and printed circuit boards.
- design and simulate circuits in software.

**Career Information**

This certificate program enables students to find employment in the electronics industry or to progress up the career ladder. Skills development in the critical areas along with electronics and telecommunications theory and laboratory practice make this an ideal certificate for those wishing to upgrade and update their electronics skills.

**Biomedical Equipment Technology Certificate**

This certificate covers the theory, operation, maintenance, troubleshooting, and certification of biomedical equipment used in hospitals, medical device manufacturers, or other service organizations. It includes an in-depth study of frequently used medical equipment.

**Certificate Requirements**

A minimum of 1 unit from the following:

- ET 260 Introduction to Medical Ultrasound Equipment (0.5)
- ET 261 Introduction to Biomedical Equipment Networking (0.5)
- ET 262 Introduction to Respiratory Therapy Ventilators (0.5)
- ET 263 Introduction to Medical X-ray Imaging Equipment (1)
Student Learning Outcomes

Upon completion of this program, the student will be able to:

• evaluate the data from basic preventive maintenance tests on the following equipment: multi-parameter physiological monitor, electrocardiogram (ECG) machine, blood pressure monitor, defibrillator, pulse oximeter, infusion pump, and electrosurgical unit.
• distinguish and list various medical imaging technologies.
• set up standard electrical measurement tools and differentiate the uses for calibration and troubleshooting of medical equipment.
• set up the following equipment: multi-parameter physiological monitor, ECG machine, blood pressure monitor, defibrillator, pulse oximeter, infusion pump, and electrosurgical unit.
• categorize biopotentials and electrodes as they relate to basic human anatomy and physiology systems.
• associate the applicable regulation with the regulating organizations.
• list and compare the different types of bioelectric amplifiers, signal processing circuits, and isolation circuits.
• compare and contrast the protocols for working in the operating room and special care units in the hospital.

Career Information

This program prepares electronics technology students for a biomedical technician internship or trainee position.

Digital Home Technology Integration Certificate

This certificate provides training to configure, integrate, maintain, and troubleshoot electronic and digital home integration systems. Coursework provides the essential skills for residential networking concepts, components, and information on home network installation. This includes techniques to install, trim, terminate, and troubleshoot cabling systems. In addition, it provides the training and skills necessary to integrate audio, security, and environmental controls in a complete system.

Total Units: 36

Student Learning Outcomes

Upon completion of this program, the student will be able to:

• design and build several of the most common circuits used in electronics technology.
• calculate the mathematical relationships among voltage, current, resistance, capacitance, inductance, reactance, frequency, and phase angle as they relate to electronic circuits.
• analyze aviation, marine, and commercial communication systems that are covered in the FCC General Class Radiotelephone license examination.
• analyze working and defective electronic circuits by interpreting data from a variety of test and measurement equipment.
• differentiate and diagram schematic symbols used in electronic and electrical industrial applications.
• use common hand tools in the mechanical installation of copper and fiber optic cabling used in sophisticated communication systems.
• research and interpret basic electronic components using manufacturers' data manuals, library resources, and the Internet.
• evaluate electrical parameters using various types of test and measurement equipment used in the analysis of power supply, amplifier, and general electronic circuits.

Career Information

This certificate provides students with the knowledge to successfully enter a variety of electronics and telecommunication careers. Working closely with our industry partners and contacts ensures our curriculum is
relevant and meets the current and future needs of the Electronics and Telecommunications Industry. American River College is an official test site of the National Association of Radio and Telecommunication Engineers (NARTE) for the Federal Communication Commission (FCC) General Radio Telephone License.

**Fiber Optics Certificate**

This certificate is an introduction to fiber optics technology. Topics include fusion and mechanical splicing, fiber connectivity, optical time domain reflectometer (OTDR), and other specialized test equipment operations. System design, installation, troubleshooting, and repair are emphasized. Courses in communication theory and copper cabling are included in the certificate, producing a technician with a wide variety of skills.

**Student Learning Outcomes**

Upon completion of this program, the student will be able to:

- define the terminology used with single mode fiber optic cable.
- apply correct safety procedures when working with high power fiber optic modules and test equipment.
- calculate the attenuation in a complete fiber optic communication system.
- inspect and identify fiber optic system problems.
- evaluate communication system components for a given application.
- compare fiber optic component specifications using manufacturers' data manuals, reference books, and the Internet.
- perform inspection and quality control of fusion and mechanical fiber optic splices.

**Career Information**

This certificate provides an overview of the application, programming, and design of robotic systems and components. It covers the theory and application of electronics, sensors, controllers, and robots. Various robotic platforms are used to give a wide understanding of all types of current and future systems.

**Robotics Certificate**

The certificate provides an overview of the application, programming, and design of robotic systems and components. It covers the theory and application of electronics, sensors, controllers, and robots. Various robotic platforms are used to give a wide understanding of all types of current and future systems.

**Student Learning Outcomes**

Upon completion of this program, the student will be able to:

- identify and describe the terminology used when working with microcontrollers.
- program a microcontroller.
- compare brushed DC, brushless DC, stepper, and RC servo motor characteristics.
- construct and program mobile and pick-and-place robots.
- calculate speed and acceleration of robotic motion.
Upon completion of this program, the student will be able to:

- describe the principles of sensors used to measure pressure and temperature.
- create simple electronic schematics using basic schematic symbols.
- analyze and troubleshoot basic electronic circuits.
- diagnose simple circuit failures with standard electronic measurement devices.
- design a PLC Logic circuit demonstrating input/output capabilities and timer and counter operation.
- identify and diagram schematic symbols used in industrial electronic and electrical applications.
- analyze aviation, marine and commercial communication systems that are covered in the FCC General Class Radiotelephone license examination.
- apply FCC rules and regulations governing commercial, aviation, and marine communication systems to practical communication systems.

Career Information
This certificate may lead to careers in the following: robotics technician, manufacturing technician, automated warehouse technician, and facilities technician.

Telecommunication Specialist Certificate
This certificate provides both theory and hands-on application using fiber optics, coaxial cable, and CAT 6 data cable. All aspects of communication systems are covered including antennas, transmitters and receivers, transmission lines, and signal propagation. System design and troubleshooting are also included.

Student Learning Outcomes
Upon completion of this program, the student will be able to:

- evaluate potential problems associated with electrostatic discharge (ESD).
- analyze and troubleshoot basic electronic circuits.
- compare and contrast series and parallel resistive, capacitive, and inductive devices.
- analyze the differences between surface-mount techniques and through-hole techniques.
- analyze and describe the components of a complete telecommunication system.
- design an office building telecommunication system using fiber optics and copper cable.
- examine and evaluate the decibel losses and gains in a complete fiber optic communication system.
- assess safety hazards when working with fiber optic systems and associated test equipment.
- perform repairs and adjustments to electronic communication systems according to factory specifications.
- install epoxy, hotmelt, anaerobic, and mechanical connectors on multimode fiber optic cable.
- prepare cost estimates for fiber optic and copper network installation using computer software.
Career Information

This certificate is designed for anyone wanting to enter the electronics or telecommunications industry. It satisfies the requirements of a variety of entry-level positions such as printed circuit board (PCB) assembler, telecommunication field technician, or rework technician.

Basic Mechatronics Certificate

This certificate provides introductory training in the multidisciplinary field of mechatronics, which combines mechanical and electronic technologies. Topics include introductory courses in electronics, programmable logic controllers, basic CAD design, and welding.

Certificate Requirements

<table>

Student Learning Outcomes

Upon completion of this program, the student will be able to:

• identify and describe the use of tools and test equipment necessary for fiber optic and copper cable installations.
• create and evaluate welding projects in accordance with welding procedures and specifications.
• design basic robotic and machine automation systems using mechatronic principles.
• create simple electronic schematics using basic schematic symbols.
• analyze and troubleshoot basic electronic circuits.
• differentiate, setup, and operate a wide variety of soldering and desoldering equipment, workstations, and fixtures that may require visual observation.
• demonstrate the skill of soldering and desoldering under varying conditions.
• assemble and construct connectors and plugs used in telecommunication systems.
• inspect and evaluate solder connections in accordance to industry standards.

Career Information

This certificate may lead to careers in the following: soldering, PC board repair, cable assembler, cable designer, printed circuit board inspector, cable assembly inspector, electronics industry inspector or management.

Electronics Technology (ET) Courses

ET 101 Introduction to Amateur Radio

Units: 0.5
Hours: 9 hours LEC
Prerequisite: None.

This course introduces the fundamentals of amateur radio for public and emergency communication. It covers the equipment, procedures, and uses for amateur (Ham) radio.

ET 103 Ham Radio Technician License Preparation

Units: 2
Hours: 36 hours LEC
Prerequisite: None.

This course covers the fundamentals of amateur radio required to pass the national Association for Amateur Radio Relay League (ARRL) amateur radio operators technician license. Topics include wave theory, operator rules, proper radio operation, electronics review, and regulations.

ET 115 Fiber Optics and Telecommunication Cabling

Units: 4
Hours: 54 hours LEC; 54 hours LAB
Prerequisite: None.

This course introduces the concepts of telecommunication cable installation and connection practices and standards. It includes the study of commonly used fiber optic and copper cable types and connectors, installation tools, and test equipment. It emphasizes installation techniques in practical situations. Laboratory activities provide practical hands-on experience in the operation and use of tools and test equipment specific to the telecommunication industry. Field trips may be required.
ET 193 Introduction to Robotics and Sensors

Units: 4  
Hours: 54 hours LEC; 54 hours LAB  
Prerequisite: None.

This course is an introduction to robotics, controllers, and sensors. Topics include the operation and design of robots and sensors, hardware component selection, assembly, and software programming of various types of sensors and robotic assemblies. Field trips may be required.

ET 197 Introduction to Mechatronics

Units: 4  
Hours: 54 hours LEC; 54 hours LAB  
Prerequisite: ET 302 with a grade of “C” or better

This course introduces mechatronics, the combination of electronic and mechanical components and systems used in the control and transmission of mechanical power. Topics include the analysis of electric controls, programmable logic controllers (PLCs), electromagnetic devices, sensors, pneumatic devices, and electric motors. Field trips may be required.

ET 250 Employability Skills for Technical Careers

Same As: AT 107 and WELD 150  
Units: 2  
Hours: 36 hours LEC  
Prerequisite: None.  
Advisory: ENGRD 310, ENGRD 312, ENGWR 300, or ESLW 340  
General Education: AA/AS Area III(b)

This course provides the opportunity to explore technical careers while developing valuable work and life skills. It is an introduction to a variety of technically-related occupations, emphasizing technical careers in the Sacramento area. Activities are designed to enhance personal development, employability skills, and self esteem through leadership, citizenship, and character development. This course is not open to students who have completed AT 107 or WELD 150.

ET 253 Industrial Communication Systems Support

Units: 4  
Hours: 54 hours LEC; 54 hours LAB  
Prerequisite: ET 302 with a grade of “C” or better

This course covers the operation, repair, and assembly of personal computers (PC), portable test units (PTU), and communication systems. Safety, terminology, component identification, file management, industry specific hardware and software, and upgrades in industry are among the topics covered. Wired, wireless, voice over Internet protocol (VoIP), analog/digital communications, and synchronous optical networks (SONET) are also covered. Field trips may be required.

ET 260 Introduction to Medical Ultrasound Equipment

Units: 0.5  
Hours: 9 hours LEC  
Prerequisite: None.  
Corequisite: ET 425

This course provides in-depth training for maintaining ultrasound equipment used in the biomedical field. It covers imaging modes, physical principles, transducers, system block diagrams, common peripherals, Doppler effect, image quality, test equipment, and troubleshooting.

ET 261 Introduction to Biomedical Equipment Networking

Units: 0.5  
Hours: 9 hours LEC  
Prerequisite: None.  
Advisory: ET 253 and 302;  
This course provides an overview of the Digital Information Communication of Medicine (DICOM) system. DICOM is a patient data system for medical devices to communicate with the hospital database. Topics include interface standards, test equipment, troubleshooting, and applications.

ET 262 Introduction to Respiratory Therapy Ventilators

Units: 0.5  
Hours: 9 hours LEC  
Prerequisite: None.  
Corequisite: ET 425  
This course provides in-depth training for the maintenance of respiratory ventilation machines used in the biomedical field. It covers respiratory ventilator basics, ventilator block diagrams, patient circuits, test equipment, and troubleshooting.

ET 263 Introduction to Medical X-ray Imaging Equipment

Units: 1  
Hours: 18 hours LEC  
Prerequisite: ET 425 with a grade of “C” or better  
This course provides an introduction to the maintenance of medical X-ray imaging equipment. It covers X-ray generators, components of vacuum tube and solid state imaging chains, cameras, digitizing methods, processing, display methods, and radiation safety.

ET 294 Topics in Electronics Technology

Units: 0.5 - 5  
Hours: 9 - 90 hours LEC; 27 - 270 hours LAB  
Prerequisite: None.  
This is an individualized course developed in cooperation with industry to meet specialized training needs. It may be taken four times with no duplication of topics.

ET 295 Independent Studies in Electronics Technology

Units: 1 - 3  
Hours: 54 - 162 hours LAB  
Prerequisite: None.  
Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

ET 298 Work Experience in Electronics Technology

Units: 0.5 - 4  
Hours: 30 - 300 hours LAB  
Prerequisite: None.  
Enrollment Limitation: Students must be in a paid or unpaid internship, volunteer position, or job related to the electronics industry.
with a cooperating site supervisor. Students are advised to consult with
the Electronics Technology Department faculty to review specific
certificate and degree work experience requirements.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR
ESLW 340.
General Education: AA/AS Area III(b)
This course provides students with opportunities to develop marketable
skills in preparation for employment or advancement within the
electronics industry. It is designed for students interested in work
experience and/or internships in associate degree level or certificate
occupational programs. Course content includes understanding the
application of education to the workforce, completion of Title 5 required
forms which document the student's progress and hours spent at the
work site, and developing workplace skills and competencies.
During the semester, the student is required to complete 37.5 hours of
related paid work experience, or 30 hours of related unpaid work
experience for 0.5 unit. An additional 37.5 or 30 hours of related work
experience is required for each additional 0.5 unit. All students are
required to attend the first class meeting, a mid-semester meeting, and
a final meeting. Additionally, students who have not already successfully
completed a Work Experience course will be required to attend weekly
orientations. While attending participants may meet individually with the
instructor as needed. Students may take up to 16 units total across all
Work Experience course offerings. This course may be taken up to four
times when there are new or expanded learning objectives. Only one
Work Experience course may be taken per semester.

**ET 299 Experimental Offering in Electronics Technology**

Units: 0.5 - 4
Prerequisite: None.
This is the experimental courses description.

**ET 302 Principles of Electricity and Electronics**

Units: 4
Hours: 54 hours LEC; 54 hours LAB
Prerequisite: None.
Transferable: CSU
This introductory course explores the field of electronics and electricity.
Topics include the theory of AC, DC, Ohm's law, inductance, and
capacitance. Theory is reinforced through the use of electronic
simulation software and hands-on lab experiments using industry
instruments.

**ET 308 Technical Soldering Practices and Techniques**

Units: 2
Hours: 18 hours LEC; 54 hours LAB
Prerequisite: None.
Transferable: CSU
This course provides training in the standards, processes, and
techniques related to the field of lead and lead-free soldering. It
emphasizes the differences between lead and lead-free soldering
processes. Topics include safety, Electrostatic Discharge (ESD), Printed
Circuit Board (PCB) components and assembly, electronic components
and identification, lead and lead-free soldering and desoldering
techniques in Plated Through Hole (PTH), Surface Mount Device/ Technology (SMD/SMT), and fine to ultra-fine-pitch soldering. Field trips
may be required.

**ET 309 Soldering and Cabling Quality Standards**

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: ET 115 and 308

Transferable: CSU
This course covers Interconnecting and Packaging Council (IPC)
standards for the inspection and evaluation of printed circuit boards and
cable assemblies used in the electronics industry. It prepares students to
take the tests for IPC Electronic Circuits Specialist and Certified IPC
Application Specialist certifications. Field trips may be required.

**ET 312 Mathematics for Circuit Analysis**

Units: 3
Hours: 54 hours LEC; 54 hours LAB
Prerequisite: None.
Transferable: CSU
This course covers the foundations for the analysis of electrical and
electronic circuits. It includes the analysis of direct current (DC),
alternating current (AC), transformer, capacitor, inductor, and energy
conversion circuits.

**ET 322 Semiconductors and Nanotechnology**

Units: 4
Hours: 54 hours LEC; 54 hours LAB
Prerequisite: ET 302 with a grade of “C” or better
Corequisite: ET 312
Transferable: CSU
This course is a detailed study of semiconductor devices and their
applications. Semiconductor components - such as diodes, transistors,
op-amps, including their use in complex circuits - are covered.
Nanotechnology theory and devices, including their present and possible
future applications, are studied. Field trips may be required.

**ET 335 Integrated Circuits with Computer Applications**

Units: 4
Hours: 54 hours LEC; 54 hours LAB
Prerequisite: ET 302 with a grade of “C” or better
Transferable: CSU
This course covers integrated circuits (ICs) and applications used in
industrial and consumer products. Topics include digital theory and
applications from standard transistor-transistor-logic (TTL) logic circuits
to complex circuits built on programmable logic devices (PLDs). Field
trips may be required.

**ET 369 The Design and Fabrication of Electronics Projects**

Units: 2
Hours: 18 hours LEC; 54 hours LAB
Prerequisite: ET 322, 335, or 380 with a grade of “C” or better
Transferable: CSU
This course provides an opportunity to design and build advanced
projects. It includes work on approved electronics projects outside the
scope of typical classroom applications. It covers the process of
planning, design, prototyping, and fabrication while building an actual
working project. Completed projects are entered in county and
statewide technology contests such as the California State Fair Industrial
Technology competition. A completed project is a course requirement.
Projects can be completed individually or in teams. Field trips are
required.

**ET 380 Introduction to Electronic Communications**

Units: 4
Hours: 54 hours LEC; 54 hours LAB
**ET 381 Electronic Communication Regulations**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** ET 312, 322, or 380 with a grade of "C" or better  
**Transferable:** CSU

This course provides an overview of the Federal Communication Commission (FCC) General Radiotelephone license requirements. It also covers the electronics theory and the rules and regulations mandated by the FCC.

**ET 385 Digital Home Technology Integration**

**Units:** 4  
**Hours:** 54 hours LEC; 54 hours LAB  
**Prerequisite:** ET 115 with a grade of "C" or better  
**Transferable:** CSU

This course covers the fundamentals of Home Technology Integration (HTI). It includes the study of and practical experience in installation, integration, and troubleshooting of entertainment, voice, security, data, and networking systems found in the home or small office. Field trips may be required.

**ET 388 Fiber Optics**

**Units:** 4  
**Hours:** 54 hours LEC; 54 hours LAB

**Prerequisite:** ET 302 with a grade of "C" or better  
**Advisory:** ET 380  
**Transferable:** CSU

This course in fiber optics covers optical theory and operation including the complete fiber optic communication system. It includes fiber optic terminology and instruction in the use of tools and equipment associated with fiber optic installation and maintenance. Tests of the fiber optic systems are performed using sophisticated equipment such as optical power meters and optical time domain reflectometers (OTDR). It also includes system design and troubleshooting procedures. A field trip may be required.

**ET 420 Microcontrollers and Digital Signal Processors**

**Units:** 4  
**Hours:** 54 hours LEC; 54 hours LAB  
**Prerequisite:** None.  
**Corequisite:** ET 335  
**Transferable:** CSU

This course is an in-depth study of microcontrollers and digital signal processors (DSP). It focuses on digital concepts, such as data flow, internal architecture, memory, data converters, special registers, and the interfacing of input/output devices, sensors, and motors. Field trips may be required.

**ET 421 Advanced Electronic Communications**

**Units:** 4  
**Hours:** 54 hours LEC; 54 hours LAB  
**Prerequisite:** ET 253 and 380 with grades of "C" or better  
**Transferable:** CSU

This course covers advanced analog and digital electronic communications including digital two-way radio, cellular, microwave, satellite, and broadcast communications. Topics include digital radio frequency theory, digital transmitters and receivers, P25 digital radio, antennas, software-defined radios, and related industry test equipment. Field trips may be required.

**ET 425 Introduction to Biomedical Equipment Technology**

**Units:** 4  
**Hours:** 72 hours LEC  
**Prerequisite:** ET 302 with a grade of "C" or better  
**Transferable:** CSU

This course covers the fundamentals of biomedical equipment and the responsibilities of electronics technicians in the medical device service industry for hospitals, medical device manufacturers, or other service organizations. It includes a detailed study of the theory, operation, and maintenance of hospital equipment, systems and procedures, and the related electronic systems. Additional topics include basic anatomy and physiology as they relate to the biomedical equipment. Field trips may be required.

**ET 426 Advanced Biomedical Equipment Technology**

**Units:** 4  
**Hours:** 54 hours LEC; 54 hours LAB  
**Prerequisite:** ET 425 with a grade of "C" or better  
**Transferable:** CSU

This course covers the operation, maintenance, troubleshooting, and certification of biomedical equipment used in the medical device industry. It includes an in-depth, hands-on study of frequently used medical equipment preparing electronic technology students for a biomedical technician internship or trainee position in a hospital.
medical device manufacturer, or other service organization. Field trips are required.

**ET 490 Advanced Student Projects Laboratory**

**Units:** 2  
**Hours:** 108 hours LAB  
**Prerequisite:** ET 335 or 380 with a grade of "C" or better  
**Transferable:** CSU  

This course provides an opportunity for students to pursue advanced electronics projects to learn and practice skills needed in the construction, installation, maintenance, and repair of electronic devices.

**ET 495 Independent Studies in Electronics Technology**

**Units:** 1 - 3

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

**ET 499 Experimental Offering in Electronics Technology**

**Units:** 0.5 - 4  
**Prerequisite:** None.  
**Transferable:** CSU  

This is the experimental courses description.

**Prerequisites, Corequisites, and Advisories**

**Enrollment Conditions**

Many courses and educational programs have enrollment conditions, such as prerequisites, corequisites, or advisories on recommended preparation. These faculty-approved conditions are considered necessary and appropriate to ensure that students are adequately prepared to succeed in the course or educational program. It is the student’s responsibility to meet any and all enrollment conditions.

Students may challenge a prerequisite requirement through the challenge process (https://arc.losrios.edu/2023-2024-catalog/programs-of-study/description-of-courses/prerequisites-corequisites-and-advisories#challenge).

**Prerequisite**

A prerequisite is a course that a student is required to take to demonstrate current readiness for enrollment in another course or educational program. For example, in order to take ENGWR 301, a student must have already completed ENGWR 300 with a grade of “C” or better.

**Corequisite**

A corequisite is a course that a student is required to take during the same semester as another course, or prior to another course. For example, a student needs to take GEOL 300 at the same time as GEOL 301 (or before taking GEOL 301).

**Advisory**

An advisory is a condition of enrollment when a student is advised, but not required to meet before, or in conjunction with, enrollment in a course or educational program.

**How to Verify Prerequisites or Corequisites**

**Verifying Prerequisites**

If you are enrolled in a course that has a prerequisite, then you must provide evidence that you have met the prerequisite. Supporting evidence includes:

- A Los Rios transcript that verifies that you have earned a “C” or better in the prerequisite course. Current Los Rios students may print an unofficial transcript in eServices (https://ps.losrios.edu/student/signon.html). Instructors also have access to this information on their roster if you took the prerequisite class within Los Rios since 2003 (prior course information cannot be viewed).
- Los Rios English and/or math placement results.

If you enroll in a course and do not meet the prerequisite, then the instructor must drop you from the course.
Verifying Corequisites

If you are enrolled in a course that has a corequisite, then you must provide evidence that you meet the corequisite requirement through one of the following:

- Your personal class schedule shows you are currently enrolled in the corequisite course.
- A Los Rios transcript that shows you have already completed the corequisite course.

How to Challenge Prerequisites or Corequisites

If you do not have the supporting evidence to verify a prerequisite or corequisite (https://arc.losrios.edu/2023-2024-catalog/programs-of-study/description-of-courses/prerequisites-corequisites-and-advisories#verify) but you believe that you should qualify to enroll in the course, then you may challenge a prerequisite or corequisite.

Criteria for challenging a prerequisite or corequisite include:

- You have knowledge or ability to succeed in the course with the prerequisite.
- The prerequisite course is not readily available.
- You believe that the prerequisite is discriminatory or being applied in a discriminatory manner.
- You believe that the prerequisite was established in violation of regulations and/or the established district-approved policy and procedures.

To challenge a prerequisite or corequisite:

1. Submit a Prerequisite Equivalency Form (arc/main/doc/ARC02-Admissions/ARC-Prerequisite-Equivalency.pdf) – along with any supporting documentation – to the instructional department (locations are listed on form) at least one week prior to the start of instruction.
2. Your challenge will be reviewed by the department's prerequisite challenge committee.
3. You will be informed in writing of the committee's determination within five working days of the review.

Math and English Prerequisite Clearance

Prerequisites for all 300-level mathematics courses (MATH and STAT) and English courses (ENGWR, ENGED, and ENGCW) must be cleared prior to enrollment.

Automatic Clearance

You will be automatically cleared to enroll in a math or English class if:

- You are currently enrolled in the appropriate prerequisite course at a Los Rios college (you must earn a grade of "C" or better or you will be automatically dropped from the higher-level course before the new semester begins).
- You have completed and passed the appropriate prerequisite course at a Los Rios college.
- You have been placed into the math or English course you want to add.

Clearance Through Coursework From Outside of Los Rios

If you completed the equivalent prerequisite course with a grade of "C" or better at a college or university that is on the Los Rios Math Prerequisite Clearance List (shared/doc/admissions-records/prerequisite/math-prerequisite-clearance-list.pdf) or English Prerequisite Clearance List (shared/doc/admissions-records/prerequisite/english-prerequisite-clearance-list.pdf) then:

- Submit unofficial or official transcripts (unless already on file with the Admissions and Records office) along with the Prerequisite Equivalency Form (arc/main/doc/ARC02-Admissions/ARC-Prerequisite-Equivalency.pdf) to the Admissions and Records office. Please Note: In-progress coursework cannot be used.
- If verified through a transcript, then the external course will be posted as transfer credit on your unofficial transcript, which will clear enrollment for math courses. This process may take three to five business days, so plan ahead.

If you did not find your course on the approved equivalency lists above – but you believe you have the knowledge or ability to succeed in an English or math course through other college/university coursework (or other credentials) – then you may challenge the prerequisite via the challenge process (https://arc.losrios.edu/2023-2024-catalog/programs-of-study/description-of-courses/prerequisites-corequisites-and-advisories#challenge).
Emergency Medical Technology

Emergency Medical Services is an allied health specialty whose practitioners respond to emergencies before a patient reaches a hospital, rendering basic and advanced medical treatment before and during transport to a medical facility. Classroom, clinical and field internship training prepares Emergency Medical Technicians (EMT) to assess and treat a wide variety of medical emergencies. The knowledge, skills and experience gained through a one semester program allows students to meet the responsibilities outlined in the Department of Transportation’s Emergency Medical Services Education Standards.

The goal of the ARC Emergency Medical Technology (EMT) program is to prepare individuals to render pre-hospital advanced life support within an organized Emergency Medical Services (EMS) system.

The American River College Paramedic Program is accredited by the Commission on Accreditation of Allied Health Education Programs (https://www.caahep.org/) upon the recommendation of the Committee on Accreditation of Educational Programs for the Emergency Medical Services Profession (CoEMSP)

Certificates Offered

Emergency Medical Technician (EMT) Certificate

Dean Narinedat Madramootoo
Department Chair Grant Goold
Phone (916) 484-8902

Certificate

Emergency Medical Technician (EMT) Certificate

This program prepares students to function as certified Emergency Medical Technicians. Training topics include the skills necessary to provide emergency medical care at a basic life support level with a fire, ambulance, or other specialized service. This program is conducted in compliance with Title 22, Division 9, Chapter 2 of the California Code of Regulations and Emergency Medical Technician (EMT). A “C” or better is required to obtain a course completion certificate.

Enrollment Eligibility

To be eligible for enrollment in the program, the student must meet the following criteria:

- Documentation of current American Heart Association CPR Basic Life Support certification. No other form of CPR certification is accepted. Students must be present and provide a copy of the AHA CPR certification on the first day of the course. Not open to students with current NREMT or California State certification or licensure as an EMT, EMT-Basic, Advanced EMT or paramedic.

Enrollment Process

Eligible students are selected for the program according to the following steps:

- Verification of current American Heart Association Basic Life Support CPR certification. No other form of CPR certification is accepted. Students must be present and provide a copy of the AHA CPR certification on the first day of the course. Not open to students with current NREMT or California State certification or licensure as an EMT, EMT-Basic, Advanced EMT or paramedic.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- evaluate the nature and seriousness of the patient’s condition or extent of injuries.
- apply emergency medical care based on assessments and findings.
- demonstrate proper procedures in lifting, moving, and transporting a patient to prevent further injury.
- utilize communicating, transporting, and record keeping skills.

Career Information

Emergency Medical Technicians operate in a variety of settings from public emergency services, private industry and health care facilities. EMT employment varies from community to community and is considered a growing occupation within the Allied Health professions.

Emergency Medical Technology (EMT) Courses

EMT 109 Emergency Medical Responder

Same As: PMED 108
Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: None.
Enrollment Limitation: Documentation of current certification in American Heart Association Healthcare Provider or Basic Life Support level CPR must be presented on the first day of the course. Not open to students with current NREMT or California State certification or license as an EMR, EMT, Advanced EMT or paramedic.
Advisory: ENGRD 116 and MATH 42 with grades of “C” or better

This course is an introduction to the principles and practices of prehospital Emergency Medical Services (EMS). It is intended to prepare the student for national, state, or local certification as an Emergency Medical Responder (EMR). The EMR responds to patients suffering from medical and trauma related emergencies and assists other EMS personnel during ambulance transport. This course can be taken once for credit and is a prerequisite to EMT 110. The course conforms to the 2019 National EMS Scope of Practice Model and 2021 EMS National Education Standards. Field trips and off-campus lab assignments may be required.

EMT 110 Emergency Medical Technician (EMT) Didactic

Units: 6
Hours: 81 hours LEC; 81 hours LAB
Prerequisite: None.
Enrollment Limitation: Documentation of current American Heart Association CPR Basic Life Support certification. No other form of CPR certification will be accepted. Students must be present and provide a copy of the AHA BLS CPR certification on the first day of the course. Not
open to students with current NREMT or California State certification or licensure as an EMT, EMT-Basic, Advanced EMT or paramedic.

Advisory: AH 110 and BIOL 108; MATH 32 (Pre-Algebra), or MATH 42 (Algebra Readiness - Part II)

This course provides academic preparation and psychomotor skills training to prepare the student for EMT 111, the Basic Life Support (BLS) clinical and field practicum. Successful completion of EMT 110 and EMT 111 will make the student eligible to take the National Registry of EMTs (NREMT) EMT certification exam. Topics include the BLS knowledge, application and problem solving necessary to work as an EMT (formerly known as EMT-Basic or EMT-1) in the Emergency Medical Services (EMS) field for an ambulance service, fire department, emergency department, or other specialized service. A “C” letter grade as well as successful completion of the EMT 110 Exit Exam and psychomotor skill tests are required to be eligible for EMT 111. The course conforms to the 2007 National EMS Scope of Practice Model and 2009 EMS National Education Standards and complies with Title 22, Division 9, Chapter 2 of the California State Code of Regulations. This course is approved by the Emergency Medical Services (EMS) Agency of the Sacramento County Health Department. Off-campus lab assignments may be required.

**EMT 111 Emergency Medical Technician (EMT) Practicum**

**Units:** 1  
**Hours:** 54 hours LAB  
**Prerequisite:** EMT 110 with a grade of “C” or better  
**Enrollment Limitation:** Current Healthcare Provider CPR certification or equivalent is required. Must be able to pass a qualifying background check and drug screen, show proof of current immunizations. The student must be able to purchase online resources, malpractice insurance as well as a uniform and other lab equipment. This course is not available to students with current EMT certification or who are licensed paramedics since they have already achieved the learning outcomes for this course. Due to regulatory requirements, this course must be completed less than twelve months after the beginning of EMT 110.

**Advisory:** AH 311; MATH 32 (Pre-Algebra), or MATH 42 (Algebra Readiness - Part II)

This course provides the supervised practical lab hours necessary to complete EMT education after completion of EMT 110. Successful completion of EMT 110 and EMT 111 will make the student eligible to take the National Registry of EMTs (NREMT) EMT certification exam. The student is placed in the clinical and field environments necessary to obtain the minimum required patient contacts. This course conforms to the 2007 National EMS Scope of Practice Model as well as the 2009 EMS National Education Standards and complies with Title 22, Division 9, Chapter 2 of the California State Code of Regulations. This course is approved by the Emergency Medical Services (EMS) Agency of the Sacramento County Health Department. Field trips or off-campus lab assignments are required. This course is Pass/No Pass only.

**EMT 150 Advanced Emergency Medical Technician (AEMT) Didactic**

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Prerequisite:** HEED 310 and HEED 323 with grades of “C” or better  
**Enrollment Limitation:** Current Healthcare Provider CPR or equivalent recognition and California State EMT certification are required. The student must be able to purchase online resources as well as a uniform and other lab equipment. This course is not available to certified NREMT or California State Advanced EMTs or paramedics.

**Advisory:** AH 311, BIOL 102, and PMED 105; ENGWR 320, and ENGRD 310 with a grade of “C” or better; OR ESLR 320 and ESLW 320 with a grade of “C” or better; MATH 32 (Pre-Algebra), or MATH 42 (Algebra Readiness - Part II)

This course provides academic preparation and psychomotor skills training to prepare the student for EMT 151, the Advanced Emergency Medical Technician (AEMT) clinical and field Internship. Successful completion of EMT 150 and EMT 151 will make the student eligible to take the National Registry of EMTs (NREMT) Advanced EMT certification exam. Topics include the Limited Advanced Life Support (LALS) knowledge, application and problem solving skills necessary to work as an AEMT (formerly known as EMT-Intermediate or EMT-2) in the Emergency Medical Services (EMS) field for an ambulance service, fire department, emergency department or other specialized service. A “C” letter grade as well as successful completion of the EMT 150 Exit Exam and psychomotor skill tests are required to be eligible for EMT 151. The course conforms to the 2007 National EMS Scope of Practice Model and 2009 EMS National Education Standards and complies with Title 22, Division 9, Chapter 3 of the California State Code of Regulations. This course is approved by the Emergency Medical Services (EMS) Agency of the Sacramento County Health Department. Field trips or off-campus lab assignments are required.

**EMT 151 Advanced Emergency Medical Technician (AEMT) Internship**

**Units:** 3.5  
**Hours:** 189 hours LAB  
**Prerequisite:** EMT 150, HEED 310, and HEED 323 with grades of “C” or better  
**Enrollment Limitation:** Current Healthcare Provider CPR or equivalent certification and California State EMT certification is required. The student must be able to pass a qualifying background check and drug screen, show proof of current immunizations. The purchase of online resources, malpractice insurance as well as a uniform and other lab equipment is also required. This course must be completed less than six months after the completion of EMT 150. This course is not available to NREMT or California State certified AEMTs or paramedics.

**Advisory:** AH 311 and BIOL 102; PMED 105 or NURSE 320

This course provides supervised clinical and field internship experience at the Limited Advanced Life Support (LALS) scope of practice. Successful completion of EMT 150 and EMT 151 makes the student eligible to take the National Registry of EMTs (NREMT) Advanced Emergency Medical Technician (AEMT) certification exam. The course conforms to the 2007 National EMS Scope of Practice Model and 2009 EMS National Education Standards and complies with Title 22, Division 9, Chapter 3 of the California State Code of Regulations. This course is approved by the Emergency Medical Services (EMS) Agency of the Sacramento County Health Department. Field trips or off-campus lab assignments are required.

**EMT 298 Work Experience in Emergency Medical Technology**

**Units:** 0.5 - 4  
**Hours:** 30 - 300 hours LAB  
**Prerequisite:** None  
**Enrollment Limitation:** Students must be in a paid or unpaid internship, volunteer position, or job related to the emergency medical technology field with a cooperating site supervisor. Students are advised to consult with the Emergency Medical Technology faculty to review specific certificate and degree work experience requirements.

**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.  
**General Education:** AA/AS Area III(b)

This course provides students with opportunities to develop marketable skills in preparation for employment or advancement within the emergency medical technology field. It is designed for students interested in work experience and/or internships in associate degree level or certificate occupational programs. Course content includes understanding the application of education to the workforce, completion of Title 5 required forms which document the student's progress and hours spent at the work site, and developing workplace skills and competencies.

During the semester, the student is required to complete 37.5 hours of related paid work experience, or 30 hours of related unpaid work experience for 0.5 unit. An additional 37.5 or 30 hours of related work experience is required for each additional 0.5 unit. All students are required to attend the first class meeting, a mid-semester meeting, and a final meeting. Additionally, students who have not already successfully completed a Work Experience course will be required to attend weekly orientations while returning participants may meet individually with the instructor as needed. Students may take up to 16 units total across all Work Experience course offerings. This course may be taken up to four times.
times when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

**To Be Arranged Scheduling**

Some or all of the class hours for courses may be offered using the "To Be Arranged" (TBA) course scheduling option. Please refer to the class schedule listing for sections of courses for specific TBA weekly or daily class hour requirements that may apply.
Energy

This certificate provides training in all aspects of solar photovoltaic (PV) system design, cost estimation, sales, and installation. It also includes training in oral presentations and management skills. The courses included in the certificate also qualify students to take the North American Board of Certified Energy Practitioners (NABCEP) PV Entry Level Certificate of Knowledge Exam.

Certificates Offered

Solar Energy Technology Certificate

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- describe the components in a complete grid-tie PV system.
- construct solar PV battery charging systems.
- analyze test equipment data to determine the location of the "sweet spot" on a solar PV panel's Current-Voltage (IV) curves.
- identify tools and test equipment necessary for solar PV panel installations.
- identify different sizes of wire according to American Wire Gauge (AWG) tables.
- construct a simulated roof system using industry standard building materials.
- calculate the amount of yearly solar radiance in relationship to shading using the Solmetric’s SunEye predictor and software.
- inspect and repair malfunctioning components in a functioning grid tie solar PV system.
- estimate the yearly power output for a solar photovoltaic system using both the SunEye and the Pathfinder sun angle and shade predictor.
- identify typical locations of electrical/mechanical failures in PV systems.
- maximize communication effectiveness by specifying, planning for, and adapting to the specific audience.
- identify and analyze factors that contribute to effective design, development, and delivery of presentations.
- relate the communication process to public speaking situations.
- assess the ways to start a business and which form of business organization should be used.
- explain the importance of a business plan, a financial plan, and a marketing plan.
- describe the financing process and how to access capital.
- apply principles of management and marketing relevant to the small business.
- evaluate financial reports.
- analyze the impact of legal requirements and government regulations as related to the operation of the small business.

Career Information

This certificate prepares students for entry level employment in a wide variety of positions in the PV industry. It is also valuable for people working in the PV industry to upgrade their skills to include the newest advancements in solar technology. Career opportunities include PV system designers, PV systems outside sales, PV equipment and associated component sales representatives, and a variety of other emerging careers in this field.

Total Units: 10

Student Learning Outcomes
Upon completion of this program, the student will be able to:
• create simple electronic schematics using basic schematic symbols.
• apply electrical concepts to measure and evaluate resistance, capacitance, and inductive devices.
• compare and contrast series and parallel resistive, capacitance, and inductive circuits.
• describe the components in a grid-tie or battery PV system.
• assess safety hazards when working with PV systems.
• identify and employ common hand tools to construct a simulated roof structure and install a solar PV system.
• calculate the gauge wire and conduit size for a given solar PV panel array per National Electrical Code (NEC) standards.
• inspect and repair malfunctioning components in a solar PV system.
• evaluate different types of solar inverters and solar PV panels to determine which configurations would have the highest efficiency and most power output for a given situation.
• use industry software and measuring tools to determine solar PV panel string-size, yearly solar radiance, and yearly power output.

Career Information
This certificate prepares the student for electronic technician positions in industries that also include solar PV systems in remote locations such as the telecommunications industry.

Energy (ENERGY) Courses

ENERGY 140 Electrical Applications for Solar Installers

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: None.
Corequisite: ET 302
This is an introductory course in Solar Photovoltaic (PV) energy. It covers how solar PV energy works and how to assess if PV is feasible in a variety of situations. Topics include calculating and measuring PV power outputs for different conditions, using software tools and hardware for calculating and sizing PV systems, and measuring and analyzing shading conditions. Additionally, it addresses how to install and connect necessary components. Field trips may be required.

ENERGY 141 Electrical & Mechanical Applications for Solar Installers

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: ENERGY 140 with a grade of "C" or better
Corequisite: ET 302
This is an advanced course in Solar Photovoltaic (PV) energy. Topics include using hardware and software tools for shading and correct orientation of solar panels, the effect PV panel orientation has on system power output and efficiency, what effect optimum PV panel loading has on power produced, and how to perform a load analysis on a residence. Additionally, it covers the use of various manufacturers' software to calculate PV panel string sizing for optimum efficiency when working with grid-tie inverters. National Electrical Code (NEC) and fire code wire sizing, fusing, and other safety instructions and procedures are stressed. The successful completion of this course and ENERGY 142 qualifies students to take the North American Board of Certified Energy Practitioners (NABCEP) Associate Achievement Exam leading to the NABCEP PV Installation Professional Certificate. Field trips may be required.

ENERGY 142 NABCEP Associate Certification Preparation

Units: 2
Hours: 36 hours LEC
Prerequisite: ENERGY 140 and 141 with grades of "C" or better
This advanced course in solar photovoltaic (PV) energy includes preparation for the North American Board of Certified Energy Practitioners (NABCEP) PV Associate Certificate of Knowledge Exam. Topics include hardware and software tools used for determining percent of shade, and orienting solar panels, the effect of PV panel orientation on system power and efficiency, and the load analysis. Additionally, it covers calculating PV panel string sizing when working with grid tie inverters as related to the NABCEP test. National Electrical Code (NEC) and fire code wire sizing, fusing, and other safety instructions and procedures are reviewed. The successful completion of this course and ENERGY 141 meets the requirements to take the NABCEP certified associate solar PV installers and service technicians entry level Certificate of Knowledge of PV systems test. Field trips may be required.
ENERGY 143 Solar Photovoltaic Systems
Design, Installation, and Troubleshooting

Units: 4
Hours: 54 hours LEC; 54 hours LAB
Prerequisite: ENERGY 141 with a grade of "C" or better

This advanced course in solar photovoltaic (PV) energy offers the opportunity for hands-on experience designing, installing, and troubleshooting grid-tie and stand-alone PV systems. Topics include hardware and software tools used in the solar PV industry, blueprint reading, calculating component size and capacity, and personal safety. Additionally, it covers calculating PV panel string sizing when working with grid-tie inverters and battery sizing when designing stand-alone PV systems. National Electrical Code (NEC) and fire code wire sizing, fusing, and other safety instructions and procedures are reviewed. Ten-hour Occupational Safety and Health Administration (OSHA) training is provided. Students must pay the OSHA required fee in order to obtain the OSHA safety card. Field trips may be required.

ENERGY 299 Experimental Offering in Energy

Units: 0.5 - 4

Prerequisite: None.
This is the experimental courses description.

ENERGY 303 Energy and Sustainability

Same As: NATR 303
Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: MATH 120, 125, 129, 133 or higher; NATR 300, or an equivalent transferable life science course; and Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300, OR ESLR 340 AND ESLW 340.
Transferable: CSU
General Education: AA/AS Area IV

This course investigates fundamentals of energy and impacts of energy systems on society and the environment. It explores energy resources, efficiency, conservation, and emerging technologies. Specifically addressed are mechanics, advantages, disadvantages, and sustainability of current and future energy systems. This course also focuses on economic, cultural, political, and environmental aspects of energy production and consumption in the context of the built environment, transportation, food systems, manufacturing, and public services. Field trips may be required. This course is not open to students who have completed NATR 303 or ET 303.

Engineering

The Engineering program offers courses necessary to transfer to a four-year university where students can complete a bachelor’s degree in various branches of engineering.

Most lower division engineering programs require the following ARC courses: Mathematics 400, 401, 402, and 420; Physics 410, 421, and 431; Chemistry 400; and Engineering 401, 413, and 420. Students should consult the institution to which they wish to transfer for specific lower-division requirements.

ARC’s program provides the foundation in mathematics, physics, and engineering necessary to transfer to a four-year institution and complete a bachelor’s degree in engineering.

Degrees Offered

A.S. in Civil Engineering
A.S. in Electrical Engineering
A.S. in Mechanical Engineering

Dean Joel Keebler
Phone (916) 484-8107

Associate Degrees

A.S. in Civil Engineering

This degree provides the foundation in mathematics, science, and engineering needed to transfer to a four-year institution as a major in civil engineering. The courses in this degree meet most of the lower division requirements for several nearby universities. Since each university has its own unique requirements, additional coursework will be required prior to transfer. Students should meet with a counselor to determine which additional courses are required for successful transfer to a particular institution.

Total Units: 47

The Civil Engineering Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- solve problems by applying knowledge of mathematics, including differential and integral calculus and differential equations.
- solve problems by applying knowledge of science, including chemistry and physics.
- use technology to increase productivity.
- apply knowledge of mathematics, science, and engineering to identify, formulate, and solve basic civil engineering problems.
- describe the ethical and professional responsibilities of an engineer and situations where engineering solutions can impact society.

A.S. in Electrical Engineering

This degree provides the foundation in mathematics, science, and engineering needed to transfer to a four-year institution as a major in electrical engineering. The courses in this degree meet most of the lower division requirements for several nearby universities. Since each university has its own unique requirements, additional coursework will be required prior to transfer. Students should meet with a counselor to determine which additional courses are required for successful transfer to a particular institution.

Engineering (ENGR) Courses

ENGR 300 Introduction to Engineering

**Units:** 1  
**Hours:** 18 hours LEC  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.  
**Transferable:** CSU; UC  

This course is an introduction to the engineering and engineering technology professions, and their place in industry. It includes an explanation of the engineering and engineering technology options and curricula involved. Topics include an emphasis on problem-solving techniques used in engineering and engineering technology. This course is recommended for all entering engineering, engineering technology, and design technology students.

ENGR 310 Engineering Survey Measurements

**Units:** 4  
**Hours:** 54 hours LEC; 54 hours LAB  
**Prerequisite:** MATH 373 or 375 with a grade of "C" or better  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.  
**Transferable:** CSU; UC  
**C-ID:** C-ID ENGR 180  

This course covers the basic fundamentals of surveying for engineers. Electronic surveying instruments are used to develop the principles of measurement for distance, elevations, and angles. Additional topics include systematic and random errors, line directions, profiles and cross sections, traverse computations, horizontal and vertical curves, earthwork quantity calculations, and manual and CAD (computer-aided drafting) production of engineering plans. This course is intended for civil engineers, but may also be required for other programs.

ENGR 312 Engineering Graphics

**Units:** 3  
**Hours:** 36 hours LEC; 72 hours LAB  
**Prerequisite:** None.  
**Advisory:** MATH 373 with a grade of "C" or better  
**Transferable:** CSU; UC  
**C-ID:** C-ID ENGR 260  

This course covers the principles of engineering drawings in visually-communicated engineering designs and an introduction to computer-aided design (CAD). Topics include the development of visualization skills, orthographic projections, mechanical dimensioning and tolerancing practices, the engineering design process, and design analysis. Assignments develop sketching and 2D and 3D CAD skills. The use of solid modeling CAD software is an integral part of the course.

ENGR 401 Introduction to Electrical Circuits and Devices

**Units:** 4  
**Hours:** 72 hours LEC  
**Prerequisite:** PHYS 421 with a grade of "C" or better  
**Corequisite:** MATH 420  
**Transferable:** CSU; UC  
**C-ID:** C-ID ENGR 140B  

This course covers the fundamentals of electrical circuit theory and analysis for engineers. Analysis of DC and AC circuits containing resistors, capacitors, inductors, dependent sources, operational amplifiers, and switches; natural and forced responses of first and second order RLC circuits; the use of phasors; AC power calculations; power transfer; and energy concepts.

ENGR 412 Properties of Materials

**Units:** 4  
**Hours:** 54 hours LEC; 54 hours LAB  
**Prerequisite:** CHEM 400 and PHYS 410 with grades of "C" or better  
**Transferable:** CSU; UC  
**C-ID:** C-ID ENGR 140B  

This course presents the internal structures and resulting behaviors of materials used in engineering applications, including metals, ceramics, polymers, composites, and semiconductors. It emphasizes developing the ability both to select appropriate materials to meet engineering design criteria and to understand the effects of heat, stress, imperfections, and chemical environments upon material properties and performance. Laboratories provide opportunities to directly observe the structures and behaviors discussed in the course, to operate testing equipment, and to analyze experimental data. This course was formerly known as ENGR 413.

ENGR 420 Statics

**Units:** 3
**ENGR 495 Independent Studies in Engineering**

**Units:** 1 - 3  
**Hours:** 54 - 162 hours LAB  
**Prerequisite:** None.  
**Transferable:** CSU

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

**ENGR 499 Experimental Offering in Engineering**

**Units:** 0.5 - 4  
**Prerequisite:** None.  
**Transferable:** CSU

This is the experimental courses description.

**Cross-Listed Courses**

When a course is listed under two (or more) different departments in the catalog, the course is referred to as "cross-listed," "cross-referenced," or "same as." The cross-listed course has identical content under both departments' catalog listing.

If two (or more) courses are cross-listed, then a student can only earn credit for one of those courses. Students who are not sure which cross-listed course they should enroll in are encouraged to consult with a counselor.

When a cross-listed course is repeatable, the course may be taken (under either name) the total number of times stated in the catalog descriptions of the cross-listed course.

English

English at ARC is made up of five distinct and overlapping programs. We provide access to in-person, online, and hybrid instruction in creative writing, literature, education, reading, and writing courses. These courses will provide you with unique and meaningful ways to develop the skills that will help you meet your education and personal goals.

Degrees and Certificates Offered

A.A.-T. in Elementary Teacher Education

Associate Degrees for Transfer

A.A.-T. in Elementary Teacher Education

The Associate in Elementary Teacher Education for Transfer provides a clearly articulated curricular track for students who wish to transfer to a CSU campus, while also serving the diverse needs of students interested in the breadth and depth of the field of Elementary Teacher Education. Additionally, this degree exposes students to the core principles and practices of the field in order to build a foundation for their future personal, academic, or vocational paths.

The Associate in Arts degree in Elementary Teacher Education for Transfer provides students with a major that fulfills the general requirements of the California State University for transfer. Students with this degree will receive priority admission with junior status to the California State University system. The Associate in Arts degree in Elementary Teacher Education for Transfer (AA-T) may be obtained by completion of 60 transferable, semester units with a minimum overall grade point average (GPA) of 2.0, including (a) a minimum grade of “C” (or “P”) for each course in the major or area of emphasis described in the Required Program, and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education-Breadth Requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

• apply the scientific method using inquiry, data collection, quantitative reasoning, and basic mathematical concepts to analyze results
• assess teaching practices and learning conditions through application of child development theories
• evaluate attitudes, actions, and behaviors indicative of a professional educator
• apply analytical reading and writing, research, and critical thinking essential for completing assigned tasks
• explain relationships and interactions between humans and the earth
• apply knowledge of world history and cultures to identify the values of a culture and work with others of diverse cultures
• analyze statistical data
• present information effectively to an intended audience
• compare and contrast various forms and styles of music, artworks, and theatrical performances

Career Information

Public or private instructional assistant or classroom aide, grades K-8; private tutor; publishing and textbook salesperson; curriculum and test developer; teacher, grades K-12 with additional education

Total Units: 19

1. Or ENGLT 301 AND ENGLT 302, in which case students will complete three (3) units from List B rather than six (6).

2. Students may also substitute any courses from List A not already taken to fulfill degree requirements.

3. Students may also substitute any course from Lists A or B not already taken to fulfill degree requirements.

The Associate in Arts in English for Transfer (AA-T) degree may be obtained by completion of 60 transferable, semester units with a minimum overall grade point average (GPA) of 2.0, including (a) a minimum grade of “C” (or “P”) for each course in the major or area of emphasis described in the Required Program, and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education-Breadth Requirements.

### Student Learning Outcomes

Upon completion of this program, the student will be able to:

- evaluate literary texts for social, historical, cultural, psychological, philosophical, and aesthetic assumptions.
- analyze representations of gender identity and expression, sexual orientation, nationality, race, ethnicity, colonialism, social class, or physical ability.
- employ critical reasoning skills and terminology of literary critique to analyze complex texts.
- compose thesis-driven arguments to suit a variety of rhetorical situations, including interpretation, evaluation, and analysis.
- synthesize textual evidence, including primary and secondary sources, documenting sources for readers’ needs.

### Certificate

#### Literary Publishing Certificate

This certificate benefits students interested in the business of publishing literary works. Work required to edit and publish American River Review forms the core of the certificate. Additional coursework focuses on the various literary genres from reading, writing, and editing perspectives.

Total Units: 12

### Student Learning Outcomes

Upon completion of this program, the student will be able to:

- compose literary works using the full process of drafting, receiving feedback, revising, editing, and proofreading.
• examine literary works from various genres, styles, cultural perspectives, and historical periods.
• critique literary works.
• assess literary works for publication.
• recommend editorial changes to authors of literary works.
• assemble a collection of literary works for publication.

Career Information
This certificate prepares students for careers in publishing houses of full-length or periodical literature. In addition, students may use the skills to work on publications such as yearly anthologies, creative writing magazines, newspapers, and newsletters in a commercial or educational setting.

English - Creative Writing (ENGCW) Courses

ENGCW 400 Creative Writing
Units: 3
Hours: 54 hours LEC
Prerequisite: Eligibility for ENGWR 300
Transferable: CSU; UC
General Education: AA/AS Area II(b); AA/AS Area I
C-ID: C-ID ENGL 200

This introductory creative writing course provides writing experience with three or four of the following genres: short story, poetry, creative nonfiction, and script writing for theater or film. In addition, it covers the relationship between cultural events and literary conventions and to do so with an awareness of literature’s role in culture, emphasizing diverse experiences and perspectives. This course includes analysis of literary models from diverse cultures, faculty and class critiques of texts, and discussion of literary techniques, such as voice, metaphor, imagery, dialogue, and narrative in each covered genre. This course encourages students to develop an original voice, reflecting their unique backgrounds and experiences.

ENGCW 410 Fiction Writing Workshop
Units: 3
Hours: 54 hours LEC
Prerequisite: Eligibility for ENGWR 300
Transferable: CSU; UC

This creative writing course employs a variety of fiction techniques— including plot, character, imagery, and dialogue—to develop stories that reflect one’s unique backgrounds and experiences. In addition to introducing revision and editing processes, it examines published fiction from diverse cultures and communities.

ENGCW 415 Comedy Writing Workshop
Units: 3
Hours: 54 hours LEC
Prerequisite: Eligibility for ENGWR 300.
Transferable: CSU; UC

General Education: AA/AS Area I

This creative writing course concentrates on comedy writing, including the analysis of work written during the semester. Topics include the examination of stand-up comedy, comedic sketches, and satirical essays as well as idea generation and revising and editing processes. A portfolio/presentation of original work and a conference with the instructor are required.

ENGCW 420 Poetry Writing Workshop
Units: 3
Hours: 54 hours LEC
Prerequisite: Eligibility for ENGWR 300.
Transferable: CSU; UC

This creative writing course focuses on poetry, emphasizing the development of a personal voice while also introducing the skills to analyze and appreciate the wide range of styles in contemporary poetry. This course examines literary styles and elements in traditional and contemporary poetry and offers practice in revision and in giving constructive critiques. In addition, it provides contexts to analyze the relationship between culture and literature, with an emphasis on understanding multicultural experiences and perspectives.

ENGCW 430 Creative Non-Fiction Writing Workshop
Units: 3
Hours: 54 hours LEC
Prerequisite: Eligibility for ENGWR 300.
Transferable: CSU; UC
General Education: AA/AS Area II(b); CSU Area C2

This creative writing course concentrates on the literary essay and explores the factual and experiential sources of creative non-fiction. It covers the writing of various kinds of essays, such as memoir, autobiography, personal essays, reflective nature writing, prose with poetic elements (prose-poetry), and fact-based or philosophical writing with a definite literary, stylistic component. Course readings include one full-length work of creative non-fiction. Topics in this course also include analysis of classical and modern essays for elements such as voice, point of view, and structure. Additional topics will include the relationship between cultural events and literary conventions and an awareness of literature’s role in culture, emphasizing diverse experiences and perspectives.

ENGCW 441 Feature Film Screenwriting Workshop I
Units: 3
Hours: 54 hours LEC
Prerequisite: Eligibility for ENGWR 300.
Advisory: ENGCW 400, ENGWR 300, or ENGWR 480
Transferable: CSU; UC

This course introduces the writing of feature-length film scripts. It requires three proposals for projects, one of which is developed through the first act in official screen format, plus scene descriptions for major scenes, character sketches, and plot outlines. Several classic feature films and/or scripts are analyzed for their writing strengths.

ENGCW 450 College Literary Magazine
Units: 3
Hours: 54 hours LEC; 18 hours LAB
Prerequisite: ENGWR 300 with a grade of “C” or better
Advisory: ENGCW 400, 410, 420, or 430
Transferable: CSU

This course provides instruction and editorial staff experience in producing the college literary and fine arts magazine, American River Review. The course focuses on the selection and editing of literary content on publicity, marketing, fundraising, and distribution of the magazine. Students will learn the editorial process and select and edit manuscripts in the genres of poetry, short fiction, and creative non-fiction. Students publish the American River Review annually. The American River Review regularly competes with other college literary magazines.

ENGCW 455 Independent Studies in English - Creative Writing
Units: 1 - 3
Hours: 54 - 162 hours LAB
Prerequisite: None.
Transferable: CSU
Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

**ENGCW 499 Experimental Offering in English - Creative Writing**

**Units:** 0.5 - 4  
**Prerequisite:** None.  
**Transferable:** CSU

This is the experimental courses description.

**English - Education (ENGED) Courses**

**ENGED 305 Structure of English**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** ENGW 300 or 480 with a grade of “C” or better  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area II(b)

This course is a study of the structure of English grammar, both descriptive and prescriptive. It includes the study and practice of traditional grammar and standard usage, with emphasis on the relationship to writing (2000-word writing requirement) and the teaching of language arts; it also includes an introduction to the history of the English language as it relates to irregularities in modern English. This course is designed for those who plan to teach or who are especially interested in grammar as it relates to writing.

**ENGED 320 Service Learning: Tutoring Elementary Students in Reading**

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Schools may require proof of certain immunizations and/or completion of a fingerprint clearance through the cooperating school district before students can attend the school site and work with children for field work.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312  
**Transferable:** CSU  
**General Education:** AA/AS Area III(b)

This course offers students an opportunity to learn and practice basic methods of tutoring elementary school children in reading. After tutor training at the start of the semester, students partner with elementary school children they will tutor in reading by integrating and applying the course content. This course offers field experience for teacher preparation.

**ENGED 324 Introduction to Elementary Teaching with Field Experience**

**Same As:** ECE 350  
**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Before students can attend the school site for field work, they are required to show proof of TB clearance. They may also need to complete a fingerprint clearance through the cooperating school district, if the district requires it.  
**Advisory:** ECE 312 or PSYC 372  
**Transferable:** CSU

**General Education:** AA/AS Area III(b)  
**C-ID:** C-ID EDUC 200

This course introduces the concepts and issues related to teaching diverse learners in today’s contemporary schools, kindergarten through grade 12 (K-12). Topics include teaching as a profession and career, historical and philosophical foundations of the American education system, contemporary educational issues, California’s content standards and frameworks, and teacher performance standards. In addition, this course requires a minimum of 45 hours of structured fieldwork in public school elementary school settings that represent California’s diverse student population, and includes cooperation with campus-approved certificated elementary school teachers.

This course is not open to students who have completed ECE 350.

**ENGED 495 Independent Studies in English - Education**

**Units:** 1 - 3  
**Hours:** 54 - 162 hours LAB  
**Prerequisite:** None.  
**Transferable:** CSU

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

**ENGED 499 Experimental Offering in English - Education**

**Units:** 0.5 - 4  
**Prerequisite:** None.  
**Transferable:** CSU

This is the experimental courses description.

**English - Laboratory (ENGLB) Courses**

**ENGLB 299 Experimental Offering in English - Laboratory**

**Units:** 0.5 - 4  
**Prerequisite:** None.  
**Transferable:** CSU

This is the experimental courses description.

**ENGLB 499 Experimental Offering in English - Laboratory**

**Units:** 0.5 - 4  
**Prerequisite:** None.  
**Transferable:** CSU

This is the experimental courses description.

**English - Literature (ENGLT) Courses**

**ENGLT 300 Introduction to Fiction**

**Units:** 3
This course covers the study of fiction as a type of literature. It typically examines at least twenty short stories and at least three novels, critically analyzing plot, setting, character, theme, and style. This course includes fiction written in English, as well as fiction in translation.

ENGLT 304 Introduction to Poetry

Units: 3
Hours: 54 hours LEC
Prerequisite: Eligibility for ENGW 300.
Advisory: ENGW 300 or ENGW 480, AND ENGW 301, ENGW 303 or ENGW 481.
Transferable: CSU; UC
General Education: AA/AS Area I; CSU Area C2; Cal-GETC Area 3B
(effective Fall 2025); IGETC Area 3B

This course introduces the art of poetry. It includes the analysis and appreciation of poetry as a type of literature with careful attention to the elements of poetics, the various styles of poetry, and major poets and poetic movements. Poetic theories and poems by a wide variety of traditional and contemporary poets as well as poetic theory are examined.

ENGLT 308 The Graphic Novel and Manga

Units: 3
Hours: 54 hours LEC
Prerequisite: Eligibility for ENGW 300.
Advisory: ENGW 300 or ENGW 480, AND ENGW 301, ENGW 303 or ENGW 481.
Transferable: CSU; UC
General Education: AA/AS Area I; AA/AS Area VI; CSU Area C2; Cal-GETC Area 3B
(effective Fall 2025); IGETC Area 3B

This course critically examines graphic novels and manga. It explores the social, cultural, and historical contexts reflected in these mixed-media genres, analyzing thematic, character, and structural development and exploring the relationship of image and text in this development. This course typically includes at least five full-length works as well as numerous background readings.

ENGLT 310 English Literature I

Units: 3
Hours: 54 hours LEC
Prerequisite: Eligibility for ENGW 300.
Advisory: ENGW 301, 303, or 481
Transferable: CSU; UC
General Education: AA/AS Area I; AA/AS Area VI; CSU Area C2; Cal-GETC Area 3B
(effective Fall 2025); IGETC Area 3B
C-ID: C-ID ENGL 165

This course surveys representative works in English literature from the post-Confederation period until the present, with consideration of important aspects of English literature. Readings—from a variety of stories, novels, plays, and poetry—and discussion highlight the multicultural nature of American literature and society. Whenever possible, texts are read in their entirety.

ENGLT 312 American Literature II

Units: 3
Hours: 54 hours LEC
Prerequisite: Eligibility for ENGW 300.
Advisory: ENGW 301, 303, or 481
Transferable: CSU; UC
General Education: AA/AS Area I; AA/AS Area VI; CSU Area C2; Cal-GETC Area 3B
(effective Fall 2025); IGETC Area 3B
C-ID: C-ID ENGL 165

This course surveys representative works in English literature from the late eighteenth century through the present, covering the Romantic, Victorian, modernist, and postmodern periods. Prose, poetry, and drama are represented, and whenever possible, works are read in their entirety.

ENGLT 320 American Literature I

Units: 3
Hours: 54 hours LEC
Prerequisite: ENGW 300 with a grade of "C" or better
Advisory: ENGW 301, 303, or 481
Transferable: CSU; UC
General Education: AA/AS Area I; CSU Area C2; Cal-GETC Area 3B
(effective Fall 2025); IGETC Area 3B
C-ID: C-ID ENGL 130

This course surveys representative American literature from the precolonial period to the Civil War and introduces students to a literary tradition born from many languages and ethnicities. Considering a variety of contexts, it examines writing as a device to reflect and create a rapidly changing world marked by political revolution, expanding commerce, and the rise of print culture. Readings—from a variety of fictional and nonfictional texts—and discussion highlight the multicultural nature of American literature and society. Whenever possible, texts are read in their entirety.

ENGLT 321 American Literature II

Units: 3
Hours: 54 hours LEC
Prerequisite: ENGW 300 with a grade of "C" or better
Advisory: ENGW 301, 303, or 481
Transferable: CSU; UC
General Education: AA/AS Area I; AA/AS Area VI; CSU Area C2; Cal-GETC Area 3B
(effective Fall 2025); IGETC Area 3B
C-ID: C-ID ENGL 135

This course surveys representative American literature from the post-Civil War period until the present, with consideration of important aspects of American literary history. Readings—from a variety of stories, novels, plays, and poetry—and discussion highlight the multicultural nature of American literature and society.

ENGLT 327 Literature of California

Units: 3
Hours: 54 hours LEC
Prerequisite: Eligibility for ENGW 300.
Advisory: ENGW 300 or ENGW 480, AND ENGW 301, ENGW 303, or ENGW 481
Transferable: CSU; UC
General Education: AA/AS Area I; AA/AS Area VI; CSU Area C2; Cal-GETC Area 3B
(effective Fall 2025); IGETC Area 3B

This course examines the literature of California in the context of its ethnic, social, political, geographical, and intellectual history. It covers a wide range of multi-ethnic, multicultural, and cross-cultural literature (fiction, non-fiction, poetry, memoirs, essays, and films), such as Native American legends, early California exploration accounts, prose and poetry from the California heartland, and Hollywood crime fiction, with emphasis on what makes the California experience unique.

ENGLT 330 African American Literature

Units: 3
Hours: 54 hours LEC
Prerequisite: Eligibility for ENGW 300.
Transferable: CSU; UC
General Education: AA/AS Area I; AA/AS Area VI; CSU Area C2; Cal-GETC Area 3B
(effective Fall 2025); IGETC Area 3B

This course is a survey of representative African American writers from the slave narratives to the present. This comprehensive literary study includes analysis of significant historical and cultural influences and
relevant critical approaches and contexts in a variety of literary genres. This course is not open to students who have completed ENGLT 486.

**ENGLT 334 Asian-American Literature**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** Eligibility for ENGWR 300.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area I; AA/AS Area VI; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B

This course surveys fiction, drama, poetry, memoirs, and creative nonfiction written by Asian Americans. It focuses on works written by Americans of Chinese, Filipino, Japanese, Hmong, Korean, and Vietnamese descent but also includes the work of other Pan-Asian American writers. This course explores the diaspora and ways in which the experience of being Asian in America has shaped the literature and examine the differences and similarities of these experiences across cultures, generations, genders, and sexuality. Optional field trips may be included.

**ENGLT 335 Latino, Mexican-American, and Chicano Literature**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** Eligibility for ENGWR 300.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area I; AA/AS Area VI; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B

This course explores literature (poetry, short stories, novels, creative nonfiction, and performance) authored by Latino writers. It typically examines the following themes: resistance, survival, identity, homeland, immigration, the border, socio-political activism, gender, and sexuality. All or most of each text is in English. Knowledge of the Spanish language is helpful but not required.

**ENGLT 338 Native American Literature**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** Eligibility for ENGWR 300.  
**Advisory:** ENGWR 300 or ENGWR 480, AND ENGWR 301, ENGWR 303, or ENGWR 481  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area I; AA/AS Area VI; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B

This course examines a range of Native American perspectives as expressed through autobiography, fiction, poetry, and drama. Emphasis is placed on Native authorship. The literature highlights the survival strategies of indigenous cultures in the face of historical and present day colonization. This course examines how Native literature is a reflection of the social and cultural movements that have shaped, been shaped by, and interacted with the Native community. Included are samples of Native literary voices from North, South, and Central America. Field trips may be required.

**ENGLT 340 World Literature I**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** ENGWR 300 or 480 with a grade of "C" or better  
**Advisory:** ENGWR 301 or 481  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area I; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B  
**C-ID:** C-ID ENGL 140

This course surveys world literature in translation from antiquity through the early seventeenth century. In addition to significant works in the Western tradition, masterpieces of non-Western literature are studied. Ancient world cultures and historical movements are introduced, along with methods of literary analysis and research. The entire range of genres is represented and, whenever possible, works are read in their entirety.

**ENGLT 341 World Literature II**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** ENGWR 300 or 480 with a grade of "C" or better  
**Advisory:** ENGWR 301 or 481  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area I; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B  
**C-ID:** C-ID ENGL 145

This course surveys world literature in translation from the late seventeenth century to the present. In addition to significant works in the Western tradition, masterpieces of non-Western literature from Asia, Africa, the Middle East, and Central and South America are studied. The entire range of genres is represented, and, whenever possible, works are read in their entirety.

**ENGLT 345 Mythologies of the World**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** Eligibility for ENGWR 300.  
**Advisory:** ENGWR 300 or ENGWR 480, AND ENGWR 301, ENGWR 303 or ENGWR 481.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area I; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B

This course of mythic literature introduces characters and themes from stories from world literature: creation stories, heroic journeys, and moments of transcendent transformation. It explores the timeless metaphors of these stories, metaphors which continue to not only influence characters and stories in modern literature, but also captivate contemporary readers.

**ENGLT 360 Women in Literature**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** Eligibility for ENGWR 300.  
**Advisory:** ENGWR 300 or ENGWR 480, AND ENGWR 301, ENGWR 303 or ENGWR 481.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area I; AA/AS Area VI; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B

This course examines women as both creators of and characters in literature. It includes reading and analyzing literature from a broad range of periods, genres, and cultures. Works by both men and women are included, with emphasis on works written by women and the social and cultural contexts that produced those works.

**ENGLT 365 Introduction to Gay, Lesbian, Bisexual and Transgender Literature**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** Eligibility for ENGWR 300.  
**Advisory:** ENGWR 300 or ENGWR 480, AND ENGWR 301, ENGWR 303, or ENGWR 481.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area I; AA/AS Area VI; CSU Area C2; Cal-GETC Area 4 (effective Fall 2025); Cal-GETC Area 4, IGETC Area 3B; IGETC Area 4D

This course surveys representative literature concerning gay, lesbian, bisexual, transgender, and queer or questioning (GLBTQ) themes and issues as written by or about GLBTQ people from throughout its literary history to the present day. The comprehensive literary study includes analysis of significant historical and cultural influences.
ENGLT 370 Children and Literature

Units: 3
Hours: 54 hours LEC
Prerequisite: Eligibility for ENGWR 300.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340.
Transferable: CSU
General Education: AA/AS Area I; CSU Area C2
C-ID: C-ID ENGL 180

This course is a survey of high-quality literature, past and present, created for children (ages 0-12), and of the criteria for selecting, evaluating, and discussing children's literature. It includes discussion of the history of children's literature and current issues such as censorship, literacy, multiculturalism, and diversity. This course is intended for prospective teachers, early childhood education (ECE) majors, librarians, parents, those interested in writing or publishing children's books, and those who enjoy children's literature. It includes reading to children.

ENGLT 378 Young Adult Literature

Units: 3
Hours: 54 hours LEC
Prerequisite: Eligibility for ENGWR 300.
Advisory: ENGWR 300 or ENGWR 480, AND ENGWR 301, ENGWR 303 or ENGWR 481.
Transferable: CSU; UC
General Education: AA/AS Area I; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B

This course presents an overview of young adult literature (ages 12-18) and is designed to incorporate the ever-changing nature of this genre. The literature addressed reflects themes of interest to young people. Topics include a review of the history of young adult literature, readings of contemporary award-winning young adult literature, as well as a look at some of the classics from the past. Censorship concerns and culturally diverse selections also form a core part of the course. This course includes an analysis of literary elements, an examination of an author's style and content, and reflection on what makes a piece of literature a classic.

ENGLT 380 Introduction to Shakespeare

Units: 3
Hours: 54 hours LEC
Prerequisite: Eligibility for ENGWR 300.
Advisory: ENGWR 300 or ENGWR 480, AND ENGWR 301, ENGWR 303, or ENGWR 481.
Transferable: CSU; UC
General Education: AA/AS Area I; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B

This course provides an introduction to Shakespeare's works. Six to ten plays, representing the range of Shakespeare's achievement, are covered. Topics include strategies for reading Shakespeare's English, exploration of dramatic genres, and contemporary approaches to interpreting the plays. Viewing of live Shakespearean performances may be required.

ENGLT 382 Introduction to Dramatic Literature

Units: 3
Hours: 54 hours LEC
Prerequisite: Eligibility for ENGWR 300.
Advisory: ENGWR 300 or ENGWR 480, AND ENGWR 301, ENGWR 303 or ENGWR 481.
Transferable: CSU; UC
General Education: AA/AS Area I; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B

This course introduces drama as a type of literature. Plays from various historical periods and cultures are covered, with an emphasis on the analysis of plot, characterization, setting, theme, and other literary elements of drama. Viewing of a live theater production may be required.

ENGLT 392 Science Fiction and Fantasy

Units: 3
Hours: 54 hours LEC
Prerequisite: Eligibility for ENGWR 300.
Advisory: ENGWR 300 or ENGWR 480, AND ENGWR 301, ENGWR 303 or ENGWR 481.
Transferable: CSU; UC
General Education: AA/AS Area I; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B

This course explores the literature of science fiction and fantasy. It includes an exploration of the roots of these genres—the fantastic, the Gothic, terror and horror—and the development of their diverse contemporary forms. Texts may include selections from television, film, anime, short stories, and novels.

ENGLT 403 Film Adaptations

Units: 3
Hours: 54 hours LEC
Prerequisite: Eligibility for ENGWR 300.
Advisory: ENGWR 300 or ENGWR 480, AND ENGWR 301, ENGWR 303 or ENGWR 481.
Transferable: CSU; UC
General Education: AA/AS Area I; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B

This course examines the processes, problems, and successes of adapting literary, stage, and previous film material into films. It discusses faithful and unfaithful adaptations through reading the original texts and viewing the adapted films with an awareness of their historical and cultural contexts. This course analyzes intention, creative distinctions, and the limits and strengths of each medium.

ENGLT 486 Honors African American Literature

Units: 3
Hours: 54 hours LEC
Prerequisite: Eligibility for the Honors Program.
Enrollment Limitation: None.
Transferable: CSU; UC
General Education: AA/AS Area I; AA/AS Area VI; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B

This course is an advanced seminar on African American literature from the slave narratives to the present. This comprehensive literary study includes analysis of significant historical and cultural influences and relevant critical approaches and contexts in a variety of literary genres. In comparison to ENGLT 330, this honors course uses an intensive instructional methodology designed to challenge motivated students and cultivate advanced critical thinking skills. Instruction emphasizes critical thinking in a seminar style, where the focus is on analysis and evaluation of literature and literary theories. Honors students will also develop proficiency in library and Internet-based research, make oral and written presentations, and participate in student-led group discussions. An MLA style research paper is also required. This course is not open to students who have completed ENGLT 330.

ENGLT 494 Topics in Literature

Units: 3
Hours: 54 hours LEC
Prerequisite: ENGWR 300 with a grade of “C” or better
Transferable: CSU
General Education: AA/AS Area I; CSU Area C2

This is a literature course to be scheduled as needed under a title describing specific content. It provides the opportunity to focus on an in-depth study of specific literary subjects or genres. The course offers an extensive study of works by significant writers of literature defined by theme, region, vocation, or human experiences. Possible titles include Retelling Stories or Literature of War.
ENGLT 495 Independent Studies in Literature

Units: 1 - 3  
Hours: 54 - 162 hours LAB  
Prerequisite: None.  
Transferable: CSU

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

ENGLT 499 Experimental Offering in Literature

Units: 0.5 - 4  
Hours: 18 hours LEC  
Prerequisite: ENGW 300 with a grade of "C" or better  
Transferable: CSU

This course will provide a study of a concentrated area of literature. For example, courses might be offered in a particular genre (for example, the sonnet or the fairy tale), author, literary period (for example, the Harlem Renaissance), or theme (for example, The Monster in Literature). Individual course descriptions are provided in the class schedule.

English - Reading (ENGRD) Courses

ENGRD 15 Strategic Reading

Units: 3  
Hours: 54 hours LEC  
Prerequisite: None.

This is a multifaceted course meant to engage all aspects of foundational reading skills. Topics include vocabulary strategies, textbook comprehension, and study skills, all of which can be applied to other courses. This course is not open to students who have successfully completed ENGRD 56 or ENGW 56.

ENGRD 111 Reading Across the Disciplines: Academic and Professional Development

Units: 0.5  
Hours: 9 hours LEC  
Prerequisite: None.  
Corequisite: Enrollment in a below transfer-level course.

This Reading Across the Disciplines (RAD) course offers reading skills to students as they apply to various below transfer-level courses. Topics include annotating, vocabulary development, schema building, and other strategies to increase reading focus and retention. Pass/No Pass only.

ENGRD 116 Preparation for Academic Study

Units: 3  
Hours: 54 hours LEC  
Prerequisite: None.

This course analyzes expository and argumentative essays, textbooks, and literature in preparation for ENGRD 310 and other transfer-level classes across the disciplines. It emphasizes recognition of an author's thesis, supporting details, point of view, purpose, and tone through an in-depth analysis of an essay's structure. This course also focuses on the application of study strategies for comprehending and retaining information from textbooks in preparation for tests.

ENGRD 117 Reading Center: Individualized Support Skills for ENGRD 116

Units: 0.5  
Hours: 9 hours LEC  
Prerequisite: None.  
Corequisite: Concurrent enrollment in ENGRD 116.

This course offers instruction in intermediate reading skills. It provides supplementary practice to students who are concurrently enrolled in ENGRD 116. Pass/No Pass only.

ENGRD 299 Experimental Offering in English - Reading

Units: 0.5 - 4  
Prerequisite: None.

This is the experimental courses description.

ENGRD 310 Critical Reading as Critical Thinking

Units: 3  
Hours: 54 hours LEC  
Prerequisite: None.  
Advisory: Concurrent enrollment in ENGW 300.  
Transferable: CSU  
General Education: AA/AS Area II(b); CSU Area A3

This course covers the theory and practice of critical and speed reading skills needed for successful academic performance with an emphasis on the following: (1) critical and analytical evaluation of college-level expository and argumentative essays, (2) development of flexible reading rate and speed, (3) critical analysis and evaluation of independent research, (4) vocabulary development, and (5) application of these skills to multicultural essays, journals, fiction, and nonfiction reading.

ENGRD 312 Academic Texts and the Self

Units: 3  
Hours: 54 hours LEC  
Prerequisite: None.  
Transferable: CSU  
General Education: AA/AS Area II(b)

This course focuses on the relationship between individuals and various academic texts as a tool for improving reading self awareness, overall retention, and learning. Reading strategies for analyzing authors' intended purposes and individual reader's responses will be discussed as well as how life experience, cultural differences, and discipline-specific communication all play a part in the understanding and processing of academic texts across the disciplines.

ENGRD 314 Reading Across the Disciplines: Speed Reading

Units: 1  
Hours: 18 hours LEC  
Prerequisite: None.  
Transferable: CSU

This course offers reading skills to transfer-level students as applied to various content-area courses. Topics include the following: assessing the reading process and material to employ appropriate strategies to meet the purpose for reading, utilizing one's reading rates and styles based
on purpose and material; utilizing college-level, discipline-based vocabulary; and mastering the skills needed to critically read and analyze current and future transfer-level course texts. Pass/No Pass only.

**ENGRD 315 Reading Across the Disciplines for Content Courses**

Units: 0.5 - 1  
Hours: 9 - 18 hours LEC  
Prerequisite: None.  
Corequisite: Another transfer-level content-area course  
Transferable: CSU

This course offers reading skills to students as they apply to various content-area courses. Topics include the principles of the reading process, analysis of discipline-specific reading assignments, strategies for retention, and research strategies particular to the chosen discipline. Students should contact the RAD center before enrolling. Pass/No Pass only.

**ENGRD 316 Reading Across the Disciplines for Content Courses II**

Units: 0.5  
Hours: 9 hours LEC  
Prerequisite: ENGRD 315  
Transferable: CSU

This course offers individualized or small-group sessions to help students who have already completed ENGRD 315 improve classroom performance. It focuses on application of inferential and critical reading strategies and study skills to specific content classes and programs. Topics include learning style assessment, how to implement appropriate reading strategies, and how to choose the best study methods. Students must come to the RAD Center and meet with a RAD staff member before enrolling. Pass/No Pass only.

**ENGRD 495 Independent Studies in English - Reading**

Units: 1 - 3  
Hours: 54 - 162 hours LAB  
Prerequisite: None.  
Transferable: CSU

Independent Study is an opportunity for the student to extend classroom experience in Reading, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in Reading and secure approval. Only one independent study for each catalog course will be allowed.

**ENGRD 499 Experimental Offering in English - Reading**

Units: 0.5 - 4  
Prerequisite: None.  
Transferable: CSU

This is the experimental courses description.

**English - Writing (ENGWR) Courses**

**ENGWR 50 Developmental Composition**

Units: 3  
Hours: 54 hours LEC  
Prerequisite: None.

Corequisite: Concurrent enrollment in ENGWR 95 or ENGWR 96.  
Advisory: BUSTEC 300.1

This course focuses on developmental writing skills, emphasizing the connection between writing and reading with the goal of building fluency. It includes writing in response to assigned readings as well as practicing the writing process: prewriting, thesis development and organization of ideas, drafting of essays, and revision.

**ENGWR 56 Integrated Reading, Writing and Study Skills**

Units: 6  
Hours: 108 hours LEC  
Prerequisite: ENGRD 14 (Reading Skills) with a grade of "C" or better; or 1.5 units of ENGRD 54 with a grade of "P" AND ENGRD 55 with a grade of "P"; or placement through the assessment process  
Advisory: CISC 100 with a grade of "C" or better, or equivalent skill level.

This course emphasizes the interrelationships among reading, writing, and study skills at the basic skills level. Course content, activities, and assignments integrate all three areas, providing opportunities to improve reading and writing skills in a student-centered environment. This course provides students with ongoing practice with the reading and writing processes and covers strategies for reading and writing in response to a variety of texts. Additional topics include a review of campus services and programs and effective study strategies. This is a learning community course taught by one reading and one writing instructor. Completing this course is equivalent to completing both ENGRD 15 and ENGRD 50. This course is not open to students who have already completed ENGRD 15, ENGRD 50, ENGRD 51, or ENGRD 56 with a grade of "C" or better.

**ENGWR 94 Succeeding in College Composition**

Units: 2  
Hours: 36 hours LEC  
Prerequisite: None.  
Corequisite: Concurrent enrollment in ENGWR 300.

This course offers small- and large-group instruction on writing processes, writing strategies, and critical thinking skills necessary for success in ENGWR 300 (College Composition). Assignments are connected to the students' ENGWR 300 coursework. It covers drafting, revision, and editing processes. Pass/No Pass only.

**ENGWR 95 Beginning Writing Across the Curriculum (WAC)**

Units: 0.5  
Hours: 9 hours LEC  
Prerequisite: None.  
Advisory: BUSTEC 300.1 or CISC 300

This course offers both individualized and group instruction in appropriate writing processes and strategies for a variety of basic written assignments in all academic disciplines. Topics include understanding writing assignments, strategies for revision, and proofreading. Pass/No Pass only.

**ENGWR 96 Intermediate Writing Across the Curriculum (WAC)**

Units: 0.5  
Hours: 9 hours LEC  
Prerequisite: None.  
Advisory: BUSTEC 300.1 or CISC 300

This course offers both individualized and group instruction in appropriate writing processes and strategies for a variety of college-level writing assignments in all academic disciplines. Topics include understanding writing assignments, strategies for revision, and basic documentation. Pass/No Pass only.
ENGWR 101 College Writing

Units: 4  
Hours: 72 hours LEC  
Prerequisite: ENGWR 50 with a grade of "C" or better, or placement through the assessment process.

This course focuses on the connections between critical thinking, writing, and reading that are necessary for the independent development of essays in ENGWR 300 and other transfer-level courses. It emphasizes writing in response to various reading selections, including at least one full-length work. The essay writing process includes prewriting, thesis development and organization of ideas, drafting of essays, and revision. The course also requires outside research and includes an introduction to basic formatting and referencing of sources using MLA-style documentation. Written final drafts totaling at least 4,500 words are required.

ENGWR 299 Experimental Offering in English - Writing

Units: 0.5 - 4  
Prerequisite: None.

This is the experimental courses description.

ENGWR 300 College Composition

Units: 3  
Hours: 54 hours LEC  
Prerequisite: ESL 325 with a grade of "C" or better, or placement through the assessment process.  
Advisory: Concurrent enrollment in ENGRD 310 OR ENGRD 312 or ENGWR 306.  
Transferable: CSU; UC  
General Education: AA/AS Area II(a); CSU Area A2; IGETC Area 1A  
C-ID: C-ID ENGL 100

This first-year writing course includes the reading, research, synthesis, and critical thinking skills essential for successful completion of a college program. Students will develop college-level writing skills as well as an awareness of their audience and individual writing voices through a variety of written assignments (5,000 written words). The course will emphasize workshop, collaboration, and reflection on the writer's process. This course satisfies the writing competency requirement for graduation. This course is not open to students who have successfully completed ENGWR 480.

ENGWR 301 College Composition and Literature

Units: 3  
Hours: 54 hours LEC  
Prerequisite: ENGWR 300 or 480 with a grade of "C" or better  
Transferable: CSU; UC  
General Education: AA/AS Area II(b); CSU Area A3; CSU Area C2; Cal-GETC Area 1B (effective Fall 2025); Cal-GETC Area 3B (effective Fall 2025); IGETC Area 1B; IGETC Area 3B  
C-ID: C-ID ENGL 120

This course offers study of literary texts, with emphasis on analytical reading and writing. It covers principles of argument and analysis, such as reasoning inductively and deductively. Assigned texts include novels, short stories, poems, plays or films, and literary criticism. Writing assignments (6,000 words minimum) emphasize close reading skills, interpretation and analysis of creative works. At least one essay includes citations from secondary sources, documented in current MLA format. This course is not open to students who have successfully completed ENGWR 481.

ENGWR 302 Advanced Composition and Critical Thinking

Units: 3  
Hours: 54 hours LEC  
Prerequisite: ENGWR 300 or 480 with a grade of "C" or better  
Advisory: ENGRD 310 or 312  
Transferable: CSU; UC  
General Education: AA/AS Area II(b); CSU Area A3; Cal-GETC Area 1B (effective Fall 2025); IGETC Area 1B  
C-ID: C-ID ENGL 105

This course develops analytical skills through writing and discussion. It examines methods by which people are persuaded to think, believe, and act. It also includes analyses of arguments or expressions of opinions for their validity and soundness. Assigned readings include a variety of essays and a book-length text. In addition, this course focuses on critically assessing, developing, and effectively expressing and supporting opinions. Essays written for the course (5,000 words minimum) draw from the texts to present carefully reasoned arguments. At least one essay includes citations from secondary sources, documented according to current MLA format. This course is not open to students who have successfully completed ENGWR 482.

ENGWR 303 Argumentative Writing and Critical Thinking Through Literature

Units: 4  
Hours: 72 hours LEC  
Prerequisite: ENGWR 300 or 480 with a grade of "C" or better  
Transferable: CSU; UC  
General Education: AA/AS Area II(b); CSU Area A3; Cal-GETC Area 1B (effective Fall 2025); IGETC Area 1B  
C-ID: C-ID ENGL 105; C-ID ENGL 110; C-ID ENGL 120

This course emphasizes complex literary works in all major genres with a conscious inclusion of writers representing Black, African American, Latinx, Native American, Asian American and Pacific Islander, and LGBTQIA+ communities. This course also focuses on analytical, critical, and argumentative writing; critical thinking; research strategies; information literacy; and proper documentation. Close reading skills and the aesthetic qualities and elements of literature are studied alongside the cultural contexts of literary texts. A minimum of 5000 words of formal writing is required.

ENGWR 304 Advanced Writing in the Disciplines (WID)

Units: 0.5 - 1  
Hours: 9 - 18 hours LEC  
Prerequisite: None.  
Transferable: CSU

This course offers small and large group instruction on the writing processes and writing strategies necessary to compose academic essays and reports that follow the guidelines and requirements of a specific discipline. Additionally, approaches to composing longer, more complex writing tasks following a discipline's style are taught. Topics vary according to need and may include the principles of the writing process, analysis of discipline-specific writing assignments, strategies for revision, and research and documentation skills such as APA or MLA. In order to take this course, students must be enrolled in at least one other transfer-level course. Pass/No Pass only.

ENGWR 306 Advanced Writing Across the Curriculum (WAC)

Units: 0.5  
Hours: 9 hours LEC  
Prerequisite: None.  
Transferable: CSU

This course offers individualized and small-group instruction focused on helping students from all academic disciplines apply appropriate writing processes and use transfer-level writing strategies required for academic composition. Topics vary according to need and may include the principles of the writing process, analysis of writing assignments, strategies for revision, and research and documentation skills. In order to take this course, students must be enrolled in at least one other transfer-level course. Pass/No Pass only.
ENGWR 360 Writing in the Disciplines: Composing Essays in History

Units: 0.5 - 1
Hours: 9 - 18 hours LEC
Prerequisite: None.
Transferable: CSU

This course offers small and large group instruction on the writing processes and writing strategies necessary to compose academic essays and reports that follow the guidelines and requirements of the courses in the social science disciplines. Additionally, approaches to composing longer, more complex writing tasks following the styles of one or more disciplines in this area are covered. Topics include the principles of the writing process, analysis of discipline-specific writing assignments, strategies for revision, and research and documentation skills such as APA or Chicago style. In order to take this course, students must be concurrently enrolled in at least one transfer-level social science course, such as Psychology or Sociology. Pass/No Pass only.

ENGWR 361 Writing in the Disciplines: Composing Essays in the Social Sciences

Units: 0.5 - 1
Hours: 9 - 18 hours LEC
Prerequisite: None.
Transferable: CSU

This course offers small and large group instruction on the writing processes and writing strategies necessary to compose academic essays and reports that follow the guidelines and requirements of the courses in the social science disciplines. Additionally, approaches to composing longer, more complex writing tasks following the styles of one or more disciplines in this area are covered. Topics include the principles of the writing process, analysis of discipline-specific writing assignments, strategies for revision, and research and documentation skills such as APA or Chicago style. In order to take this course, students must be concurrently enrolled in at least one transfer-level social science course, such as Psychology or Sociology. Pass/No Pass only.

ENGWR 362 Writing in the Disciplines: Composing Essays in English

Units: 0.5 - 1
Hours: 9 - 18 hours LEC
Prerequisite: None.
Transferable: CSU

This course offers instruction on the writing processes and writing strategies necessary to compose academic essays. It includes an examination of the rationale for using a process-based approach to writing as well as specific writing strategies for prewriting, conducting and using research, drafting, revising, editing, and composing metacognitive reflections.

ENGWR 480 Honors College Composition

Units: 3
Hours: 54 hours LEC
Prerequisite: Placement into the course through the assessment process.
Transferable: CSU; UC
General Education: AA/AS Area II(a); CSU Area A2; Cal-GETC Area 1A (effective Fall 2025); IGETC Area 1A
C-ID: C-ID ENGL 100

This honors composition course focuses on reading, writing, and critical thinking skills that extend past those developed in a traditional composition course. This rigorous course requires the analysis of complex short works along with at least one full-length volume of non-fiction. It emphasizes the writing of carefully reasoned, stylistically sophisticated essays, at least one of which includes research and appropriate MLA documentation. Written work should demonstrate a nuanced view of writing situation and purpose. Essays written in this course will total at least 6,500 words. The course also emphasizes presentation of independent and collaborative research. This course is not open to students who have successfully completed ENGWR 300.

ENGWR 481 Honors College Composition and Literature

Units: 3
Hours: 54 hours LEC
Prerequisite: ENGWR 480 with a grade of "C" or better; OR ENGWR 300 with a grade of "C" or better.
Transferable: CSU; UC
General Education: AA/AS Area II(b); CSU Area A3; Cal-GETC Area 1B (effective Fall 2025); IGETC Area 1B
C-ID: C-ID ENGL 120

This course is an advanced seminar in critical reading and writing about literature. Focused on complex, in-depth reading assignments, it develops the analytic skills needed to examine fiction, poetry, and drama, expanding on those covered in a traditional ENGWR 301 course. This course includes culturally responsive texts representing diverse perspectives and cultures. It covers inductive and deductive reasoning about literature and the written analysis of literature, requiring at least 6,500 words of formal, analytical writing. This course also examines literary theory and research, the use of primary and secondary sources, and MLA documentation. This course is not open to students who have successfully completed ENGWR 301.

ENGWR 482 Honors Advanced Composition and Critical Thinking

Units: 3
Hours: 54 hours LEC
Prerequisite: ENGWR 480 (Honors College Composition) with a grade of "C" or better; OR ENGWR 300 with a grade of "C" or better.
Transferable: CSU; UC
General Education: AA/AS Area II(b); CSU Area A3; Cal-GETC Area 1B (effective Fall 2025); IGETC Area 1B
C-ID: C-ID ENGL 105

This is an honors course in critical reasoning, reading, and writing, requiring skills that extend beyond a traditional ENGWR 302 course. Complex texts—essay and book-length works—reflecting a variety of social, cultural, and historical contexts are read, discussed, and analyzed. Although this course focuses primarily on non-fictional texts, selected works of fiction may be included. This course focuses on the writing of formal academic essays which include primary and secondary research; MLA format is required for all essays, and a minimum of 6,500 words is required for the course. Group and individual presentations are required; at least one essay assignment requires independent reading. This course is not open to students who have successfully completed ENGWR 302.

ENGWR 495 Independent Studies in English - Writing

Units: 1 - 3
Hours: 54 - 162 hours LAB
Prerequisite: None.
Transferable: CSU

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

ENGWR 499 Experimental Offering in English - Writing

Units: 0.5 - 4
Prerequisite: None.
Transferable: CSU
This is the experimental courses description.
HomeBases

HomeBase Pathway Communities are dedicated and welcoming spaces where students pursuing related majors/programs have personalized access to a Success Team of counselors, peer mentors, coaches, and faculty liaisons. The Success Teams are committed to ensuring students get the support needed to complete their academic program while also enjoying a sense of community and belonging.

Still deciding on a major? Explore HomeBase Pathway Communities to learn more about your options.

Arts
Cultivate your creativity! Explore the arts and find a career aligned with your innate creative fire.

English Course Sequence

English Composition Classes

Path 1: ENGWR 300 Placement

First Semester
• Enroll in one of the following:
  • ENGWR 300: College Composition (a stand-alone transfer-level class)
  • ENGWR 480: Honors College Composition (part of the ARC Honors Transfer Certificate program)
    Both courses satisfy AA/AS graduation, CSU GE A2, and IGETC 1A requirements, and earn you three (3) units.
• Students often benefit from additional support in ENGWR 306: Writing Across the Curriculum (WAC).

Second Semester
• Enroll in one of the following:
  • ENGWR 301: College Composition and Literature
  • ENGWR 302: Advanced Composition and Critical Thinking
  • ENGWR 303: Argumentative Writing and Critical Thinking Through Literature
  • ENGWR 481: Honors College Composition and Literature (part of the ARC Honors Transfer Certificate program)
  • ENGWR 482: Honors Advanced Composition and Critical Thinking (part of the ARC Honors Transfer Certificate program)
    These courses meet AA/AS graduation requirements, satisfy CSU GE A3 and IGETC GE 1B areas, and can be used to complete the English Associate Degree for Transfer.

Path 2: ENGWR 94/300 Combo Placement

First Semester
Students take a combination of courses designed to ensure their success.
• Enroll in ENGWR 300: College Composition (a transfer-level writing class) and ENGWR 94: Succeeding in College Composition (which provides the tools and time to succeed in the core transfer-level class)
  • Each ENGWR 94 has its own required section of ENGWR 300. Together, these courses satisfy AA/AS graduation, CSU GE A2, and IGETC 1A requirements and earn you five (5) units.

Second Semester
• Enroll in one of the following:
  • ENGWR 301: College Composition and Literature
  • ENGWR 302: Advanced Composition and Critical Thinking
  • ENGWR 303: Argumentative Writing and Critical Thinking Through Literature
  • ENGWR 481: Honors College Composition and Literature (part of the ARC Honors Transfer Certificate program)
  • ENGWR 482: Honors Advanced Composition and Critical Thinking (part of the ARC Honors Transfer Certificate program)
    These courses meet AA/AS graduation requirements, satisfy CSU GE A3 and IGETC GE 1B areas, and can be used to complete the English Associate Degree for Transfer.
List of Programs
Accounting

This degree focuses on preparation for careers in various accounting professions. It develops a common foundation in accounting and business, and provides various courses covering both fundamental and specialized accounting topics to meet individual career goals.

The Accounting Certificate provides occupational training and preparation for entry-level clerical and technical positions in various accounting careers. It provides a strong background in fundamental accounting concepts and typical accounting computer applications. In addition, it provides various specialized accounting topics to meet individual career goals.

Degrees and Certificates Offered

A.A. in Accounting
Accounting Clerk Certificate
Financial Services Apprenticeship Certificate
Taxation Certificate

Division Dean Kirsten Corbin
Department Chair Joel Halle
Phone (916) 484-8361

Associate Degree

A.A. in Accounting

This degree focuses on preparation for careers in various accounting professions. It develops a common foundation in accounting and business, and provides various courses covering both fundamental and specialized accounting topics to meet individual career goals.

Total Units: 36

The Accounting Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- evaluate and perform all steps in the financial accounting cycle.
- compile and analyze costs within a company.
- analyze and communicate appropriate information to managers, investors, creditors, and other interested parties utilizing a variety of reports.
- audit financial statements and express appropriate opinions on those statements.
- integrate the principles of business, business law, ethics, and economics into accounting functions.
- apply accounting standards and techniques to one or more specialized areas of accounting.

Career Information

This degree is designed for a variety of student objectives. It includes courses required for immediate employment in accounting positions. The courses meet the requirements of governmental employers for promotional exams. Students seeking transfer to four-year universities will meet the transfer requirements of financial accounting (ACCT 301) and managerial accounting (ACCT 311). Individuals with existing bachelor’s degrees can also use these courses to meet the requirements to take the exam for Certified Public Accountant.

Certificates of Achievement

Accounting Clerk Certificate

This certificate provides fundamental occupational training and preparation for entry-level accounting clerk positions. The program includes basic accounting and specialized courses designed for the accounting workplace, including small business accounting, technology, and basic business principles.

Total Units: 45 - 45.5

**Enrollment Eligibility**

To be eligible for enrollment in the program, the student must meet the following criteria:

- At least 18 years of age.
- Meets the requirements under the selection procedures of participating California state agencies.
- Engaged in learning a designated occupation and who has entered into a written apprentice agreement to participate in an apprenticeship program for a designated occupation under Department of Apprenticeship Standards’ File No. 100451. Apprentice agreement must be approved by the apprenticeship committee.
Enrollment Process
Eligible students are selected for the program according to the following steps:

• Apprentice selection process - Facilitated by the Joint Apprenticeship Committee (JAC): Application, aptitude assessment, interview with JAC and participating department, selection and confirmation, apprentice and department notification, signing ceremony.

Student Learning Outcomes
Upon completion of this program, the student will be able to:

• describe the components of the conceptual framework for financial accounting and reporting, including the qualitative characteristics of accounting information, the assumptions underlying accounting, the basic principles of financial accounting, and the constraints and limitations on accounting information.

• apply transaction analysis, input transactions into the accounting system, process this input, and prepare and interpret the four basic financial statements.

• define and illustrate various cost terms, concepts, and behaviors, and evaluate their relevance for different decision-making purposes.

• compare, contrast, and apply different costing methods.

• explain the purposes of budgeting, prepare a master budget and its component schedules, and relate the budget to planning and control.

• examine the role of cost accounting in business planning and decision-making.

• differentiate between, account for, and report product and period costs.

• use costs to make pricing and other types of business decisions.

• examine the concepts, principles, and practices of financial accounting, including discussion of Generally Accepted Accounting Principles (U.S. GAAP) and International Financial Reporting Standards (IFRS) on selected topics.

• prepare financial statements and related disclosures, including classified balance sheets, multiple step income statements with presentation of discontinued operations, extraordinary items, and accounting changes.

• analyze and account for complex business transactions.

• analyze the six principles of the American Institute of Certified Public Accountants (AICPA) Code of Professional Conduct.

• assess the various components of audit risk.

• evaluate the structure of audit working papers documentation.

• compare and contrast the three methods of documenting and assessing internal controls.

• identify, select, and use appropriate writing aids, references, and Internet resources used in business writing.

• prepare documents that exhibit a clear understanding of the essentials of sentence structure, word usage, punctuation, spelling, critical thinking, and business vocabulary.

• define and explain important legal principles and analyze how they affect business and personal issues.

• assess the reading process and materials to employ appropriate critical reading strategies.

Career Information
Training for the following California state occupations: (1) Tax Examiners, Collectors, and Revenue Agents, (2) Accountants, (3) Auditors.

Taxation Certificate
This certificate provides occupational training and education in the areas of individual and business income tax preparation and consulting. Courses in this program provide a background in individual, corporate, partnership, and estate taxes.

Total Units: 14

Student Learning Outcomes
Upon completion of this program, the student will be able to:

• complete federal and California individual income tax returns.

• prepare federal and California corporate and partnership income tax returns.

• prepare federal estate, gift, and trust tax returns.

• research federal and state tax issues.

• identify elements to utilize for tax planning.

Accounting (ACCT) Courses

ACCT 101 Fundamentals of College Accounting

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: BUS 105, MATH 100, MATH 104, or MATH 132; AND eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300, OR ESLW 340.

This introductory course in small business accounting covers the accounting cycle for service and merchandising businesses. Topics include the general journal, the general and subsidiary ledgers, and adjusting, correcting, and closing journal entries. Income statements, statements of owner equity, balance sheets for service and merchandising businesses are prepared and analyzed. Additional topics include cash management and bank reconciliations, accounting for sales and purchase discounts, sales taxes, merchandise inventory, and payroll.

ACCT 103 Intermediate Accounting - Part I

Units: 4
Hours: 72 hours LEC
Prerequisite: ACCT 301 with a grade of “C” or better
This course continues the study and application of accounting principles and techniques used in preparing and reporting the financial results of business corporations. Areas of study include cash and receivables, inventory, long-term assets, and analysis of time value of money.

**ACCT 104 Intermediate Accounting - Part II**

**Units:** 4  
**Hours:** 72 hours LEC  
**Prerequisite:** ACCT 103 with a grade of "C" or better

This course continues the study and application of accounting principles and techniques used in preparing and reporting the financial results of business corporations. Areas of study include liabilities and contingencies, stockholders’ equity and earnings per share, investments, revenue recognition, income taxes, pensions, leases, accounting changes and error analysis, and cash flows.

**ACCT 107 Auditing**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** ACCT 104 with a grade of "C" or better  
**Advisory:** BUS 105 or MATH 100, 104 or 132; AND eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300, OR ESLR 340 AND ESLW 340.

This course on auditing practice and theory emphasizes attestation audits of financial statements and the accompanying footnotes. Topics include Generally Accepted Auditing Standards (GAAS), ethics, legal issues, audit planning and methodology, internal control analysis, sampling, and auditors' reports. Additional topics include specific auditing objectives and tests of assets, liabilities, equity, revenues, and expenses.

**ACCT 111 Cost Accounting**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** ACCT 311 with a grade of "C" or better  
**Advisory:** CISA 315

This course covers advanced managerial accounting. Topics include recording, classifying, reporting, and analyzing costs as well as examining different costing systems. It focuses on understanding costs, appropriate accounting for them, and using them to analyze, plan, operate, and evaluate manufacturing, merchandising, and service businesses. It utilizes the industry-standard software, Excel, to do so.

**ACCT 121 Payroll Accounting**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** ACCT 101 or 301 with a grade of "C" or better

This course covers current practices in payroll accounting and tax reporting, including federal and state laws that affect payroll records and reports. Topics include both manual and computer payroll systems with hands-on computer applications.

**ACCT 125 Federal and State Individual Taxation**

**Units:** 4  
**Hours:** 72 hours LEC  
**Prerequisite:** None.  
**Advisory:** ACCT 101 or 301; AND eligible for ENGRD 116; ENGWR 101; ESL 325

This course covers basic Federal and State Income Tax regulations with an emphasis on the skills necessary for the preparation of individual income tax returns. Topics include filing requirements, determination of taxable income, allowable deductions, tax computation, tax credits, other taxes, payment methods, and audit procedures.

**ACCT 128 Taxation of Corporations, Partnerships, Estates, and Trusts**

**Units:** 4  
**Hours:** 72 hours LEC  
**Prerequisite:** ACCT 125 and 301 with grades of "C" or better

This course provides a continuing study of federal income tax compliance with an emphasis on the taxation of business entities including corporations, partnerships, limited liability companies, S-corporations, estates, and trusts. Topics include tax and non-tax characteristics of business entities, income tax filing requirements, differences in book and taxable income, selection of accounting methods and periods, tax computation, and available credits.

**ACCT 153 Governmental Accounting**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** ACCT 301 with a grade of "C" or better  
**Advisory:** BUS 105 or MATH 100 or 132

This course covers accounting and financial reporting for governmental units and institutions with emphasis on the accounting standards prescribed by the Governmental Accounting Standards Board (GASB). Additional topics include governmental budgeting and budgetary controls.

**ACCT 295 Independent Studies in Accounting**

**Units:** 0.5 - 4  
**Hours:** 54 - 162 hours LAB  
**Prerequisite:** None.

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

**ACCT 299 Experimental Offering in Accounting**

**Units:** 0.5 - 4  
**Prerequisite:** None.

This is the experimental courses description.

**ACCT 301 Financial Accounting**

**Units:** 4  
**Hours:** 72 hours LEC  
**Prerequisite:** None.  
**Advisory:** ACCT 101; AND BUS 105 or MATH 100, or 132; AND eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300, OR ESLR 340 AND ESLW 340.  
**Transferable:** CSU; UC  
**C-ID:** C-ID ACCT 110

This course covers accounting as an information system, examining why it is important and how it is used by investors, creditors, and others to make decisions. Topics include the accounting information system, including recording and reporting of business transactions with a focus on the accounting cycle, the application of generally accepted accounting principles, the financial statements, and statement analysis. It also covers issues relating to asset, liability, and equity valuation, revenue and expense recognition, cash flow, internal controls, and ethics.
ACCT 311 Managerial Accounting
Units: 4
Hours: 72 hours LEC
Prerequisite: ACCT 301 with a grade of "C" or better
Transferable: CSU; UC
C-ID: C-ID ACCT 120

This course covers how managers use accounting information in decision-making, planning, directing operations, and controlling. It focuses on cost terms and concepts, cost behavior, cost structure, and cost-volume-profit analysis. Topics include issues relating to cost systems, cost control, profit planning, and performance analysis in manufacturing, merchandising, and service environments.

ACCT 341 Computerized Accounting
Units: 3
Hours: 54 hours LEC
Prerequisite: ACCT 101 or 301 with a grade of "C" or better
Advisory: CISC 100 or 300
Transferable: CSU

This course covers major areas of computerized accounting system for small business using QuickBooks Online (QBO). Topics include setting up a new company in QBO, creating a chart of accounts, banking, recording customer and vendor transactions, using QBO inventory tracking, paying employees, making adjusting entries, and generating financial and management reports for service and merchandising businesses. This course provides students with hands-on experience in using QBO and prepares students to take Intuit certified QB certification exam.

ACCT 343 Computer Spreadsheet Applications for Accounting
Units: 2
Hours: 27 hours LEC; 27 hours LAB
Prerequisite: None.
Advisory: CISA 315; ENGRD 116 OR ESLQ 320 and ESLW 320; ESLL 320; MATH 100, 104, 132 or BUS 105
Transferable: CSU

This course combines the study of accounting and computer spreadsheets. Projects include topics in financial accounting, managerial accounting, and financial analysis. The course focuses on accuracy, clarity, creativity, adaptability, and presentation skills.

ACCT 361 Ethics, Fraud, and Legal Issues for Accountants
Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: ACCT 107 and 301
Transferable: CSU

This course explores ethics, fraud, and legal issues that must be addressed by accountants, including exploration through case studies. Topics in ethics include ethical foundations as well as the unique ethical requirements of professional organizations and the California Board of Accountancy. The course also examines the legal liability of accountants. A variety of case studies are evaluated to gain perspective into ethical lapses, fraud, and legal liability.

ACCT 495 Independent Studies in Accounting
Units: 1 - 3
Hours: 54 - 162 hours LAB
Prerequisite: None.
Transferable: CSU

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

ACCT 498 Work Experience in Accounting
Units: 0.5 - 4
Hours: 30 - 300 hours LAB
Prerequisite: None.
Enrollment Limitation: Students must be in a paid or unpaid internship, volunteer position, or job related to accounting with a cooperating site supervisor. Students are advised to consult with the Accounting Department faculty to review specific certificate and degree work experience requirements.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.
Transferable: CSU
General Education: AA/AS Area III(b)

This course provides students with opportunities to develop marketable skills in preparation for employment or advancement within the field of accounting. It is designed for students interested in work experience and/or internships in transfer-level degree occupational programs. Course content includes understanding the application of education to the workforce, completion of Title 5 required forms which document the student's progress and hours spent at the work site, and developing workplace skills and competencies.

During the semester, the student is required to complete 37.5 hours of related paid work experience, or 30 hours of related unpaid work experience for 0.5 unit. An additional 37.5 or 30 hours of related work experience is required for each additional 0.5 units. All students are required to attend the first class meeting, a mid-semester meeting, and a final meeting. Additionally, students who have not already successfully completed a Work Experience course will be required to attend weekly orientations while returning participants may meet individually with the instructor as needed. Students may take up to 16 units total across all Work Experience course offerings. This course may be taken up to four times when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

ACCT 499 Experimental Offering in Accounting
Units: 0.5 - 4
Prerequisite: None.
Transferable: CSU

This is the experimental courses description.

Property Tax (PROPTX) Courses

PROPTX 310 Introduction to Appraising for Property Tax Purposes
Units: 1.5
Hours: 30 hours LEC
Prerequisite: None.
Advisory: MATH 100, 104, or 132; AND eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300, OR ESLQ 340 AND ESLW 340.
Transferable: CSU

This course introduces the basic principles of property tax appraisal. It covers the economic aspects and legal definitions of market value, California Property Tax Laws and Regulations, the appraisal process, and methods of valuation. It is designed to meet the California Board of Equalization training requirements for county property tax appraisers.
PROPTX 311 Appraisal of Machinery & Equipment for Property Tax Purposes

Units: 1.5
Hours: 32 hours LEC
Prerequisite: None.
Advisory: PROPTX 110; AND MATH 100, 104, or 132; AND eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300, OR ESLR 340 AND ESLW 340.

Transferable: CSU

This course covers the principles of property tax appraisal for tax assessment of personal property and fixtures. Topics include the economic aspects and legal definitions of market value, California Property Tax Laws and Regulations, the appraisal process, and methods of valuation. It is designed to meet the California Board of Equalization training requirements for county property tax auditor-appraisers and appraisers.
English as a Second Language

General Information

American River College offers courses in English as a Second Language (ESL) that are designed exclusively to provide non-native speakers of English with a command of the language necessary to pursue career, transfer and degree goals. Students whose native language is English but who need help with language fundamentals should seek courses offered in the English Department.

We offer over 75 sections at eight different levels, from novice to advanced. There are five different types of courses:

- ESL (integrated Reading & Writing courses)
- ESLG (Grammar courses)
- ESLL (Listening & Speaking courses)
- ESLLAB (ESL assistance and courses in the ESL Center)
- ESL W (Writing)

Some of our courses are taught as hybrid classes (half in the classroom and half online) or completely online. We have classes at our Natomas Center in addition to our main campus.

Our students come from all over the world. Our largest language groups include Dari/Farsi, Arabic, Ukrainian and Russian as well as Spanish and Pashto. However, at any given time we have students from more than thirty different countries, speaking more than thirty different languages.

Our faculty is also diverse. Many of us have lived and taught in other countries and speak more than one language. We are united in our love of teaching ESL. American River College is a great place to be. Come and visit us. Our ESL Department webpage (https://arc.losrios.edu/academics/english-as-a-second-language-department) has links and help for students about the Remote Assessment test, Certificates of Proficiency, Prerequisite challenges, and the ELLIS club.

Certificates Offered

Advanced Proficiency Certificate in English as a Second Language Certificate
Guided Pathways Milestone Certificate for Multilingual Speakers: Pathway to Business Technology Certificate
Guided Pathways Milestone Certificate for Multilingual Speakers: Pathway to Computer Info Science Certificate
Guided Pathways Milestone Certificate for Multilingual Speakers: Pathway to Culinary Arts Certificate
Guided Pathways Milestone Certificate for Multilingual Speakers: Pathway to Early Childhood Education Certificate
Intermediate-High Proficiency in English as a Second Language Certificate
Intermediate-Low Proficiency in English as a Second Language Certificate
Intermediate-Mid Proficiency in English as a Second Language Certificate

Dean (Interim) Corinne Arrieta Katzorke
Department Chair Patrick Hoggan

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- write and edit clear, well-developed, and soundly structured essays on academic topics.
- summarize, paraphrase, and quote readings to integrate outside sources into writing.
- apply and adapt appropriate reading strategies in order to critique complex, college-length texts for reliability and credibility.
- compile accurate notes while listening to lectures and presentations.
- formulate and use a variety of interactive speaking strategies effectively such as clarification, polite interruption, and agreement/disagreement strategies using clear and comprehensible pronunciation.
- demonstrate mastery of verb tenses and modal auxiliary uses.
- combine sentences, with emphasis on the ability to recognize, contrast, and analyze subordination and coordination.

Advanced-High Certificate in English as a Second Language Certificate

This certificate recognizes attainment of English language abilities to an advanced-high level of English in listening, speaking, reading, writing, and grammar skills. It is suitable for use in academic classes at the community college level as well as in the workplace.

Student Learning Outcomes
Upon completion of this program, the student will be able to:

- demonstrate comprehension of written and spoken English at an advanced-high level.
- produce written and spoken English at an advanced-high level.
- appraise texts and use appropriate reading strategies and reading rate effectively across a full range of reading tasks.
- comprehend a variety of complex fiction and nonfiction reading selections.
- analyze fiction and nonfiction readings for structure, audience, author intent and bias, main ideas, and literary and rhetorical devices.
- demonstrate advanced comprehension of fiction and nonfiction texts by composing written responses.
- evaluate arguments in nonfiction expository and argumentative texts.
- synthesize ideas from several complex readings, demonstrating critical thinking skills.
- draft, revise, edit, and proofread a wide variety of essay types effectively, showing mastery of English writing style, grammar, vocabulary, and mechanics.
- appraise and synthesize information on a variety of topics using library resources and credible Internet sources.
- compose a fully documented research paper based on a variety of reference works.

Career Information
This certificate can be used in workplaces, community interactions, and for academic purposes. Students with this certificate have proficiency in English reading, writing, speaking and listening to produce clear, well structured texts on complex subjects, and express themselves fluently and spontaneously in their second language.

Guided Pathways Milestone Certificate for Multilingual Speakers: Pathway to Business Technology Certificate
This Guided Pathways Milestone Certificate for Multilingual Speakers: Pathway to Business Technology offers advanced reading and writing skills at a post secondary level for English learners combined with introductory computer information skills. The combination of these skills can be used along their pathways to degrees, certificates, or transfer, and for use in multilingual office environments.

Student Learning Outcomes
Upon completion of this program, the student will be able to:

- write formal academic essays as well as apply techniques of written communication, sentence structure, word usage, punctuation, and spelling.
• employ reading strategies, such as summarizing, paraphrasing, and quoting and integrating outside sources into writing.
• analyze written communication and compose and organize paragraphs into effective documents.
• convey intended meaning, including accuracy in sound production, syllabification, and intonation.
• formulate and use a variety of interactive strategies effectively such as clarification, polite interruption, and agreement/disagreement strategies.
• participate in in-depth discussions effectively, take clear notes, and give oral presentations in a business/work environment.

• employ skills required for all entry-level food preparation courses.
• demonstrate skills in equipment utilization, weights, measurements, knife cut identification, speed and accuracy, as well as kitchen product identification and utilization.
• convey the history of the hospitality and culinary professions, explore the numerous avenues of opportunity, and study the advantages of continuing education in the field.
• demonstrate background knowledge of and approaches of successful chefs and restaurateurs.

Career Information
This certificate supports course work in the hospitality management profession, including in multilingual work environments.

Guided Pathways Milestone Certificate for Multilingual Speakers: Pathway to Culinary Arts Certificate
This Guided Pathways Milestone Certificate for Multilingual Speakers: Pathway to Culinary Arts offers advanced reading, writing, listening, and speaking skills at a post secondary level for English learners combined with introductory hospitality management skills. The combination of these skills can be used along their pathways to degrees, certificates, or transfer, and for use in multilingual work environments.

• participate in in-depth discussions effectively, take clear notes, and give oral presentations in a business/work environment.

• execute the teaching practices based on observation, documentation, and interpretation of children’s behavior.
• discuss the growth and development of children from the prenatal stage through adolescence. For each stage of...
development, describe the physical, cognitive, linguistic, social-moral, and emotional aspects of development.

- apply research methods and utilize data collection approaches as applied to early childhood education.
- explain the influences of culture, family, and the interaction of maturational and environmental factors in early childhood education.
- exhibit foundation knowledge for early child care and education, teaching, and parenting.

Career Information
This certificate supports course work in the early childhood education profession, including in multilingual work environments.

Certificates

Intermediate-High Proficiency in English as a Second Language Certificate

This certificate recognizes attainment of English language abilities at an intermediate-high level in listening, speaking, reading, writing, and grammar.

Certificate Requirements

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- identify the central message and key supporting details of intermediate-high listening passages.
- apply oral skills to convey meaning clearly in brief oral presentations.
- analyze a text closely and recognize patterns of organization.
- outline, paraphrase, and summarize basic concepts from readings.
- write soundly structured, unified essays in response to prompts.
- demonstrate competency in using the 12 verb tenses.

Career Information

This certificate can be used to indicate knowledge of English and abilities in listening, speaking, reading, and writing for multilingual use in a variety of workplaces and within a diverse range of environments in communities. In the classroom, students can read and write about a wide range of subjects and explain viewpoints on issues.

Intermediate-Low Proficiency in English as a Second Language Certificate

This certificate recognizes attainment of English language abilities at an intermediate-low level in listening, speaking, reading, and writing.

Certificate Requirements

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- communicate orally in grammatical English in everyday social and work situations.
- demonstrate comprehension of written and spoken English in work and social contexts.
- write comprehensible, grammatical English on everyday topics.

Career Information

This certificate can be used to indicate knowledge of English and abilities for use at an intermediate level. Students with this certificate can interact in English in different workplaces and within a range of familiar community interactions.
English as a Second Language (ESL) Courses

ESL 37 Novice-High Integrated Reading and Writing

Units: 6
Hours: 108 hours LEC
Prerequisite: ESLR 20 and ESLW 20 with grades of "C" or better, or placement through the assessment process.

This course focuses on learning academic reading and writing skills at the novice-high level, with an emphasis on vocabulary development, reading comprehension, and the development of compositions. It covers developmental compositions with a clear beginning, middle, and end. This course is part of the reading and writing sequence which prepares ESL students to take college courses leading to a certificate, degree, and/or transfer. Completion of this course is equivalent to completion of both ESLR 30 and ESLW 30 and serves as a prerequisite to ESL 47. This course is not open to students who have completed both ESLR 30 and ESLW 30.

ESL 47 Intermediate-Low Integrated Reading and Writing

Units: 6
Hours: 108 hours LEC
Prerequisite: ESL 37 with a grade of "C" or better, or placement through the assessment process.

This integrated-skills course for non-native speakers of English focuses on developing academic reading and writing skills at the intermediate-low level with an emphasis on vocabulary, reading comprehension, critical thinking, and the writing process. With the information gathered through readings, students begin to use academic content to supplement their ideas in writing. Students build skills in pre-writing, structuring paragraphs, writing basic essays, and constructing a variety of sentence types. Completion of this course is equivalent to completion of both ESLR 40 and ESLW 40 and ESLW 30 and serves as a prerequisite to ESL 47. This course is not open to students who have completed both ESLR 30 and ESLW 30.

ESL 55 Intermediate-Mid Integrated Reading and Writing

Units: 6
Hours: 108 hours LEC
Prerequisite: ESL 47 with a grade of "C" or better, or placement through the assessment process.

This is an intermediate-mid level skills course in reading and writing for non-native speakers of English. This course introduces academic reading skills through analyzing readings from a number of rhetorical styles as well as techniques and processes essential to reading comprehension and academic writing. Language instruction focuses on strengthening individual proofreading and editing skills. Completion of this course is equivalent to completion of both ESLR 50 and ESLW 50 and serves as a prerequisite to ESL 55. This course is not open to students who have completed both ESLR 40 and ESLW 40.

ESL 315 Intermediate-High Integrated Reading and Writing

Units: 6
Hours: 108 hours LEC
Prerequisite: ESL 55 with a grade of "C" or better, or placement through the assessment process.

Transferable: CSU; UC (The UC limits ESL course credit - ESL and/or ESLW courses, combined maximum credit, 8 units)

This is an intermediate-high level integrated reading and writing course for non-native speakers of English. This course introduces academic reading skills through analyzing readings from a number of rhetorical styles as well as techniques and processes essential to reading comprehension and academic writing. Language instruction focuses on enhancing individual proofreading and editing skills. Completion of this course is equivalent to completion of both ESLR 310 and ESLW 310 and serves as a prerequisite to ESL 325. This course is not open to students who have completed both ESLR 30 and ESLW 30.

ESL 325 Advanced-Low Integrated Reading and Writing

Units: 6
Hours: 108 hours LEC
Prerequisite: ESL 315 with a grade of "C" or better, or placement through the assessment process.

Transferable: CSU; UC (The UC limits ESL course credit - ESL and/or ESLW courses, combined maximum credit, 8 units)

This advanced-low integrated-skills course for non-native speakers of English builds on academic reading and writing skills, while also introducing basic research steps. Emphasis is placed on developing critical reading and writing skills to evaluate a variety of college-level texts and use them to inform and support students’ own compositions. Instruction targets the needs of multilingual writers by addressing specific linguistic and cultural content to promote academic success. The goal of this course is to prepare students for transfer-level composition.

ESL 350 Critical Reading, Research and Writing Through Literature

Units: 4
Hours: 72 hours LEC
Prerequisite: A grade of "C" or better in ESLW 340 OR a grade of "C" or better in ENGW 300.

Transferable: CSU; UC ((maximum ESL & ESLW credits accepted - 8 units total))

General Education: AA/AS Area III(b); AA/AS Area I; AA/AS Area VI; CSU Area A3; CSU Area C2; Cal-GETC Area 1B (effective Fall 2025); Cal-GETC Area 3B (effective Fall 2025); IGETC Area 1B; IGETC Area 3B

C-ID: C-ID ENGL 110; C-ID ENGL 120

This course covers reading and written analysis of culturally and internationally diverse complex literary works in all major genres, including poetry, drama, and fiction. Students develop analytical, integrative, and research skills while exploring multicultural perspectives. A variety of cultural and social perspectives are explored through the comparison of different ethnic groups within the U.S., focusing on the influence of non-European and non-Western cultures on...
the content or style of various texts. Formal writing assignments total at least 5000 words. In-person or virtual attendance at readings, plays, and/or films may be required. This course is designed for multicultural and multilingual students.

**ESLG 499 Experimental Offering in English as a Second Language**

*Units: 0.5 - 4*
*Prerequisite: None.*
*Transferable: CSU*

This is the experimental courses description.

---

**English as a Second Language - Grammar (ESLG) Courses**

**ESLG 31 Basic English Grammar**

*Units: 3*
*Hours: 54 hours LEC*
*Prerequisite: ESLW 20 with a grade of "C" or better, or placement through the assessment process.*
*Advisory: Concurrent enrollment in other ESL courses at the appropriate level.*

This is a course for English language learners at the novice-high level, which provides an introduction to the basics of English grammar including parts of speech, word form, word order, and the fundamental verb tenses necessary for spoken and written discourse. It is part of the grammar sequence that prepares ESL students to take college courses leading to a certificate, degree, and/or transfer.

**ESLG 41 Elements of English Sentences**

*Units: 3*
*Hours: 54 hours LEC*
*Prerequisite: ESLG 31 with a grade of "C" or better, or placement through the assessment process.*
*Advisory: Concurrent enrollment in other ESL courses at the appropriate level.*

This course focuses on learning academic grammar skills at the intermediate-low level, with an emphasis on fundamental grammatical structures in conversation, writing, and reading. It is part of the grammar sequence that prepares ESL students to take college courses leading to a certificate, degree, and/or transfer.

**ESLG 51 Grammar for Intermediate ESL Writers**

*Units: 3*
*Hours: 54 hours LEC*
*Prerequisite: ESLG 41 with a grade of "C" or better, or placement through the assessment process.*
*Advisory: Concurrent enrollment in an ESL Listening and Speaking and/or Integrated Reading and Writing course at the student's assessed level(s).*

This is a course for English language learners at the intermediate-mid level, which focuses on the fundamental grammatical structures of English necessary for spoken and written discourse. It reviews the form and use of the simple and continuous tenses in the present, past and future as well as introduces the present perfect and present perfect continuous. It also provides instruction in other intermediate-level grammar topics such as gerunds and infinitives, articles, and nouns. This course is part of the grammar sequence that prepares ESL students to take college courses leading to a certificate, degree, or transfer.

**ESLG 310 Intermediate-High Grammar**

*Units: 3*
*Hours: 54 hours LEC*
*Prerequisite: ESLG 51 with a grade of "C" or better, or placement through the assessment process.*
*Advisory: Enrollment in an ESL Listening and Speaking, Reading, and/or Writing course at the student's assessed level(s).*
*Transferable: CSU*

This course focuses on further practice of the forms, meanings, and usage of grammatical structures of English at the intermediate-high level. New focal points include adjective and adverb clauses as well as new verb tense and modal auxiliary verb use. Written and oral practice reinforces the structures studied.

**ESLG 320 Advanced-Low Grammar**

*Units: 3*
*Hours: 54 hours LEC*
*Prerequisite: ESLG 310 with a grade of "C" or better, or, for those not previously enrolled in an ESL grammar course within the Los Rios district, placement through the assessment process.*
*Advisory: Enrollment in an ESL Listening and Speaking, Reading, and/or Writing course at the student's assessed level(s).*
*Transferable: CSU*

This course focuses on practice in the forms and meanings of major structures used in English conversation and writing with an emphasis on clause structure at the advanced level. Oral practice reinforces the structures studied. Assignments emphasize sentence structure in the context of longer written work.

**ESLG 499 Experimental Offering in English as a Second Language - Grammar**

*Units: 0.5 - 4*
*Prerequisite: None.*
*Transferable: CSU*

This is the experimental courses description.

---

**English as a Second Language - Listening (ESLL) Courses**

**ESLL 20 Novice Listening and Speaking**

*Units: 4*
*Hours: 72 hours LEC*
*Prerequisite: None.*
*Enrollment Limitation: Verified completion of the ESL assessment test.*
*Advisory: One year of adult school and concurrent enrollment in ESL Reading and Writing courses at the student's assessed levels are highly recommended.*

This course, intended for non-native speakers of English, focuses on understanding and producing appropriate language, and utilizing learned phrases and expressions required for everyday communication. Basic clarification strategies are demonstrated and practiced. English sounds and intonation patterns are introduced.

**ESLL 31 Listening and Speaking for College Readiness**

*Units: 3*
*Hours: 54 hours LEC*
*Prerequisite: ESLL 20 with a grade of "C" or better, or placement through the assessment process.*

This course is designed for multicultural and multilingual students.
This course is part of the listening and speaking sequence that prepares ESL students to take college courses leading to a certificate, degree, and/or transfer. It focuses on learning vocabulary, participating in a variety of listening activities, and discussing a wide variety of topics. It helps students to recognize and produce the sounds, stress, rhythm, and intonation patterns of American English.

ESLL 41 Listening, Speaking and Presentation Skills for College

Units: 3
Hours: 54 hours LEC
Prerequisite: ESLL 31 with a grade of "C" or better, or placement through the assessment process.

This course is part of the listening and speaking sequence that prepares students to take college courses leading to a certificate, degree, and/or transfer. It covers developing tactics to communicate their ideas in academic situations, and practice in the pronunciation of English.

ESLL 51 Academic Communication, Notetaking, and College Success Skills

Units: 3
Hours: 54 hours LEC
Prerequisite: ESLL 41 with a grade of "C" or better, or placement through the assessment process.

This intermediate mid-level course, intended for non-native speakers of English, helps students understand and be understood in both familiar and unfamiliar situations. Activities include academic listening and speaking activities and a continuation of pronunciation skills.

ESLL 299 Experimental Offering in English as a Second Language - Listening

Units: 0.5 - 4
Prerequisite: None.

This is the experimental courses description.

ESLL 310 Intermediate-High Listening and Speaking

Units: 3
Hours: 54 hours LEC
Prerequisite: ESLL 51 with a grade of "C" or better; or, for those not previously enrolled in an ESL listening course within the Los Rios district, placement through the assessment process.
Advisory: Concurrent enrollment in an ESL Reading and Writing course, and/or Grammar course at the student's assessed level(s).
Transferable: CSU

This intermediate-high-level course, intended for non-native speakers of English, develops listening and speaking for academic purposes, including comprehension of lectures, note-taking, and discussion. It includes a review of American English sounds with emphasis on understanding and producing stress, rhythm, and intonation patterns to communicate effectively.

ESLL 320 Advanced-Low Listening and Speaking

Units: 3
Hours: 54 hours LEC
Prerequisite: ESLL 310 with a grade of "C" or better; or, for those not previously enrolled in an ESL listening course within the Los Rios district, placement through the assessment process.
Advisory: Concurrent enrollment in ESL Reading and Writing courses at the student's assessed level.
Transferable: CSU

This course provides intensive practice in listening and active participation strategies for U.S. college courses. Activities include listening to extended lectures from various subject areas, refining note-taking skills, participating in in-depth discussions, and giving oral presentations. Practice of pronunciation skills is also covered.

ESLL 499 Experimental Offering in English as a Second Language - Pronunciation (ESLP) Courses

ESLR 20 Novice Reading

Units: 4
Hours: 72 hours LEC
Prerequisite: None.
Advisory: One year of adult school and concurrent enrollment in ESL Reading and Listening/Speaking courses at the student's assessed levels are highly recommended.

This course, intended for non-native speakers of English, focuses on literal understanding of basic vocabulary and readings at the Novice level. There is a focus on expanding basic vocabulary through readings, word parts, and word-form activities. The concepts of using context and giving personal reactions to readings are introduced.

ESLR 499 Experimental Offering in English as a Second Language - Writing (ESLW) Courses

ESLW 20 Novice Writing

Units: 4
Hours: 72 hours LEC
Prerequisite: None.
Advisory: One year of adult school and concurrent enrollment in ESL Reading and Listening/Speaking courses at the student's assessed levels are highly recommended.

This course for non-native speakers of English focuses on the structure of English sentences, including parts of speech and word order. Emphasis is on producing clear, basic written sentences at the novice level using everyday vocabulary. Question formation is also demonstrated and practiced.
ESLW 340 Advanced Composition

Units: 4
Hours: 72 hours LEC
Prerequisite: ESL 325 with a grade of "C" or better, or placement through the assessment process.
Transferable: CSU; UC ((maximum ESL & ESLW credit accepted - 8 units total))
General Education: AA/AS Area II(a); CSU Area A2; Cal-GETC Area 1A (effective Fall 2025); IGETC Area 1A
C-ID: C-ID ENGL 100

This college composition course emphasizes writing, reading, critical thinking skills and research skills essential for completion of a college degree. It focuses on the needs of multilingual writers by addressing specific language and cultural content required for academic success at the college level. Writing assignments include expository and argumentative essays (5,000 words minimum in total) using MLA documentation and format. Writing assignments are based on reading of transfer-level texts that include diverse perspectives.

ESL 47

ESLLAB 31 ESL Center: Intermediate-Low Support in ESL

Units: 0.5 - 1.5
Hours: 27 - 81 hours LAB
Prerequisite: ESL 20, ESLR 20, or ESLW 20 with a grade of "C" or better, or placement through the assessment process.
Advisory: ESLG 31 and/or ESLL 31

This lab course offers small-group instruction for students. This course is most beneficial when taken concurrently with ESL 37. Students receive a grade of Pass and 0.5 units of credit for accumulating 27 lab hours and completing assigned work. Students may take this course in .5-unit increments over the course of three semesters, split the units over two seminars, or take 1.5 units in one semester using different modules.

ESLLAB 30 ESL Center: Novice-High Skills in ESL

Units: 0.5 - 1.5
Hours: 27 - 81 hours LAB
Prerequisite: ESL 20, ESLR 20, and ESLW 20 with grades of "C" or better, or placement through the assessment process.
Advisory: Concurrent enrollment in ESL 37.

This lab course offers students practice in reading, formatting/mechanics, writing, and/or grammar skills at the novice-high level. Students confer with a lab instructor to design a study plan to refine basic English language skills. This course provides individualized and small-group instruction for students. This course is most beneficial when taken concurrently with ESLG 31 and/or ESLL 31. Students may enroll in the course at any time during the first nine weeks of the semester. Students receive a grade of Pass and 0.5 units of credit for accumulating 27 lab hours and completing assigned work. Students may take this course in .5-unit increments over the course of three semesters, split the units over two seminars, or take 1.5 units in one semester using different modules.

ESLLAB 40 ESL Center: Intermediate-Low Skills in ESL

Units: 0.5 - 1.5
Hours: 27 - 81 hours LAB
Prerequisite: ESL 37, ESLG 31, or ESL 31 with a grade of "C" or better, or placement through the assessment process.
Advisory: ESLG 31 and/or ESLL 31

This lab course offers students practice in listening, speaking, pronunciation, oral grammar, and other language skills at the novice-high level. Students confer with the lab instructor to design a study plan to refine basic English oral skills. This course provides individualized and small-group instruction to students. This course is most beneficial when taken concurrently with ESL 37 and/or ESL 31. Students may enroll in the course at any time during the first nine weeks of the semester. Students receive a grade of Pass and 0.5 units of credit for accumulating 27 lab hours and completing assigned work. Students may take this course in .5-unit increments over the course of three semesters, split the units over two seminars, or take 1.5 units in one semester using different modules.

ESLLAB 41 ESL Center: Intermediate-Low Support in ESL

Units: 0.5 - 1.5
Hours: 27 - 81 hours LAB
Prerequisite: ESL 37, ESLG 31, or ESL 31 with a grade of "C" or better, or placement through the assessment process.
Advisory: ESLG 41 or ESLI 41

This lab course offers students practice in listening, speaking, pronunciation, oral grammar, and other language skills at the intermediate-low level. Students confer with the lab instructor to design a study plan to refine intermediate English oral skills. This course provides individualized and small-group instruction to students. This course is most beneficial when taken concurrently with ESLG 41 and/or ESLI 41. Students may enroll in the course at any time during the first nine weeks of the semester. Students receive a grade of Pass and 0.5 units of credit for accumulating 27 lab hours and completing assigned work. Students may take this course in .5-unit increments over the course of three semesters, split the units over two seminars, or take 1.5 units in one semester using different modules.

ESLLAB 49 Experimental Offering in English as a Second Language - Writing

Units: 0.5 - 4
Prerequisite: None.
Transferable: CSU

This is the experimental courses description.

ESLLAB 299 Experimental Offering in English as a Second Language - Accelerated

Units: 0.5 - 4
Prerequisite: None.

This is the experimental courses description.

ESLLAB 31 Novice-High Support in ESL

This lab course offers students practice in listening, speaking, pronunciation, oral grammar, and other language skills at the novice-high level. Students confer with the lab instructor to design a study plan to refine basic English oral skills. This course provides individualized and small-group instruction to students. This course is most beneficial when taken concurrently with ESL 31 and/or ESL 31. Students may enroll in the course at any time during the first nine weeks of the semester. Students receive a grade of Pass and 0.5 units of credit for accumulating 27 lab hours and completing assigned work. Students may take this course in .5-unit increments over the course of three semesters, split the units over two seminars, or take 1.5 units in one semester using different modules.

English as a Second Language - W

This is the experimental courses description.
ESLLAB 50 ESL Center: Intermediate-Mid Skills in ESL

Units: 0.5 - 1.5  
Hours: 27 - 81 hours LAB  
Prerequisite: ESL 47, ESLG 41, or ESLL 41 with a grade of "C" or better, or placement through the assessment process.  
Advisory: ESL 55

This lab course offers students practice in reading, writing, speaking, listening, mechanics, and/or grammar skills at the intermediate-mid level. Students confer with a lab instructor to design a study plan to refine intermediate English language skills. This course provides individualized and small-group instruction to students. This course is most beneficial when taken concurrently with ESL 55. Students may enroll in the course at any time during the first nine weeks of the semester. Students receive a grade of Pass and 0.5 units of credit for accumulating 27 lab hours and completing assigned work. Students may take this course in .5-unit increments over the course of three semesters, split the units over two semesters, or take 1.5 units in one semester using different modules.

ESLLAB 51 ESL Center: Intermediate-Mid Support in ESL

Units: 0.5 - 1.5  
Hours: 27 - 81 hours LAB  
Prerequisite: ESL 47, ESLG 41, or ESLL 41 with a grade of "C" or better, or placement through the assessment process.  
Advisory: ESL 55, ESLG 51, and ESLL 51

This lab course offers students practice in listening, speaking, pronunciation, oral grammar, and other language skills at the intermediate-mid level. Students confer with the lab instructor to design a study plan to refine expanding intermediate English oral skills. This course provides individualized and small-group instruction to students. This course is most beneficial when taken concurrently with ESL 51 and/or ESLL 51. Students may enroll in the course at any time during the first nine weeks of the semester. Students receive a grade of Pass and 0.5 units of credit for accumulating 27 lab hours and completing assigned work. Students may take this course in .5-unit increments over the course of three semesters, split the units over two semesters, or take 1.5 units in one semester using different modules.

ESLLAB 60 ESL Center: Intermediate-High Skills in ESL

Units: 0.5 - 1.5  
Hours: 27 - 81 hours LAB  
Prerequisite: ESL 55 or ESLL 51 with a grade of "C" or better, or placement through the assessment process.  
Advisory: ESL 315

This lab course offers students practice in reading, writing, speaking, listening, and/or grammar skills at the intermediate-high level. Students confer with a lab instructor to design a study plan to refine intermediate-high English language skills. This course provides individualized and small-group instruction to students. This course is most beneficial when taken concurrently with ESL 315. Students may enroll in the course at any time during the first nine weeks of the semester. Students receive a grade of Pass and 0.5 units of credit for accumulating 27 lab hours and completing assigned work. Students may take this course in .5-unit increments over the course of three semesters, split the units over two semesters, or take 1.5 units in one semester using different modules.

ESLLAB 61 ESL Center: Intermediate-High Support in ESL

Units: 0.5 - 1.5  
Hours: 27 - 81 hours LAB  
Prerequisite: ESLG 51 or ESLL 51 with a grade of "C" or better, or placement through the assessment process.  
Advisory: ESLG 310 and ESL 310

This lab course offers students practice in listening, speaking, pronunciation, oral grammar, and other language skills at the intermediate-high level. Students confer with the lab instructor to design a study plan to refine English oral skills. This course provides individualized and small-group instruction to students. This course is most beneficial when taken concurrently with ESG 310 and/or ESSL 310. Students may enroll in the course at any time during the first nine weeks of the semester. Students receive a grade of Pass and 0.5 units of credit for accumulating 27 lab hours and completing assigned work. Students may take this course in .5-unit increments over the course of three semesters, split the units over two semesters, or take 1.5 units in one semester using different modules.

ESLLAB 70 ESL Center: Advanced-Low Skills in ESL

Units: 0.5 - 1.5  
Hours: 27 - 81 hours LAB  
Prerequisite: ESL 315, ESLG 310, or ESSL 310 with a grade of "C" or better, or placement through the assessment process.  
Advisory: ESL 325

This lab course offers students practice in reading, writing, speaking, listening, mechanics, writing, and/or grammar skills at the advanced-low level. Students confer with a lab instructor to design a study plan to refine advanced-low English language skills. This course provides individualized and small-group instruction to students. This course is most beneficial when taken concurrently with ESL 325. Students may enroll in the course at any time during the first nine weeks of the semester. Students receive a grade of Pass and 0.5 units of credit for accumulating 27 lab hours and completing assigned work. Students may take this course in .5-unit increments over the course of three semesters, split the units over two semesters, or take 1.5 units in one semester using different modules.

ESLLAB 71 ESL Center: Advanced-Low Support in ESL

Units: 0.5 - 1.5  
Hours: 27 - 81 hours LAB  
Prerequisite: ESL 315, ESLG 310, or ESSL 310 with a grade of "C" or better, or placement through the assessment process.  
Advisory: ESL 325, ESLG 320, or ESSL 320 with a grade of "C" or better, or placement through the assessment process.

This lab course offers students practice in reading, writing, speaking, listening, mechanics, writing, and/or grammar skills at the advanced-low level. Students confer with the lab instructor to design a study plan to refine advanced-low English oral skills. This course provides individualized and small-group instruction to students. This course is most beneficial when taken concurrently with ESL 320 and/or ESL 320. Students may enroll in the course at any time during the first nine weeks of the semester. Students receive a grade of Pass and 0.5 units of credit for accumulating 27 lab hours and completing assigned work. Students may take this course in .5-unit increments over the course of three semesters, split the units over two semesters, or take 1.5 units in one semester using different modules.

ESLLAB 80 ESL Center: Advanced Skills in ESL

Units: 0.5 - 1.5  
Hours: 27 - 81 hours LAB  
Prerequisite: ESL 325, ESLG 320, or ESSL 320 with a grade of "C" or better, or placement through the assessment process.  
Advisory: ESL 350 or ESLW 340

This lab course offers students practice in reading, writing, speaking, listening, mechanics, writing, and/or grammar skills at the advanced skills level. Students confer with a lab instructor to design a study plan to refine advanced English language skills. This course provides individualized and small-group instruction for students. This course is most beneficial when taken concurrently with ESLW 340 or ESL 350. Students may enroll in the course at any time during the first nine weeks of the semester. Students receive a grade of Pass and 0.5 units of credit for accumulating 27 lab hours and completing assigned work. Students may take this course in .5-unit increments over the course of three semesters, split the units over two semesters, or take 1.5 units in one semester using different modules.

Administration of Justice

ARC's Administration of Justice program offers both Associate's and Associate's for Transfer degrees. The Associate's degree covers the prevention, discovery, control and treatment of crimes, criminals, and criminality. Students desiring to enter a career concerned with the administration of justice will find that this curriculum has flexibility that allows them to prepare for specific fields included in that broad category. The Transfer degree provides students with a major that fulfills the general requirements of the California State University for transfer. Students with this degree will receive priority admission with junior status to the California State University system.

Degrees and Certificates Offered

**A.S.-T. in Administration of Justice**

**A.S. in Administration of Justice**

**Homeland Security Certificate**

Division Dean Steven Segura
Department Coordinator Charissa Gorre
Phone (916) 570-5000

Associate Degrees for Transfer

**A.S.-T. in Administration of Justice**

The Associate in Science in Administration of Justice for Transfer (A.S.-T.) degree may be obtained by completion of 60 transferable, semester units with a minimum overall grade point average (GPA) of 2.0, including (a) a minimum grade of "C" (or "P") for each course in the major or area of emphasis described in the Required Program, and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education-Breadth Requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- evaluate various local, state, and federal law enforcement career options.
- research the law enforcement application and hiring processes.
- critique the ethical philosophy of the American justice system.
- analyze crime causation, criminal statutes and elements of particular crimes.
- describe the various levels of punishment and corrections.
- evaluate the legal aspects of criminal investigations, constitutional law, and case law.
- identify various controlled substances and interpret their impact on society and law enforcement.
- apply laws and procedures for the collection and use of evidence.
- identify ethical standards placed on law enforcement professionals.
- communicate effectively in written and oral formats.

Career Information

Police Officer; Deputy Sheriff; Crime Scene Investigator; Identification Technician; Community Services Officer; Corrections Officer; Parole Officer; Probation Officer and a variety of support service occupations. Potential employers include: Federal, State and local law enforcement agencies (Sheriff, Police, California Highway Patrol, Federal Bureau of Investigations, Drug Enforcement Administration, Department of Justice, Crime Scene Investigations, and California Department of Corrections and Rehabilitation).

**Associate Degrees**

**A.S. in Administration of Justice**

This degree covers the prevention, discovery, control and treatment of crimes, criminals, and criminality. Students desiring to enter a career concerned with the administration of justice will find that this curriculum has flexibility that allows them to prepare for specific fields included in that broad category. The program also provides courses to prepare students for transfer to a four-year institution. Opportunities for graduates include positions as federal and state parole officers, probation officers, and correctional administrators.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- construct a historical time-line reflecting significant terrorist threats and events in the United States and globally.
- classify the roles, functions of, and interdependency among local, federal and international law enforcement and military agencies to counter and combat terrorism.
- differentiate between ethical and unethical attitudes and actions regarding the execution of homeland security practices.
- identify the characteristics, ideologies, motives and behaviors of various extremist and terrorist groups that foster and support terrorist, criminal activities.
- explain operational knowledge of intelligence gathering and analysis processes pertinent to homeland security.
- outline the primary federal, state, and local agencies in the United States that are affiliated with border and transportation security and the ethical parameters in which they operate.
- discuss differences in dealing with security threats for passengers versus freight/cargo transportation systems and border security.
- describe the impact of technology on countering threats to transportation systems and border security.

Administration of Justice (ADMJ) Courses

ADMJ 300 Introduction to Administration of Justice

| Units: | 3 |
| Hours: | 54 hours LEC |
| Prerequisite: | None. |
| Advisory: | Eligible for ENGRD 310 or ENGRD 312 AND ENGRWR 300; OR ELSR 340 AND ELSW 340. |
| Transferable: | CSU; UC |

This course introduces the characteristics of the American criminal justice system, U.S. Constitutional Rights, criminal activity, crime causation, domestic and international criminal threats, law enforcement response to criminal activity, and future law enforcement trends. It emphasizes the components of the American justice system, due process, courts and correctional services, ethics, and leadership.

ADMJ 301 Investigative Report Writing

| Units: | 3 |
| Hours: | 54 hours LEC |
| Prerequisite: | None. |
| Advisory: | Eligible for ENGRD 310 or ENGRD 312 AND ENGRWR 300; OR ELSR 340 AND ELS 340 |
| Transferable: | CSU |
This course provides techniques of writing facts, information, and ideas effectively in a simple, clear, and logical manner in the various types of criminal justice system reports. It emphasizes criminal justice terminology, organization of information, investigative note taking, and thorough documentation of witness statements and evidence.

**ADMJ 302 Community Relations: Multicultural Issues**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLR 340 AND ELSW 340.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area V(b); AA/AS Area VI; CSU Area D3; CSU Area D7; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4  
**C-ID:** C-ID Aj 160

This course examines the complex, dynamic relationship between communities and the institutions of the justice system in addressing crime and conflict with an emphasis on the challenges and prospects of administering justice within a diverse, multicultural population. It addresses the role that race, ethnicity, gender, sexual orientation, social class, culture, and the criminal justice professional play in shaping these relationships. It also examines new strategies, skills, tools, and cultural knowledge necessary for personnel engaged in all aspects of the criminal justice system. Special topics include how terrorism and the need for homeland security have changed the dynamics of police-community relations.

**ADMJ 304 Juvenile Delinquency**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area V(b); CSU Area D0  
**C-ID:** C-ID Aj 220

This course examines juvenile delinquency from a variety of perspectives including the concept of delinquency, theories of delinquency, social and environmental influences on delinquency, and the history of the juvenile justice system. It also explores the nature and extent of delinquency relative to gender differences, family dynamics, peer groups and gang affiliation, schools, drug use, and the juvenile justice courts.

**ADMJ 309 Career Preparation for Law Enforcement Occupations**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLR 340 AND ELSW 340.  
**Transferable:** CSU

This course is designed for students who are pursuing careers in law enforcement and corrections. It covers employment and career search techniques, application processes, resume development, and cover letter writing. This course prepares students for pre-employment testing, interviews, background investigations, polygraph examinations, medical screening, conditional job offers, and hiring processes.

**ADMJ 320 Concepts of Criminal Law**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLR 340 AND ELSW 340.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area V(b); CSU Area D8; IGETC Area 4H  
**C-ID:** C-ID Aj 120

This course presents the definitions of common and statutory crime. It introduces students to criminal law and the classification of crime, the legal elements of crime, the definitions of common and statutory law, and the nature of acceptable evidence. It utilizes case studies to introduce students to criminal law and the classification of crimes against persons, property, morals, and public welfare. It also includes discussion of prosecution and defense decision making, criminal culpability, and defenses to crimes.

**ADMJ 322 Criminal Procedures**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLR 340 AND ELSW 340.  
**Transferable:** CSU  
**C-ID:** C-ID Aj 122

This course is an in-depth study of criminal procedures used to enforce substantive law at both the federal and state level. Every step of the criminal process, from arrest to appeal, is thoroughly explored.

**ADMJ 323 Legal Aspects of Evidence**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLR 340 AND ELSW 340.  
**Transferable:** CSU  
**C-ID:** C-ID Aj 124

This course examines the origins, development, philosophy, and constitutional foundations of the rules of evidence as applied in United States law. Emphasis is placed on the types of evidence and the laws governing admissibility of evidence into criminal procedures. Topics include search and seizure, hearsay evidence, witness competency, and direct and circumstantial evidence.

**ADMJ 330 Criminal Investigation**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLR 340 AND ELSW 340.  
**Transferable:** CSU  
**C-ID:** C-ID Aj 140

This course introduces basic investigative responsibilities and procedures as applied to criminal investigations. Topics include crime scene management, forensic and physical evidence handling, search and seizure, property crimes, violent crimes, organized criminal enterprises, gangs, and domestic and international terrorist organizations.

**ADMJ 331 Patrol Procedures**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLR 340 AND ELSW 340.  
**Transferable:** CSU

This course explores the early development and present-day role of patrol operations and techniques used by local law enforcement agencies. Major topics include community policing, effective patrol strategies, gang awareness, and key factors affecting deployment of patrol resources, such as community involvement and meeting department objectives.
ADMJ 340 Introduction to Correctional Services

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340.
Transferable: CSU
C-ID: C-ID AJ 200

This course provides an overview of the history and trends of adult and juvenile corrections including probation and parole. It focuses on the legal issues, specific laws, and general operation of correctional institutions. The relationship between corrections and other components of the judicial system is examined.

ADMJ 498 Work Experience in Administration of Justice

Units: 0.5 - 4
Hours: 30 - 300 hours LAB
Prerequisite: None.
Enrollment Limitation: Students must be in a paid or unpaid internship, volunteer position, or job related to administration of justice with a cooperating site supervisor. Students are advised to consult with the Administration of Justice Department faculty to review specific certificate and degree work experience requirements.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.
Transferable: CSU

General Education: AA/AS Area III(b)

This course provides students with opportunities to develop marketable skills in preparation for employment or advancement within the field of administration of justice. It is designed for students interested in work experience and/or internships in transfer-level degree occupational programs. Course content includes understanding the application of education to the workforce, completion of Title 5 required forms which document the student's progress and hours spent at an approved training site, and developing workplace skills and competencies.

During the semester, the student is required to complete 37.5 hours of related paid work experience, or 30 hours of related unpaid work experience for 0.5 unit. An additional 37.5 or 30 hours of related work experience is required for each additional 0.5 units. All students are required to attend the first course meeting, a mid-semester meeting, and a final meeting. Additionally, students who have not already successfully completed a Work Experience course will be required to attend weekly orientations while returning participants may meet individually with the instructor as needed. Students may take up to 16 units total across all Work Experience course offerings. This course may be taken up to four times when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

ADMJ 499 Experimental Offering in Administration of Justice

Units: 0.5 - 4
Prerequisite: None.

This is the experimental courses description.
Ethnic Studies

Ethnic Studies is an interdisciplinary and diverse field that gives voice to historically marginalized peoples and their perspectives by challenging systems of injustice and valuing diversity. Our courses seek to educate students on progressive social change, reflect on the dynamics of power and knowledge, and promote multiple approaches to social justice issues while encouraging students to be informed and active citizens. Ethnic Studies allows students a particular focus on marginalized and disadvantaged populations while also de-centering the dominant cultural, political, and social ideals that have shaped western societies.

Dean Kathy Sorensen
Department Chair Mark Carnero

Ethnic Studies (ETHNS) Courses

ETHNS 299 Experimental Offering in Ethnic Studies

Units: 0.5 - 4
Prerequisite: None.

This is the experimental courses description.

ETHNS 300 Introduction to Ethnic Studies

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.
Transferable: CSU; UC
General Education: AA/AS Area V(b); AA/AS Area VI; CSU Area D; CSU Area F; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4; IGETC Area 7

This course introduces the diverse institutional, cultural, and historical issues relating to the past and present life circumstances and intersectional identities of the four core Ethnic populations of Asian Americans, Chicanas/o/x Americans, African Americans, and Native/Indigenous Americans within the United States.

ETHNS 320 Introduction to African American Studies

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.
Transferable: CSU; UC
General Education: AA/AS Area V(b); AA/AS Area VI; CSU Area D; CSU Area F; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4; IGETC Area 7

This course introduces the diverse institutional, cultural, and historical issues relating to the past and present life circumstances of African Americans within the United States. It will expose students of all ethnic backgrounds to the issues germane to the experiences of African Americans in the United States.

ETHNS 330 Introduction to Asian American Studies

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.
Transferable: CSU; UC
General Education: AA/AS Area V(b); AA/AS Area VI; CSU Area D; CSU Area F; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4; IGETC Area 7

This course introduces the diverse institutional, cultural, and historical issues relating to the past and present life circumstances and intersectional identities of Asian Americans within the United States. This course examines and redefines the lives of Chicanas/o/x Americans through their own experiences from the inside looking out at the world.

ETHNS 340 Introduction to Chicana/o/x Studies

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.
Transferable: CSU; UC
General Education: AA/AS Area V(b); AA/AS Area VI; CSU Area D; CSU Area F; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4; IGETC Area 7

This course introduces the diverse institutional, cultural, and historical issues relating to the past and present life circumstances and intersectional identities of Chicana/o/x Americans within the United States. Specifically, this course examines and redefines the lives of Chicanas/o/x Americans through their own experiences from the inside looking out at the world.

ETHNS 350 Introduction to Native American Studies

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.
Transferable: CSU; UC
General Education: AA/AS Area V(b); AA/AS Area VI; CSU Area D; CSU Area F; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4; IGETC Area 7

This course introduces the diverse institutional, cultural, and historical issues relating to the past and present life circumstances and intersectional identities of Native Americans/Indian peoples within the United States. It provides a survey of traditional cultures of Native Americans/Indian peoples focusing on the social, religious, economic, and artistic practices. The antiquity, distribution, and linguistic histories of Native American/Indian cultures are integrated with the contemporary status of Native peoples regarding social change and adaptation.

ETHNS 499 Experimental Offering in Ethnic Studies

Units: 0.5 - 4
Prerequisite: None.

This is the experimental courses description.
Anthropology

Anthropology is the study of humankind around the world and throughout time, with the goal of understanding our evolutionary origins, our biological distinction as a species, and our diverse manifestations of culture. This degree provides students with basic skills in critical analysis, application of the scientific method, and cross-cultural understanding.

Our curriculum includes introductory courses, archeology, world prehistory, cultures, and current issues in anthropology.

Degrees Offered

A.A.-T. in Anthropology
A.S. in Anthropology
A.S. in General Science

Associate Degrees for Transfer

A.A.-T. in Anthropology

The Associate in Arts degree in Anthropology for Transfer provides students with a major that fulfills the general requirements of the California State University for transfer. Students with this degree will receive priority admission with junior status to the California State University system. The Associate in Arts degree in Anthropology for Transfer (AA-T) may be obtained by the completion of 60 transferable, semester units with a minimum 2.0 GPA, including (a) the major or area of emphasis described in the Required Program outlined below (earning a C or better in these courses) and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education Breadth Requirements.

Anthropology is the study of humankind around the world and throughout time, with the goal of understanding our evolutionary origins, our biological distinction as a species, and our diverse manifestations of culture. A degree in anthropology provides the student with basic skills in critical analysis, application of the scientific method, and cross-cultural understanding.

A minimum of 6 units from the following: 6

The Associate in Arts in Anthropology for Transfer (AA-T) degree may be obtained by completion of 60 transferable, semester units with a minimum overall grade point average (GPA) of 2.0, including (a) a minimum grade of "C" (or "P") for each course in the major or area of emphasis described in the Required Program, and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education-Breadth Requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- apply the science of anthropology towards a holistic understanding of human nature.
- synthesize the principles that form the foundation of anthropology.
- analyze social and ethical issues using anthropological concepts and methods.
- assess the cultural, physical, and linguistic diversity expressed in our species.

Career Information

The AA-T degree provides students with a solid foundation in anthropology as well as the standard prerequisites for upper division coursework leading to the baccalaureate degree. Anthropologists with graduate degrees work in archaeological excavation and museum management, the analysis of cultures, linguistics, forensics, primatology, and education. They also consult with governmental, business, and educational institutions.
Associate Degrees

A.S. in Anthropology

Anthropology is the study of humankind around the world and throughout time, with the goal of understanding our evolutionary origins, our biological distinction as a species, and our diverse manifestations of culture. This degree provides students with basic skills in critical analysis, application of the scientific method, and cross-cultural understanding.

- ANTH 336 Anthropology of Sex, Sexuality and Gender (3)
- ANTH 341 Introduction to Linguistics (3)
- ANTH 370 Primatology (3)
- ANTH 494 Topics in Anthropology (1 - 3)

Total Units: **18**

The Anthropology Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- apply the science of anthropology towards a holistic understanding of human nature.
- synthesize the principles that form the foundation of anthropology.
- analyze social and ethical issues related to the field of anthropology and its practical applications.
- analyze the cultural, physical, and linguistic diversity expressed in our species.

Career Information

This degree provides students with a solid foundation in anthropology as well as the standard prerequisites for upper division coursework leading to the baccalaureate degree. Anthropologists with graduate degrees work in occupations ranging from archaeological excavation, exploration, and museum management to the analysis of cultures, linguistics, forensics, primatology, teaching, and consulting with governmental and educational institutions.

A.S. in General Science

This program provides a broad study in the fields of biological and physical sciences in preparation for transfer to a four-year program and continuation of studies in upper division science courses.

### Anthropology (ANTH) Courses

#### ANTH 300 Biological Anthropology

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340

### Student Learning Outcomes

Upon completion of this program, the student will be able to:

- evaluate new and accepted ideas about the natural universe using scientific methods.
- analyze a wide variety of natural phenomena using basic definitions and fundamental theories of biological or physical sciences.
- apply appropriate quantitative and qualitative methods to interpret and analyze pertinent data.
- outline the basic concepts and fundamental theories of a natural science.
- articulate orally and/or in writing the importance of continuous examination and modification of accepted ideas as a fundamental element in the progress of science.
- discuss ethical components of scientific decision making and apply personal and social values within the process of decision making in scientific endeavors.
ANTH 301 Biological Anthropology Laboratory

Units: 1
Hours: 54 hours LEC
Prerequisite: None.
Corequisite: ANTH 300 or 480
Transferable: CSU; UC
General Education: CSU Area B3; Cal-GETC Area 5C (effective Fall 2025); IGETC Area 5C
C-ID: C-ID ANTH 115L

This introductory laboratory course provides opportunities to become familiar with the scientific methods of biological anthropology by investigating topics in laboratory and field situations. Topics covered in the course include the scientific method, sources of biological variation and forces of evolution, human osteology, human variation, and current bioethical issues.

Field trips may be required.

ANTH 302 Human Biology

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Transferable: CSU; UC
General Education: AA/AS Area IV; CSU Area B2; Cal-GETC Area 5B (effective Fall 2025); IGETC Area 5B
C-ID: C-ID ANTH 116

This course covers the concepts, methods, and theory of biological evolution and its application to the human species. There is a specific focus on molecular, Mendelian, and population genetics as well as on the mechanisms of evolution primatology, paleoanthropology, biocultural adaptations, human variation, and current bioethical issues. The philosophy of science and the scientific method serve as foundations to this course. This course is not open to students who have completed ANTH 480.

ANTH 303 Introduction to Forensic Anthropology

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: BIOL 102, BIOL 115, BIOL 430, OR ANTH 300 and 301; AND eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLR 340 AND ESLW 340.
Transferable: CSU; UC
General Education: AA/AS Area IV; CSU Area B2; Cal-GETC Area 5B (effective Fall 2025); IGETC Area 5B
C-ID: C-ID ANTH 115L

This course is an overview of forensic anthropology, an applied field of biological anthropology. Forensic anthropology uses the analysis of human skeletal remains to answer medicolegal questions. This course emphasizes current techniques used in analysis of human skeletal remains, medicolegal procedures, and the role of the anthropologist in the investigative process. It examines the basics of bone biology, methods of skeletal analysis, and recognition of bone pathology and trauma. Field trips may be required.

ANTH 310 Cultural Anthropology

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLR 340 AND ESLW 340.
Transferable: CSU; UC
General Education: AA/AS Area V(b); CSU Area D1; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4A
C-ID: C-ID ANTH 120

This course explores the various customs, traditions, and forms of social organizations from a global perspective. Topics include subsistence methods, belief and religious systems, linguistics, trade and economic systems, arts, kinship systems, marriage and family systems, technology, and changes due to internal and external forces. Gender, race, and ethnic identity are examined as well as the role of society in defining these terms. Using ethnographic case studies, this course examines how anthropological ethics, methods, and theories are applied to the study of human culture. This course is not open to students who have already completed ANTH 481.

ANTH 319 Visual Anthropology: Introduction to Ethnographic Film

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLR 340 AND ESLW 340.
Transferable: CSU; UC
