This course is designed for the firefighter operating as incident commander in areas where urban growth and expansion interfaces with the wildland. Topics include firefighter safety in the interface, managing human factors in the interface, pre-incident planning, size-up and initial strategy, structure triage, structure protection overview, tactics in the interface, tactical operations and resource use in the interface, action assessment, plans updates, and after action review. This course was formerly listed as FIRE 1073 prior to April 2011. Pass/No Pass only.

FIRE 1880 Field Observer/Display Processor
(S-244/S-245)

Units: 1.5
Hours: 24 hours LEC; 8 hours LAB
Prerequisite: CDF 1052

This course provides the techniques, theory, and practical experience to be a field observer/display processor in the Incident Command System Planning Section. Topics include identifying and interpreting maps, making map calculations, using observation aids, mapping from aircraft, making field observations, and processing and displaying data. This course was formerly listed as CDF, FJPA, SMFD, and USDA 1118 prior to April 2011. Credit/No Credit only.
FIRE 1881 Helicopter Training (S217)
Units: 1.5
Hours: 26 hours LEC; 14 hours LAB
Prerequisite: FT 55 (SMFD 1055) and FT 52 (SMFD 1052)
This course provides an understanding of basic helicopter operations and their use on wildland firefighting incidents. This course includes aircraft terminology, helicopter support systems and helicopter tactics used in their operation. This course was formerly listed as FIRE 1070 prior to April 2011. Credit/No Credit only.

FIRE 1882 Ignition Operations (S-234)
Units: 1
Hours: 16 hours LEC; 8 hours LAB
Prerequisite: None.
This course presents the functions of an Ignition Specialist or Firing-Boss on emergency incidents. It includes backfire and burnout safety training and the proper application of fire suppression firing methods and practices. This course was formerly listed as FIRE 1094 prior to April 2011. Pass/No Pass only.

FIRE 1883 Chainsaw Bench
Units: 0.5
Hours: 9 hours LEC
Prerequisite: None.
This course covers basic chainsaw field mechanics and troubleshooting. Topics include chainsaw components, attachments, adjustments, problems, and maintenance. This course was CDF, FJPA, and USDA 1083 prior to September 2011. Pass/No Pass only.

FIRE 1884 Crew Boss (Single Resource) (Blended) (S-230)
Units: 0.25
Hours: 8 hours LEC
Prerequisite: FFS 1541 with a grade of “C” or better
Enrollment Limitation: To enroll in this course (FIRE 1884) the student must be an employee of a federal fire fighting agency, or a member of a state or local fire agency.
This course covers the performance of duties associated with the single resource boss position from initial dispatch through demobilization to the home unit. Topics include operational leadership, preparation and mobilization, assignment preparation, risk management, entrapment avoidance, safety and tactics, offline duties, demobilization, and post incident responsibilities. Pass/No Pass only.

FIRE 1885 Firing Operations (S-219)
Units: 1
Hours: 16 hours LEC; 8 hours LAB
Prerequisite: None.
Enrollment Limitation: To enroll in this course (FIRE 1885) the student must be an employee of a federal fire fighting agency, or a member of a state or local fire agency.
This course utilizes a blended approach to learning, incorporating a mix of online and instructor-led training (ILT). Students complete the online training portion of the course prior to taking the ILT. Topics include the roles and responsibilities of a Firing Boss (FIRB), outlines duties of other personnel who may engage firing operations, and illustrates common firing devices and techniques. Pass/No Pass only.

FIRE 1886 Engine Boss (Single Resource) (Blended) (S-231)
Units: 0.25
Hours: 3.5 hours LEC; 4.5 hours LAB
Prerequisite: FIRE 1884

Enrollment Limitation: To enroll in this course (FIRE 1886) the student must be an employee of a federal fire fighting agency, or a member of a state or local fire agency.
This course is designed to produce student proficiency in the performance of the duties associated with Engine Boss, single resource (ENGB). Topics include engine and crew capabilities and limitations, information sources, fire size-up considerations, tactics, and wildland/urban interface. Pass/No Pass only.

FIRE 1999 Experimental Offering in Firefighting Training
Units: 0.5 - 4
Prerequisite: None.
This is the experimental courses description.

Public Safety Training Center (PSTC) Courses

PSTC 1251 Skills and Knowledge Modules
Units: 0.25 - 3
Hours: 4.5 - 44 hours LEC
Prerequisite: PSTC 1683; POST certified basic law enforcement academy or equivalent as determined by the Dean of Academy Instruction. NOTE: Approval of equivalent training is not a guarantee state regulatory or licensing agencies will also grant POST certified basic law enforcement academy or equivalent as determined by the Dean of Academy Instruction. NOTE: Approval of equivalent training is not a guarantee state regulatory or licensing agencies will also grant equivalency.
Enrollment Limitation: Students must 1) be free of felony convictions; 2) possess a valid California Driver's License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate; pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.
This course facilitates the student's acquisition of advanced skills and knowledge necessary for policing and peacekeeping in contemporary society. Course topics are based upon changes in local, state and federal laws, California Commission on Peace Officer Standards and Training (POST) required updates to mandated minimum training for peace officers, and evolving bodies of knowledge in the law enforcement field. Course hours are variable in order to meet specific local and regional needs which may exceed POST minimum requirements. Topics include: arrest methods update, chemical agents update, courtroom testimony, cultural competency, entry techniques update, ethics, field operations and tactics, impact weapons update, investigative report writing update, juvenile law update, legal update, less than lethal force update, officer health and wellness, police-community relations, principled policing, search and seizure update, search warrant writing and service, strategic communication update, tactical firearms update, technology update, and use of force update. Pass/No Pass.

PSTC 1270 Juvenile Corrections Officer Core
Units: 7.5
Hours: 130.5 hours LEC; 37.5 hours LAB
Prerequisite: None.
This course is designed for new juvenile corrections officers and students interested in a career in the juvenile corrections field. It covers the California criminal justice system, professionalism and ethics, defensive tactics, report writing, mental health challenges, gangs, physical conditioning, social justice, cultural awareness, and behavioral health. This course is certified by California Standards and Training for
PSTC 1271 Adult Correctional Officer Core Course

Units: 8.5
Hours: 151 hours LEC; 28.5 hours LAB
Prerequisite: None.

This course is designed for entry level positions in the adult corrections field. Topics include criminal justice system, legal foundations, terminology, codes, statutes, case law, indicators of psychological problems, gangs, interviews, court reports, defensive tactics, social justice, cultural awareness, and report writing. This course meets or exceeds minimum standards set by Standards and Training for Corrections (STC). This course is formerly known as SCSD 1139 and PSTC 1879. Pass/No Pass only.

PSTC 1273 Probation Officer Core Course

Units: 9
Hours: 150 hours LEC; 39 hours LAB
Prerequisite: None.

This course is designed for entry-level positions in the probation officer field. Topics include the criminal justice system, legal foundations, terminology, codes, statutes, case law, indicators of psychological problems, gangs, interviews, court reports, defensive tactics, social justice, cultural awareness, and report writing. This course meets or exceeds minimum standards set by Standards and Training for Corrections (STC). This course is formerly known as PSTC 1878. Pass/No Pass only.

PSTC 1275 Adult Corrections: Supplemental Core Course

Units: 3.5
Hours: 59.5 hours LEC; 10.5 hours LAB
Prerequisite: PSTC 1271

This course expands upon the student's existing knowledge of legal and procedural concepts introduced in PSTC 1271. Instruction is focused on correctional codes and statutes, inmate classification, contraband, and booking and inmate supervision. This course is formerly known as PSTC 1294. Pass/No Pass only.

PSTC 1403 Basic Skills for the Non-Sworn Investigator

Units: 1.5
Hours: 32 hours LEC
Prerequisite: None.

This course provides the student with foundational skills and knowledge for employment as a non-sworn investigator with a law enforcement organization. Topics include the role of the non-sworn investigator, evidence, interview skills, report writing, technology resources, criminal justice information systems, subpoenas and due diligence, personal safety, and courtroom testimony. Pass/No Pass only.

PSTC 1500 Basic Sheriff Academy

Units: 25
Hours: 198 hours LEC; 758 hours LAB
Prerequisite: None.

Enrollment Limitation: Students must 1) be free of felony convictions; 2) possess a valid California Driver’s License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate, pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.

This course is a consolidated program of regular basic law enforcement training. Topics include criminal law, juvenile law, laws of evidence, administration of justice, community relations, investigation, traffic control and procedures, patrol procedures, defensive tactics, arrest control, weaponless defense, baton techniques, first aid/cardiopulmonary resuscitation (CPR), and vehicle operations. This course is certified by the California Commission on Peace Officer Standards and Training (POST). Pass/No Pass only.

PSTC 1501 PC 832 Arrest, Search & Seizure

Units: 2
Hours: 30 hours LEC; 10 hours LAB
Prerequisite: None.

This course satisfies the arrest, search, and seizure requirement for peace officers as defined in section 832 of the California Penal Code. Topics include professionalism, ethics, the criminal justice system, policing in the community, laws of evidence and arrest, investigation, cultural diversity/discrimination, use of force, and arrest and control. This course is Commission on Peace Officer Standards and Training (POST) certified. Pass/No Pass only.

PSTC 1502 Basic Law Enforcement Academy- Module III

Units: 6 - 7
Hours: 82 - 84 hours LEC; 86 - 130 hours LAB
Prerequisite: None.

Enrollment Limitation: Students must 1) be free of felony convictions 2) possess a valid California Driver’s License 3) undergo a fingerprint and criminal history check 4) be a minimum of 18 years of age 5) be a United States high school graduate, pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university, and 6) complete a medical suitability examination.

This course satisfies the Commission on Peace Officer Standards and Training (POST) Level III reserve peace officer training requirements. It is the first in a three-part series of courses which prepares students for entry-level employment as reserve or regular full-time California peace officers. Topics include leadership, professionalism, and ethics; policing in the community; introduction to criminal law; investigative report writing; use of force and de-escalation; traffic enforcement; crimes scenes and forensics; arrest and control; firearms; and cultural diversity and discrimination. Pass/No Pass only.

PSTC 1503 Basic Law Enforcement Academy- Module II

Units: 8 - 11
Hours: 108 - 140 hours LEC; 132 - 200 hours LAB
Prerequisite: PSTC 1502

Enrollment Limitation: Students must 1) be free of felony convictions 2) possess a valid California Driver’s License 3) undergo a fingerprint and criminal history check 4) be a minimum of 18 years of age 5) be a United States high school graduate, pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university, and 6) complete a medical suitability examination.

This course satisfies training requirements of the Commission on Peace Officer Standards and Training (POST) Module II. Topics include property crimes, crimes against persons, crimes against the justice system, laws of arrest, search and seizure, presentation of evidence, patrol techniques, vehicle pullovers, crimes in progress, lifetime fitness, and career preparation. POST certification #2970-00140. Pass/No Pass only.

PSTC 1504 Basic Law Enforcement Academy- Module I

Units: 13.5 - 17
Hours: 149 - 190 hours LEC; 286 - 360 hours LAB
Prerequisite: PSTC 1503
Enrollment Limitation: Students must 1) be free of felony convictions; 2) possess a valid California Driver’s License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate, pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.

This course, the third in a three-part series of courses, satisfies training requirements of the Commission on Peace Officer Standards and Training (POST) for the Level I reserve or full-time regular peace officer. Topics include victimology, crimes against children, juvenile law and procedure, vehicle operations, crimes in progress, domestic violence, missing persons, traffic collision investigation, lifetime fitness, firearms and chemical agents, persons with disabilities, gang awareness, emergency management, interview and interrogations, courtroom testimony and emotional survival. Upon successful completion the students will possess a Certificate of Completion of the POST Basic Law Enforcement Academy. POST certification #2970-00150. Pass/No Pass only.

PSTC 1505 California Highway Patrol Basic Law Enforcement Academy

Units: 25
Hours: 152 hours LEC; 894 hours LAB
Prerequisite: None.
Enrollment Limitation: Students must 1) be free of felony convictions; 2) possess a valid California Driver’s License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate, pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.

This course introduces the student to requirements that must be met for employment as a peace officer and the role of enforcement agency background and interview process. Field trips may be required. Pass/No Pass only.

PSTC 1506 Sacramento Police Department Basic Academy

Units: 22 - 26
Hours: 251 hours LEC; 466 - 682 hours LAB
Prerequisite: None.
Enrollment Limitation: Students must 1) be free of felony convictions; 2) possess a valid California Driver’s License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate, pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.

This course presents a comprehensive program of training in law, ethics, community policing, vehicle operations, use of force, patrol techniques, firearms, traffic control and enforcement, criminal investigations, physical fitness, chemical agents, and first aid and CPR. Upon successful completion of the course, students receive a Commission on Peace Officer Standards and Training (POST) Basic Academy Certificate of Completion. This course is formerly known as SPD 1100. Pass/No Pass only.

PSTC 1507 Preparing for a Law Enforcement Career

Units: 0.5 - 0.75
Hours: 4 - 8 hours LEC; 16 - 24 hours LAB
Prerequisite: None.

This course introduces the student to requirements that must be met for application and acceptance into a California Peace Officer Standards and Training (POST) certified regular basic law enforcement academy. Topics include an overview of the academy training program and program standards, POST and legislatively mandated pre-academy testing, educational requirements, required clearances, reading and writing tests, physical skills tests, and availability of financial assistance through the community college. It also covers guidance in researching law enforcement agencies throughout the state and preparing for a law enforcement agency background and interview process. Field trips may be required. Pass/No Pass only.

PSTC 1514 Academy Graduate Training - SPD

Units: 1.5 - 2
Hours: 28 - 34 hours LEC
Prerequisite: None.

This course, designed for the new academy graduate, provides specific additional training in areas not covered in the POST Basic Academy. Topics include use of the intoxilyzer, in-car camera, field training overview and the robbery alarm monitor system. Pass/No Pass only.

PSTC 1515 Academy Instructor Certification Course

Units: 1.5
Hours: 24 hours LEC; 16 hours LAB
Prerequisite: None.

This course provides valuable skills for all instructors of California law enforcement including, in-service and public safety dispatch training. Students will gain facilitation skills and an understanding of how to employ adult learning methodologies appropriate for various law enforcement topics. This course meets the basic instructional skills training requirement to teach in the California Peace Officer Standards and Training (POST) Regular Basic Course and for the Academy Instructor Certificate Program. Pass/No Pass only.

PSTC 1517 Academy Graduate Training

Units: 2
Hours: 41 hours LEC; 32 hours LAB
Prerequisite: California POST-certified basic law enforcement academy within 2 years or equivalent as determined by the Dean of Academy Instruction. NOTE: Approval of equivalent training is not a guarantee that state regulatory or licensing agencies will also grant equivalency.

Enrollment Limitation: Students must 1) be free of felony convictions; 2) possess a valid California Driver’s License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate, pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.

This course provides the recent POST-certified law enforcement academy graduate with additional training in topics specific to daily field operations. It is intended to bridge the academy and field training programs with a focus on enhancing the safety and well-being of law enforcement officers and the communities they serve. Topics include introduction to the field training program, internal affairs and the role of the police officers’ union, legal updates, fair and impartial policing, less lethal force options and deployment, crowd movement and control, court appearances, and work-life balance and wellness. Pass/No Pass only.

PSTC 1520 POST Supervisor

Units: 2
Hours: 16 hours LEC; 64 hours LAB
Prerequisite: POST-certified basic law enforcement academy or equivalent as determined by the Dean of Academy Instruction. NOTE: Approval of equivalent training is not a guarantee that state regulatory or licensing agencies will also grant equivalency.

Enrollment Limitation: Students must 1) be free of felony convictions; 2) possess a valid California Driver’s License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age;
This course examines the legal, moral, and ethical responsibilities and challenges associated with first line field operations supervision specific to the law enforcement environment. Lectures, facilitated discussions, and student presentations emphasize the examination of case studies, reviews and updates of case and statutory law, situational leadership, followership, critical incidents and critical incident management, stress management, managing conflict, counseling, and problem solving. It includes examining personality profiles for effective team development and supervision, developing and conducting subordinate counseling sessions, and preparing performance evaluations and improvement programs. This course is certified by the California Commission on Peace Officer Standards and Training, POST #2970-00400. Pass/No Pass only.

**PSTC 1521 Supervisory (STC Format)**

**Units:** 2  
**Hours:** 24 hours LEC; 56 hours LAB  
**Prerequisite:** PSTC 1270, 1271, or 1273

This course focuses on aspects of supervision specific to the field of corrections. This examination of supervision in the context of parole and probation environments will include ethics, problem solving, discipline, legal update, grievance procedures, and leadership. This course is accredited by the State of California’s Standards and Training for Corrections (STC) with STC Certification #0218-011703. Pass/No Pass only.

**PSTC 1531 Frontline Leadership SPD**

**Units:** 3  
**Hours:** 24 hours LEC; 59 hours LAB  
**Prerequisite:** None.

This course is designed to enhance the leadership skills of line-level law enforcement personnel. Topics include characteristics of leadership, personal accountability, holding employees accountable, and ethical dilemmas in leadership.

**PSTC 1533 Internal Affairs Investigation**

**Units:** 1  
**Hours:** 16 hours LEC; 8 hours LAB  
**Prerequisite:** POST certified basic law enforcement academy or equivalent as determined by the Dean of Academy Instruction. NOTE: Approval of equivalent training is not a guarantee that state regulatory or licensing agencies will also grant equivalency.  
**Enrollment Limitation:** Students must 1) be free of felony convictions; 2) possess a valid California Driver’s License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate; pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination

This course introduces the issues and techniques associated with conducting Internal Affairs investigations in a law enforcement environment. Topics include the role and purpose of internal affairs, risk and liability assessment, role of internal affairs investigator, policy considerations and public employee rights. This course also explores the impact of internal investigations on employees, the organization and the public. This course is certified by the California Peace Officer Standards and Training (POST). Pass/No Pass only.

**PSTC 1534 Sergeant Training and Orientation**

**Units:** 2.5  
**Hours:** 40 hours LEC; 40 hours LAB  
**Prerequisite:** State of California Commission on Peace Officer Standards and Training (POST)-certified basic law enforcement academy or equivalent as determined by the Dean of Academy Instruction. NOTE: Approval of equivalent training is not a guarantee that state regulatory or licensing agencies will also grant equivalency.  
**Enrollment Limitation:** Students must 1) be free of felony convictions as reported by the Department of Justice; 2) possess a valid California Driver's License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate; pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.

This course is designed for new law enforcement sergeants. It emphasizes leadership, handling of critical incidents and major crimes, internal affairs investigations, and pursuit liability. Pass/No Pass only.

**PSTC 1542 Property and Evidence Room Management**

**Units:** 1.25  
**Hours:** 24 hours LEC  
**Prerequisite:** None.

This course covers the legal requirements, procedures, and basic responsibilities and techniques involved in the proper operation of a property room. Topics include property room problems and solutions, packaging, security, storage management, documentation, purging, dispositions, audits, and inventories.

**PSTC 1550 Code Enforcement Officer**

**Units:** 2  
**Hours:** 36 hours LEC; 4 hours LAB  
**Prerequisite:** None.

This course is designed for newly appointed code enforcement/peace officer who is assigned to enforce the codes of a city, county, or state. Topics include ethics, zoning laws, sub-standard housing, inspection protocol, report writing, case preparation, and administrative hearings. Pass/No Pass only.

**PSTC 1551 Code Enforcement Officer - Intermediate**

**Units:** 2  
**Hours:** 36 hours LEC; 4 hours LAB  
**Prerequisite:** None.

This course is designed for code enforcement/peace officers with experience enforcing city, county, and state administrative codes. Topics include legal update, courtroom testimony, administrative hearings, tactical communication, use of pepper spray, problem oriented policing (POP), customer service, officer safety, and animal awareness. Pass/No Pass only.

**PSTC 1552 Code Enforcement Officer - Advanced**

**Units:** 2  
**Hours:** 36 hours LEC; 4 hours LAB  
**Prerequisite:** None.

This course covers advanced topics for code enforcement/peace officers. Topics include legal updates and personal safety, with a focus on vectors, molds, fire, electrical, and plumbing codes. Pass/No Pass only.

**PSTC 1555 Regulatory Investigative Techniques**

**Units:** 2  
**Hours:** 40 hours LEC  
**Prerequisite:** None.
This course is designed for the law enforcement officer assigned to an investigative role within a state agency. The course focuses on techniques that enhance the investigator's ability to prepare a criminal or administrative case for prosecution in a criminal or administrative hearing. Topics include roles and responsibilities, interview techniques, search warrants and report writing. Pass/No Pass only.

PSTC 1571 Field Training Officer

Units: 2
Hours: 40 hours LEC
Prerequisite: POST certified basic law enforcement academy or equivalent as determined by the Dean of Academy Instruction. NOTE: Approval of equivalent training is not a guarantee that state regulatory or licensing agencies will also grant equivalency.

Enrollment Limitation: Students must 1) Be free of felony convictions; 2) possess a valid California Driver's License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate; pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.

This course is designed for newly assigned personnel responsible for training entry-level law enforcement officers. Topics include field training program goals and objectives; the expectations, functions, and roles of the field training officer; legal and liability issues for field training officers; driver awareness and safety; interaction with persons with mental illness or intellectual disability; teaching and training skills development; competency evaluation and documentation; intervention techniques; remediation; and test and scenario development strategies. Field Training Officer is certified by the California Commission on Peace Officer Standards and Training (POST), certification #2970-31725. Pass/No Pass only.

PSTC 1572 Field Training Officer - Update

Units: 1
Hours: 24 hours LEC
Prerequisite: PSTC 1571

This course updates field training officers on new training methods, new policing methods, and legal liabilities. Topics include academy update, remediation methodologies, tactical communications, adult learning theories, ethics, liability, and supervision. Pass/No Pass only.

PSTC 1573 Field Training Program Supervisor, Administrator, Coordinator Course

Units: 1
Hours: 24 hours LEC
Prerequisite: POST certified basic law enforcement academy or equivalent as determined by the Dean of Academy Instruction. NOTE: Approval of equivalent training is not a guarantee state regulatory or licensing agencies will also grant equivalency.

Enrollment Limitation: Students must 1) Be free of felony convictions; 2) possess a valid California Driver's License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate; pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.

This POST certified course is designed for personnel responsible for administering their law enforcement agency’s Field Training Program. Topics include POST approved Field Training Program and manual, managing a training program, documentation and legal liability. Pass/No Pass only.

PSTC 1586 Citizens Academy - SPD

Units: 1
Hours: 12 hours LEC; 24 hours LAB
Prerequisite: None.

This course provides a comprehensive overview of the criminal justice system. Topics include the role of the District Attorney, role of law enforcement and internal affairs, special challenges for the prosecution, race as a factor in the criminal justice system, the federal criminal justice system, anatomy of a criminal case, the judicial system, community focus and gangs, and building bridges and partnerships. Pass/No Pass only.

PSTC 1602 Arrest and Control Instructor

Units: 1.25
Hours: 80 hours LAB
Prerequisite: State of California Commission on Peace Officer Standards and Training (POST) certified basic law enforcement academy or equivalent as determined by the Dean of Academy Instruction. NOTE: Approval of equivalent training is not a guarantee that the state regulatory or licensing agencies will also grant equivalency.

Enrollment Limitation: Students must 1) Be free of felony convictions; 2) possess a valid California Driver’s License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate; pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.

This course introduces students to the requisite skills and knowledge to provide arrest and control instruction in State of California Commission on Peace Officer Standards and Training (POST) certified law enforcement and/or State of California Board of State and Community Corrections Standard and Training for Corrections (STC) certified correctional environments. Instruction is provided in the areas of arrest and control, liability issues for police and corrections, health and safety procedures for instructing manipulative skills, safe and effective application of control holds, take-down maneuvers, and ground fighting. Pass/No Pass only.

PSTC 1603 Arrest and Control Instructor Advanced

Units: 0.5
Hours: 40 hours LAB
Prerequisite: PSTC 1602

Enrollment Limitation: Students must 1) be free of felony convictions; 2) possess a valid California Driver’s License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate; pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.

This course provides students with advanced skills and knowledge for providing weaponless defense ground fighting instruction in State of California Commission on Peace Officer Standards and Training (POST) certified law enforcement and/or State of California Board of State and Community Corrections Standard and Training for Corrections (STC) certified correctional environments. Topics include legal updates, ground control, take-downs, wall defenses, escapes, and sustained resistance techniques. Pass/No Pass only.

PSTC 1604 Arrest and Control Instructor Update

Units: 0.25
Hours: 24 hours LAB
Prerequisite: PSTC 1602

Enrollment Limitation: Students must 1) be free of felony convictions; 2) possess a valid California Driver’s License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate; pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.

This course provides weaponless defense instructors with updates in techniques, tactics, and legal issues in contemporary policing. Topics include legal updates, control holds, take-downs, arrest tactics.
searches, handcuffing, ground control, and expert witness testimony. Pass/No Pass only.

**PSTC 1621 Impact Weapons Instructor**

**Units:** 1.25  
**Hours:** 80 hours LAB  
**Prerequisite:** POST certified basic law enforcement academy or equivalent as determined by the Dean of Academy Instruction. NOTE: Approval of equivalent training is not a guarantee state regulatory or licensing agencies will also grant equivalency.  

**Enrollment Limitation:** Students must 1) be free of felony convictions; 2) possess a valid California Driver's License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate; pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.

This course introduces students to effective instructional design and methods for teaching a Peace Officers Standards and Training (POST) certified course in the use of impact weapons course in public safety environments. Topics include adult learning, aggression and suspect action, POST regulations for instructing, evaluating, and testing in the use of impact weapons and documentation per the POST Administrative Manual (PAM), relevant case law, legal issues, physical warm-ups, striking and blocking techniques with the baton and the yawara stick, personal body weapons, and confrontational exercises and evaluations. Pass/No Pass only.

**PSTC 1622 Impact Weapons Instructor - Update**

**Units:** 0.25  
**Hours:** 16 hours LAB  
**Prerequisite:** PSTC 1621  

**Enrollment Limitation:** Students must 1) be free of felony convictions; 2) possess a valid California Driver's License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate; pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.

This course provides impact weapons instructors with updated skills and knowledge in the use of force and the accompanying legal issues in the public safety environment. Topics include review of baton use, striking techniques, and legal and liability updates. Pass/No Pass only.

**PSTC 1625 Arrest Control and Baton Instructor - SPD**

**Units:** 3  
**Hours:** 42 hours LEC; 38 hours LAB  
**Prerequisite:** None.

This course provides law enforcement officers with the skills necessary to be certified as arrest control and Baton instructors. Topics include principles of arrest control, legal issues, search fundamentals, handcuffing techniques and application, ground-fighting techniques, and carotid control hold. Pass/No Pass only.

**PSTC 1640 Firearms Familiarization (PC 832)**

**Units:** 0.5  
**Hours:** 8 hours LEC; 16 hours LAB  
**Prerequisite:** None.  

**Enrollment Limitation:** Students must 1) be free of felony convictions as reported by the Department of Justice; 2) possess a valid California Driver's License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate, pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.

This course provides a basic introduction to legal aspects of shooting and firearms safety. Topics include safe and proper handling, nomenclature, mechanical functions, manipulation, range safety, shooting principles, accuracy, and live-fire exercises. This POST-certified course complies with California Penal Code 832. All firearms exercise testing will be conducted under written presenter safety procedures and protocols established in accordance with POST safety guidelines. Students are required to comply with every aspect of presenter safety procedures and/or protocols during firearms training and safety.

**PSTC 1645 Force and Weaponry - Basic**

**Units:** 1.5  
**Hours:** 18 hours LEC; 22 hours LAB  
**Prerequisite:** PSTC 1273  

**Enrollment Limitation:** Students must 1) be free of felony convictions as reported by the Department of Justice; 2) possess a valid California Driver's License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate, pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.

This course meets the Standards and Training for Corrections (STC) requirements for field probation officers who are required to carry firearms in the performance of their duties. Topics include introduction to firearms, firearms safety, basic firearms manipulation, use of force, weaponless defense, weapon retention, and tactical movement. Students are required to participate in live-fire exercises and pass the PC 832 and close combat firearms qualifications. Upon course completion, students receive PC 832 firearms certification from STC and the California Commission on Peace Officer Standards and Training (POST). Pass/No Pass only.

**PSTC 1646 Force and Weaponry - Advanced**

**Units:** 1  
**Hours:** 16 hours LEC; 8 hours LAB  
**Prerequisite:** PSTC 1645  

**Enrollment Limitation:** Students must 1) be free of felony convictions; 2) possess a valid California Driver's License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate, pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.

This course provides an update for armed probation officers. Topics include legal issues, shoot/don't shoot, weapon retention, arrest and control, and weapon malfunctions. Pass/No Pass only.

**PSTC 1648 Firearms Tactical Rifle SSD**

**Units:** 0.75  
**Hours:** 10 hours LEC; 14 hours LAB  
**Prerequisite:** POST certified basic law enforcement academy or equivalent as determined by the Dean of Academy Instruction. NOTE: Approval of equivalent training is not a guarantee state regulatory or licensing agencies will also grant equivalency.  

**Enrollment Limitation:** Students must 1) be free of felony convictions; 2) possess a valid California Driver's License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate, pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.

This course builds upon the student's existing skills and knowledge in the legal, safe, and proper use of firearms in the law enforcement environment. Instruction includes the safe and proper handling of the long rifle, consideration of environmental factors, tactical shooting,
tactical movement, and shooting under dim light conditions. This course is formerly known as SCSD 1221. Pass/No Pass only.

**PSTC 1650 Firearms and Tactical Rifle Instructor**

- **Units:** 2.5
- **Hours:** 30 hours LEC; 50 hours LAB
- **Prerequisite:** PSTC 1648 and 1683; State of California Commission on Peace Officer Standards and Training (POST) certified basic law enforcement academy or equivalent as determined by the Dean of Academy Instruction. NOTE: Approval of equivalent training is not a guarantee that state regulatory or licensing agencies will also grant equivalency.
- **Enrollment Limitation:** Students must be peace officer members of a police department, sheriff's office, marshal's office, the California Highway Patrol, the Department of Justice, or the Department of Corrections and Rehabilitation and are authorized by their agencies to possess short-barreled rifles within the course and scope of their duties. Additionally, students must have completed a training course in the use of these weapons certified by POST.

This course is specifically designed to prepare experienced law enforcement personnel to teach the POST certified firearms course at the basic law enforcement academy level and in-service law enforcement firearms training courses. Topics include the role of the law enforcement firearms instructor, liability issues, instructor development, lesson plan development, basic marksmanship, shooter problem analysis, standard and non-traditional shooting positions, weapons transition, and tactical movement and cover. This course meets the minimum instructor certification requirements to be a POST certified pistol and rifle instructor. Successful completion of all portions of the course, including all course work and firearms qualifications, are mandatory to receive certification. Partial certification will not be allowed. POST certification 2970-21209. Pass/No Pass.

**PSTC 1651 Firearms Instructor Update**

- **Units:** 0.5
- **Hours:** 2 hours LEC; 22 hours LAB
- **Prerequisite:** PSTC 1650
- **Enrollment Limitation:** Students must 1) be free of felony convictions; 2) possess a valid California Driver's License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate; pass the GED or the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.

This course is designed to further develop and update existing firearm instructors on instructional techniques, diagnostic interpretation, and target systems. This course is accredited by the Commission on Peace Officer Standards and Training (POST) with POST Certification #297021740 and the Standards and Training for Correction (STC) Program #0218-027422. This course is formerly known as PSTC 1258. Pass/No Pass only.

**PSTC 1653 Firearms Instructor - Long Rifle**

- **Units:** 1.5
- **Hours:** 30 hours LEC; 10 hours LAB
- **Prerequisite:** PSTC 1650; POST-certified basic law enforcement academy or equivalent as determined by the Dean of Academy Instruction. NOTE: Approval of equivalent training is not a guarantee that state regulatory or licensing agencies will also grant equivalency.

This course increases the student's knowledge of radio procedures and technology, emergency dispatch, and telecommunications. Topics include radio equipment, radio codes, basic voice dispatch, special assistance commands, broadcast procedures, officer safety, and search patterns. Pass/No Pass only.
PSTC 1663 SPD Communications Training Officer Program

Units: 2
Hours: 34 hours LEC; 6 hours LAB
Prerequisite: Completion of a POST Law Enforcement Basic or Dispatcher’s Academy

This course is designed to instruct law enforcement dispatchers on the techniques for training newly assigned communications center personnel. Topics include ethics and leadership, adult learning concepts, training methods and performance assessments, training action plans, and emotional intelligence and conflict resolution throughout the training process. Pass/No Pass only.

PSTC 1671 Automated Field Reporting (AFR)

Units: 0.5
Hours: 4 hours LEC; 16 hours LAB
Prerequisite: PSTC 1660 (Public Safety Dispatcher - Basic (SPD)) or equivalent as determined by the Dean of academy instruction.

This course builds upon students’ existing skills, providing training and orientation to the law enforcement records management system. Topics include records management, tracking, data screens and terminology. This course is formerly known as SPD 1193. Pass/No Pass only.

PSTC 1683 Continuing Professional Training for Peace Officers

Units: 0.25 - 1.5
Hours: 6 - 16 hours LEC
Prerequisite: California POST-certified basic law enforcement academy within two (2) years or equivalent as determined by the Dean of Academy Instruction (Chapter 11, California Code of Regulations, Section 1005). NOTE: Approval of equivalent training is not a guarantee state regulatory or licensing agencies will also grant equivalency.

Enrollment Limitation: Students must 1) be free of felony convictions; 2) possess a valid California Driver’s License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate; pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.

This course is designed to meet the 2-year perishable skills training cycle requirements for California peace officers. Course content consists of instructional blocks which update and advance the student’s existing knowledge and skill set associated with providing public safety in dynamic and multicultural environments. Instruction includes tactical communication, first aid/CPR update, tactical firearms, arrest and control, and may include additional topics determined by legislative mandates and/or regional needs. Formerly SCSD 1150. Pass/No Pass only.

PSTC 1684 Continued Professional Training - Sacramento Police Department

Units: 0.25 - 2.5
Hours: 4 - 40 hours LEC; 4 - 40 hours LAB
Prerequisite: POST certified basic law enforcement academy within two (2) years or equivalent as determined by the Dean of Academy Instruction (Chapter 11, California Code of Regulations, Section 1005). NOTE: Approval of equivalent training is not a guarantee state regulatory or licensing agencies will also grant equivalency.

Enrollment Limitation: Students must 1) be free of felony convictions; 2) possess a valid California Driver’s License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate; pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.

This course updates and advances the student’s existing knowledge and skill set associated with peacekeeping and law enforcement in contemporary society. Instruction in evolving issues includes the safe handling of firearms, tactical shooting, tactical movement, arrest and control, ground fighting, chemical weapons, non-lethal weapons, government codes, penal codes, vehicle codes, health and safety codes, welfare and institution codes, and interpersonal and tactical communication. This course is formerly known as SPD 1193. Pass/No Pass only.

PSTC 1685 Patrol Entry and Search Training - SPD

Units: 0.25
Hours: 3 hours LEC; 5 hours LAB
Prerequisite: POST certified basic law enforcement academy or equivalent as determined by the Dean of Academy Instruction. NOTE: Approval of equivalent training is not a guarantee state regulatory or licensing agencies will also grant equivalency.

Enrollment Limitation: Students must 1) be free of felony convictions; 2) possess a valid California Driver’s License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate; pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.

This update course provides students with information on the various aspects of patrol entry and search techniques. Topics include firearms entry and search techniques in the law enforcement environment, including room clearing, three man bumph, and team composition. This course is formerly known as SPD 1217. Pass/No Pass only.

PSTC 1720 Defensive Driving

Units: 0.25
Hours: 8 hours LEC
Prerequisite: None.

This course is designed to enhance the driving skills of public employees who are required to drive motor vehicles in the performance of their duties. Pass/No Pass only.

PSTC 1722 Driver Training - Update

Units: 0.5
Hours: 6 hours LEC; 12 hours LAB
Prerequisite: POST certified basic law enforcement academy or equivalent as determined by the Dean of Academy Instruction. NOTE: Approval of equivalent training is not a guarantee that state regulatory or licensing agencies will also grant equivalency.

Enrollment Limitation: Students must 1) be free of felony convictions; 2) possess a valid California Driver’s License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate; pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.

This course is designed for law enforcement personnel to update them on new laws and refresh their driving skills. This is a Commission on Peace Officer Standards and Training (POST) mandate. Pass/No Pass only.

PSTC 1729 Emergency Vehicle Operations Instructor (SSD/SPD)

Units: 1
Hours: 12 hours LEC; 28 hours LAB
Prerequisite: Completion of a Commission on Peace Officer Standards and Training (POST) Basic Academy

This course provides information and resources to start an emergency vehicle operations course, develop instructional lesson plans, and day to day operational issues. Topics include starting an Emergency Vehicle Operations Course program, Emergency Response, Pursuit Driving, and Civil Liability. Pass/No Pass only.
PSTC 1734 Basic K9 Training

Units: 7
Hours: 8 hours LEC; 372 hours LAB
Prerequisite: POST-certified basic law enforcement academy or equivalent as determined by the Dean of Academy Instruction. NOTE: Approval of equivalent training is not a guarantee that state regulatory or licensing agencies will also grant equivalency.
Enrollment Limitation: Students must 1) be free of felony convictions; 2) possess a valid California Driver's License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate; pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.

This course provides law enforcement officers with skills and knowledge in areas of canine (K9) training and deployment. Topics include care at the home of the canine partner, canine behavior, obedience, obstacle and agility course work, field searches, narcotics and explosives detection, vehicle retention, and safety. Pass/No Pass only.

PSTC 1744 Less Lethal Force Update-SPD

Units: 0.75
Hours: 12 hours LEC; 6 hours LAB
Prerequisite: POST certified basic law enforcement academy or equivalent as determined by the Dean of Academy Instruction. NOTE: Approval of equivalent training is not a guarantee state regulatory or licensing agencies will also grant equivalency.
Enrollment Limitation: Students must 1) be free of felony convictions; 2) possess a valid California Driver's License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate; pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.

This update course on lethal force enhances the knowledge of personal safety and effectiveness of the officer assigned to patrol. Topics include pepper spray, use of baton, and carotid holds. This course is formerly known as SPD 1195. Pass/No Pass only.

PSTC 1745 Police Radar Operator (SPD)

Units: 0.5
Hours: 32 hours LAB
Prerequisite: POST certified basic law enforcement academy or equivalent as determined by the Dean of Academy Instruction. NOTE: Approval of equivalent training is not a guarantee state regulatory or licensing agencies will also grant equivalency. Students who do not hold a POST basic certificate, or equivalent, may struggle in this course, because fundamental terms and concepts and laws basic to law enforcement will not be taught or explained.
Enrollment Limitation: Students must 1) be free of felony convictions; 2) possess a valid California Driver's License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate; pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.

This course advances the student’s existing knowledge and skill set in the area of traffic violation enforcement and in the proper use of police radar devices. Topics include speed enforcement, history and theory, vehicle code law and court decisions, moving radar operation, radar effects, and visual speed and range estimation. The course may meet at various off-campus locations. Pass/No Pass only.

PSTC 1749 Officer Survival and Tactics

Units: 1
Hours: 8 hours LEC; 32 hours LAB
Prerequisite: POST certified basic law enforcement academy or equivalent as determined by the Dean of Academy Instruction. NOTE: Approval of equivalent training is not a guarantee state regulatory or licensing agencies will also grant equivalency.

This course examines a wide range of crisis intervention services, including pre-incident and post-incident crisis education, significant support services, crisis intervention for individuals, demobilizations after large-scale traumatic incidents, small-group diffusing, and the group intervention known as Critical Incident Stress Debriefing (CISD). Pass/No Pass only.

PSTC 1750 Campus Law Enforcement

Units: 2
Hours: 36 hours LEC; 4 hours LAB
Prerequisite: Successful completion of a POST certified basic law enforcement academy within the last three years or current equivalent
This course advances the law enforcement or corrections student's knowledge and skills set in legal and behavioral techniques associated with interview and interrogation. Topics include predictable behavior, free-format interviews, elimination interviews, polygraphs, and the Ten-Step Plan for interviews and interrogations. This course is certified by the California Commission on Peace Officer Standards and Training (POST), #2970-31445 and Standards and Training for Corrections (STC), #0218-007921. Pass/No Pass only.

**PSTC 1801 Background Investigations**

**Units:** 1.5 - 2  
**Hours:** 32 - 40 hours LEC  
**Prerequisite:** None.

This course is designed for law enforcement or civilian personnel who are responsible for conducting background investigations for the hiring of public safety personnel. Topics include the background process, psychological evaluations, interviewing techniques and documentation. This course is approved by the California Commission on Peace Officer Standards and Training (POST) and California Standards and Training for Corrections (STC). Pass/No Pass only.

**PSTC 1804 Informant Development and Maintenance**

**Units:** 1  
**Hours:** 24 hours LEC  
**Prerequisite:** POST certified basic law enforcement academy or equivalent as determined by the Dean of Academy Instruction. NOTE: Approval of equivalent training is not a guarantee that state regulatory or licensing agencies will also grant equivalency.

**Enrollment Limitation:** Students must 1) be free of felony convictions; 2) possess a valid California Driver’s License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate; pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.

This course advances students' existing investigative skills, interview and interrogation skills, informant development and management, case management and the development and execution of search warrants. Topics include common problems when using informants, limitations on the use of informants, informant motives, informant policies, investigative strategies, and informants and ethics.

**PSTC 1807 Advanced Identification of Organized Criminal Street Gangs and Criminal Gang Activities**

**Units:** 0.25 - 0.75  
**Hours:** 8 - 16 hours LEC  
**Prerequisite:** None.

This course provides students with information and resource identification critical to the reduction of gang violence. Pass/No Pass only.

**PSTC 1812 Fingerprint Identification - Basic**

**Units:** 2  
**Hours:** 40 hours LEC  
**Prerequisite:** None.

This course is designed to provide basic instruction in fingerprint comparison and identification. Topics include ridge characteristics, basic pattern types, classifications and verifications. Pass/No Pass only.
PSTC 1813 Crime Scene and Forensic Photography of Physical Evidence

Units: 1
Hours: 24 hours LEC
Prerequisite: None.

This course provides law enforcement crime scene investigators the skills needed to conduct forensic photography of physical evidence as well as conduct general crime scene photography. Topics include legal admissibility, photographic coverage, major crime scene photography, film speed, lighting techniques, and photographic equipment. Pass/No Pass only.

PSTC 1814 Advanced Latent Print Comparison & Identification

Units: 2
Hours: 40 hours LEC
Prerequisite: PSTC 1812

This advanced course is designed for the crime scene investigator or fingerprint technician to learn how to compare and identify latent/fragmentary prints to inked fingerprint and palm print impressions. This course is formerly known as PSTC 1821. Pass/No Pass only.

PSTC 1820 Crime Scene Investigation - Basic

Units: 2
Hours: 30 hours LEC; 30 hours LAB
Prerequisite: None.

This course is designed for newly assigned law enforcement agency crime scene investigators who are responsible for conducting crime scene investigations. Topics include evidence integrity, documentation, evidence recognition and preservation, firearms study, latent prints, and evidence handling and storage. Pass/No Pass only.

PSTC 1852 Drug and Alcohol Recognition - Update

Units: 1
Hours: 24 hours LEC
Prerequisite: None.

This course provides law enforcement personnel with the knowledge and skills to evaluate the effects of drugs and alcohol on an individual and to provide expert testimony on the evaluation. Topics include legal codes, stimulants and depressants, investigative techniques and courtroom testimony. Pass/No Pass only.

PSTC 1853 Integrated Narcotics Training

Units: 0.5 - 1
Hours: 4 - 8 hours LEC; 32 - 36 hours LAB
Prerequisite: POST certified basic law enforcement academy or equivalent as determined by the Dean of Academy Instruction. NOTE: Approval of equivalent training is not a guarantee state regulatory or licensing agencies will also grant equivalency. Approval of equivalent training is not a guarantee state regulatory or licensing agencies will also grant equivalency.

Enrollment Limitation: Students must 1) Be free of felony convictions; 2) possess a valid California Driver's License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate; pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.

This course advances the student's existing advanced investigative skills with specialized narcotics related training. Topics include ethics and integrity, surveillance techniques, undercover operations, and asset seizure. This course is formerly known as SPD 1237. Pass/No Pass only.

PSTC 1854 Drug Recognition Evaluator Course

Units: 3.5
Hours: 64 hours LEC; 8 hours LAB
Prerequisite: POST certified basic law enforcement academy or equivalent as determined by the Dean of Academy Instruction. NOTE: Approval of equivalent training is not a guarantee state regulatory or licensing agencies will also grant POST certified basic law enforcement academy or equivalent as determined by the Dean of Academy Instruction. NOTE: Approval of equivalent training is not a guarantee state regulatory or licensing agencies will also grant equivalency.

Enrollment Limitation: Students must 1) Be free of felony convictions; 2) possess a valid California Driver's License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate; pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.

This course enhances the skills of law enforcement personnel to evaluate and provide expert testimony on the effects of drugs and alcohol. Topics include psycho-physical tests, eye examinations, alcohol workshop, signs and symptoms, drugs in society, vehicle operation, drug classification process and procedures, nystagmus, convergence, pupil size and reaction to light, physiology and drugs, depressants, stimulants, physician's desk reference, hallucinogens, associative anesthetics, narcotic analgesics, inhalants, cannabis, report writing, curriculum vitae, and case preparation and testimony. Pass/No Pass only.

PSTC 1874 Traffic Collision Investigation - Intermediate

Units: 2
Hours: 40 hours LEC
Prerequisite: PSTC 1900

This course is designed to expand the investigative knowledge and skills of the traffic collision investigator. Topics include definitions and terminologies associated with minor and major collisions, measuring and diagramming the collision scene and speed computation. Pass/No Pass only.

PSTC 1900 Traffic Collision - Basic

Units: 2
Hours: 40 hours LEC
Prerequisite: None.

This course provides in-depth instruction into the multiple disciplines of traffic collision investigation. Topics include scene management techniques and introduction to the Manual on Uniform Traffic Control Devices, highway engineering definitions, Nine-Cell Matrix, incident scene photography, primary collision factors, identification and documentation of physical evidence, measuring and diagramming methodology, use of the Northwestern University traffic template functions and nomographs, and an in-depth discussion on proper traffic collision documentation and Highway Patrol Manual 110.5, Collision Investigation Manual (CIM). This course satisfies the prerequisites for the Intermediate Collision Investigation course, as well as the requirements of Vehicle Code Section 40600.

PSTC 1902 Traffic Accident Reconstruction

Units: 4
Hours: 72 hours LEC; 8 hours LAB
Prerequisite: POST certified basic law enforcement academy or equivalent as determined by the Dean of Academy Instruction. NOTE: Approval of equivalent training is not a guarantee state regulatory or licensing agencies will also grant equivalency. Students who do not hold a POST basic certificate, or equivalent, may struggle in this course, because fundamental terms and concepts and laws basic to law enforcement will not be taught or explained.
Enrollment Limitation: Students must 1) Be free of felony convictions; 2) possess a valid California Driver's License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate; pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.

This course advances the skill set of law enforcement personnel assigned to investigate traffic collisions. It covers the knowledge and skills needed to determine at-impact speeds of collision-involved vehicles and to draw conclusions of how and why the collision occurred. Topics include math and physics review, reconstruction principles, crush analysis, conservation of momentum analysis, heavy duty and articulated vehicles, motorcycle collision, vehicle vs. pedestrian, and bicycle collision analysis. Pass/No Pass only.

PSTC 1998 Work Experience in PSTC
Units: 1 - 4

PSTC 1999 Experimental Offering in PSTC

Units: 0.5 - 4
Prerequisite: None.

This course is designed to meet the changing needs of law enforcement and corrections by providing a curriculum for new or experimental courses promulgated by a specific criminal agency, STC, POST or the State Legislature as curriculum is being tested. The courses will vary in length from two-hour courses to twenty-four-hour technical courses. This course may be taken four (4) times for credit.

Sacramento Metropolitan Fire District (SMFD) Courses
General Education - Transfer

American River College offers certificates of achievement to satisfy the general education requirements for the California State University (CSU) system or the Intersegmental General Education Transfer Curriculum (IGETC).

Degrees and Certificates Offered

A.A.-T. in Art History

CSU General Education Certificate of Achievement Certificate
Honors Transfer Certificate
Intersegmental General Education Transfer (IGETC) Certificate of Achievement Certificate

Associate Degree for Transfer

A.A.-T. in Art History

The Associate in Arts in Art History for Transfer provides a clearly articulated curricular track for students who wish to transfer to a CSU campus, while also serving the diverse needs of students interested in the breadth and depth of the field of Art History. Additionally, this degree exposes students to the core principles and practices of the field in order to build a foundation for their future personal, academic, or vocational paths.

The Associate in Arts degree in Art History for Transfer provides students with a major that fulfills the general requirements of the California State University for transfer. Students with this degree will receive priority admission with junior status to the California State University system. The Associate in Arts degree in Art History for Transfer (A.A.-T.) may be obtained by the completion of 60 transferable, semester units with a minimum 2.0 GPA, including (a) the major or area of emphasis described in the Required Program outlined below (earning a C or better in these courses) and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education-Breadth Requirements.

Total Units: 21

Excluding any courses used to fulfill the degree requirements listed above.

The Associate in Arts in Art History for Transfer (AA-T) degree may be obtained by completion of 60 transferable, semester units with a minimum overall grade point average (GPA) of 2.0, including (a) a minimum grade of "C" (or "P") for each course in the major or area of emphasis described in the Required Program, and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education-Breadth Requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- assess and evaluate the contributions of artists throughout history.
- identify and evaluate works of art or architecture according to their appropriate style and time frame.
- analyze and critique art and architecture within the context of their functions and meanings.
- research and assess theoretical information concerning the meanings and purposes of art and architecture.
- explain the history of cultures and civilizations and how art and architecture is a reflection of that history.
Career Information

Art historians with undergraduate degrees are placed as registrars, preparators, and curatorial staff in art museums and galleries; they can also be employed as art critics in mass media publications, such as newspapers and magazines. An advanced degree allows an art historian a wider range of possible career applications, including museums, directorships, curators, instructors, preservationists, researchers, and auction house personnel.

Certificates of Achievement

CSU General Education Certificate of Achievement Certificate

This certificate is designed for students planning to transfer to a California State University (CSU) campus. Completion of this certificate ensures that the student has met the lower division General Education requirements for all CSU campuses.

Certificate Requirements

Course Code | Course Title | Units
---|---|---
A minimum of 39 units from the following: | | 39

Students must complete a minimum of 39 units used to satisfy the CSU General Education requirements. See the CSU General Education patterns listed in the American River College (ARC) catalog or consult with an ARC counselor.

Total Units: 39

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- explain the values of a culture as expressed through its art or language.
- demonstrate effective expository and persuasive writing skills.
- develop a reasoned solution to a problem.
- evaluate new and accepted ideas about the natural universe using testable methodology.
- evaluate the methods of inquiry and evidence used in the behavioral and social sciences.

Honors Transfer Certificate

The American River College (ARC) Honors Program is a community of students and faculty who are dedicated to the pursuit of intellectual and personal enrichment in a diverse and challenging academic environment. Students with a cumulative GPA of 3.2 or better who have completed at least 15 units of approved Honors coursework earn a Certificate of Achievement noted on the transcript. A maximum of 6 units of Honors coursework may be transferred from other colleges. Some courses may need to be petitioned. A total of 12 units of degree-applicable coursework must be earned at ARC to meet residency requirements. Most courses in the certificate fulfill requirements for the ARC A.A., A.S., A.A.T., A.S.T.- degrees, the Intersegmental General Education Transfer Curriculum (IGETC), and the CSU General Education Certification Pattern. Check with an ARC counselor for exceptions. Completion of the certificate with a cumulative grade point average (GPA) of 3.2 or better allows students to take advantage of transfer agreements with highly selective colleges and universities through the Honors Transfer Council of California and to participate in the Transfer Alliance Program at UCLA. Honors students must meet with a counselor to ensure completion of ARC graduation and/or transfer requirements. In addition, Honors students should meet regularly with an Honors faculty advisor to ensure completion of the Honors certificate in a timely fashion.

Certificate Requirements

Course Code | Course Title | Units
---|---|---
A minimum of 34 units from the following: | | 34

Students must complete a minimum of 34 - 37 units used to satisfy either the UC or CSU IGETC certification requirements. See the IGETC pattern in the American River College (ARC) catalog or consult with an ARC counselor.

Total Units: 34
Student Learning Outcomes

Upon completion of this program, the student will be able to:

• explain the values of a culture as expressed through its art or language.

• demonstrate effective expository and persuasive writing skills.
• develop a reasoned solution to a problem.
• evaluate new and accepted ideas about the natural universe using testable methodology.
• evaluate the methods of inquiry and evidence used in the behavioral and social sciences.
Respiratory Care

This degree is preparation for licensure as a Respiratory Care Practitioner in the state of California as a Respiratory Care Practitioner at the Advanced Registered Respiratory Therapist level. It focuses on diagnostic procedures, treatment, and management of patients with conditions affecting the cardiopulmonary system. Course work includes physical assessment, medical gas therapies, mechanical life support, airway care, pharmacology, neonatal/pediatric therapy, and specialized cardiopulmonary procedures. All degree major courses require a grade of "C" or better to remain in the program.

ARC's Respiratory Care Program is designed to prepare California licensed respiratory care practitioners at the registered respiratory therapist level. It focuses on diagnostic procedures, treatment, and management of patients with conditions affecting the cardiopulmonary system. The respiratory care practitioner works closely with the physician in assessing the patient and planning the proper respiratory care protocol.

The Respiratory Care curriculum is a two-year program designed to prepare the student for employment and to participate as a member of the healthcare team by providing direct patient care. Experience in respiratory care is provided in selected local hospitals where the student participates in clinical externships. Safe, ethical, and professional levels of practice are necessary for retention of students in the Respiratory Care Program.

The American River College (ARC) Respiratory Care (RC) program is accredited by the Commission on Accreditation for Respiratory Care (CoARC) (https://coarc.com/), The ARC RC CoARC number is 200194.

CoARC accredits respiratory therapy education programs in the United States. To achieve this end, it utilizes an 'outcomes based' process. Programmatic outcomes are performance indicators that reflect the extent to which the educational goals of the program are achieved and by which program effectiveness is documented. CoARC Programmatic Outcome Data. (https://coarc.com/students/programmatic-outcomes-data/)

First Semester:
- RC 110: Cardiopulmonary Pathologies for Respiratory Care 4
- RC 111: Principles of Respiratory Care 7

Second Semester:
- RC 121: Concepts of Airway Care & Mechanical Ventilation 4
- RC 122: Airway Care & Mechanical Ventilation Laboratory 1
- RC 123: Clinical Externship I 3
- RC 124: Respiratory Care Pharmacology 3

Third Semester:
- RC 130: Respiratory Care in Neonatal and Pediatric Populations & Diagnostic Studies 3
- RC 131: Respiratory Care in Neonatal and Pediatric Populations & Diagnostic Studies Laboratory 1
- RC 132: Clinical Externship II 6

Fourth Semester:
- RC 140: Professional Development in Respiratory Care 2
- RC 142: Clinical Externship III 6

Any Semester:
- A minimum of 3 units from the following: 3
  - ENGWR 300: College Composition (3)
  - ENGWR 480: Honors College Composition (3)
  - ESLW 340: Advanced Composition (4)

- A minimum of 3 units from the following: 3
  - ANTH 310: Cultural Anthropology (3)
  - ANTH 481: Honors Cultural Anthropology (3)
  - PSYC 300: General Principles (3)
  - PSYC 320: Social Psychology (3)
  - PSYC 390: Psychology of Death and Dying (3)
  - PSYC 480: Honors General Principles (3)

Total Units: 66 - 68

The Respiratory Care Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Enrollment Eligibility

To be eligible for enrollment in the program, the student must meet the following criteria:

- Graduation from an accredited high school (graduates from outside the United States must have transcripts evaluated by an independent agency), or successful completion of the General Educational Development (GED) Test or California High School Proficiency Examination (CHSPE) as defined by the current requirements of the State of California and National Board for Respiratory Care.
- A GPA of 2.5 in all prerequisite courses.
Respiratory Care (RC) Courses

RC 110 Cardiopulmonary Pathologies for Respiratory Care

Units: 4
Hours: 72 hours LEC
Prerequisite: None.
Corequisite: RC 111
Enrollment Limitation: Acceptance into the Respiratory Care Program.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.

This course introduces the common pathologies affecting the cardiopulmonary system and related pharmacological treatment. Topics include obstructive and restrictive airway diseases, early childhood respiratory diseases, infectious pulmonary diseases, and pulmonary vascular diseases.

RC 111 Principles of Respiratory Care

Units: 7
Hours: 108 hours LEC; 54 hours LAB
Prerequisite: None.
Corequisite: RC 110
Enrollment Limitation: Acceptance into the Respiratory Care Program.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.

This course introduces critical thinking skills necessary for entry into clinical practice in respiratory care. It includes a comprehensive overview of the cardiopulmonary system with emphasis on applied physiology. Additionally, it covers ventilation, gas transport, gas exchange, and acid-base balance, including interpretation of data and the relationship of therapeutics to physiological principles. Respiratory care equipment, patient assessment skills, safe practices, such as the Health Insurance Portability and Accountability Act (HIPAA), human rights and privacy, personal health and hygiene, and hospital orientations are introduced. This course is preparation for general practice as a respiratory care practitioner. It covers laboratory skills and procedures with emphasis on the application of theories and techniques related to assessment, evaluation, and interpretation of patients with cardiopulmonary illness. Included are concepts of Basic Life Support.

RC 121 Concepts of Airway Care & Mechanical Ventilation

Units: 4
Hours: 72 hours LEC
Prerequisite: RC 110 and 111 with grades of “C” or better
Corequisite: RC 122, 123, and 124

This course expands on the principles of respiratory failure, airway protective techniques, and advanced life support. Topics include mechanical ventilator theories and modes, invasive and noninvasive airway care, and Advanced Cardiac Life Support (ACLS) procedures.

RC 122 Airway Care & Mechanical Ventilation Laboratory

Units: 1
Hours: 54 hours LAB
Prerequisite: RC 110 and 111 with grades of “C” or better
Corequisite: RC 121, 123, and 124

This course introduces higher levels of clinical practice including critical care. It covers Advanced Cardiac Life Support (ACLS), airway protective procedures, and mechanical ventilation.
RC 123 Clinical Externship I

Units: 3  
Hours: 162 hours LAB  
Prerequisite: RC 110 and 111 with grades of "C" or better  
Corequisite: RC 121, 122, and 124  
Enrollment Limitation: Students must meet the health requirements of the Los Rios Community College District for Allied Health Programs and certification in Basic Life Support for the Health Care Provider.

This course presents the principles of medical gas delivery devices: humidity, aerosol and hyperinflation therapies, and chest physiotherapy. It also covers the application, patient assessment, patient monitoring, and evaluation of the efficacy of medical gas, humidity, aerosol and hyperinflation therapies, and chest physiotherapy. A portion of this course may be offered with a TBA component which may include working in clinical sites.

RC 124 Respiratory Care Pharmacology

Units: 3  
Hours: 54 hours LEC  
Prerequisite: RC 110 and 111 with grades of "C" or better  
Corequisite: RC 121, 122, and 123  

This course covers the concepts and principles of pharmacology required in the practice of respiratory care, including medications, actions, dosages, routes of administration, and adverse reactions. Topics include patient education of medication delivery devices, patient monitoring devices, utilization techniques, and the standards for therapeutic efficacy in relation to asthma, chronic obstructive pulmonary disease, and smoking cessation.

RC 130 Respiratory Care in Neonatal and Pediatric Populations & Diagnostic Studies

Units: 3  
Hours: 54 hours LEC  
Prerequisite: RC 121, 122, 123, and 124 with grades of "C" or better  
Corequisite: RC 131 and 132  

This course prepares students to work in laboratories and special care areas of a hospital. Topics include perinatal and pediatric diseases, labor and delivery, rehabilitation, and advanced diagnostic studies performed by respiratory therapists. Additional topics include bronchoscopy, advanced pulmonary function studies, bronchial provocation testing, poly somnography, exercise stress tests, metabolic studies, hemodynamic measurements, advanced modalities of mechanical ventilation, and cardiovascular testing.

RC 131 Respiratory Care in Neonatal and Pediatric Populations & Diagnostic Studies Laboratory

Units: 1  
Hours: 54 hours LAB  
Prerequisite: RC 121, 122, 123, and 124 with grades of "C" or better  
Corequisite: RC 130 and 132  

This course prepares students for general practice as respiratory care practitioners. It provides laboratory practice in medical gas, humidity/aerosol, hyperinflation and bronchial hygiene therapies, airway management, and non-invasive and invasive mechanical ventilatory support as applied to neonatal and pediatric patients in specialized critical care units. Additionally, it covers pulmonary rehabilitation techniques, cardiopulmonary stress testing, sleep studies, and respiratory care techniques in the home setting. Students must successfully complete the National Board for Respiratory Care (NBRC) Self Assessment Examinations to receive a passing grade in this course. Students are responsible for fees associated with this examination.

RC 132 Clinical Externship II

Units: 6  
Hours: 324 hours LAB  
Prerequisite: RC 121, 122, 123, and 124 with grades of "C" or better  
Corequisite: RC 130 and 131  
Enrollment Limitation: Students must meet the health requirements of the Los Rios Community College District for Allied Health Programs and certification in Advanced Cardiac Life Support.

This is a preparatory course for advanced practice as respiratory care practitioners. Topics include clinical practice in the application of airway management, including intubation, suctioning, and bronchoscopy, to adult patients in critical care units. Additionally it includes clinical practice in application of non-invasive and invasive mechanical ventilatory support, ventilator settings/adjustments, monitoring, adjusting ventilators to improve oxygenation and/or ventilation and discontinuance from mechanical ventilatory support. Clinical experience is provided in regional hospitals and clinics. A portion of this course may be offered with a TBA component which may include working in clinical sites.

RC 140 Professional Development in Respiratory Care

Units: 2  
Hours: 36 hours LEC  
Prerequisite: RC 130, 131, and 132 with grades of "C" or better  
Corequisite: RC 142  

This course prepares students for transition into professional practice. Topics include ethical behaviors, resume writing, and professional attributes and dress for the respiratory care setting. Interviewing skills, professional test preparation for national licensing examinations, and practice examinations for the National Board of Respiratory Care's (NBRC) Therapist Multiple-Choice Examination (TMC) and Clinical Simulation Self Assessment Examinations (CSE) are also covered.

RC 142 Clinical Externship III

Units: 6  
Hours: 324 hours LAB  
Prerequisite: RC 121, 122, 123, and 124 with grades of "C" or better  
Corequisite: RC 140  
Enrollment Limitation: Meet the health requirements of the Los Rios Community College District for Allied Health Programs and certification in Pediatric Advanced Life Support and Neonatal Resuscitation Program.

This course prepares for advanced practice of respiratory care. Topics include labor and delivery, neonatal intensive care, cardic and medical intensive care, medical trauma management, application of pulmonary rehabilitation techniques, cardiopulmonary stress testing, sleep studies, and respiratory care techniques in the home setting. Additional topics include case studies in medical management.

RC 295 Independent Studies in Respiratory Care

Units: 1 - 3  
Prerequisite: None.

RC 299 Experimental Offering in Respiratory Care

Units: 0.5 - 4  
Prerequisite: None.

This is the experimental courses description.
General Science

This program provides a broad study in the fields of biological and physical sciences in preparation for transfer to a four-year program and continuation of studies in upper division science courses.

General Science (GENSCI) Courses

GENSCI 90 Science Skills and Strategies I

Units: 0.5
Hours: 27 hours LAB
Prerequisite: None.
Corequisite: Current enrollment in a science, nutrition, or nursing course.

This course offers individualized instructional modules designed to acquire or improve study strategies and skills for various science, nursing, or nutrition courses. A partial list of skills and strategies may include the following: science textbook comprehension, principles of learning and retention, note taking, annotating, discipline-based vocabulary, paraphrasing, reading graphics, test taking, scientific writing, and problem solving. This course is offered in a flexible TBA format of 27 laboratory hours in order to accommodate the student's schedule. Registration is open through the tenth week of the semester. This course is not open to students who have previously passed BIOL 490. Pass/No Pass only.

GENSCI 91 Science Skills and Strategies II

Units: 0.5
Hours: 27 hours LAB
Prerequisite: None.
Corequisite: Current enrollment in a science, nutrition, or nursing course.
Transferrable: CSU

This course offers individualized instructional modules designed to acquire or improve study strategies for science, nursing, or nutrition courses. Strategies include goal setting, the intensive study cycle, graphic organizers, constructing and interpreting graphs, mastering science vocabulary, self-monitoring while reading, coding method of reading, and advanced problem solving. This course is offered in a flexible TBA format of 27 laboratory hours to accommodate the student's schedule. Registration is open through the tenth week of the semester. This course is not open to students who have previously passed BIOL 491. Pass/No Pass only.

GENSCI 299 Experimental Offering in General Science

Units: 0.5 - 4
Prerequisite: None.

This is the experimental courses description.
Social Justice Studies

Starting Fall 2019 American River College is offering two Social Justice Studies degrees. Social Justice Studies is an interdisciplinary AA-T degree program that combines core courses in social justice with related coursework in a variety of disciplines, including History, English, Sociology, and Psychology.

Students in the program will:
- Research theoretical perspectives and critical theories on social justice
- Analyze power, privilege, and oppression
- Study historical origins of social justice
- Assess artistic works that examine oppression, power, and justice

Some of the core courses include:
- SJS 300 Introduction to Social Justice Studies
- SJS 310 Introduction to LGBTQ Studies
- SOC 320 Minorities in America
- SOC 342 Gender Relations in America

See a counselor for more details and a complete listing of all course options.

Degrees Offered
A.A.-T. in Social Justice Studies: Race and Ethnicity
A.A.-T. in Social Justice Studies: Women, Gender, and LGBTQ Studies

Dean Kathy Sorensen
Department Chair Pam Chao

Associate Degrees for Transfer

A.A.-T. in Social Justice Studies: Race and Ethnicity

The Associate in Arts in Social Justice Studies: Race and Ethnicity for Transfer degree provides students with a major that fulfills the general requirements of the California State University for transfer. Students with this degree will receive priority admission with junior status to the California State University system. The Associate in Arts in Social Justice Studies: Race and Ethnicity for Transfer (AA-T) degree may be obtained by the completion of 60 transferable, semester units with a minimum 2.0 GPA, including (a) the major or area of emphasis described in the Required Program outlined below (minimum grade of “C” (or “P”) for each course in the major) and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education Breadth Requirements.

The Associate in Arts in Social Justice Studies: Race and Ethnicity for Transfer (AA-T) degree provides a curricular track for students who wish to transfer into a variety of CSU majors related to race and ethnicity, such as Ethnic Studies, Chicana and Chicano Studies, or African American Studies. This Transfer Model Curriculum is an “Area of Emphasis” (AOE), which allows for students to transfer into more than one CSU major related to Race and Ethnicity. Students interested in transferring to a CSU campus to pursue a bachelor’s degree in an Area of Emphasis should meet with a counselor to confirm the courses required for lower division preparation in the major. This degree exposes students to the core principles and practices of the Social Justice Studies field in order to build a foundation for their future personal, academic, or vocational paths.

The Associate in Arts in Social Justice Studies: Race and Ethnicity for Transfer (AA-T) degree may be obtained by completion of 60 transferable, semester units with a minimum overall grade point average (GPA) of 2.0, including (a) a minimum grade of “C” (or “P”) for each course in the major or area of emphasis described in the Required Program, and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education-Breadth Requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:
- research how theoretical perspectives and critical theories on social justice inform the social, political, economic, historical, and cultural circumstances surrounding justice as they relate to race and ethnicity as well as other intersectional aspects of life in society.
• define and analyze power and oppression to better understand how they operate at the individual, cultural, institutional, and systemic levels.
• explain how intersectional formations of social identity reflecting various levels of power and privilege impact social justice at the individual, cultural, institutional, and systemic levels.
• recognize the historical origins and similarities and differences in struggles for social justice among different ethnic and racial groups.
• assess artistic works that examine oppression, power, and justice as they relate to race and ethnicity.

Career Information

The AA-T degree provides students with a solid foundation in Social Justice Studies as well as prerequisites for upper division coursework leading to the baccalaureate degree in a variety of Areas of Emphasis. The degree gives students a pathway to possibilities, options, and baccalaureate degrees focusing on social justice. In addition, a student can use the AA-T in Social Justice Studies to get into a CSU and then complete a graduate degree in a related field. Students with degrees in this field often assume careers as (or in) the following: activists, community organizers, political campaigns, human rights groups, religious organizations, international agencies, lobbyists, and mediators. This program is also an excellent starting point for students interested in a career in law, law enforcement, social work, clinical psychology, social science, politics, business, education, or public policy.

A.A.-T. in Social Justice Studies: Women, Gender, and LGBTQ Studies

The Associate in Arts in Social Justice Studies: Women, Gender, and LGBTQ Studies for Transfer degree provides students with a major that fulfills the general requirements of the California State University for transfer. Students with this degree will receive priority admission with junior status to the California State University system. The Associate in Arts in Social Justice Studies: Women, Gender, and LGBTQ Studies for Transfer (AA-T) degree may be obtained by the completion of 60 transferable, semester units with a minimum overall grade point average (GPA) of 2.0, including (a) a minimum grade of “C” (or “P”) for each course in the major, including (a) the major or area of emphasis described in the Required Program outlined below (earning a C or better in these courses) and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education Breadth Requirements.

The Associate in Arts in Social Justice Studies: Women, Gender, LGBTQ Studies for Transfer (AA-T) degree provides a curricular track for students who wish to transfer into a variety of CSU majors related to Women, Gender, LGBTQ Studies, such as Women’s Studies, Gender Studies, or Queer Studies. This Transfer Model Curriculum is an “Area of Emphasis” (AOE), which allows for students to transfer into more than one CSU major related to Women, Gender, LGBTQ Studies. Students interested in transferring to a CSU campus to pursue a bachelor’s degree in an Area of Emphasis should meet with a counselor to confirm the courses required for lower division preparation in the major. This degree exposes students to the core principles and practices of the Social Justice Studies field in order to build a foundation for their future personal, academic, or vocational paths.

Social Justice Studies (SJS)

Courses

SJS 299 Experimental Offering in Social Justice Studies

Units: 0.5 - 4
Prerequisite: None.

This is the experimental courses description.

SJS 300 Introduction to Social Justice Studies

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Transferable: CSU; UC
General Education: AA/AS Area V(b); AA/AS Area VI; CSU Area D; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4
C-ID: C-ID SJS 110

This interdisciplinary course introduces students to the theoretical and practical foundations of social justice and the social processes that create and resist oppression. It covers the sociology, history, and psychology of oppressions based upon race, ethnicity, class, gender, sexuality, and other group identities in the United States and the corresponding social justice movements for liberation. It investigates how creating and undoing asymmetrical power relations are linked to social structures, institutional processes, and culture. Additionally, it provides a basis for a better understanding of socioeconomic, political, and cultural conditions of key social groups in the United States. Topics include theoretical foundations of social justice and oppression, history and politics of group identity, culture and ideologies, forms of oppression, privilege, and forms of resistance. Field trips may be required.

SJS 310 Introduction to LGBTQ Studies

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Transferable: CSU; UC
General Education: AA/AS Area V(b); AA/AS Area VI; CSU Area D; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4
C-ID: C-ID SJS 130

This course introduces students to Lesbian, Gay, Bisexual, Transgender, and Queer (LGBTQ) studies. It explores how LGBTQ individuals and communities are impacted by various social, cultural, historical, and political factors. Topics include politics of sexuality and sexual identities; forms of oppression including heterosexism, homophobia, and transphobia, as well as resistance to oppression, violence against LGBTQ individuals and communities, and queer activism. This course also includes contemporary issues in families, education, religion, and the law.

SJS 499 Experimental Offering in Social Justice Studies

Units: 0.5 - 4
Prerequisite: None.

This is the experimental courses description.
Geography and GIS

Geography is the science of space and place on Earth’s surface. It focuses on the physical and human phenomena that make up the world’s environments and places. Geographers describe the changing spatial patterns of places in words, maps, and graphics. Geography’s continuing quest is to understand the physical and cultural features of places and their settings on the surface of Earth.

GIS is one of the fastest growing career fields in North America. It is a computer-based tool used to map, manage, analyze, display, and model spatial information. A GIS is a data management system capable of analyzing patterns and relationships between many different layers of mapped data simultaneously. Advantages of a GIS compared with a traditional map are the ability of the user to quickly alter the display properties, modify or introduce new data, and manipulate analysis results by changing input parameters and modifying the assumptions.

Associate Degrees for Transfer

A.A.-T. in Geography

The Associate in Arts in Geography for Transfer degree provides students with a major that fulfills the general requirements of the California State University for transfer. Students with this degree will receive priority admission with junior status to the California State University system. The Associate in Arts in Geography for Transfer (AA-T) degree may be obtained by the completion of 60 transferable, semester units with a minimum 2.0 GPA, including (a) the major or area of emphasis described in the Required Program outlined below (earning a C or better in these courses) and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education-Breadth Requirements.

In addition to fulfilling transfer requirements, this degree exposes students to the core principles and practices of Geography. Students interested in transferring to a CSU campus to pursue a bachelor’s degree in geography should meet with a counselor to confirm the courses required for lower division preparation in the major. Although additional preparatory courses are not required for this degree, a careful review of the requirements at your chosen CSU will increase the likelihood that your transfer experience is smooth and successful.

Total Units: 19

1Students may also substitute any course from the previous list not already taken to fulfill degree requirements.

The Associate in Arts in Geography for Transfer (AA-T) degree may be obtained by completion of 60 transferable, semester units with a minimum overall grade point average (GPA) of 2.0, including (a) a minimum grade of “C” (or “P”) for each course in the major or area of emphasis described in the Required Program, and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education-Breadth Requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

• describe the general content and scope of baccalaureate-level geography studies.
• compare and contrast the general biophysical and sociocultural differences and similarities among world regions.
• interpret maps and mapped data utilizing basic map elements, including scales, common coordinate systems, and map symbols.
• compare and contrast common geospatial technologies such as Geographic Information Systems (GIS), Global Positioning System (GPS), and remote sensing.
• evaluate and analyze common geographic problems and their solutions.
• list and describe at least three career options for geographers.

Career Information

The opportunities for geographers are as varied as the scope of geography itself. Geographers are found throughout the public and private sector, though rarely in positions with the title of Geographer. When combined with appropriate internships and/or other work experience, a baccalaureate degree in geography is excellent preparation for careers in natural resource management, environmental consulting, urban and regional planning, and elementary and secondary teaching. Geographic skills and knowledge are also quite valuable in diverse fields such as real estate, marketing, and demography.

Associate Degrees

A.S. in General Science

This program provides a broad study in the fields of biological and physical sciences in preparation for transfer to a four-year program and continuation of studies in upper division science courses.

</table>
The Geographic Information Systems (GIS) Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

**Student Learning Outcomes**

Upon completion of this program, the student will be able to:

- evaluate new and accepted ideas about the natural universe using scientific methods.
- analyze a wide variety of natural phenomena using basic definitions and fundamental theories of biological or physical sciences.
- apply appropriate quantitative and qualitative methods to interpret and analyze pertinent data.
- outline the basic concepts and fundamental theories of a natural science.
- articulate orally and in writing the importance of continuous examination and modification of accepted ideas as a fundamental element in the progress of science.
- discuss ethical components of scientific decision making and apply personal and social values within the process of decision making in scientific endeavors.

**A.S. in Geographic Information Systems (GIS)**

Geographic Information Systems (GIS) are collections of computers, software applications, and personnel used to capture, store, transform, manage, analyze, and display spatial information. This powerful technology has a wide range of applications in planning and management by government agencies, business, and industry. The A.S. Degree provides a solid technical background in GIS concepts and applications including database design, the Global Positioning System (GPS), cartography, GIS programming, spatial analysis, and interdisciplinary applications of the technology. The degree also includes ARC General Education and elective courses, which are required for graduation. Completion of the degree requires practical work experience in GIS.
Career Information

According to an Environmental Systems Research Institute survey, over 80 percent of the data used for decision-making in government and industry has a spatial component. New areas of rapid growth are in criminal justice, homeland security, marketing, retail site location, resource allocation, banking, health-care planning, disease control, insurance, real estate, and disaster preparedness, management, and response. Most local, state, and federal government agencies use GIS and maintain a staff of GIS technicians, analysts, and professionals. GIS is also commonly used in the private sector by businesses, planners, architects, foresters, geologists, environmental scientists, archaeologists, real estate professionals, marketers, sociologists, and bankers. The growth in application areas of GIS and of GIS as a specialized discipline represents a new way for individuals, agencies, and businesses to view the world. The expansion of jobs in GIS is anticipated to continue for many years to come. It is likely that all students, regardless of their particular field of interest, will at least be exposed to and probably use a GIS in some capacity in the years ahead. The purpose of American River College’s GIS program is to prepare students for careers in this expanding technological field.

A.S. in Geography

This degree provides students with a solid foundation in Geography as well as the standard prerequisites for upper-division coursework leading to a baccalaureate degree. The required and elective coursework covers a broad spectrum of Physical Geography, Human Geography, and GIS.

This is not an official transfer degree, such as the Geography AA-T, which guarantees admission to any California State University. However, this degree has been designed with an emphasis on University of California (UC) transferability. With two exceptions, all courses satisfy the Intersegmental General Education Transfer Curriculum (IGETC) that meets freshman/sophomore level general education requirements at a UC. This degree can also be used to prepare students for transfer to geography programs at private institutions, but in all cases students are strongly encouraged to research the lower division requirements at all geography programs at private institutions, but in all cases students are strongly encouraged to research the lower division requirements at all geography programs.

Total Units: **20 - 26**

1GEOG 331 is recommended for students who plan to transfer to a California State University.

The Geography Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- describe the general content and scope of collegiate level geography studies.
- compare and contrast the general biophysical and sociocultural differences and similarities among world regions.
- interpret maps and mapped data utilizing basic map elements including scales, coordinate systems, and symbols.
- compare and contrast common geographic information technologies such as Geographic Information Systems (GIS), Global Positioning System (GPS), and Remote Sensing.
- evaluate and analyze geographic problems and their solutions.
- list and describe at least three career options for geographers.

Career Information

The opportunities for geographers are as varied as the scope of geography itself. Geographers are found throughout the public and private sector, though rarely in positions with the title of Geographer. When combined with appropriate internships and/or other work experience, a baccalaureate degree in geography is excellent preparation for careers in natural resource management, environmental consulting, urban and regional planning, and elementary and secondary teaching. Geographic skills and knowledge are also quite valuable in diverse fields such as real estate, marketing, and demography.

Certificate of Achievement

Geographic Information Systems (GIS) Certificate

Geographic Information Systems (GIS) are collections of computers, software applications, and personnel used to capture, store, transform, manage, analyze, and display spatial information. This powerful technology has a wide range of applications in planning and management by government agencies, business, and industry. The certificate provides a solid technical background in GIS concepts and applications including database design, the Global Positioning System (GPS), cartography, GIS programming, spatial analysis, and interdisciplinary applications of the technology. Completion of the certificate requires practical work experience in GIS.

- GEOG 385 Introduction to Web Based GIS Application Development (3)

A minimum of 1 unit from the following:

- GEOG 498 Work Experience in Geography (0.5 - 4)

Total Units: 28

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- assess and describe fundamental aspects of geographic information and scale, with specific reference to raster and vector digital spatial data models used to represent such information.
- evaluate and compile various types of spatial data, with specific attention to geospatial metadata, data quality, and identification of the most appropriate data type for use in a specific GIS application.
- compare and contrast the variety of available coordinate systems, map projections, and datums, and choose the appropriate variety for a specific GIS application.
- originate, classify, edit, and manage digital spatial data using various techniques (e.g., manual, scan, and on-screen digitizing, computer-assisted drafting, GPS, etc.).
- design, synthesize, validate, optimize, and manage spatial attribute tables and databases.
- apply appropriate data normalization and classification schemes to attribute data.
- formulate geoprocessing and analysis functions that are appropriate for specific applications, and be able to perform and evaluate the results of such processes (such as buffering, overlay, recclassification, address matching, and statistical analysis).
- compare and contrast the effectiveness of various GIS output products, including maps, tables, charts, and other digital output for specific applications.
- describe, assess, and compare common map elements and the cartographic design process.
- synthesize, design, apply, and manage a GIS project, including estimates of time and labor requirements.
- propose at least three examples of GIS applications that document spatial distributions or solve spatial problems.
- list and describe at least three career options for GIS professionals.
- design, create, and disseminate high-quality maps in both hard-copy (paper) and digital (on-screen) forms.
- compare and contrast the effectiveness of hard-copy and digital maps.
- analyze problems encountered in the study of other disciplines, and formulate appropriate GIS solutions.

Career Information

According to an Environmental Systems Research Institute survey, over 80 percent of the data used for decision-making in government and industry has a spatial component. New areas of rapid growth are in criminal justice, homeland security, marketing, retail site location, resource allocation, banking, health-care planning, disease control, insurance, real estate, and disaster preparedness, management, and response. Most local, state, and federal government agencies use GIS and maintain a staff of GIS technicians, analysts, and professionals. GIS is also commonly used in the private sector by businesses, planners, architects, foresters, geologists, environmental scientists, archaeologists, real estate professionals, marketers, sociologists, and bankers. The growth in application areas of GIS and of GIS as a specialized discipline represents a new way for individuals, agencies, and businesses to view the world. The expansion of jobs in GIS is anticipated to continue for many years to come. It is likely that all students, regardless of their particular field of interest, will at least be exposed to and probably use a GIS in some capacity in the years ahead. The purpose of American River College’s GIS program is to prepare students for careers in this expanding technological field.

Geography (GEOG) Courses

**GEOG 300 Physical Geography: Exploring Earth's Environmental Systems**

Units: 3  
Hours: 54 hours LEC  
Prerequisite: None.  
Advisory: Successful completion of Prealgebra and the skills needed to read and write college-level texts.  
Transferable: CSU; UC  
General Education: AA/AS Area IV; CSU Area B1; Cal-GETC Area 5A (effective Fall 2025); IGETC Area 5A  
C-ID: C-ID GEOG 110

This course explores the processes and interrelationships which shape Earth’s natural landscapes. Key topics include solar energy balance, weather and climate, water resources, landforms, natural hazards, soil, and vegetation. Relevant application of these concepts is used to explain the evolving relationship between humans and Earth’s natural systems. Field trips may be required to relate course content to the real world.

**GEOG 301 Physical Geography Laboratory**

Units: 1  
Hours: 54 hours LAB  
Prerequisite: None.  
Corequisite: GEOG 300  
Advisory: Successful completion of Prealgebra and the skills needed to read and write college-level texts.  
Transferable: CSU; UC  
General Education: CSU Area B3; Cal-GETC Area 5C (effective Fall 2025); IGETC Area 5C  
C-ID: C-ID GEOG 111

This course is a laboratory study of basic principles and concepts involved in understanding Earth’s environmental systems. Labs feature observation, collection, analysis, and display of data related to the study of energy, weather and climate, vegetation, soils, landforms, and environmental hazards. Additional topics include geographic methods and technology, including interpretation of maps and other geographic imagery, weather instrumentation, the Global Positioning System (GPS), and relevant computer and Internet applications. Field experiences may be required.

**GEOG 305 Global Climate Change**

Same As: GEOL 320  
Units: 3  
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Successful completion of Prealgebra and the skills needed to read and write college-level texts.
Transferable: CSU; UC
General Education: AA/AS Area IV; CSU Area B1; Cal-GETC Area 5A (effective Fall 2025); IGETC Area 5A

This course explores the history and mechanisms of climate change in Earth’s past, as well as the methods that scientists use to investigate climate change. It also focuses on climate change in Earth’s recent history (the past few million years) and the role that humans have had in climate change, especially since the industrial revolution. Additionally, it investigates the effects of climate change in today’s world and discusses possible technological and political solutions to this vast and increasingly important problem, and how societies may adapt to the changes. Field experiences may be required. This course is not open to students who have completed GEOL 320.

GEOG 306 Weather and Climate

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Successful completion of Prealgebra and the skills needed to read and write college-level texts.
Transferable: CSU; UC
General Education: AA/AS Area IV; CSU Area B1; Cal-GETC Area 5A (effective Fall 2025); IGETC Area 5A
C-ID: C-ID GEOG 130

This course introduces atmospheric processes including energy and moisture exchanges; atmospheric pressure, global circulation, precipitation processes; weather systems; severe weather; and world, regional, and local climate systems. It also includes observation and analysis of atmospheric data using charts, weather maps, and radar and satellite imagery from the Internet and other sources. Field trips may be required to reinforce course content.

GEOG 307 Environmental Hazards and Natural Disasters

Same As: GEOL 325
Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Successful completion of Prealgebra and the skills needed to read and write college-level texts.
Transferable: CSU; UC
General Education: AA/AS Area IV; CSU Area B1; Cal-GETC Area 5A (effective Fall 2025); IGETC Area 5A

This course covers the environmental effects and applications of Earth-related processes. It focuses on earthquakes, volcanic eruptions, landslides, flooding, hurricanes, and related current events. Additional topics include the availability and exploitation of natural resources, waste disposal, and global climate change. Humans as a force in environmental change are emphasized. This course addresses geology, engineering, environmental studies, natural resources, geography, and science education. Field experiences may be required. This course is not open to students who have completed GEOL 325.

GEOG 308 Introduction to Oceanography

Same As: GEOL 330
Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Successful completion of Prealgebra and the skills needed to read and write college-level texts.
Transferable: CSU; UC
General Education: AA/AS Area IV; CSU Area B1; Cal-GETC Area 5A (effective Fall 2025); IGETC Area 5A

This course is an integrated study of the world’s oceans, including the physical, chemical, biological, and human-made processes that affect the oceans. Topics include plate tectonics, ocean basins and sediments, water chemistry, waves, tides, shoreline processes, ocean currents, and biosystems. Human impacts on oceans will also be discussed. Regional oceanographic features are emphasized and field experiences may be required. This course is not open to students who have completed GEOL 330.

GEOG 309 Introduction to Oceanography Lab

Same As: GEOL 331
Units: 1
Hours: 54 hours LAB
Prerequisite: None.
Corequisite: GEOL 308 or GEOL 330
Transferable: CSU; UC
General Education: CSU Area B3; Cal-GETC Area 5C (effective Fall 2025); IGETC Area 5C

This course is a laboratory investigation of Earth’s oceans, emphasizing coastal processes of California. Topics include plate tectonics, ocean basins and sediments, water chemistry, waves, tides, shoreline processes, ocean currents, and biosystems. Field experiences may be required. This course is not open to students who have completed GEOL 331.

GEOG 310 Human Geography: Exploring Earth’s Cultural Landscapes

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: MATH 32 or 42 with a grade of "C" or better or placement through the assessment process; AND eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLW 340.
Transferable: CSU; UC
General Education: AA/AS Area V(b); AA/AS Area VI; CSU Area D; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4
C-ID: C-ID GEOG 120

This course investigates the diverse patterns of human settlement, development, and movement on earth, which evolved as a result of cultural and environmental factors. It emphasizes the understanding of global population and migration patterns, languages, religions, ethnicities, political and economic systems, development issues, agriculture, and urbanization.

GEOG 320 World Regional Geography

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: MATH 32 or 42; and eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300, OR ESLW 340.
Transferable: CSU; UC
General Education: AA/AS Area V(b); AA/AS Area VI; CSU Area D; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4
C-ID: C-ID GEOG 125

This course is a global survey of the world’s major geographic regions. Basic geographic concepts and ideas are used to study and compare cultures, resources, landscapes, economies, and political structures across all geographic regions. The interaction of countries and regions, their global roles, and the conflicting pressures of cultural diversity and globalization are presented. The widening gap between more developed and less developed countries and regions is integrated throughout the course, with a particular focus on comparing and contrasting conditions in North America and the United States with those in the rest of the world.

GEOG 322 Geography of California

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Successful completion of Prealgebra and the skills needed to read and write college-level texts.
Transferable: CSU; UC
**General Education:** AA/AS Area V(b); AA/AS Area VI; CSU Area DS; Cal-GETC Area 4 (effective Fall 2023); IGETC Area 4E

**C-ID: C-ID GEOG 140**

This course is a study of the various natural and cultural environments of California, with special emphasis on the interaction of people with landforms, climate, natural vegetation, soils, and resources. It presents historical, political, and economic development within this diverse environment. The diversity of cultures which make up the state’s expanding population is studied and compared. Analysis of current relevant issues, including those based on ethnic and cultural differences, is also presented.

**GEOG 330 Introduction to Geographic Information Systems**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** CISC 300  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area II(b)

This course provides an introduction to the concepts, methods, and applications of Geographic Information Systems (GIS). It emphasizes the techniques used to capture, store, query, analyze, and display spatial data. Specific topics include applications of GIS, geographic information and scale, coordinate systems, geospatial data models, data classification and symbolization, query and selection, cartographic design, data acquisition, data quality, geoprocessing, relational databases, metadata, spatial analysis, and GIS software.

**GEOG 331 Exploring Maps and Geographic Technologies**

**Units:** 3  
**Hours:** 50 hours LEC; 12 hours LAB  
**Prerequisite:** None.  
**Advisory:** CISC 300 and GEOG 300  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area IV  
**C-ID:** C-ID GEOG 150

This course introduces students to the world of maps and the geographic techniques and technologies that are utilized in the creation of modern cartographic documents. Specific topics include cartographic design, basic statistics, the Global Positioning System (GPS), Internet mapping, remote sensing, and Geographic Information Systems (GIS).

**GEOG 334 Introduction to GIS Software Applications**

**Units:** 3  
**Hours:** 50 hours LEC; 12 hours LAB  
**Prerequisite:** None.  
**Advisory:** CISC 300 and GEOG 330  
**Transferable:** CSU  
**C-ID:** C-ID GEOG 155

This course provides the conceptual and practical foundations for using Geographic Information Systems (GIS) software. It emphasizes basic GIS software functionality including map display, attribute and spatial query, address geocoding, spatial database management, spatial analysis, cartographic presentation, and spatial data management.

**GEOG 340 Cartographic Design for GIS**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** GEOG 330 with a grade of “C” or better  
**Transferable:** CSU

This course provides an introduction to map design and production in the context of Geographic Information Systems (GIS). It emphasizes the concepts and methods associated with designing and producing thematic maps. Specific topics include data standardization and classification, symbolization, map projections, map elements, typography, cartographic design, thematic mapping techniques (choropleth, proportional symbol, dot, isarithmic, and multivariate), color in cartography, history of cartography, and map reproduction. Map critique sessions are also held.

**GEOG 342 Introduction to Remote Sensing and Digital Image Processing**

**Units:** 3  
**Hours:** 50 hours LEC; 12 hours LAB  
**Prerequisite:** GEOG 330 with a grade of “C” or better  
**Transferable:** CSU

This course introduces the principles and concepts of remote sensing and digital image processing as they relate to Geographic Information Systems (GIS). Topics include the fundamentals of remote sensing, aerial photography, satellite imagery, and Unmanned Aerial Vehicle (UAV) imaging systems. It covers a variety of digital image processing techniques to analyze data from various remote sensing platforms.

**GEOG 344 Spatial Analysis and Modeling in GIS**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** GEOG 330 with a grade of “C” or better  
**Transferable:** CSU

This course provides a survey of the various concepts, approaches, and tools involved in the analysis and modeling of spatial data using Geographic Information Systems (GIS). It emphasizes the use of spatial and statistical analysis, geoprocessing, and spatial modeling in order to investigate spatial distributions and relationships, answer spatial questions, and solve spatial problems. Specific topics include attribute and spatial query, geoprocessing, model building, distance and density surfaces, cluster analysis, network analysis, map algebra, surface interpolation and resampling, hydrologic analysis, 3D display/animation, and regression analysis.

**GEOG 350 Data Acquisition in GIS**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** GEOG 330 with a grade of “C” or better  
**Transferable:** CSU

This course introduces the techniques, theories, and practical experiences necessary to acquire, convert, and create digital spatial data. Topics include acquisition of existing Geographic Information Systems (GIS) data, metadata, formatting and conversion of GIS data, creation of data, utilization of remotely sensed data, and use of the Global Positioning System (GPS). Field experiences may be required.

**GEOG 360 Database Design and Management in GIS**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** GEOG 330 with a grade of “C” or better  
**Transferable:** CSU

This course examines principles of Geographic Information Systems (GIS) database management and design including conversion fundamentals, modeling techniques, and strategic planning. Topics include the needs, alternatives, and pitfalls of spatial database development and conversion. It examines various types of spatial and tabular data applicable to GIS, as well as relevant issues such as hardware and software requirements. Particular attention is paid to determining appropriate methodologies, conversion plans, and data quality assurance procedures.
GEOG 362 Advanced Database Design and Management in GIS

Units: 3
Hours: 54 hours LEC
Prerequisite: GEOG 360 with a grade of "C" or better
Advisory: CISA 320 and CISC 300
Transferable: CSU

This course extends the concepts presented in GEOG 360, Database Design and Management in GIS. Topics include the advanced applications of organizing, inputting, and editing spatial data, including spatial data engine service management, spatial functions, multi-user editing, replication, and data organization. It involves the rigorous examination of traditional spatial database topics in a Geographic Information Systems (GIS) context including data integration, warehousing, complex Structured Query Language (SQL) spatial coding, and system integration.

GEOG 375 Introduction to GIS Programming

Units: 3
Hours: 45 hours LEC; 27 hours LAB
Prerequisite: GEOG 330 with a grade of "C" or better
Advisory: GEOG 334
Transferable: CSU
General Education: AA/AS Area II(b)

This course provides the concepts and skills necessary to become a proficient Geographic Information Systems (GIS) applications developer using the Python scripting language to develop commonly used GIS procedures and functions. Topics include GIS methods for querying and selecting geographic features, working with selection sets, editing tables, creating automated map sets, and performing geoprocessing operations.

GEOG 385 Introduction to Web Based GIS Application Development

Units: 3
Hours: 50 hours LEC; 12 hours LAB
Prerequisite: GEOG 330 with a grade of "C" or better
Advisory: CISW 300
Transferable: CSU

This course introduces the development of Web-based Geographic Information Systems (GIS) solutions. Map authoring and Web service management tools are used to teach the techniques of creating, managing, maintaining, and deploying Web map services. It also introduces several options for using published Web map services for Web-based and mobile mapping applications.

GEOG 391 Field Studies in Geography: Mountain Landscapes

Units: 1 - 4
Hours: 6 - 24 hours LEC; 36 - 144 hours LAB
Prerequisite: None.
Transferable: CSU; UC
C-ID: C-ID GEOG 160

This course covers geographic principles and processes in mountain environments. Course content varies by destination and may include topics in physical geography (e.g., plant and animal communities, climate and weather, geology and geomorphology, natural hazards, environmental impacts) and human geography (e.g., cultural landscapes, economic activities, transportation issues, land use patterns). It also introduces tools and techniques used for geographic field research (e.g., map and compass use, the Global Positioning System (GPS), Geographic Information Systems (GIS)). Field trips are required.

GEOG 392 Field Studies in Geography: Coastal Landscapes

Units: 1 - 4
Hours: 6 - 24 hours LEC; 36 - 144 hours LAB
Prerequisite: None.
Transferable: CSU; UC
C-ID: C-ID GEOG 160

This course involves the study of geographic principles and processes in coastal environments. Course content varies by destination and may include topics in physical geography (e.g., plant and animal communities, climate and weather, geology and geomorphology, natural hazards, environmental impacts) and human geography (e.g., cultural landscapes, economic activities, transportation issues, land use patterns). It also introduces tools and techniques used for geographic field research (e.g., map and compass use, the Global Positioning System (GPS), Geographic Information Systems (GIS)). Field trips are required.

GEOG 393 Field Studies in Geography: Arid Landscapes

Units: 1 - 4
Hours: 6 - 24 hours LEC; 36 - 144 hours LAB
Prerequisite: None.
Transferable: CSU; UC
C-ID: C-ID GEOG 160

This course involves the study of geographic principles and processes in arid environments. Course content varies by destination and may include topics in physical geography (e.g., plant and animal communities, climate and weather, geology and geomorphology, natural hazards, environmental impacts) and human geography (e.g., cultural landscapes, economic activities, transportation issues, land use patterns). It also introduces tools and techniques used for geographic field research (e.g., map and compass use, the Global Positioning System (GPS), Geographic Information Systems (GIS)). Field trips are required.

GEOG 394 Field Studies in Geography: Volcanic Landscapes

Units: 1 - 4
Hours: 6 - 24 hours LEC; 36 - 144 hours LAB
Prerequisite: None.
Transferable: CSU; UC
C-ID: C-ID GEOG 160

This course involves the study of geographic principles and processes in volcanic environments. Course content varies by destination and may include topics in physical geography (e.g., plant and animal communities, climate and weather, geology and geomorphology, natural hazards, environmental impacts) and human geography (e.g., cultural landscapes, economic activities, transportation issues, land use patterns). It also introduces tools and techniques used for geographic field research (e.g., map and compass use, the Global Positioning System (GPS), Geographic Information Systems (GIS)). Field trips are required.

GEOG 495 Independent Studies in Geography

Units: 1 - 3
Hours: 54 - 162 hours LAB
Prerequisite: None.
Transferable: CSU

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the
study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

**GEOG 498 Work Experience in Geography**

*Units:* 0.5 - 4  
*Hours:* 30 - 300 hours LAB  
*Prerequisite:* None.  
*Enrollment Limitation:* Students must be in a paid or unpaid internship, volunteer position, or job related to geography or geographic information systems (GIS) with a cooperating site supervisor. Students are advised to consult with the Geography Department faculty to review specific certificate and degree work experience requirements.  
*Advisory:* Eligible for ENGRD 310 or ENGRD 312 AND ENGRWR 300; OR ESLW 340.  
*Transferable:* CSU  
*General Education:* AA/AS Area III(b)

This course provides students with opportunities to develop marketable skills in preparation for employment or advancement within the field of geography or geographic information systems (GIS). It is designed for students interested in work experience and/or internships in transfer-level degree occupational programs. Course content includes understanding the application of education to the workforce, completion of Title 5 required forms which document the student's progress and hours spent at the work site, and developing workplace skills and competencies.

During the semester, the student is required to complete 37.5 hours of related paid work experience, or 30 hours of related unpaid work experience for 0.5 unit. An additional 37.5 or 30 hours of related work experience is required for each additional 0.5 units. All students are required to attend the first class meeting, a mid-semester meeting, and a final meeting. Additionally, students who have not already successfully completed a Work Experience course will be required to attend weekly orientations while returning participants may meet individually with the instructor as needed. Students may take up to 16 units total across all Work Experience course offerings. This course may be taken up to four times when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

**GEOG 499 Experimental Offering in Geography**

*Units:* 0.5 - 4  
*Hours:* 15 hours LEC; 12 hours LAB  
*Prerequisite:* None.  
*Advisory:* GEOG 330  
*Transferable:* CSU

This course introduces remote sensing principles, image data sources, and provides practical experience in a full range of digital image processing functions including image rectification, image enhancement, classification, data integration and biophysical modeling using image data from airborne and space-borne sensors.
Social Science

A degree major is offered, including 18 units of university transfer-level work in addition to other graduation requirements. In addition there is an International Studies Certificate option, designed to benefit students who plan to seek careers or transfer with an international focus. The required courses will transfer as electives or lower division prerequisite for selected majors at the university level.

Degrees Offered

A.A. in Social Science

Dean Kathy Sorensen
Department Chair Pam Chao
Phone (916) 484-8283

Associate Degree

A.A. in Social Science

The Social Science degree provides an interdisciplinary approach to academic studies. The purpose of the program is for students to gain an understanding of the interconnectedness of various scientific disciplines. The interdisciplinary approach enables students to understand how issues and events are shaped by diverse socio-economic, political, ecological, biological and geographical forces.

The Social Science Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- Research and analyze topics from an interdisciplinary perspective.
- Integrate various social-scientific perspectives into the understanding of the subject matter.
- Compare and contrast the relative contribution of courses offered in various disciplines to an overall understanding of issues and events.
- Develop a personal interpretation about issues and matters under study.
- Identify and explain various forces that interact to shape events and social occurrences.
- Define and describe issues and events within an interdisciplinary perspective.

Social Science (SOCSC) Courses

SOCSC 299 Experimental Offering in Social Science

Units: 0.5 - 4
Prerequisite: None.

This is the experimental courses description.

SOCSC 495 Independent Studies in Social Science

Units: 1 - 3
Prerequisite: None.
Transferable: CSU

SOCSC 499 Experimental Offering in Social Science

Units: 0.5 - 4
Prerequisite: None.
Transferable: CSU

This is the experimental courses description.
Geology

Geology is the study of the origin and evolution of the Earth, using the principles of mathematics, chemistry, physics, and biology. Geologists study rocks, minerals, and fossils in an effort to draw conclusions about the Earth’s observable surface processes, as well as those processes taking place inside the Earth. They attempt to determine how the Earth was formed and how it is being changed by natural and man-made activities. Geologists are often involved in remediating environmental problems caused by mining, construction, and manufacturing.

Associate Degrees for Transfer

A.S.-T. in Geology

Geology is an interdisciplinary science that combines geological observations and concepts with those of biology, chemistry, physics, and mathematics. Its goals are to study rocks, minerals, fossils, energy and water resources, and to understand geologic principles and processes that shape Earth and its environments.

The Associate in Science in Geology for Transfer provides students with a major that fulfills the general requirements of the California State University for transfer. Students with this degree will receive priority admission with junior status to the California State University system.

The Associate in Science in Geology for Transfer (A.S.-T.) may be obtained by completion of 60 transferable, semester units with a minimum of a 2.0 GPA, including (a) the major or area of emphasis described in the Required Program outlined below (earning a C or better in these courses), and (b) the Intersegmental General Education Transfer Curriculum (IGETC).

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- evaluate new and accepted ideas about the natural universe using testable methodology.
- articulate orally and/or in writing the importance of continuous examination and modification of accepted ideas as a fundamental element in the progress of science.
- sort, arrange, and quantify objects using the international system of measurement (metric) as the standard.
- analyze a wide variety of natural phenomena using basic definitions and fundamental theories of natural science.
- compare the scales at which geologic processes work.
- apply knowledge of current geologic processes to the understanding of Earth's past geologic history.

Career Information

The Geology transfer degree is designed to facilitate students' successful transfer to four-year colleges that prepare them for advanced study in a variety of graduate programs as well as a variety of career opportunities in the fields of environmental monitoring, protection and remediation, energy and mineral exploration, paleontology, vulcanology, seismology, climatology, teaching, and research.

Associate Degrees

A.S. in General Science

This program provides a broad study in the fields of biological and physical sciences in preparation for transfer to a four-year program and continuation of studies in upper division science courses.

Total Units: 18

1 must be transfer-level and must include one laboratory course in a physical science and one laboratory course in a biological science

The General Science Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.
Student Learning Outcomes

Upon completion of this program, the student will be able to:

- evaluate new and accepted ideas about the natural universe using scientific methods.
- analyze a wide variety of natural phenomena using basic definitions and fundamental theories of biological or physical sciences.
- apply appropriate quantitative and qualitative methods to interpret and analyze pertinent data.
- outline the basic concepts and fundamental theories of a natural science.
- articulate orally and/or in writing the importance of continuous examination and modification of accepted ideas as a fundamental element in the progress of science.
- discuss ethical components of scientific decision making and apply personal and social values within the process of decision making in scientific endeavors.

Geology (GEOL) Courses

GEOL 300 Physical Geology

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Successful completion of Prealgebra and the skills needed to read and write college-level texts.
Transferable: CSU; UC
General Education: AA/AS Area IV; CSU Area B1; Cal-GETC Area 5A
C-ID: C-ID GEOL 100

This course provides an introduction to the dynamic nature of Earth through the study of Earth processes. Topics include global plate tectonics and related processes such as seismic and volcanic activity. It also covers mineral and rock formation, and those processes related to the development of fluvial, glacial, desert, and coastal environments. The occurrence, use, and abuse of renewable and non-renewable resources such as air, ground and surface water, and fossil fuels are also covered. Field experiences may be required.

GEOL 301 Physical Geology Laboratory

Units: 1
Hours: 54 hours LAB
Prerequisite: None.
Corequisite: GEOL 300
Transferable: CSU; UC
General Education: CSU Area B3; Cal-GETC Area 5C (effective Fall 2025); IGETC Area 5C
C-ID: C-ID GEOL 100L

This course is a laboratory study of the basic principles of geology and their applications to everyday life. It encompasses the study and identification of common rocks and minerals, the interpretation and recognition of geologic structures and landforms, interpretation of maps, aerial photographs, remote sensing images, seismic information, and analysis of geologic hazards. Field experiences may be required.

GEOL 305 Earth Science

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Successful completion of Prealgebra and the skills needed to read and write college-level texts.
Transferable: CSU; UC (UC Credit Limitation: No credit if taken after a college level course in Astronomy, Geology, Oceanography or Meteorology)
General Education: AA/AS Area IV; CSU Area B1; Cal-GETC Area 5A
C-ID: C-ID GEOL 120

This is an introductory science course covering major topics in geology, oceanography, meteorology, and astronomy. It focuses on Earth as a dynamic and continually evolving planet and emphasizes the relationships between human-Earth interactions. Field trips may be required.

GEOL 306 Earth Science Laboratory

Units: 1
Hours: 54 hours LAB
Prerequisite: None.
Corequisite: GEOL 305
Transferable: CSU; UC (UC credit limitation: No credit if taken after GEOL 300 or 301)
General Education: CSU Area B3; Cal-GETC Area 5C (effective Fall 2025); IGETC Area 5C
C-ID: C-ID GEOL 120L

This course emphasizes scientific methods, critical thinking skills, and systematic Earth science laboratory procedures. Topics include weather analysis, rock and mineral identification, study of topographic and geologic maps, and exercises in astronomy and oceanography.

GEOL 310 Historical Geology

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: (GEOL 300 or GEOL 305) and successful completion of Prealgebra and the ability to read and write college-level English.
Transferable: CSU; UC
General Education: AA/AS Area IV; CSU Area B1; Cal-GETC Area 5A (effective Fall 2025); IGETC Area 5A
C-ID: C-ID GEOL 110

This course covers the geologic history of the Earth as shown by the rock record and by the succession of fauna and flora through the processes of evolution and extinction. Plate tectonics and its driving mechanisms are used to understand the assembly and breakup of supercontinents, growth and erosion of mountains, and changing sea levels. The evolution of species, ecosystems, climates, and landscapes is placed in a plate tectonics context: Stratigraphic, mineralogic, geochemical, and petrographical techniques for interpreting the sequence of past geological events are studied. Field experiences may be required.
GEOL 311 Historical Geology Laboratory

Units: 1
Hours: 54 hours LAB
Prerequisite: None.
Corequisite: GEOL 310
Advisory: GEOL 300 and 301
Transferable: CSU; UC
General Education: CSU Area B3; Cal-GETC Area 5C (effective Fall 2025); IGETC Area 5C
C-ID: C-ID GEOL 110L

This course is a laboratory study in historical geology. It applies principles of physical geology and paleontology in the reconstruction of the history of the Earth. Exercises in stratigraphy, paleontology, and interpretation of geologic maps are utilized. Field experiences may be required.

GEOL 320 Global Climate Change

Same As: GEOG 305
Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Successful completion of Prealgebra and the skills needed to read and write college-level texts.
Transferable: CSU; UC
General Education: AA/AS Area IV; CSU Area B1; Cal-GETC Area 5A (effective Fall 2025); IGETC Area 5A

This course explores the history and mechanisms of climate change in Earth’s past, as well as the methods that scientists use to investigate climate change. It also focuses on climate change in Earth’s recent history (the past few million years) and the role that humans have had in climate change, especially since the industrial revolution. Additionally, it investigates the effects of climate change in today’s world and discusses possible technological and political solutions to this vast and increasingly important problem, and how societies may adapt to the changes. Field experiences may be required. This course is not open to students who have completed GEOG 305.

GEOL 325 Environmental Hazards and Natural Disasters

Same As: GEOG 307
Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Successful completion of Prealgebra and the skills needed to read and write college-level texts.
Transferable: CSU; UC
General Education: AA/AS Area IV; CSU Area B1; Cal-GETC Area 5A (effective Fall 2025); IGETC Area 5A

This course covers the environmental effects and applications of Earth-related processes. It focuses on earthquakes, volcanic eruptions, landslides, flooding, hurricanes, and related current events. Additional topics include the availability and exploitation of natural resources, waste disposal, and global climate change. Humans as a force in environmental change are emphasized. This course addresses geology, engineering, environmental studies, natural resources, geography, and science education. Field experiences may be required. This course is not open to students who have completed GEOG 307.

GEOL 330 Introduction to Oceanography

Same As: GEOG 308
Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Successful completion of Prealgebra and the skills needed to read and write college-level texts.
Transferable: CSU; UC
General Education: AA/AS Area IV; CSU Area B1; Cal-GETC Area 5A (effective Fall 2025); IGETC Area 5A

This course is an integrated study of the world's oceans, including the physical, chemical, biological, and human-made processes that affect the oceans. Topics include plate tectonics, ocean basins and sediments, water chemistry, waves, tides, shoreline processes, ocean currents, and biosystems. Human impacts on oceans will also be discussed. Regional oceanographic features are emphasized and field experiences may be required. This course is not open to students who have completed GEOG 308.

GEOL 331 Introduction to Oceanography Lab

Same As: GEOG 308
Units: 1
Hours: 54 hours LAB
Prerequisite: None.
Corequisite: GEOG 308 or GEOL 330
Transferable: CSU; UC
General Education: CSU Area B3; Cal-GETC Area 5C (effective Fall 2025); IGETC Area 5C

This course is a laboratory investigation of Earth's oceans, emphasizing coastal processes of California. Topics include plate tectonics, ocean basins and sediments, water chemistry, waves, tides, shoreline processes, ocean currents, and biosystems. Field experiences may be required. This course is not open to students who have completed GEOG 309.

GEOL 345 Geology of California

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Successful completion of Prealgebra and the skills needed to read and write college-level texts.
Transferable: CSU; UC
General Education: AA/AS Area IV; CSU Area B1; Cal-GETC Area 5A (effective Fall 2025); IGETC Area 5A
C-ID: C-ID GEOL 200

This course provides a survey of the physical and historical aspects of California geology, emphasizing the linkage of geology and people through economic and social impacts. It is recommended for non-majors and majors in geology and is of particular value to science, engineering, environmental studies, education, and economics majors. Field experiences may be required.

GEOL 392 Field Studies in Mountain Landscapes

Units: 1 - 4
Hours: 6 - 24 hours LEC; 36 - 144 hours LAB
Prerequisite: None.
Transferable: CSU; UC

This course explores the geologic processes that form mountains, as well as the importance of mountains as sources of water, energy, mineral resources, and biodiversity. The environmental hazards posed by mountains are studied, along with the human impacts on mountains. Course content varies by destination and may include topics in geologic processes, geomorphology, meteorology, and plant and animal habitats. This class also introduces geologic field techniques such as geologic map interpretation, and use of compass, rock hammers, and GPS. Field trips are required.

GEOL 393 Field Studies in Coastal Landscapes

Units: 1 - 4
Hours: 6 - 24 hours LEC; 36 - 144 hours LAB
Prerequisite: None.
Transferable: CSU; UC

This course explores the dynamics of the coastal ocean environment, the array of geomorphic processes, and the range of landforms found on
the ocean's edge, as well as offshore. Topics include the work of waves and tides and resultant changes to coastal features, types of beach materials, storm impacts, and coastal responses to climate change. Coastal impacts on humans and human impacts on coasts are also examined including engineering solutions to coastal hazards. Field trips are required. A field trip expense fee may be required to cover camping fees, lodging, or other incidentals. The instructor should be contacted for details prior to the first meeting.

GEOL 394 Field Studies in Volcanic Landscapes

Units: 1 - 4  
Hours: 6 - 24 hours LEC; 36 - 144 hours LAB  
Prerequisite: None.  
Transferable: CSU, UC

This course studies geologic principles, processes, and features in volcanic environments. Course content varies by destination and will include topics in physical geology (plate tectonics, volcanic eruption types, volcanic products, climatic and other environmental effects of volcanoes, including natural hazards as well as human interactions with volcanoes). It also introduces tools and techniques used for geologic field work such as maps, map reading, compass, and the Global Positioning System (GPS). Field trips are required. A field trip expense fee may be required to cover camping fees, lodging, or other incidentals. The instructor should be contacted for details prior to the first meeting.

GEOL 495 Independent Studies in Geology

Units: 1 - 3  
Hours: 54 - 162 hours LAB  
Prerequisite: None.  
Transferable: CSU

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

GEOL 499 Experimental Offering in Geology

Units: 0.5 - 4  
Prerequisite: None.  
Transferable: CSU

Field trips to selected locations of geologic interest in California and bordering areas. This course provides a general geologic understanding of a particular region of California and/or bordering areas. Course content may include plate tectonics, earthquakes and seismicity, geomorphology, recent volcanic activity, glacial features, ore deposits, mining, regional geology, and structural geology (faulting). Intended for those with a general interest in geology, earth science, environmental studies, civil engineering, science education, or the outdoors. Field trips(s) required.
Sociology

Sociology is the study of human society in all its manifestations. Its aim is to discover the process and structure of human interaction, to identify the main forces that sustain or weaken social groups, and to determine the conditions that transform social life. Sociology, like any science, is a disciplined, intellectual quest for knowledge about the fundamental nature of things.

Associate Degree for Transfer

A.A.-T. in Sociology

This Associate in Arts in Sociology for Transfer provides a path to students who wish to transfer to a CSU campus in Sociology and serves the diverse needs of students who wish to obtain a broad and an in-depth understanding of the field. Additionally, this degree allows students to learn the fundamental principles and practices of Sociology in order to create a solid foundation for their future personal and academic endeavors.

The Associate in Arts in Sociology for Transfer provides students with a major that fulfills the general requirements of the California State University for transfer. Students with this degree will receive priority admission with junior status to the California State University system.

The Associate in Arts in Sociology for Transfer (A.A.-T.) may be obtained by the completion of 60 transferable, semester units with a minimum of a 2.0 GPA, including (a) a minimum grade of "C" (or "P") for each course in the major or area of emphasis described in the Required Program, and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education-Breadth Requirements.

Degree Requirements

Course Code | Course Title | Units
---|---|---
SOC 300 | Introductory Sociology (3) | 3
or SOC 480 | Introductory Sociology · Honors (3) |
SOC 301 | Social Problems | 3
PSYC 330 | Introductory Statistics for the Behavioral Sciences | 3
A minimum of 6 units from the following: | 6
SOC 302 | Introduction to Social Research Methods (3) |
SOC 318 | Introduction to Crime, Deviance, and Social Control (3) |
SOC 321 | Race, Ethnicity and Inequality in the United States (3) |
SOC 342 | Gender Relations in American Society (3) |
A minimum of 3 units from the following: | 3
ANTH 310 | Cultural Anthropology (3) |
GEOG 310 | Human Geography: Exploring Earth's Cultural Landscapes (3) |
PSYC 300 | General Principles (3) |
or PSYC 480 | Honors General Principles (3) |
PSYC 354 | The Psychology of Family Life and Intimate Relationships in a Diverse Society (3) |

Total Units: 18

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- differentiate between scientifically-based sociological knowledge and hear-say, personal beliefs, and opinions.
- compare and contrast the major theoretical perspectives in sociology.
- define basic sociological terms and concepts regarding the nature of social life, social structures, socio-economic, political, and cultural institutions.
- analyze various sociological perspectives and their relevance to the understanding of social life in general and personal life in particular.
- construct and evaluate sociological data, utilize the scientific method, draw reasonable conclusions.
- identify and understand the ethical implications involved in research and their impact on social policy/public policies.
- apply sociological principles and theories to everyday life situations in regard to interaction with people from diverse backgrounds in a just, equitable, and inclusive manner.

Career Information

The Sociology degree is designed to facilitate students' successful transfer to four-year colleges that prepare them for advanced study in a variety of graduate programs as well as a variety of career opportunities in social work, law, criminology, law enforcement, teaching, health services, urban planning and development, and research.

Sociology (SOC) Courses

SOC 300 Introductory Sociology

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340
Transferable: CSU; UC
General Education: AA/AS Area V(b); CSU Area D0; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4
C-ID: C-ID SOCI 110

This course examines principles and basic concepts in sociology. It includes the study of institutions, culture, social organization, group interaction, social stratification, economy, politics, social movements, and urbanization. This course is not open to students who have completed SOC 480.

SOC 301 Social Problems

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
SOC 302 Introduction to Social Research Methods

Units: 3
Hours: 54 hours LEC
Prerequisite: SOC 300 with a grade of "C" or better
Advisory: ENGRD 310, ENGRD 312, and/or ENGWR 300
General Education: AA/AS Area V(b); CSU Area D; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4
C-ID: C-ID SOCI 115

This course examines basic principles and methods of sociological research, application and critique of major research methods, including survey, ethnographic, experimental and historical comparative analysis. It emphasizes the fundamental components of sociological research design such as theory, hypothesis, data collection, and variables. Ethical, ideological, and political implications of social research are also considered.

SOC 309 Self and Society

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGRD 300; OR ESLR 340 AND ESLW 340
General Education: AA/AS Area V(b); CSU Area D; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4
C-ID: C-ID SOCI 120

This course introduces concepts, social theories, and methods used to analyze how the sense of self is created in everyday life. It explores various theories of the development of self, the nature of human behavior, the importance of language for perception and thought, and reality as a social construction. Additionally, it examines how the self emerges and is maintained through social interaction and our involvement in social relationships. It includes the study of social identity, roles, socialization, identity change, and emotions.

SOC 318 Introduction to Crime, Deviance, and Social Control

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Transferable: CSU; UC
General Education: AA/AS Area V(b); CSU Area D; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4
C-ID: C-ID SOCI 160

This course introduces various sociological perspectives regarding issues of crime, deviance, and social control. Particular attention is paid to the analysis of how laws and cultural norms shape the definition and meaning of crime and deviance. Topics covered include street crimes, corporate crimes, white-collar crimes, domestic violence, drugs and alcohol abuse, lifestyle crimes, prison systems, capital punishment, rehabilitation, and the trend towards privatization of prisons. Field trips may be required.

SOC 321 Race, Ethnicity and Inequality in the United States

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGRD 300; OR ESLR 340 AND ESLW 340
Transferable: CSU; UC
General Education: AA/AS Area V(b); AA/AS Area VI; CSU Area D0; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4
C-ID: C-ID SOCI 150

This course examines contemporary social problems in the US within a theoretical and global context. It examines the role and the structure of power and ideology in shaping our understanding and approach to social problems. This course supports students to include a critical analysis of their causes, consequences as well as an evaluation of proposed solutions and methods of treatment. Attention is directed to poverty and inequality, race and gender inequalities, problems of the environment, unequal access to education as well as problems in the economic and political systems and the impact of globalization on these problems.

SOC 325 Chicano Culture

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGRD 300; OR ESLR 340 AND ESLW 340
Transferable: CSU; UC
General Education: AA/AS Area V(b); AA/AS Area VI; CSU Area D0; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4

This course is an introduction to fundamental concepts, social theories, and methods used to understand and critically analyze the production, adaptation, and construction of Chicano identity and Chicano culture within the United States. It includes micro and macro sociological analysis of Chicano culture and its relationship to Chicano social identity, social inequality, and social change.

SOC 335 Sociology of Aging

Same As: GERON 300
Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: ENGRD 310 and ENGRD 312 with a grade of "C" or better; OR ESLR 320 and ESLW 320 with a grade of "C" or better.
Transferable: CSU; UC (UC credit limitation: SOC 335, GERON 300, 302, & PSYC 374 combined: maximum credit, one course)
General Education: AA/AS Area III(b); CSU Area E1

This course examines the aged and aging process with emphasis on social factors affecting and affected by an aging population. It includes an analysis of demographics, history of aging in America, social conditions, resources and support systems, employment, retirement, and social class/cultural differences. This course is not open to students who have completed GERON 300.

SOC 342 Gender Relations in American Society

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGRD 300; OR ESLR 340 AND ESLW 340
Transferable: CSU; UC

**General Education:** AA/AS Area V(b); AA/AS Area VI; CSU Area D0; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4J

**C-ID:** C-ID SOCI 140

This course deals with gender relations in American society. It examines historical, social, economic, political, and cultural forces in shaping gender identity, gender roles, and gender expectations. This course utilizes sociological theories to explain gender experiences as socially constructed rather than biologically determined. Specifically, it examines the experiences of people of diverse economic, racial, and ethnic backgrounds within historical and cross-cultural perspectives. This course includes analysis and discussion of topics such as gender relations in the home, workplace, mass media, health care system, and politics.

**SOC 350 Sociology of Popular Culture**

**Units:** 3
**Hours:** 54 hours LEC
**Prerequisite:** None.
**Transferable:** CSU; UC

**General Education:** AA/AS Area V(b); CSU Area D0; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4J

This course analyzes the historical development and emergence of American popular culture and the relationship between contemporary popular culture, social institutions and social behavior. Further, it explores popular culture within the context of social, political, technological, and economic changes in the United States and includes an analysis of sociological theories of popular culture, social media, advertising, music, and film.

**SOC 480 Introductory Sociology - Honors**

**Units:** 3
**Hours:** 54 hours LEC
**Prerequisite:** Placement into ENGWR 480 through the assessment process.
**Transferable:** CSU; UC

**General Education:** AA/AS Area V(b); CSU Area D0; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4J

This course provides an in-depth examination of society and human behavior from various sociological perspectives. Sociological theories, both macro and micro, are applied to different aspects of life including culture, social stratification and inequality, social change, politics, economy, and deviance. The course is conducted as a seminar in which students will be responsible for developing in-depth analysis and understanding of issues based on classical and contemporary sociological theories. This course is designed for those from all academic disciplines who are motivated to learn sociological perspectives and how they apply to aspects of human experience both at the individual and societal levels. This course is not open to students who have successfully completed SOC 300.

**SOC 495 Independent Studies in Sociology**

**Units:** 1 - 3
**Hours:** 54 - 162 hours LAB
**Prerequisite:** None.
**Transferable:** CSU

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

**SOC 499 Experimental Offering in Sociology**

**Units:** 0.5 - 4
**Prerequisite:** None.

This is the experimental courses description.
Gerontology

California’s population is aging. Approximately 29% of Californians are already 55+, the percent will increase to 33% by 2033, and in 2060, 38% of Californians will be 55+. This trend has increased the demand for a workforce with expertise in aging. Our Gerontology program offers degrees and certificates that will prepare you to start your career in the expanding field of aging or transfer to a university.

Degrees and Certificates Offered

A.A. in Gerontology: Administrative
A.A. in Gerontology: Advocacy and Social Policy
A.A. in Gerontology: Case Management and Social Services
A.A. in Gerontology: Geriatric Health Care
A.A. in Gerontology: Recreation
A.A. in Gerontology
Gerontology: Administrative Certificate
Gerontology: Advocacy and Social Policy Certificate
Gerontology: Case Management and Social Services Certificate
Gerontology: Geriatric Health Care Certificate
Gerontology: Recreation Certificate
Senior Fitness Specialist Certificate
Activity Leader, Coordinator, and Director Training Certificate
RCFE Administrator Training Certificate
Social Service Designee Certificate

Associate Degrees

A.A. in Gerontology: Administrative

This degree provides a broad overview of the biological, psychological, and social aspects of adult development and aging as a foundation for a gerontological biopsychosocial perspective. Additional business, gerontology, and math courses are included to provide an administrative focus. This program is intended for students who plan to seek employment upon completion of the degree or as preparation for further gerontology/social services studies at a four-year college or university.

This degree is nationally accredited by Accreditation for Gerontology in Higher Education (AGEC) and it is recognized as a Program of Merit by the Academy for Gerontology in Higher Education (AGHE), which sets the standards for gerontological curriculum. Program graduates receive additional certificates from AGEC and AGHE.

Total Units: 36

The Gerontology: Administrative Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

• associate social conditions in the current and recent past with their potential impact on future aging cohorts.
• evaluate the impact of diversity in terms of race, ethnicity, religion, sex, gender and sexual orientation, and citizenship on well-being during aging and on aging outcomes.
• generalize knowledge about cognition and memory during aging to how people learn and remember at any age.
• recognize macro, mezzo, and micro level ageism messages that marginalize and stigmatize older people.
• enumerate the functions of social service delivery systems.
• synthesize knowledge of existing California professional codes of ethics for the helping professions.
• analyze legal and ethical issues related to aging including the mandatory reporting of abuse, neglect, and exploitation, value imposition, and end-of-life decisions.
• demonstrate ease, confidence, rapport, and listening skills during interactions with older adults at various levels of function.
• differentiate between aging-related changes and the effects of social condition and deprivations, and physical and mental diseases, disorders, deficits, injuries, and disabilities.
• assess the impacts of lifestyle choices on the biopsychosocial domains of function during aging.
• apply biopsychosocial gerontological knowledge to case studies and real-life situations.
• list services for seniors and adults with disabilities available within a community.
• compose sentences and paragraphs in business documents with proper structure, word usage and spelling, punctuation and proof reading, and critical thinking.
• demonstrate accuracy, neatness, thoroughness, and speed adding, subtracting, multiplying and dividing whole numbers, fractions and decimals, solving written application problems, using formulas, variables and equations, and creating and interpreting graphs.
• describe the key management functions of planning, organizing, leading, and controlling including ethical, regulatory/legal, social, and cultural factors.

Career Information

Entry-level administrative positions in state and local government agencies, non-profit organizations, institutions, and private sector businesses that provide older people and adults with disabilities with information and referral service, service coordination, employment and legal services, activity and recreation programs, health education and health promotion programs, housing, medical care, and in-home support services.

A.A. in Gerontology: Advocacy and Social Policy

This degree provides a broad overview of the biological, psychological, and social aspects of adult development and aging as a foundation for a gerontological biopsychosocial perspective. Additional communication, political science, and sociology courses are included to provide an advocacy and social policy focus. This program is intended for students who plan to seek employment upon completion of the degree or as preparation for further gerontology/social services studies at a four-year college or university.

This degree is nationally accredited by Accreditation for Gerontology in Higher Education (AGEC) and it is recognized as a Program of Merit by the Academy for Gerontology in Higher Education (AGHE), which sets the standards for gerontological curriculum. Program graduates receive additional certificates from AGEC and AGHE.

- apply biopsychosocial gerontological knowledge to case studies and real-life situations.
- list services for seniors and adults with disabilities available within a community.
- assess the psychological, physiological, and sociocultural issues related to substance use, misuse, and abuse.
- demonstrate the techniques of interviewing and counseling individuals or groups appropriate for associate level helpers in social service agency settings.
- describe the psychological, social, philosophical, and legal issues related to death.

Career Information

Entry-level care management and social services positions in state and local government agencies, non-profit organizations, institutions, and private sector businesses that provide older people and adults with disabilities with information and referral service, service coordination, employment and legal services, activity and recreation programs, health education and health promotion programs, housing, medical care, and in-home support services. Graduates with this focus may also become self-employed.

A.A. in Gerontology: Geriatric Health Care

This degree provides a broad overview of the biological, psychological, and social aspects of aging, along with introductory course work emphasizing the health needs of an aging population. It focuses on preparation for entry-level positions with private industry, government, and non-profit agencies providing health services to senior adults and/or preparation for further gerontology/health care study at a four-year college or university.

Total Units: 36

The Gerontology: Geriatric Health Care Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.
Student Learning Outcomes

Upon completion of this program, the student will be able to:

- associate social conditions in the current and recent past with their potential impact on future aging cohorts.
- evaluate the impact of diversity in terms of race, ethnicity, religion, sex, gender and sexual orientation, and citizenship on well-being during aging and on aging outcomes.
- generalize knowledge about cognition and memory during aging to how people learn and remember at any age.
- recognize macro, mezzo, and micro level ageism messages that marginalize and stigmatize older people.
- enumerate the functions of social service delivery systems.
- synthesize knowledge of existing California professional codes of ethics for the helping professions.
- analyze legal and ethical issues related to aging including the mandatory reporting of abuse, neglect, and exploitation, value imposition, and end-of-life decisions.
- demonstrate ease, confidence, rapport, and listening skills during interactions with older adults at various levels of function.
- differentiate between aging-related changes and the effects of social condition and deprivations, and physical and mental diseases, disorders, deficits, injuries, and disabilities.
- assess the impacts of lifestyle choices on the biopsychosocial domains of function during aging.
- apply biopsychosocial gerontological knowledge to case studies and real-life situations.
- list services for seniors and adults with disabilities available within a community.
- demonstrate a workable knowledge of medical terminology by interpreting health care reports/records accurately into clear, non-medical terms.
- differentiate between the basic mechanisms of biological homeostasis and aging from physiological imbalances related to illness and disease.
- identify communication disorders in individuals of various ages with consideration of cultural and linguistic differences.

Career Information

Entry-level positions with private industry, government, and non-profit agencies providing health services to senior adults

A.A. in Gerontology: Recreation

This degree provides a broad overview of the biological, psychological, and social aspects of adult development and aging as a foundation for a gerontological biopsychosocial perspective. Additional gerontology, kinesiology, and recreation courses are included to provide a recreation focus. This program is intended for students who plan to seek employment upon completion of the degree or as preparation for further gerontology/social services studies at a four-year college or university.

This degree is nationally accredited by Accreditation for Gerontology in Higher Education (AGEC) and it is recognized as a Program of Merit by the Academy for Gerontology in Higher Education (AGHE), which sets the standards for gerontological curriculum. Program graduates receive additional certificates from AGEC and AGHE.

The Gerontology: Recreation Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- associate social conditions in the current and recent past with their potential impact on future aging cohorts.
- evaluate the impact of diversity in terms of race, ethnicity, religion, sex, gender and sexual orientation, and citizenship on well-being during aging and on aging outcomes.
- generalize knowledge about cognition and memory during aging to how people learn and remember at any age.
- recognize macro, mezzo, and micro level ageism messages that marginalize and stigmatize older people.
- enumerate the functions of social service delivery systems.
- synthesize knowledge of existing California professional codes of ethics for the helping professions.
- analyze legal and ethical issues related to aging including the mandatory reporting of abuse, neglect, and exploitation, value imposition, and end-of-life decisions.
- demonstrate ease, confidence, rapport, and listening skills during interactions with older adults at various levels of function.
- differentiate between aging-related changes and the effects of social condition and deprivations, and physical and mental diseases, disorders, deficits, injuries, and disabilities.
- assess the impacts of lifestyle choices on the biopsychosocial domains of function during aging.
- apply biopsychosocial gerontological knowledge to case studies and real-life situations.
- list services for seniors and adults with disabilities available within a community.
- develop an activity calendar and newsletter that meets the overall needs of residents in a facility or community.
- integrate health and aging-related fitness components into fitness activities relevant to a group setting.
Upon completion of this program, the student will be able to:

- list recreation and leisure events for a diverse population based on health and age.

**Career Information**

Entry-level positions planning and leading recreation and leisure activities in skilled nursing facilities, adult day health centers, residential care facilities for the elderly, memory care units, adult day programs, and other settings that provide care, services, and housing for older people and adults with disabilities.

**A.A. in Gerontology**

The coursework provides a foundation in the biopsychosocial discipline of gerontology, including social gerontology, the psychology of aging, the aging process, and the social determinants of health and aging outcomes. Intended for students who plan to transfer and complete a bachelors degree.

Total Units: 19 - 20

The Gerontology Associate in Arts (A.A.) degree may be obtained by completion of 60 transferable, semester units, including the major or area of emphasis described in the Required Program, and one of the following: the ARC General Education, the Intersegmental General Education Transfer Curriculum (IGETC), or the California State University General Education-Breadth Requirements.

**Student Learning Outcomes**

- appraise the influence of historical events, technological advancements, cultural shifts, and social policies on aging cohorts based on decade of birth.
- relate the importance of social programs, family, friends, and other supports during aging.
- enumerate the function of the constitution, federal and state government, and public policies and programs at all levels of government.
- explain the civil liberties and civil rights of individuals as articulated in the United States Constitution and federal court decisions.
- distinguish between methods of obtaining data, types of data, and types of analysis and the advantages and disadvantages of the methods, data types, and analysis.
- analyze data by computing measures of central tendency, measures of dispersion, and measures of position.
- develop a broader understanding about aging through the lens of a behavioral or health science.

**Career Information**

Completion of this degree and bachelor's degree in a related field prepares students to work in local government agencies, non-profit organizations, institutions, and private sector businesses that provide information services, employment and legal services, activity and recreation programs, health education and health promotion programs, housing, and care and support services for older people.

**Certificates of Achievement**

**Gerontology: Administrative Certificate**

This program provides a broad overview of the biological, psychological, and social aspects of adult development and aging as a foundation for a gerontological biopsychosocial perspective. Additional business, gerontology, and math courses are included to provide an administrative focus. This program is intended for students who plan to seek employment upon completion of the program.

This program is recognized as a Program of Merit by the Academy for Gerontology in Higher Education (AGHE), which sets the standards for gerontological curriculum. Program graduates receive an additional certificate from AGHE.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- demonstrate a workable knowledge of medical terminology by interpreting health care reports/records accurately into clear, non-medical terms.
- differentiate between the basic mechanisms of biological homeostasis and aging from physiological imbalances related to illness and disease.
- identify communication disorders in individuals of various ages with consideration of cultural and linguistic differences.

Career Information

Entry-level care and support service positions in private residences, skilled nursing facilities, adult day health centers, residential care facilities for the elderly, memory care units, adult day programs, and other settings that provide care and services for older people and adults with disabilities.

Gerontology: Recreation Certificate

This program provides a broad overview of the biological, psychological, and social aspects of adult development and aging as a foundation for a gerontological biopsychosocial perspective. Additional gerontology, kinesiology, and recreation courses are included to provide a recreation focus. This program is intended for students who plan to seek employment upon completion of the program.

This program is recognized as a Program of Merit by the Academy for Gerontology in Higher Education (AGHE), which sets the standards for gerontological curriculum. Program graduates receive an additional certificate from AGHE.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- associate social conditions in the current and recent past with their potential impact on future aging cohorts.
The Senior Fitness Specialist program prepares students for employment in geriatric care facilities for the elderly, memory care units, adult day programs, skilled nursing facilities, adult day health centers, residential care facilities for the elderly (RCFEs), adult day programs (ADPs), and in settings without mandated training (e.g., senior centers, community and recreation centers, and health clubs where these groups participate in programs and exercise). This program meets the California Title 22, Divisions 5 requirements for the training of activity leaders working in medical settings, SNFs and ADHCs. An Occupational Therapist and a Certified Therapeutic Recreation Specialist licensed in CA provide 54 hours of instruction, which exceeds the 36 hour Title 22 requirement. The curriculum includes all the required topics for medical settings with supplemental topics related to emergency preparedness, infection control, and other emerging concerns in all settings. The training exceeds Title 22, Division 5 requirements for activity coordinators, and Title 22, Division 6 requirements for activity directors and activity staff with other titles working in non-medical settings, RCFEs and ADPs.

Student Learning Outcomes
Upon completion of this program, the student will be able to:

• recommend beneficial exercises for seniors and individuals with disabilities or medical conditions.
• behave responsibly at work, exhibiting initiative and self-management in situations where it is needed.
• create an individualized fitness plan to promote functional independence throughout the remainder of life.
• analyze how nutrition plays a part in overall health and aging.
• compare and contrast different self and group motivational techniques for staying active.
• identify and respond to life-threatening conditions (including breathing emergencies, cardiac emergencies, and severe bleeding).
• evaluate physical activities relative to risk factors.
• design and lead a group exercise activity, and provide modifications and variations to exercises when necessary.
• identify basic principles of body mechanics and posture.
• design an individualized exercise prescription program that includes muscular strength and muscular endurance development.
• explain normal aging-related changes and analyze how lifestyle choices influence the aging process.
• demonstrate techniques for validating and encouraging older adults during fitness activities.

Career Information

The Senior Fitness Specialist program is ideal for anyone seeking an entry-level position as a fitness leader in community, recreation, and senior centers, health clubs, retirement and assisted living communities, and other sites that cater to seniors.

Certificates

Activity Leader, Coordinator, and Director Training Certificate

This program prepares students for the duties, roles, and responsibilities of planning and leading activities for older people and adults with disabilities residing in skilled nursing facilities (SNFs), adult day health centers (ADHCs), residential care facilities for the elderly (RCFEs), adult day programs (ADPs), and in settings without mandated training requirements, such as senior centers, community and recreation centers, and health clubs where these groups participate in programs and exercise.

Career Information

The Senior Fitness Specialist program prepares students for employment as a fitness leader in settings where people ages 50+ exercise with other age groups and in settings that cater to older adults. The program provides students with the knowledge and hands on experience necessary to begin a career in this growing field of fitness.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- research the 13 core areas of the RCFE Knowledge Training Standard set forth by the California Department of Social Services (CDSS).
- analyze the 13 core areas of the RCFE Knowledge Training Standard set forth by the California Department of Social Services (CDSS).
- discuss the 13 core areas of the RCFE Knowledge Training Standard set forth by the California Department of Social Services (CDSS).
- generalize the 13 core areas of the RCFE Knowledge Training Standard set forth by the California Department of Social Services (CDSS).
- enumerate the 13 core areas of the RCFE Knowledge Training Standard set forth by the California Department of Social Services (CDSS).
- demonstrate knowledge in the 13 core areas of the RCFE Knowledge Training Standard set forth by the California Department of Social Services (CDSS).

Career Information

Passing the state Administrator Exam and becoming a Certified Administrator qualifies students for the position of Administrator of a residential care facility for the elderly (RCFE). Being certified also enhances qualifications for other administrative staff positions within an RCFE and administrative staff are often encouraged to become certified to earn a raise in their pay-scale and increase their upward mobility within the organization. See the program description for details about the course approval by the California Department of Social Services.

Social Service Designee Certificate

The Social Service Designee certificate provides a comprehensive overview of the role and duties of a social services designee in a long-term care facility.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- Articulate the role and responsibilities of the social services designee in a long-term care facility
- Analyze normal age changes and their impact on residents
- Incorporate resident rights and responsibilities into daily practice
- Apply Omnibus Budget Reconciliation Act (OBRA)/Title 22 (State of California Department of Social Services) regulations to work environment
- Evaluate legal and ethical issues relating to powers of attorney, long-term care financing, and end-of-life decisions
- Evaluate long-term care facility environments
Career Information

Social Services Designee in long-term care, assisted living, and retirement facilities

Gerontology (GERON) Courses

GERON 200 Activity Leader, Coordinator, and Director Training

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.
Transferable: CSU

This course details for the duties, roles, and responsibilities of planning and leading activities for older people and adults with disabilities residing in skilled nursing facilities (SNFs), adult day health centers (ADHCs), residential care facilities for the elderly (RCFEs), adult day programs (ADPs), and in settings without mandated training requirements, such as senior centers, community and recreation centers, and health clubs where these groups participate in programs and exercise.

This course meets the California Title 22, Divisions 5 requirements for the training of activity leaders working in medical settings, SNFs, ADHCs, and adult day programs (ADPs), and in settings without mandated training requirements, such as senior centers, community and recreation centers, and health clubs where these groups participate in programs and exercise.

As required by Title 22, Division 5 requirements for leaders of activities in medical settings, the course topics include federal and state regulations; residential and non-residential organizational structures; the role and function of activity paraprofessionals; medical terminology; the aging process and disease processes; disabilities and strategies for accommodating disabilities communication disorders, and sensorineural losses; person-centered activity planning and leading; and emergency preparedness. The curriculum also includes supplemental topics related to emergency preparedness, infection control, and other emerging concerns in all settings.

Instructor qualifications and licenses and the course curriculum are reviewed for approval by the California Department of Public Health (CDPH) each semester. Upon completion of this course, a certificate confirming completion of a training program that meets the State of California SNF and ADHC survey documentation requirements will be awarded.

GERON 220 RCFE Administrator Training

Units: 4.5
Hours: 81 hours LEC
Prerequisite: None.
Transferable: CSU

This course meets the educational requirements necessary to take for state licensure as an administrator of a residential care facility for the elderly (RCFE). Topics include philosophy, mission, and operations of a RCFE; regulations, rights and responsibilities of licenses; fingerprinting and criminal record clearances; psychosocial needs of residents; physical plant requirements; resident assessment, retention, and eviction; resident records and services; food service regulations; admission agreement; special diets; medications; abuse reporting; residents’ rights; and community resources. Pass/No Pass only.

GERON 230 Motivating Older Clients

Units: 0.5
Hours: 9 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 and ENGWR 300; OR ESLW 340.
Transferable: CSU

This course presents techniques for motivating older clients recovering from an injury or surgery, older clients with physical or cognitive deficits, and other adult clients with disabilities to gain, regain, or preserve their ability to perform tasks of daily life such as personal care, household tasks, errands, and social interaction. Special emphasis is placed on the psychosocial model of self-efficacy and its application as a model to help scaffold clients as they learn new skills and regain lost skills. Pass/No Pass only.

GERON 231 Validation: Theory and Practice

Units: 0.5
Hours: 9 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.

This course presents Validation Theory as a communication technique used during interactions with older individuals who have cognitive deficits and diseases such as dementia. Special emphasis is placed on the selection of appropriate techniques for optimal interactions with an individual based on information in their care plan and chart and observations of how the individual interacts with others and their environment. Case studies are utilized to introduce students to various cognitive deficit and dementia behaviors and for technique selection and practice. Pass/No Pass only.

GERON 232 Body Mechanics and Safety

Units: 0.5
Hours: 9 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.
Transferable: CSU

This course is an overview of body mechanics of clients who require mobility assistance and the person providing assistance. Special emphasis is placed on safety and problem-solving. Students are introduced to the basic methods and techniques of positioning, transfer, and ambulation and the use of personal safety, adaptive exercise, and other assistive devices. Pass/No Pass only.

GERON 233 Nutrition and Aging

Units: 0.5
Hours: 9 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.
Transferable: CSU

This course presents a practical approach to nutrition for older people with various health-related dietary restrictions and other concerns such as the need to gain, maintain, and reduce weight and/or to build strength and stamina. Easy-to-prepare, low-cost and nutritional snacks, meals, and menus are emphasized. Case studies are introduced to examine the relationship between how people eat and the social determinants of health. Pass/No Pass only.

GERON 280 Home Adaptations for Safety and Independence

Units: 0.5
Gerontology

GERON 281 Basics of Aging, Health, and Ethical Care

Units: 0.5
Hours: 9 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 and ENGW 300; OR ESLW 340.
Transferable: CSU
None.
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 and ENGW 300; OR ESLW 340.
Transferable: CSU
This course presents an overview of aging from a nature-nurture perspective, with nature relating to genetics and nurture as the social determinants of health. Special emphasis is placed on changes in vision, hearing, balance, strength, and stamina; chronic illnesses, diseases, and cognitive decline; and ethical issues associated with decision-making in daily activities, motivation versus manipulation, and value imposition. Pass/No Pass only.

GERON 299 Experimental Offering in Gerontology

Units: 0.5 - 4
Prerequisite: None.
This is the experimental courses description.

GERON 302 Psychology of Aging: Adult Development and Aging

Same As: PSYC 374
Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; OR ESLR 340 AND ESLW 340
Transferable: CSU; UC (UC credit limitation: GERON 300, 302, PSYC 374, & SOC 335 combined: maximum credit, one course)
General Education: AA/AS Area V(b); AA/AS Area III(b); CSU Area D; CSU Area E1; Cal-GETC Area 4 (effective Fall 2025)

This course covers the physical, psychological, and social aspects of the aging process including the interactions between the elderly and the rest of society. Topics include an analysis of stereotypes, social bonds, environmental factors, sexuality, physical health, mental health, death, and bereavement. This course is not open to students who have completed PSYC 374.

GERON 303 Introduction to Social Gerontology: Aging in Contemporary Society

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 and ENGW 300; OR ESLR 340 AND ESLW 340.
Transferable: CSU; UC
General Education: AA/AS Area V(b); AA/AS Area III(b); CSU Area D; CSU Area E1; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4

This course is an introduction to older people and the aging process in the context of contemporary society through the perspective of social gerontology. It focuses the biopsychosocial lens on the social forces that contribute to the development of individuality across the lifespan and lead to differences in how people age. Using this lens, students gain perspective on how opportunities, choices, and experiences throughout life are driven by gender, race, and class, and how they culminate during aging and impact aging outcomes. It explores the influence of when people were born, where people were born, history, and how politics contribute to individual beliefs, behaviors, and experiences throughout life and during aging. The aging experience in the United States is also compared to aging in other countries. Gerontology majors are encouraged to take this course in their first semester of study.

GERON 305 Introduction to Geropsychology and the Aging Brain

Same As: PSYC 375
Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; OR ESLW 340.
Transferable: CSU; UC (effective Fall 2024)
General Education: AA/AS Area V(b); AA/AS Area III(b); CSU Area D; CSU Area E1

This course introduces foundation theories and constructs of gerontology and psychology to examine the aging-related biopsychosocial changes that influence how mature and older adults feel about themselves, how they process information, and how they encode memories about what they experience and learn. Special emphasis is placed on psychological differences between aging cohorts based on psychosocial factors present during the decade of birth and earlier stages of life, gender/sex and race/ethnicity, the social determinants of health, bias development, prejudice and discrimination, and racism, ableism, sexism, and ageism. Topics include psychological theories, models, and constructs that have practical application during interactions with older people; stages of life and phases of aging; aging-related changes (senescence) and the psychological impact of those changes; how illnesses, diseases, and disabilities complicate aging; the anatomy of the central and peripheral nervous systems; and models of sensorimotor processing and learning/memory. Case studies are utilized to explore older adult health and mental health, personality and communication behaviors, environmental factors, and the impact of the social determinants of health on overall well-being, quality of life, and aging outcomes. This course is not open to students who have completed PSYC 375.

GERON 306 Health, Wellness, and the Aging Process

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Transferable: CSU; UC (effective Fall 2024)
General Education: AA/AS Area V(b); AA/AS Area III(b)

This course provides knowledge about health-related conditions prevalent in the older population, wellness during aging, and the aging process from the nature-nurture perspective. The knowledge has practical application when working with mature and older people and when interacting with family members, friends, and colleagues. Special emphasis is placed on the intersections between the aging process and health and wellness, the intersections between the social determinants of health and disparities in life expectancies, and how inequities impact overall health and wellness in the aging population.

Course topics are framed from the gerontological perspective, which is a strength-based, whole-lifespan, and person-centered approach. Examples of health-related topics include the social determinants of health, diseases and health conditions common among the older population, and strategies for coping with and slowing disease progression. Wellness-related topics include the health effects of stress and stress reduction, preservation of physical abilities and cognitive function, and nutrition for healthy aging, among others. Examples of aging-related topics are how aging changes cells, tissues, and organs,
how those changes affect physiological processes and increase vulnerability to illness and injury, and the differentiation of aging from diseases and other health conditions. This course is not open to students who have previously completed GERON 335.

**GERON 310 Social Service Designee: Role and Responsibility**

**Units:** 2.5  
**Hours:** 45 hours LEC  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340.  
**Transferable:** CSU

This course covers the role of the Social Services Designee in long-term care. The focus is on family, patient adjustment, and dementia. It also covers documentation for the Social Services Designee working in long-term care.

**GERON 490 Aging Policy and Practice**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340.  
**Transferable:** CSU

This course provides an overview of the social issues faced by Older Americans and the social policies and programs provided to address those issues, including the Older Americans Act, Social Security, Medicare, and the Elder Justice Act. It investigates how social policies and programs are put into practice by exploring career options in the agencies, businesses, and organizations that provide services and support to older adults living in California.

**GERON 495 Independent Studies in Gerontology**

**Units:** 1 - 3  
**Hours:** 54 - 162 hours LAB  
**Prerequisite:** None.  
**Transferable:** CSU

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

**GERON 498 Work Experience in Gerontology**

**Units:** 0.5 - 4  
**Hours:** 30 - 300 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Students must be in a paid or unpaid internship, volunteer position, or job related to the gerontology field with a cooperating site supervisor. Students are advised to consult with the Gerontology Program to review specific certificate and degree work experience requirements.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.  
**Transferable:** CSU  
**General Education:** AA/AS Area III(b)

This course provides students with opportunities to develop marketable skills in preparation for employment or advancement within the field of gerontology. It is designed for students interested in work experience and/or internships in transfer-level degree occupational programs. Course content includes understanding the application of education to the workforce, completion of Title 5 required forms which document the student's progress and hours spent at the work site, and developing workplace skills and competencies.

During the semester, the student is required to complete 37.5 hours of related paid work experience, or 30 hours of related unpaid work experience is required for each additional 0.5 units. All students are required to attend the first class meeting, a mid-semester meeting, and a final meeting. Additionally, students who have not already successfully completed a Work Experience course will be required to attend weekly orientations while returning participants may meet individually with the instructor as needed. Students may take up to 16 units total across all Work Experience course offerings. This course may be taken up to four times when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

**GERON 499 Experimental Offering in Gerontology**

**Units:** 0.5 - 4  
**Prerequisite:** None.  
**Transferable:** CSU

This is the experimental courses description.
Speech-Language Pathology

The Speech Language Pathology degree program prepares students to assist Speech-Language Pathologists in treating disorders of communication. Such disorders may be related to articulation and phonology, child and adult language, motor speech, voice, fluency, and hearing.

Topics include an introduction to the field of communication disorders, articulation and phonology for the speech-language pathology assistant (SLPA), professional issues and practices in speech-language pathology, speech/language/hearing clinical strategies, clinical considerations in service delivery to clients with communication disorders, and fieldwork experience.

Degrees and Certificates Offered

A.S. in Speech-Language Pathology Assistant Program
SLPA Core Curriculum Certificate Certificate
SLPA Specialization: Adult Neurogenic Certificate
SLPA Specialization: Early Intervention Certificate
SLPA Specialization: School Age Certificate

Dean Narinedat Madramootoo
Department Chair Kristina Zajic
Phone (916) 484-8902

Associate Degree

A.S. in Speech-Language Pathology Assistant Program

This degree prepares students to assist Speech-Language Pathologists in treating disorders of communication. Such disorders may be related to articulation and phonology, child and adult language, motor speech, voice, fluency, and hearing. Topics include an introduction to the field of communication disorders, articulation and phonology for the speech-language pathology assistant (SLPA), professional issues and practices in speech-language pathology, speech/language/hearing clinical strategies, clinical considerations in service delivery to clients with communication disorders, and fieldwork experience.

Total Units: 41

The Speech-Language Pathology Assistant Program Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- describe various communication disorders, including etiology and some remedial techniques.
- explain the major areas of cultural diversity and the relationship between culture and communication.
- demonstrate skills needed to assist in the management of speech-language pathology programs and services.
- describe the therapeutic process especially in terms of how learning occurs and strategies for effective lesson delivery.
- implement a treatment protocol as prescribed by the supervising Speech-Language Pathologist.
- describe professional responsibilities and ethical behavior appropriate for the Speech-Language Pathology Assistant.

Career Information

Upon completion of the Associate in Science degree, a student possesses the course work and field work experience to work as a Speech-Language Pathology Assistant (SLPA) in both private and public agencies, such as hospitals, rehabilitation centers, and the public schools serving preschool through adult-age clients. Successful completion of the Speech-Language Pathology Assistant program qualifies the graduate for eligibility to apply to the Speech-Language Pathology and Audiology and Hearing Aid Dispensers Board for registration as a Speech-Language Pathology Assistant.

Certificates of Achievement

SLPA Core Curriculum Certificate Certificate

This certificate is designed for students with a bachelor's degree in the field of communication sciences and disorders. With the addition of this certificate, they will be prepared to assist Speech-Language Pathologists in treating disorders of communication. Such disorders may be related to articulation and phonology, child and adult language, motor speech, voice, fluency, and hearing. Topics include articulation and phonology for the speech-language pathology assistant (SLPA), professional issues and practices in speech-language pathology, clinical considerations in service delivery to clients with communication disorders, and fieldwork experience.

---           | -------------------------------------------------|-------|
SLPA 115     | Speech, Language, and Hearing Clinical Strategies | 3     |
SLPA 120     | Clinical Considerations in Service Delivery to Clients with Communication Disorders | 3     |
SLPA 121     | Fieldwork Experience in Speech-Language Pathology | 4     |
SLPA 300     | Introduction to Communication Disorders          | 3     |
Total Units:  |                                                   | **19** |

**Student Learning Outcomes**

Upon completion of this program, the student will be able to:

- describe various communication disorders, including etiology and some remedial techniques.
- explain the major areas of cultural diversity and the relationship between culture and communication.
- demonstrate skills needed to assist in the management of speech-language pathology programs and services.
- describe the therapeutic process especially in terms of how learning occurs and strategies for effective lesson delivery.
- implement a treatment protocol as prescribed by the supervising Speech-Language Pathologist.
- describe professional responsibilities and ethical behavior appropriate for the Speech-Language Pathology Assistant.

**Career Information**

Upon completion of the SLPA Core Curriculum Certificate and awarding of the Bachelor’s degree in the field of Communication Sciences and Disorders, the student qualifies for eligibility to apply to the Speech-Language Pathology and Audiology and Hearing Aid Dispensers Board (SLPAHADB) for registration as a Speech-Language Pathology Assistant (SLPA) in the State of California. The registered SLPA may work in both private and public agencies, such as hospitals, rehabilitation centers, and the public schools serving infants through adult-age clients addressing communication and cognitive needs.

**SLPA Specialization: Adult Neurogenic Certificate**

This certificate prepares students to assist Speech-Language Pathologists in treating disorders of communication occurring in the adult neurogenic population. Such disorders may be related to articulation and phonology, language, motor speech, voice, fluency, and hearing. Topics include medical language for health care providers, psychology of aging - adult development and aging, neurogenic communication disorders, neurogenic therapy techniques, and fieldwork experience.

**Certificate Requirements**

SLPA 300     | Introduction to Communication Disorders          | 3     |
Total Units:  |                                                   | **30** |

**Student Learning Outcomes**

Upon completion of this program, the student will be able to:

- describe various communication disorders affecting the adult age population, including etiology and remediation techniques.
- demonstrate skills needed to assist in the management of adult neurogenic speech-language pathology programs and services.
- describe the therapeutic process especially in terms of how learning occurs and strategies for effective lesson delivery for the adult population.
- implement a treatment protocol as prescribed by the supervising Speech-Language Pathologist.
- explain service provision differences between inpatient, outpatient, home, and clinic-based therapeutic models for the adult.
- describe professional responsibilities and ethical behavior appropriate for the Speech-Language Pathology Assistant when working with the adult population.

**Career Information**

Successful completion of the Speech-Language Pathology Assistant (SLPA) program qualifies the student to earn an Associate in Science degree in Speech-Language Pathology. The SLPA graduate possesses the course work and field work experience to apply to the Speech-Language Pathology and Audiology and Hearing Aid Dispensers Board (SLPAHADB) for registration as a Speech-Language Pathology Assistant (SLPA) in the State of California. The registered SLPA may work in both private and public agencies, such as hospitals, rehabilitation centers, and the public schools serving infants through adult-age clients. This certificate will indicate specialized learning opportunities for addressing the communicative and cognitive needs of the adult with neurological impairments.

**SLPA Specialization: Early Intervention Certificate**

This certificate prepares students to assist Speech-Language Pathologists in treating disorders of communication for children between the ages of birth-3 years of age. Such disorders may be related to language, oral motor movements, and hearing. Topics include infant and toddler development, children with special needs, Early Intervention therapy techniques, childhood language development, and fieldwork experience.

**Certificate Requirements**

Course Code | Course Title                                      | Units |

SLPA 121     | Fieldwork Experience in Speech-Language Pathology | 4     |
Student Learning Outcomes

Upon completion of this program, the student will be able to:

• describe various communication disorders affecting children ages birth-3 years, including etiology and remediation techniques.
• demonstrate skills needed to assist in the management of Early Intervention (EI) speech-language pathology programs and services.
• describe the therapeutic process especially in terms of how learning occurs and strategies for effective lesson delivery for the EI population.
• implement a treatment protocol as prescribed by the supervising Speech-Language Pathologist.
• explain service provision differences between home and clinic therapeutic models for the EI population.
• describe professional responsibilities and ethical behavior appropriate for the Speech-Language Pathology Assistant.

Career Information

Successful completion of the Speech-Language Pathology Assistant (SLPA) program qualifies the student to earn an Associate in Science degree in Speech-Language Pathology. The SLPA graduate possesses the course work and field work experience to apply to the Speech-Language Pathology and Audiology and Hearing Aid Dispensers Board (SLPAHADB) for registration as a Speech-Language Pathology Assistant (SLPA) in the State of California. The registered SLPA may work in both private and public agencies, such as hospitals, rehabilitation centers, and the public schools serving infants through adult-age clients. This certificate will indicate specialized learning opportunities for addressing the communicative needs of the Early Intervention (EI) population.

SLPA Specialization: School Age Certificate

This certificate prepares students to assist Speech-Language Pathologists in treating disorders of communication occurring in the school age population. Such disorders may be related to articulation and phonology, language, motor speech, voice, fluency, and hearing. Topics include child development, children with special needs, school age therapy techniques, childhood language development, and fieldwork experience.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

• describe various communication disorders affecting the school age population (3-21 years), including etiology and remediation techniques.
• demonstrate skills needed to assist in the management of school-aged speech-language pathology programs and services.
• describe the therapeutic process especially in terms of how learning occurs and strategies for effective lesson delivery for the school-aged population.
• implement a treatment protocol as prescribed by the supervising Speech-Language Pathologist.
• explain service provision differences between clinic and educational therapeutic models for the school-aged population.
• describe professional responsibilities and ethical behavior appropriate for the Speech-Language Pathology Assistant.

Career Information

Successful completion of the Speech-Language Pathology Assistant (SLPA) program qualifies the student to earn an Associate in Science degree in Speech-Language Pathology. The SLPA graduate possesses the course work and field work experience to apply to the Speech-Language Pathology and Audiology and Hearing Aid Dispensers Board (SLPAHADB) for registration as a Speech-Language Pathology Assistant (SLPA) in the State of California. The registered SLPA may work in both private and public agencies, such as hospitals, rehabilitation centers, and the public schools serving infants through adult-age clients. This certificate will indicate specialized learning opportunities for addressing the communicative needs of the school-aged population.

Speech-Language Pathology (SLPA) Courses

SLPA 105 Articulation and Phonology for the SLPA

Units: 3
Hours: 54 hours LEC
Prerequisite: SLPA 300 with a grade of “C” or better

This course introduces principles and practices for management of individuals with articulation and/or phonological disorders, with consideration for cultural and linguistic variations. Screening protocols as well as therapeutic practices and materials are discussed. Additionally, this course covers the study and application of the International Phonetic Alphabet (IPA), transcription from Standard American English to IPA, and transcription from IPA to Standard American English.

SLPA 110 Professional Issues and Practices in Speech-Language Pathology

Units: 3
Hours: 54 hours LEC
Prerequisite: SLPA 300 with a grade of “C” or better

This course introduces principles and practices for management of individuals with communicative disorders, with consideration for cultural
and linguistic variations. It includes legal and ethical considerations for
the practicing Speech-Language Pathology Assistant (SLPA) as well as
the practicing Speech-Language Pathologist (SLP). Requirements for
employment in various work settings, including interdisciplinary and
supervisory relationships, observational skills, mandated reporting, Code
of Ethics, and scope of practice are covered. A total of six (6) hours of
clinical observation, in-person or virtual, are required.

SLPA 115 Speech, Language, and
Hearing Clinical Strategies

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: SLPA 105 with a grade of “C” or better

This course explores specific materials and strategies regarding speech,
language, and hearing therapeutic service delivery with a focus on
screening and intervention. It covers speech, language and hearing
screening procedures, forms of Augmentative and Alternative
Communication (AAC), development of forms of AAC, and the collection
and transcription of language samples. This course is designed as an
additional opportunity to gain more experience in preparation for
fieldwork as a Speech-Language Pathology Assistant (SLPA).

SLPA 116 SLPA Therapy Techniques:
Neurogenic Communication Disorders

Units: 2
Hours: 36 hours LEC
Prerequisite: SLPA 300 with a grade of “C” or better

This course explores specific neurologically-based disorders of
communication and their causes and characteristics as acquired by
adult clientele. Specific materials and strategies are emphasized for
therapeutic service delivery within the realm of speech, language, and
cognition. It covers anatomy, neurological etiologies, remediation
techniques/material/equipment, rationales for commonly used
therapeutic approaches, individual vs. group therapy, service provision
sites, data collection, clinical documentation and record keeping, and
the role of the Speech-Language Pathology Assistant (SLPA).

SLPA 117 SLPA Therapy Techniques:
School Age

Units: 2
Hours: 36 hours LEC
Prerequisite: SLPA 300 with a grade of “C” or better

This course explores specific disorders of communication and
therapeutic service provision with the school-aged population. Specific
materials and strategies regarding service delivery are emphasized,
with a focus on evidence-based practice. It covers remediation
techniques and rationales for commonly used therapeutic approaches,
strategies for service delivery in school and clinic environments,
materials management, proxemics, data collection, safety, and
communication with caregiver, colleagues and supervisor. This course
also reviews service delivery models, scope of responsibilities, and the
role of the Speech-Language Pathology Assistant (SLPA) in intervention.

SLPA 118 SLPA Therapy Techniques:
Early Intervention

Units: 1.5
Hours: 18 hours LEC; 27 hours LAB
Prerequisite: SLPA 300 with a grade of “C” or better

This course explores specific disorders of communication and
therapeutic service provision with the Early Intervention (EI) population.
Specific materials and strategies regarding service delivery are
emphasized, with a focus on evidence-based practice. It also covers
remediation techniques and rationales for commonly used therapeutic
approaches, strategies for service delivery in home and clinic
environments, materials management, proxemics, data collection,
safety, and communication with caregiver and supervisor. This course
reviews the scope of responsibilities and the role of the Speech-
Language Pathology Assistant (SLPA) in intervention.

SLPA 120 Clinical Considerations in
Service Delivery to Clients with
Communication Disorders

Units: 3
Hours: 54 hours LEC
Prerequisite: SLPA 110 with a grade of “C” or better

This course explores specific disorders of communication, and their
causes and characteristics. Specific materials and strategies regarding
service delivery are emphasized, with a focus on evidence-based
practice. Similarities and differences with regard to therapeutic service
provision by the Speech-Language Pathology Assistant (SLPA) and the
Speech-Language Pathologist (SLP) are introduced. This course covers
remediation techniques and rationales for commonly used therapeutic
approaches as well as principles of learning, strategies for service
delivery with groups of clients, data collection, clinical documentation,
and record keeping. It also reviews the scope of responsibilities and the
role of the SLPA in intervention and behavior management strategies. A
total of six (6) hours of clinical observation, in-person or virtual, are
required.

SLPA 121 Fieldwork Experience in
Speech-Language Pathology

Units: 4
Hours: 18 hours LEC; 162 hours LAB
Prerequisite: SLPA 115 and 120 with grades of “C” or better
Enrollment Limitation: Prior to student orientation, the following
requirements must be submitted for review: (1) Proof of negative
tuberculin (TB) skin test within three months prior to class. (2) If the TB
skin test result is positive, proof of inactive TB chest x-ray within one
year prior to class. (3) Proof of completion of CPR/First Aid certification.
(4) Proof of malpractice insurance. Live Scan fingerprinting is
determined through clinical placement protocol. If a student receives a
deficient grade (D/F), SLPA 121 may be repeated once.

This course provides supervised fieldwork experience assisting with
the clinical management of persons with communicative disorders. It covers
the job-related skills needed to be a speech-language pathology
assistant (SLPA). It also provides opportunities to interact with clients/patients
while implementing a prescribed treatment plan and assisting with
screening or evaluation under the direction of a speech-language
pathologist. This course includes opportunities for record keeping and
managing client data, setting up/preparing for sessions, and performing
various clerical duties. A portion of this course may be offered in a TBA
component of 162 hours which will include supervised fieldwork
experience assisting with the clinical management of persons with
communicative disorders.

SLPA 126 Neurogenic Communication
Disorders for the SLPA

Units: 3
Hours: 54 hours LEC
Prerequisite: SLPA 300 with a grade of “C” or better

This course explores neurogenic cognitive-communicative disorders in
adults and is designed for the speech-language pathology assistant
(SLPA). It covers basic neuroanatomy, cognitive-communicative
disorders acquired in adulthood, as well as therapeutic approaches and
strategies for service delivery. The scope of responsibilities and the role
of the SLPA are reviewed.

SLPA 127 Childhood Language
Development

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
This course prepares the student for a complete review of how children develop language within their established language communities. It is designed to prepare people who work with children (early childhood educators, speech-language pathology assistants, etc.) with the knowledge of developmental stages of language acquisition, as well as receptive and expressive language milestones. Topics include the hearing mechanism, comprehension of language, gestures, social pragmatics, semantic development, morphology and syntax, language impairment, as well as cultural variables impacting communication.

**SLPA 299 Experimental Offering in Speech-Language Pathology**

_Units:_ 0.5 - 4  
_Prerequisite:_ None.

This is the experimental courses description.

**SLPA 300 Introduction to Communication Disorders**

_Units:_ 3  
_Hours:_ 54 hours LEC  
_Prerequisite:_ None.  
_Advisory:_ Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300.  
_Transferable:_ CSU

This course is an introduction to the field of communication disorders, including an overview and history of the profession of speech-language pathology. It includes an overview of various speech and language disorders, as well as guidelines for determining the development of typical and atypical speech and language. Students are required to observe a minimum of three hours of videotaped clinical sessions from the Master Clinician Network.
Health Education

The college program in health education is designed to provide students the essential information for the evaluation and maintenance of individual health.

Dean Steven Roberson

SCIENCE & ENGINEERING Joel Keebler

Phone (916) 484-8201 or (916) 484-8107

HEED 310 Heartsaver First Aid, Adult and Pediatric CPR and AED

Units: 1
Hours: 18 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLA 340 AND ESLW 340
Transferable: CSU; UC (UC Credit Limitation: HEED 310, HEED 311 and ECE 414 combined: maximum credit, 1 course.

This course meets the standards of the American Heart Association. It provides knowledge and skills for emergency life-saving techniques involving infants, children, and adults. Respiratory and cardiovascular distress, non-breathing, unconsciousness, choking, cardiac arrest, and first aid are addressed. The first aid, cardiopulmonary resuscitation (CPR), and Automatic External Defibrillator (AED) for adult and pediatric certification examination are included.

HEED 311 Pediatric First Aid, CPR AED

Units: 1.5
Hours: 27 hours LEC
Prerequisite: None.
Transferable: CSU; UC (UC credit limitation: HEED 310, HEED 311 and ECE 414 combined: maximum credit, 1 course.

This course is rewritten to meet the requirements for the American Heart Association certification in child care, teachers, and camp counselors. It’s designed to prepare people to provide first aid, Cardiopulmonary Resuscitation (CPR), and Automated External Defibrillator (AED) use in a safe, timely, and effective manner. The first aid, CPR, and AED pediatric certification examination is included.

HEED 315 First Aid

Units: 0.5
Hours: 9 hours LEC
Prerequisite: None.
Advisory: ENGRD 116, or placement through the assessment process.
Transferable: CSU

This course provides guidelines that enable the citizen responder to give appropriate care to a victim who is injured or becomes suddenly ill. Topics include controlling bleeding, splinting, and treating seizures and heart attacks.

HEED 323 Basic Life Support for the Healthcare Provider

Units: 0.5
Hours: 9 hours LEC
Prerequisite: HEED 310 with a grade of “C” or better, current American Heart Association Heartsaver, or American Red Cross certification.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLA 340
Transferable: CSU

This course meets the requirements for American Heart Association certification as a Basic Life Support (BLS) Healthcare Professional. It involves learning BLS skills that are applicable to any healthcare setting. Students will learn life-saving rescue techniques for adults, children, and infants individually and as part of a team dynamics, including performance of high-quality compressions, use of an automated external defibrillator (AED), ventilation techniques, opioid-associated emergencies, and choking.

HEED 494 Topics in Health Education

Units: 0.5 - 3
Hours: 9 - 54 hours LEC
Prerequisite: None.
Transferable: CSU

This course provides opportunities to study contemporary topics in health which are not included in current offerings or which require emphasis beyond existing courses.

HEED 495 Independent Studies in Health Education

Units: 1 - 3
Hours: 54 - 162 hours LAB
Prerequisite: None.
Transferable: CSU

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the
study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

**HEED 499 Experimental Offering in Health Education**

**Units:** 0.5 - 4

**Prerequisite:** None.

**Transferable:** CSU

This is the experimental courses description.
Student Government

The student government program is designed to help nurture the leaders of the future. In addition to student government classes, we also offer a Leadership Development Certificate.

Dean Hanna Blodgett

Email ReyesC3@arc.losrios.edu

Student Government (SGVT) Courses

SGVT 300 Introduction to Student Government

Units: 2
Hours: 18 hours LEC; 54 hours LAB
Prerequisite: None.
Transferable: CSU

This course provides a study of the legal, educational, and philosophical basis of student government and leadership studies. It may include travel to other campuses, area and state conferences, and it provides the opportunity to participate on faculty and administrative committees. Topics are designed to teach leadership skills and to give practical experience in the field of student government. This course is highly advised for those involved in student government. Field trips may be required.

SGVT 310 Leadership Development

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Transferable: CSU

This course provides emerging and existing student leaders the opportunity to explore the concept of leadership and to develop and improve their leadership skills. It examines contemporary leadership models as well as personal values and beliefs that affect personal philosophy of leadership. This course provides opportunities to experience leadership in college and community settings. This course is highly advised for those involved in student government.

SGVT 499 Experimental Offering in Student Government

Units: 0.5 - 4
Prerequisite: None.
Transferable: CSU

This is the experimental courses description.
Healthcare Interpreting

The Healthcare Interpreter certificate program is designed to prepare bilingual individuals for effective language interpretation and cultural brokering in the healthcare setting. It emphasizes roles and responsibilities of the healthcare interpreter; the development of cultural competence in the community and workplace; insight into the language and cultural nuances for specific communities; standards and legal requirements for culturally and linguistically appropriate services; ethical decision-making, advocacy, and power dynamics in healthcare settings; and career preparation to become an integral member of the health care team.

Coursework covers modes and models of interpretation; development of the technical aspects of interpretation; techniques for facilitating and managing the flow of communication; medical terminology and related vocabulary development in the language of service; and common medical conditions and associated treatments/procedures in both basic and specialized health care service areas. Language coaches are provided to facilitate skills acquisition in the Language of Service.

Enrollment Eligibility

To be eligible for enrollment in the program, the student must meet the following criteria:

- Complete required introductory course, HCI 300, with grade of C or better.
- Demonstrate bilingual proficiency or competence in English and language of service (hearing/speaking and reading/writing) as certified by accepted state or proprietary bilingual exam, or as documented by a standardized interview/essay rubric with program staff, as designated in current application materials.

Enrollment Process

Eligible students are selected for the program according to the following steps:

- Receive application materials through participation in HCI 300.
- Submit completed application by deadline, including HCI 300 transcript or proof of completion and documentation of language competency as designated.
- Applicant selection in any given semester is contingent upon a minimum number of students in the cohort for a given language, and community need for the given language, as well as individual applicant qualifications.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- manage all facets of the interpreter role including the flow of the session, cross-cultural communication, conflict management, and the technical aspects of interpretation while conducting patient-provider encounters and pre and post sessions.
- incorporate and apply the profession’s codified ethical behaviors related to confidentiality and privacy, completeness and accuracy, professional integrity and professional distance, professional development and cultural competence, and the role of advocacy when patient wellbeing or dignity is at risk.
- integrate culturally sensitive strategies and approaches in working with diverse cultures, subcultures, and special populations.
- analyze career opportunities in health care interpreting, the interpreter’s role and scope of practice relative to other healthcare professionals, and the value of ongoing professional development.

Career Information

Healthcare interpreting job opportunities are available through in-house hospital interpreter services, private vendors who contract with healthcare agencies, or small-business entrepreneurialism and self-employment, both full time or per diem. Venues may include face-to-face, video conferencing, or language phone services with local or at-a-distance connection and contracts.

Healthcare Interpreting (HCI) Courses

HCI 300 Introduction to Healthcare Interpreting

Units: 0.5
Hours: 9 hours LEC
Prerequisite: None.
Transferable: CSU

This course is designed for bilingual/bicultural individuals interested in exploring the career choice of healthcare interpreter by developing an awareness of the roles and responsibilities of the interpreter in healthcare settings. It addresses required skills related to both language interpretation and cultural brokering and allows consideration of personal interests and aptitudes.

HCI 310 Healthcare Interpreting I

Units: 3
Hours: 48 hours LEC; 18 hours LAB
Prerequisite: HCI 300 with a grade of "C" or better
Corequisite: AH 311 and BIOL 102; or BIOL 430 & 431
Advisory: AH 311 with a grade of "C" or better; Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.
Transferable: CSU

This course is designed for bilingual individuals interested in developing the awareness, knowledge, and skills necessary for effective language interpretation in healthcare settings. It emphasizes the roles and responsibilities of a healthcare interpreter and basic knowledge of common medical conditions, treatments, and procedures in the areas of diagnostics, cardiovascular, renal, ophthalmic, and gastrointestinal specialties. It focuses on insight into language and cultural nuances for specific communities necessary for interpretation.

HCI 320 Healthcare Interpreting II

Units: 3
Hours: 48 hours LEC; 18 hours LAB
Prerequisite: HCI 310 with a grade of "C" or better;
Corequisite: AH 311
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.
Transferable: CSU

This course is designed for bilingual individuals. It further develops the awareness, knowledge, and skills necessary for effective language interpretation in healthcare settings covered in HCI 310. It emphasizes the roles and responsibilities of a healthcare interpreter and basic knowledge of common medical conditions, treatments, and procedures in cardiology, respiratory, musculoskeletal, and gastrointestinal specialties. It focuses on insight into language and cultural nuances for specific communities necessary for interpretation.

HCI 330 Healthcare Interpreting III

Units: 3

Hours: 48 hours LEC; 18 hours LAB
Prerequisite: HCI 320 with a grade of "C" or better
Corequisite: AH 311
Enrollment Limitation: Bilingual fluency in English and a second language.
Transferable: CSU

This course is designed for bilingual individuals preparing to become integral members of the healthcare team, bridging the linguistic and cultural gap between clients and providers who do not speak a common language. It further develops interpreting skills covered in HCI 320. Topics include specialized healthcare service areas, such as urology, the immune system, ophthalmology, and endocrinology specialties. It also emphasizes the development of cultural competency in the community and workplace.

HCI 340 Healthcare Interpreting IV

Units: 3
Hours: 48 hours LEC; 18 hours LAB
Prerequisite: AH 311 and HCI 330 with grades of "C" or better
Transferable: CSU

This course is designed for bilingual individuals completing their preparation to become integral members of the healthcare team, bridging the language and cultural gap between clients and providers. It further enhances interpreting skills covered in HCI 330. Topics include specialized healthcare service areas such as genetics, oncology, neurology, behavioral health, and mental health. The course also focuses on careers in interpreting, career preparation, and self-care for the professional healthcare interpreter.

HCI 350 Healthcare Interpreting Fieldwork

Units: 3
Hours: 24 hours LEC; 90 hours LAB
Prerequisite: HCI 330 with a grade of "C" or better
Corequisite: HCI 340
Advisory: COMM 301 with a grade of "C" or better
Transferable: CSU

This course is designed for interpreters-in-training to facilitate linguistic and cultural communication between healthcare clients and providers. It provides fieldwork experience applying technical interpreting skills covered in HCI 310, 320, 330, and 340. A portion of this course may be offered in a TBA component of 40 hours, which may include directed practice in approved settings and fieldwork or workplace experience.
Technical Communication

Technical Communication is an interdisciplinary course of study designed to prepare students for employment as professional writers and communicators in a variety of media intended to instruct and inform audiences.

The degree program includes substantial course work in writing, information design, editing, page design, online help development, website creation, and the use of industry standard applications.

The certificate offers an interdisciplinary program of courses in Technical Communications, Art/New Media, and Computer Information Systems to prepare students for a variety of technical writing and professional communication careers. The certificate includes the theory, writing skills, design background, and computer applications knowledge needed for jobs in technical communication.

Technical communicators find employment in medical, scientific, high tech, business, university, and government settings. They may write white papers, tutorials, reference and procedure manuals, help systems, user assistance video scripts, grants and proposals, and more.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- analyze audience information needs.
- compose concise, clearly written professional documents organized with the audiences' needs in mind.
- design print and online resources that communicate organizations' values, enhance readability, and are easy to use.
- demonstrate basic skills in the use of word processing, page design, and web design applications.
- evaluate organizations' communication goals and needs based on technical writing principles.

Career Information

Technical communicators find employment in medical, scientific, high tech, business, university, and government settings. They may write white papers, tutorials, reference and procedure manuals, help systems, user assistance video scripts, grants and proposals, and more.

Technical Communication (TECCOM) Courses

**TECCOM 300 Introduction to Technical/Professional Communication**

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: BUS 100 or 310 with a grade of "C" or better
Transferable: CSU

This course emphasizes principles of reader-centered writing for the workplace, focusing specifically on aspects of technical and professional communication. It covers the writing of documents used in businesses, academia, industry, and government. These documents may include memos, letters, brochures, instructions and procedures, proposals, grants, technical and informational reports, web sites, blogs, and product documentation. This course is formerly known as ENGWR 342.

**TECCOM 310 Writing Digital Content**

Units: 1
Hours: 18 hours LEC
Prerequisite: BUS 100, BUS 310, ENGWR 300, or TECCOM 300 with a grade of "C" or better
Advisory: ARTNM 352, CISA 305, and CISW 300 with grades of "C" or better
Transferable: CSU

This course emphasizes the writing of digital content for the workplace and for technical and business disciplines. It covers audience analysis, online formats, research techniques, and concise, grammatical writing. This course is formerly known as ENGWR 344.

**TECCOM 330 Writing Technical Manuals**

Units: 1
Hours: 18 hours LEC
Prerequisite: BUS 100, BUS 310, ENGWR 300, or TECCOM 300 with a grade of "C" or better
Advisory: ARTNM 352 and CISA 305 with grades of "C" or better
Transferable: CSU

This course is designed for professionals in all fields who need to design, create, and revise user and reference manuals in print or online formats. The course offers strategies for audience and task analysis, product learning, document design, drafting, procedure writing, and revision.
Word processing, desktop publishing, and/or online tools are used to produce a print or online manual. This course is formerly known as ENGWR 352.
History

The study of history equips the student with cultural literacy and promotes critical thinking and well-informed perspectives on today's world. (https://arc.losrios.edu/x10971.xml)

Associate Degree for Transfer

A.A.-T. in History

The Associate in Arts degree in History for Transfer provides a clearly articulated curricular track for students who wish to transfer to a CSU campus, while also serving the diverse needs of students interested in the breadth and depth of the field of history. Additionally, this degree exposes students to the core principles and practices of the study of history in order to build a foundation for their future personal, academic, and professional paths.

The degree is designed to facilitate students' successful transfer to certain CSU four-year programs that prepare them for advanced study in graduate and professional programs, as well as a variety of careers including teaching, archival research, public history, government service, journalism, business, and the law. History graduates are well suited to many fields of endeavor that require effective reading, writing, and critical thinking skills, as well historically informed perspectives on today's global societies.

The Associate in Arts degree in History for Transfer provides students with a major that fulfills the general requirements of the California State University for transfer. Students with this degree will receive priority admission with junior status to the California State University system.

The Associate in Arts degree in History for Transfer (A.A.-T) may be obtained by the completion of 60 transferable, semester units with a minimum of a 2.0 GPA, including (a) the major or area of emphasis described in the Required Program outlined below (earning a C or better in these courses), and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education-Breadth Requirements.

Total Units: 18

1Student may choose any course from this last list if not previously used.

The Associate in Arts in History for Transfer (AA-T) degree may be obtained by completion of 60 transferable, semester units with a minimum overall grade point average (GPA) of 2.0, including (a) a minimum grade of “C” (or “P”) for each course in the major or area of emphasis described in the Required Program, and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education-Breadth Requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- identify and correctly use basic historical terminology, and distinguish between primary and secondary sources as historical evidence.
- analyze multiple causes for an historical event, and properly evaluate why that event happened.
- identify various interpretations used by historians to explain history.
- identify the major time periods and relevant geography of history.
- analyze and evaluate the major economic, social, political, and cultural developments in history.
History

Career Information

The A.A.-T in History degree is designed to prepare students for a wide variety of occupational endeavors, including careers in education, business, public history, government service, the military, and the law.

History (HIST) Courses

HIST 300 History of Western Civilization

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; OR ESR 340 AND ESLW 340.
Transferable: CSU; UC (Credit Limitation: HIST 300 & 480: maximum credit one course)
General Education: AA/AS Area V(b); AA/AS Area I; AA/AS Area VI; CSU Area C2; CSU Area D; Cal-GETC Area 3B (effective Fall 2025); Cal-GETC Area 4 (effective Fall 2025); IGTC Area 3B; IGTC Area 4
C-ID: Part of C-ID HIST 170

This course survey reviews western civilization from its origins in the Ancient Middle East to the sixteenth century. It emphasizes the social, political, economic, cultural, and intellectual forces that have served to define western civilization. Additionally, it focuses on the cultural legacies and contributions of the Ancient Middle East, Greece, Rome, and Medieval Europe to the development of western civilization. This course is not open to students who have completed HIST 480.

HIST 302 History of Western Civilization

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; OR ESR 340 AND ESLW 340.
Transferable: CSU; UC (Credit Limitation: HIST 302 & 481: maximum credit one course)
General Education: AA/AS Area V(b); AA/AS Area I; CSU Area C2; CSU Area D; Cal-GETC Area 3B (effective Fall 2025); Cal-GETC Area 4 (effective Fall 2025); IGTC Area 3B; IGTC Area 4
C-ID: C-ID HIST 180; Part of C-ID HIST 170

This course is a survey of western civilization from the sixteenth century to the present, emphasizing the interplay of social, political, economic, cultural, and intellectual forces in creating and shaping the modern world. It focuses on the process of modernization, stressing the secularization of western society and examining how war and revolution have served to create our world. This course is not open to students who have completed HIST 481.

HIST 305 Women in Western Civilization

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; OR ESR 340 AND ESLW 340.
Transferable: CSU; UC
General Education: AA/AS Area V(b); AA/AS Area I; CSU Area C2; CSU Area D6; Cal-GETC Area 3B (effective Fall 2025); Cal-GETC Area 4 (effective Fall 2025); IGTC Area 3B; IGTC Area 4F
C-ID: C-ID HIST 180

This course is a survey of women's contributions to the major ideas, institutions, and events of Western Civilization. It emphasizes women's diversified roles from antiquity to the present. This course focuses on the interaction between men and women within a socially and culturally constructed framework. It also examines the effects of the patriarchal family structure on society and the pervasive impact of patriarchy on all institutions of western culture.

HIST 307 History of World Civilizations to 1500

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; OR ESR 340 AND ESLW 340.
Transferable: CSU; UC
General Education: AA/AS Area V(b); AA/AS Area I; AA/AS Area VI; CSU Area C2; CSU Area D6; Cal-GETC Area 3B (effective Fall 2025); Cal-GETC Area 4 (effective Fall 2025); IGTC Area 3B; IGTC Area 4F
C-ID: C-ID HIST 150

This course surveys global societies from prehistory to the 1500s, with a particular emphasis on the dynamic interaction and comparison of diverse peoples, ethnicities, and cultures. Special attention is given to the social, political, economic, cultural, and religious influences that have shaped human history.

HIST 308 History of World Civilizations, 1500 to Present

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; OR ESR 340 AND ESLW 340.
Transferable: CSU; UC
General Education: AA/AS Area V(b); AA/AS Area I; AA/AS Area VI; CSU Area C2; CSU Area D6; Cal-GETC Area 3B (effective Fall 2025); Cal-GETC Area 4 (effective Fall 2025); IGTC Area 3B; IGTC Area 4F
C-ID: C-ID HIST 160

This course is a survey of world history from the sixteenth century to the present, with particular emphasis on the increased integration of peoples and cultures as the result of the continuing process of globalization. The focus is on the revolutionary transformations of human society and human social relations caused by such new ideas as scientific racism, nationalism, imperialism, and constitutional government. It also covers important trends of the past five-hundred years including the increasing prevalence of migration, the changing nature of warfare, the harnessing of fossil fuels, the growing integration of global economies, and the scientific and technological breakthroughs that are continuing to revolutionize humanity's understanding of and relationship with the natural world. Through this focus it is possible to better understand the forces that have shaped world society over the past five-hundred years and that continue to shape the world today. These analyses are set within the context of such historical concepts as cause and effect, multiple causation, multiple frames of reference, and historical interpretation from evidence.

HIST 310 History of the United States (To 1877)

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; OR ESR 340 AND ESLW 340.
Transferable: CSU; UC (Credit Limitation: HIST 310 & 483: maximum credit one course)
General Education: AA/AS Area V(a); CSU Area U1; Cal-GETC Area 4 (effective Fall 2025); IGTC Area 4F
C-ID: C-ID HIST 130

This course is a survey of United States history from its European, African, and Native American backgrounds to 1877. It examines the origin and development of many of this nation's political, social, economic, and intellectual institutions including their influences upon contemporary American life. It also emphasizes such historical concepts as cause and effect, multiple causation, historical context, and historical.
interpretation. This course is not open to students who have completed HIST 483.

**HIST 311 History of the United States (1865 - Present)**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 and ENGRW 300; OR ESLW 340 with a grade of "C" or better  
**Transferable:** CSU; UC (Credit Limitation: HIST 311 & 484: maximum credit one course)  
**General Education:** AA/AS Area V(a); CSU Area D; CSU Area U1; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4  
**C-ID:** C-ID HIST 140

This course is a survey of United States History from 1865 to the present. It analyzes many of America's political, social, economic, and intellectual institutions, including their influences upon contemporary life. This course also examines this nation's increasing involvement in world affairs. These analyses are set within the context of such historical concepts as evidence, cause and effect, multiple causation, and historical interpretation.

This course is not open to students who have completed HIST 484.

**HIST 318 American Intellectual and Cultural History**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** ENGRW 102 or 103, and ENGRD 116; OR ESLR 320 and ESLW 320  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area V(a); CSU Area D6; CSU Area U1; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4F

This course is a survey of major themes and developments in American culture and ideas from the colonial to the contemporary period. Special emphasis is given to religious, scientific, literary, artistic, philosophical, and political thought to explore the sources, expressions, and transformation of cultural and intellectual values in the history of the United States.

**HIST 320 History of the United States: African-American Emphasis**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 and ENGRW 300; OR ESLW 340.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area V(a); CSU Area D6; CSU Area C2; CSU Area U1; Cal-GETC Area 3B (effective Fall 2025); Cal-GETC Area 4 (effective Fall 2025); IGETC Area 3B; IGETC Area 4F

This course covers the development of American Institutions and society through Reconstruction from the lens of the African American experience. The course examines the political, economic, and social forces that engendered the defining and redefining of freedom for African Americans beginning with the post American Civil War time period. "Jim Crow" segregation, and the ongoing struggle for civil rights. This course emphasizes the cultural and intellectual contributions of African Americans as they shaped and developed the nation through resistance and resilience.

**HIST 323 History of the United States: The American Indian Experience**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLW 340.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area V(a); AA/AS Area VI; CSU Area D6; CSU Area U1; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4F

This course is a survey of the North American Indian Nations. It covers the effects of European contact, trade, and colonization. Topics include the effects of United States political, economic, and social policies on Indians throughout U.S. history. Also, it emphasizes American Indian people's attempts to protect their sovereignty and revitalize their societies across time.

**HIST 325 History of Asian/Pacific Americans**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLW 340.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area V(a); AA/AS Area VI; CSU Area D3; CSU Area D6; CSU Area U1; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4F

This survey lecture course examines the history of Asian and Pacific Islander immigrants and Asian Pacific Americans in the United States from 1850 to the present. It includes the process of migration and settlement in the United States by people from East Asia, Southeast Asia, South Asia, and the Pacific islands. It examines the historical experience of these groups from a social, political, economic, and cultural perspective, with an emphasis on the following themes: work, family, community formation, government policies, race relations, and ethnic identities. It also addresses the contributions of Asian Americans to the multicultural development of contemporary American society, including the interaction of Asian Americans with people of European, African, Latino/a/x, and indigenous American descent.

**HIST 327 History of the Chicano/Mexican American**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLW 340.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area V(a); AA/AS Area VI; CSU Area D; CSU Area U1; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4

This course is a study of the relationship between the development of U.S. and Mexican civilization in the Western Hemisphere. This course
focusses on the role of the Mexican American experience in the U.S. as it was affected by social, political, and economic events. It emphasizes the socio-cultural contributions of Mexican Americans to U.S. institutions.

**HIST 330 Women in American History**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; OR ESLR 340 AND ESLW 340.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area V(a); CSU Area A; CSU Area A1; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4

This course offers a survey of U.S. women's history. It examines topics related to women since 1865, tracing and analyzing how women's place in U.S. society has changed over time. The course examines major developments, themes, and institutions in U.S. society related to women, gender, and sexuality. It is inclusive of a diversity of women's experience as it examines how race, ethnicity, class, gender identity, sexuality, citizenship, ability, religion and other factors have influenced women's lives. The course examines and compares the experiences of North America's diverse population of women including African Americans, Asian Americans, Latinx, Native Americans, and white Americans.

**HIST 331 History of California through 1877**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area V(a); CSU Area A

This course offers a survey of U.S. women's history. It examines major developments, themes, and institutions in U.S. society related to women, gender, and sexuality. It is inclusive of a diversity of women's experience as it examines how race, ethnicity, class, gender identity, sexuality, citizenship, ability, religion and other factors have influenced women's lives. This course offers a survey of U.S. women's history. It examines major developments, themes, and institutions in U.S. society related to women, gender, and sexuality. It is inclusive of a diversity of women's experience as it examines how race, ethnicity, class, gender identity, sexuality, citizenship, ability, religion and other factors have influenced women's lives. This course offers a survey of U.S. women's history. It examines major developments, themes, and institutions in U.S. society related to women, gender, and sexuality. It is inclusive of a diversity of women's experience as it examines how race, ethnicity, class, gender identity, sexuality, citizenship, ability, religion and other factors have influenced women's lives.

**HIST 332 Women in American History (To 1877)**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area V(a); CSU Area A

This course offers a survey of U.S. women's history. It examines major developments, themes, and institutions in U.S. society related to women, gender, and sexuality. It is inclusive of a diversity of women's experience as it examines how race, ethnicity, class, gender identity, sexuality, citizenship, ability, religion and other factors have influenced women's lives. The course examines and compares the experiences of North America's diverse population of women including African Americans, Asian Americans, Latinx, Native Americans, and white Americans.

**HIST 333 Women in American History (1865-Present)**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area V(a); CSU Area A; CSU Area U1

This course offers a survey of U.S. women's history from 1865 to the present day. The course examines major developments, themes, and institutions in U.S. society related to women, gender, and sexuality. It is inclusive of a diversity of women's experience as it examines how race, ethnicity, class, gender identity, sexuality, citizenship, ability, religion and other factors have influenced women's lives. The course examines and compares the experiences of North America's diverse population of women including African Americans, Asian Americans, Latinx, Native Americans, and white Americans. The course addresses the Constitution of the State of California; the nature and processes of California state and local governments; and the relationships between the U.S. government and California's state and local governments. Topics include the impact of the Constitution of 1879, consequences of railroad expansion, and early twentieth-century urbanization. It also includes the impact of the Great Depression and World War II, water projects, protest and reform movements of the 1960s, the rise of conservatism, and recent political trends.

**HIST 340 History of California through 1879**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; OR ESLR 340.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area V(b); CSU Area C; CSU Area D; CSU Area U1; Cal-GETC Area 3 (effective Fall 2025); Cal-GETC Area 4 (effective Fall 2025); IGETC Area 3; IGETC Area 4

This course is a survey of the early history of California up through the second state constitutional convention of 1879. Topics addressed include: indigenous people of California prior to contact; Spanish expansion and settlement of California; the Mexican era; U.S. expansion and occupation of California; the Gold Rush; the first and second constitutional conventions; the relationships between the federal and state governments; and the railroad era.

**HIST 341 History of California: 1879 to Present**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; OR ESLR 340 AND ESLW 340.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area V(b); CSU Area C2; CSU Area D; CSU Area U3; Cal-GETC Area 3B (effective Fall 2025); Cal-GETC Area 4 (effective Fall 2025); IGETC Area 3B; IGETC Area 4

This course is a survey of California history from 1879 to the present. Topics include economic, social, cultural, and political developments. The course addresses the Constitution of the State of California; the nature and processes of California state and local governments; and the relationships between the U.S. government and California's state and local governments. Topics include the impact of the Constitution of 1879, consequences of railroad expansion, and early twentieth-century urbanization. It also includes the impact of the Great Depression and World War II, water projects, protest and reform movements of the 1960s, the rise of conservatism, and recent political trends.

**HIST 342 The California Mother Lode**

**Units:** 0.5 - 3  
**Hours:** 9 - 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** ENGRD 102 or 103, and ENGRD 116 with a grade of "C" or better; OR ESLR 320 and ESLW 320 with a grade of "C" or better.  
**Transferable:** CSU  
**General Education:** AA/AS Area V(b); CSU Area D6

This course is a history of the Mother Lode with emphasis on the Gold Rush Era and its effects on the natural environment, human population of the region, and cultural and economic development of California within an international context. Lecture and guided visits at selected locations in the Mother Lode region complement the classroom instruction. Each combination of classroom and on-site instruction constitutes one half unit of credit. Field trips are required and field trip expense fees may be required.

**HIST 343 History of the Islamic World**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; OR ESLR 340.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area V(b); CSU Area D; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4

This course covers the history of Islam as a political, cultural, economic, and social force beginning with its origins in the Arabian Peninsula in the 7th century CE to its encounter with modernity in the 19th and 20th centuries. In particular, the course emphasizes the role of Islam as the major source of Afro-Eurasian connections prior to the modern age. Topics include the world of Muhammad; the origins and initial spread of
Islam; the Caliphates; Science and technology in the Islamic world; merchants and trade; Islam in Africa and the Indian Ocean; early-modern empires; and Islam and modernity.

**HIST 364 Asian Civilization**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; OR ESLW 340.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area V(b); AA/AS Area I; CSU Area C2; CSU Area D6; Cal-GETC Area 3B (effective Fall 2025); Cal-GETC Area 4 (effective Fall 2025); IGETC Area 3B; IGETC Area 4F

This course covers the history of Asian Civilizations from the emergence of agriculture and complex societies to 1800 C.E., with particular focus on India, China, and Japan. Topics include the rise of complex societies across Asia; the relationship between agrarian civilizations and the herders of Inner Asia; state-building and imperial expansion; the emergence of the major Asian philosophies and religious faiths, including that of Islam; Asian technology and innovation; the Mongol conquests; and the entrance of Europeans into the Asian world beginning in the 15th century.

**HIST 365 Asian Civilization**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; OR ESLW 340 AND ESLW 340.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area V(b); AA/AS Area I; CSU Area C2; CSU Area D6; Cal-GETC Area 3B (effective Fall 2025); Cal-GETC Area 4 (effective Fall 2025); IGETC Area 3B; IGETC Area 4F

This course is a survey of the political, social, economic, and cultural transformation of India, China, and Japan since 1800. It emphasizes how these countries responded to the challenges of modernity and western imperialism by embracing new ideas, new approaches to statecraft, and new social and cultural norms. Topics include the emergence of western dominance in Asia, the breakdown of states and empires in conjunction with, and partly as a result of, western imperialism, the development of Asian nationalisms and nationalist movements, and the growth of Japanese imperialism and the effects that this had on the rest of Asia.

**HIST 367 History of Russia**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; OR ESLW 340.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area V(b); CSU Area C2; CSU Area D6; Cal-GETC Area 3B (effective Fall 2025); Cal-GETC Area 4 (effective Fall 2025); IGETC Area 3B; IGETC Area 4F

This course is a survey of Russian history from 1861 to the present. It examines the major social, political, and economic developments that have shaped Russian society and culture. Special attention is given to Russian culture, politics, and protest during the 19th century, the revolutions of 1917 and the Bolshevik rise to power, the creation and expansion of the Soviet state under Stalin, the decline and collapse of Soviet power, and Russia in the 21st century.

**HIST 373 History of Mexico**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; OR ESLW 340  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area V(b); CSU Area C2; CSU Area D6; Cal-GETC Area 3B (effective Fall 2025); Cal-GETC Area 4 (effective Fall 2025); IGETC Area 3B; IGETC Area 4F

This course is a survey of the history of Mexico from the pre-classical period to the present. It examines the origins and development of Mexico’s political, economic, religious, and intellectual institutions, their influence on Mexican society and culture, and the resultant legacy that is modern Mexico.

**HIST 374 History of Latin America to 1830**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; OR ESLW 340 AND ESLW 340  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area V(b); AA/AS Area VI; CSU Area D6; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4F

This course is a general historical survey of Latin American history from the pre-contact indigenous civilizations to the 19th-century nationalist movements in the region. It focuses on the influence of political, economic, cultural, and demographic factors that shaped Latin America.

**HIST 375 The History of Modern Latin America and Caribbean**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; OR ESLW 340 AND ESLW 340  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area V(b); AA/AS Area VI; CSU Area D; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4

This course offers a general survey of Latin American history from the 19th century to the present, with focus on social, political, economic, and cultural developments. Topics include Latin America and the Caribbean in the global economy, dictators and democracy, African and indigenous cultures, feminism and gender, cultural politics, social movements and revolution, and relations with the United States and the world.

**HIST 399 Studying in Italy: Italian History and Culture**

**Units:** 4  
**Hours:** 72 hours LEC  
**Prerequisite:** None.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area I; AA/AS Area III(b); CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B

This course, offered as a study abroad course in Italy, surveys Italian history to provide a background for exploring and appreciating Italian life and culture. The focus is on examining the historical context of Italian cultural and artistic expression, thereby informing and enriching our understanding and enjoyment of Italian art and culture. In Rome, this course focuses on the ancient and religious sources of Italian culture. In Florence, it explores and examines how human expression in art, literature, and philosophy served to create a new sense of the possible during the Renaissance. This course also studies how culture reflects human values and how those values can be transformed and at times ennobled by creative genius. A portion of this course may be offered in a TBA component of 25-35 hours which may include museum visits, historical monument and building visits, and Italian cultural and historical site visits.
HIST 480 History of Western Civilization - Honors

Units: 3
Hours: 54 hours LEC
Prerequisite: Placement into ENGWR 480 through the assessment process.
Transferable: CSU; UC (Credit Limitation: HIST 300 & 480: maximum credit one course)
General Education: AA/AS Area V(b); AA/AS Area I; CSU Area C2; CSU Area D6; Cal-GETC Area 3B (effective Fall 2025); Cal-GETC Area 4 (effective Fall 2025); IGETC Area 3B; IGETC Area 4F
C-ID: Part of C-ID HIST 170

This course is a survey of western civilization from its origins in the Ancient Middle East until the Renaissance. This seminar-style course confronts the major historical issues through class discussion. The class challenges students to interpret the past by critically analyzing both primary sources and relevant works by leading historians. Emphasis is on the social, political, economic, cultural and intellectual forces that have served to shape the modern world. This course is not open to students who have completed HIST 300.

HIST 481 History of Western Civilization - Honors

Units: 3
Hours: 54 hours LEC
Prerequisite: Placement into ENGWR 480 through the assessment process.
Transferable: CSU; UC (Credit Limitation: HIST 302 & 481: maximum credit one course)
General Education: AA/AS Area V(b); AA/AS Area I; CSU Area C2; CSU Area D6; Cal-GETC Area 3B (effective Fall 2025); Cal-GETC Area 4 (effective Fall 2025); IGETC Area 3B; IGETC Area 4F
C-ID: C-ID HIST 180; Part of C-ID HIST 170

This course is a survey of western civilization from the Renaissance to the present. This seminar-style course confronts the major historical issues through class discussion. The class challenges students to interpret the past by critically analyzing both primary sources and relevant works by leading historians. Emphasis is on the social, political, economic, cultural and intellectual forces that have served to shape the modern world. This course is not open to students who have completed HIST 302.

HIST 483 History of the United States - Honors

Units: 3
Hours: 54 hours LEC
Prerequisite: Placement into ENGWR 480 through the assessment process.
Transferable: CSU; UC (Credit Limitation: HIST 310 & 483: maximum credit one course)
General Education: AA/AS Area V(a); CSU Area D; CSU Area U1; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4F
C-ID: C-ID HIST 130

This course is an in-depth study of American history from the pre-colonial era through the end of the American Civil War and the period of Reconstruction. This seminar-style honors course utilizes discussion based on the reading of selected monographs and primary documents. Particular emphasis is placed on the interrelationships of the developing American political, economic, social, and cultural institutions. Critical thinking skills are emphasized in responding to these issues. This course is not open to students who have completed HIST 310.

HIST 484 History of the United States - Honors

Units: 3
Hours: 54 hours LEC
Prerequisite: Placement into ENGWR 480 through the assessment process.
Transferable: CSU; UC (Credit Limitation: HIST 311 & 484: maximum credit one course)
General Education: AA/AS Area V(a); CSU Area D6; CSU Area U1; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4F
C-ID: C-ID HIST 140

This course is an introduction to the study of American history from 1865 to the present day. This seminar-style honors course utilizes discussions based on the reading of selected monographs and primary documents. Particular emphasis will be placed on the interrelationships of American political, economic, social, and cultural developments. Critical thinking skills are emphasized in responding to these issues. This course is not open to students who have completed HIST 311.

HIST 494 Topics in History

Units: 0.5 - 4
Hours: 9 - 72 hours LEC
Prerequisite: None.
Advisory: HIST 302
Transferable: CSU
General Education: AA/AS Area V(b)

This course provides the opportunity for concentrated study on specialized topics in History. It covers topics from a wide range of academic disciplines including anthropology, economics, engineering, fine arts, history, law, life science, literature, mathematics, philosophy, political science, sociology, psychology and varies in content and scope with the interests and expertise of both the instructors and the students. This course may be taken four times on different topics.

HIST 495 Independent Studies in History

Units: 1 - 3
Hours: 54 - 162 hours LAB
Prerequisite: None.
Transferable: CSU

Independent Study is an opportunity for the student to extend classroom experience in the subject of history, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

HIST 499 Experimental Offering in History

Units: 0.5 - 4
Prerequisite: None.
Transferable: CSU

This is the experimental courses description.
Theatre Arts

The Department of Theatre and Film at American River College offers a wide range of classes in all areas of theatre, along with an expanding Film Studies program. We also maintain a busy production schedule in a variety of performance spaces in our recently modernized and expanded facility. In addition to our season of full-scale department productions, we feature touring Children's Theatre productions, student-produced performances featuring scenes, improv and one-act plays, and an ongoing partnership with the Broadway at Music Circus program. This schedule provides broad opportunities for theoretical and practical training for our students, and an exciting and varied menu of theatrical fare for our audiences.

Degrees and Certificates Offered

A.A.-T. in Theatre Arts
A.A. in Theatre Arts: Acting
A.A. in Theatre Arts: Technical Production
Acting Certificate
Children's Theatre Certificate
Costuming Certificate
Musical Theatre Certificate
Theatre Production Certificate

Associate Degrees for Transfer

A.A.-T. in Theatre Arts

This degree is designed to facilitate successful transfer to baccalaureate theatre or drama degree programs. It provides students with the lower division breadth and depth of the field of theatre arts and exposes students to the core principles and practices in the field. It covers the basics of acting, theatre technology and production, and the historical and modern development of theatre and dramatic literature in the world of entertainment.

The Associate in Arts in Theatre Arts for Transfer degree provides students with a major that fulfills the general requirements of the California State University for transfer. Students with this degree will receive priority admission with junior status to the California State University system. The Associate in Arts in Theatre Arts for Transfer (AA-T) degree may be obtained by completion of 60 transferable, semester units with a minimum overall grade point average (GPA) of 2.0, including (a) the major or area of emphasis described in the Required Program outlined below (earning a C or better in these courses) and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education Breadth Requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- critique and evaluate the role of the theatre arts and its relationship to other parts of society.
- evaluate the historical, artistic, social, and philosophical environments in which theatre exists.
- analyze and critique dramatic literature and performance.
- formulate alternative solutions to theatrical production situations.
- employ audition and performance skills in community, educational, and/or professional theatres.
- develop skills to work as a theatre technician in community, educational, and/or professional theatres.
- demonstrate the ability to work effectively as an ensemble member of a theatre company.
- demonstrate skills that will allow the student to thrive in a baccalaureate level theatre program.

Associate Degrees

A.A. in Theatre Arts: Acting

This degree provides training in the areas of acting, voice, movement, improvisation, and dramatic styles. The course work and theatrical production activities are arranged to provide opportunities for students to develop an appreciation for theatre, to improve in the knowledge and skills necessary for work in the theatrical arts professions, and to transfer to a four-year theatre program.

¹Not used to fulfill other requirements of the major.

The Theatre Arts: Acting Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- recognize standard practices of ensemble playing in a rehearsal/performance environment
- compare and analyze the theories and techniques of acting from a historical perspective
- analyze texts and scripts as they pertain to performance
- demonstrate skill for technical aspects of acting, including physical, vocal, imaginative, analytical, and emotional elements
- analyze theatre as a dynamic art form influencing society
- compare and contrast theatrical periods and styles in terms of acting, directing, playwriting, and technical elements
- analyze the components of a theatrical production
- apply imagination and character analysis to identify and describe the personality and motivations of a given character
- apply technical processes, including lighting, set, costume, and/or stage make-up design, as they pertain to a given dramatic script

A.A. in Theatre Arts: Technical Production

The Technical Theatre degree provides a broad overview of theatre with an emphasis on exploring the technical elements of theatre. Coursework
includes stagecraft, lighting, costuming, makeup, sound, and puppetry, together with opportunities for practical participation in productions. The program is designed to prepare students for work as technicians and crew, or to transfer to four-year colleges in preparation to be designers.

1Not used to fulfill other requirements for the major.

2Earned by a minimum of 0.5 units in each of two productions for a total of 2 units.

The Theatre Arts: Technical Production Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- assess the influence of theatre as a dynamic art form and a social and cultural force in our society.
- compare theatrical periods and styles in terms of acting, directing, playwriting, and technical elements.
- analyze the components of a theatrical production and the role of technical theatre in the production process.
- evaluate a script, assess production requirements, and develop practical and artistic solutions through scenic, lighting, costume, sound, or makeup designs.
- integrate practical information from construction plans.
- demonstrate proficiency in technical production skills.
- evaluate tools, materials, and processes used in technical theatre work.
Certificates of Achievement

Acting Certificate

This certificate provides training in the theories and techniques of acting. The training starts with the basic principles of acting and refines them through theoretic, rehearsal, and performance processes. This program is designed to introduce and develop the craft of acting.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- analyze children's literature for dramatic structure, characterization, and performance elements.
- demonstrate the basic skills of drama, acting, voice, movement, and improvisation.
- develop simple drama activities and games to promote child creativity.
- apply technical processes, including stagecraft, costume construction, and/or stage make-up, as they pertain to children's theatre.
- integrate dramatic techniques of acting, puppetry, storytelling, and movement into children's theatre productions.

Career Information

People with a Children's Theatre certificate may work as actors or directors in children's theatre, or utilize their skills to augment careers in elementary education, recreation, or arts programs.

Costuming Certificate

This certificate provides training in the skills needed to create theatrical costumes. Coursework includes costume construction, history of costume, patterning, and makeup.

\(^1\)Not used to fulfill other requirements.
Student Learning Outcomes

Upon completion of this program, the student will be able to:

- analyze the role of costumes and the costume shop staff in a theatrical production.
- organize a practical and artistic solution to the costume requirements of a dramatic work.
- evaluate the costumes of a dramatic production.
- analyze the techniques required to design and develop a period costume.
- analyze the components of major historical fashion periods and their relationship to society.
- demonstrate techniques in altering, constructing, patterning, dying, and painting costumes.

Career Information

A person with a costuming certificate may work creating and maintaining costumes for theatre, film, TV, advertising, and other entertainment fields.

Certificates

Musical Theatre Certificate

This certificate synthesizes the performance skills of movement, acting, and singing with the musical theatre script/song. The training starts with the basic principles of musical theatre techniques and refines them through the choreographic, theoretic, and performance processes. The curriculum is designed to introduce and develop the craft of musical theatre.

- TAP 390 Repertory and Touring Technical Production I (1 - 3)

Total Units: 17.5

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- synthesize choreographed movement and blocking skills with optimum singing skills
- interpret a character through a musical theatre song/script/dance
- critique acting, singing, and movement skills in a musical theatre performance
- develop and perform an audition package consisting of a ballad and an up-tempo song
- identify historical eras in the development of American Musical Theatre

Career Information

A person with a Musical Theatre certificate may go into acting or directing careers in musical theatre or may augment careers in education, recreation, and arts programs.
Theatre Production Certificate

This certificate provides training in the skills needed to develop and maintain the technical aspects of productions in theatre, film, TV, and entertainment venues. Coursework includes scenery, lighting, props, set management, sound, costuming, and puppetry.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- analyze the role of technical theatre in the production process.
- analyze historical and artistic theatrical styles.
- analyze production requirements and develop practical and artistic solutions.
- evaluate a script and develop appropriate scenic, lighting, costume, sound, or makeup designs.
- analyze and apply information from scenic, lighting, and/or costuming plans.
- demonstrate proficiency in technical production skills.
- identify and evaluate tools, materials, and processes used in technical theatre areas.

Career Information

A person with a Theatre Production certificate may become a stagehand, set builder, lighting and sound technician, makeup artist, properties artisan, or stage manager in theatre, film, or TV.

Theatre Arts (TA) Courses

**TA 294 Topics in Theatre Arts**

**Units:** 0.5 - 4  
**Hours:** 27 - 162 hours LAB  
**Prerequisite:** None.

This course covers topics in theatre which are not included in current course offerings. A portion of this course may be offered in a TBA component of 27-216 hours which may include theatrical studies, preparation or performance.

**TA 299 Experimental Offering in Theatre Art**

**Units:** 0.5 - 4  
**Prerequisite:** None.

This is the experimental courses description.

**TA 300 Introduction to the Theatre**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.

Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; OR ESLR 340 AND ESLW 340.

Transferable: CSU; UC  
General Education: AA/AS Area I; CSU Area C1; Cal-GETC Area 3A (effective Fall 2025); IGETC Area 3A

C-ID: C-ID THTR 111

This course provides a general introduction to live theatre as an artistic and social force. It surveys the literary, cultural, and historical aspects of theatre arts. This is an audience-oriented, non-performance course open to all students. Field trips may be required.

**TA 302 History and Theory of the Theatre I**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.

Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; OR ESLR 340 AND ESLW 340.

Transferable: CSU; UC  
General Education: AA/AS Area I; CSU Area C1; CSU Area C2; Cal-GETC Area 3A (effective Fall 2025); Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3A; IGETC Area 3B

C-ID: C-ID THTR 113

This course is a survey of the history of world theatre from its origins through the 17th Century. The history and evolution of drama and theatre practice are studied in relationship to cultural, political, and...
social conditions of the time. Plays are read that exemplify major developments and significant artists. Field trips to attend live performances may be required.

**TA 303 History and Theory of the Theatre II**

Units: 3  
Hours: 54 hours LEC  
Prerequisite: None.  
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; OR ESLW 340.  
Transferable: CSU; UC  
General Education: AA/AS Area I; AA/AS Area VI; CSU Area C1; Cal-GETC Area 3A (effective Fall 2025); IGETC Area 3A (effective Fall 2025); Cal-GETC Area 3B  
This course is a survey of the history of world theatre from the 17th Century to the modern era. It covers the history and evolution of drama and theatre practice in relation to cultural, political, and social conditions of the time. Topics include plays that exemplify major developments and significant artists. Field trips to attend live performances may be required.

**TA 306 Diversity in American Drama (1960 to Present)**

Units: 3  
Hours: 54 hours LEC  
Prerequisite: None.  
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; OR ESLW 340.  
Transferable: CSU; UC  
General Education: AA/AS Area I; AA/AS Area VI; CSU Area C1; Cal-GETC Area 3A (effective Fall 2025); IGETC Area 3A  
This course surveys Native-American, African-American, Latinx, Asian-American, and other diverse theatre from 1960 to the present. It includes the social, political, cultural, and economic climate reflected in the text and production of the play. Field trips may be required.

**TA 344 Improvisation and Theatre Games**

Units: 2  
Hours: 18 hours LEC; 54 hours LAB  
Prerequisite: None.  
Transferable: CSU; UC  
This course explores theatre games and improvisational exercises designed to develop trust, cooperation, mental acuity, and physical and vocal range as an actor. Improvisation technique is built from the ground up, providing a strong foundation for advanced work in non-scripted performance as well as modern rehearsal techniques that involve extensive use of improvisation. Field trips may be required.

**TA 350 Theory and Techniques of Acting I**

Units: 3  
Hours: 54 hours LEC  
Prerequisite: None.  
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; OR ESLW 340.  
Transferable: CSU; UC (UC credit limitation: TA 350 with a grade of "C" or better)  
General Education: AA/AS Area I; CSU Area C1; Cal-GETC Area 3A (effective Fall 2025); IGETC Area 3A  
C-ID: C-ID THTR 151  
This course explores the major theories and techniques of acting, including improvisation, physical expressiveness, voice production, character portrayal, and scene work. Field trips may be required. This course is not open to students who have completed TA 480.

**TA 351 Theory and Techniques of Acting II**

Units: 3  
Hours: 54 hours LEC  
Prerequisite: TA 350 with a grade of "C" or better  
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; OR ESLW 340 AND ESLR 340  
Transferable: CSU; UC  
C-ID: C-ID THTR 152  
This course covers the application of advanced acting theories and techniques. It includes analyzing and performing scripts from realistic and stylized drama, audition monologues, and complex acting exercises. Field trips may be required.

**TA 356 Acting for the Camera I**

Units: 3  
Hours: 36 hours LEC; 54 hours LAB  
Prerequisite: TA 350 with a grade of "C" or better  
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; OR ESLW 340 AND ESLR 340  
Transferable: CSU; UC  
General Education: AA/AS Area I; AA/AS Area VI; CSU Area C1; Cal-GETC Area 3A  
This course introduces the theory and technique of acting for film and video, focusing on the differences between stage acting and acting for the camera. It provides opportunities to apply acting theory and technique in a video studio setting. Field trips may be required.

**TA 357 Acting for the Camera - II**

Units: 3  
Hours: 36 hours LEC; 54 hours LAB  
Prerequisite: TA 356 with a grade of "C" or better  
Advisory: Eligible for ENGRD 310 OR ENGRD 312 AND ENGW 300; OR ESLR 340 AND ESLW 340  
Transferable: CSU; UC  
General Education: AA/AS Area I; AA/AS Area VI; CSU Area C1; Cal-GETC Area 3A  
This course develops advanced skills of acting for film and television. It provides opportunities in a studio setting to practice monologues, commercials using a teleprompter, and scene work. Field trips may be required.

**TA 362 Styles of Acting: Classical**

Units: 3  
Hours: 36 hours LEC; 54 hours LAB  
Prerequisite: TA 350 with a grade of "C" or better  
Advisory: Eligible for ENGRD 310 OR ENGRD 312 AND ENGW 300; OR ESLR 340 AND ESLW 340  
Transferable: CSU; UC (UC credit limitation: 362 and 366 combined: maximum credit, 6 units)  
This course explores the styles of acting used in Classic Theatre from the Greeks through Restoration. It examines the actor's approach to the text as well as the voice and movement needs of classic styles. Styles include Greek, Commedia dell'Arte, Shakespeare, and Restoration. Field trips may be required.

**TA 366 Styles of Acting: Modern**

Units: 3  
Hours: 36 hours LEC; 54 hours LAB  
Prerequisite: TA 350 with a grade of "C" or better  
Advisory: Eligible for ENGRD 310 OR ENGRD 312 AND ENGW 300; OR ESLR 340 AND ESLW 340  
Transferable: CSU; UC (UC credit limitation: 362 and 366 combined: maximum credit, 6 units)  
This course explores the styles of acting required for modern theatre from 1875 to the present. It examines the actor's approach to modern texts as well as the voice and movement needs of modern styles. Topics include Realism, Epic Theatre, Theatre of the Absurd, and contemporary solo performance. Field trips may be required.
### TA 370 Theatre Movement

**Units:** 2  
**Hours:** 18 hours LEC; 54 hours LAB  
**Prerequisite:** None.  
**Transferable:** CSU; UC

This course is an active participation and performance experience designed to provide opportunities in discovery and to solve movement tasks of the actor. It incorporates exercises to expand the individual's movement for characters and scenes, as well as training in specific movement areas, such as combat, mime, period style, and dance. Field trips may be required.

### TA 375 Voice, Diction and Dialects

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340.  
**Transferable:** CSU; UC

This course focuses on the overall improvement of vocal quality, explores monologue and dialogue performances, and develops confidence in speaking and voice production. It emphasizes self-improvement drills involving breath control, resonance, pitch, inflection, and articulation, and introduces a study of the vocal anatomy, its parts, and their functions. Additionally, this course covers the study and application of the International Phonetic Alphabet (IPA), and includes a special study and application of stage dialects and/or accent reduction.

### TA 377 Musical Theatre Techniques

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Prerequisite:** None.  
**Transferable:** CSU; UC

This is a performance-oriented course integrating acting and singing skills through the creation of a unified character. It is both an introduction for students with little or no previous musical theatre experience and a continuing performance forum for those with previous training. Primary emphasis is placed on the three core areas of musical theatre performance: acting, singing, and movement. Field trips may be required.

### TA 390 Directing and Play Production

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Prerequisite:** TA 350 with a grade of “C” or better  
**Advisory:** TA 300, 351, and 420; and eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340.  
**Transferable:** CSU; UC  
**General Education:** CSU Area C1

This course is an introduction to directing and the elements of play production. It includes the process of preparing and analyzing a script for production, auditioning and casting a play, blocking and rehearsing actors, and dealing with technical and promotion needs of a production. It also requires directing scenes and/or short plays and preparing a prompt book. Field trips may be required.

### TA 395 Playwriting

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** Eligibility for ENGWR 300.  
**Transferable:** CSU; UC

This course is an introduction to the fundamentals of the craft of dramatic writing. It emphasizes elements of plot construction and character development through writing exercises, study of superior models of drama, and drafting and revision of an original play script. Field trips may be required.

### TA 400 Creative Drama for Children

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340.  
**Transferable:** CSU

This course explores theatrical forms and activities to help drama leaders guide children in developing their academic, social, and performance skills. It includes strategies for infusing drama, pantomime, improvisation, puppetry, and creative role-playing into school curriculum and recreational programs. It is designed for anyone who interacts with pre-school and elementary-age children. Field trips may be required.

### TA 404 Techniques of Puppetry

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 116 AND ENGWR 101; OR ESLR 320 AND ESLW 320.  
**Transferable:** CSU

This course explores puppetry as a dramatic medium. It covers the history and development of puppetry, puppet design and creation, puppet manipulation and improvisation, and puppet play production techniques and applications.

### TA 406 Children's Theatre

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Audition/Interview  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area I; CSU Area C1

This course explores children's literature in performance through dramatic presentations of fiction, drama, and poetry for an audience of children or young people. It provides the opportunity to analyze and experience the production process from script to stage. It includes the development of a touring children's production. No prior theatrical experience is required. This course is recommended for theatre, education, early childhood education, and recreation majors. Public performances and regular field trips are required.

### TA 420 Stagecraft

**Units:** 3  
**Hours:** 36 hours LEC; 72 hours LAB  
**Prerequisite:** None.  
**Advisory:** MATH 25 OR MATH 41 with a grade of “C” or better or placement through the placement process; AND TA 300; AND eligible for ENGRD 116 AND ENGWR 102; OR ESLR 320 AND ESLW 320; AND Transferable: CSU; UC  
**C-ID:** C-ID THTR 171

This course is an introduction to technical theatre and the creation of scenic elements for theatre, film or television. It covers design styles, painting, set construction, set movement techniques, properties construction, backstage and rehearsal organization and management, and career possibilities. The course combines lectures, reading and projects with practical experience gained from working on department productions. A portion of this course may be offered in a TBA component of 18 hours which may include scenery construction, props, and painting.

### TA 422 Stage Lighting

**Units:** 3  
**Hours:** 36 hours LEC; 72 hours LAB  
**Prerequisite:** None.  

This course explores the design and application of stage lighting. It covers design styles, painting, set construction, set movement techniques, properties construction, backstage and rehearsal organization and management, and career possibilities. The course combines lectures, reading and projects with practical experience gained from working on department productions. A portion of this course may be offered in a TBA component of 18 hours which may include scenery construction, props, and painting.
Advisory: ENGRD 15 and ENGW 51, OR ESLR 310 and ESLW 310, OR placement through assessment process; AND MATH 25 or MATH 41, TA 300, and TA 420.
Transferable: CSU; UC
C-ID: C-ID THTR 173

This course introduces the basic concepts of lighting for stage, film or television. Topics include the basic elements of lamps and fixtures, electricity, dimmers and control consoles. It also covers the design elements of color, distribution, and space to produce a lighting design. Practical lighting skills are gained from work on department productions. A portion of this course may be offered in a TBA component of 18 hours which may include hanging, circuiting, and focusing lights.

TA 424 Advanced Technical Theatre

Units: 3
Hours: 36 hours LEC; 72 hours LAB
Prerequisite: TA 420 and 422 with grades of "C" or better
Transferable: CSU; UC

This is an advanced study course dealing with technical theatre design and production techniques in the areas of scenery, props, lighting, sound, scenic painting, rigging or stage management through individual projects and participation in major productions. A portion of this course may be offered in a TBA component of 18-72 hours which may include practical work in lighting, scenic construction or design, sound design, rigging, or stage managing techniques.

TA 430 Costume Construction

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: TA 420 and 422 with grades of "C" or better
Advisory: Eligible for ENGRD 116 AND ENGW 102; OR ESLR 320 AND ESLW 320.
Transferable: CSU; UC
C-ID: C-ID THTR 174

This course explores the basic areas of costume construction and offers experience in constructing costumes for theatrical productions. Topics include fabrics, color, patterns, sewing techniques, costume pieces, and accessories. Period styles, costume analysis, and basic elements of costume design are also covered. Field trips may be required.

TA 433 Costume Production

Units: 0.5 - 3
Hours: 27 - 162 hours LAB
Prerequisite: FASHN 374 or TA 430 with a grade of "C" or better
Advisory: Eligible for ENGRD 116 AND ENGW 102; OR ESLR 320 AND ESLW 320.
Transferable: CSU

This lab course explores the process of developing costumes for theatrical productions through the set-up, creation, and assembly of costumes for mainstage productions. Projects focus on developing sewing, craft, and patterning skills, clothing alteration methods and working with fabrics, hats and accessories, dyes and textile paints as utilized in each production. Field trips may be required. A portion of this course may be offered in a TBA component of hours which may include pattern making, sewing, alteration, and maintenance of costumes.

TA 434 Vintage Costuming

Same As: FASHN 334
Units: 0.5 - 2
Hours: 4.5 - 18 hours LEC; 13.5 - 54 hours LAB
Prerequisite: None
Advisory: FASHN 357 or TA 430; and eligible for ENGRD 310 or ENGRD 312 AND ENGW 300, OR ESLR 340 AND ESLW 340.
Transferable: CSU; UC

This course covers the principles and techniques involved in developing and constructing period costumes and/or accessories through individual fabrication of costume pieces. The historical period or topic changes each semester. This course is open to all skill levels, with basic knowledge of sewing recommended. It is not open to students who have completed FASHN 334. Field trips may be required.

TA 435 History and Theory of Costuming

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; OR ESLR 340 AND ESLW 340.
Transferable: CSU; UC
General Education: AA/AS Area I; CSU Area C1; Cal-GETC Area 3A (effective Fall 2025); IGETC Area 3A

This is a survey course of historical periods as portrayed through fashion and costumes from ancient through modern times. The impact of social, political, cultural, and economic issues on costuming is explored and analyzed, as is the effect of costumes on society. This course integrates design elements with historical styles to develop designs for theatrical costumes. Field trips may be required.

TA 437 Stage Make-up I

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: None.
Transferable: CSU; UC
C-ID: C-ID THTR 175

This course covers the basic techniques of theatrical makeup. It explores makeup materials, color and light, modeling techniques, and design elements in the development of makeup designs for adaptive looks, stages of life and aging, historical periods, clowns, animals, and fantasy characters makeup.

TA 440 Arts Management

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; OR ESLR 340
Transferable: CSU

This general survey course in arts management emphasizes organization, marketing, audience development, and financial management. It includes promotion and publicity, house management, box office operations, and public relations. It also includes field work projects with an existing arts organization.

TA 452 One-Act Play Workshop

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: None.
Enrollment Limitation: Audition/Interview
Transferable: CSU; UC

This course explores the play production process. It provides experience as an active participant in the analysis, preparation, and production of one-act plays through participation as either directors, writers, actors, or technicians. This course culminates in public performances.

TA 466 Rehearsal and Performance - Musical Ensemble

Same As: MUP 370
Units: 0.5 - 3
Hours: 27 - 162 hours LAB
Course Family: Musical Performance and Technical Production
Prerequisite: None.
Enrollment Limitation: Audition/Interview
Transferable: CSU; UC

This course provides a workshop training experience in the preparation and performance of musical theatre ensemble productions. A different
production is presented each semester the course is offered. Students interested in singing/acting roles audition with the director. Students interested in instrumental positions audition with the musical director. Students interested in technical work interview with the technical director. Field trips may be required. A portion of this course may be offered in a TBA component of 27-162 hours which may include acting, singing, dancing, musical, or technical rehearsals and preparation. It is not open to students who have completed MUP 370.

**TA 494 Topics in Theatre Arts**

**Units:** 0.5 - 4  
**Hours:** 27 - 162 hours LAB  
**Prerequisite:** None  
**Transferable:** CSU  

This course covers topics in theatre which are not included in current course offerings. May require field trips. A portion of this course may be offered in a TBA component of 27-216 hours which may include theatrical studies, preparation or performance.

**TA 495 Independent Studies in Theatre Arts**

**Units:** 1 - 3  
**Hours:** 54 - 162 hours LAB  
**Prerequisite:** None  
**Transferable:** CSU  

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

**TA 498 Work Experience in Theatre Arts**

**Units:** 0.5 - 4  
**Hours:** 30 - 300 hours LAB  

**Prerequisite:** None  
**Enrollment Limitation:** Students must be in a paid or unpaid internship, volunteer position, or job related to theatre arts with a cooperating site supervisor. Students are advised to consult with the Theatre Arts Department faculty to review specific certificate and degree work experience requirements.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.  
**Transferable:** CSU  
**General Education:** AA/AS Area III(b)  

This course provides students with opportunities to develop marketable skills in preparation for employment or advancement within the field of theatre arts. It is designed for students interested in work experience and/or internships in transfer-level degree occupational programs. Course content includes understanding the application of education to the workforce, completion of Title 5 required forms which document the student’s progress and hours spent at the work site, and developing workplace skills and competencies.

During the semester, the student is required to complete 37.5 hours of related paid work experience, or 30 hours of related unpaid work experience is required for each additional 0.5 units. All students are required to attend the first class meeting, a mid-semester meeting, and a final meeting. Additionally, students who have not already successfully completed a Work Experience course will be required to attend weekly orientations while returning participants may meet individually with the instructor as needed. Students may take up to 16 units total across all Work Experience course offerings. This course may be taken up to four times when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

**TA 499 Experimental Offering in Theatre Arts**

**Units:** 0.5 - 4  
**Prerequisite:** None  
**Transferable:** CSU  

This is the experimental courses description.
Homeland Security

The ARC Homeland Security certificate program examines the roots of terrorism, weapons of mass destruction, intelligence analysis, response methods, natural disaster incidents, threat mitigation, crisis negotiation, and conflict resolution. It explores topics directly associated with border security and security for transportation infrastructure, including: seaports, ships, aircraft, trains, train stations, pipelines, and bus systems.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- outline the primary federal, state, and local agencies in the United States that are affiliated with border and transportation security and the ethical parameters in which they operate.
- discuss differences in dealing with security threats for passengers versus freight/cargo transportation systems and border security.
- describe the impact of technology on countering threats to transportation systems and border security.

Homeland Security (HLS) Courses

HLS 300 Introduction to Homeland Security

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340.
Transferable: CSU

This course introduces the vocabulary and various components of homeland security. It emphasizes the agencies associated with homeland security and their interrelated duties and relationships. Topics include critical threats confronting homeland security, historical events impacting homeland security, and related state, national, and international laws.

HLS 302 Intelligence Analysis and Security Management

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340.
Transferable: CSU

This course examines intelligence analysis and its relationship to the security management of terrorist attacks and natural disasters, as well as vulnerabilities of our national defense and private sectors. It emphasizes ethical principles and how the intelligence community operates in support of federal, state, and local homeland security agencies.

HLS 304 Transportation and Border Security

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310, ENGRD 312, ENGWR 300, AND ESLW 340.
Transferable: CSU

This course provides an overview of modern border and transportation security challenges and presents different methods to address these challenges. Topics include security for transportation infrastructure related to seaports, ships, aircraft, airports, trains, train stations, trucks, highways, bridges, rail lines, pipelines, and bus systems. It emphasizes technological solutions employed to enhance security of borders and transportation systems.
Theatre Arts Film

ARC's Theatre Arts Film offerings include a variety of transferable, general education classes as well as degree and certificate programs.

Degrees and Certificates Offered

A.A. in Film
Film Certificate

Dean Angela Milano
Department Chairs Kathy Burleson
Sam Williams
Phone (916) 484-8433

Associate Degree

A.A. in Film

This degree provides a broad overview of film history, theory, and practice. It combines the critical study of film as an art form and societal influence, including studies in diversity and genres, with opportunities for practical experience in film acting, writing, production, and post-production. It provides students with a foundation for further study in cinematic arts, as well as preparation for career opportunities which employ those arts.

Total Units: 27

The Film Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- analyze the historical development of film art.
- assess the influence of film as a dynamic art form, and as a social and cultural force in our society.
- evaluate the components of a film production, including acting, directing, writing, and technical elements.
- compare and contrast different styles and genres of film.
- integrate theoretical knowledge with practical production experience.

Certificate of Achievement

Film Certificate

This certificate concentrates on the critical study of film as an art form and societal influence, with additional opportunities for practical experience in film acting, production, and post-production.

2023-2024 Catalog
Student Learning Outcomes

Upon completion of this program, the student will be able to:

- assess the influence of film as a dynamic art form and a social and cultural force in our society.
- distinguish the component parts of a film including acting, directing, screenwriting, cinematography, and production and technical elements.
- analyze the historical development of film.
- evaluate films in terms of cultural diversity.
- integrate theoretical knowledge with practical production experience.

Career Information

People may go into the field of film or television as actors, directors, producers, critics, and technicians.

Theatre Arts Film (TAFILM) Courses

TAFILM 300 Introduction to Film

Units: 3  
Hours: 54 hours LEC  
Prerequisite: None.  
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGRWR 300; OR ESLW 340.  
Transferable: CSU; UC  
General Education: AA/AS Area I; CSU Area C1; Cal-GETC Area 3A (effective Fall 2025); IGETC Area 3A

This course explores the artistic, business, and social elements of film. It examines components of film making, such as acting, directing, cinematography, writing, and editing. Films are analyzed to evaluate film making techniques and the impact of cinematic art and entertainment on society. This course is formerly known as TA 310.

TAFILM 302 History of Film

Units: 3  
Hours: 54 hours LEC  
Prerequisite: None.  
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGRWR 300; OR ESLW 340.  
Transferable: CSU; UC (Transfer Credit Limitation: TA 312/TAFILM 302, TA 314/TAFILM 303, TA 315/TAFILM 304, TA 481 - any combination, maximum credit 6 units)  
General Education: AA/AS Area I; CSU Area C1; Cal-GETC Area 3A (effective Fall 2025); IGETC Area 3A

This course is an historical and critical survey of film making, such as acting, directing, screenwriting, cinematography, and production and technical elements. Films are analyzed to evaluate film making techniques and the impact of cinematic art and entertainment on society. This course is formerly known as TA 312.

TAFILM 303 History of Film: 1880's through 1950's

Units: 3  
Hours: 54 hours LEC  
Prerequisite: None.  
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGRWR 300; OR ESLW 340.  
Transferable: CSU; UC (Transfer Credit Limitation: TA 312/TAFILM 302, TA 314/TAFILM 303, TA 315/TAFILM 304, TA 481 - any combination, maximum credit 6 units)  
General Education: AA/AS Area I; CSU Area C1; Cal-GETC Area 3A (effective Fall 2025); IGETC Area 3A

This course is an historical and critical survey of film as an art form. It emphasizes the evolution of artistic and technical facets of production in features, documentaries, and experimental films, concentrating on films from the 1880s through the 1950s. This course is formerly known as TA 314.

TAFILM 304 History of Film: 1950's to Present

Units: 3  
Hours: 54 hours LEC  
Prerequisite: None.  
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGRWR 101; OR ESLW 340.  
Transferable: CSU; UC (Transfer Credit Limitation: TA 312/TAFILM 302, TA 314/TAFILM 303, TA 315/TAFILM 304, TA 481 - any combination, maximum credit 6 units)  
General Education: AA/AS Area I; CSU Area C1; Cal-GETC Area 3A (effective Fall 2025); IGETC Area 3A

This course is an historical and critical survey of film as an art form. It emphasizes the evolution of artistic and technical facets of production in features, documentaries, and experimental films, concentrating on films from 1950 to the present. This course is formerly known as TA 315.

TAFILM 307 Diversity in American Film

Units: 3  
Hours: 54 hours LEC  
Prerequisite: None.  
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGRWR 300; OR ESLW 340.  
Transferable: CSU; UC  
General Education: AA/AS Area I; AA/AS Area VI; CSU Area C1; Cal-GETC Area 3A (effective Fall 2025); IGETC Area 3A

This course surveys the cinematic expression of artists often underrepresented in the mainstream media, such as women, Native-Americans, African-Americans, Hispanics/Latinos, Asian-Americans, and gays, lesbians, bisexuals, and transgender people. It covers media stereotypes and the social, political, and cultural climates that created them. This course is formerly known as TA 318.

TAFILM 320 Cinema Genres

Units: 3  
Hours: 54 hours LEC  
Prerequisite: None.  
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGRWR 300; OR ESLW 340.  
Transferable: CSU; UC  
General Education: AA/AS Area I; CSU Area C2; Cal-GETC Area 3A (effective Fall 2025); IGETC Area 3A

This course examines one or more film genres such as western, horror, film noir, and science fiction. It explores specific types of film in depth, concentrating on historical and technical developments in a specific genre, and examines the work of actors, directors, writers, cinematographers, producers, and studios for that genre. This course is formerly known as TA 320.
Honors

The American River College Honors Program is a community of students and faculty who are dedicated to the pursuit of intellectual and personal enrichment in a diverse and challenging academic environment.

Students with a cumulative grade point average (GPA) of 3.2 or better who have completed at least 15 units of approved Honors coursework earn a Certificate of Achievement noted on the transcript. Most courses in the certificate fulfill requirements for the AA, AS, AA-T, AS-T degrees, the Intersegmental General Education Transfer Curriculum (IGETC), and the CSU General Education Certification Pattern. Check with an ARC counselor for exceptions.

Completion of the certificate with a cumulative GPA of 3.2 or better allows students to take advantage of transfer agreements with highly selective colleges and universities through the Honors Transfer Council of California and to participate in the Transfer Alliance Program at UCLA. These enhanced transfer partnerships are only available to students who complete the certificate requirements with the minimum GPA, and are in addition to transfer admission guarantees (TAG) or transfer admission agreements (TAA) offered through ARC.

Honors Certificate Eligibility

ARC students are eligible for the Honors Transfer Certificate by completing 15 units of approved Honors coursework. Students who successfully complete five Honors courses receive a transcript notation showing that they have earned the certificate.

In addition to the transcript notation, completion of the certificate with a 3.5 or better GPA makes a student eligible for enhanced prospects for transfer to competitive schools through the ARC Honors Program’s partnerships with UCLA, UC Irvine, and other public and private four-year institutions. These enhanced transfer partnerships are only available to students who complete the certificate requirements with the minimum GPA, and are in addition to transfer admission guarantees (TAG) or transfer admission agreements (TAA) offered through ARC.

Certificate of Achievement

Honors Transfer Certificate

The American River College (ARC) Honors Program is a community of students and faculty who are dedicated to the pursuit of intellectual and personal enrichment in a diverse and challenging academic environment. Students with a cumulative GPA of 3.2 or better who have completed at least 15 units of approved Honors coursework earn a Certificate of Achievement noted on the transcript. A maximum of 6 units of Honors coursework may be transferred from other colleges. Some courses may need to be petitioned. A total of 12 units of degree-applicable coursework must be earned at ARC to meet residency requirements. Most courses in the certificate fulfill requirements for the ARC A.A., A.S., A.A.-T., A.S.-T. degrees, the Intersegmental General Education Transfer Curriculum (IGETC), and the CSU General Education Certification Pattern. Check with an ARC counselor for exceptions.

Completion of the certificate with a cumulative grade point average (GPA) of 3.2 or better allows students to take advantage of transfer agreements with highly selective colleges and universities through the Honors Transfer Council of California and to participate in the Transfer Alliance Program at UCLA. Honors students must meet with a counselor to ensure completion of ARC graduation and/or transfer requirements. In addition, Honors students should meet regularly with an Honors faculty advisor to ensure completion of the Honors certificate in a timely fashion.

1Up to six units of the Honors Certificate may be earned with non-Honors coursework for which there is an Honors Contract. Contact the Honors Coordinator for details.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- analyze the broad areas of human knowledge that contribute to purposeful and meaningful lives.
- incorporate argumentative reasoning and logic involved in the process of advanced problem-solving in an academic setting.
- investigate advanced methods of inquiry and analysis employed in a variety of disciplines.
- justify personal accomplishments as a highly motivated, self-directed individual in an advanced academic setting.
- demonstrate cultural competence in a diverse academic setting.
Theatre Arts Performance

ARC's Theatre Arts Performance classes give you real-world experience acting on stage or working behind the scenes. You will have the opportunity to be a part of ARC's award-winning productions.

Theatre Arts Performance (TAP) Courses

TAP 300 Modern Rehearsal and Performance I

Units: 1 - 3
Hours: 54 - 162 hours LAB
Course Family: Modern Performance and Technical Production
Prerequisite: TAP 300 with a grade of "C" or better
Enrollment Limitation: Students must audition and/or interview with the director to participate in this course.
Advisory: TA 350
Transferable: CSU; UC
C-ID: C-ID THTR 191

This course is the first in a series of four courses that provide workshop training in the rehearsal and performance of Modern theatre. It is designed for students with little or no prior theatre experience. Students audition or interview with the director for participation in a Modern drama or comedy. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include acting, singing, dancing, and/or technical rehearsals and preparation.

TAP 301 Modern Rehearsal and Performance II

Units: 1 - 3
Hours: 54 - 162 hours LAB
Course Family: Modern Performance and Technical Production
Prerequisite: TAP 300 with a grade of "C" or better
Enrollment Limitation: Students must audition and/or interview with the director to participate in this course.
Advisory: TA 366
Transferable: CSU; UC
C-ID: C-ID THTR 191

This course is the second in a series of four courses that provide workshop training in the rehearsal and performance of Modern theatre. It is designed for students with basic/minimal theatre experience. Students audition or interview with the director for participation in a Modern drama or comedy. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include acting, singing, dancing, and/or technical rehearsals and preparation.

TAP 302 Modern Rehearsal and Performance III

Units: 1 - 3
Hours: 54 - 162 hours LAB
Course Family: Modern Performance and Technical Production
Prerequisite: TAP 301 with a grade of "C" or better
Enrollment Limitation: Students must audition and/or interview with the director to participate in this course.
Advisory: TA 366

Transferable: CSU; UC
C-ID: C-ID THTR 191

This course is the third in a series of four courses that provide workshop training in the rehearsal and performance of Modern theatre. It is designed for students with beginning/moderate theatre experience. Students audition or interview with the director for participation in a Modern drama or comedy. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include acting, singing, dancing, and/or technical rehearsals and preparation.

TAP 303 Modern Rehearsal and Performance IV

Units: 1 - 3
Hours: 54 - 162 hours LAB
Course Family: Modern Performance and Technical Production
Prerequisite: TAP 302 with a grade of "C" or better
Enrollment Limitation: Students must audition and/or interview with the director to participate in this course.
Advisory: TA 366
Transferable: CSU; UC
C-ID: C-ID THTR 191

This course is the fourth in a series of four courses that provide workshop training in the rehearsal and performance of Modern theatre. It is designed for students with intermediate/significant theatre experience. Students audition or interview with the director for participation in a Modern drama or comedy. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include acting, singing, dancing, and/or technical rehearsals and preparation.

TAP 310 Modern Technical Production I

Units: 1 - 3
Hours: 54 - 162 hours LAB
Course Family: Modern Performance and Technical Production
Prerequisite: None
Enrollment Limitation: Interview
Transferable: CSU; UC
C-ID: C-ID THTR 192

This course is the first in a series of four courses that provide workshop training in the technical production of modern theatre. It provides practical experience, in the modern theatre style, in one of the following areas: scenery, scenic painting, properties, costumes, lighting, sound, video, projections, stage management, house management, box office, publicity, and running crews. It is designed for students who want an introductory experience. Students interested in technical work interview for positions with the technical director. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include technical preparation, activities, rehearsals, and performances.

TAP 311 Modern Technical Production II

Units: 1 - 3
Hours: 54 - 162 hours LAB
Course Family: Modern Performance and Technical Production
Prerequisite: TAP 310 with a grade of "C" or better
Enrollment Limitation: Interview
Transferable: CSU; UC
C-ID: C-ID THTR 192

This course is the second in a series of four courses that provide workshop training in the technical production of modern theatre. It provides practical experience, in the modern theatre style, in one of the following areas: scenery, scenic painting, properties, costumes, lighting, sound, video, projections, stage management, house management, box office, publicity, and running crews. It is designed for students with basic/minimal experience. Students interested in technical work interview for positions with the technical director. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include technical preparation, activities, rehearsals, and performances.
TAP 312 Modern Technical Production III

Units: 1 - 3  
Hours: 54 - 162 hours LAB  
Course Family: Modern Performance and Technical Production  
Prerequisite: TAP 311 with a grade of "C" or better  
Enrollment Limitation: Interview  
Transferable: CSU; UC  
C-ID: C-ID THTR 192

This course is the third in a series of four courses that provide workshop training in the technical production of modern theatre. It provides practical experience, in the modern theatre style, in one of the following areas: scenery, scenic painting, properties, costumes, lighting, sound, video, projections, stage management, house management, box office, publicity, and running crews. It is designed for students with beginning/moderate experience. Students interested in technical work interview for positions with the technical director. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include technical preparation, activities, rehearsals, and performances.

TAP 313 Modern Technical Production IV

Units: 1 - 3  
Hours: 54 - 162 hours LAB  
Course Family: Modern Performance and Technical Production  
Prerequisite: TAP 312 with a grade of "C" or better  
Enrollment Limitation: Interview  
Transferable: CSU; UC  
C-ID: C-ID THTR 192

This course is the fourth in a series of four courses that provide workshop training in the technical production of modern theatre. It provides practical experience, in the modern theatre style, in one of the following areas: scenery, scenic painting, properties, costumes, lighting, sound, video, projections, stage management, house management, box office, publicity, and running crews. It is designed for students with intermediate/significant theatre experience. Students interested in technical work interview for positions with the technical director. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include technical preparation, activities, rehearsals, and performances.

TAP 320 Classical Rehearsal and Performance I

Units: 1 - 3  
Hours: 54 - 162 hours LAB  
Course Family: Classical Performance and Technical Production  
Prerequisite: None.  
Enrollment Limitation: Students must audition and/or interview with the director to participate in this course.  
Advisory: TA 350  
Transferable: CSU; UC  
C-ID: C-ID THTR 191

This course is the first in a series of four courses that provide workshop training in the rehearsal and performance of Classical theatre. It is designed for students with intermediate/significant theatre experience. Students audition or interview with the director for participation in a Classical drama or comedy. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include acting, singing, dancing, and/or technical rehearsals and preparation.

TAP 321 Classical Rehearsal and Performance II

Units: 1 - 3  
Hours: 54 - 162 hours LAB  
Course Family: Classical Performance and Technical Production  
Prerequisite: TAP 320 with a grade of "C" or better  
Enrollment Limitation: Students must audition and/or interview with the director to participate in this course.  
Advisory: TA 362  
Transferable: CSU; UC

TAP 322 Classical Rehearsal and Performance III

Units: 1 - 3  
Hours: 54 - 162 hours LAB  
Course Family: Classical Performance and Technical Production  
Prerequisite: TAP 321 with a grade of "C" or better  
Enrollment Limitation: Students must audition and/or interview with the director to participate in this course.  
Advisory: TA 362  
Transferable: CSU; UC  
C-ID: C-ID THTR 191

This course is the second in a series of four courses that provide workshop training in the rehearsal and performance of Classical theatre. It is designed for students with basic/minimal theatre experience. Students audition or interview with the director for participation in a Classical drama or comedy. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include acting, singing, dancing, and/or technical rehearsals and preparation.

TAP 323 Classical Rehearsal and Performance IV

Units: 1 - 3  
Hours: 54 - 162 hours LAB  
Course Family: Classical Performance and Technical Production  
Prerequisite: TAP 322 with a grade of "C" or better  
Enrollment Limitation: Students must audition and/or interview with the director to participate in this course.  
Advisory: TA 362  
Transferable: CSU; UC  
C-ID: C-ID THTR 191

This course is the third in a series of four courses that provide workshop training in the rehearsal and performance of Classical theatre. It is designed for students with intermediate/significant theatre experience. Students audition or interview with the director for participation in a Classical drama or comedy. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include acting, singing, dancing, and/or technical rehearsals and preparation.

TAP 330 Classical Technical Production I

Units: 1 - 3  
Hours: 54 - 162 hours LAB  
Course Family: Classical Performance and Technical Production  
Prerequisite: None.  
Enrollment Limitation: Interview  
Transferable: CSU; UC  
C-ID: C-ID THTR 192

This course is the first in a series of four courses that provide workshop training in the technical production of classical theatre. It provides practical experience, in the classical theatre style, in one of the following areas: scenery, scenic painting, properties, costumes, lighting, sound, video, projections, stage management, house management, box office, publicity, and running crews. It is designed for students who want an introductory experience. Students interested in technical work interview for positions with the technical director. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include technical preparation, activities, rehearsals, and performances.
TAP 331 Classical Technical Production II

Units: 1 - 3
Hours: 54 - 162 hours LAB
Course Family: Classical Performance and Technical Production
Prerequisite: TAP 330 with a grade of "C" or better
Enrollment Limitation: Interview
Transferable: CSU; UC
C-ID: C-ID THTR 192

This course is the second in a series of four courses that provide workshop training in the technical production of classical theatre. It provides practical experience, in the classical theatre style, in one of the following areas: scenery, scenic painting, properties, costumes, lighting, sound, video, projections, stage management, house management, box office, publicity, and running crews. It is designed for students with basic/minimal theatre experience. Students interested in technical work interview for positions with the technical director. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include technical preparation, activities, rehearsals, and performances.

TAP 332 Classical Technical Production III

Units: 1 - 3
Hours: 54 - 162 hours LAB
Course Family: Classical Performance and Technical Production
Prerequisite: TAP 331 with a grade of "C" or better
Enrollment Limitation: Interview
Transferable: CSU; UC
C-ID: C-ID THTR 192

This course is the third in a series of four courses that provide workshop training in the technical production of classical theatre. It provides practical experience, in the classical theatre style, in one of the following areas: scenery, scenic painting, properties, costumes, lighting, sound, video, projections, stage management, house management, box office, publicity, and running crews. It is designed for students with beginning/moderate theatre experience. Students interested in technical work interview for positions with the technical director. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include technical preparation, activities, rehearsals, and performances.

TAP 333 Classical Technical Production IV

Units: 1 - 3
Hours: 54 - 162 hours LAB
Course Family: Classical Performance and Technical Production
Prerequisite: TAP 332 with a grade of "C" or better
Enrollment Limitation: Interview
Transferable: CSU; UC
C-ID: C-ID THTR 192

This course is the fourth in a series of four courses that provide workshop training in the technical production of classical theatre. It provides practical experience, in the classical theatre style, in one of the following areas: scenery, scenic painting, properties, costumes, lighting, sound, video, projections, stage management, house management, box office, publicity, and running crews. It is designed for students with intermediate/significant theatre experience. Students interested in technical work interview for positions with the technical director. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include technical preparation, activities, rehearsals, and performances.

TAP 340 Musical Rehearsal and Performance I

Units: 1 - 3
Hours: 54 - 162 hours LAB
Course Family: Musical Performance and Technical Production
Prerequisite: None.
Enrollment Limitation: Students must audition and/or interview with the director to participate in this course.

Advisory: TA 350
Transferable: CSU; UC
C-ID: C-ID THTR 191

This course is the first in a series of four courses that provide workshop training in the rehearsal and performance of musical theatre. It is designed for students with little or no prior theatre experience. Students audition or interview with the director for participation in a musical. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include acting, singing, dancing, and/or technical rehearsals and preparation.

TAP 341 Musical Rehearsal and Performance II

Units: 1 - 3
Hours: 54 - 162 hours LAB
Course Family: Musical Performance and Technical Production
Prerequisite: TAP 340 with a grade of "C" or better
Enrollment Limitation: Students must audition and/or interview with the director to participate in this course.
Advisory: TA 377
Transferable: CSU; UC
C-ID: C-ID THTR 191

This course is the second in a series of four courses that provide workshop training in the rehearsal and performance of musical theatre. It is designed for students with basic/minimal theatre experience. Students audition or interview with the director for participation in a musical. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include acting, singing, dancing, and/or technical rehearsals and preparation.

TAP 342 Musical Rehearsal and Performance III

Units: 1 - 3
Hours: 54 - 162 hours LAB
Course Family: Musical Performance and Technical Production
Prerequisite: TAP 341 with a grade of "C" or better
Enrollment Limitation: Students must audition and/or interview with the director to participate in this course.
Advisory: TA 370 and 377
Transferable: CSU; UC
C-ID: C-ID THTR 191

This course is the third in a series of four courses that provide workshop training in the rehearsal and performance of musical theatre. It is designed for students with beginning/moderate theatre experience. Students audition or interview with the director for participation in a musical. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include acting, singing, dancing, and/or technical rehearsals and preparation.

TAP 343 Musical Rehearsal and Performance IV

Units: 1 - 3
Hours: 54 - 162 hours LAB
Course Family: Musical Performance and Technical Production
Prerequisite: TAP 342 with a grade of "C" or better
Enrollment Limitation: Students must audition and/or interview with the director to participate in this course.
Advisory: TA 370 and 377
Transferable: CSU; UC
C-ID: C-ID THTR 191

This course is the fourth in a series of four courses that provide workshop training in the rehearsal and performance of musical theatre. It is designed for students with intermediate/significant theatre experience. Students audition or interview with the director for participation in a musical. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include acting, singing, dancing, and/or technical rehearsals and preparation.
TAP 350 Musical Technical Production I

Units: 1 - 3  
Hours: 54 - 162 hours LAB  
Course Family: Musical Performance and Technical Production  
Prerequisite: None.  
Enrollment Limitation: Interview  
Transferable: CSU; UC  
C-ID: C-ID THTR 192

This course is the first in a series of four courses that provide workshop training in the technical production of musical theatre. It provides practical experience, in the musical theatre style, in one of the following areas: scenery, scenic painting, properties, costumes, lighting, sound, video, projections, stage management, house management, box office, publicity, and running crews. It is designed for students who want an introductory experience. Students interested in technical work interview for positions with the technical director. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include technical preparation, activities, rehearsals, and performances.

TAP 351 Musical Technical Production II

Units: 1 - 3  
Hours: 54 - 162 hours LAB  
Course Family: Musical Performance and Technical Production  
Prerequisite: TAP 350 with a grade of "C" or better  
Enrollment Limitation: Interview  
Transferable: CSU; UC  
C-ID: C-ID THTR 192

This course is the second in a series of four courses that provide workshop training in the technical production of musical theatre. It provides practical experience, in the musical theatre style, in one of the following areas: scenery, scenic painting, properties, costumes, lighting, sound, video, projections, stage management, house management, box office, publicity, and running crews. It is designed for students with basic/minimal theatre experience. Students interested in technical work interview for positions with the technical director. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include technical preparation, activities, rehearsals, and performances.

TAP 352 Musical Technical Production III

Units: 1 - 3  
Hours: 54 - 162 hours LAB  
Course Family: Musical Performance and Technical Production  
Prerequisite: TAP 351 with a grade of "C" or better  
Enrollment Limitation: Interview  
Transferable: CSU; UC  
C-ID: C-ID THTR 192

This course is the third in a series of four courses that provide workshop training in the technical production of musical theatre. It provides practical experience, in the musical theatre style, in one of the following areas: scenery, scenic painting, properties, costumes, lighting, sound, video, projections, stage management, house management, box office, publicity, and running crews. A portion of this course may be offered in a TBA component of 54-162 hours which may include technical preparation, activities, rehearsals, and performances.

TAP 353 Musical Technical Production IV

Units: 1 - 3  
Hours: 54 - 162 hours LAB  
Course Family: Musical Performance and Technical Production  
Prerequisite: TAP 352 with a grade of "C" or better  
Enrollment Limitation: Interview  
Transferable: CSU; UC  
C-ID: C-ID THTR 192

This course is the fourth in a series of four courses that provide workshop training in the technical production of musical theatre. It provides practical experience, in the musical theatre style, in one of the following areas: scenery, scenic painting, properties, costumes, lighting, sound, video, projections, stage management, house management, box office, publicity, and running crews. It is designed for students with intermediate/significant experience. Students interested in technical work interview for positions with the technical director. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include technical preparation, activities, rehearsals, and performances.

TAP 360 Children's Theatre Rehearsal and Performance I

Units: 1 - 3  
Hours: 54 - 162 hours LAB  
Course Family: Children's Theatre Performance and Technical Production  
Prerequisite: None.  
Enrollment Limitation: Students must audition and/or interview with the director to participate in this course.  
Advisory: TA 350  
Transferable: CSU; UC  
C-ID: C-ID THTR 191

This course is the first in a series of four courses that provide workshop training in the rehearsal and performance of children's theatre. It is designed for students with little or no prior theatre experience. Students audition or interview with the director for participation in a children's show. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include acting, singing, dancing, and/or technical rehearsals and preparation.

TAP 361 Children's Theatre Rehearsal and Performance II

Units: 1 - 3  
Hours: 54 - 162 hours LAB  
Course Family: Children's Theatre Performance and Technical Production  
Prerequisite: TAP 360 with a grade of "C" or better  
Enrollment Limitation: Students must audition and/or interview with the director to participate in this course.  
Advisory: TA 350  
Transferable: CSU; UC  
C-ID: C-ID THTR 191

This course is the second in a series of four courses that provide workshop training in the rehearsal and performance of children's theatre. It is designed for students with basic/minimal theatre experience. Students audition or interview with the director for participation in a children's show. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include acting, singing, dancing, and/or technical rehearsals and preparation.

TAP 362 Children's Theatre Rehearsal and Performance III

Units: 1 - 3  
Hours: 54 - 162 hours LAB  
Course Family: Children's Theatre Performance and Technical Production  
Prerequisite: TAP 361 with a grade of "C" or better  
Enrollment Limitation: Students must audition and/or interview with the director to participate in this course.  
Advisory: TA 350  
Transferable: CSU; UC  
C-ID: C-ID THTR 191

This course is the third in a series of four courses that provide workshop training in the rehearsal and performance of children's theatre. It is designed for students with basic/minimal theatre experience. Students audition or interview with the director for participation in a children's show. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include acting, singing, dancing, and/or technical rehearsals and preparation.

TAP 363 Children's Theatre Rehearsal and Performance IV

Units: 1 - 3  
Hours: 54 - 162 hours LAB  
Course Family: Children's Theatre Performance and Technical Production  
Prerequisite: TAP 362 with a grade of "C" or better  
Enrollment Limitation: Students must audition and/or interview with the director to participate in this course.  
Advisory: TA 350  
Transferable: CSU; UC  
C-ID: C-ID THTR 191

This course is the fourth in a series of four courses that provide workshop training in the rehearsal and performance of children's theatre. It is designed for students with beginning/moderate theatre experience. Students audition or interview with the director for participation in a children's show. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include acting, singing, dancing, and/or technical rehearsals and preparation.
TAP 363 Children's Theatre Rehearsal and Performance IV

Units: 1 - 3
Hours: 54 - 162 hours LAB
Course Family: Children's Theatre Performance and Technical Production
Prerequisite: TAP 362 with a grade of "C" or better
Enrollment Limitation: Students must audition and/or interview with the director to participate in this course.
Advisory: TA 350
Transferable: CSU; UC
C-ID: C-ID THTR 191

This course is the fourth in a series of four courses that provide workshop training in the rehearsal and performance of children's theatre. It is designed for students with intermediate/significant experience. Students interested in technical work interview with the director to participate in this course. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include acting, singing, dancing, and/or technical rehearsals and preparation.

TAP 370 Children's Theatre Technical Production I

Units: 1 - 3
Hours: 54 - 162 hours LAB
Course Family: Children's Theatre Performance and Technical Production
Prerequisite: None.
Enrollment Limitation: Interview
Transferable: CSU; UC
C-ID: C-ID THTR 192

This course is the first in a series of four courses that provide workshop training in the technical production of children's theatre. It provides practical experience, in the children's theatre style, in one of the following areas: scenery, scenic painting, properties, costumes, lighting, sound, video, projections, stage management, house management, box office, publicity, and running crews. It is designed for students who want an introductory experience. Students interested in technical work interview for positions with the technical director. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include technical preparation, activities, rehearsals, and performances.

TAP 371 Children's Theatre Technical Production II

Units: 1 - 3
Hours: 54 - 162 hours LAB
Course Family: Children's Theatre Performance and Technical Production
Prerequisite: TAP 370 with a grade of "C" or better
Enrollment Limitation: Interview
Transferable: CSU; UC
C-ID: C-ID THTR 192

This course is the second in a series of four courses that provide workshop training in the technical production of children's theatre. It provides practical experience, in the children's theatre style, in one of the following areas: scenery, scenic painting, properties, costumes, lighting, sound, video, projections, stage management, house management, box office, publicity, and running crews. It is designed for students with intermediate/moderate experience. Students interested in technical work interview for positions with the technical director. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include technical preparation, activities, rehearsals, and performances.

TAP 372 Children's Theatre Technical Production III

Units: 1 - 3
Hours: 54 - 162 hours LAB
Course Family: Children's Theatre Performance and Technical Production
Prerequisite: TAP 371 with a grade of "C" or better
Enrollment Limitation: Interview
Transferable: CSU; UC
C-ID: C-ID THTR 192

This course is the third in a series of four courses that provide workshop training in the technical production of children's theatre. It provides practical experience, in the children's theatre style, in one of the following areas: scenery, scenic painting, properties, costumes, lighting, sound, video, projections, stage management, house management, box office, publicity, and running crews. It is designed for students with beginning/moderate theatre experience. Students interested in technical work interview for positions with the technical director. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include technical preparation, activities, rehearsals, and performances.

TAP 373 Children's Theatre Technical Production IV

Units: 1 - 3
Hours: 54 - 162 hours LAB
Course Family: Children's Theatre Performance and Technical Production
Prerequisite: TAP 372 with a grade of "C" or better
Enrollment Limitation: Interview
Transferable: CSU; UC
C-ID: C-ID THTR 192

This course is the fourth in a series of four courses that provide workshop training in the technical production of children's theatre. It provides practical experience, in the children's theatre style, in one of the following areas: scenery, scenic painting, properties, costumes, lighting, sound, video, projections, stage management, house management, box office, publicity, and running crews. It is designed for students with intermediate/significant experience. Students interested in technical work interview for positions with the technical director. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include technical preparation, activities, rehearsals, and performances.

TAP 380 Repertory/Touring Rehearsal and Performance I

Units: 1 - 3
Hours: 54 - 162 hours LAB
Course Family: Repertory/Touring Performance and Technical Production
Prerequisite: None.
Enrollment Limitation: Students must audition and/or interview with the director to participate in this course.
Advisory: TA 350
Transferable: CSU; UC
C-ID: C-ID THTR 191

This course is the first in a series of four courses that provide workshop training in the rehearsal and performance of repertory and/or touring theatre. It is designed for students with little or no prior theatre experience. Students audition or interview with the director for participation in a repertory and/or touring theatre production. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include acting, singing, dancing, and/or technical rehearsals and preparation.

TAP 381 Repertory/Touring Rehearsal and Performance II

Units: 1 - 3
Hours: 54 - 162 hours LAB
Course Family: Repertory/Touring Performance and Technical Production
Prerequisite: TAP 380 with a grade of "C" or better
Enrollment Limitation: Students must audition and/or interview with the director to participate in this course.
Advisory: TA 350
Transferable: CSU; UC
C-ID: C-ID THTR 191

This course is the second in a series of four courses that provide workshop training in the rehearsal and performance of repertory and/or
Theatre Arts Performance

This course is the fourth in a series of four courses that provide workshop training in the technical production of repertory and touring theatre. It provides practical experience, in the repertory and touring theatre style, in one of the following areas: scenery, scenic painting, properties, costumes, lighting, sound, video, projections, stage management, house management, box office, publicity, and running crews. It is designed for students who want an introductory experience. Students interested in technical work interview for positions with the technical director. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include technical preparation, activities, rehearsals, and performances.

TAP 499 Experimental Offering in Theatre Arts Performance

Units: 0.5 - 4
Prerequisite: None.

This is the experimental courses description.
Horticulture

ARC’s horticulture department serves professionals, students and members of the community. Horticulture seeks to improve plant culture methods, the sustainability of the environment, enriching economic vitality, and influencing the quality of life of individuals and their communities. Horticulturists have a broad knowledge of ornamental plants, turf grasses, fruit and non-fruit bearing trees, vines, and shrubs. Horticulture is producing the plants, marketing plants and landscape products, designing, installing and maintaining the outdoor and indoor environments where we live, work, and play.

California’s horticulture industry is a multi-billion dollar business that provides opportunities at many different levels for qualified individuals. ARC’s horticulture program prepares students for self-employment, employment, and self-improvement.

Degrees and Certificates Offered

A.S. in Horticulture
A.S. in Landscape Design Technology
Horticulture Certificate
Landscape Design Technology Certificate
Floristry Certificate
Horticulture Skills Certificate
Landscape Design Certificate
Plant Production Certificate
Sustainable Landscaping Certificate

Associate Degrees

A.S. in Horticulture

This degree represents several areas of study in Horticulture: arboriculture, floriculture, landscape horticulture and landscape design, olericulture, pomology, and viticulture. Horticulture is the science, art and skill of plant cultivation and the focus of the program is to prepare horticulturists to work and do research in the many disciplines the industry has to offer. The degree program concentrates on plant identification, landscape design, construction and maintenance, soils and plant nutrition, plant production and marketing, irrigation and water conservation, integrated pest management, and sustainable horticultural practices. Work experience is required.

Total Units: 37.5 - 41

The Horticulture Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- identify and select plant materials that are used for landscapes in the northern California regions.
- analyze a landscape site and create a complete and appropriate landscape design for that site.
- analyze a landscape design and apply the sustainable installation procedures necessary to implement the design.
- assess a landscape and apply the sustainable landscape maintenance operation techniques required.
- assess a soil analysis and apply the appropriate steps to provide for plant health and soil sustainability.
- apply the plant production options to produce landscape nursery stock by sexual and asexual methods.
- diagnose plant pest signs and symptoms.
- formulate a pest management plan using the principles of integrated pest management and recognizing the requirements for licensing or certification.
- formulate a marketing plan for a retail nursery and apply the techniques for selling plants and related products.
- utilize the sustainable methods of plant growth and production for ornamental and edible plant materials.
- identify and then apply safe operating procedures and practices to all horticultural operations.
- safely and efficiently operate pesticide application equipment.

Career Information

Horticulturists find careers in landscape horticulture, which includes the production, marketing and maintenance of landscape plants, as well as the landscape design/build industry, which includes design, construction, and maintenance of outdoor and interior landscapes. Graduates can find careers in the nursery industry, which includes plant production and retail garden centers, and the landscape construction and maintenance industry. Opportunities are with industry, government, education and research, and self employment.
A.S. in Landscape Design Technology

This degree is a bi-disciplinary study of horticulture resources and design fundamentals. It includes an in-depth study of plant materials, irrigation, landscape design, and site planning. Topics such as landscape computer-aided design, surveying, and construction measurement techniques, are also covered.

**Total Units:** **34**

The Landscape Design Technology Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- select plant materials that are used for landscapes.
- solve landscape design problems.
- analyze typical landscape design projects using the design process.
- communicate landscape design solutions effectively.

Career Information

Landscape architects and landscape architect technicians are responsible for the overall design and detailed drawings of a wide range of projects in outdoor spaces including commercial and residential developments, parks and recreation areas, as well as master plans for the management of forested lands. Employment of landscape architects and landscape architect technicians is expected to increase as a result of the increasing emphasis on sustainability land development and design.

Certificates of Achievement

Certificates

Floristry Certificate

The Floristry certificate provides well-balanced training in the fundamentals of floral design, the identification of flowers and foliage, the care of fresh cut product and the sources of floral materials. Courses cover special event floral design such as weddings, funerals and holidays, and prepare students to participate in the varied floral enterprises.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- identify floral specimens used in commercial floristry by scientific name and availability
- assess and utilize floral materials and design to create a visually appealing and salable arrangement
- demonstrate methods in the care and merchandising of floral materials
- resource and purchase floral materials
- apply the distinctive marketing skills for both the retail and mass market in the floral industry

Career Information

Completion of the certificate provides satisfactory qualification for employment in retail and mass market floristry industries. The program also is a means to upgrade skills of those already working in the industry.

Horticulture Skills Certificate

This certificate provides individuals with a basic horticulture background and specific experience in landscape installation and plant production. Integrated Pest Management (IPM) skills can be adapted to the needs of each of these horticulture industries.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- diagnose plant pest signs and symptoms.
- formulate a pest management plan using the principles of Integrated Pest Management (IPM).
- recognize basic botanical structure and functions and how plants relate to the environment.
- demonstrate the hands-on skills used in plant propagation including seed and vegetative techniques.
- assess and implement hands-on skills of construction operations, such as using wood, pavers, irrigation components, and sustainable soil preparation and grading.
Horticulture

Career Information
This certificate helps individuals, new to or already in the field, market themselves to both landscape and plant production horticulture fields.

Landscape Design Certificate
This certificate provides individuals with a basic horticulture background and a broad experience in landscape design, including landscape Computer-Assisted Design and Drafting (CADD).

Certificate Requirements

Total Units: 15

Student Learning Outcomes
Upon completion of this program, the student will be able to:

• identify and comply with the state water regulations that affect landscaping.

Career Information
Career opportunities exist with design firms and landscape contractors.

Plant Production Certificate
This certificate provides individuals with a basic horticulture background and specific experience in landscape plant production, marketing and sales, facilities, Integrated Pest Management (IPM) skills, and license or certificates requirements.

Total Units: 11

Student Learning Outcomes
Upon completion of this program, the student will be able to:

• recognize basic botanical structure and functions and how plants relate to the environment
• propagate plants, including seed and vegetative techniques
• diagnose plant pests and symptoms
• apply the basic practices involved in commercial nursery operations
• identify the different display techniques and advertising practices used in the nursery industry
• recognize the basic principles of pest control and the requirements for licensing and/or certification

Career Information
Career opportunities exist with plant researchers, wholesale nurseries, and retail nurseries.

Sustainable Landscaping Certificate
This certificate provides students with a basic horticulture background and specific experience in sustainable landscape installation and maintenance, including the use of sustainable principles and practices.

Total Units: 14

Student Learning Outcomes
Upon completion of this program, the student will be able to:

• recognize basic botanical structure and functions and how plants relate to the environment
• assess and implement hands-on skills of construction operations, such as using wood, pavers, irrigation components, and sustainable soil preparation and grading.
• recognize and comply with the state water regulations that affect landscaping.
• assess and implement the hands-on skills of sustainable landscape management and their techniques.
• utilize irrigation water auditing techniques and select equipment to correctly irrigate, schedule, and conserve water in the landscape.
• compare and contrast conventional and sustainable landscape methods.
• evaluate existing landscapes to enable maintenance with ecologically sustainable practices.
• evaluate sustainable products and methods for use in the landscape.
• demonstrate proper pruning of a plant.
• demonstrate proper techniques of planting and transplanting.
- select a proper plant for a given situation.
- recognize and identify 150 plant species and/or varieties utilizing taxonomic plant key techniques.
- employ the basic principles of irrigation design.

Career Information
Career opportunities include positions with landscape construction and maintenance firms, as well as within the public sector at various levels including cities, counties and state levels.

Horticulture (HORT) Courses

HORT 100 Integrated Pest Management in the Landscape
Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: None.
Corequisite: HORT 300
This course is a study of local plant pests including weeds, diseases, invertebrates, and vertebrates. It includes recognition of symptoms and causes, life cycle of the pests, host and habitat relationships, and methods of control.

HORT 105 Pest Control Licensing or Certification
Units: 2
Hours: 36 hours LEC
Prerequisite: HORT 300 with a grade of "C" or better
Advisory: HORT 100
This course introduces the safe and proper use of horticultural chemicals, laws and regulations, and the Integrated Pest Management (IPM) principles involved. It covers the laws and regulations for operators, applicators, and advisors, including the study of weeds, diseases, insects, and accepted standards for control.

HORT 110 Irrigation Design
Units: 2
Hours: 36 hours LEC
Prerequisite: HORT 300 with a grade of "C" or better
This course is a study of water hydraulics and irrigation equipment including drip lines, heads, pipes, irrigation controllers, and valves. Topics include irrigation design, preparing plans, dealing with measurement, head layout, pipe sizing and California’s Model Water Efficient Landscape Ordinance.

HORT 140 Advanced Student Projects
Units: 2
Hours: 108 hours LAB
Prerequisite: HORT 300 with a grade of "C" or better; A minimum of 5 units completed in coursework related to the students selected project.
Advisory: HORT 100, 110, 302, 305, 306, 312, 316, 320, 324, or 326 with a grade of "C" or better
This course provides the student with an opportunity to pursue advanced projects which are selected by the student with required department approval.

HORT 143 Horticulture Skills Development
Units: 1
Hours: 54 hours LAB

HORT 200 Introduction to Retail Floristry
Units: 2
Hours: 18 hours LEC; 54 hours LAB
Prerequisite: None.
Corequisite: Completion or current enrollment in a college level horticulture class.
This course offers the opportunity to develop technical, creative, and business skills learned in other horticulture courses. Participation in assigned, supervised projects to expand and enhance knowledge of horticulture practices is included.

HORT 201 Floral Design
Units: 2
Hours: 18 hours LEC; 54 hours LAB
Prerequisite: None.
This course presents the theories and techniques of basic/intermediate floral design. Identification of wholesale sources, origin of product, and seasonal price fluctuations in the industry and market are discussed. This course emphasizes design techniques including line, shape, and form. Field trips may be required.

HORT 202 Corsage and Wedding Floral Design
Units: 2
Hours: 18 hours LEC; 54 hours LAB
Prerequisite: None.
This course presents the history and uses of wedding and body flower designs. The principles, methods, and practices used to create wedding bouquets and arrangements are explored and practiced. The techniques for wiring, taping, and gluing corsages, and the tools and materials for creating them and other body flower designs, are taught and practiced. Field trips may be required.

HORT 203 Sympathy Design and the Mass Market
Units: 2
Hours: 18 hours LEC; 54 hours LAB
Prerequisite: None.
This course presents the theories of sympathy and tribute floral design. Design applications for standing, flat sprays, set work, and casket covers are included, as well as their delivery and setup. The mass marketplace in floral design is explored.

HORT 208 Interior Plants
Units: 2
Hours: 18 hours LEC; 54 hours LAB
Prerequisite: None.
This course examines the indoor plant maintenance business as well as interior plant care for retail use. It includes plant identification and selection, location and design practices, care and maintenance, as well as purchasing and sales aspects. Field trips may be required.

HORT 298 Work Experience in Horticulture
Units: 0.5 - 4
Hours: 30 - 300 hours LAB
**Prerequisite:** None.

**Enrollment Limitation:** Students must be in a paid or unpaid internship, volunteer position, or job related to the horticulture field with a cooperating site supervisor. Students are advised to consult with the Horticulture Department faculty to review specific certificate and degree work experience requirements.

**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.

**General Education:** AA/AS Area III(b)

This course provides students with opportunities to develop marketable skills in preparation for employment or advancement within the field of horticulture. It is designed for students interested in work experience and/or internships in associate degree level or certificate occupational programs. Course content includes understanding the application of education to the workplace, completion of Title 5 required forms which document the student’s progress and hours spent at the work site, and developing workplace skills and competencies.

During the semester, the student is required to complete 37.5 hours of related paid work experience, or 30 hours of related unpaid work experience for 0.5 unit. An additional 37.5 or 30 hours of related work experience is required for each additional 0.5 units. All students are required to attend the first class meeting, a mid-semester meeting, and a final meeting. Additionally, students who have not already successfully completed a Work Experience course will be required to attend weekly orientations while returning participants may meet individually with the instructor as needed. Students may take up to 16 units total across all Work Experience course offerings. This course may be taken up to four times when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

**HORT 299 Experimental Offering in Horticulture**

**Units:** 0.5 - 4  
**Prerequisite:** None.

This is the experimental courses description.

**HORT 300 Introduction to Horticulture**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Transferable:** CSU  
**General Education:** AA/AS Area IV

Designed to inform those seeking a career in horticulture, this course surveys sustainable principles and practices of horticulture. Emphasis is on plant growth, care and appearance, and how those are influenced by plant structure, function, and growing environment. Topics include plant naming, growing conditions and processes, cultural practices, propagation, pruning, careers in horticulture, pest problems and control, and use of references for future learning.

**HORT 302 Soils, Soil Management, and Plant Nutrition**

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Prerequisite:** None.  
**Corequisite:** HORT 300  
**Transferable:** CSU; UC

This course is a study of the nature and properties of soils and their relationship to plant needs. Topics include soil origins and importance, soil and water conservation, life in the soil, and soil fertility. Soil components, structure, and methods to sustain healthy soils and the populations of organisms within and on it are analyzed.

**HORT 305 Plant Identification-Fall Selections**

**Units:** 3

**Prerequisite:** HORT 300 with a grade of "C" or better  
**Corequisite:** HORT 300  
**Transferable:** CSU; UC (UC credit limitation: HORT 305 & 306 combined: maximum credit - one course)

This course is the study of the identification, growth habits, culturally sustainable methods, and uses of ornamental woody and herbaceous plants in the California landscape. Emphasis is on those plants best observed in the fall season and includes both native and non-native species as well as some plants with an edible use component.

**HORT 306 Plant Identification-Spring Selections**

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Prerequisite:** None.  
**Corequisite:** HORT 300  
**Transferable:** CSU; UC (UC credit limitation: HORT 305 & 306 combined: maximum credit - one course)

This course is the study of the identification, growth habits, culturally sustainable methods, and uses of ornamental woody and herbaceous plants in the California landscape. Emphasis is on those plants best observed in the spring and summer seasons and includes both native and non-native species as well as some plants with an edible use component.

**HORT 308 Viticulture-Vineyard Establishment**

**Units:** 1  
**Hours:** 18 hours LEC  
**Prerequisite:** None.  
**Transferable:** CSU

This course is an introduction to grape crops for Sacramento and Placer counties. It covers the history and principles of the grape growing industry in California. Topics include site preparation, vine and rootstock selection, trellis and irrigation system selection, installation procedures, and vine training. Field trips may be required.

**HORT 309 Viticulture - Sustainable Vineyard Management**

**Units:** 1  
**Hours:** 18 hours LEC  
**Prerequisite:** None.  
**Transferable:** CSU

This course covers sustainable management of vineyards, large and small, to serve the needs of owners while maintaining the environment. Topics include vine growth, fruit development, irrigation, pruning systems and canopy management, grapes as a wildlife habitat, management of the vineyard floor, pest identification and control, and vineyard laws and ordinances. Field trips may be required.

**HORT 312 Plant Propagation**

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Prerequisite:** HORT 300 with a grade of "C" or better  
**Transferable:** CSU

This course is a study of the fundamental principles involved in propagating plants, with special emphasis on types of propagules and techniques utilized to make more plants. Topics include history of plant propagation, tools and facilities, seed and vegetative propagation, media selection, growing propagules on, and sales of plants produced.
HORT 316 Plant Production, Facilities and Sales

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: None.
Corequisite: HORT 300
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.
Transferable: CSU

This course is an overview of the practices and facilities used in production and sales of plants and related products and services. Topics include design and use of structures for horticultural production and sales, product selection and maintenance, marketing and sales of horticultural crops and services, employee management, vendor selection, sales area design and layout, advertising, merchandising, and customer service.

HORT 320 Sustainable Landscape Construction

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: HORT 300 with a grade of "C" or better
Transferable: CSU

This course covers the theory and skills needed in the landscape construction industry. Landscape operations include carpentry, masonry, concrete pavers, water-conserving irrigation, watershed preservation and drainage, low-voltage lighting, sustainable soil preparation and drainage, plant materials/turf, plan reading, and estimating and bidding in the landscape trades.

HORT 321 Sustainable and Ecolandscape Practices

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Transferable: CSU

This course covers the application of ecologically sustainable design, construction, and maintenance practices for urban landscapes. Topics present a holistic approach to landscaping including, but not limited to, water conservation, green waste reduction, reduced chemical and inorganic fertilizer use, and the enhancement of natural ecosystems. Field trips may be required.

HORT 322 Landscape and Irrigation Graphics and Design

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: HORT 300 with a grade of "C" or better
Transferable: CSU; UC

This course is the study of technical drafting skills and freehand graphics, including line quality, lettering, and organization of the design space as it relates to landscape and irrigation design. It includes hand drafting techniques, plant database software, introduction to Computer Aided-Design (CADD) software options for landscape, and the use of a variety of graphics skills and media. Irrigation design for landscapes studies water hydraulics, irrigation equipment, including irrigation heads, pipes, pumps, controllers and valves, and water conservation. The course includes preparing landscape and irrigation plans, plan presentation, and reprographics.

HORT 324 Sustainable Landscape Maintenance

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: HORT 300 with a grade of "C" or better
Transferable: CSU

This course is a study of sustainable landscape maintenance and management of exterior and interior residential and commercial landscapes, parks, highways, and public buildings. Topics include planting and transplanting, pruning, water conservation and use, sustainable plant nutrition and soils management, integrated pest management, and the safe operation and maintenance of power equipment for the trade. Field trips may be required.

HORT 326 Landscape Design

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: HORT 322 with a grade of "C" or better
Advisory: HORT 110, 305, and 306
Transferable: CSU

This course is a study of the basic principles and elements of landscape design related to the problem-solving process, design theory and composition, functional and design uses of landscape materials, and client and maintenance criteria.

HORT 327 Advanced Landscape Design

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: HORT 322 with a grade of "C" or better
Transferable: CSU

This course is the study of the advanced and in-depth principles of custom residential landscape design related to proposal writing, site analysis, design development and construction document preparation. Further exploration of design composition is studied as well as the development of spaces and the use of materials based upon a client's program desires.

HORT 329 Landscape CAD Design

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: HORT 322 with a grade of "C" or better
Advisory: DESGN 301
Transferable: CSU

This course is an introduction to computer-aided landscape design and drafting utilizing Computer Aided Drafting and Design (CADD) software to produce professional quality landscape designs for residential and commercial sites. It emphasizes site-plan development, landscape planting, irrigation and detail plans, and the generation of materials lists based on the design created for the site.

HORT 330 Small Gas Engines, Outdoor Power Equipment

Same As: AT 301
Units: 4
Hours: 54 hours LEC; 54 hours LAB
Prerequisite: None.
Transferable: CSU

This course covers the basic operational theory, servicing, adjusting, and maintenance of 2-cycle and 4-cycle small gas engines as they pertain to the automotive and horticulture industries. In addition, the small engine repair skill areas included in the regional, state, and national Skills USA competitions are covered. AT 301 and/or HORT 330 may be taken two times for credit for a maximum of 8 units, using different equipment.

HORT 495 Independent Studies in Horticulture

Units: 1 - 3
Hours: 54 - 162 hours LAB
Prerequisite: None.
Transferable: CSU

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

HORT 499 Experimental Offering in Horticulture

Units: 0.5 - 4
Prerequisite: None.
Transferable: CSU

This is the experimental courses description.
Welding Technology

The ARC Welding Technology department offers students the opportunity to pursue an Associates in Science degree or several certificates. The department is committed to preparing students for success in an exciting, in-demand career field. Our faculty have decades of industry experience. They work closely with local employers and our partners with the American Welding Society (https://www.aws.org/) to ensure that you will gain the skills and training to have a successful career.

Degrees and Certificates Offered

A.S. in Welding Technology
Shielded Metal Arc Plate and Pipe Certificate
Welding Metallurgy and Inspection (270 hours) Certificate
Welding Technology Certificate
Gas Metal Arc and Flux Core Arc Welding Plate (252 hours) Certificate
Gas Tungsten Arc Plate and Pipe Welding (180 hours) Certificate
Pipe Welding Certificate
Welding Equipment Maintenance and Blueprint Interpretation (234 hours) Certificate

Dean Gary Aguilar
Department Chair Chris Messier
Phone (916) 484-8588

Associate Degree

A.S. in Welding Technology

The Welding Technology degree provides skills and knowledge in manual and semi-automatic welding processes used in the metal fabrication and construction industries. Instruction covers materials, equipment, procedures, testing techniques as well as safety and blueprint reading. Competencies include techniques of joining ferrous and non-ferrous metals by the use of Shielded Metal Arc Welding (SMAW), Gas Metal Arc Welding (GMAW), Flux Cored Arc Welding (FCAW), and Gas Tungsten Arc Welding (GTAW), and welding procedures.

Career Information

Welding certification is recognized by the welding industry as an important step in the profession. The American Welding Society (AWS) nationally accredits American River College’s welding program. The ARC welding program has met all the requirements of the AWS QC4 standards for Accreditation of Test Facilities for their Certified Welder Program. Graduating students may find positions in oil refineries, nuclear power plants, aerospace, structural buildings, bridge construction, auto industry, and small commercial fabricating shops.

Course Code Course Title Units
WELD 140 Mathematics for Welding Technicians 3
WELD 300 Introduction to Welding 3
WELD 302 Introduction to Welding Metallurgy 3
WELD 316 Welding Inspection 2
WELD 320 Shielded Metal Arc Welding Structural 3
WELD 322 Shielded Metal Arc Welding (Pipe) 3
WELD 330 Gas Tungsten Arc Welding (Plate) 3
WELD 332 Gas Tungsten Arc Welding (Pipe) 3
WELD 333 Gas Metal Arc Welding, Steel 3
WELD 334 Gas Metal Arc Welding: Ferrous and Non-Ferrous Metals 2
WELD 335 Flux Core Arc Welding 3
WELD 342 Symbol Reading, Layout and Fabrication 3
WELD 155 Industry Training (3) 0.5 - 41
or WELD 115 Code Welding (2)
or WELD 298 Work Experience in Welding (0.5 -4)

Total Units: 34.5 - 38

1 A minimum of 1 unit from the following courses.

Certificates of Achievement

Shielded Metal Arc Plate and Pipe Certificate

This certificate promotes competence in plate and pipe welding. Emphasis is on power sources, electrode selection on various joint designs, techniques, and positions in welding. Instruction includes safety and proper procedures in making fillet and groove welds that are in compliance with structural and pipe welding codes.

Certificate Requirements

Total Units: 9

The Welding Technology Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- select the correct electrode classification and parameters for various thickness of material and welding positions on ferrous and nonferrous metals.
- define principles of GMAW.
- interpret GMAW electrode and classification and specification.
- describe GMAW welding operations of various joint designs using selected electrodes on different positions.
- describe SMAW operations of various positions using selected electrodes on different joint designs.
- define principles of arc welding.
- select correct electrode amperage settings for the job application.
- identify GTAW principles and safe welding practices.
- define GTAW applications and limitations.
- explain the reason for the formation of each discontinuity type, and distinguish different discontinuities.
- interpret fabrications using a systematic process.
- interpret graphic welding symbols.
- relate the requirements for welding ferrous and nonferrous metals.
- select the appropriate setting and application methods.
- list the methods used for discontinuity prevention and identify surface defects in welds.

Degree Requirements

Course Code Course Title Units
WELD 155 Industry Training (3) 0.5 - 41
or WELD 115 Code Welding (2)
or WELD 298 Work Experience in Welding (0.5 -4)

Total Units: 34.5 - 38

1 A minimum of 1 unit from the following courses.
Student Learning Outcomes

Upon completion of this program, the student will be able to:

- interpret electrode classification and specification
- select correct amperage setting for the job application
- define principles of arc welding
- certify and perform SMA operations in various positions using selected electrodes on different joint designs

Welding Metallurgy and Inspection (270 hours) Certificate

The Welding Metallurgy and Inspection certificate provides the science of metallurgy and weld inspection. Emphasis is on the identification and selection of irons and steel, mechanical and physical properties of metals and crystal structures of metals, rules and regulations of the welding construction industry, and principles, requirements and methods of inspection.

Certificate Requirements

</tbody>
</table>

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- Describe the mechanical properties of different types of metals
- Interpret and explain the Nondestructive Testing (NDT) procedures of codes and specifications relating to welding
- Evaluate and explain in simple terms the reason for the formation of discontinuity in each of the welding processes
- Explain different methods used for the prevention of weld discontinuities
- Describe the crystalline structures of metals and explain how grain forms in metal
- Explain the problems hydrogen causes when welding steel
- Analyze phase diagrams of carbon and stainless steels

Welding Technology Certificate

This certificate provides skills and knowledge in manual and semi-automatic welding processes used in the metal fabrication and construction industries. Instruction covers materials, equipment, welding procedures, testing techniques, inspection, welding metallurgy, blueprint reading, and welding safety. Competencies include techniques of joining ferrous and non-ferrous metals by the use of Shielded Metal Arc Welding (SMAW), Gas Metal Arc Welding (GMAW), Flux Cored Arc Welding (FCAW), and Gas Tungsten Arc Welding (GTAW). Oxyacetylene welding, oxyacetylene cutting and plasma arc cutting, are also covered.

Career Information

Graduates may find employment in a number of industries including; pipe line construction, oil refining, aerospace, structural building, bridge construction, automotive, and small commercial fabricating. They may also work as welding shop supervisors and welding sales persons, and they can also become welding shop owners.
Certificates

Gas Metal Arc and Flux Core Arc Welding Plate (252 hours) Certificate

The Gas Metal Arc Welding certificate promotes competence in welding with different types of metal transfer, constant voltage power sources, different types of shielding gases, and electrode selection on various joint designs. Instruction is provided in gas metal and flux cored arc welding on fillet and groove welds to specific structural and pipe standards.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- select the correct electrode classification and parameters for various thicknesses of material and welding positions on ferrous and nonferrous metals
- define principles of gas metal arc welding
- interpret electrode classification and specification
- analyze gas metal arc welding operations on various joint designs using selected electrodes for different welding positions

Gas Tungsten Arc Plate and Pipe Welding (180 hours) Certificate

The Gas Tungsten Arc Welding certificate promotes competence in welding ferrous and nonferrous materials. Emphasis is on proper use of gas tungsten arc welding (GTA) equipment setup requirements, process variables, material requirements, and welding procedures that are in compliance with industry standards.

<td></td>
<td>9</td>
</tr>
</tbody>
</table>

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- identify GTA principles and safe practices.
- define GTA applications and limitations.
- weld mild steel, stainless steel, and aluminum alloys using GTA procedures in all positions.
- evaluate and demonstrate procedures for a given welding project or application.
- relate the requirements of welding ferrous and nonferrous materials.
- select the appropriate settings and applications methods of GTA process.

Pipe Welding Certificate

This certificate promotes competence in pipe welding with emphasis on power sources, electrode/filler metal selection on various joint designs, techniques, and positions for welding. Instruction includes safety, math, and proper procedures in making fillet and groove welds that are in compliance with structural and pipe welding codes.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- interpret electrode and filler metal classifications and specifications.
- select correct amperage setting for the job application.
- define principles of arc welding.
- perform Shielded Metal Arc Welding and Gas Tungsten Arc Welding operations in various positions using selected electrodes on different joint designs.
- use math in welding applications.

Career Information

Certificate completers may find employment in a number of industries, including PG&E pipeline construction, oil refining, power generation, structural building, bridge construction, and small commercial fabricating shops.

Welding Equipment Maintenance and Blueprint Interpretation (234 hours) Certificate

This certificate promotes competence in solving equipment, mathematical and manufacturing problems that apply to the welding trade. It emphasizes metal placement, measurement, and layout of tools used in construction, as well as the fundamentals of blueprint reading and welding equipment repair.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- evaluate algebraic expressions by substituting given numbers for letter values
- solve formulas by substituting numbers for letters, analyzing word statements and diagram values
- compute the area, radius, and diameter of a circle
• compute area, radius, and central angles of a sector
• measure angles in degrees, minutes, and seconds
• identify and demonstrate the proper use of common power tools and accessories used in the welding trade
• interpret fabrication blueprints using a systematic process
• interpret graphic welding symbols
• interpret electrical and electronically controlled circuits
• evaluate testing equipment used for welding maintenance repair

**Welding (WELD) Courses**

**WELD 105 Introduction to Metal Sculpture**

**Units:** 1.5
**Hours:** 18 hours LEC; 27 hours LAB
**Prerequisite:** None.

This course covers metal sculpture techniques, design principles, and materials used for sculpture for functional and nonfunctional art forms, on ferrous and non-ferrous metals. Techniques on the major welding processes such as Shielded Metal Arc, Gas Metal Arc, Gas Tungsten Arc, and Oxy-Acetylene are an integral part of the course, as well as related safety issues.

**WELD 107 Welding Equipment Maintenance**

**Units:** 3
**Hours:** 36 hours LEC; 54 hours LAB
**Prerequisite:** None.

This course covers the basics of welding equipment maintenance, troubleshooting, and repair. Electrical and electronically controlled circuits are discussed and tested. Overall theory of operation and safety are presented, as well as maintenance scheduling and the use of electronic test equipment and other measuring devices. Field trips may be required.

**WELD 115 Code Welding**

**Units:** 2
**Hours:** 18 hours LEC; 54 hours LAB
**Prerequisite:** WELD 300 with a "C" grade or better, or a minimum of one year of welding experience.

This course provides individualized training for welder performance qualification. Code and test requirements are presented. Welders select the code, metal, process, and positions to be used. Preparation for competing in the SkillsUSA regional, state, and national competition is also covered. This course may be taken up to four times for credit with different competions. A field trip and participation at the site of the SkillsUSA regional competition are required.

**WELD 117 Ultrasonic Testing Level One**

**Units:** 3
**Hours:** 45 hours LEC; 27 hours LAB
**Prerequisite:** None.
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.

This course covers the theory, technique, application, and evaluation used in the material processing, welding, and inspection industries. Ultrasonic testing as applied to industry practices, such as building construction, aeronautics, shipbuilding, materials fabrication, and others, is covered. Successful completion of this course certifies that the requirements of the American Society of Nondestructive Testing (ASNT) TC-1A for UT level I are met.

**WELD 118 Ultrasonic Testing Level Two**

**Units:** 3
**Hours:** 45 hours LEC; 27 hours LAB
**Prerequisite:** WELD 117 with a "C" or better, or evidence of completion of UT Level I certification.
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; or ESLW 340.

This course covers advanced theory, technique application, and evaluation techniques used in the material processing, welding, and inspection industries. It covers advanced ultrasonic testing as applied to industry practices such as building construction, aeronautics, shipbuilding, and materials fabrication. Successful completion of this course meets the requirements of the American Society of Nondestructive Testing (ASNT) TC1-A for Ultrasonic Testing Level II.

**WELD 140 Mathematics for Welding Technicians**

**Units:** 3
**Hours:** 54 hours LEC
**Prerequisite:** None.
**General Education:** AA/AS Area II(b)

This course covers the application of mathematics principles in technical and trade work. Areas covered are fundamentals of general mathematics, common fractions, decimal fractions, percent, signed numbers, measurements, customary measurement units, metric measurement units, steel rules and vernier calipers, fundamentals of algebra, basic algebraic operations, fundamentals of plane geometry, triangles, polygons, circles, areas, volumes, and fundamentals of trigonometry.

**WELD 150 Employability Skills for Technical Careers**

**Same As:** AT 107 and ET 250
**Units:** 2
**Hours:** 36 hours LEC
**Prerequisite:** None.
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.
**General Education:** AA/AS Area III(b)

This course provides the opportunity to explore technical careers while developing valuable work and life skills. It is an introduction to a variety of technically-related occupations, emphasizing technical careers in the Sacramento area. Activities are designed to enhance personal development, employability skills, and self esteem through leadership, citizenship, and character development. This course is not open to students who have completed AT 107 or ET 250.

**WELD 155 Industry Training**

**Units:** 3
**Hours:** 36 hours LEC; 54 hours LAB
**Prerequisite:** None.

This course covers welding processes, knowledge, and skills specific to employers' needs. Workplace safety and etiquette are included. Metal fabrication skills for specific employment needs and welding certification testing are covered if requested by employers.

**WELD 294 Topics in Welding**

**Units:** 0.5 - 5
**Hours:** 9 hours LEC; 27 - 270 hours LAB
**Prerequisite:** None.

This course provides an opportunity to study current topics in welding technology that are not included in existing courses.
WELD 295 Independent Studies in Welding
Units: 1 - 3
Prerequisite: None.

WELD 298 Work Experience in Welding
Units: 0.5 - 4
Hours: 30 - 300 hours LAB
Prerequisite: None.
Enrollment Limitation: Students must be in a paid or unpaid internship, volunteer position, or job related to the welding field with a cooperating site supervisor. Students are advised to consult with the Welding Department faculty to review specific certificate and degree work experience requirements.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.
General Education: AA/AS Area III(b)
This course provides students with opportunities to develop marketable skills in preparation for employment or advancement within the welding field. It is designed for students interested in work experience and/or internships in associate degree level or certificate occupational programs. Course content includes understanding the application of education to the workforce, completion of Title 5 required forms which document the student's progress and hours spent at the work site, and developing workplace skills and competencies.
During the semester, the student is required to complete 37.5 hours of related paid work experience, or 30 hours of related unpaid work experience for 0.5 unit. An additional 37.5 or 30 hours of related work experience is required for each additional 0.5 units. All students are required to attend the first class meeting, a mid-semester meeting, and a final meeting. Additionally, students who have not already successfully completed a Work Experience course will be required to attend weekly orientations while returning participants may meet individually with the instructor as needed. Students may take up to 16 units total across all Work Experience course offerings. This course may be taken up to four times when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

WELD 299 Experimental Offering in Welding
Units: 0.5 - 4
Prerequisite: None.
This is the experimental courses description.

WELD 300 Introduction to Welding
Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: None.
Transferable: CSU
This course is an introduction to welding processes, including shielded metal arc, gas metal arc, flux-cored gas shield and self shield, gas tungsten arc, oxyacetylene cutting and welding on joint designs, and positions used in industry. Safety in arc welding, oxyacetylene, and plasma cutting is also covered. Field trips may be required.

WELD 302 Introduction to Welding Metallurgy
Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: None.
Corequisite: WELD 300
Transferable: CSU
This course provides a general overview of basic metallurgy of ferrous and non-ferrous metals. Topics include various steel making processes, different types of furnaces, identifying types of steels, and their mechanical, physical, chemical, and electrical properties. Crystal structures of metals, the iron equilibrium diagram, the periodic table of elements emphasizing those elements associated with steels, metallurgical failure of welds, steel deformation, and heat treatment of steels are also covered. In addition, material hardness using different hardness testing methods, calculation of different steel strengths and stresses, and impact tests using the Charpy and Izod methods are covered. Field trips may be required.

WELD 316 Welding Inspection
Units: 2
Hours: 36 hours LEC
Prerequisite: WELD 300 with a grade of “C” or better; OR at least one year of welding experience.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; or ESLW 340.
Transferable: CSU
This course covers the welding requirements for any type of welded structure made from commonly used carbon and low-alloy steel construction. Topics include the welding construction industry, rules, regulations, and the principles, requirements, and methods of inspection. It covers weld measurements and discontinuities for evaluation acceptance using a variety of tools. It also emphasizes the lines of communication between the plant managers, welders, welding engineers, design/project engineers, welding foreman/supervisors, shop or field superintendents, and reporting supervisors. This course offers preparation for the Certified Welding Inspector Examination given by the American Welding Society.

WELD 320 Shielded Metal Arc Welding Structural
Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: WELD 300 with a grade of “C” or better; OR at least one year of welding experience.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; or ESLW 340.
Transferable: CSU
This course covers employment training for welding technicians. It emphasizes developing manipulative proficiency in the use of Shielded Metal Arc Welding (SMAW) in the horizontal (2F-2G), vertical (3F-3G), and overhead (4F-4G) positions on steel. It also covers filler metal classifications, welding power supplies, and welding safety. Welding test plates in accordance with the requirements to AWS D1.1 Structural Welding Code and AWS D1.5 Bridge Code are also covered.

WELD 322 Shielded Metal Arc Welding (Pipe)
Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: WELD 320 with a grade of “C” or better; OR a minimum of 2 years of welding experience.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; or ESLW 340.
Transferable: CSU
This course covers the applications of shielded metal arc welding used to join low-pressure piping systems that carry water and residential natural gas. Topics include: welding required for high pressure critical piping systems such as steam pipe, fuel transportation line, boilers, offshore oil-ribs, and other critical heavy-duty piping systems.

WELD 330 Gas Tungsten Arc Welding (Plate)
Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: WELD 300 with a grade of “C” or better; OR at least one year of welding experience.
This course covers Gas Tungsten Arc Welding (GTAW) of aluminum, stainless steel, carbon steel, and other metals used in industry. This course content is relevant to code welding in accordance with the American Society of Mechanical Engineers Section 1X (ASME), the Structural Welding Code D1.1 (AWS), and the American Petroleum Institute 1104 (API). It also covers filler metal selection, both specifications and classifications, shielding gases, welding power supplies, and welding safety. Certification and procedure qualification to code specifications are also covered.

WELD 332 Gas Tungsten Arc Welding (Pipe)

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: WELD 330 with a grade of “C” or better; OR a minimum of two years of welding experience.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.
Transferable: CSU

This course covers the application of low-pressure and high-pressure critical piping systems used in oil, gas, nuclear, and chemical industries. It covers Gas Tungsten Arc Welding (GTAW) of aluminum pipe, stainless steel pipe, and carbon steel pipe. It explores code welding in accordance with the American Society of Mechanical Engineers Section 1X (ASME), Structural Welding Code D1.1 (AWS), and American Petroleum Institute 1104 (API). Certification and procedure qualification to ASME Section 1X, AWS D1.1, API 1104 code specifications are also covered.

WELD 333 Gas Metal Arc Welding, Steel

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: WELD 300 with a grade of “C” or better, or a minimum of one year of welding experience.
Transferable: CSU

This course is the study of welding using the Gas Metal Arc Welding (GMAW) process on carbon steels in accordance with the American Welding Society (AWS), Structural welding Code D1.1, and Sheet Steel Code D1.3. It covers semi-automatic wire-feed welding with micro wires on steel plates of varying thicknesses. It also covers joint design and all welding positions, welding power supplies, types of metal transfer (spray, globular, pulsed-arc, and short circuit), filler metal selection, both specifications and classifications, shielding gases used for each type of transfer, and welding safety.

WELD 334 Gas Metal Arc Welding: Ferrous and Non-Ferrous Metals

Units: 2
Hours: 18 hours LEC; 54 hours LAB
Prerequisite: WELD 333 with a grade of “C” or better
Advisory: Eligible for ENGRD 310 or ENGRD 312 and ENGWR 300; OR ESLW 340.
Transferable: CSU

This course covers semiautomatic wire feed welding using micro wires on aluminum and stainless steel plates of varying thickness. Joint design, gas variations and all welding positions are covered. The emphasis of this course is on code welding aluminum and stainless steels. The content of this course is relevant to code welding in accordance with the American Welding Society (AWS), Structural Aluminum Welding Code D1.2 and Structural Welding Stainless Steel Code D1.6. It also covers welding power supplies, types of metal transfer (spray, globular, pulsed-arc, and short circuit). This course also covers filler metal selection, both specifications and classifications, and shielding gases used for each type of transfer. Welding safety is also covered.

WELD 335 Flux Core Arc Welding

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: WELD 300 with a grade of “C” or better, or a minimum of one year of welding experience.
Transferable: CSU

This course provides training to develop semi-automatic welding skills on carbon steels. Topics include small and large diameter flux cored electrodes, with and without external shielding gas, in all positions on fillet and groove welds. It also provides a thorough technical understanding of the Flux Core Arc Welding process and arc welding safety.

WELD 342 Symbol Reading, Layout and Fabrication

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: None.
Corequisite: WELD 300
Transferable: CSU

This course covers blueprint and welding symbol interpretation. It includes metal layout, measurement, marking, and layout tools used in construction, and techniques of fabrication and assembly methods. It also covers fundamentals of blueprint reading, including basic lines and views, dimensions, notes and specifications, structural shapes, sections, detail, and assembly.

WELD 495 Independent Studies in Welding

Units: 1 - 3
Prerequisite: None.
Transferable: CSU

WELD 499 Experimental Offering in Welding

Units: 0.5 - 4
Prerequisite: None.
Transferable: CSU

This is the experimental courses description.
Hospitality Management

American River College is among the most respected culinary arts programs in northern California. The program emphasizes business theory and hands on cooking. Classes focus on job skills and professional fine dining cuisine. The program can be completed in 18 months, including a semester working in the kitchen of The Oak Café, the college’s 4-star restaurant. Students also have the opportunity to work in an on-campus retail bakery.

**Degrees and Certificates Offered**

A.A. in Hospitality Management: Culinary Arts/Restaurant Management
Baking and Pastry Certificate
Culinary Arts/ Restaurant Management Certificate
Guided Pathways Milestone Certificate for Multilingual Speakers: Pathway to Culinary Arts Certificate
Hospitality Management: Restaurant Management Certificate

**Dean** Angela Milano
**Department Chair** Brian Knirk
**Phone** (916) 484-8433

**Associate Degree**

**A.A. in Hospitality Management: Culinary Arts/Restaurant Management**

This degree focuses on basic and advanced culinary techniques, related to both hot food and baking. It emphasizes supervisory and management skills, marketing, and financial accountability. The Oak Café provides a management training lab for advanced students in the program.

**Total Units:** 45.5

1HM 315 is a prerequisite for all HM hot-food lab classes
2HM 370 HM 370 has a co-requisite of HM 498, requiring a minimum of 8 hours per week in The Oak Café.
3HM 380 HM 370 has a co-requisite of HM 498, requiring a minimum of 16 hours per week in The Oak Café.
4HM 375 has a corequisite of HM 498, requiring a minimum of two days per week in The Oak Café Bakery.

The Hospitality Management: Culinary Arts/Restaurant Management Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

**Student Learning Outcomes**

Upon completion of this program, the student will be able to:

- analyze and design cost effective labor and production schedules.
- analyze and compare methods of internal cost control.
- assess contracts commonly used in the food service industry.
- choose and demonstrate optimal cooking procedures for all categories of foods to include, but not be limited to the following: vegetables, fruits, fats and oils, milk products, eggs, legumes, grains, baked products, poultry, meat, seafood, and soups.
- assess standards and procedures for delivery concepts into appropriate restaurant service.
- construct menus considering food, labor, production costs, and marketing.
- evaluate quality principles to management of the restaurant kitchen, including team building.

**Career Information**

The hospitality industry is one of the fastest growing market segments available for entry level and professional employees. Businesses including restaurants, hotels, theme parks, bakeries, cruise ships, caterers, and grocery stores are in search of line cooks, entry level and advanced managers, chefs, sous chefs, servers, and more.

**Certificates of Achievement**

**Baking and Pastry Certificate**

This certificate provides hands-on learning focused on job skills with an emphasis on baking and pastry. It includes production baking, candies, wedding and specialty cakes, plated desserts, and artisan breads.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- assess and demonstrate basic mixing methods for yeast doughs, cakes, cookies, and pastries.
- analyze and critique professional, commercial bakeshop ingredients and supplies.
- analyze quality defects in baked products and specify possible errors in technique or ingredient selection.
- prepare and critique a variety of products including biscuits, artisan breads, Danish pastries, muffins, coffee cakes, pies, tarts, puff pastries, cakes, cookies, pastry cream, pate a choux, icings, souffles, ice creams, and merengues.

Career Information

Opportunities for qualified people in the restaurant field are endless. The demand for trained bakers in all types of restaurants and food service organizations continues to grow.

Culinary Arts/ Restaurant Management Certificate

This certificate focuses on basic and advanced culinary techniques, related to both hot food and baking. It emphasizes supervisory and management skills, marketing, and financial accountability. The Oak Café is a small, fine dining restaurant that provides a management training lab for advanced students in the program.

Guided Pathways Milestone Certificate for Multilingual Speakers: Pathway to Culinary Arts Certificate

This Guided Pathways Milestone Certificate for Multilingual Speakers: Pathway to Culinary Arts offers advanced reading, writing, listening, and speaking skills at a post secondary level for English learners combined with introductory hospitality management skills. The combination of these skills can be used along their pathways to degrees, certificates, or transfer, and for use in multilingual work environments.

Total Units: 19.5
Student Learning Outcomes

Upon completion of this program, the student will be able to:

- write formal academic essays as well as apply techniques of written communication, sentence structure, word usage, punctuation, and spelling.
- employ reading strategies, such as summarizing, paraphrasing, and quoting and integrating outside sources into writing.
- analyze written communication and compose and organize paragraphs into effective documents.
- convey intended meaning, including accuracy in sound production, syllabification, and intonation.
- formulate and use a variety of interactive strategies effectively such as clarification, polite interruption, and agreement/disagreement strategies.
- participate in in-depth discussions effectively, take clear notes, and give oral presentations in a business/work environment.
- employ skills required for all entry-level food preparation courses.
- demonstrate skills in equipment utilization, weights, measurements, knife cut identification, speed and accuracy, as well as kitchen product identification and utilization.
- convey the history of the hospitality and culinary professions, explore the numerous avenues of opportunity, and study the advantages of continuing education in the field.
- demonstrate background knowledge of and approaches of successful chefs and restaurateurs.

Career Information

This certificate supports course work in the hospitality management profession, including in multilingual work environments.

Hospitality Management: Restaurant Management Certificate

This Certificate provides hands-on learning with an emphasis on supervisory and management skills in the restaurant environment. Management and the front-of-the-house skills are emphasized, with students learning basic culinary skills. The Oak Cafe is a small, fine dining restaurant that provides a management training lab for advanced students in the program.

1 HM 370 requires an additional minimum of 8 hours per week in The Oak Cafe

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- analyze and design cost effective labor and production schedules.
- analyze and compare methods of internal cost control.
- assess standards and procedures for delivery concepts into appropriate restaurant service.
- construct menus considering food, labor, production costs, and marketing.
- evaluate quality principles to the management of a restaurant, including team building and motivation.

Career Information

The continued growth of the hospitality industry has resulted in an increased need for qualified managers, both entry level and advanced, in all levels of restaurants, hotels, bakeries and other food service and hospitality establishments.

Hospitality Management (HM) Courses

HM 100 Calculations in Foodservice Occupations

Units: 3  
Hours: 54 hours LEC  
Prerequisite: None.  
Advisory: MATH 25 or 41

This course is a study of mathematical principles in the context of commercial food production. Topics include fractions, percentages, recipe conversions, yields, weights and measures, product yield tests, and recipe and food cost analysis.

HM 101 Introductory Culinary Skills

Units: 1.5  
Hours: 27 hours LEC  
Prerequisite: None.

This course introduces the foundational skills required for all entry-level food preparation courses. Topics include the development of job skills, equipment utilization, weights, measurements, knife cut identification, speed and accuracy, as well as kitchen product identification and utilization.

HM 110 Management and Supervision in the Hospitality Industry

Units: 2  
Hours: 36 hours LEC  
Prerequisite: None.  
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; or ESLR 340 AND ESLW 340.

This course covers the effective management of human resources in the hospitality industry. It includes the study of the functions of both management and leadership, including planning, recruitment, selection, training, performance management, coaching, counseling, and discipline. It also emphasizes management and leadership theories and application.

HM 115 Advertising and Sales in Food Service

Units: 2
HM 120 Beverage Operation

Units: 2
Hours: 36 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340.

This course is a study of beverages, both alcoholic and non-alcoholic, used in the food service industry. Topics include the production methods and regions, quality and characteristics. Beverage service, wine analysis, service and pairing with food are also covered, as are government regulations, licenses, and product costing. Field trips may be required.

HM 150 Catering

Units: 3
Hours: 18 hours LEC; 108 hours LAB
Prerequisite: HM 315 with a grade of "C" or better
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340.

This course covers the business and culinary aspects of catering and large-scale food production. It includes the study of starting a catering business, laws, licenses, taxes, insurance and contracts, menu development, pricing, and staffing. It also emphasizes quality and quantity production. On- and off-campus catering events are required. A portion of this course may be offered in a TBA component of 6-20 hours which may include setting tables, preparing food, and serving food for catered events.

HM 155 Mediterranean Cuisine

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: HM 315 with a grade of "C" or better; AND HM 310 (Sanitation, Safety, and Equipment) with a grade of "C" or better OR a CA Foodhandler's Card.
Advisory: HM 100

This course provides an in-depth look at the ingredients and culinary techniques used in preparing foods from the Mediterranean including France, Italy, Sicily, Greece, Spain, and North Africa, and regional focuses within these areas. The laboratory component includes skills development, production, and the use of equipment specific to the preparation of Mediterranean foods.

HM 165 Regional American Cuisine

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: HM 315 with a grade of "C" or better; AND HM 310 (Sanitation, Safety and Equipment) with a grade of "C" or better OR a CA Foodhandler's Card.
Advisory: HM 100

This course presents the study of ingredients and culinary techniques used in the preparation of foods from a variety of North American cuisines, including New England, Floribbean, Cajun, Creole, Californian, Midwestern, Southern, and Pacific Northwestern. Topics include the foods indigenous to the regions and the influences of early settlers. The laboratory component includes skills development, production, and the use of equipment specific to those individual areas.

HM 180 Garde Manger

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: HM 315 with a grade of "C" or better
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340.

This course focuses on the art of the cold kitchen with emphasis on both modern and classical techniques. Topics include hors d'oeuvre, canape, salads, brining, pickling, curing, and smoking. This course also includes basic charcuterie with emphasis on forcemeats, mousselines, terrines, pate, galantines, and sausages.

HM 290 Competitive Culinary Training

Units: 2 - 4
Hours: 18 hours LEC; 54 - 162 hours LAB
Prerequisite: HM 315 with a grade of "C" or better

This course is a cooperative effort between the college, The American Culinary Federation and The Capital Chefs' Association. This course offers the skills necessary to compete in regional and national culinary competitions, using the American Culinary Federation format. 54 hours per unit of TBA practices include knife skills and hot food preparation. Field trips to local restaurants are required to work with local chefs. This course may be taken up to 4 times for credit.

HM 295 Independent Studies in Hospitality Management

Units: 1 - 3
Hours: 54 - 162 hours LAB
Prerequisite: None.

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

HM 297 Internship in Hospitality Management

Units: 1 - 4
Hours: 6 hours LEC; 36 - 198 hours LAB
Prerequisite: None.
Enrollment Limitation: Must have completed 15 units in Hospitality Management with a grade of "C" or better
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340.

This course is a cooperative effort between the college and hospitality industries in the community to provide training through practical on-the-job experience. Internship sponsors/employers assist in the acquisition of skills and application of knowledge learned in the classroom. A portion of this course may be offered in a TBA component of 36 - 198 hours which may include setting tables, setting up food, and serving food.

HM 299 Experimental Offering in Hospitality Management

Units: 0.5 - 4
Prerequisite: None.

This is the experimental courses description.
HM 300 Introduction to Hospitality - Becoming a Chef
Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Transferable: CSU
This course covers the history of the hospitality and culinary professions, explores the numerous avenues of opportunity, and studies the advantages of continuing education in the field. It also covers the backgrounds and approaches of successful chefs and restaurateurs. Field trips are required.

HM 310 Sanitation, Safety and Equipment
Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESWL 340.
Transferable: CSU
This course covers all phases of food sanitation, including the causes, controls and investigation of illness related to food contamination. It covers sanitary practices in food preparation; proper dishwashing procedures, sanitation of kitchen, dining room, and all equipment; cleaning materials and procedures and garbage and refuse disposal. This course includes general safety precautions, maintenance and operation of appropriate food service equipment, along with elements of kitchen planning and types of equipment used. Successful completion of this course results in Servsafe certification.

HM 315 Food Theory and Preparation
Units: 4
Hours: 36 hours LEC; 108 hours LAB
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESWL 340.
Transferable: CSU
This course is a comprehensive study of basic principles of food science, theory, and techniques involved in food preparation. It includes a study of the factors that influence foods and the changes which occur in foods during preparation. It also emphasizes basic cooking skills, theory application, product, and quality identification.

HM 320 Breads and Yeast Doughs
Units: 2
Hours: 18 hours LEC; 54 hours LAB
Prerequisite: HM 100 with a grade of "C" or better, or placement through the assessment process.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESWL 340.
Transferable: CSU
This course covers theory and principles of doughs, yeast, and pastries with emphasis in bread production, sweet and savory doughs, and egg doughs. It includes the study of croissants, puff dough, pate-a-choux, traditional breakfast pastries, and American cookies and teacakes. All content is intended for students interested in commercial restaurants, bakeries, and other food service facilities.

HM 325 Components of Baking and Pastry
Units: 2
Hours: 18 hours LEC; 54 hours LAB
Prerequisite: HM 320 with a grade of "C" or better
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESWL 340.
Transferable: CSU
This course covers the theory and principles of baking and pastry. It focuses on pies, galettes, tarts, pate a choux, cheesecakes, and custard based desserts. This course is intended for students interested in commercial application in restaurants, bakeries, and other food service facilities.

HM 326 Intermediate Baking Retail Bakery Products
Units: 2
Hours: 18 hours LEC; 54 hours LAB
Prerequisite: HM 320 with a grade of "C" or better
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESWL 340.
Transferable: CSU
This course covers the theory and principles of baking and pastry with an emphasis on products commonly found in retail bakeries. It focuses on rich doughs, cookies, chocolate and puff pastry applications. This course is intended for students interested in commercial applications in bakeries, restaurants, and other food service facilities.

HM 328 Intermediate Baking American and European Cakes
Units: 2
Hours: 18 hours LEC; 54 hours LAB
Prerequisite: HM 320 with a grade of "C" or better
Transferable: CSU
This course covers the theory and principles of both American and European cake tradition. It focuses on baking methods, ingredient selection, filling, and finishing components and techniques. This course is intended for students interested in commercial bakery application.

HM 330 Advanced Baking and Pastry
Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: HM 310, 320, and 325 with grades of "C" or better
Transferable: CSU
This course focuses on commercial production of baked products, pastries, candies, restaurant style desserts, and wedding cakes. It emphasizes advanced baking science and commercial production. Products include European style breads, restaurant style plate presentation, frozen desserts, tortes, cakes, sauces, tarts, pulled sugar, piping, and chocolate work. This course also emphasizes the production of high quality products and professional presentation. Field trips to professional bakeries are required.

HM 340 Cost Control in the Food Service Industry
Units: 2
Hours: 36 hours LEC
Prerequisite: HM 100 with a grade of "C" or better
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESWL 340.
Transferable: CSU
This course covers accounting and cost control principles in the food service industry. It includes the use of accounting techniques to analyze food and labor cost control, business operations, budgeting, financing, and profit and loss statements.

HM 360 Professional Cooking
Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: HM 315 with a grade of "C" or better
Advisory: HM 100 and 310
Transferable: CSU
This course covers intermediate and advanced culinary techniques. It includes production standards, recipe analysis, presentation, stocks, sauces, and major ingredients used in professional cooking. The laboratory component includes use of equipment, skills development, and time management in the commercial kitchen.

HM 370 Dining Room Management

Units: 2
Hours: 36 hours LEC
Prerequisite: HM 100 and 310 with grades of "C" or better
Corequisite: HM 498, to include a minimum of eight hours per week of work experience in the operation of the front of the house for The Oak Café at American River College
Transferable: CSU

This course focuses on restaurant management with emphasis on service and the dining room. Topics include the historical view of service, quality, and exceeding guest expectations, methods of service, management of service operations and personnel, internal and external marketing, and daily reports and controls. The work experience component allows for hands-on experience running the dining room of the Oak Café two days a week.

HM 375 Bakery Management and Production

Units: 2
Hours: 36 hours LEC
Prerequisite: HM 310, 315, 320, and 325 with grades of "C" or better
Corequisite: HM 498
Transferable: CSU

This course focuses on bakery production, merchandising, and management for a professional bakery/cafe outlet. It includes production techniques, recipe development, customer service, advertising and promotion, menu planning, costing, production, and staff scheduling. Work experience takes place in the Oak Cafe Bakery two days a week.

HM 380 Restaurant Management and Production

Units: 3
Hours: 54 hours LEC
Prerequisite: HM 100, 310, 315, 320, 325, and 360 with grades of "C" or better, or placement through the assessment process.
Corequisite: Concurrent enrollment in HM 498 (to include a minimum of 16 hours per week of work experience in the commercial kitchen of The Oak Café American River).
Transferable: CSU

This course provides an in-depth look at restaurant management with emphasis on the kitchen. It includes the study of successful restaurant concepts, food styles and ethnic influences, production methods and standards, menu design (including specific purchasing and cost control), application of sanitation and safety standards, employee scheduling, motivation and supervision, and product marketing. These concepts are emphasized in the work experience corequisite. Field trips may be required.

HM 494 Topics in Hospitality Management

Units: 0.5 - 4
Hours: 18 - 54 hours LEC
Prerequisite: None.
Advisory: ENGRD 312 and ENGRD 310 with a grade of "C" or better; OR ESLR 320 and ESLW 320 with a grade of "C" or better; OR placement through assessment process.
Transferable: CSU

This course is designed to give students an opportunity to study topics in Hospitality which are job oriented and not included in current offerings. The course may be repeated for up to 6 units of credit provided there is no duplication of topics.

HM 495 Independent Studies in Hospitality Management

Units: 1 - 3
Hours: 54 - 162 hours LAB
Prerequisite: None.
Transferable: CSU

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

HM 498 Work Experience in Hospitality Management

Units: 0.5 - 4
Hours: 60 - 300 hours LAB
Prerequisite: None.
Enrollment Limitation: Students must be in a paid or unpaid internship, volunteer position, or job related to the hospitality management field with a cooperating site supervisor. Students are advised to consult with the Hospitality Management Program to review specific certificate and degree work experience requirements.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.
Transferable: CSU

General Education: AA/AS Area III(b)

This course provides students with opportunities to develop marketable skills in preparation for employment or advancement within the field of hospitality management. It is designed for students interested in work experience and/or internships in transfer-level degree occupational programs. Course content includes understanding the application of education to the workforce, completion of Title 5 required forms which document the student's progress and hours spent at the work site, and developing workplace skills and competencies.

During the semester, the student is required to complete 37.5 hours of related paid work experience, or 30 hours of related unpaid work experience for 0.5 unit. An additional 37.5 or 30 hours of related work experience is required for each additional 0.5 units. All students are required to attend the first class meeting, a mid-semester meeting, and a final meeting. Additionally, students who have not already successfully completed a Work Experience course will be required to attend weekly orientations while returning participants may meet individually with the instructor as needed. Students may take up to 16 units total across all Work Experience course offerings. This course may be taken up to four times when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

HM 499 Experimental Offering in Hospitality Management

Units: 0.5 - 4
Prerequisite: None.
Transferable: CSU

This is the experimental courses description.
Work Experience

Cooperative Work Experience (WEXP) is an experiential academic program where students apply what they have learned in the classroom to a work environment.

The program offers students the opportunity to develop technical skills, explore possible career choices, build confidence, network with people in the field, and transition into the world of work.

Work Experience (WEXP) Courses

WEXP 198 Work Experience - General

Units: 0.5 - 3
Hours: 30 - 225 hours LAB
Prerequisite: None.
Enrollment Limitation: Students must be in a paid or unpaid internship, volunteer position, or job with a cooperating site supervisor.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.
General Education: AA/AS Area III(b)

This course provides students with opportunities to acquire desirable work habits, attitudes and career awareness. It is designed for students interested in exploring various career options. Course content includes understanding the application of education to the workforce, completion of Title 5 required forms which document the student's progress and hours spent at the work site, and developing workplace skills and competencies.

During the semester, the student is required to complete 37.5 hours of paid work experience, or 30 hours of unpaid work experience for 0.5 unit. An additional 37.5 or 30 hours of related work experience is required for each additional 0.5 units. All students are required to attend the first class meeting, a mid-semester meeting, and a final meeting. Additionally, students who have not already successfully completed a Work Experience course will be required to attend weekly orientations while returning participants may meet individually with the instructor as needed.

This course may be repeated for a maximum of 6 units. This course may be taken up to four times when there are new or expanded learning objectives. Students may take up to 16 units total across all Work Experience course offerings.

Only one Work Experience course may be taken per semester.

WEXP 298 Work Experience in (Subject)

Units: 0.5 - 4
Hours: 30 - 300 hours LAB
Prerequisite: None.

Enrollment Limitation: Students must be in a paid or unpaid internship, volunteer position, or job related to career goals with a cooperating site supervisor.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300 OR ESLW 340.
General Education: AA/AS Area III(b)

This course provides students with opportunities to develop marketable skills in preparation for employment in their major field of study or advancement within their career. It is designed for students interested in work experience and/or internships in associate degree level or certificate occupational programs. Course content includes understanding the application of education to the workforce, completion of Title 5 required forms which document the student's progress and hours spent at the work site, and developing workplace skills and competencies.

During the semester, the student is required to complete 37.5 hours of related paid work experience, or 30 hours of related unpaid work experience for 0.5 unit. An additional 37.5 or 30 hours of related work experience is required for each additional 0.5 units. All students are required to attend the first class meeting, a mid-semester meeting, and a final meeting. Additionally, students who have not already successfully completed a Work Experience course will be required to attend weekly orientations while returning participants may meet individually with the instructor as needed. Students may take up to 16 units total across all Work Experience course offerings. This course may be taken up to four times when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.
Human Career Development

American River College’s Human Career Development courses are designed to help students achieve success in college through a variety of classes, which include study skills, career exploration, college success, transferring to four year institutions, life skills, peer mentoring, and academic learning strategies for students with specific learning disabilities.

Dean Nisha Beckhorn
Department Chair Reyna Moore
Phone (916) 484-8572

Human/Career Development (HCD) Courses

HCD 111 College Discovery Program

Units: 1
Hours: 18 hours LEC
Prerequisite: None.
This course explores options and resources relevant to student success at American River College. It covers academic and personal goal setting, campus resources, academic requirements, basic study skill development, and strategies that are compatible with academic success.

HCD 114 Human Potential Seminar

Units: 2
Hours: 36 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 116 AND ENGWR 101; OR ESLR 320 AND ESLW 320.
This course provides an in-depth examination of techniques and strategies to be used in enhancing a student’s chance for academic success in college. It is designed for students who need assistance to achieve their goals in higher education. Topics include motivation, goal setting, communication skills, time management, exam preparation, note taking, reading college textbooks, and the use of technology as it relates to being a student.

HCD 115 Orientation to College

Units: 0.5
Hours: 9 hours LEC
Prerequisite: None.
This course is an introduction to programs and services at American River College. Topics include procedures and college requirements, steps to success, and college resources.

HCD 122 Study Skills

Units: 1
Hours: 18 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 116 AND ENGWR 101; OR ESLR 320 AND ESLW 320.
This course covers specific study skills strategies. It provides the opportunity to analyze attitudes toward studying and current study skills or habits. Topics include specific learning styles, strategies for time management, goal setting, note-taking, memory improvement, reading skills, and how to prepare for and take exams.

HCD 160 Applied Life and Success Skills

Units: 2
Hours: 36 hours LEC
Prerequisite: None.
General Education: AA/AS Area III(b)
This course covers the skills and tools necessary for daily independent living and success as a college student. It focuses specifically on disability management, life skills, personal goals, and community and campus resources. It would also be appropriate for those students interested in a career with disability services.

HCD 299 Experimental Offering in Human Career Development

Units: 0.5 - 4
Prerequisite: None.
This is the experimental courses description.

HCD 310 College Success

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340.
Transferable: CSU; UC
General Education: AA/AS Area III(b); CSU Area E1
This course covers the skills and knowledge necessary for college success, as well as personal issues that are commonly encountered by many college students. Topics include motivation, self-discipline, learning styles, memory development, time management, communication skills, goal-setting, career planning, study skills and techniques, and critical thinking skills. Campus resources, college regulations, and information competency are also addressed. This course is highly recommended for first time college students and/or continuing college students who would benefit. Field trips may be required.

HCD 318 Transfer: Making It Happen

Units: 2
Hours: 36 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 116 AND ENGWR 101; OR ESLR 320 AND ESLW 320
Transferable: CSU; UC
General Education: AA/AS Area III(b)
This course provides a comprehensive study of the university transfer process as it relates to community college students. Topics include an overview of American higher education, student support services, major selection, college research, transfer admissions requirements, the college application process, transfer resources, transitional issues, and preparation for graduate and professional education. Field trips may be required.

HCD 330 Life and Career Planning

Units: 1
Hours: 18 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.
Transferable: CSU
General Education: AA/AS Area III(b)
This course is a comprehensive approach to life and career planning based on extensive interests, personality type, values, and skills assessments. Personal and career goals are formulated using career research and decision-making strategies.
HCD 331 Career and Job Search Strategies

Units: 1  
Hours: 18 hours LEC  
Prerequisite: None.  
Advisory: HCD 330  
Transferable: CSU  
General Education: AA/AS Area III(b)

This course assists students preparing for the current job market. Topics include; researching career fields, developing specific career/educational goals, informational interviewing, internships, professional networking, resume writing, interviewing skills, and current job search strategies.

HCD 336 Exploring Health Careers

Units: 1  
Hours: 18 hours LEC  
Prerequisite: None.  
Transferable: CSU  
General Education: AA/AS Area III(b)

This course introduces a wide variety of healthcare and healthcare-related occupations, emphasizing educational programs and career opportunities. It includes the identification and analysis of career interests, skills, values, and personal traits, as well as occupational research, resulting in the development of educational and career plans.

HCD 337 Exploring Health Careers

Units: 1  
Hours: 18 hours LEC  
Prerequisite: None.  
Transferable: CSU  
General Education: AA/AS Area III(b)

This course provides an opportunity to obtain information about a variety of health professions. This course explores the requirements to enter various health fields, including education, licensures, and volunteer experience. In addition, it offers opportunities to observe and gain knowledge in order to choose an appropriate health career goal.

HCD 364 Introduction to Peer Mentoring

Units: 1.5 - 4  
Hours: 18 hours LEC; 27 - 162 hours LAB  
Prerequisite: HCD 111, 114, 115, 310, or 318 with a grade of "C" or better  
Transferable: CSU

HCD 382 Learning Strategies for College and Life

Units: 3  
Hours: 54 hours LEC  
Prerequisite: None.  
Advisory: Eligibility for ENGRD 116 and ENGWR 101; OR ESLR 320 and ESLW 320  
Transferable: CSU; UC  
General Education: AA/AS Area III(b); CSU Area E1

This course provides a universal learning environment that supports students with specific learning differences, through adaptive strategies and techniques essential for achieving academic and personal success. Topics include adaptive technology, organization, learning modalities, time management, memory development, motivation, note-taking, personal wellness, study skills, testing techniques, and critical thinking methods. Also covered are communication approaches, personal and academic barriers, and disability awareness. Additionally, campus/community resources, college regulations, and proficiency expectations are covered.

HCD 495 Independent Studies in Human Career Development

Units: 1 - 3  
Prerequisite: None.  
Transferable: CSU

HCD 499 Experimental Offering in Human Career Development

Units: 0.5 - 4  
Prerequisite: None.  
Transferable: CSU

This is the experimental courses description.
World Languages

American River College offers courses in World Languages designed to help students develop a command of a variety of languages necessary to pursue career, transfer and degree goals.

Degrees Offered

A.A.-T. in Spanish
A.A. in Language Studies

Dean (Interim) Corinne Arrieta Katzorke
Department Chairs Inés García
Phone (916) 484-8653

Associate Degrees for Transfer

A.A.-T. in Spanish

This degree provides students with a major that fulfills the general requirements of the California State University for transfer. Students with this degree will receive priority admission with junior status to the California State University system. The Associate in Arts degree in Spanish for Transfer (AA-T) may be obtained by the completion of 60 transferable, semester units with a minimum 2.0 GPA, including (a) the major or area of emphasis described in the Required Program outlined below (earning a C or better in these courses) and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education Breadth Requirements.

Total Units: 19

The Associate in Arts in Spanish for Transfer (AA-T) degree may be obtained by completion of 60 transferable, semester units with a minimum 2.0 GPA, including (a) the major or area of emphasis described in the Required Program, and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education-Breadth Requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

• demonstrate proficiency in the five skills as mandated by the competency guidelines of the American Council of the Teaching of Foreign Languages (ACTFL): comprehension, speaking, reading, writing, and understanding the people and culture of the Spanish-speaking countries.

• utilize correct grammatical structures of standard Spanish.

• read Spanish proficiently as found, for example, in Spanish language newspapers, magazines, short stories, essays, and selections of poetry written by Spanish, Spanish-American, and Chicano authors.

• demonstrate appropriate writing and composition skills in Spanish.

• critique and discuss Latin American and Peninsular literature in a historical context.

• analyze and discuss major historical events and periods in the history of Spanish-speaking countries.

• compare and contrast aspects of the Spanish-speaking culture that are different or similar to one’s own culture.

• compare and contrast aspects of Spanish to another modern language.

Career Information

This degree is designed to facilitate students’ successful transfer to four-year colleges that prepare them for a variety of career opportunities, such as airlines/travel, banking, bilingual education, bilingual telecommunications, emergency services, foreign service, Foreign Language Teacher, imports and exports, international business, intelligence/military services, IRS/State Franchise Tax Board, law enforcement/correctional officer, social services, translating/interpreting, and tourism. Some careers may require additional training specific to the trade.

Associate Degrees

A.A. in Language Studies

This degree provides an area of emphasis in communication skills in both English and foreign languages. It is intended for students wishing to develop communication skills for the workplace. Students who work closely with their counselors can use this area of emphasis to prepare for majoring at a four-year college in world languages as well as any other majors which require proficiency in one or more world languages.

Total Units: 18

These 12 units must be completed in a single language.

The Language Studies Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- write expository and argumentative papers.
- synthesize ideas and develop conclusions.
- examine the connection between culture and communication.
- engage in conversation and written correspondence in a language other than English.

German (GERM) Courses

GERM 401 Elementary German I

Units: 4  
Hours: 72 hours LEC  
Prerequisite: None.  
Transferable: CSU; UC  
General Education: AA/AS Area I; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B; IGETC Area 6

This course is an introduction to the language of the German-speaking people. It includes the fundamentals of German pronunciation and grammar, as well as the development of listening, reading, and writing with emphasis on the communicative skills.

GERM 402 Elementary German II

Units: 4  
Hours: 72 hours LEC  
Prerequisite: GERM 401 with a grade of "C" or better or two years of high school German  
Transferable: CSU; UC  
General Education: AA/AS Area I; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B; IGETC Area 6

This course continues to develop proficiency in speaking, reading, and writing German. It also explores the German culture and affords opportunities to make cross-linguistic and cross-cultural comparisons.

GERM 411 Intermediate German

Units: 4  
Hours: 72 hours LEC  
Prerequisite: GERM 402 with a grade of "C" or better or three years of high school German  
Transferable: CSU; UC  
General Education: AA/AS Area I; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B; IGETC Area 6

This course, which is the third in a series of four German courses, continues to develop proficiency in speaking, listening, reading, and writing German. It reviews German grammar and offers readings of varied texts, which further explore study of historical and cultural background of German-speaking countries and afford opportunities to make cross-linguistic and cross-cultural comparisons.

GERM 412 Intermediate German

Units: 4  
Hours: 72 hours LEC  
Prerequisite: GERM 411 with a grade of "C" or better or four years of high school German.  
Transferable: CSU; UC  
General Education: AA/AS Area I; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B; IGETC Area 6

This intermediate-level German course provides continued development of the language and cultural awareness of the German-speaking world. It includes further development of listening, speaking, reading, and writing skills in German with emphasis on communicative skills.

GERM 495 Independent Studies in German

Units: 1 - 3  
Prerequisite: None.  
Transferable: CSU

GERM 499 Experimental Offering in German

Units: 0.5 - 4  
Prerequisite: None.  
Transferable: CSU

This is the experimental courses description.

Italian (ITAL) Courses

ITAL 351 Conversational Italian, Elementary I

Units: 3  
Hours: 54 hours LEC  
Prerequisite: None.  
Transferable: CSU

This course is designed for students at the first-semester level in Italian. Conversations and discussions, both controlled and spontaneous, are used to develop basic conversational skills in Italian. Emphasis includes oral proficiency and development of Italian cultural awareness.
ITAL 352 Conversational Italian, Elementary II

Units: 3
Hours: 54 hours LEC
Prerequisite: ITAL 351 with a grade of "C" or better or two years of high school Italian
Transferable: CSU

This course is designed for students at the second-semester level in Italian. It continues the development of oral-aural skills in Italian through conversations and discussions, both controlled and spontaneous. Emphasis includes oral proficiency and development of Italian cultural awareness.

ITAL 401 Elementary Italian

Units: 4
Hours: 72 hours LEC
Prerequisite: None.
Transferable: CSU; UC
General Education: AA/AS Area I; CSU Area C2; IGETC Area 6

This course is an introduction to the Italian language and culture of Italy. It includes the development of listening, speaking, reading, and writing Italian with emphasis on the communicative skills, as well as the fundamentals of Italian pronunciation and grammar.

ITAL 402 Elementary Italian

Units: 4
Hours: 72 hours LEC
Prerequisite: ITAL 401 with a grade of "C" or better; or 2 years of high school Italian.
Transferable: CSU; UC
General Education: AA/AS Area I; CSU Area C2; IGETC Area 6

This course provides continued development of the language and explores history and culture of Italian society. It includes further development of listening, speaking, reading, and writing Italian and emphasizes communicative skills, as well as the fundamentals of Italian pronunciation and grammar. Language acquisition is approached through a historical and cultural perspective.

ITAL 411 Intermediate Italian

Units: 4
Hours: 72 hours LEC
Prerequisite: ITAL 402 with a grade of "C" or better; or 3 years of high school Italian.
Transferable: CSU; UC
General Education: AA/AS Area I; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B; IGETC Area 6

This intermediate-level Italian course provides continued development of the language and culture of Italy. It includes further development of listening, speaking, reading, and writing skills in Italian with emphasis on communicative skills. Additionally, it covers more complex grammar topics and provides further study and complex grammar topics of the cultural and historical background of Italy as well as its major literary types and works.

ITAL 495 Independent Studies in Italian

Units: 1 - 3
Prerequisite: None.
Transferable: CSU

ITAL 499 Experimental Offering in Italian

Units: 0.5 - 4
Prerequisite: None.
Transferable: CSU

This is the experimental courses description.

**Russian (RUSS) Courses**

**RUSS 401 Elementary Russian**

- **Units:** 4
- **Hours:** 72 hours LEC
- **Prerequisite:** None.
- **Transferable:** CSU; UC
- **General Education:** AA/AS Area I; IGETC Area 6

This course is an introduction to the Russian language and culture of Russia. It includes the development of listening, speaking, reading, and writing skills in Russian with emphasis on the communicative skills, as well as the fundamentals of Russian pronunciation and grammar.

**RUSS 402 Elementary Russian**

- **Units:** 4
- **Hours:** 72 hours LEC
- **Prerequisite:** RUSS 401 with a grade of "C" or better OR two years of high school Russian.
- **Transferable:** CSU; UC
- **General Education:** AA/AS Area I; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B; IGETC Area 6

This course provides continued development of the Russian language and culture. It includes further development of listening, speaking, reading, and writing skills in Russian with emphasis on communicative skills, as well as the fundamentals of Russian pronunciation and grammar. Cross-linguistic and cross-cultural comparisons are emphasized.

**RUSS 411 Intermediate Russian**

- **Units:** 4
- **Hours:** 72 hours LEC
- **Prerequisite:** RUSS 402 with a grade of "C" or better, or three years of high school Russian.
- **Transferable:** CSU; UC
- **General Education:** AA/AS Area I; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B; IGETC Area 6

This intermediate-level Russian course provides continued development of the language and culture of the Russian-speaking world. It includes further development of listening, speaking, reading, and writing skills in Russian with emphasis on communicative skills.

**RUSS 412 Intermediate Russian**

- **Units:** 4
- **Hours:** 72 hours LEC
- **Prerequisite:** RUSS 411 with a grade of "C" or better, or placement through the assessment process.; RUSS 411 with a grade of "C" or better OR 4 years of high school Russian
- **Transferable:** CSU; UC
- **General Education:** AA/AS Area I; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B; IGETC Area 6

This intermediate-level Russian course provides continued development of the language and cultural awareness of the Russian-speaking world. It includes further development of listening, speaking, reading, and writing skills in Russian with emphasis on communicative skills.

**RUSS 413 Russian for Heritage Speakers I**

- **Units:** 4
- **Hours:** 72 hours LEC
- **Prerequisite:** RUSS 411 or Russian heritage speaker proficiency as assessed by an oral interview with the instructor in Russian.
- **Transferable:** CSU; UC

**General Education:** AA/AS Area I; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B; IGETC Area 6

This course offers the fundamentals of spoken and written Russian for heritage speakers with different levels of Russian who want to gain literacy and improve their Russian skills. It covers the structure of the language, oral communication, spelling, and fundamentals of grammar and composition. In addition, the course introduces the student to the geography and culture of the Russian-speaking world.

**RUSS 415 Russian for Heritage Speakers II**

- **Units:** 4
- **Hours:** 72 hours LEC
- **Prerequisite:** RUSS 413 with a grade of “C” or better, or placement through the assessment process.
- **Transferable:** CSU; UC
- **General Education:** AA/AS Area I; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B; IGETC Area 6

This course is designed as a continuation of Russian 413. It offers the fundamentals of spoken and written contemporary Russian for the native speakers of Russian. It covers more advanced structures of the language, oral communication, and composition. This course focuses primarily on major literary movements and developments in the 20th century Russian literature and cinema. In addition, the course reviews problem areas of Russian grammar and introduces some advanced topics in grammar and syntax. This course is conducted in Russian.

**RUSS 495 Independent Studies in Russian**

- **Units:** 1 - 3
- **Prerequisite:** None.
- **Transferable:** CSU

**RUSS 499 Experimental Offering in Russian**

- **Units:** 0.5 - 4
- **Prerequisite:** None.
- **Transferable:** CSU

This is the experimental courses description.

**Spanish (SPAN) Courses**

**SPAN 131 Elementary Spanish Lab I**

- **Units:** 0.5 - 1
- **Hours:** 27 - 54 hours LAB
- **Prerequisite:** None.
- **Advisory:** Concurrent enrollment in SPAN 401.

This laboratory course enables Spanish language learners to develop, expand, and reinforce multiple Spanish language skills while working independently and/or in small groups. Coursework includes integrated study topics related to vocabulary, grammar, reading, writing, listening, and oral skills covered in first semester Spanish courses. Students may register until the sixth week of the semester. This course may be taken up to 2 times, for a total of 1.0 unit, using different topics. Pass/No Pass only.

**SPAN 132 Elementary Spanish Lab II**

- **Units:** 0.5 - 1
- **Hours:** 27 - 54 hours LAB
- **Prerequisite:** None.
- **Advisory:** SPAN 131, or concurrent enrollment in SPAN 402.

This laboratory course enables Spanish language learners to continue developing, expanding, and reinforcing multiple Spanish language skills
while working independently and/or in small groups. Coursework includes integrated study topics related to vocabulary, grammar, reading, writing, listening, and oral skills covered in second semester Spanish courses. Students may register until the sixth week of the semester. This course may be taken up to two times for a total of 1.0 unit, using different topics. Pass/No Pass only.

**SPAN 133 Intermediate Spanish Lab I**

**Units:** 0.5 - 1  
**Hours:** 27 - 54 hours LAB  
**Prerequisite:** None.  
**Advisory:** SPAN 132 or concurrent enrollment in SPAN 411.

This laboratory course enables Spanish learners to develop, expand, and reinforce multiple Spanish language skills while working independently and/or in small groups. Coursework includes integrated study topics related to vocabulary, grammar, reading, writing, listening, and oral skills covered in third semester Spanish courses. Students may register until the sixth week of the semester. This course may be taken up to two times, for a total of 1.0 unit, using different topics. Pass/No Pass only.

**SPAN 299 Experimental Offering in Spanish**

**Units:** 0.5 - 4  
**Prerequisite:** None.

This is the experimental courses description.

**SPAN 351 Conversational Spanish, Elementary**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Transferable:** CSU

This course is an introduction to the language and culture of the Spanish-speaking world. It includes the development of listening, speaking, reading, and writing Spanish with emphasis on communicative skills. Class discussions and group interaction, both controlled and spontaneous, are used to develop basic conversational skills in Spanish.

**SPAN 352 Conversational Spanish, Elementary**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** SPAN 351 OR SPAN 401 with a grade of "C" or better or two years of high school Spanish.  
**Transferable:** CSU

This course is for students at the second-semester level in Spanish. It includes the development of listening, speaking, reading, and writing Spanish with emphasis on communicative skills. Class discussions and group interaction, both controlled and spontaneous, are used to develop basic conversational skills in Spanish. Emphasis includes oral proficiency and development of Hispanic cultural awareness.

**SPAN 361 Conversational Spanish, Intermediate**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** SPAN 352 OR SPAN 402 with a grade of "C" or better, or three years of high school Spanish.  
**Transferable:** CSU

This course is designed for students at the third-semester level in Spanish. It includes the development of listening, speaking, reading, and writing Spanish with emphasis on communicative skills. Discussions and group interaction, both controlled and spontaneous, are used to develop basic conversational skills in Spanish. Emphasis includes oral proficiency and development of Hispanic cultural awareness.

**SPAN 362 Conversational Spanish, Intermediate**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** SPAN 361 OR Spanish 411 with a grade of "C" or better or 4 years high school Spanish  
**Transferable:** CSU; UC

This course covers language and culture of the Spanish-speaking world. It continues the development of listening, speaking, reading, and writing Spanish with emphasis on communicative skills. Discussions and group interaction, both controlled and spontaneous, are used to develop conversational skills in Spanish.

**SPAN 401 Elementary Spanish**

**Units:** 4  
**Hours:** 72 hours LEC  
**Prerequisite:** None.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area I; CSU Area C2; IGETC Area 6  
**C-ID:** C-ID SPAN 100

This course introduces the language and culture of the Spanish-speaking world. It includes the development of listening, speaking, reading, and writing Spanish with emphasis on communicative skills, as well as the fundamentals of Spanish pronunciation and grammar.

**SPAN 402 Elementary Spanish**

**Units:** 4  
**Hours:** 72 hours LEC  
**Prerequisite:** SPAN 401 with a grade of "C" or better or two years of high school Spanish.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area I; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B; IGETC Area 6  
**C-ID:** C-ID SPAN 110

This course provides continued development of the language and explores history and culture of the Spanish-speaking world. It includes further development of listening, speaking, reading, and writing Spanish with emphasis on communicative skills, as well as the fundamentals of Spanish pronunciation and grammar. Language acquisition is approached through a historical and cultural perspective.

**SPAN 411 Intermediate Spanish**

**Units:** 4  
**Hours:** 72 hours LEC  
**Prerequisite:** SPAN 402 with a grade of "C" or better OR three years of high school Spanish.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area I; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B; IGETC Area 6  
**C-ID:** C-ID SPAN 200

This intermediate-level Spanish course provides continued development of the language and culture of the Spanish-speaking world. It includes further development of listening, speaking, reading, and writing skills in Spanish with emphasis on communicative skills. Additionally, it covers more complex grammar topics and provides further study of the cultural and historical background of Spanish-speaking countries.

**SPAN 412 Intermediate Spanish**

**Units:** 4  
**Hours:** 72 hours LEC  
**Prerequisite:** SPAN 411 with a grade of "C" or better or 4 years of high school Spanish  
**Transferable:** CSU; UC
**General Education:** AA/AS Area I; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B; IGETC Area 6
**C-ID:** C-ID SPAN 210

This intermediate-level Spanish course provides continued development of the language and culture of the Spanish-speaking world. It includes further development of listening, speaking, reading, and writing skills in Spanish with emphasis on communicative skills. Additionally, it reviews and provides further study and complex grammar topics of the cultural and historical background of Spanish-speaking countries as well as their major literary types and works.

**SPAN 413 Spanish for Native Speakers I**

**Units:** 4  
**Hours:** 72 hours LEC  
**Prerequisite:** Spanish native speaker proficiency or the equivalent intermediate level as assessed by the Foreign Language Department Assessment Process at American River College.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area I; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B; IGETC Area 6  
**C-ID:** C-ID SPAN 220

This course offers the fundamentals of spoken and written Spanish for the native speaker of Spanish. It covers the structure of the language, oral communication, fundamentals of grammar and composition. It focuses primarily on tenses in the indicative mode. This course also covers diacritical marks, like the accent mark, and their uses. In addition, it introduces the student to the geography and culture of the Spanish speaking world. This course is conducted entirely in Spanish.

**SPAN 415 Spanish for Native Speakers II**

**Units:** 4  
**Hours:** 72 hours LEC  
**Prerequisite:** SPAN 413 with a grade of "C" or better, or placement through the assessment process.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area I; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B; IGETC Area 6  
**C-ID:** C-ID SPAN 230

This course is a continuation of Spanish 413. It offers the fundamentals of spoken and written Spanish for the native speaker of Spanish. It covers the structure of the language, oral communication, fundamentals of grammar and composition. Focus is placed primarily on the conditional and subjunctive forms, the future tense, and the compound tenses. The course also covers diacritical marks, like the accent mark, and their uses. In addition, the course introduces the student to the geography and culture of the Spanish speaking world. This course is conducted in Spanish.

**SPAN 427 Introduction to Spanish American Literature**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** SPAN 411 with a grade of "C" or better, or placement through the assessment process.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area I; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B

This course introduces students to Spanish and Latin American Literature. It covers the analysis of a variety of literary formats that include short stories, poems, plays, and novel excerpts from the established literary canon. Films are integrated to develop auditory skills and to engage students in discussions. It emphasizes critical thinking, interpretation, speaking, and writing skills, and is conducted entirely in Spanish.

**SPAN 495 Independent Studies in Spanish**

**Units:** 1 - 3  
**Prerequisite:** None.  
**Transferable:** CSU

**SPAN 499 Experimental Offering in Spanish**

**Units:** 0.5 - 4  
**Prerequisite:** None.  
**Transferable:** CSU

This is the experimental courses description.
Human Services

The Human Services program provides preparation for employment as a paraprofessional aide with agencies such as correctional institutions, parole, probation, welfare, rehabilitation, mental health, schools, and childcare centers.

A special option is Chemical Dependency Studies, which provides preparation for paraprofessional work with public or private agencies dealing with problems of chemical dependency.

Degrees and Certificates Offered

A.A. in Chemical Dependency Studies
A.A. in Human Services
Chemical Dependency Studies Certificate
Human Services Certificate
RCFE Administrator Training Certificate

Associate Degrees

A.A. in Chemical Dependency Studies

The degree program in Chemical Dependency Studies centers around the specific skills and abilities necessary to provide comprehensive drug and alcohol counseling. Course work includes the twelve counselor core function applications in addiction screening: intake, assessment, orientation, counseling, crisis intervention, consultation, client’s education, client’s rights, confidentiality, professional ethics, and reports and record keeping.

1¹This course should be taken before HSER 498.

2²This course should be taken before HSER 498.

3³4 units are required.

The Chemical Dependency Studies Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- evaluate the components of a quality chemical dependency counseling program.
- demonstrate the twelve essential counseling skills as they apply to chemical dependency and recovery processes.
- utilize counseling strategies based on examination of scientific theories of addiction.
- identify the community resources used in assisting clients with addiction issues.
- appraise and apply the knowledge of California Professional Codes of Ethics for Drug and Alcohol counselors.
- evaluate one’s own values and attitudes as they apply to ethical decision making.
- demonstrate appropriate interpersonal and social skills in interactions with a diverse population using principles of equity, social justice, and inclusion.

Career Information

Upon completion of the A.A. degree a student possesses the coursework required for initial certification as a California drug and alcohol counselor (CDAC).

A.A. in Human Services

The A.A. degree program in Human Services centers around the broad array of entry level skills and abilities effectively used in social service delivery systems. Coursework includes the twelve helper core function applications in client screening, intake, assessment, orientation, counseling, consultation, client’s rights, confidentiality, crisis intervention, client’s education, professional ethics, and reports and record keeping.

**Total Units:** 32 - 35.5

1This course should be taken before HSER 498.
2This course should be taken before HSER 498.
3A minimum of two units is required.
4OR SOC 480.

The Human Services Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

### Student Learning Outcomes

Upon completion of this program, the student will be able to:

- define the functions of social service delivery systems.
- analyze public policy issues, complexities and controversies affecting social service agencies and their clients.
- integrate different theoretical approaches in working with clients.
- identify the community resources used in assisting clients.
- appraise and apply the knowledge of existing California professional codes of ethics for the helping professions.
- describe the application of clients' rights in the social service delivery system.
- evaluate one's own values and attitudes as they apply to ethical decision making.
- demonstrate appropriate interpersonal and social skills in interactions with a diverse population using principles of equity, social justice, and inclusion.

### Certificates of Achievement

#### Chemical Dependency Studies Certificate

The certificate program in Chemical Dependency Studies centers around the specific skills and abilities necessary to provide comprehensive drug and alcohol counseling. Course work includes the twelve counselor core function applications in addiction screening: intake, assessment, orientation, counseling, crisis intervention, consultation, client's education, client's rights, confidentiality, professional ethics, and reports and record keeping.
Career Information

Upon completion of the certificate a student possesses the coursework required for initial certification as a California drug and alcohol counselor (CDAC).

Human Services Certificate

The certificate in Human Services centers around the broad array of entry level skills and abilities effectively used in social service delivery systems. Coursework includes the twelve helper core function applications in client screening, intake, assessment, orientation, counseling, consultation, client's rights, confidentiality, crisis intervention, client's education, professional ethics, and reports and record keeping.

Certificate

RCFE Administrator Training Certificate

This program prepares students for the duties, roles, and responsibilities of administrators working in a residential care facility for the elderly (RCFE). These non-medical assisted living and board and care residences are required to have at least one currently Certified Administrator. To become certified requires passing the state Administrator Exam and other requirements. Prior to applying to take the Administrator Exam, applicants must successfully complete a state approved Initial Certification Training Program (ICTP). After completing the ICTP, they have 60 days to pass the exam. This course is an approved ICTP. Every two years this program is reviewed by the California Department of Social Services (CDSS) for approval as an ICTP to confirm all the required curriculum and all the current state and federal laws and regulations are included. Upon successful completion of this course, students receive a certificate of completion from the Gerontology department confirming their completion of this approved ICTP. The certificate of completion is submitted with their application to take the state Administrator Exam.

Total Units: 4.5

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- research the 13 core areas of the RCFE Knowledge Training Standard set forth by the California Department of Social Services (CDSS).
- analyze the 13 core areas of the RCFE Knowledge Training Standard set forth by the California Department of Social Services (CDSS).
- discuss the 13 core areas of the RCFE Knowledge Training Standard set forth by the California Department of Social Services (CDSS).
- generalize the 13 core areas of the RCFE Knowledge Training Standard set forth by the California Department of Social Services (CDSS).
- demonstrate knowledge in the 13 core areas of the RCFE Knowledge Training Standard set forth by the California Department of Social Services (CDSS).

Career Information

Passing the state Administrator Exam and becoming a Certified Administrator qualifies students for the position of Administrator of a residential care facility for the elderly (RCFE). Being certified also enhances qualifications for other administrative staff positions within an RCFE and administrative staff are often encouraged to become certified to earn a raise in their pay-scale and increase their upward mobility within the organization. See the program description for details about the course approval by the California Department of Social Services.
Human Services (HSER) Courses

HSER 300 Introduction to Human Services

Units: 3
Hours: 54 hours LEC
Prerequisite: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340.
Transferable: CSU

This course is a comprehensive overview of the field of human services and an introduction to attitudes and methods that enhance communication skills in human relations and enable effective intervention in problem situations. It emphasizes the roles and skills of associate professionals, such as but not limited to drug and alcohol counselors, mental health workers, and activity directors with the elderly, and adolescent and child welfare assistants. It also emphasizes group techniques. An off-campus site visit is required.

HSER 310 Ethical Issues and Client's Rights

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Corequisite: HSER 300
Transferable: CSU

This course is a comprehensive exploration of the basic ethical issues involving human services delivery. Topics include professional ethics, confidentiality, counselor and clients' rights, and other areas involving ethical controversies. This course is not open to students who have completed GERON 304.

HSER 330 Issues of Diverse Populations

Same As: PSYC 365
Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340.
Transferable: CSU; UC

General Education: AA/AS Area V(b); AA/AS Area VI; CSU Area D; CSU Area E1; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4

This course is a study of the values, problems, issues, concerns, and counseling needs of diverse populations by race, ethnicity, class, gender, sexual orientation, gender identity, physical/cognitive/emotional/developmental ability, and age. It also explores the cognitive and emotional aspects of prejudice as it relates to interpersonal, cultural, and institutional discrimination. This course is not open to students who have completed PSYC 365.

HSER 340 Introduction to Chemical Dependency

Same As: PSYC 400
Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.
Transferable: CSU; UC

General Education: AA/AS Area III(b); CSU Area E1

This course examines the biopsychosociocultural effects of chemical dependency on the individual and the family. It includes an analysis of alcohol and drug use; misuse and abuse across age, gender, sexuality, race, ethnicity, and economic conditions contributing to substance abuse; and a description of community efforts at prevention and treatment. This course is not open to students who have completed this course's equivalent.

HSER 341 Physiology and Pharmacology: Alcohol & Other Drugs

Same As: PSYC 401
Units: 3
Hours: 54 hours LEC
Prerequisite: HSER 340 or PSYC 400 with a grade of "C" or better
Transferable: CSU; UC

This course is a study of the absorption, metabolism, and the mechanism of action of alcohol and other psychoactive drugs including opiates, stimulants, depressants, cannabinoids, and psychedelics. It includes the pharmacological mechanisms as well as the social and psychological implications of tolerance, habituation, and substance abuse of the user and abuser. This course is not open to students who have completed PSYC 401.

HSER 342 Alcoholism: Intervention, Treatment & Recovery

Same As: PSYC 402
Units: 3
Hours: 54 hours LEC
Prerequisite: HSER 341 or PSYC 401 with a grade of "C" or better
Transferable: CSU

This course is a study and evaluation of techniques used in the treatment of alcohol dependency. This course will cover both physical and psychological effects of alcohol use, abuse and the impact on family and society. Topics include prevention, intervention, individual and group counseling, detoxification, twelve-step program, therapeutic communities, aftercare programs, harm reduction and addressing high risk drinking. This course is not open to students who have completed this course's equivalent.

HSER 360 Techniques of Interviewing and Counseling

Units: 3
Hours: 54 hours LEC
Prerequisite: HSER 300 with a grade of "C" or better
Corequisite: HSER 310
Transferable: CSU

This course includes: a survey of interview and counseling techniques appropriate for paraprofessionals in mental health, corrections, and substance abuse counseling. It includes case management practices and skills. Practices and skills include: interviewing techniques, using assessment forms, developing treatment plans, monitoring referrals, notetaking and documentation, learning and practicing effective communication.

HSER 362 Practices in Human Services

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Corequisite: HSER 365 and 498
Enrollment Limitation: Completion of the American River College Human Services Agency Placement Process.
Transferable: CSU

This course provides advanced study and applied integration of human services theory to prepare students for field experience. It covers techniques in applying concepts, values, and skills acquired in other core courses related to the process of helping others.

HSER 365 Techniques of Group Counseling

Units: 3
**HSER 495 Independent Studies in Human Services**

**Units:** 1 - 3  
**Hours:** 54 - 162 hours LAB  
**Prerequisite:** None.  
**Transferable:** CSU

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

**HSER 498 Work Experience in Human Services**

**Units:** 0.5 - 4  
**Hours:** 30 - 300 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Students must be in a paid or unpaid internship, volunteer position, or job related to human services with a cooperating site supervisor. Students are advised to consult with the Human Services Department faculty to review specific certificate and degree work experience requirements.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.  
**Transferable:** CSU  
**General Education:** AA/AS Area III(b)

This course provides students with opportunities to develop marketable skills in preparation for employment or advancement within the field of human services. It is designed for students interested in work experience and/or internships in transfer-level degree occupational programs. Course content includes understanding the application of education to the workforce, completion of Title 5 required forms which document the student's progress and hours spent at the work site, and developing workplace skills and competencies.

During the semester, the student is required to complete 37.5 hours of related paid work experience, or 30 hours of related unpaid work experience for 0.5 unit. An additional 37.5 or 30 hours of related work experience is required for each additional 0.5 units. All students are required to attend the first class meeting, a mid-semester meeting, and a final meeting. Additionally, students who have not already successfully completed a Work Experience course will be required to attend weekly orientations while returning participants may meet individually with the instructor as needed. Students may take up to 16 units total across all Work Experience course offerings. This course may be taken up to four times when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

**HSER 499 Experimental Offering in Human Services**

**Units:** 0.5 - 4  
**Prerequisite:** None.  
**Transferable:** CSU

This is the experimental courses description.
Administrators, Faculty, and Staff
Humanities and Religious Studies

Humanities (HUM) & Religious Studies (RLST) courses recognize and explore the dynamics of difference through interdisciplinary study, appreciation, and analysis of world cultures from ancient times to the present. Humanities students gain comprehensive, cross-cultural perspectives on diverse human communities by examining literature, visual arts, music, drama, film, philosophy, history, and religion. Religions are powerful forces that have shaped and continue to shape the world’s history, cultures, politics, the pursuit of science, ethics, economics, violence, peace, power, marginalization, justice, and injustice. Religious Studies students gain excellent critical thinking skills by discerning and analyzing religions’ roles in diverse cultural, political, and social movements through multiple disciplinary lenses, including history, anthropology, sociology, psychology, philosophy, cultural studies, and postcolonial studies. Our approach is non-devotional and academic, which means we acknowledge that there are multiple authentic representations of religious expression in the world.

Dean Nicole Porter
Department Chair Bill Zangeneh-Lester
Phone (916) 484-8653

Humanities (HUM) Courses

HUM 300 Classical Humanities

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312, AND ENGRG 300; OR ESLW 340.
Transferable: CSU; UC
General Education: AA/AS Area I; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B

This course is a survey of Western culture that focuses on the human values expressed through painting, sculpture, architecture, music, literature, and philosophy. Emphasis is on the period from the Renaissance to the Modern Age. Field trips may be required.

HUM 301 Introduction to the Humanities

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGRG 300; OR ESLW 340.
Transferable: CSU; UC
General Education: AA/AS Area I; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B

This is a non-chronological course that introduces the humanities, primarily architecture, music, painting, poetry, sculpture, theatre, and film. It emphasizes identifying, appreciating, analyzing, interpreting, and understanding various significant arts and how they have shaped our understanding of the world.

HUM 310 Modern Humanities

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGRG 300; OR ESLW 340.
Transferable: CSU; UC
General Education: AA/AS Area I; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B

This course is a survey of Western culture that focuses on the human values expressed through painting, sculpture, architecture, music, literature, and philosophy. Emphasis is on the period from the Renaissance to the Modern Age. Field trips may be required.

HUM 320 Asian Humanities

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGRG 300; OR ESLW 340.
Transferable: CSU; UC
General Education: AA/AS Area I; AA/AS Area VI; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B

This course surveys traditions, cultures, literatures, art, music, and film of India, China, and Japan from ancient times to the present. Emphasis is on the inter-relationships of the arts, literatures, and philosophies in their historical contexts within each geographical area. Topics may include arts and cultures of other Asian countries such as Vietnam, Laos, Cambodia, Thailand, and Korea.

HUM 324 Global Islam: Culture and Civilization

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGRG 300; OR ESLW 340.
Transferable: CSU; UC
General Education: AA/AS Area I; AA/AS Area VI; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B

This course is a comprehensive introduction to Islamic cultures in a variety of geographic settings from the 7th century to the present, with emphasis on religious/philosophical concepts, and their expression in literature and the arts. It focuses on Arab, Persian, African, Asian, and American contributions. Topics include the origins and development of the religion in its formative period (the prophetic career of the Prophet Muhammad, the Qur’an, Islamic belief and ritual, Islamic law, early artistic expressions, and popular spirituality) as well as debates surrounding Islam in the contemporary world.

HUM 326 Middle Eastern Humanities

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGRG 300; OR ESLR 340 and ESLW 340.
Transferable: CSU; UC
General Education: AA/AS Area I; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B

This course surveys the cultures of the Middle East, with an emphasis on the analysis and appreciation of the arts, architecture, music, and sacred and secular texts of Egypt, Israel, Saudi Arabia, Iran, Iraq, Turkey, and other countries from ancient to modern times, as they apply to cultural and political developments.

HUM 330 Humanities of the Americas

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGRG 300; OR ESLW 340.
Transferable: CSU; UC
General Education: AA/AS Area I; AA/AS Area VI; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B

This course examines the fine arts of the Western Hemisphere from antiquity to contemporary times, with an emphasis on an awareness of
and a sensitivity to the literature, philosophy, art, and music of the past and present. It compares the various cultures indigenous to the Western Hemisphere both among themselves and in contrast to the cultures of Europe on their arrival in the 15th century. The course explores the ethnic and cultural conflicts and resolutions that constitute the confluence of ideas and beliefs in the Americas. It provides specific attention to the distinctively American aspects of the arts and their difference from the European tradition.

**HUM 355 Introduction to World Religions**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 OR ENGRD 312 AND ENGW 300; OR ESLW 340  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area I; AA/AS Area VI; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B  

This course surveys selected major world religions. Emphasis is on the origins, development, beliefs, practices, social ethics, and ethnic/cultural issues of indigenous tribal religions, Hinduism, Sikhism, Jainaism, Buddhism, Confucianism, Taoism, Shintoism, Judaism, Christianity, and Islam. This course focuses on the central beliefs and practices of these religions using selected material from each religion's sacred texts and arts.

**HUM 494 Topics in Humanities**

**Units:** 0.5 - 4  
**Hours:** 9 - 72 hours LEC  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; Or ESLW 340.  
**Transferable:** CSU  

This course provides the opportunity for concentrated study on specialized topics in the Humanities. Each offering focuses on the integration of arts and ideas in the works of a particular time and place and/or illuminates a selected theme. Refer to class schedule for current topic. Individual field trips may be required.

**HUM 495 Independent Studies in Humanities**

**Units:** 1 - 3  
**Prerequisite:** None.  
**Transferable:** CSU  

**HUM 499 Experimental Offering in Humanities**

**Units:** 0.5 - 4  
**Prerequisite:** None.  
**Transferable:** CSU  

This is the experimental courses description.

**Religious Studies (RLST) Courses**

**RLST 299 Experimental Offering in Religious Studies**

**Units:** 0.5 - 4  
**Prerequisite:** None.  

This is the experimental courses description.

**RLST 301 Introduction to World Religions**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 OR ENGRD 312 AND ENGW 300; OR ESLW 340.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area I; AA/AS Area VI; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B  

This course surveys selected major world religions. Emphasis is on the origins, development, beliefs, practices, social ethics, and ethnic/cultural issues of indigenous tribal religions, Hinduism, Sikhism, Jainaism, Buddhism, Confucianism, Taoism, Shintoism, Judaism, Christianity, and Islam. This course focuses on the central beliefs and practices of these religions using selected material from each religion's sacred texts and arts. In-person and/or virtual field trips may be required. This course is formerly known as HUM 355 - Introduction to World Religions. This course is not open to students who have completed HUM 355.

**RLST 302 Introduction to Atheism**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; OR ESLW 340.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area I; AA/AS Area VI; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B  

This academic and non-sectarian course emphasizes the historical and cultural frameworks of atheism. It takes a basic, integrated humanities approach to global non-religious traditions. This course analyzes a broad range of visual and performance arts, as well as literary documents, that explore diverse atheist philosophies over time and around the world. It reviews the difference between atheism and related conceptual traditions in creative expression. This course studies works and ideas comparatively, analyzing their relation to their contexts and to their impacts. In-person and/or virtual field trips may be required. This course is formerly known as HUM 302 - Global Humanities: Atheism in Creativity, Thought, and Inspiration Traditions. This course is not open to students who have completed HUM 302.

**RLST 310 Introduction to the Hebrew Bible**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; OR ESLW 340.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area I; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B  

This academic and non-sectarian course provides a literary, theological, and historical approach to the Hebrew Bible (also called the Old Testament). Ancient Israelite society and beliefs prior to the Common Era are explored primarily through a study of this biblical text, supported by the study of Middle Eastern cultural artifacts, non-biblical texts, and scholarly theories and archaeological studies related to the Hebrew Bible. In-person and/or virtual field trips may be required. This course is formerly known as HUM 360 - Introduction to the Old Testament (The Hebrew Bible). This course is not open to students who have completed HUM 360.

**RLST 311 Introduction to the New Testament**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; OR ESLW 340.
 Transferable: CSU; UC  
**General Education:** AA/AS Area I; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B  

This academic and non-sectarian course provides a literary, theological, and historical approach to the New Testament. These canonical texts of the early Christian community are analyzed in relation to both Judaism and the Greco-Roman world. Topics include contemporaneous religious ideas about the Messiah, the afterlife, the origin of the gospels, the nature of inspiration, transmission of documents and ideas, important Jewish groups, the politics of Palestine under the Romans, and the role of Paul. In-person and/or virtual field trips may be required. This course is formerly known as HUM 365 - Introduction to the New Testament. This course is not open to students who have completed HUM 365.

**RLST 313 Introduction to Islam**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.  
**Transferable:** CSU; UC  

**General Education:** AA/AS Area I; AA/AS Area VI; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B  

This course is a comprehensive introduction to Islamic cultures in a variety of geographic settings from the 7th century to the present, with emphasis on religious/philosophical concepts, and their expression in literature and the arts. It focuses on Arab, Persian, African, Asian, and American contributions. Topics include the origins and development of the religion in its formative period (the prophetic career of the Prophet Muhammad, the Qur’an, Islamic belief and ritual, Islamic law, early artistic expressions, and popular spirituality) as well as debates surrounding Islam in the contemporary world. In-person and/or virtual field trips may be required. This course is formerly known as HUM 324 - Global Islam: Culture and Civilization. This course is not open to students who have completed HUM 324.

**RLST 499 Experimental Offering in Religious Studies**

**Units:** 0.5 - 4  
**Prerequisite:** None.  

This is the experimental courses description.

Associate Degrees for Transfer

A.A.-T. in Art History

The Associate in Arts in Art History for Transfer provides a clearly articulated curricular track for students who wish to transfer to a CSU campus, while also serving the diverse needs of students interested in the breadth and depth of the field of Art History. Additionally, this degree exposes students to the core principles and practices of the field in order to build a foundation for their future personal, academic, or vocational paths.

The Associate in Arts degree in Art History for Transfer provides students with a major that fulfills the general requirements of the California State University for transfer. Students with this degree will receive priority admission with junior status to the California State University system. The Associate in Arts degree in Art History for Transfer (A.A.-T.) may be obtained by completion of 60 transferable, semester units with a minimum 2.0 GPA, including (a) the major or area of emphasis described in the Required Program outlined below (earning a C or better in these courses) and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education-Breadth Requirements.

Total Units: 21

1Excluding any courses used to fulfill the degree requirements listed above.

The Associate in Arts in Art History for Transfer (AA-T) degree may be obtained by completion of 60 transferable, semester units with a minimum overall grade point average (GPA) of 2.0, including (a) a minimum grade of “C” (or “P”) for each course in the major or area of emphasis described in the Required Program, and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education-Breadth Requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- assess and evaluate the contributions of artists throughout history.
- identify and evaluate works of art or architecture according to their appropriate style and time frame.
- analyze and critique art and architecture within the context of their functions and meanings.
- research and assess theoretical information concerning the meanings and purposes of art and architecture.
• explain the history of cultures and civilizations and how art and architecture is a reflection of that history.

Career Information

Art historians with undergraduate degrees are placed as registrars, preparators, and curatorial staff in art museums and galleries; they can also be employed as art critics in mass media publications, such as newspapers and magazines. An advanced degree allows an art historian a wider range of possible career applications, including museums directorships, curators, instructors, preservationists, researchers, and auction house personnel.

Associate Degrees

A.A. in English Communication and Literature

This degree emphasizes verbal and written communication skills, and the study of literature. It offers a general background in communication skills which may be used in the workplace. In addition to earning the degree, students who work closely with their counselor may also fulfill significant lower-division requirements of four-year colleges/universities in English Composition, Literature and Communication.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

• apply the elements of style in writing.
• evaluate premises, both explicitly stated and implied.
• maximize communication effectiveness by planning and adapting to specific audiences.
• write analytically about literature.
• examine fiction as a reflection of the authors’ cultures and values.

### The History of the Creative Arts Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

### Student Learning Outcomes

Upon completion of this program, the student will be able to:

- recognize the role of the arts in society.
- analyze the influences of social, political, and ethnic issues on the arts.
- compare and contrast styles of artistic expressions.
- assess the historical, artistic, social, and philosophical environments in an artistic genre.

### A.A. in Language Studies

This degree provides an area of emphasis in communication skills in both English and foreign languages. It is intended for students wishing to develop communication skills for the workplace. Students who work closely with their counselors can use this area of emphasis to prepare for majoring at a four-year college in world languages as well as any other majors which require proficiency in one or more world languages.

The Individual and Society Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

### Student Learning Outcomes

Upon completion of this program, the student will be able to:

- examine human diversity in relation to psychological theory.
- identify the consequences of ethnocentrism and gender bias on social interactions.
- analyze the influence of culture, family, society, and environment on an individual's development.
- analyze patterns of social problems which are based on ethnic and cultural differences in the United States.

### Certificates of Achievement

#### CSU General Education Certificate of Achievement Certificate

This certificate is designed for students planning to transfer to a California State University (CSU) campus. Completion of this certificate ensures that the student has met the lower division General Education requirements for all CSU campuses.

### Certificate Requirements

### Student Learning Outcomes

Upon completion of this program, the student will be able to:

- explain the values of a culture as expressed through its art or language.
- demonstrate effective expository and persuasive writing skills.
- develop a reasoned solution to a problem.
- evaluate new and accepted ideas about the natural universe using testable methodology.
- evaluate the methods of inquiry and evidence used in the behavioral and social sciences.

#### Intersegmental General Education Transfer (IGETC) Certificate of Achievement Certificate

This certificate is designed for students planning to transfer to a California State University (CSU) or University of California (UC) campus. It ensures that the student has met the lower division General Education/Breadth requirements for all CSU and UC campuses.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- explain the values of a culture as expressed through its art or language.
- demonstrate effective expository and persuasive writing skills.
- develop a reasoned solution to a problem.
- evaluate new and accepted ideas about the natural universe using testable methodology.
- evaluate the methods of inquiry and evidence used in the behavioral and social sciences.

Interdisciplinary Studies (INDIS) Courses

INDIS 299 Experimental Offering in Interdisciplinary Studies

Units: 0.5 - 4

Prerequisite: None.

This is the experimental courses description.

INDIS 499 Experimental Offering in Interdisciplinary Studies

Units: 0.5 - 4
Hours: 18 hours LEC
Prerequisite: None.
Advisory: CISC 300
Transferable: CSU

This course is designed to familiarize students with the skills required to succeed in an online course. It explores how to use various Internet tools to effectively learn in an online environment. Topics include online course equipment needs; using a word processor to support class assignments, sending email attachments and other advanced features of email programs; using online discussion forums and synchronous chat sessions effectively in order to work collaboratively online; researching on the Internet and how to critically evaluate Internet resources; and time management and study skills related to being an online student. The course is taught in a hybrid format combining in-class sessions with online activities. There are only four class meetings and the rest of the course occurs fully online.

INDIS 1000 Learning Communities

Units: 0.5 - 12
Prerequisite: None.
Faculty and Staff

Behavioral and Social Sciences

Akawi, Robin (2022)
Psychology
A.A., Adirondack Community College
B.A., Ph.D., State University of New York Albany

Beasley Cisneros, Annmarie (2015)
Anthropology
B.A., CSU Sacramento
M.A., CSU Sacramento

Interior Design

Are you someone who loves wandering the aisles of home decor stores or spends hours creating the perfect dream home inspiration board? The American River College Interior Design Department offers certificates and an associate degree to help you turn your creative passion into a profitable career. The classes offered allow students to exercise their innovative abilities in design, like IDES 330 Beginning Interior Design Studio. In contrast, other classes hone in the practical side of functionality, such as IDES 350 Codes and Universal Access for Interior Design. With the course catalog, students have the opportunity to learn about the fundamentals of interior design, business practices, design history, and work on a guided portfolio to help land their dream job.

In addition to residential and commercial interior design, the IDES program at American River College pioneered Design4Life. This program promotes health and longevity in people’s homes to ensure that they can safely live in their homes with different abilities and needs. Courses like IDES 355 Residences: Designed 4 Life and IDES 108 Lighting For Better Health advocate for the importance of an intentional and conscious design to increase the quality of life.

American River College’s Interior Design Department is mindful of the challenges students may have with commitments outside of school. We offer online classes with various class times on three, six, and eight-week schedules to accommodate the diverse student population. When planning your course schedule, we recommend referring to the catalog to see how a class is offered and if the class alternates being taught in the fall or spring. Presently, we do not offer courses for this program during the summer semester.

Degrees and Certificates Offered

A.A. in Interior Planning and Design
Para Professional Interior Planning and Design Certificate
Designed 4 Life Certificate
Event Design Coordinator Certificate
Green Building and Sustainable Design for Interiors Certificate
Interior Retail Merchandising Certificate
Sacramento Design History Certificate
Universal Design Certificate

Dean Angela Milano
Phone (916) 484-8433

Associate Degree

A.A. in Interior Planning and Design

This degree provides a foundation of education and skills in the expanding field of interior design. Topics include space planning, building and Life-Safety codes, and the Americans with Disabilities Act (ADA). Additionally, it covers a variety of subjects ranging from architectural and furniture history to reading construction documents.

Total Units: 39.5 - 43

The Interior Planning and Design Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- incorporate the appropriate finishes and materials for commercial and residential interiors.
- examine building types and occupancy classifications.
- create construction and presentation drawings that meet California building codes.
- assess client’s needs and plans with the Americans with Disabilities Act (ADA), Life-Safety Codes and Universal/Barrier-Free Design.
- analyze interiors to reflect the needs of the end user.
- design spaces that are aesthetically pleasing and incorporate sound design principles.

Career Information

The field of interior design offers a variety of career options, including residential design by itself, or with a specialty such as Universal Design, Green/Sustainable, smart-home, home office, and home theater design. It also offers commercial design, which can include ADA compliance, hospitality (restaurant, hotel, cruise ship) design, set design, and contract space planning. Additional career opportunities are available in product design, retailer, buyer/purchaser, manufacturers’ representative, and facilities management.
Certificate of Achievement

Para Professional Interior Planning and Design Certificate

This certificate provides a foundation of education and skills in the expanding field of interior design. It focuses on the fundamentals of both residential and commercial design. A variety of topics taught for this certificate include space planning, building and Life-Safety codes, the Americans with Disabilities Act (ADA), and architectural and furniture history. This certificate includes an internship within the interior design industry.

Total Units: 39.5 - 43

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- categorize building types and occupancy classifications.
- create construction and presentation drawings that meet California building codes.
- appraise the client's needs and plans with the Americans with Disabilities Act (ADA), Life-Safety codes and Universal/Barrier-Free Design.
- distinguish historical periods and styles of architecture and interior design.
- identify sales proposals.

- select textiles for the appropriate end use.

Career Information

This certificate offers a variety of career options, including residential design by itself or with a specialty of home office and home theater design. It also offers commercial design opportunities, which include space planning, hospitality (restaurant, hotel, cruise ship) design, set design, and historical and adaptive re-use design. Additional career opportunities are available as product designers, retailers, buyers, manufacturers' representatives, and facilities managers.

Certificates

Designed 4 Life Certificate

This certificate provides training in designing quality living environments. It includes various courses in Gerontology and Interior Design and covers how to successfully, safely, effectively, and aesthetically design interiors for all ages and abilities.

Certificate Requirements

Total Units: 9

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- evaluate interior environments and design changes in their function.
- categorize specific expectations and desires in terms of the client's needs.
- design environments for all ages and abilities.
- design interiors that reflect the needs of the client.

Career Information

Our aging population is requiring more specialized design for long-term independence. This certificate offers opportunities in careers for both gerontology and interior design.

Event Design Coordinator Certificate

This certificate offers courses to help with event planning and design coordination careers for Interior Designers. Events from fundraisers to weddings will be addressed. Our curriculum teaches the basics of the eventscape and how to incorporate it with space planning skills.

A minimum of 3 units from the following: | | 3
BUS 212 | Marketing for Small Businesses (1) | 
BUS 216 | Essential Records for the Small Business (1) | 
BUS 224 | Customer Service (1) | 
CISA 315 | Introduction to Electronic Spreadsheets (2) | 
FASHN 395 | Visual Merchandising (3) | 
IDES 326 | Interior Design Sales (3) | 
IDES 324 | Interior Design Business Practices (3) | 
IDES 330 | Beginning Interior Design Studio (3) | 
MGMT 362 | Techniques of Management (3) | 
TA 422 | Stage Lighting (3) | 
**Total Units:** | **8**

**Student Learning Outcomes**

Upon completion of this program, the student will be able to:

- utilize learned skills for planning and design of events.
- design and plan events.
- identify and design venues for planned events.
- research vendors for planned events.
- categorize elements required to execute a planned and designed event.

**Career Information**

Event and party coordinator planning and design.

**Green Building and Sustainable Design for Interiors Certificate**

This certificate provides students with expertise in the requirements for designing green and sustainable interiors.

**Certificate Requirements**

Course Code | Course Title | Units
--- | --- | ---
IDES 300 | Fundamentals of Interior Design | 3
IDES 302 | Introduction to Green Building and Sustainable Design in Interiors | 3
IDES 381 | Interior Lighting and Electrical Components | 3
**Total Units:** | **9**

**Student Learning Outcomes**

Upon completion of this program, the student will be able to:

- describe the history and development of the green movement as it applies to interior design
- choose appropriate materials and finishes to achieve a green and sustainable interior
- identify the skills that are required to apply for certification as a Leadership in Energy and Environmental Design (LEED) Accredited Professional and describe the process for receiving LEED certification for projects.
- assess the role of the interior designer as part of a team of professionals involved in creating green buildings and sustainable design

**Career Information**

This certificate offers a variety of career options in residential design. Additional career opportunities are available as product designers, retailers, buyers, manufacturers’ representatives, and Sacramento architectural and interiors historians.

**Sacramento Design History Certificate**

This program covers Sacramento’s architectural heritage of more than 150 years. The students will compare and contrast various regional styles from Old Town to 21st century modern. The styles of Julia Morgan, Frank Lloyd Wright, the Greene Brothers are analyzed.

**Certificate Requirements**

Course Code | Course Title | Units
--- | --- | ---
IDES 130 | Sacramento Design History - Architectural Gems | 0.5
IDES 131 | Sacramento Design History - Old Sacramento | 0.5
IDES 132 | Sacramento Design History - Victorian | 0.5
IDES 133 | Sacramento Design History - Bungalows | 0.5
IDES 134 | Sacramento Design History - Fabulous Forties | 0.5
IDES 135 | Sacramento Design History - Mid-Century Modern | 0.5
IDES 136 | Sacramento Design History - Modern and Contemporary | 0.5
IDES 312 | History of Interior Architecture and Furnishings II | 3
**Total Units:** | **6.5**

**Career Information**

This certificate offers additional opportunities for an interior designer specializing in green design. It helps students be more employable by demonstrating a more focused skill set.

**Interior Retail Merchandising Certificate**

This certificate provides a foundation of education and skills in the expanding field of interior design. Topics include the materials of interior design, architectural (global and regional) and furniture history, business practices, and event planning.

**Certificate Requirements**

Course Code | Course Title | Units
--- | --- | ---
IDES 300 | Fundamentals of Interior Design | 3
IDES 310 | History of Interior Architecture and Furnishings I | 3
IDES 322 | Materials of Interior Design | 3
IDES 324 | Interior Design Business Practices | 3
IDES 330 | Beginning Interior Design Studio | 3
**Total Units:** | **15**

**Student Learning Outcomes**

Upon completion of this program, the student will be able to:

- select the appropriate finishes and materials for commercial and residential interiors.
- analyze interiors that reflect the needs of the end user.
- design spaces that are aesthetically pleasing and that incorporate sound design principles.
Student Learning Outcomes

Upon completion of this program, the student will be able to:

- catalogue various styles and periods of architecture in Sacramento.
- research some of Sacramento's vast periods and styles of architecture.
- locate some of Sacramento's architectural gems.
- distinguish specific architectural details on Sacramento structures.

Career Information

1. Historical preservationist.
2. Architectural docent.
3. Tour guide.

Universal Design Certificate

This certificate prepares students to work in the field of interior design with an emphasis on Universal Design. Multi-generational or universal design addresses the needs and abilities of people of all ages. Universal Design gives careful consideration to space planning, accessibility, security, and privacy issues, to create an environment that promotes independent living for every member of the household.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- assess the client's interior space planning needs.
- design residences that will successfully meet the needs of most people.
- analyze how Universal Design is used in a floor plan.

Career Information

Students who have completed this certificate may work in full residential design. They may also specialize in residential kitchen and/or bath design.

Interior Design (IDES) Courses

IDES 101 Interior Design Careers

Units: 1
Hours: 18 hours LEC
Prerequisite: None.

This course explores a variety of career options in the multi-faceted field of interior design. Virtual and/or in-person field trips may be required.

IDES 102 Working with Clients

Units: 0.5
Hours: 9 hours LEC
Prerequisite: None.

This course covers methods for effectively working with clients. Virtual and/or in-person field trips may be required.

IDES 103 Furniture Markets

Units: 0.5
Hours: 9 hours LEC
Prerequisite: None.

This course provides an opportunity to learn about seasonal markets and view upcoming interior design offerings. Trends, markets, budgets, and products are discussed. Virtual and/or in-person field trips may be required.

IDES 104 Home Staging

Units: 0.5
Hours: 9 hours LEC
Prerequisite: None.

This course is a basic introduction to the process of staging homes for sale. Topics include model homes and resale. Virtual and/or in-person field trips may be required.

IDES 105 Color and Interior Design

Units: 0.5
Hours: 9 hours LEC
Prerequisite: None.

This course is a basic introduction to color and how it relates to interior design. Topics include basic dynamics of color, its principles, fundamentals, psychology, and applications. Virtual and/or in-person field trips may be required.

IDES 108 Lighting For Better Health

Units: 0.5
Hours: 9 hours LEC
Prerequisite: None.

This course introduces better lighting design that could improve your health. New research shows that properly designed lighting can enhance our human biology and overall good health. Virtual and/or in-person field trips may be required.

IDES 109 Interior Design Specifications

Units: 0.5
Hours: 9 hours LEC
Prerequisite: None.

This is a basic introduction to the process of specifying interior fixtures, furniture, and equipment. Topics include selection, documentation, and industry standards for specification writing. Virtual and/or in-person field trips may be required.

IDES 110 Estimating and Calculating for Interior Design

Units: 3
Hours: 54 hours LEC
Prerequisite: None.

This course includes techniques for accurately calculating yardage and materials of interior products for residential and commercial installations. Field trips may be required.
IDES 120 Seasonal Decorating
Units: 0.5
Hours: 9 hours LEC
Prerequisite: None.
This course introduces the basics for changing decor according to various seasons and holidays. Resourcing for props, elements, and accessories are included. This course covers both commercial and residential applications. Virtual and/or in-person field trips may be required.

IDES 121 Event Planning for Interior Designers
Units: 1
Hours: 18 hours LEC
Prerequisite: None.
This course is a basic introduction to event planning and how it relates to interior design. Topics include fundraisers, corporate events, and private events such as weddings and parties. Field trips are required. Pass/No Pass only.

IDES 130 Sacramento Design History - Architectural Gems
Units: 0.5
Hours: 9 hours LEC
Prerequisite: None.
This course explores the rich architectural and interior design history in the Sacramento area. Field trips are required. Pass/No Pass only.

IDES 131 Sacramento Design History - Old Sacramento
Units: 0.5
Hours: 9 hours LEC
Prerequisite: None.
This course explores the rich architectural and interior design history of Old Sacramento. Virtual and/or in-person field trips may be required.

IDES 132 Sacramento Design History - Victorian
Units: 0.5
Hours: 9 hours LEC
Prerequisite: None.
This course explores the styles of Victorian architectural and interior design history in the Sacramento area. Field trips are required. Pass/No Pass only.

IDES 133 Sacramento Design History - Bungalows
Units: 0.5
Hours: 9 hours LEC
Prerequisite: None.
This course explores the architectural and interior design history of bungalows in the Sacramento area. Field trips are required. Pass/No Pass only.

IDES 134 Sacramento Design History - Fabulous Forties
Units: 0.5
Hours: 9 hours LEC
Prerequisite: None.
This course explores architectural and interior design history of the Fabulous Forties area in Sacramento. Field trips are required. Pass/No Pass only.

IDES 135 Sacramento Design History - Mid-Century Modern
Units: 0.5
Hours: 9 hours LEC
Prerequisite: None.
This course explores mid-century modern architectural and interior design history in the Sacramento area. Field trips are required. Pass/No Pass only.

IDES 136 Sacramento Design History - Modern and Contemporary
Units: 0.5
Hours: 9 hours LEC
Prerequisite: None.
This course explores the Modern and contemporary architectural and interior design history in the Sacramento areas. Field trips are required. Pass/No Pass only.

IDES 300 Fundamentals of Interior Design
Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.
Transferable: CSU
This introductory survey course addresses various aspects of the interior design industry and profession. It includes the study and application of design principles and elements; influences of historical, cultural, and functional design factors; the selection and arrangement of interior furnishings and materials; and an overview of career options in interior design. Sustainability impact is emphasized throughout the content. Virtual and/or in-person field trips may be required.

IDES 302 Introduction to Green Building and Sustainable Design in Interiors
Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Transferable: CSU
This course introduces the basic principles of green building and sustainable design (GBSD) and focuses on applications in the practice of commercial or residential interior space planning and design. It includes a historic perspective and the appropriate application of these principles in the profession and also introduces the requirements for Leadership in Energy and Environmental Design (LEED) certification. Field trips may be required.

IDES 310 History of Interior Architecture and Furnishings I
Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.
Transferable: CSU; UC
General Education: AA/AS Area I; CSU Area C1; CSU Area C2; IGETC Area 3A (effective Fall 2025); IGETC Area 3A
This course covers global historical relationships between the decorative arts, period furniture, and interior architecture from antiquity through...
the 1800s. Emphasis is on style development as it relates to socio-economic and political factors of the times, as well as identification of specific furniture styles and architectural features. Field trips may be required.

**IDES 312 History of Interior Architecture and Furnishings II**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.  
**Transferable:** CSU, UC  
**General Education:** AA/AS Area I; CSU Area C1; Cal-GETC Area 3A (effective Fall 2025); IGETC Area 3A

This course covers the historical relationship between the decorative arts, period furniture, and interior architecture from the American Colonial periods through Modern and Contemporary. Emphasis is on style development as it relates to socio-economic and political factors of the times, as well as identification of specific furniture styles and architectural features. Asian, African, Mid-Eastern, and other global styles are also included. Virtual and/or in-person field trips may be required.

**IDES 322 Materials of Interior Design**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.  
**Transferable:** CSU

This course covers the industry, technology, products, and specification issues of interior finish materials. Textiles, floor coverings, paint and wall coverings, window treatments, furnishings and surface materials, and lighting are included. Virtual and/or in-person field trips may be required.

**IDES 324 Interior Design Business Practices**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Transferable:** CSU

This course covers the business and practical aspects of interior design. Topics include ethical practices, methods of compensation, establishing clients’ budgets, estimating costs, purchasing, billing, marketing, and sales. In-person or virtual field trips may be required.

**IDES 326 Interior Design Sales**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Transferable:** CSU

This course covers various aspects of selling proposed residential and commercial design projects. Included are personal presentation, selling techniques, making the sale, closing the deal, job completion, and follow up. Field trips may be required.

**IDES 330 Beginning Interior Design Studio**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** MATH 25 or 41 with a grade of “C” or better  
**Transferable:** CSU

This course covers basic construction, layouts, products, and materials. Topics include floor plans, structural elements, and interior space planning. Presentation methods are explored. Virtual and/or in-person field trips may be required.

**IDES 332 Portfolio and Presentation in Interior Design**

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Prerequisite:** IDES 330 with a grade of “C” or better  
**Corequisite:** IDES 350  
**Transferable:** CSU

This course covers procedures for developing finished presentations in interior design. It includes methods of visually communicating with clients. It also covers both traditional and technology-based portfolio preparation. Virtual or in-person field trips may be required.

**IDES 334 Interior Environment and Space Planning**

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Prerequisite:** IDES 330 with a grade of “C” or better  
**Corequisite:** IDES 350  
**Transferable:** CSU

This course covers the analysis and application of design concepts and space planning techniques. It includes resources necessary to creatively solve problems relative to the function and quality of human environments. Topics include the integration of barrier-free design, the Americans with Disabilities Act (ADA), resource management, and environmental psychology design. Field trips may be required.

**IDES 340 Beginning CADD for Interior Design**

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Prerequisite:** IDES 330 with a grade of “C” or better  
**Transferable:** CSU

This course employs beginning computer-aided drafting and design (CADD) for interior design projects. Floor plans, space planning, elevations, and perspectives are created. Field trips may be required.

**IDES 341 Intermediate CADD for Interior Design**

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Prerequisite:** IDES 340 with a grade of “C” or better  
**Advisory:** IDES 334  
**Transferable:** CSU

This course is a continuation of the computer-aided drafting and design (CADD) skills developed in IDES 340, utilizing a different CADD program. It also includes placing floor plans into view ports, adding attributes, and the creation of customized tool bars. Field trips are required.

**IDES 350 Codes and Universal Access for Interior Design**

**Units:** 2  
**Hours:** 36 hours LEC  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.  
**Transferable:** CSU

This course explores California building codes and standards, federal regulations concerning life-safety issues, and barrier-free access relative to residential and contract design. The Americans with Disabilities Act
(ADA) and Universal Design are detailed. Attention is given to the interior designer’s liability for the public’s health, safety, and welfare.

**IDES 351 Codes and Universal Access Lab**

*Units: 1*
*Hours: 54 hours LAB*
*Prerequisite: IDES 330 with a grade of "C" or better*
*Corequisite: IDES 350*
*Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGRD 300; OR ESLR 340 AND ESLW 340.*
*Transferable: CSU*

This course applies the content and skills from IDES 350 to various design scenarios requiring Universal Design, Barrier-Free design and ADA (Americans with Disabilities Act) compliance. Projects are drafted following prescribed criteria.

**IDES 355 Residences: Designed 4 Life**

*Units: 3*
*Hours: 54 hours LEC*
*Prerequisite: None.*
*Transferable: CSU*

This course covers the successful design of residences for a variety of users with different abilities related to age, mobility, etc. It encompasses specialty and adaptive appliances, plumbing fixtures, cabinetry, appropriate finish materials, space planning, and furnishings. In-person or virtual field trips may be required.

**IDES 381 Interior Lighting and Electrical Components**

*Units: 3*
*Hours: 54 hours LEC*
*Prerequisite: None.*
*Transferable: CSU*

This course introduces green and sustainable lighting design in both commercial and residential interiors. Topics include Leadership in Energy and Environmental Design (LEED) certification, photometrics, light sources, and effective lighting control. Virtual and/or in-person field trips may be required.

**IDES 412 Specifications for Interior Design**

*Units: 3*
*Hours: 54 hours LEC*
*Prerequisite: None.*
*Transferable: CSU*

This course introduces the process of specifying interior fixtures, furniture, and equipment. Topics include selection, documentation, and industry standards for specification writing. Field trips may be required.

**IDES 494 Topics in Interior Design**

*Units: 2 - 4*
*Hours: 36 - 72 hours LEC*
*Prerequisite: None.*
*Advisory: CISC 300; ENGRD 102 or 103, and ENGRD 116 with a grade of "C" or better; OR ESLR 320 and ESLW 320 with a grade of "C" or better; OR placement through assessment process.*
*Transferable: CSU*

This course is designed to provide an opportunity to study topics in Interior Design not included in current course offerings. Examples include kitchen & bath design; barrier-free design; in depth period style design.

**IDES 495 Independent Studies in Interior Design**

*Units: 1 - 3*
*Hours: 54 - 162 hours LAB*
*Prerequisite: None.*
*Transferable: CSU*

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

**IDES 498 Work Experience in Interior Design**

*Units: 0.5 - 4*
*Hours: 30 - 300 hours LAB*
*Prerequisite: None.*
*Enrollment Limitation: Students must be in a paid or unpaid internship, volunteer position, or job related to interior design with a cooperating site supervisor. Students are advised to consult with the Interior Design Department faculty to review specific certificate and degree work experience requirements.*
*Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLW 340.*
*Transferable: CSU*

General Education: AA/AS Area II(b)

This course provides students with opportunities to develop marketable skills in preparation for employment or advancement within the field of interior design. It is designed for students interested in work experience and/or internships in transfer-level degree occupational programs. Course content includes understanding the application of education to the workforce, completion of Title 5 required forms which document the student's progress and hours spent at an approved training site, and developing workplace skills and competencies.

During the semester, the student is required to complete 37.5 hours of related paid work experience, or 30 hours of related unpaid work experience for 0.5 unit. An additional 37.5 or 30 hours of related work experience is required for each additional 0.5 units. All students are required to attend the first course meeting, a mid-semester meeting, and a final meeting. Additionally, students who have not already successfully completed a Work Experience course will be required to attend weekly orientations while returning participants may meet individually with the instructor as needed. Students may take up to 16 units total across all Work Experience course offerings. This course may be taken up to four times when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

**IDES 499 Experimental Offering in Interior Design**

*Units: 0.5 - 4*
*Prerequisite: None.*

This is the experimental courses description.
International Studies

This degree provides an understanding of international issues and the impact of globalization on developed and developing economies. It covers a number of issues, including trade, economic development, war and conflict, and foreign relations and diplomacy.

Associate Degrees for Transfer

A.A.-T. in Global Studies

This degree provides an understanding of international issues and the impact of globalization on developed and developing economies. It covers a number of issues, including trade, economic development, war and conflict, and foreign relations and diplomacy.

The Associate in Arts in Global Studies for Transfer (AA-T) degree may be obtained by completion of 60 transferable, semester units with a minimum overall grade point average (GPA) of 2.0, including (a) a minimum grade of “C” (or “P”) for each course in the major or area of emphasis described in the Required Program, and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education-Breadth Requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- evaluate their role as a member of a global network of interdependent societies.
- formulate a cohesive understanding of world issues and events and incorporate that knowledge into their daily life and career.
- analyze various social-scientific perspectives that explain the causes and consequences of globalization.
- apply various social-scientific perspectives to daily life and work environment, recognize people’s socio-economic, political, and geographical background.
- analyze local and societal issues and problems within a global context.

Total Units: 29

The International Studies Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- evaluate his/her role as a member of a global network of interdependent societies.
- formulate a cohesive understanding of world issues and events and incorporate that knowledge into his/her daily life and career.
- analyze various social-scientific perspectives that explain the causes and consequences of globalization.
- apply various social-scientific perspectives to daily life and work environment.
- recognize people's socio-economic, political, and geographical background.
- analyze local and societal issues and problems within a global context.

Career Information

This degree provides career opportunities with local, state, federal agencies, and in the private sector. The core courses provide students with diverse knowledge to work in a variety of fields, including international business, law, government and non-governmental service, social services, natural sciences, health fields, and education.

International Studies (IS) Courses

IS 301 Introduction to Global Studies

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340.

Transferrable: CSU; UC
General Education: AA/AS Area V(b); AA/AS Area VI; CSU Area D; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4

This course introduces an interdisciplinary and multi-dimensional understanding of the process of globalization, including its history, socio-economic, political, and cultural causes and consequences. It focuses on how nation-states are increasingly becoming part of complex interconnected global economic, political, social, cultural, and ecological systems and structures. This course deals with how the actions of one nation state shapes trends and events in other nations. It also deals with how actions and events in one nation create a ripple effect across the globe and the extent to which nation-states are able to maintain a level of national autonomy and national identity within a global system. It utilizes globalization theories to provide a scientific framework for understanding various aspects of globalization including socio-economic, political, cultural, and ecological benefits and costs.

IS 302 Issues in Global Studies

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340.

Transferrable: CSU; UC
General Education: AA/AS Area V(b); CSU Area D; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4

This course introduces the origins, current status, and future trends of major transnational issues confronting the global community. Topics include economic development and inequality, environmental issues and challenges, human rights, human security (food, water, and health care), international conflict and security issues, migration, and population trends. This course also focuses on global governance, including the study of collective global responsibility.

IS 305 Introduction to Middle East Studies

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340.

Transferrable: CSU; UC
General Education: AA/AS Area V(b); AA/AS Area VI; CSU Area D7; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4

This course introduces the contemporary Middle East from global and interdisciplinary perspectives. It covers the major developments and events that have shaped the socio-economic and political institutions and structures within a distinct geopolitical area. This course examines processes of state formation, colonialism, independence movements, major power players in the region, and the modern challenges of globalization. It also covers the consequences for foreign policy. Countries may include but are not limited to: Algeria, Egypt, Iran, Iraq, Israel, Jordan, Lebanon, Libya, Palestine, Saudi Arabia, Syria, and Tunisia. This course provides a foundation in Middle East Studies in the context of a globally interconnected world system.

IS 310 Peace and Conflict

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340.

Transferrable: CSU; UC
General Education: AA/AS Area V(b); AA/AS Area VI; CSU Area D7; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4

This course examines the political and socioeconomic causes and consequences of peace and conflict from different theoretical views. It includes an analysis of inter- and intra-state conflicts and wars, terrorism, ethnic and sectarian conflicts, and gender issues and conflicts. Additional topics include war theory, "negative peace," post-
conflict reconciliation, policy recommendations and proposed solutions for conflict resolution, and achieving peace through the engagement of the global community. This course is formerly known as SOCSC 310.

**IS 312 Current Global Development Issues**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.

**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340.

**General Education:**  
- AA/AS Area V(b); AA/AS Area VI; CSU Area D7; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4G

This course covers current socio-economic and political issues in developing countries in a global context. It presents alternative theories pertaining to the causes and consequences of development, underdevelopment, and uneven development with a particular focus on the issues of globalization including political and social change. It also includes proposed solutions to various development problems from various scientific perspectives.
Journalism

American River College provides a strong introduction to both general studies and a journalism or mass communication major. You can begin with a course in news writing and reporting, and an introduction to the mass media. Both these courses are accepted by the California State University campuses which offer a bachelor's degree in journalism.

The campus newspaper, The Current offers valuable experience in writing, editing, photography, design and desktop publishing. Your portfolio can help you earn scholarships and internships--powerful assets to starting a career.

ARC also offers an associate in arts degree in journalism. This program is designed to prepare students for entry-level work in community journalism and for successful transfer to a university.

Degrees Offered

A.A.-T. in Journalism and Mass Communications
A.A. in Journalism and Mass Communication

Interim Dean Carina Hoffpauir
Department Chair Rachel Leibrock
Phone (916) 484-8101

Associate Degrees for Transfer

A.A.-T. in Journalism and Mass Communications

The Associate in Arts in Journalism for Transfer provides students with a major that fulfills the general requirements of the California State University for transfer. Students with this degree will receive priority admission with junior status to the California State University system.

The Associate in Arts in Journalism for Transfer (A.A.-T.) may be obtained by completion of 60 transferable, semester units with a minimum overall grade point average (GPA) of 2.0, including (a) a minimum grade of "C" (or "P") for each course in the major or area of emphasis described in the Required Program, and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education-Breadth Requirements.

Students interested in transferring to a CSU campus to pursue a bachelor's degree in journalism should meet with a counselor to confirm the courses required for lower division preparation in the major.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- analyze content of newspapers, magazines, and online media.
- demonstrate an understanding of basic news, feature writing, and reporting in print and on-line media.
- critique his or her own journalistic work and the work of others.
- apply knowledge of grammar and AP style to create mass media products that conform to journalistic conventions.
- produce news and feature articles and/or news and feature photographs for publication in a newspaper or on-line publication.
- apply principles of audience and journalistic ethics to writing and photography, especially as the student's journalistic work relates to gender, ethnicities, and culture.
- demonstrate understanding of the fundamentals of mass media theories, concepts, and practices as they relate to gender, ethnicity, and cultural constructs.

Career Information

The Journalism AA-T degree prepares students for careers in print, broadcast, and online news media.

Associate Degrees

A.A. in Journalism and Mass Communication

This program offers comprehensive training for careers in journalism and communications. Students learn how to create journalistic content for a variety of media platforms, including print, broadcast and online. The program covers news writing and reporting, public relations writing and techniques, photojournalism, and multimedia journalism. It also offers instruction in design and production for both print and online media products.

Total Units: 29

The Journalism and Mass Communication Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- write and edit news, features, editorials, and press releases that adhere to professional journalistic standards for a variety of outlets.
- conduct research and evaluate information using appropriate methods.
- analyze and evaluate media materials for credibility, fairness, accuracy, appropriate style and grammatical correctness.
- apply journalism ethics and law appropriate to professional practice.
- complete journalistic assignments on deadline.
- create multimedia to accompany text news and feature stories in a variety of formats.
- design, develop and lay out pages for different types of publications using a variety of software programs and applying visual design principles.
- identify and explain the processes, elements, history, theory, and effects of journalism and modern mass media in society.

Career Information

This program is designed to train students for entry-level positions as reporters, writers, editors, producers, photographers, designers, copy editors, and fact checkers for newspapers, magazines, broadcast outlets, websites and other media platforms. It also trains them for entry-level communications/public relations positions that include writing, editing, photography, and/or page layout and design duties. Some career options may require more than two years of college study. This program prepares journalism/mass communications students who plan to transfer to four-year institutions.

Journalism (JOUR) Courses

**JOUR 299 Experimental Offering in Journalism**

Units: 0.5 - 4
Prerequisite: None.

This is the experimental courses description.

**JOUR 300 Newswriting and Reporting**

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or 312 AND ENGWR 300, OR ESLW 340.
Transferable: CSU
General Education: AA/AS Area II(b)
C-ID: C-ID JOUR 110

This course covers evaluating, gathering, and writing news in accepted journalistic style for different types of media. Topics include personal interviews, along with research, fact-checking and coverage of speeches, meetings, and other events. In addition, the role of the reporter and the legal and ethical issues related to reporting are examined.

**JOUR 301 Advanced Newswriting and Reporting**

Units: 3
Hours: 54 hours LEC
Prerequisite: JOUR 300 with a grade of "C" or better
Transferable: CSU
C-ID: C-ID JOUR 210

This course covers the development of advanced skills of reporting, interviewing, writing, and editing in the range of work handled by a general assignment or beat reporter. It emphasizes in-depth research, critical analysis, and story format. It also introduces editing and advanced feature and editorial writing.

**JOUR 310 Mass Media and Society**

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Transferable: CSU; UC
General Education: AA/AS Area V(b); CSU Area D; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4
C-ID: C-ID JOUR 100

The course is a survey of the mass media. It covers the history, philosophy, structure, and trends of mass media, as well as the theories that help to explain its effects on social institutions. It includes an exploration of media literacy, economics, technology, law, ethics, and social issues, including cultural, gender and ethnic diversity.

**JOUR 320 Race and Gender in the Media**

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Transferable: CSU; UC
General Education: AA/AS Area V(b); AA/AS Area VI; CSU Area D3; CSU Area D4; CSU Area D7; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4C

This course examines the roles of gender, ethnicity, race and social class as represented and documented in the mass media. These issues are analyzed within the context of media content, development, policy, and ownership, including stereotypes, equity and diversity, representation, and the role of alternative and community media. Critical thinking is emphasized through the review of mass media, focusing on the contributions of diverse groups to mass media and mass communication as an agent, gatekeeper and documenter of social change. Critical thinking will be emphasized in this course.

**JOUR 340 Writing for Publication**

Units: 3
Hours: 54 hours LEC
Prerequisite: Eligible for ENGWR 300.
Transferable: CSU
This course introduces writing non-fiction for publication. Emphasis is on analyzing online and print magazines; finding ideas; writing a query letter; developing a saleable magazine idea and article; researching and interviewing; as well as organizing, writing and marketing an article. Field trips may be required.

**JOUR 350 Writing for Broadcasting/ Podcasting**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None  
**Transferable:** CSU

This course introduces the theory and technique of writing for the broadcast media. It includes reporting for radio and television news, writing and storyboarding commercials and public service programming, and an introduction to production techniques. It is recommended for students as preparation for work in broadcasting, instructional media, and related fields.

**JOUR 351 Public Relations Writing and Media Techniques**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None  
**Transferable:** CSU  
**C-ID:** C-ID JOUR 150

This course is a study of public relations (PR), including planning PR campaigns, preparing client messages for newspapers, magazines, radio, broadcast and online outlets, and working with reporters to position stories. It examines public relations techniques in business, education, entertainment, social service, and other fields. It also covers crisis PR.

**JOUR 360 Photojournalism**

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Prerequisite:** None  
**Transferable:** CSU  
**C-ID:** C-ID JOUR 160

This course is an introduction to the theory and technique of telling stories with pictures. The role of the photojournalist in the media, pertinent ethical and legal issues, and professional standards are emphasized. Topics include digital still camera operation, composition and lighting, digital image processing, news judgment, and accuracy. Also covered are environmental portraits, photo stories, and feature, sports, and breaking news photography.

**JOUR 361 Multimedia Journalism**

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Prerequisite:** JOUR 360 with a grade of "C" or better  
**Transferable:** CSU  
**C-ID:** C-ID JOUR 120

This course is an introduction to the theory and technique of combining still images, audio, and video to create multimedia photojournalism content for distribution via broadcast media, social media and the internet. The course introduces basic creative concepts and technical elements of capturing and editing video, audio, and still images to create visual media projects. Students will explore the creative and technical production possibilities of merging visual media and the various software used to edit this content. Students will receive hands-on experience with one or more of the following: smartphone cameras, mirrorless cameras, and HDSLR camera video capture techniques and accessories used in video and audio production. Students will complete a final visual media project.

**JOUR 404 Editing and Production**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None  
**Advisory:** JOUR 300  
**Transferable:** CSU

This course provides instruction and practice in editing and design, including page makeup, copy editing, photo editing, legal/ethical issues and production methods for newspapers, magazines, and other publications. It also includes preparing, planning, and organizing publications.

**JOUR 410 College Media Production I**

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Prerequisite:** JOUR 300 with a grade of "C" or better  
**Transferable:** CSU  
**C-ID:** C-ID JOUR 130

This course focuses on instruction in writing and producing student news media, primarily the publication, The Current, a journalistic product for distribution to a college-wide audience. Topics will include: researching, reporting, and writing articles; taking photographs or managing artwork, participating in editing, caption writing, and layouts; editing articles, writing headlines, and planning packages in conjunction with editors for publication. Ethical and legal aspects of communication are also covered. This course prepares students for transfer work in journalism or entry-level jobs in the field. This course is required for the A.A degree in journalism and is part of the A.A.-T Journalism degree. JOUR 420 is the optional lab component for this course.

**JOUR 411 College Media Production II**

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Prerequisite:** JOUR 410 with a grade of "C" or better  
**Transferable:** CSU  
**C-ID:** C-ID JOUR 131

During this second-semester course, which builds on experience learned in JOUR 410, students are instructed on writing and producing student news media, primarily the publication, The Current, a journalistic product for distribution to a college-wide audience. It focuses on intermediate writing and production skills in the following areas: researching, reporting, and writing, taking photographs or managing artwork, and participating in editing, caption writing, and layouts; editing articles, writing headlines, and planning packages in conjunction with editors for publication.

In this second-semester course, students may serve in leadership roles, by learning to participate in editorial meetings in which issues are planned; research, assign, and edit assignments of reporters and photographers for publication;

Ethical and legal aspects of communication are also covered. This course prepares students for transfer work in journalism or entry-level jobs in the field. This course is required for the A.A. degree in journalism and is part of the A.A.-T Journalism degree. JOUR 421 is the optional lab component for this course.

**JOUR 412 College Media Production III**

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Prerequisite:** JOUR 411 with a grade of "C" or better  
**Transferable:** CSU

This third-semester course builds on the experience gained in JOUR 411. It focuses on advanced intermediate writing and production skills, using the school newspaper The Current, as a practical laboratory. The course provides the opportunity to work in at least three of the following areas: researching, writing, and editing articles for the publications; taking photographs and/or managing artwork and creating graphic illustrations; developing multimedia stories, designing pages or posting to the
Students will learn to conduct editorial meetings in which issues are planned; research, assign, and edit assignments from reporters and photographers for publication; and manage production. Ethical and legal aspects of communication are also covered.

**JOUR 413 College Media Production IV**

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Prerequisite:** JOUR 412 with a grade of "C" or better  
**Transferable:** CSU

In this course, which builds on the experience gained in JOUR 412, instruction is provided in leadership for students who function as editors-in-chief and managing editors using The American River Current as a practical laboratory. Students will plan publication issues and manage section editors, reporters, graphic artists and/or photographers on staff. Students will lead staff meetings in which they plan the vision and content of issues; research and suggest story ideas to section editors; manage section editors and staff; and manage the production of every aspect of each issue of the publication. Ethical and legal aspects of communication and media are also covered for students who serve in top leadership roles.

**JOUR 420 College Media Production Lab I**

**Units:** 0.5 - 3  
**Hours:** 27 - 162 hours LAB  
**Prerequisite:** None.  
**Corequisite:** JOUR 404 or 410  
**Transferable:** CSU

This lab course provides inexperienced journalism students with instruction in writing, editing, photography, multimedia, design, and computer-based publication. This includes one-on-one and small-group instruction in publication software, such as Adobe Creative Suite programs, and Web content management systems.

**JOUR 421 College Media Production Lab II**

**Units:** 0.5 - 3  
**Hours:** 27 - 162 hours LAB  
**Prerequisite:** JOUR 420 with a grade of "C" or better  
**Corequisite:** JOUR 404 or 411  
**Transferable:** CSU

This lab course provides experienced journalism students with instruction in writing, editing, photography, artwork, design, and computer-based publication, as well as instruction in staff management and leadership. This includes advanced lessons in publication software, such as Adobe Creative Suite programs, and Web content management systems.

**JOUR 495 Independent Studies in Journalism**

**Units:** 1 - 3  
**Hours:** 54 - 162 hours LAB  
**Prerequisite:** None.  
**Transferable:** CSU

Independent Study is an opportunity for the student to extend classroom experience in journalism, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in journalism and secure approval. Only one independent study for each catalog course will be allowed.

**JOUR 499 Experimental Offering in Journalism**

**Units:** 0.5 - 4  
**Prerequisite:** None.  
**Transferable:** CSU

This is the experimental courses description.
Kinesiology and Athletics

The ARC Kinesiology and Athletics program offers a wide variety of courses that improve physical fitness, sport skills, and dance performance abilities. All activity classes are open to both men and women unless noted.

Students may enroll in more than one physical education class at the same time. They may not enroll in more than two sections of the activity during the same semester. DANCE, FITNS, PACT, and TMACT classes may be taken four times for credit. The prefixes "ADAPT, DANCE, FITNS, PACT, TMACT, and SPORT" refer to courses used to satisfy the one-unit physical education graduation requirement.

Courses which are designated with a KINES prefix are theory-oriented rather than activity-oriented and DO NOT satisfy the physical education activity requirement.

Degrees and Certificates Offered

Associate Degrees for Transfer

A.A.-T. in Kinesiology

This Associate in Arts in Kinesiology for Transfer provides a path to students who wish to transfer to a CSU campus in Kinesiology and serves the diverse needs of students who wish to obtain a broad and an in-depth understanding of the field. Additionally, this degree allows students to learn the fundamental principles and practices of Kinesiology in order to create a solid foundation for their future personal and academic endeavors.

The Associate in Arts in Kinesiology for Transfer provides students with a major that fulfills the general requirements of the California State University for transfer. Students with this degree will receive priority admission with junior status to the California State University system.

The Associate in Arts in Kinesiology for Transfer (AA-T) may be obtained by the completion of 60 transferable, semester units with a minimum of a 2.0 GPA, including (a) the major or area of emphasis described in the Required Program outlined below (earning a C or better in these courses), and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education Breadth Requirements.

### Career Information

This degree provides an educational and practical foundation for students interested in multiple professions in the area of physical education. It also provides coursework required for transfer in physical education majors. Topics include introduction to physical education, care and prevention of athletic injuries, CPR, psychology, nutrition, dance, fitness, recreation, and sport. Students who work closely with their counselor can use this degree to prepare for majors in kinesiology at a four-year college.

### Student Learning Outcomes

Upon completion of this program, the student will be able to:

- recount the historical evolution of physical education/kinesiology.
- evaluate current theories, philosophies, and trends in the field of kinesiology.
- identify key aspects of personal fitness as it relates to physical fitness programs.
- construct a philosophy of kinesiology that includes goals for lifetime fitness.
- discuss how sociological, historical, and philosophical factors influence the field of kinesiology.
- outline the basic principles of current accepted nutritional standards for physically active individuals.
- describe the basic structure of the human body and how its various systems respond to exercise.

### Career Information

This degree is designed to prepare students for transfer to a four-year college or university in Kinesiology. Career opportunities include, but are not limited to, kinesiology instructor, exercise physiologist, athletic trainer, strength and conditioning coach, athletic coach, personal trainer, physical educator, and corporate fitness director.

### A.S. in Physical Education

This degree provides an educational and practical foundation for students interested in multiple professions in the area of physical education. It also provides coursework required for transfer in physical education majors. Topics include introduction to physical education, care and prevention of athletic injuries, CPR, psychology, nutrition, dance, fitness, recreation, and sport. Students who work closely with their counselor can use this degree to prepare for majors in kinesiology at a four-year college.

PSYC 300    General Principles             3

Total Units: 27

The Sports Medicine Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- list the minimum requirements to become a certified athletic trainer
- identify normal musculoskeletal anatomy
- evaluate common athletic-related injuries
- demonstrate proper wrapping and taping skills needed to protect commonly injured joints
- develop a diet for an active individual that is based on current accepted nutritional values
- create treatment protocols for common athletic-related injuries
- develop basic rehabilitation protocols for common athletic-related injuries
- manage the daily athletic training room set-up and break-down for fall and spring sports
- discuss how injuries affect the psychological health of the injured athlete

Certificates of Achievement

Fitness Specialist Certificate

This program prepares students for employment in the health and fitness industry and equips them with the knowledge and hands-on experience necessary to begin a career in the dynamic field of fitness. Upon completion of this certificate, the students are prepared to take national certification exams such as the National Academy of Sports Medicine (NASM), American College of Sports Medicine (ACSM), or the American Council of Exercise (ACE).

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- design, implement, and analyze fitness programs for a diverse population.
- critique and explore various health and fitness job opportunities.
- demonstrate knowledge and skills necessary to pass national certification exams such as NASM, ACSM, and ACE.

Career Information

The fitness certificate program is ideal for anyone desiring an entry-level position as a personal trainer, fitness center or health club employee, group exercise instructor, or strength and conditioning coach.

Senior Fitness Specialist Certificate

The Senior Fitness Specialist program prepares students for employment as a fitness leader in settings where people ages 50+ exercise with other age groups and in settings that cater to older adults. The program provides students with the knowledge and hands on experience necessary to begin a career in this growing field of fitness.

Total Units: 16

1 One unit of work experience is required in one of the following environments: recreation center, senior center, senior community, assisted living facility, or another site for seniors.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- recommend beneficial exercises for seniors and individuals with disabilities or medical conditions.
- behave responsibly at work, exhibiting initiative and self-management in situations where it is needed.
- create an individualized fitness plan to promote functional independence throughout the remainder of life.
- analyze how nutrition plays a part in overall health and aging.
- compare and contrast different self and group motivational techniques for staying active.
- identify and respond to life-threatening conditions (including breathing emergencies, cardiac emergencies, and severe bleeding).
- evaluate physical activities relative to risk factors.
- design and lead a group exercise activity, and provide modifications and variations to exercises when necessary.
- identify basic principles of body mechanics and posture.
- design an individualized exercise prescription program that includes muscular strength and muscular endurance development.
- explain normal aging-related changes and analyze how lifestyle choices influence the aging process.
- demonstrate techniques for validating and encouraging older adults during fitness activities.

Career Information

The Senior Fitness Specialist program is ideal for anyone seeking an entry-level position as a fitness leader in community, recreation, and senior centers, health clubs, retirement and assisted living communities, and other sites that cater to seniors.

Adapted Physical Education (ADAPT) Courses

**ADAPT 310 Adapted Lifetime Sports**

- **Units:** 1
- **Hours:** 54 hours LAB
- **Prerequisite:** None.
- **Enrollment Limitation:** A statement from a health care professional verifying the disability, contraindications, and recommended activities.
- **Transferable:** CSU; UC (Any or all PE activity courses combined: maximum credit, 4 units)
- **General Education:** AA/AS Area III(a); CSU Area E2

This course introduces students with physical disabilities to a variety of sports. Modifications and assistive devices are used to enable students to safely participate in a variety of sports, such as archery, badminton, volleyball, tennis, soccer, softball, basketball, and golf.

**ADAPT 314 Wheelchair Sports and Games**

- **Units:** 1
- **Hours:** 54 hours LAB
- **Prerequisite:** None.
- **Enrollment Limitation:** A statement from a health care professional verifying the disability, contraindications, and recommended activities.
- **Transferable:** CSU; UC (Any or all PE activity courses combined: maximum credit, 4 units)
- **General Education:** AA/AS Area III(a); CSU Area E2

This course is designed for individuals with disabilities who use a wheelchair for mobility or who are ambulatory, but more successful in sports when using a wheelchair. Sports include, but are not limited to, basketball, quad rugby, volleyball, badminton, and tennis.

**ADAPT 316 Adapted Personal Safety**

- **Units:** 1
- **Hours:** 54 hours LAB
- **Prerequisite:** None.
- **Enrollment Limitation:** A statement from a health care professional verifying the disability, contraindications, and recommended activities.
- **Transferable:** CSU; UC (Any or all PE activity courses combined: maximum credit, 4 units)
- **General Education:** AA/AS Area III(a); CSU Area E2

This course is designed for individuals with disabilities. Individualized and/or group activities are used to increase cardiovascular fitness. Exercise principles are discussed to encourage a continued healthy and active lifestyle. Students must have a physician’s statement indicating (a) the disability, (b) specific restrictions, and (c) recommended activities.

**ADAPT 324 Heart Healthy**

- **Units:** 1
- **Hours:** 54 hours LAB
- **Prerequisite:** None.
- **Transferable:** CSU; UC
- **General Education:** AA/AS Area III(a); CSU Area E2

This course is designed for students who are unable to participate in a general personal safety course. It includes the skills, knowledge, and attitude which are important in avoiding or defending a physical attack. Topics include awareness and prevention of dangerous situations. Defensive strategies for protection while in the home, in the community, and on mass transit are also covered.

**ADAPT 330 Adapted Weight Training and Fitness**

- **Units:** 1
- **Hours:** 54 hours LAB
- **Prerequisite:** None.
- **Transferable:** CSU; UC (Any or all PE activity courses combined: maximum credit, 4 units)
- **General Education:** AA/AS Area III(a); CSU Area E2

This course is designed for students who are unable to participate in a general physical education activity course. It includes individualized physical fitness programs including activities to develop muscular strength, flexibility, and cardiovascular endurance.

**ADAPT 332 Adapted Aquatics**

- **Units:** 1
- **Hours:** 54 hours LAB
- **Prerequisite:** None.
- **Enrollment Limitation:** A physician’s statement verifying the disability, contraindications, and recommended activities
- **Transferable:** CSU; UC (Any or all PE activity courses combined: maximum credit, 4 units)
- **General Education:** AA/AS Area III(a); CSU Area E2

This is an individualized swimming, water safety, and fitness course designed for individuals with disabilities. It focuses on cardiovascular endurance, range of motion, mobility, muscular strength, and muscular endurance.

**ADAPT 335 Adapted Yoga**

- **Units:** 1
- **Hours:** 54 hours LAB
- **Prerequisite:** None.
- **Advisory:** Eligible for ENGRD 116 AND ENGWR 101; OR ESLR 320 AND ESLW 320.
- **Transferable:** CSU; UC
- **General Education:** AA/AS Area III(a); CSU Area E2

This course is designed for students with a disabilities. It includes group and individual yoga activities that emphasize breathing, stretching, and relaxation techniques. Students must have a physician’s statement
indicating (a) the disability, (b) specific restrictions, and (c) recommended activities.

**ADAPT 337 Adapted Walk and Wheel**

**Units:** 1  
**Hours:** 54 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** A statement from a health care professional verifying the disability, contraindications, and recommended activities.  
**Transferable:** CSU; UC (Any or all PE activity courses combined: maximum credit, 4 units)  
**General Education:** AA/AS Area III(a); CSU Area E2

This course is designed for students who are unable to participate in a general physical education activity course. Individualized walking or wheelchair programs are designed to enhance cardiorespiratory endurance. The course also includes specific exercises for muscular strength, muscular endurance, and flexibility. Small group games and activities are included to promote fitness and fun.

**ADAPT 338 Adapted Aerobic Activity**

**Units:** 1  
**Hours:** 54 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** A physician’s statement verifying the disability, contraindications, and recommended activities.  
**Advisory:** Eligible for ENGRD 310 or 312 AND ENGWR 300; OR ESLR 340 AND ESSLW 340.  
**Transferable:** CSU; UC (Any or all PE activity courses combined: maximum credit, 4 units)  
**General Education:** AA/AS Area III(a); CSU Area E2

This course is designed for students who are unable to participate in a general physical education activity course. It includes group activities as well as individualized activities. Indoor and outdoor workouts are used to enhance cardiovascular endurance and affect body composition. Activities may include walking and jogging, aerobic dance, cardio-kickboxing, step aerobics, chair aerobics, circuit training and cardio equipment workouts.

**ADAPT 495 Independent Studies in Adapted Physical Education**

**Units:** 1 - 3  
**Hours:** 54 - 162 hours LAB  
**Prerequisite:** None.  
**Transferable:** CSU  
**General Education:** AA/AS Area III(a)

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

**ADAPT 499 Experimental Offering in Adapted Physical Education**

**Units:** 0.5 - 4  
**Prerequisite:** None.  
**Transferable:** CSU

This is the experimental courses description.

**Fitness (FITNS) Courses**

**FITNS 100 Utility Workforce Wellness**

**Units:** 1  
**Hours:** 9 hours LEC; 27 hours LAB  
**Prerequisite:** None.  
**Corequisite:** PREAP 122  
**General Education:** AA/AS Area III(a)

This course covers health and physical fitness related to utility worker occupations. Exercise programs are designed to improve specific muscle groups impacted in the occupational setting.

**FITNS 101 Green Technology Workforce Wellness**

**Units:** 1  
**Hours:** 9 hours LEC; 27 hours LAB  
**Prerequisite:** None.  
**Corequisite:** PREAP 141  
**General Education:** AA/AS Area III(a)

This course covers health and physical fitness related to green technology workforce occupations. Exercise programs are designed to improve specific muscle groups impacted in the occupational setting.

**FITNS 102 Infrastructure Workforce Wellness**

**Units:** 1  
**Hours:** 9 hours LEC; 27 hours LAB  
**Prerequisite:** None.  
**Corequisite:** PREAP 111  
**General Education:** AA/AS Area III(a)

This course covers health and physical fitness related to general construction. Exercise programs are designed to improve specific muscle groups impacted in the occupational setting.

**FITNS 302 Latin Aerobics**

**Units:** 1  
**Hours:** 54 hours LAB  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESSLW 340.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area III(a); CSU Area E2

This course combines a variety of rhythmic Latin-style dance movements into a form of cardiorespiratory training of low to moderate impact. It improves cardiorespiratory endurance, muscular strength and endurance, flexibility, and body composition.

**FITNS 303 Dance Aerobics**

**Units:** 1  
**Hours:** 54 hours LAB  
**Prerequisite:** None.  
**Transferable:** CSU; UC (Any or all PE activity courses combined: maximum credit, 4 units.)  
**General Education:** AA/AS Area III(a); CSU Area E2

This course promotes cardiovascular fitness and endurance through aerobic dance movement. It encourages core strength and flexibility with strength and muscular development exercises. It also covers the importance of basic nutrition, health, and safety.

**FITNS 304 Cardio Circuit**

**Units:** 1
Hours: 54 hours LAB  
Prerequisite: None. 
Transferable: CSU; UC (any or all PE activity courses combined: maximum credit 4 units.)  
General Education: AA/AS Area III(a); CSU Area E2

This course is designed as a cardio circuit form of fitness training. It combines cardio and weight training equipment in a circuit format. Emphasis will be on timed intervals to train major muscle groups and the cardiovascular system. It will include flexibility and core strengthening.

FITNS 306 Aerobics: Cardio-Kickboxing  
Units: 1  
Hours: 54 hours LAB  
Prerequisite: None.  
Transferable: CSU; UC (any or all PE activity courses combined: maximum credit, 4 units.)  
General Education: AA/AS Area III(a); CSU Area E2

This course promotes cardiovascular fitness and endurance through kickboxing. It emphasizes proper alignment, execution, and timing of faster-paced movements from kickboxing, boxing, and aerobic dance.

FITNS 307 Aerobic Mix  
Units: 1  
Hours: 54 hours LAB  
Prerequisite: None.  
Transferable: CSU; UC (any or all PE activity courses combined: maximum credit, 4 units.)  
General Education: AA/AS Area III(a); CSU Area E2

This course includes a variety of aerobic activities that provide a new approach to each workout. It emphasizes rotating aerobic forms such as aerobic dance, step, cardio-kickboxing, and aerobic circuit to keep the workouts challenging and interesting. It covers basic heart rate calculations, nutrition, and workout facts.

FITNS 308 Step Aerobics  
Units: 1  
Hours: 54 hours LAB  
Prerequisite: None.  
Transferable: CSU; UC (any or all PE activity courses combined: maximum credit, 4 units.)  
General Education: AA/AS Area III(a); CSU Area E2

This course is designed to improve cardiovascular fitness and encourage better endurance, flexibility, and strength through the use of step aerobics. It includes rhythmic and choreographed step routines, basic stretch and toning exercises, and provides information related to overall health and fitness.

FITNS 310 Aquatic Fitness I  
Units: 1  
Hours: 54 hours LAB  
Course Family: Aerobic Water Fitness  
Prerequisite: None.  
Transferable: CSU; UC (any or all PE activity courses combined: maximum credit, 4 units.)  
General Education: AA/AS Area III(a); CSU Area E2

This course focuses on using the resistance of water for low- or non-weight-bearing exercise for improvement in cardiovascular fitness, muscular endurance, flexibility, and strength. It includes exercises in deep and shallow water and provides information related to overall health and fitness. No swimming skills are needed.

FITNS 314 Aquatic Fitness III- Deep Water Jogging  
Units: 1  
Hours: 54 hours LAB

Course Family: Aerobic Water Fitness  
Prerequisite: None.  
Transferable: CSU; UC (any or all PE activity courses combined: maximum credit, 4 units.)  
General Education: AA/AS Area III(a); CSU Area E2

This course uses the resistance of water for non-weight-bearing exercises. Emphasis is on cardiovascular fitness, muscular endurance, strength, and flexibility. Progress is monitored through appropriate fitness testing. No swimming skills are needed. An optional flotation belt is provided.

FITNS 316 Lap Swimming  
Units: 1  
Hours: 54 hours LAB  
Prerequisite: None.  
Transferable: CSU; UC (any or all PE activity courses combined: maximum credit, 4 units.)  
General Education: AA/AS Area III(a); CSU Area E2

This course provides a fitness based approach to swimming that emphasizes aerobic and anaerobic fitness through lap swimming. It utilizes interval training, cardiovascular conditioning, swimming technique, and aerobic training principles.

FITNS 321 Core Conditioning  
Units: 1  
Hours: 54 hours LAB  
Prerequisite: None.  
Transferable: CSU; UC (any or all PE activity courses combined: maximum credit, 4 units.)  
General Education: AA/AS Area III(a); CSU Area E2

This course incorporates a variety of activities including exercises with the stability ball, Bosu ball, and Pilates mat, and yoga styles of core work to enhance abdominal, lower back, gluteal, and hip strength with toning benefits to the entire body.

FITNS 324 Mat Pilates  
Units: 1  
Hours: 54 hours LAB  
Prerequisite: None.  
Transferable: CSU; UC ("maximum of 4 units of PE activity courses accepted")  
General Education: AA/AS Area III(a); CSU Area E2

This course utilizes a systematic method of mindful and precise conditioning exercises designed to develop core strength, flexibility, and body awareness. Through the regular practice of theoretical and applied principles of the Mat Pilates method, students will see improved posture, control, balance, and concentration.

FITNS 325 Pilates  
Units: 1  
Hours: 54 hours LAB  
Prerequisite: None.  
Transferable: CSU; UC ("(maximum of 4 units of PE activity courses accepted")  
General Education: AA/AS Area III(a); CSU Area E2

This course focuses on precision alignment, flexibility, core strength, and building an awareness of the body. It involves a kinesthetic awareness that builds core strength and confidence in movement. Mat and wall stretches, exercises, and relaxations are used to encourage flexibility, balance, and coordination beginning with the deep postural muscles of the body.

FITNS 326 Mat Pilates II  
Units: 1  
Hours: 54 hours LAB  
Prerequisite: FITNS 324 with a grade of "C" or better
**FITNS 331 Boot Camp Fitness**

Units: 1  
Hours: 54 hours LAB  
Prerequisite: None.  
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340.  
Transferable: CSU; UC ((maximum of 4 units of PE activity courses accepted))  
General Education: AA/AS Area III(a); CSU Area E2  

This course is specifically designed for students to improve their cardiovascular and strength levels with low impact on the joints. It emphasizes basic cycling and fitness drills based on speed work, resistance, and recovery periods.

**FITNS 332 Off Season Conditioning**

Units: 0.5 - 1  
Hours: 27 - 54 hours LAB  
Course Family: High Intensity Training  
Prerequisite: None.  
Transferable: CSU; UC ((maximum of 4 units of PE activity courses accepted))  
General Education: AA/AS Area III(a); CSU Area E2  

This course covers multi-sport training, including swimming, biking (stationary and non-stationary), and running. Topics include transitional techniques for duathlons and triathlons. Some class sessions meet off-campus. Students must supply their own road or mountain bike and helmet.

**FITNS 333 Multi Sport Training for Fitness**

Units: 1  
Hours: 54 hours LAB  
Prerequisite: None.  
Transferable: CSU; UC (Any or all PE Activity courses combined: maximum credit, 4 units)  
General Education: AA/AS Area III(a); CSU Area E2  

This course covers multi-sport training, including swimming, biking (stationary and non-stationary), and running. Topics include transitional techniques for duathlons and triathlons. Some class sessions meet off-campus. Students must supply their own road or mountain bike and helmet.

**FITNS 334 Spin Bike**

Units: 1  
Hours: 54 hours LAB  
Prerequisite: None.  
Transferable: CSU; UC (Any or all PE Activity courses combined: maximum credit, 4 units)  
General Education: AA/AS Area III(a); CSU Area E2  

This course is specifically designed for students to improve their cardiovascular and strength levels with low impact on the joints. It emphasizes basic cycling and fitness drills based on speed work, resistance, and recovery periods.

**FITNS 335 Dynamic Fitness Training I**

Units: 1  
Hours: 54 hours LAB  
Course Family: Dynamic Fitness  
Prerequisite: None.  
Transferable: CSU; UC (Any or all PE Activity courses combined: maximum credit, 4 units)  
General Education: AA/AS Area III(a); CSU Area E2  

This course introduces constant varied functional movements performed at relatively high intensity. It emphasizes proper mechanics utilizing body weight resistance. The workouts are varied daily and designed to optimize fitness levels.

**FITNS 336 Dynamic Fitness Training II**

Units: 1  
Hours: 54 hours LAB  
Course Family: Dynamic Fitness  
Prerequisite: None.  
Transferable: CSU; UC (Any or all PE Activity courses combined: maximum credit, 4 units)  
General Education: AA/AS Area III(a); CSU Area E2  

This course provides dynamic fitness training via Olympic weight lifting and varied cardio-vascular training and conditioning. It is recommended for athletes with some background in weight training.

**FITNS 337 Dynamic Cardio Training**

Units: 1  
Hours: 54 hours LAB  
Course Family: Dynamic Fitness  
Prerequisite: None.  
Transferable: CSU; UC (Any or all PE Activity courses combined: maximum credit, 4 units)  
General Education: AA/AS Area III(a); CSU Area E2  

This course provides a fast-moving, challenging aquatic workout, integrating traditional swim training with the addition of weight-bearing exercises in and out of the pool for complete body strength and cardiovascular conditioning.

**FITNS 338 High-Intensity Interval Training**

Units: 1  
Hours: 54 hours LAB  
Course Family: Dynamic Fitness  
Prerequisite: None.  
Transferable: CSU; UC (Any or all PE Activity courses combined: maximum credit, 4 units)  
General Education: AA/AS Area III(a); CSU Area E2  

This course is designed to be a physically intense and total body workout. It includes workouts which incorporate running, obstacle courses, and a variety of calisthenics designed to enhance muscular strength and endurance used in high-intensity interval workouts.

**FITNS 339 Multi Sport Training for Fitness**

Units: 1  
Hours: 54 hours LAB  
Course Family: Dynamic Fitness  
Prerequisite: None.  
Transferable: CSU; UC (Any or all PE Activity courses combined: maximum credit, 4 units)  
General Education: AA/AS Area III(a); CSU Area E2  

This course covers multi-sport training, including swimming, biking (stationary and non-stationary), and running. Topics include transitional techniques for duathlons and triathlons. Some class sessions meet off-campus. Students must supply their own road or mountain bike and helmet.

**FITNS 340 Multi Sport Training for Fitness**

Units: 1  
Hours: 54 hours LAB  
Course Family: Dynamic Fitness  
Prerequisite: None.  
Transferable: CSU; UC (Any or all PE Activity courses combined: maximum credit, 4 units)  
General Education: AA/AS Area III(a); CSU Area E2  

This course covers multi-sport training, including swimming, biking (stationary and non-stationary), and running. Topics include transitional techniques for duathlons and triathlons. Some class sessions meet off-campus. Students must supply their own road or mountain bike and helmet.

**FITNS 341 Multi Sport Training for Fitness**

Units: 1  
Hours: 54 hours LAB  
Course Family: Dynamic Fitness  
Prerequisite: None.  
Transferable: CSU; UC (Any or all PE Activity courses combined: maximum credit, 4 units)  
General Education: AA/AS Area III(a); CSU Area E2  

This course covers multi-sport training, including swimming, biking (stationary and non-stationary), and running. Topics include transitional techniques for duathlons and triathlons. Some class sessions meet off-campus. Students must supply their own road or mountain bike and helmet.

**FITNS 342 Multi Sport Training for Fitness**

Units: 1  
Hours: 54 hours LAB  
Course Family: Dynamic Fitness  
Prerequisite: None.  
Transferable: CSU; UC (Any or all PE Activity courses combined: maximum credit, 4 units)  
General Education: AA/AS Area III(a); CSU Area E2  

This course covers multi-sport training, including swimming, biking (stationary and non-stationary), and running. Topics include transitional techniques for duathlons and triathlons. Some class sessions meet off-campus. Students must supply their own road or mountain bike and helmet.

**FITNS 343 Spin Bike**

Units: 1  
Hours: 54 hours LAB  
Prerequisite: None.  
Transferable: CSU; UC (Any or all PE Activity courses combined: maximum credit, 4 units)  
General Education: AA/AS Area III(a); CSU Area E2  

This course is specifically designed for students to improve their cardiovascular and strength levels with low impact on the joints. It emphasizes basic cycling and fitness drills based on speed work, resistance, and recovery periods.
Prerequisite: None.
Transferable: CSU; UC ((maximum of 4 units of PE activity courses accepted))
General Education: AA/AS Area III(a); CSU Area E2

This course encourages a healthy attitude toward exercise, wellness, and nutrition. Topics include assessing and improving fitness levels, as well as nutrition, healthy living, and active lifestyle strategies that are involved in attaining and maintaining appropriate levels of wellness. This course includes a variety of fitness activities that provide a new approach to each workout.

FITNS 351 Exercise, Balance and Mobility
Units: 1
Hours: 54 hours LAB
Prerequisite: None.
Transferable: CSU; UC ((maximum of 4 units of PE activity courses accepted))
General Education: AA/AS Area III(a); CSU Area E2

This course meets the needs of students who wish to start an individualized exercise program at a modified level. It focuses on improving flexibility through gentle range of motion exercises. It also focuses on increasing muscular strength through modified strength training exercises. Balance and coordination exercises are used to help reduce risk of falls and increase fitness levels and mobility. Individualized exercises are developed that can be carried out in a fitness center or at home.

FITNS 375 Introduction to Meditation
Units: 1
Hours: 54 hours LAB
Prerequisite: None.
Transferable: CSU; UC
General Education: AA/AS Area III(a); CSU Area E2

This course emphasizes the mind/body connection through techniques of visualization, affirmation, concentration, and body movements.

FITNS 380 Circuit Weight Training
Units: 1
Hours: 54 hours LAB
Prerequisite: None.
Transferable: CSU; UC (Any or all PE Activity courses combined: maximum credit, 4 units. *)
General Education: AA/AS Area III(a); CSU Area E2

This course introduces a system of exercise using weights and cardiovascular activities to provide a balanced approach to physical fitness training. It emphasizes increasing muscular strength and endurance, cardiovascular endurance, and flexibility.

FITNS 381 Weight Training
Units: 1
Hours: 54 hours LAB
Prerequisite: None.
Transferable: CSU; UC ((maximum of 4 units of PE activity courses accepted))
General Education: AA/AS Area III(a); CSU Area E2

This course provides instruction in weight training to promote muscular strength and endurance. Safety, weight training principles, and program design are emphasized to reach personal fitness and strength goals. Components of fitness are addressed, including flexibility and body composition. Workout guidelines for general fitness, sport performance, and/or bodybuilding may be chosen for individual goals.

FITNS 384 Weight Training II
Units: 1
Hours: 54 hours LAB
Prerequisite: None.
Transferable: CSU; UC ((maximum of 4 units of PE activity courses accepted))
General Education: AA/AS Area III(a); CSU Area E2

This course is a strength training program for students involved in intermediate level weight training. It is designed to develop muscular strength and endurance appropriate to specific lifts. The components of designing and implementing individual weight training programs are addressed.

FITNS 385 Weight Training for Competition
Units: 1
Hours: 54 hours LAB
Prerequisite: None.
Transferable: CSU; UC ((maximum of 4 units of PE activity courses accepted))
General Education: AA/AS Area III(a); CSU Area E2

This course is a strength training program for students involved in advanced weight training. It is designed to develop strength, power, and muscle endurance appropriate to specific lifts.

FITNS 386 Weight Training III
Units: 1
Hours: 54 hours LAB
Course Family: Weight Training
Prerequisite: None.
Transferable: CSU; UC
General Education: AA/AS Area III(a); CSU Area E2

This course is a strength training program for students involved in advanced level weight training. It is designed to develop muscular strength and power appropriate to the priority placed on Olympic style lifts. Nutrition will be addressed as it relates to pre-workout, post-workout, and recovery.

FITNS 392 Yoga
Units: 1
Hours: 54 hours LAB
Course Family: Yoga
Prerequisite: None.
Transferable: CSU; UC ((maximum of 4 units of PE activity courses accepted))
General Education: AA/AS Area III(a); CSU Area E2

This course in Yoga emphasizes breathing, stretching, and relaxing techniques. Yoga positions and philosophies are practiced and examined.

FITNS 393 Yoga II
Units: 1
Hours: 54 hours LAB
Prerequisite: FITNS 392 with a grade of "C" or better
Transferable: CSU; UC (UC transfer credit limitation: Any or all PE activity courses combined: maximum credit 4 units.)
General Education: AA/AS Area III(a); CSU Area E2

This course is designed to strengthen and enhance muscle tone through the practice of asanas and pranayama techniques. Yoga practice with elements of meditation are examined to decrease stress, improve concentration, and increase spiritual connection.

FITNS 395 Stretch
Units: 1
Hours: 54 hours LAB
Prerequisite: None.
Transferable: CSU; UC ((maximum of 4 units of PE activity courses accepted))
General Education: AA/AS Area III(a); CSU Area E2

This course is designed to strengthen and enhance muscle tone through the practice of asanas and pranayama techniques. Yoga practice with elements of meditation are examined to decrease stress, improve concentration, and increase spiritual connection.
This course emphasizes stretching for better alignment, health, and increased range of motion. It provides an individualized approach to stretching and includes pre- and post-stretching techniques for specific activities such as sports, dance, or repetitive stress work-related movements.

**FITNS 396 Yoga Sculpt**

**Units:** 1  
**Hours:** 54 hours LAB  
**Prerequisite:** None.  
**Advisory:** FITNS 392  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area III(a); CSU Area E2  
This is a high intensity blend of yoga and strength training. Yoga is the base of the class with the addition of weights for toning and strengthening the core and cardio to provide a full body comprehensive workout.

**FITNS 400 Body Fitness (Walking or Jogging)**

**Units:** 1  
**Hours:** 54 hours LAB  
**Course Family:** Cardio Fitness  
**Prerequisite:** None.  
**Transferable:** CSU; UC ((maximum of 4 units of PE activity courses accepted))  
**General Education:** AA/AS Area III(a); CSU Area E2  
This course promotes physical well-being through physical activity, including but not limited to walking and jogging, to increase cardiovascular fitness, produce stress reduction, and encourage weight control. Attention is given to increasing cardiovascular efficiency, muscular strength, and endurance.

**FITNS 412 Taekwondo I**

**Units:** 1  
**Hours:** 54 hours LAB  
**Prerequisite:** None.  
**Transferable:** CSU; UC ((maximum of 4 units of PE activity courses accepted))  
**General Education:** AA/AS Area III(a); CSU Area E2  
This course is an introduction to basic Taekwondo skills which include stances, blocking, striking, kicking, poomsae, and self-defense techniques. Conditioning exercises are used to increase strength, flexibility, aerobic, and anaerobic fitness. Martial arts etiquette and traditions are taught and emphasized. Field trips may be required.

**FITNS 414 Tai Chi**

**Units:** 1  
**Hours:** 54 hours LAB  
**Prerequisite:** None.  
**Transferable:** CSU; UC ((maximum of 4 units of PE activity courses accepted))  
**General Education:** AA/AS Area III(a); CSU Area E2  
This course explores the traditional Chinese fitness exercise of Tai Chi. It provides for the development of basic skills and techniques that lead toward an integration of the mind-body-spirit trilogy. Various Chinese fitness exercises in relation to health are explored. Principles of Confucianism and Taoism, including a basic review of Tai Chi history and philosophy are discussed. Overall, the physical discipline and structure of Tai Chi movements are emphasized.

**FITNS 416 Taekwondo II**

**Units:** 1  
**Hours:** 54 hours LAB  
**Prerequisite:** None.  
**Transferable:** CSU; UC (UC transfer credit limitation: Any or all PE activity courses combined: maximum credit 4 units.)  
**General Education:** AA/AS Area III(a); CSU Area E2  
This course provides instruction in intermediate level of Taekwondo. Aerobic, anaerobic, and plyometric training drills are employed to increase students strength, speed, and agility. More complex footwork, one-step sparring, paddle drills, and free sparring combinations are introduced. Intermediate level poomsae is practiced in addition to basic competition training in both sparring and poomsae. Field trips may be required.

**FITNS 417 Taekwondo III**

**Units:** 1  
**Hours:** 54 hours LAB  
**Prerequisite:** None.  
**Transferable:** CSU; UC (UC transfer credit limitation: Any or all PE activity courses combined: maximum credit 4 units.)  
**General Education:** AA/AS Area III(a); CSU Area E2  
This course provides instruction in advanced level of Taekwondo. A higher level of aerobic, anaerobic, and plyometric training drills are employed to increase student’s strength, speed, agility, and competitiveness. It also introduces Kyupka (demonstration of power) and a higher level of poomsae. Sparring strategies, ring management, and other skills associated with being successful at this advanced level are taught. Field trips may be required.

**FITNS 440 Swimming I**

**Units:** 1  
**Hours:** 54 hours LAB  
**Course Family:** Swimming  
**Prerequisite:** None.  
**Transferable:** CSU; UC ((maximum of 4 units of PE activity courses accepted))  
**General Education:** AA/AS Area III(a); CSU Area E2  
This is a beginning swim class. Swimmers will learn basic water acclimation, water safety, and how to perform basic swimming skills. Students will learn the front and back float, front and back streamline glide, and introductory skills in freestyle stroke, backstroke, and proper breathing.

**FITNS 441 Swimming II**

**Units:** 1  
**Hours:** 54 hours LAB  
**Course Family:** Swimming  
**Prerequisite:** None.  
**Advisory:** This course is taught in deep water. It is important that the student is confident in their back & front float ability as they will not be able to touch the bottom to move to the pool edge.  
**Transferable:** CSU; UC (a maximum of 4 units of PE activity courses allowed.)  
**General Education:** AA/AS Area III(a); CSU Area E2  
This course is designed as a beginner 2 course, continuing work on freestyle and backstroke technique, advancing to underwater work and starts and turns with more endurance swimming of both strokes.

**FITNS 442 Swimming III**

**Units:** 1  
**Hours:** 54 hours LAB  
**Course Family:** Swimming  
**Prerequisite:** None.  
**Advisory:** FITNS 441  
**Transferable:** CSU; UC (A maximum of 4 units of PE activity allowed for transfer.)  
**General Education:** AA/AS Area III(a); CSU Area E2  
This course covers skills for intermediate swimmers; water safety, and basic swimming skills, swim training protocols and technique, further refinement of stroke development, proper starts and turns technique, and development of cardiovascular capacity. It includes stroke technique in freestyle, backstroke, and breaststroke, as well as turns for freestyle, backstroke and breaststroke.
FITNS 443 Swimming IV

Units: 1
Hours: 54 hours LAB
Course Family: Swimming
Prerequisite: None.
Advisory: FITNS 442
Transferable: CSU; UC (a maximum of 4 units of PE activity allowed for transfer to UC.)
General Education: AA/AS Area III(a); CSU Area E2

This course for advanced swimmers (those who have mastered intermediate swimming skills) covers proper technique specific to the four competitive strokes, proper training protocols, and training design. It emphasizes proper stroke technique of freestyle, backstroke, breaststroke, and butterfly, as well as underwater efficiency in diving, turns, and breakouts for all competitive strokes. It also introduces more advanced swim training protocols, drills, and workout designs.

FITNS 450 Personal Safety

Units: 1
Hours: 54 hours LAB
Prerequisite: None.
Transferable: CSU; UC ((maximum of 4 units of PE activity courses accepted))
General Education: AA/AS Area III(a); CSU Area E2

This course provides information and develops skills for an individual’s personal safety in a variety of situations. Topics include awareness and prevention of dangerous situations along with physical and non-physical defensive strategies. Community resources for victims of assault are discussed.

FITNS 495 Independent Studies in Fitness

Units: 1 - 3
Hours: 54 - 162 hours LAB
Prerequisite: None.
Transferable: CSU
General Education: AA/AS Area III(a)

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

FITNS 499 Experimental Offering in Fitness

Units: 0.5 - 4
Prerequisite: None.
Transferable: CSU

This is the experimental courses description.

Kinesiology (KINES) Courses

KINES 300 Introduction to Kinesiology

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Transferable: CSU; UC (UC credit limitations: All KINES courses combined: maximum credit, 8 units.)
General Education: AA/AS Area III(b)
C-ID: C-ID KIN 100

This course provides an introduction to the interdisciplinary approach to the study of human movement. It provides an orientation to various educational pathways, requirements, and career opportunities in kinesiology in the areas of teaching, coaching, allied health, and fitness professions. Basic concepts of the kinesiology discipline and the importance of the sub-disciplines are discussed.

KINES 307 Mental Skills for Sport Performance

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: ENGRD 116 with a grade of “C” or better; OR ESLR 320 and ESLW 320 with a grade of “C” or better.
Transferable: CSU

This course provides a concentrated study of competition and motivation for sports. It also includes the study of the brain’s impact on muscular activity in athletic performance. Stress management, goal setting, peak performance, adaptability, sport imagery training, and effective practice are covered. This course is formerly known as PET 307.

KINES 330 Care and Prevention of Athletic Injuries

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 and ENGRD 316 with a grade of “C” or better; OR ENGRD 310 and ENGRD 312 with a grade of “C” or better.
Transferable: CSU; UC

This course is an introduction to injury prevention, injury care, and rehabilitation of athletic injuries. It includes basic information regarding sports injuries, their causes, and treatments.

KINES 334 Practical Applications in Athletic Training/Sports Medicine

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: None.
Corequisite: KINES 330
Transferable: CSU; UC

This course is designed to provide an overall experience of the sports medicine/athletic training profession. Topics include common evaluation and rehabilitative techniques, modality usage, and advanced taping and wrapping methods. This course is formerly known as PET 334.

KINES 340 Theory of Baseball

Units: 1
Hours: 18 hours LEC
Prerequisite: None.
Advisory: High school or college level baseball playing experience; ENGRD 116 with a grade of “C” or better; OR ESLR 320 and ESLW 320 with a grade of “C” or better.
Transferable: CSU; UC (UC credit limitation: All KINES courses combined: maximum credit, 8 units.)

This course develops a thorough understanding of baseball. The emphasis is on learning and understanding basic concepts of training, individual techniques, strategies, and systems of defense, offense, pitching, base running, and field maintenance. Philosophies and drills are included.

KINES 350 Theory of Football

Units: 1
Hours: 18 hours LEC
Prerequisite: None.
This course covers applications of different strategies when football teams face various schemes. This course is formerly known as PET 350.

**KINES 400 Applied Physiology of Exercise**
- **Units:** 2
- **Hours:** 36 hours LEC
- **Prerequisite:** None.
- **Transferable:** CSU

This course examines how the body functions under conditions of exercise stress. It covers the practical applications of muscle function, cardiovascular and respiratory functions, training techniques, and the effect of environmental conditions on exercise. This course is formerly known as PET 400.

**KINES 401 Applied Kinesiology**
- **Units:** 2
- **Hours:** 36 hours LEC
- **Prerequisite:** None.
- **Transferable:** CSU

This course addresses movement as it relates to exercise. It includes analysis of movement in sport skills, stressing the contributions made by the muscular and skeletal systems.

**KINES 402 Nutrition for Fitness**
- **Same As:** NUTRI 307
- **Units:** 2
- **Hours:** 36 hours LEC
- **Prerequisite:** None.
- **Transferable:** CSU

This course covers the basic principles of nutrition and the interactions between nutrition and fitness training. Topics include dietary practices and nutrient intake modifications that affect physical performance, including intake of energy nutrients, vitamins, water, electrolytes, and dietary supplements. It also covers the study of body weight and body composition, as well as factors that affect body weight and the effect of body composition on physical performance. This course is not open to students who have completed NUTRI 307.

**KINES 403 Fitness and Exercise Assessment**
- **Units:** 2
- **Hours:** 36 hours LEC
- **Prerequisite:** None.
- **Transferable:** CSU

This course covers the assessment of cardiorespiratory endurance, body composition, muscular strength and endurance, flexibility, blood pressure, and evaluation of exercise test results. Additional topics include the factors influencing exercise programs, development of individual exercise programs, and the risk factors associated with exercise programs and fitness testing.

**KINES 404 Identification and Management of Fitness Injuries**
- **Units:** 2
- **Hours:** 36 hours LEC
- **Prerequisite:** None.
- **Transferable:** CSU

This course addresses elementary human anatomy and the injuries that can occur to the musculoskeletal system as it relates to physical activity. The treatment and rehabilitation of these injuries and the use of protective equipment are presented.

**KINES 405 Effects of Exercise on Special Populations**
- **Units:** 2
- **Hours:** 36 hours LEC
- **Prerequisite:** None.
- **Transferable:** CSU

This course covers the effects of exercise on special populations and provides information to modify exercise based on age, disability, and medical conditions. It includes discussions of special groups including seniors, children with disabilities, adults with disabilities or chronic conditions, and individuals requiring exercise modifications due to physical impairments.

**KINES 406 Techniques of Strength Training Instruction**
- **Units:** 2
- **Hours:** 36 hours LEC
- **Prerequisite:** None.
- **Transferable:** CSU

This course covers how to teach a variety of strength training techniques and activities to individuals. Topics include strength training sequences, strength training equipment, safety factors, and anatomy and physiology as it applies to strength training. It also covers the development of strength training exercises and routines. Field trips may be required.

**KINES 407 Techniques of Group Fitness Instruction**
- **Units:** 2
- **Hours:** 36 hours LEC
- **Prerequisite:** None.
- **Transferable:** CSU

This course covers how to teach a variety of fitness activities to groups of individuals. Emphasis is on how to design a physiologically safe and effective group fitness exercise class.

**KINES 494 Topics in Physical Education Theory**
- **Units:** 0.5 - 4
- **Hours:** 18 hours LEC
- **Prerequisite:** None.
- **Transferable:** CSU

This umbrella course provides concentrated study of a variety of current fitness issues. Topics reflect contemporary concerns for physical fitness, performance in competitive sport, and wellness. This course is formerly known as PET 494.

**KINES 495 Independent Studies in Physical Education Theory**
- **Units:** 1 - 3
- **Hours:** 54 - 162 hours LAB
- **Prerequisite:** None.
- **Transferable:** CSU

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.
KINES 498 Work Experience in Kinesiology

Units: 0.5 - 4
Hours: 30 - 300 hours LAB
Prerequisite: None.
Enrollment Limitation: Students must be in a paid or unpaid internship, volunteer position, or job related to physical education with a cooperating site supervisor. Students are advised to consult with the Physical Education Department faculty to review specific certificate and degree work experience requirements.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESL 340.
Transferable: CSU
General Education: AA/AS Area III(b)

This course provides students with opportunities to develop marketable skills in preparation for employment or advancement within the field of physical education. It is designed for students interested in work experience and/or internships in transfer-level degree occupational programs. Course content includes understanding the application of education to the workforce, completion of Title 5 required forms which document the student's progress and hours spent at the work site, and developing workplace skills and competencies.

During the semester, the student is required to complete 37.5 hours of related paid work experience, or 30 hours of related unpaid work experience for 0.5 unit. An additional 37.5 or 30 hours of related work experience is required for each additional 0.5 units. All students are required to attend the first class meeting, a mid-semester meeting, and a final meeting. Additionally, students who have not already successfully completed a Work Experience course will be required to attend weekly orientations while returning participants may meet individually with the instructor as needed. Students may take up to 16 units total across all Work Experience course offerings. This course may be taken up to four times when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

KINES 499 Experimental Offering in Kinesiology

Units: 0.5 - 4
Prerequisite: None.

This is the experimental courses description.

Personal Activity (PACT) Courses

PACT 300 Archery I

Units: 1
Hours: 54 hours LAB
Course Family: Archery
Prerequisite: None.
Transferable: CSU; UC (UC credit limitation: Any or all PE Activity courses combined: maximum credit, 4 units)
General Education: AA/AS Area III(a); CSU Area E2

The course emphasizes safety, knowledge, and basic skill development in recurve archery. No compound or crossbows are allowed. It also covers basic techniques with an emphasis on knowledge and use of the bow and related equipment.

PACT 310 Badminton I

Units: 1
Hours: 54 hours LAB
Course Family: Badminton
Prerequisite: None.
Transferable: CSU; UC (UC credit limitation: Any or all PE Activity courses combined: maximum credit, 4 units)
General Education: AA/AS Area III(a); CSU Area E2

This course provides instruction in basic fundamentals, techniques, and rules of badminton. The emphasis is on skill and technique development, as well as strategies for singles and doubles.

PACT 311 Badminton II

Units: 1
Hours: 54 hours LAB
Course Family: Badminton
Prerequisite: None.
Enrollment Limitation: PACT 310 with a grade of “C” or better OR the ability to demonstrate skills beyond that of a beginning player - serve, smash, high clear, drop shot.
Transferable: CSU; UC (UC credit limitation: Any or all PE Activity courses combined: maximum credit, 4 units)
General Education: AA/AS Area III(a); CSU Area E2

This course provides instruction in intermediate skills, techniques, and rules of badminton. It emphasizes skill and technique development beyond that of a beginning player, as well as intermediate strategies for singles and doubles.

PACT 350 Golf I

Units: 1
Hours: 54 hours LAB
Course Family: Golf
Prerequisite: None.
Transferable: CSU; UC (UC credit limitation: Any or all PE Activity courses combined: maximum credit, 4 units)
General Education: AA/AS Area III(a); CSU Area E2

This course introduces the basic skills and knowledge necessary to play the game of golf. It focuses on the fundamental skills necessary to strike and putt the ball. It introduces the rules and etiquette necessary to play the game. Some portions of this course may be held on regulation golf courses to which students must bring their own golf clubs and pay for range and/or greens fees. Field trips are required.

PACT 351 Golf II

Units: 1
Hours: 54 hours LAB
Course Family: Golf
Prerequisite: None.
Enrollment Limitation: PACT 350 with a grade of “C” or better; or the ability to perform a golf swing correctly and demonstrate the basic skills needed to play golf on a course.
Transferable: CSU; UC (UC credit limitation: Any or all PE Activity courses combined: maximum credit, 4 units)
General Education: AA/AS Area III(a); CSU Area E2

This course covers the intermediate skills and knowledge necessary to play the game of golf. It focuses on swing evaluation necessary to improve ball striking, the rules and etiquette necessary to play on a public course, and course management strategies in order to negotiate a golf course. Some portions of this course may be held on area regulation golf courses in which students must bring their own golf clubs and pay range costs and/or greens fees. Field trips are required.

PACT 352 Golf III

Units: 1
Hours: 54 hours LAB
Course Family: Golf
Prerequisite: None.
Enrollment Limitation: PACT 351 (Golf II) or experience playing on a golf course.
Transferable: CSU; UC (UC credit limitation: Any or all PE Activity courses combined: maximum credit, 4 units)
General Education: AA/AS Area III(a); CSU Area E2

This course covers advanced skills and knowledge necessary to excel at the game of golf. It focuses on improving the swing, special shot-making techniques, course management strategies for the advanced golfer, and clarification of rules and etiquette necessary to play the game at an advanced level. Different tournament formats are explored. Some
portions of this course may be held on area regulation golf courses in which students must bring their own golf clubs, pay greens fees, and/or range costs. Field trips are required.

**PACT 390 Tennis I**
- **Units:** 1
- **Hours:** 54 hours LAB
- **Course Family:** Tennis
- **Prerequisite:** None.
- **Transferable:** CSU; UC (UC credit limitation: Any or all PE Activity courses combined: maximum credit, 4 units.)
- **General Education:** AA/AS Area III(a); CSU Area E2

This course covers basic technique of strokes, rules of play, simple strategies, and the etiquette of tennis.

**PACT 391 Tennis II**
- **Units:** 1
- **Hours:** 54 hours LAB
- **Course Family:** Tennis
- **Prerequisite:** None.
- **Advisory:** PACT 390
- **Transferable:** CSU; UC
- **General Education:** AA/AS Area III(a); CSU Area E2

This course reviews basic fundamentals, techniques, rules, and social courtesies of tennis. It is intended for intermediate-level tennis players.

**PACT 393 Tennis III**
- **Units:** 1
- **Hours:** 54 hours LAB
- **Course Family:** Tennis
- **Prerequisite:** None.
- **Advisory:** PACT 391
- **Transferable:** CSU; UC
- **General Education:** AA/AS Area III(a); CSU Area E2

This course focuses on improving and refining the physical and mental skills and techniques of tennis. Particular attention is given to strategic development of the player, while refining the racket skills that set up and finish points. Developing patterns, serving placement, and tactical court positioning are introduced and developed.

**PACT 430 Pickleball I**
- **Units:** 1
- **Hours:** 54 hours LAB
- **Course Family:** Pickleball
- **Prerequisite:** None.
- **Transferable:** CSU; UC (UC transfer credit limitation: Any or all PE activity courses combined: maximum credit 4 units.)
- **General Education:** AA/AS Area III(a); CSU Area E2

This course covers basic technique of strokes, rules of play, simple strategies, and the etiquette of pickleball.

**PACT 431 Pickleball II**
- **Units:** 1
- **Hours:** 54 hours LAB
- **Course Family:** Pickleball
- **Prerequisite:** None.
- **Transferable:** CSU; UC (UC transfer credit limitation: Any or all PE activity courses combined: maximum credit 4 units.)
- **General Education:** AA/AS Area III(a); CSU Area E2

This course covers basic fundamentals, techniques, rules, and social courtesies of pickleball. It emphasizes skill and technique development beyond that of a beginning player, as well as intermediate strategies for singles and doubles.

**PACT 392 Pickleball II**
- **Units:** 1
- **Hours:** 54 hours LAB
- **Course Family:** Pickleball
- **Prerequisite:** None.
- **Transferable:** CSU; UC (UC transfer credit limitation: Any or all PE activity courses combined: maximum credit 4 units.)
- **General Education:** AA/AS Area III(a); CSU Area E2

This course focuses on improving and refining the physical and mental skills and techniques of pickleball. Particular attention is given to strategic development of the player, while refining the paddle skills that set up and finish points. Developing patterns, dink placement, and tactical court positioning are introduced and developed.

**PACT 495 Independent Studies in Personal Activity**
- **Units:** 1 - 3
- **Hours:** 54 - 162 hours LAB
- **Prerequisite:** None.
- **Transferable:** CSU
- **General Education:** AA/AS Area III(a)

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

**PACT 499 Experimental Offering in Personal Activity**
- **Units:** 0.5 - 4
- **Prerequisite:** None.
- **Transferable:** CSU
- **General Education:** AA/AS Area III(a)

This is the experimental courses description.

**Sports (SPORT) Courses**

**SPORT 300 Baseball, Intercollegiate-Men**
- **Units:** 3
- **Hours:** 175 hours LAB
- **Prerequisite:** At least one year of high school varsity baseball or equivalent
- **Enrollment Limitation:** Tryout
- **Transferable:** CSU; UC (UC credit limitation: Any or all PE activity courses combined: maximum credit, 4 units.)
- **General Education:** AA/AS Area III(a); CSU Area E2

This course provides opportunity for intercollegiate competition in men's baseball. It provides baseball related skills, fundamentals, and team strategy. This course may be taken four times for credit.

**SPORT 301 Off Season Conditioning for Baseball**
- **Units:** 0.5 - 3
- **Hours:** 27 - 162 hours LAB
- **Prerequisite:** None.
- **Enrollment Limitation:** Tryout
- **Transferable:** CSU; UC (UC credit limitation: Any or all PE activity courses combined: maximum credit, 4 units.)
- **General Education:** AA/AS Area III(a); CSU Area E2
This course is designed to optimize sports performance and reduce the risk of injury for the off-season intercollegiate athlete in the sport of baseball. Course content includes sport-specific skill development, sport-specific strength training, cardiovascular conditioning, agility work, plyometrics, speed training, and flexibility exercises. This course may be taken up to four times for credit.

SPORT 303 Pre-Season Conditioning for Baseball

Units: 0.5 - 3  
Hours: 27 - 162 hours LAB  
Prerequisite: None.  
Enrollment Limitation: Tryout  
Transferable: CSU; UC  
General Education: AA/AS Area III(a); CSU Area E2

This course is designed to optimize sports performance and reduce the risk of injury for the pre-season intercollegiate athlete in the sport of baseball. Course content includes sport-specific skill development, sport-specific strength training, cardiovascular conditioning, agility work, plyometrics, speed training, and flexibility exercises. This course may be taken up to four times for credit.

SPORT 301 Basketball, Intercollegiate-Men, Fall

Units: 1.5  
Hours: 87.5 hours LAB  
Prerequisite: None.  
Enrollment Limitation: Tryout  
Transferable: CSU; UC (UC credit limitation: Any or all PE activity courses combined: maximum credit, 4 units.)  
General Education: AA/AS Area III(a); CSU Area E2

This course covers fundamentals, rules, and individual and/or team strategy appropriate to intercollegiate athletic competition. May be taken four times for credit.

SPORT 302 Basketball, Intercollegiate-Men, Spring

Units: 1.5  
Hours: 87.5 hours LAB  
Prerequisite: None.  
Enrollment Limitation: Tryout  
Transferable: CSU; UC (UC credit limitation: Any or all PE activity courses combined: maximum credit, 4 units.)  
General Education: AA/AS Area III(a); CSU Area E2

This course covers fundamentals, rules, and individual and/or team strategy appropriate to intercollegiate athletic competition. May be taken four times for credit.

SPORT 303 Off Season Conditioning for Basketball

Units: 0.5 - 3  
Hours: 27 - 162 hours LAB  
Prerequisite: None.  
Enrollment Limitation: Tryout.  
Transferable: CSU; UC (UC credit limitation: Any or all PE activity courses combined: maximum credit, 4 units.)  
General Education: AA/AS Area III(a); CSU Area E2

This course is designed to optimize sports performance and reduce the risk of injury for the off-season intercollegiate athlete in the sport of basketball. Topics include college-level basketball-specific skill development, sport-specific strength training, agility work, plyometrics, speed training, and flexibility exercises. This course may be taken up to four times for credit.

SPORT 304 Pre-Season Conditioning for Basketball

Units: 0.5 - 3  
Hours: 27 - 162 hours LAB  
Prerequisite: None.  
Enrollment Limitation: Tryout  
Transferable: CSU; UC  
General Education: AA/AS Area III(a); CSU Area E2

This course is designed to increase sport performance and overall understanding of intercollegiate basketball concepts and strategic philosophies. Topics include collegiate-level basketball-specific skill development, collegiate-level offensive and defensive concepts, team-specific basketball fundamentals, team-specific drills for individual improvement and sport-specific agility drills, plyometrics, and speed training. This course may be taken up to four times for credit.

SPORT 305 Basketball, Intercollegiate-Women, Fall

Units: 1.5  
Hours: 87.5 hours LAB  
Prerequisite: None.  
Enrollment Limitation: Tryout  
Transferable: CSU; UC (UC credit limitation: Any or all PE activity courses combined: maximum credit, 4 units.)  
General Education: AA/AS Area III(a); CSU Area E2

This course covers the fundamentals, rules, and the individual and/or team strategies appropriate to intercollegiate athletic competition. This course may be taken three times for credit.

SPORT 306 Basketball, Intercollegiate-Women, Spring

Units: 1.5  
Hours: 87.5 hours LAB  
Prerequisite: None.  
Enrollment Limitation: Tryout  
Transferable: CSU; UC (UC credit limitation: Any or all PE activity courses combined: maximum credit, 4 units.)  
General Education: AA/AS Area III(a); CSU Area E2

This course covers the fundamentals, rules, and the individual and/or team strategies appropriate to intercollegiate athletic competition. This course may be taken three times for credit.

SPORT 307 Cross Country, Intercollegiate-Men

Units: 3  
Hours: 175 hours LAB  
Prerequisite: None.  
Enrollment Limitation: Tryout  
Transferable: CSU; UC (UC credit limitation: Any or all PE activity courses combined: maximum credit, 4 units.)  
General Education: AA/AS Area III(a); CSU Area E2

This course covers fundamentals, rules, and individual and team strategies appropriate to intercollegiate athletic competition in men's cross country. It provides opportunities for student-athletes to compete at the intercollegiate level. This course may be taken up to four times for credit.

SPORT 308 Cross Country, Intercollegiate-Women

Units: 3  
Hours: 175 hours LAB  
Prerequisite: None.  
Enrollment Limitation: Tryout  
Transferable: CSU; UC (UC credit limitation: Any or all PE activity courses combined: maximum credit, 4 units.)  
General Education: AA/AS Area III(a); CSU Area E2
This is an advanced team activity for female students providing specialized training for competition. It covers fundamental and advanced techniques needed for specific events, along with the rules and strategies appropriate for intercollegiate competition. This course may be taken up to four times for credit.

**SPORT 330 Football, Intercollegiate-Men**

**Units:** 3  
**Hours:** 175 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Tryout  
**Transferable:** CSU; UC (UC credit limitation: Any or all PE activity courses combined: maximum credit, 4 units.)  
**General Education:** AA/AS Area III(a); CSU Area E2

This course is an intercollegiate sport providing opportunity for competition in men's football. It provides football fundamentals, skills, rules, and individual and team strategies appropriate for intercollegiate athletic competition. This course may be taken up to four times for credit.

**SPORT 331 Off Season Conditioning for Football**

**Units:** 0.5 - 3  
**Hours:** 27 - 162 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Tryout  
**Transferable:** CSU; UC (UC credit limitation: Any or all PE activity courses combined: maximum credit, 4 units.)  
**General Education:** AA/AS Area III(a); CSU Area E2

This course involves training and technical skill development specific to the sport of football for off-season student-athletes. Topics include skill development, strength training, speed development, agility training, plyometric drills, cardiovascular conditioning, and increased flexibility. This course may be taken up to four times for credit.

**SPORT 332 Pre-Season Conditioning for Football**

**Units:** 0.5 - 3  
**Hours:** 27 - 162 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Tryout  
**Transferable:** CSU; UC (UC credit limitation: Any or all PE activity courses combined: maximum credit, 4 units.)  
**General Education:** AA/AS Area III(a); CSU Area E2

This course covers advanced offensive and defensive strategies for football at the college level. Blocking schemes, tackling techniques, as well as offensive and defensive formations are discussed. Strength and conditioning drills are included to enhance football skills. This course may be taken up to four times for credit.

**SPORT 340 Golf, Intercollegiate-Men**

**Units:** 3  
**Hours:** 175 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Tryout  
**Transferable:** CSU; UC (UC credit limitation: Any or all PE activity courses combined: maximum credit, 4 units.)  
**General Education:** AA/AS Area III(a); CSU Area E2

This course provides opportunity for competition in men's golf. It covers golf fundamentals and skills. It also includes rules and individual and team strategies appropriate for intercollegiate athletic competition. This course may be taken up to four times for credit.

**SPORT 341 Off Season Conditioning for Golf**

**Units:** 0.5 - 3  
**Hours:** 27 - 162 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Tryout  
**Transferable:** CSU; UC (UC credit limitation: Any or all PE activity courses combined: maximum credit, 4 units.)  
**General Education:** AA/AS Area III(a); CSU Area E2

This course involves training and technical skill development specific to the sport of golf. It offers a mental training component for peak performance. This course is designed to prepare students for intercollegiate golf competition. This course may be taken up to four times for credit.

**SPORT 345 Golf, Intercollegiate-Women**

**Units:** 3  
**Hours:** 175 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Tryout  
**Transferable:** CSU; UC (UC credit limitation: Any or all PE activity courses combined: maximum credit, 4 units.)  
**General Education:** AA/AS Area III(a); CSU Area E2

This course is an intercollegiate sport providing opportunities for competition in women's golf. It covers fundamentals and skills, rules, individual and/or team strategy appropriate to intercollegiate athletic competition. This course may be taken up to four times for credit.

**SPORT 350 Soccer, Intercollegiate-Men**

**Units:** 3  
**Hours:** 175 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Tryout  
**Transferable:** CSU; UC (UC credit limitation: Any or all PE activity courses combined: maximum credit, 4 units.)  
**General Education:** AA/AS Area III(a); CSU Area E2

This course provides opportunity for intercollegiate competition in men's soccer. Soccer fundamentals and skills are covered. It also includes rules, and individual and team strategies appropriate for intercollegiate athletic competition. This course may be taken up to four times for credit.

**SPORT 351 Off-Season Conditioning for Men's Soccer**

**Units:** 0.5 - 3  
**Hours:** 27 - 162 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Tryout.  
**Transferable:** CSU; UC (UC credit limitation: Any or all PE activity courses combined: maximum credit, 4 units.)  
**General Education:** AA/AS Area III(a); CSU Area E2

This course covers off-season training and conditioning skills and techniques specific for intercollegiate soccer. Topics include skill development, strength training, cardiovascular conditioning, and speed training. This course may be taken up to four times for credit.

**SPORT 355 Soccer, Intercollegiate-Women**

**Units:** 3  
**Hours:** 175 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Tryout.  
**Transferable:** CSU; UC (UC credit limitation: Any or all PE activity courses combined: maximum credit, 4 units.)  
**General Education:** AA/AS Area III(a); CSU Area E2

This course is an intercollegiate sport providing opportunity for competition in women's soccer. It provides soccer fundamentals and skills, including rules as well as individual and team strategy appropriate
for intercollegiate athletic competition. This course may be taken up to four times for credit.

**SPORT 356 Off Season Conditioning for Women’s Soccer**

**Units:** 1 - 3  
**Hours:** 54 - 162 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Tryout.  
**Transferable:** CSU; UC (UC credit limitation: Any or all PE activity courses combined: maximum credit, 4 units.)  
**General Education:** AA/AS Area III(a); CSU Area E2

This course is designed to optimize sports performance and reduce the risk of injury for the pre-season intercollegiate athlete in the sport of softball. Course content includes softball fundamental skills development, strength training, cardiovascular conditioning, agility, plyometric, speed training, and flexibility exercises. This course may be taken up to four times for credit.

**SPORT 370 Swimming and Diving, Intercollegiate-Men**

**Units:** 3  
**Hours:** 175 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Tryout.  
**Transferable:** CSU; UC (UC credit limitation: Any or all PE activity courses combined: maximum credit, 4 units.)  
**General Education:** AA/AS Area III(a); CSU Area E2

This course is designed to optimize sports performance and reduce the risk of injury for the pre-season intercollegiate athlete in the sport of softball. Course content includes softball fundamental skills development, strength training, cardiovascular conditioning, agility, plyometric, speed training, and flexibility exercises. This course may be taken up to four times for credit.

**SPORT 375 Swimming and Diving, Intercollegiate-Women**

**Units:** 3  
**Hours:** 175 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Tryout.  
**Transferable:** CSU; UC (UC credit limitation: Any or all PE activity courses combined: maximum credit, 4 units.)  
**General Education:** AA/AS Area III(a); CSU Area E2

This course is designed to optimize sports performance and reduce the risk of injury for the pre-season intercollegiate athlete in the sport of softball. Course content includes softball fundamental skills development, strength training, cardiovascular conditioning, agility, plyometric, speed training, and flexibility exercises. This course may be taken up to four times for credit.

**SPORT 376 Off Season Swim & Dive**

**Units:** 0.5 - 3  
**Hours:** 27 - 162 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Tryout.  
**Transferable:** CSU; UC (UC credit limitation: Any or all PE activity courses combined: maximum credit, 4 units.)  
**General Education:** AA/AS Area III(a); CSU Area E2

This course combines basic skills and stroke technique with an emphasis on a fitness component for the sport of swim and dive. It also offers a dry-land training component for peak performance. This course is designed to prepare students for intercollegiate swim and dive competition. This course may be taken up to four times for credit.
SPORT 380 Tennis, Intercollegiate-Men

Units: 3  
Hours: 175 hours LAB  
Prerequisite: None.  
Enrollment Limitation: Tryout  
Transferable: CSU; UC (UC credit limitation: Any or all PE activity courses combined: maximum credit, 4 units.)  
General Education: AA/AS Area III(a); CSU Area E2

This course covers fundamentals, rules, and individual and/or team strategy appropriate to intercollegiate athletic competition in tennis. This course may be taken four times for credit.

SPORT 385 Tennis, Intercollegiate-Women

Units: 3  
Hours: 175 hours LAB  
Prerequisite: None.  
Enrollment Limitation: Tryout  
Transferable: CSU; UC (UC credit limitation: Any or all PE activity courses combined: maximum credit, 4 units.)  
General Education: AA/AS Area III(a); CSU Area E2

This course covers fundamentals, rules, and individual and/or team strategy appropriate to intercollegiate athletic competition in tennis. This course may be taken four times for credit.

SPORT 386 Off Season Conditioning for Tennis

Units: 0.5 - 3  
Hours: 27 - 162 hours LAB  
Prerequisite: None.  
Enrollment Limitation: Tryout required.  
Transferable: CSU; UC (UC credit limitation: Any or all PE activity courses combined: maximum credit, 4 units.)  
General Education: AA/AS Area III(a); CSU Area E2

This course prepares the intercollegiate tennis player for the competitive season and reduces risk of injury. Course content includes collegiate level tennis-specific skill development, a solid aerobic conditioning plan, sport-specific strength training, agility work, plyometrics, speed training, flexibility exercises and other activities designed to prepare the athlete both physically and mentally. This course may be taken up to four times for credit.

SPORT 390 Track and Field, Intercollegiate-Men

Units: 3  
Hours: 175 hours LAB  
Prerequisite: None.  
Enrollment Limitation: Tryout  
Transferable: CSU; UC (UC credit limitation: Any or all PE activity courses combined: maximum credit, 4 units.)  
General Education: AA/AS Area III(a); CSU Area E2

This intercollegiate track and field course provides specialized training for competition with other community college teams. It covers the fundamental and advanced techniques needed for specific events, along with the rules, strategies, sportsmanship, and teamwork appropriate for intercollegiate competition. This course may be taken up to four times for credit.

SPORT 395 Track and Field, Intercollegiate-Women

Units: 3  
Hours: 175 hours LAB  
Prerequisite: None.  
Enrollment Limitation: Tryout  
Transferable: CSU; UC (UC credit limitation: Any or all PE activity courses combined: maximum credit, 4 units.)  
General Education: AA/AS Area III(a); CSU Area E2

This is an advanced track and field team activity for female students providing specialized training for competition. It covers the fundamental and advanced techniques needed for specific events, along with the rules and strategies appropriate for intercollegiate competition. This course may be taken up to four times for credit.

SPORT 396 Off Season Conditioning for Track and Field

Units: 0.5 - 3  
Hours: 27 - 162 hours LAB  
Prerequisite: None.  
Enrollment Limitation: Tryout required.  
Transferable: CSU; UC (UC credit limitation: Any or all PE activity courses combined: maximum credit, 4 units.)  
General Education: AA/AS Area III(a); CSU Area E2

This course includes sport-specific training, conditioning, and technical skill development specific to the sport of track and field for the off-season student athlete. Course content includes sport-specific skill development, event-specific strength training, cardiovascular conditioning, agility training, plyometric drills, anaerobic speed development, and enhancement of flexibility. This course may be taken up to four times for credit.

SPORT 403 Pre-Season Conditioning for Volleyball

Units: 0.5 - 3  
Hours: 27 - 162 hours LAB  
Prerequisite: None.  
Enrollment Limitation: Students must demonstrate intercollegiate athletic skills determined by a tryout conducted by the coaching staff.  
Transferable: CSU; UC (UC credit limitation: Any or all PE activity courses combined: maximum credit, 4 units.)  
General Education: AA/AS Area III(a); CSU Area E2

This course involves a combination of skill development and strategy tactics with an emphasis on a fitness component for the sport of volleyball. It offers a mental training component for peak performance. This course is designed to prepare students for intercollegiate volleyball competition. It may be taken up to 4 times for credit.

SPORT 405 Volleyball, Intercollegiate-Women

Units: 3  
Hours: 175 hours LAB  
Prerequisite: None.  
Enrollment Limitation: Tryout  
Transferable: CSU; UC (UC credit limitation: Any or all PE activity courses combined: maximum credit, 4 units.)  
General Education: AA/AS Area III(a); CSU Area E2

This course provides an opportunity for competition in intercollegiate women’s volleyball. It provides volleyball fundamentals and skills. It also includes rules and individual and team strategies appropriate for intercollegiate athletic competition. This course may be taken four times for credit.
SPORT 406 Off Season Conditioning for Volleyball

**Units:** 0.5 - 3  
**Hours:** 27 - 162 hours LAB  
**Prerequisite:** Students must demonstrate intercollegiate athletic skills determined by a tryout conducted by the coaching staff.  
**Enrollment Limitation:** Tryout.  
**Transferable:** CSU; UC (UC credit limitation: Any or all PE activity courses combined: maximum credit, 4 units.)  
**General Education:** AA/AS Area III(a); CSU Area E2

This course provides training and technical skill development specific to the sport of volleyball for off-season student-athletes. Topics include skill development, strength training, cardiovascular conditioning, agility work, plyometrics, speed training, and flexibility exercises. This course may be taken up to four times for credit.

SPORT 408 Intercollegiate Beach Volleyball

**Units:** 3  
**Hours:** 175 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** In order to take this class, each student must: 1) be listed as a student athlete, by the head coach, on the official team roster; and 2) obtain medical clearance, including a physical performed by a licensed physician. The student should contact the instructor for process and required forms. Once enrolled, the student must demonstrate intercollegiate athletic level skills as determined by the coaching staff to remain enrolled in this course.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area III(a); CSU Area E2

This course provides an opportunity for competition in intercollegiate women's beach volleyball. It provides beach volleyball fundamentals and skills. It also includes rules and individual and pair strategies appropriate for intercollegiate athletic competition. This course may be taken four times for credit.

SPORT 410 Water Polo, Intercollegiate-Men

**Units:** 3  
**Hours:** 175 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Tryout.  
**Transferable:** CSU; UC (UC credit limitation: Any or all PE activity courses combined: maximum credit, 4 units.)  
**General Education:** AA/AS Area III(a); CSU Area E2

This advanced water polo team activity provides opportunities for competition with other community college teams. Fundamentals, rules, team strategy, and swimming skills appropriate to intercollegiate athletic competition are expected of the competitors. This course may be taken up to four times for credit.

SPORT 415 Water Polo, Intercollegiate-Women

**Units:** 3  
**Hours:** 175 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Tryout.  
**Transferable:** CSU; UC (UC credit limitation: Any or all PE activity courses combined: maximum credit, 4 units.)  
**General Education:** AA/AS Area III(a); CSU Area E2

This is an advanced water polo team activity that provides competition with other community college teams. Fundamentals, rules, team strategy, and swimming skills appropriate to intercollegiate athletic competition are expected of the competitors. This course may be taken up to four times for credit.

SPORT 416 Off Season Conditioning for Water Polo

**Units:** 0.5 - 3  
**Hours:** 27 - 162 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Tryout.  
**Transferable:** CSU; UC (UC credit limitation: Any or all PE activity courses combined: maximum credit, 4 units.)  
**General Education:** AA/AS Area III(a); CSU Area E2

This course combines basic skills and strategy tactics with an emphasis on a fitness component for the sport of water polo. It also offers a dry-land training component for peak performance. This course is designed to prepare students for intercollegiate water polo competition. This course may be taken up to four times for credit.

SPORT 417 Pre-Season Conditioning for Water Polo

**Units:** 0.5 - 3  
**Hours:** 27 - 162 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Tryout.  
**Transferable:** CSU; UC (UC credit limitation: Any or all PE activity courses combined: maximum credit, 4 units.)  
**General Education:** AA/AS Area III(a); CSU Area E2

This course is designed for student athletes involved in or trying out for the collegiate water polo team. It combines basic skills and strategy tactics with an emphasis on a fitness component for the sport of water polo. It also offers a dry-land training component for peak performance. This course is designed to prepare students for intercollegiate water polo competition.

SPORT 495 Independent Studies in Sport

**Units:** 1 - 3  
**Hours:** 54 - 162 hours LAB  
**Prerequisite:** None.  
**Transferable:** CSU  
**General Education:** AA/AS Area III(a)

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

SPORT 499 Experimental Offering in Sport

**Units:** 0.5 - 4  
**Prerequisite:** None.  
**Transferable:** CSU  
**General Education:** AA/AS Area III(a)

This is the experimental courses description.
General Education: AA/AS Area III(a); CSU Area E2

This course covers the beginning-level knowledge and skills needed to play indoor soccer. It also covers the differences between indoor and outdoor soccer as well as the history, techniques, rules, and strategies of the game with an emphasis on improvement of their physical fitness and skills.

**TMACT 301 Indoor Soccer II**

**Units:** 1  
**Hours:** 54 hours LAB  
**Course Family:** Soccer  
**Prerequisite:** TMACT 300 with a grade of "C" or better  
**Transferable:** CSU; UC (UC credit limitation: Any or all PE activity courses combined: maximum credit, 4 units)  
**General Education:** AA/AS Area III(a); CSU Area E2

This course covers the intermediate-level player knowledge and skills needed to play indoor soccer, with an emphasis in defending, attacking, and technical ability. It also covers the skills, strategy, and rules that govern the play of indoor soccer.

**TMACT 302 Soccer - Outdoor**

**Units:** 1  
**Hours:** 54 hours LAB  
**Course Family:** Soccer  
**Prerequisite:** None.  
**Transferable:** CSU; UC (UC credit limitation: Any or all PE activity courses combined: maximum credit, 4 units)  
**General Education:** AA/AS Area III(a); CSU Area E2

This course covers the beginning-level knowledge and skills needed to play outdoor soccer, emphasizing defense, offense, passing, ball control, heading, and shooting. It also covers the skills, strategy, and rules that govern the play of outdoor soccer.

**TMACT 303 Outdoor Soccer II**

**Units:** 1  
**Hours:** 54 hours LAB  
**Course Family:** Soccer  
**Prerequisite:** TMACT 302 with a grade of "C" or better  
**Transferable:** CSU; UC (UC credit limitation: Any or all PE activity courses combined: maximum credit, 4 units)  
**General Education:** AA/AS Area III(a); CSU Area E2

This course covers the intermediate-level player environment to challenge and improve the player's knowledge and skills needed to play outdoor soccer, emphasizing defending, attacking, and technical ability. It covers the skills, strategy, and rules that govern the play of outdoor soccer. This class is not designed for beginning soccer players.

**TMACT 304 Outdoor Soccer III**

**Units:** 1  
**Hours:** 54 hours LAB  
**Course Family:** Soccer  
**Prerequisite:** TMACT 303 with a grade of "C" or better  
**Transferable:** CSU; UC (UC credit limitation: Any or all PE activity courses combined: maximum credit, 4 units)  
**General Education:** AA/AS Area III(a); CSU Area E2

This course covers an advanced level knowledge and skills needed to play outdoor soccer, emphasizing technical and conditioning drills, game preparations, match analysis, and tactical knowledge, as well as defensive and offensive drills of advanced level play. It also introduces basic coaching techniques.

**TMACT 320 Basketball**

**Units:** 1  
**Hours:** 54 hours LAB  
**Course Family:** Basketball  
**Prerequisite:** None.

**Advisory:** Participation on a high school basketball team  
**Transferable:** CSU; UC (UC credit limitation: Any or all PE activity courses combined: maximum credit, 4 units)  
**General Education:** AA/AS Area III(a); CSU Area E2

This course features tournament scrimmage play to improve offensive, defensive, and team skills for basketball. It also covers individual fundamental skills including shooting, passing, ball handling, individual defense, and rebounding.

**TMACT 330 Volleyball**

**Units:** 1  
**Hours:** 54 hours LAB  
**Course Family:** Volleyball  
**Prerequisite:** None.  
**Transferable:** CSU; UC (UC credit limitation: Any or all PE activity courses combined: maximum credit, 4 units)  
**General Education:** AA/AS Area III(a); CSU Area E2

This beginning volleyball course covers the basic techniques of passing, setting, serving, and attacking, as well as rules and simple strategies of play.

**TMACT 331 Volleyball II**

**Units:** 1  
**Hours:** 54 hours LAB  
**Course Family:** Volleyball  
**Prerequisite:** TMACT 330 with a grade of "C" or better  
**Transferable:** CSU; UC (UC credit limitation: Any or all PE activity courses combined: maximum credit, 4 units)  
**General Education:** AA/AS Area III(a); CSU Area E2

This intermediate course focuses on refining basic skills of serving, passing, and setting as well as further developing skills in serve-receive, defense, spiking, blocking, and digging. It also covers challenging techniques and strategies that follow NCAA collegiate rules and etiquette.

**TMACT 333 Volleyball III**

**Units:** 1  
**Hours:** 54 hours LAB  
**Course Family:** Volleyball  
**Prerequisite:** TMACT 331 with a grade of "C" or better  
**Transferable:** CSU; UC (UC credit limitation: Any or all PE activity courses combined: maximum credit, 4 units)  
**General Education:** AA/AS Area III(a); CSU Area E2

This advanced volleyball class focuses on more complicated skills and techniques of the sport. Competitive play takes a higher priority. Topics include a variety of offensive and defensive systems, and how to apply them in a game-like setting.

**TMACT 340 Football**

**Units:** 1  
**Hours:** 54 hours LAB  
**Prerequisite:** None.  
**Advisory:** ENGWR 102 and ENGRD 116 with a grade of "C" or better; OR ESLR 320 and ESLW 320 with a grade of "C" or better.  
**Transferable:** CSU; UC (UC credit limitation: Any or all PE activity courses combined: maximum credit, 4 units)  
**General Education:** AA/AS Area III(a); CSU Area E2

This course covers advanced offensive and defensive strategies for football at the college level. Blocking schemes, tackling techniques, as well as offensive and defensive formations are discussed.

**TMACT 352 Softball, Slow Pitch**

**Units:** 1  
**Hours:** 54 hours LAB  
**Prerequisite:** None.

**General Education:** AA/AS Area III(a); CSU Area E2

This course covers the intermediate-level player knowledge and skills needed to play outdoor soccer, emphasizing technical and conditioning drills, game preparations, match analysis, and tactical knowledge, as well as defensive and offensive drills of advanced level play. It also introduces basic coaching techniques.
This course covers the basic softball skills of throwing, catching, pitching, and hitting. Rules and strategies are also covered, including position play and base running.

**TMACT 495 Independent Studies in Team Activity**

*Units:* 1 - 3  
*Hours:* 54 - 162 hours LAB  
*Prerequisite:* None.  
*Transferable:* CSU  
*General Education:* AA/AS Area III(a)

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

**TMACT 499 Experimental Offering in Team Activity**

*Units:* 0.5 - 4  
*Prerequisite:* None.  
*Transferable:* CSU

This is the experimental courses description.
Learning Resource Center

The Learning Resource Center (LRC) is an instructional facility that provides classrooms, a quiet learning environment, and instructional support services. The LRC advances the vision and mission of American River College by offering supplemental instruction and academic support through individualized tutoring and other alternative modes of instruction to currently enrolled ARC students seeking to successfully achieve their educational goals.

Learning Resource Center (LRC) Courses

LRC 300 Introduction to Tutor Training

Units: 1
Hours: 18 hours LEC
Prerequisite: None.
Enrollment Limitation: A grade of B or better in the course to be tutored. Faculty recommendation and approval to be a tutor in the LRC Department.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340.

This course is offered in coordination with the Learning Resource Center Tutorial Services Program. It introduces the role of a tutor and the methods of effective tutoring. It covers establishing goals and objectives, implementing a tutorial plan, applying effective learning skills, developing effective communication and listening skills, and fostering critical thinking. This course is formerly known as INDIS 320.

LRC 310 Introduction to Group Tutoring

Units: 1
Hours: 18 hours LEC
Prerequisite: None.
Enrollment Limitation: A grade of B or better in the course to be tutored. Faculty recommendation to be a Beacon group tutor.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340.
Transferable: CSU

This course is offered in coordination with the Beacon Tutoring Program at American River College. It introduces the role of the tutor as a facilitator and presents the methods of effective group tutoring. This course emphasizes collaborative and interactive approaches to learning in a group setting. This course is formerly known as INDIS 321.

LRC 499 Experimental Offering in Learning Resource Center

Units: 0.5 - 4
Prerequisite: None.
Transferable: CSU

This is the experimental courses description.

LRC 1000 Supervised Tutoring

Units: 0
Hours: 500 hours LAB
Prerequisite: None.
Enrollment Limitation: Student must be enrolled in an ARC college credit course and be referred to tutoring by an ARC instructor or counselor on the basis of an identified learning need.

This course offers individualized tutoring designed to assist students to increase their success in college courses. Content varies depending upon the adjunct course. Attention is given to essential study skills and utilization of campus learning resources. Students may enroll for support of more than one college course per semester. This course may be repeated in subsequent semesters. This noncredit supervised tutoring course allows for 1-500 hours per semester.
Legal Studies

The Legal Studies program at American River College is approved by the American Bar Association. ARC’s Legal Studies program has been preparing students for entry-level positions in this profession for over 30 years.

California Business & Professions Code (B & P Code) section 6450 defines a “paralegal” as a person qualified by education, training, or work experience, who either contracts with or is employed by an attorney, law firm, corporation, governmental agency, or other entity, and who performs legal specialty work under the direction and supervision of an active member of the State Bar of California or an attorney practicing law in the federal courts.

Tasks performed by a paralegal include, but are not limited to, case planning, development, and management; legal research; interviewing clients; fact gathering and retrieving information; drafting and analyzing legal documents; collecting, compiling, and utilizing technical information to make an independent decision and recommendation to the supervising attorney; and representing clients before a state or federal administrative agency if that representation is permitted by statute, court rule, or administrative rule or regulation.

Paralegals do not provide legal advice. It is unlawful for anyone not currently licensed to practice law in California to give legal advice.

The law office clerical certificate option is not approved by the American Bar Association and does not prepare students to work as paralegals.

NOTE: Nine (9) semester credits of legal specialty coursework must be completed through synchronous instruction.

Transfer Credit Policy

1. Introduction. Courses transferred to American River College may fulfill requirements of general education, legal specialty courses, or non-legal specialty courses. Legal specialty courses are designed for legal assisting students and emphasize the development of practical paralegal skills. At American River College, legal specialty course are designated with a “LA” prefix.

2. Legal Specialty Courses Defined. “Legal specialty” is a term of art unique to ABA approval. In order for a paralegal course to qualify as legal specialty, it must meet all of the following elements: (1) cover substantive or procedural legal topics; (2) be developed for paralegals; (3) emphasize practical paralegal skills; and (4) meet the instructional requirements of the ABA.

3. Transfer of Legal Specialty Coursework. A maximum of 9 credit hours of legal specialty (assigned the prefix LA) coursework may be transferred into the program from a nationally accredited, ABA-approved, paralegal studies or legal assisting program.

4. Transfer of Non-Legal Specialty Coursework from Other Institutions. Transfer credit evaluation of general education courses and non-legal specialty courses is handled in accordance with college policies.

5. Time Limit on Transfer of Coursework. Transfer units from other institutions will not be accepted for transfer credit if they are older than three years. The Legal Assisting program requires that a transfer student successfully complete a minimum of 10 hours of face-to-face instruction in the Legal Assisting program at ARC.

Degrees and Certificates Offered

A.A. in Paralegal Studies
Law Office Clerical Assistant Certificate
Paralegal Studies Certificate

Division Dean Kirsten Corbin
Department Chair Kate Chang
Phone (916) 484-8512
Email ChangK@arc.losrios.edu

Associate Degree

A.A. in Paralegal Studies

This degree prepares students to work in the legal field as an entry-level paralegal. It covers basic substantive and procedural areas including civil litigation, legal research and legal writing, contracts, and torts. This degree is in full compliance with California Business and Professions Code section 6450 regarding preparation for work in this field.

The American Bar Association (ABA) has specific requirements for 18 units of additional non-paralegal coursework (ABA Breadth). Students are encouraged to consult a counselor or the department chair for courses that satisfy the ABA Breadth requirements.

ABA Breadth: Courses from at least three different areas of Areas 1-5B of the Intersegmental General Education Transfer Curriculum (IGETC), excluding performance courses, activity courses, administration of justice courses, and the lab component of science courses.

Total Units: 48

The Paralegal Studies Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.
Student Learning Outcomes

Upon completion of this program, the student will be able to:

- incorporate basic legal theories in various substantive areas of law as required by supervising attorney.
- define and use legal terminology accurately and appropriately.
- differentiate between relevant and irrelevant information and evidence.
- research relevant legal authority.
- verify the currency of relevant legal authority.
- draft correspondence to be sent to clients or opposing counsel and others.
- prepare basic legal documents for signature and submission to court by the supervising attorney.
- organize professional assignments efficiently.
- support the supervising attorney in all phases of legal practice.
- demonstrate ethical behavior in the legal setting.
- recognize acts that may constitute the unlicensed practice of law.
- express their thoughts effectively, both orally and in writing, with attorneys and clients.

Career Information

Career opportunities for paralegals have an excellent outlook. According to the US Department of Labor's Job Outlook, employment of paralegals is projected to grow 15 percent between 2016 and 2026, faster than the average for all occupations. Paralegals find employment in both the State and Federal government as well as private practice and corporate settings.

Certificates of Achievement

Law Office Clerical Assistant Certificate

This certificate provides the skills needed for entry-level clerical positions in law offices. The course work emphasizes workforce skills including an introduction to the use of terms particular to the legal field.

This Law Office Clerical Assistant certificate is not approved by the American Bar Association and does not prepare students to work as paralegals or legal assistants under California state law.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- demonstrate keyboarding competence in the legal workplace.

Paralegal Studies Certificate

Students must possess an A.A. degree or higher from a regionally accredited institution to be eligible for the certificate. The Paralegal Studies Certificate is a one-year course of study consisting of 30 units of legal specialty courses. Legal courses cover basic substantive and procedural areas including civil litigation, legal research and legal writing, contracts, and torts, in addition to electives within the program. This certificate is in full compliance with California Business and Professions Code section 6450 regarding preparation for work in this field.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- solve common office problems using current business technology and software applications.
- practice effective communication with law office personnel and clients.
- apply appropriate communication standards to the special situations encountered in a law office.
- produce written documents in appropriate formats using the legal office technology.
• define and use legal terminology accurately and appropriately.
• differentiate between relevant and irrelevant information and evidence.
• research relevant legal authority.
• verify the currency of relevant legal authority.
• draft correspondence to be sent to clients or opposing counsel and others.
• prepare basic legal documents for signature and submission to court by the supervising attorney.

Paralegals find employment in both the State and Federal government as well as private practice and corporate settings.

Legal Assisting (LA) Courses

**LA 300 Introduction to Law and the American Legal System**

Units: 3  
Hours: 54 hours LEC  
Prerequisite: ENGW 300 or ESLW 340 with a grade of "C" or better  
Transferable: CSU

This course introduces the American legal system, its history, and function. It provides an overview of several important areas of law such as torts and crimes and the legal assistant's role in the system.

**LA 310 Civil Procedures and Litigation**

Units: 3  
Hours: 54 hours LEC  
Prerequisite: None.  
Corequisite: LA 300  
Transferable: CSU

This course is an introduction to the California court system with emphasis on understanding the practical aspects of litigation and the proper procedures required by statutes and rules of court. It covers the phases of California court procedure, including state and Federal constitutional limitations, jurisdiction, venue, pleadings, and motions. It also includes the forms by which matters are submitted to the court system from pre-litigation through appeals.

**LA 312 Torts and Personal Injury**

Units: 3  
Hours: 54 hours LEC  
Prerequisite: None.  
Corequisite: LA 300  
Transferable: CSU

This course is an overview of substantive tort law as it applies to personal injury (PI) cases. It introduces tort concepts, such as negligence, intent, and strict liability, including the elements required to prove liability and defenses available to litigants. This course covers pretrial procedures, such as discovery, settlement offers, and witness and trial preparation.

**LA 314 Contract Law**

Units: 3  
Hours: 54 hours LEC  
Prerequisite: None.  
Corequisite: LA 300  
Transferable: CSU

This course covers basic contract principles. Topics include formation, validity, defenses, rights of third parties, performance, breach, remedies, and damages.

**LA 320 Legal Research**

Units: 3  
Hours: 54 hours LEC  
Prerequisite: None.  
Corequisite: LA 300  
Transferable: CSU

This course provides the paralegal with the basic tools of legal research in both federal and California law, with emphasis on California materials. It covers the location and use of primary and secondary sources, the elements of a court decision, and how to brief a case.

**LA 321 Legal Writing**

Units: 3  
Hours: 54 hours LEC  
Prerequisite: LA 320 with a grade of "C" or better  
Transferable: CSU

This course is a continuation of LA 320: Legal Research. It includes the application of research methods to gather information which may be used in a variety of written products. It covers synthesizing information into various documents typically used in the law office. Documents created may include interoffice memoranda, court briefs, and letters to clients.

**LA 322 Advanced Legal Research and Writing**

Units: 3  
Hours: 54 hours LEC  
Prerequisite: LA 321 with a grade of "C" or better  
Transferable: CSU

This course builds on the research and writing skills covered in LA 320 and LA 321. It focuses on refining legal research, analytical, and writing skills with an emphasis on researching and applying most current codes, rules, and practices pertaining to e-discovery, meta data mining, and other technical issues; it also covers drafting various discovery requests/responses and discovery motions/oppositions and/or other documents filed in Law and Motion departments relative to electronically stored information. Extensive use of computers and the internet is required.

**LA 330 Family Law and Procedure**

Units: 3  
Hours: 54 hours LEC  
Prerequisite: LA 300 with a grade of "C" or better  
Advisory: LA 320  
Transferable: CSU

This course covers California Family Law relating to dissolution procedures, property issues, and non-marital relationships. Legal procedures, and preparation of necessary forms and their significance are emphasized.
LA 332 Administrative Law and Procedure

Units: 3
Hours: 54 hours LEC
Prerequisite: LA 300 with a grade of "C" or better
Transferable: CSU

This course covers administrative law and procedure. Topics include comparison of administrative law to civil and criminal law, and administrative due process.

LA 334 Criminal Law and Procedure

Units: 3
Hours: 54 hours LEC
Prerequisite: LA 300 with a grade of "C" or better
Transferable: CSU

This course provides background in both substantive crimes and criminal procedure. It includes a detailed study of the operation of the criminal justice system, from arrest and filing of charges through trial, conviction and appeal.

LA 336 Immigration Law

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Corequisite: LA 300
Transferable: CSU

This course is an elective in the Paralegal Studies program and is designed to prepare students for work in an immigration law setting. Students will learn about the Justice Department, the Labor Department, and the State Department, and how these agencies administer immigration and naturalization laws.

LA 340 Techniques of Interview

Units: 1
Hours: 18 hours LEC
Prerequisite: LA 300 with a grade of "C" or better
Transferable: CSU

This course provides general background information about basic communication and relates this information to the skills used by a legal assistant in interviewing clients and witnesses.

LA 342 Evidence

Units: 3
Hours: 54 hours LEC
Prerequisite: LA 300 with a grade of "C" or better
Advisory: LA 310
Transferable: CSU

This course covers the rules of evidence in federal and state courts. Topics include Hearsay Rule, Best Evidence Rule, and organizing deposition transcripts.

LA 350 Law Office Management

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Corequisite: LA 300
Transferable: CSU

This course covers aspects of the paralegal's role in a law office. Law office technology, accounting, time and records management, and communication skills are examined.

LA 360 Corporations Law

Units: 3
Hours: 54 hours LEC
Prerequisite: LA 300 with a grade of "C" or better
Transferable: CSU

This course covers corporation terminology and legal requirements governing corporations. Topics include formation, dissolution and liquidation of a corporation.

LA 362 Estate Planning and Probate Procedure

Units: 3
Hours: 54 hours LEC
Prerequisite: LA 300 and 320 with grades of "C" or better
Transferable: CSU

This course covers estate planning, including the manner in which property may be held and ways it can be transferred. Testate and intestate probate procedures are included.

LA 363 Public Benefits Clinic

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: LA 300, 320, and 332 with grades of "C" or better
Transferable: CSU

This course is a study of the activities of a legal public benefits clinic, including conducting client interviews, participating in legal consultations, performing legal research, and carrying out tasks needed in clinic operations, all under the direct supervision of clinic attorneys. This course also covers research, examinations, and conduct according to the ethical rules of the American Bar Association (ABA) and California’s Rules of Professional Conduct.

LA 364 Landlord Tenant Law

Units: 3
Hours: 54 hours LEC
Prerequisite: LA 300 with a grade of "C" or better
Transferable: CSU

This course focuses on the most common types of landlord-tenant disputes. It covers litigation and non-litigation matters. Topics also include the different types of tenancy, what constitutes habitability, and tenant's rights and obligations.

LA 365 Legal Clinic

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: LA 300, 310, 320, and 321 with grades of "C" or better
Transferable: CSU

This course is a study of the activities of a legal clinic, including conducting client interviews, participating in legal consultations, performing legal research, and carrying out tasks needed in clinic operations, all under the direct supervision of clinic attorneys. This course also covers research, examinations, and conduct according to the Professional Rules of Responsibility and Ethics.

LA 366 Basic Bankruptcy Law

Units: 3
Hours: 54 hours LEC
Prerequisite: LA 300 with a grade of "C" or better
Transferable: CSU

This course is an introduction to the practical aspects of representing debtors or creditors within the bankruptcy system. Topics include voluntary and involuntary bankruptcy, preparation of statements, and schedules for filing.
LA 368 Workers' Compensation Law

Units: 3
Hours: 54 hours LEC
Prerequisite: LA 300 with a grade of "C" or better
Transferable: CSU

This course provides an overview of the Workers' Compensation Law in California. It focuses on the procedural aspects of handling a Workers' Compensation claim from both the applicant perspective and the defense perspective.

LA 495 Independent Studies in Legal Assisting

Units: 1 - 3
Prerequisite: None.

LA 498 Work Experience in Legal Assisting

Units: 0.5 - 4
Hours: 30 - 300 hours LAB
Prerequisite: None.
Enrollment Limitation: Students must be in a paid or unpaid internship, volunteer position, or job related to legal assisting with a cooperating site supervisor. Students are advised to consult with the Legal Assisting Department faculty to review specific certificate and degree work experience requirements.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.

Transferable: CSU
General Education: AA/AS Area III(b)

This course provides students with opportunities to develop marketable skills in preparation for employment or advancement within the field of legal assisting. It is designed for students interested in work experience and/or internships in transfer-level degree occupational programs. Course content includes understanding the application of education to the workforce, completion of Title 5 required forms which document the student’s progress and hours spent at the work site, and developing workplace skills and competencies.

During the semester, the student is required to complete 37.5 hours of related paid work experience, or 30 hours of related unpaid work experience for 0.5 unit. An additional 37.5 or 30 hours of related work experience is required for each additional 0.5 units. All students are required to attend the first class meeting, a mid-semester meeting, and a final meeting. Additionally, students who have not already successfully completed a Work Experience course will be required to attend weekly orientations while returning participants may meet individually with the instructor as needed. Students may take up to 16 units total across all Work Experience course offerings. This course may be taken up to four times when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

LA 499 Experimental Offering in Legal Assisting

Units: 0.5 - 4
Prerequisite: None.
Transferable: CSU

This is the experimental courses description.
Library

The American River College Library courses teach vital research skills that enable students to achieve success in their college classes, their careers, and their day-to-day lives. Students will learn research skills to cope with the information rich environment in which they live. In particular, students will learn how to find and critically evaluate information from a wide variety of sources to meet their information needs.

Department Chairs David McCusker
Phone (916) 484-8455

Library (LIBR) Courses

LIBR 318 Library Research and Information Literacy

Units: 1
Hours: 18 hours LEC
Prerequisite: None.
Advisory: CISC 300 with a grade of "C" or better
Transferable: CSU; UC
General Education: AA/AS Area III(b)

This course introduces the skills necessary to conduct research and helps students refine their current research skills. This course covers the research process including developing search strategies, using a variety of research tools, and resources selecting relevant sources. Critical evaluation of information, including how bias, power, and privilege influence the creation of, dissemination of, and access to information is also explored. The topics covered in this course are applicable to personal, professional, and academic research.

LIBR 325 Internet Research Skills

Units: 3
Hours: 54 hours LEC

Prerequisite: None.
Advisory: CISC 300; and eligible for ENGRD 310 or ENGRD 312 AND ENGW 390; OR ESLR 340 AND ESLW 340.
Transferable: CSU; UC
General Education: AA/AS Area III(b)

This course surveys the content, use, and evaluation of electronic information sources. Emphasis is placed on the effective use of the Internet as a research tool. It covers Internet resources including the deep Web, Web portals, online databases, and library catalogs. Communication services such as email, newsgroups, listservs, blogs, and social networks are also studied as are Web 2.0 and other emerging technologies. Database search strategies, techniques, and critical evaluation of information are covered. Historical and social issues surrounding the Internet are also discussed.

LIBR 494 Topics in Library Science

Units: 0.5 - 4
Hours: 9 - 72 hours LEC
Prerequisite: None.
Transferable: CSU

This course provides an opportunity to study current topics in library science that are not included in existing courses.

LIBR 495 Independent Studies in Library

Units: 1 - 3
Hours: 18 - 54 hours LEC
Prerequisite: None.
Transferable: CSU

This course provides an opportunity for independent study on issues related to library science.

LIBR 499 Experimental Offering in Library

Units: 0.5 - 4
Prerequisite: None.
Transferable: CSU

This is the experimental courses description.
Management

This program is intended for those who wish to progress to positions of responsibility in their respective industry. Its strong management focus provides the knowledge and skills needed to progress into management positions. Topics include management communication, human resources, organizational behavior, diversity management, and business computer applications.

Degrees and Certificates Offered

A.A. in Management
Conflict Management Certificate
Leadership Certificate
Management Certificate
Project Management Certificate

Division Dean Kirsten Corbin
Department Chair Rachna Nagi-Condos
Phone (916) 484-8361

Associate Degree

A.A. in Management

This program is intended for those who wish to progress to positions of responsibility in their respective industry. Its strong management focus provides the knowledge and skills needed to progress into management positions. Topics include management communication, human resources, organizational behavior, diversity management, and business computer applications.

The Management Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- incorporate leadership skills and abilities that are effective in managing a multicultural workforce.
- analyze practical business problems.
- apply current management philosophies to current management problems.
- integrate management principles in relationship to finance, personnel, products, services and information.
- communicate effectively verbally and in writing in various business settings.
- utilize critical thinking and research skills in the evaluation of alternative solutions.

Certificates of Achievement

Conflict Management Certificate

This certificate focuses on identifying and understanding the underlying causes of workplace conflict and strategies for managing conflict effectively. It explores the impact of conflict on workplace communication, decision-making, and leadership. It covers practical and strategic skills to prevent escalation of conflict and defuse disruptive behaviors.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- explain and assess the role personality and negotiating temperament play in workplace conflict management
- analyze the negotiation process, strategies, and techniques for effective conflict resolution in the workplace
- apply a situational approach to workplace conflict resolution
- evaluate the benefits and drawbacks of various conflict management strategies in the context of the workplace
- explain the key challenges to personnel and human resource management in developing the flexible and skilled workforce needed in governmental and private organizations
- describe the effective philosophies of human behavior at work
- define culture within the context of the United States workplace

Leadership Certificate

This certificate focuses on the leadership and management functions essential to building world class organizations. It also includes concepts, such as customer satisfaction with emphasis on effective planning, systems design, statistical analysis, teamwork, and leadership. It includes the study of physics, statistics, ethics, and organizational psychology.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- construct a basic plan of action utilizing project management software.
- compare and contrast various theories of leadership and motivation.
- explain the principles of project management with regard to case studies.
- demonstrate the ability to formulate a project plan, given specific scenarios.
- assess the inherent advantages and shortcomings in various software packages.
- interpret the basic elements of financial statements.
- apply the basic elements of financial statements.

Career Information

Organizations need employees who understand basic business and management theory and can manage a project from inception to completion. Employment outlook for the 2012-2022 period projects over 40,000 job openings nationally for Project Managers, in a variety of industries, as a “new and emerging” occupation.

Management (MGMT) Courses

MGMT 142 Project Management Techniques and Software

**Same As:** CISA 160  
**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** ENGWR 102 or 103, and ENGRD 116; OR ESLR 320 and ESLW 320; CISC 300

This introductory course covers the responsibilities of a project manager. It includes the knowledge needed to manage a project, control costs, and schedule resources. It also introduces the use of project management software to track project resources, tasks, and milestones. This course is not open to students who have taken CISA 160.

MGMT 230 Introduction to Purchasing Contracts

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.

This course introduces students to purchasing contract theory and practice. Topics include Uniform Commercial Code, contractual business and legal risk mitigation, contract development for goods and services purchases, scope of work and specification development, and contract breach.
MGMT 231 Negotiation Planning

Units: 3  
Hours: 54 hours LEC  
Prerequisite: None.

This course introduces students to the concept of "total cost," and covers the skills to perform cost analysis in support of supplier selection and effective supplier negotiations. It also includes participatory exercises in mock negotiations using the techniques learned in this course.

MGMT 233 Purchasing Organization Management

Units: 3  
Hours: 54 hours LEC  
Prerequisite: None.

This course focuses on the management of a global or regional purchasing operation within a corporation. Concepts covered include organizational structure, hiring, success metrics, tactical and strategic purchasing focus areas, community and environmental obligations, purchasing code of ethics, purchasing policies and procedures, and eCommerce tools and applications.

MGMT 295 Independent Studies in Management

Units: 1 - 3  
Hours: 54 - 162 hours LAB  
Prerequisite: None.

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

MGMT 299 Experimental Offering in Management

Units: 0.5 - 4  
Prerequisite: None.

This is the experimental courses description.

MGMT 300 Introduction to Leadership in Action

Units: 3  
Hours: 54 hours LEC  
Prerequisite: None.  
Transferable: CSU

This course examines the underlying principles and practices of leadership and their implementation by both individuals and organizations. Topics include leadership traits, motivation, empowerment, communication, continuous process improvement, customer-focused management, and leading change.

MGMT 304 Principles of Management

Units: 3  
Hours: 54 hours LEC  
Prerequisite: None.  
Transferable: CSU

This survey course covers a multitude of management subject areas, such as planning, organization, staffing, leadership and control, team development, communication, business ethics, and global management perspectives. It is a core requirement for management majors. This course provides an overview that is helpful for selecting a specific career and/or major in the field of management.

MGMT 308 Personnel and Human Resources Management

Units: 3  
Hours: 54 hours LEC  
Prerequisite: None.  
Transferable: CSU

This course is an introduction to the study and analysis of personnel and human resource management. It covers essential topics, such as civil rights, labor law, and various management theories foundational to both public and private sector organizations. This course provides an overview that is helpful for selecting a specific career and/or major in the field of business or management.

MGMT 350 Leadership in Action: Organizational Learning

Units: 3  
Hours: 54 hours LEC  
Prerequisite: None.  
Transferable: CSU

This course covers basic knowledge of organizational learning with a focus on the practical application of the concepts of theory and prediction, creating learning environments for structured organizational cultures, and the importance of courage, faith, and justice. Emphasis is placed on the immediate application of the tools to the work place.

MGMT 360 Management Communication

Units: 3  
Hours: 54 hours LEC  
Prerequisite: None.  
Advisory: ENGWR 102 or 103, and ENGRD 116 with a grade of “C” or better; OR ESLR 320 and ESLW 320 with a grade of “C” or better; and SPEECH 301 or 302 with a grade of “C” or better; OR placement through assessment process.  
Transferable: CSU  
General Education: AA/AS Area II(b)

This course provides skill training in coping with communication problems in organizations. It includes the study of the communication process, the analysis of the barriers to effective oral and written communication, and the development of guidelines to improve interpersonal relations within organizations through the use of effective methods of communication.

MGMT 362 Techniques of Management

Units: 3  
Hours: 54 hours LEC  
Prerequisite: None.  
Advisory: ENGWR 102 or 103, and ENGRD 116 with a grade of “C” or better; OR ESLR 320 and ESLW 320 with a grade of “C” or better; OR placement through assessment process.  
Transferable: CSU

This course is designed for supervisors and other entry level managers as well as those entering mid-management positions. It focuses on primary management functions of planning, organizing, controlling, and leading. Related skills, such as time management, cost control, performance evaluation, motivation, communication techniques, and the social responsibility of managers, are also emphasized.

MGMT 372 Human Relations and Organizational Behavior

Units: 3  
Hours: 54 hours LEC
Prerequisite: None.
Transferable: CSU

This course emphasizes the psychology of human relations management. It covers human interaction principles that build confidence, competence, and positive attitudes in work organizations. Topics include the basis for human behavior, perception, communication, motivation, performance improvement, group behavior, ethics, and social responsibility.

MGMT 495 Independent Studies in Management

Units: 1 - 3
Hours: 18 - 54 hours LEC
Prerequisite: None.

Transferable: CSU

This course provides the opportunity for students and faculty to design a learning environment around an area of management study as defined in a proposal and approved by the Management department for each individual area of study.

MGMT 499 Experimental Offering in Management

Units: 0.5 - 4
Prerequisite: None.
Transferable: CSU

This is the experimental courses description.
Marketing

The Marketing degree provides an opportunity for students to acquire knowledge and training for careers in sales, advertising, and marketing. The competency-based curriculum is designed to prepare students for a variety of positions and to provide basic training for advancement to management positions and for transfer to four-year universities.

Degrees and Certificates Offered

A.A. in Advertising and Sales Promotion
A.A. in Marketing
A.A. in Retail Management
Marketing Essentials Certificate
Retail Management (WAFC) Certificate

2023-2024 Catalog
Student Learning Outcomes

Upon completion of this program, the student will be able to:

• Integrate the functions of the marketing mix.
• Apply principles of retailing such as business location, merchandising, inventory control, store management and vendor relationships.
• Plan, produce and select the appropriate media for advertising.
• Integrate management principles related to finance, personnel, products, services and information.
• Communicate effectively verbally and in writing in various business settings.
• Identify and examine consumer buyer behavior and evaluate which marketing communications medium will most effectively meet needs of the marketplace.
• Incorporate principles of product development, pricing, distribution strategies, promotion strategies and market research.
• Demonstrate professional sales skills by effectively interviewing and identifying the customers’ needs.
• Evaluate practical business problems and utilize critical thinking in the determination of alternative solutions.
• Identify and explain the major functional areas of the business organizations including management, marketing, finance, and accounting.
• Apply the marketing mix to create and analyze various marketing strategies.

A.A. in Retail Management

The Retail Management program builds on the general business curriculum and prepares students for a leadership role in the retail industry. Depending upon the size of the retail company, retail managers are responsible for one or more parts of a retail operation including sales, marketing, buying, merchandising, operations, inventory control, human resources, and finance.

• become a more productive retail manager, employee, or entrepreneur.
• incorporate basic marketing skills into retail operations, such as target marketing, product development, pricing, distribution decisions, promotion strategies, and marketing research.
• evaluate and develop basic management skills involving human relations, organizational behavior, and human resources management.
• demonstrate basic computer skills in word processing, presentations, and Internet searches.
• analyze and employ various written and verbal communication techniques.
• critique and recommend various retail store layouts and designs.
• recognize and confirm the importance that retailing has upon the American society and economy.

Career Information

Department manager, store director, merchandise buyer, customer service representative, or entrepreneur.

Marketing (MKT) Courses

MKT 295 Independent Studies in Marketing

Units: 1 - 3
Prerequisite: None.

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

MKT 299 Experimental Offering in Marketing

Units: 0.5 - 4
Prerequisite: None.

This is the experimental courses description.

MKT 300 Principles of Marketing

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Transferable: CSU

This course provides a general overview of the principles of marketing. It focuses on the marketing concept and customer satisfaction. Topics include the controllable elements of the marketing mix (product, place or distribution, promotion, and price) as well as the uncontrollable...
Marketing

elements of the marketing environment. This course also examines the topics of target marketing, market segmentation, consumer behavior, social responsibility, marketing research, and international marketing.

MKT 310 Selling Professionally

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Transferable: CSU

This course examines the personal selling philosophy and career opportunities in professional consumer and business selling. The development of a successful presentation strategy is examined, and techniques are illustrated for the steps of selling: approach, sales demonstration, overcoming objections, negotiation, closing, and servicing the sale. This course helps develop better selling and personal marketing techniques. Field trips may be required.

MKT 312 Retailing

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Transferable: CSU

This course is an introduction to the field of retailing. It covers various aspects of retailing, including store location and layout, consumer behavior, human resource management, merchandise buying, pricing, and promotion. Multichannel retailing is discussed, which includes stores, websites, catalogs, and telemarketing. Field trips may be required.

MKT 314 Advertising

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Transferable: CSU

This course is an introduction to consumer advertising. It covers the advertising industry, including advertisers, agencies, media, and suppliers. Consumer behavior is also studied, to realize how advertisers attempt to understand their target audience. Advertising media are investigated in detail, including television, radio, newspapers, magazines, outdoor, Internet, social media, and direct mail. This course emphasizes group dynamics in the development of an advertising campaign. It is recommended for those interested in a career in advertising, as well as future entrepreneurs hoping to develop effective advertising for their businesses.

MKT 330 Internet Marketing

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Transferable: CSU

This course introduces the use of social media and other Internet technologies, with an emphasis on the theory and practice of marketing in an electronic environment. Topics include the personalization and interactivity of the Internet to build strong customer relationships. These concepts are applied to traditional brick and mortar as well as exclusively online businesses.

MKT 495 Independent Studies in Marketing

Units: 1 - 3
Hours: 54 - 162 hours LAB
Prerequisite: None.
Transferable: CSU

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

MKT 498 Work Experience in Marketing

Units: 0.5 - 4
Hours: 30 - 300 hours LAB
Prerequisite: None.
Enrollment Limitation: Students must be in a paid or unpaid internship, volunteer position, or job related to marketing with a cooperating site supervisor. Students are advised to consult with the Marketing Department faculty to review specific certificate and degree work experience requirements.

Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.

Transferable: CSU

General Education: AA/AS Area III(b)

This course provides students with opportunities to develop marketable skills in preparation for employment or advancement within the field of marketing. It is designed for students interested in work experience and/or internships in transfer-level degree occupational programs. Course content includes understanding the application of education to the workforce, completion of Title 5 required forms which document the student's progress and hours spent at the work site, and developing workplace skills and competencies.

During the semester, the student is required to complete 37.5 hours of related paid work experience, or 30 hours of related unpaid work experience for 0.5 unit. An additional 37.5 or 30 hours of related work experience is required for each additional 0.5 units. All students are required to attend the first class meeting, a mid-semester meeting, and a final meeting. Additionally, students who have not already successfully completed a Work Experience course will be required to attend weekly orientations while returning participants may meet individually with the instructor as needed. Students may take up to 16 units total across all Work Experience course offerings. This course may be taken up to four times when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

MKT 499 Experimental Offering in Marketing

Units: 0.5 - 4
Prerequisite: None.
Transferable: CSU

This is the experimental courses description.
Mathematics and Statistics

Besides pre-college and college-level math classes that meet ARC graduation requirements, ARC offers an A.S. degree in mathematics that provides a foundation of mathematics for students in preparation for transfer to a four-year program in mathematics or statistics. Degree course work includes a three semester calculus series, differential equations, linear algebra, and statistics and/or symbolic logic.

Degrees Offered

A.S.-T. in Mathematics
A.S. in Mathematics
A.S. in Physical Science/Mathematics

Dean Jan Delapp
Department Chairs Matt Mitchell
Amy Gaudard
Phone (916) 484-8215

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- evaluate, describe, and apply single variable calculus including various forms of derivatives and integrals, to analyze and solve problems.
- evaluate, describe, and apply multivariate calculus, linear algebra, and differential equations to analyze and solve problems.
- prepare logical arguments and use them to prove basic mathematical theorems.
- solve real-world application problems using appropriate mathematical problem-solving skills.

Career Information

Mathematicians work as statisticians, analysts, computer programmers, actuaries, researchers, planners, and educators. This transfer degree is designed to meet the common lower-division requirements for most bachelor’s degrees in Mathematics.

Associate Degrees for Transfer

A.S.-T. in Mathematics

This degree is designed to meet common lower-division requirements for a major in Mathematics at a CSU campus. Satisfactory completion of the ARC Mathematics transfer degree provides a solid foundation and satisfies the standard prerequisites for upper division coursework for Mathematics majors. However, it is highly recommended that students meet with a counselor since major and general education requirements vary for each college/university.

The Mathematics Associate in Science for Transfer (AS-T) Degree may be obtained by the completion of 60 transferable, semester units with a minimum 2.0 GPA, including (a) the major or area of emphasis described in the Required Program outlined below (earning a C or better in these courses) and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education Breadth Requirements.

Degree Requirements

The Associate in Science in Mathematics for Transfer (AS-T) degree may be obtained by completion of 60 transferable, semester units with a minimum overall grade point average (GPA) of 2.0, including (a) a minimum grade of "C" (or "P") for each course in the major or area of emphasis described in the Required Program, and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education Breadth Requirements.

The Mathematics Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- identify, formulate, and solve applied problems (using calculus and linear algebra) in verbal, numeric, graphical, and symbolic form related to science, economics, or business.
- recognize and construct valid arguments using deductive and inductive reasoning skills.
- define and utilize terminology of mathematics with emphasis in calculus, linear algebra, and either statistics, logic, or problem solving.

Associate Degrees

A.S. in Mathematics

This degree provides a mathematical foundation for students preparing to transfer to a four-year program in mathematics or statistics. Coursework includes a three-semester calculus series, differential equations, linear algebra, and statistics and/or symbolic logic.

The Mathematics Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- identify, formulate, and solve applied problems (using calculus and linear algebra) in verbal, numeric, graphical, and symbolic form related to science, economics, or business.
- recognize and construct valid arguments using deductive and inductive reasoning skills.
- define and utilize terminology of mathematics with emphasis in calculus, linear algebra, and either statistics, logic, or problem solving.
• calculate derivatives and integrals using a variety of defined rules and strategies of calculus, algebraic properties and trigonometric identities.

A.S. in Physical Science/Mathematics

This degree provides a broad study in the fields of physical science and mathematics. It effectively prepares students for transfer to a four-year program in science, technology, engineering, or mathematics (STEM).

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- recognize and correctly use the terminology of math, statistics, and/or science.
- analyze and interpret data, charts, and graphs using quantitative and qualitative methods.
- recognize and construct valid arguments using deductive and inductive reasoning.
- evaluate new and accepted ideas about the natural universe using testable methodology.

Mathematics (MATH) Courses

MATH 10 Developing Confidence in Math

Units: 1
Hours: 18 hours LEC
Prerequisite: None.
Advisory: Concurrent enrollment in another math course

This course helps students recognize common misconceptions of mathematics, overcome math anxiety, and build confidence in math. Topics include relaxation techniques, study habits, and problem solving strategies. This course is also useful for tutors, counselors, and teachers interested in helping others overcome their math anxiety. Pass/No Pass only.

MATH 25 Computational Arithmetic

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Placement through the math assessment process.

This course introduces the fundamentals of arithmetic with an emphasis on computational skills. Topics include whole numbers, exponents, order of operations, factors, fractions, decimals, problem solving, and applications.

MATH 32 Pre-Algebra

Units: 3
Hours: 54 hours LEC
Prerequisite: MATH 25 or 41 with a grade of "C" or better, or placement through the assessment process.

This course briefly reviews the fundamentals of arithmetic, including fractions, decimals, and order of operations. Course content includes signed numbers, ratios, proportions, percent, concepts of variables, area/perimeter/volume of geometric figures, and solving basic linear equations.

MATH 41 Algebra Readiness - Part I

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: CISC 100, CISC 300, or CISC 305 with a grade of "C" or better, AND ENGRD 116 or ESLR 320 with a grade of "C" or better. Placement through the math assessment process.

This course is the first of two parts covering algebra readiness in a mastery-based learning environment. It introduces the fundamentals of arithmetic, and emphasizes problem solving and computational skills. Topics include whole numbers, exponents, order of operations, factors, fractions, decimals, proportion, ratios, rates, problem solving, and applications. Students who complete this course during the first half of the semester may sign up immediately for MATH 42. For the most updated information, please visit the Math Learning Center (MLC) web page on the ARC website. Completion of MATH 41 with a grade of "C" or better meets the prerequisite for MATH 42 and MATH 32.

MATH 42 Algebra Readiness - Part II

Units: 3
Hours: 54 hours LEC
Prerequisite: MATH 41 with a grade of "C" or better

This course is the second of two parts covering algebra readiness in a mastery-based learning environment. It introduces the fundamentals of pre-algebra, with an emphasis on problem solving skills. Topics include order of operations, signed numbers, application problems, concepts of variables, exponents, operations on signed fractions, percent problems, solving algebraic equations, the rectangular coordinate system, introduction to graphing linear equations, applications of equations, and area/perimeter of geometric figures. Students who complete this course during the first half of the semester may sign up immediately for MATH 131. For the most updated information, please visit the MMLC web page on the ARC website. Completion of MATH 41 AND MATH 42 with grades of "C" or better meets the prerequisite for MATH 131, MATH 100, MATH 129, and STAT 105.

MATH 100 Elementary Algebra

Units: 5
Hours: 90 hours LEC
Prerequisite: MATH 32 or 42 with a grade of "C" or better, or placement through the assessment process.

This course covers the fundamental concepts and operations of algebra and incorporates problem-solving skills. Topics include properties of real numbers, linear equations and inequalities, integer exponents, polynomials, and factoring polynomials. Other topics include rational and radical expressions, rational and radical equations, graphing and finding equations of lines, graphing and solving systems of linear equations, and graphing and solving quadratic equations.

MATH 110 Elementary Geometry

Units: 5
Hours: 90 hours LEC
Prerequisite: MATH 100 or 132 with a grade of "C" or better, or placement through the assessment process.

This course covers aspects of elementary geometry. Topics include geometric terms and definitions, properties of parallel lines and parallelograms, congruent and similar triangles, properties of triangles, right triangles, basic trigonometry, properties of circles, geometric constructions, areas, and volumes. The course also emphasizes problem-solving strategies, elementary logic, and writing proofs.

MATH 120 Intermediate Algebra

Units: 5
Hours: 90 hours LEC
Prerequisite: MATH 100 or 132 with a grade of "C" or better, or placement through the assessment process.

General Education: AA/AS Area II(b)

This course extends and reviews the concepts of elementary algebra while incorporating applications and problem-solving skills. Reviewed and extended topics include linear and quadratic equations and their graphs, linear inequalities, systems of linear equations, exponents, factoring polynomials, rational expressions, and radicals. New topics include absolute value equations and inequalities, graphs of absolute value functions, equations of parallel and perpendicular lines, graphs of linear inequalities, graphs of systems of linear inequalities, functions, function notation, domain and range, inverse functions, exponential and logarithmic functions, and conic sections.
Mathematics and Statistics

logarithmic functions and their graphs, quadratic and polynomial functions and their graphs, an introduction to the complex number system, finding the real and complex solutions for a variety of equations, an introduction to conic sections, and nonlinear systems of equations and their graphs.

**MATH 125 Intermediate Algebra for Statistics and Liberal Arts**

Units: 4
Hours: 72 hours LEC
Prerequisite: MATH 100 or 132 with a grade of "C" or better, or placement through the assessment process.
General Education: AA/AS Area II(b)

This is an intermediate algebra course for non-STEM students. Topics include linear functions, models, systems, and graphs, as well as polynomial, exponential, logarithmic, and quadratic functions. The course emphasizes authentic applications and mathematical models using real-world data. This course does not meet the prerequisite for STEM-track math courses.

**MATH 129 Elementary and Intermediate Algebra**

Units: 9
Hours: 162 hours LEC
Prerequisite: MATH 32 or 42 with a grade of "C" or better, or placement through the assessment process.
General Education: AA/AS Area II(b)

This course covers the concepts of elementary and intermediate algebra with an emphasis on problem solving. Topics include linear and quadratic equations, inequalities, factoring polynomials, rational expressions, exponents, radicals, graphing, and system of equations. Additional topics include graphs and their translations and reflections, functions, exponential and logarithmic functions, graphs of quadratic and polynomial functions, nonlinear systems of equations, polynomial and rational inequalities, and an introduction to conic sections.

**MATH 131 Combined Algebra - Part I**

Units: 3
Hours: 54 hours LEC
Prerequisite: MATH 32 or 42 with a grade of "C" or better, or placement through the assessment process.
Advisory: CISC 100, CISC 300, or CISC 305 with a grade of "C" or better, AND ENGRD 116 or ESLR 320 with a grade of "C" or better.

This course is the first of three parts covering combined algebra in a mastery-based learning environment. It emphasizes problem-solving skills. Topics include linear equations and inequalities, integer exponents, polynomials, systems of linear equations, the rectangular coordinate system, graphs and equations of lines, and related applications. Students who complete this course during the first half of the semester may sign up immediately for MATH 132. For the most updated information, please visit the Math Learning Center (MLC) web page on the ARC website. Completion of MATH 131 AND MATH 132 with grades of "C" or better meets the prerequisite for MATH 133, MATH 110, MATH 120, and MATH 125.

**MATH 132 Combined Algebra - Part II**

Units: 3
Hours: 54 hours LEC
Prerequisite: MATH 131 with a grade of "C" or better

This course is the second of three parts covering combined algebra in a mastery-based learning environment. It emphasizes problem-solving skills throughout the course. Topics include polynomial factorization, rational expressions and equations, radical expressions and equations, rational exponents, and related applications. Students who complete this course during the first half of the semester may sign up immediately for MATH 133. For the most updated information, please visit the MMLC web page on the ARC website. Completion of MATH 131 AND MATH 132 with grades of "C" or better meets the prerequisite for MATH 133, MATH 110, MATH 120, and MATH 125.

**MATH 133 Combined Algebra - Part III**

Units: 3
Hours: 54 hours LEC
Prerequisite: MATH 132 with a grade of "C" or better
General Education: AA/AS Area II(b)

This course is the third of three parts covering combined algebra in a mastery-based learning environment. It emphasizes problem-solving skills. Topics include function evaluation and notation, inverse functions, solving quadratic equations, complex numbers, graphs of quadratic functions, exponential and logarithmic functions, properties of logarithms, conic sections, and related applications. For the most updated information, please visit the Math Learning Center (MLC) web page on the ARC website. Completion of MATH 131, MATH 132, AND MATH 133 with grades of "C" or better is equivalent to the completion of MATH 120 or MATH 125 or MATH 129.

**MATH 145 Mathematics for the Trades**

Units: 1.5
Hours: 23 hours LEC; 12 hours LAB
Prerequisite: None.

This course introduces mathematics applicable to technical programs of study. Topics include the use of mathematical operators on whole numbers, fractions, and decimals. Additional content includes fundamentals of algebra, basic geometry, and triangle trigonometry. This course is intended for those in Pre-Apprenticeship programs or other technical educational programs. Completion of this course does not fulfill any prerequisites for any course, including MATH courses, at American River College.

**MATH 294 Topics in Mathematics**

Units: 0.5 - 4
Hours: 9 - 72 hours LEC
Prerequisite: None.

This course is designed to give students an opportunity to study topics in mathematics not included in current course offerings. Individualized topics are developed to foster, complement and build upon arithmetic, geometric and algebraic skills with an emphasis on critical thinking.

**MATH 295 Independent Studies in Mathematics**

Units: 1 - 3
Hours: 54 - 162 hours LAB
Prerequisite: None.

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

**MATH 299 Experimental Offering in Mathematics**

Units: 0.5 - 4
Prerequisite: None.

This is the experimental courses description.
MATH 300 Introduction to Mathematical Ideas

Units: 3
Hours: 54 hours LEC
Prerequisite: MATH 120, 125, 129, or 133 with a grade of "C" or better, or placement through the assessment process.
Transferable: CSU; UC

General Education: AA/AS Area II(b); CSU Area B4; Cal-GETC Area 2 (effective Fall 2025); IGETC Area 2

This course makes fundamental concepts and processes more meaningful for non-mathematics majors through a study of several mathematical topics, including the history of mathematics, numeration systems, logic, geometry, algebraic modeling, combinatorics, probability, statistics, sets, matrices, consumer mathematics, equations and inequalities, functions and graphs, problem solving, graph theory, voting and apportionment, and number theory. It is not recommended for students entering elementary school teaching or business administration majors.

MATH 310 Mathematical Discovery

Units: 3
Hours: 54 hours LEC
Prerequisite: MATH 110 with a grade of "C" or better or successful completion of high school geometry, AND MATH 120, 125, 129, or 133 with a "C" or better, or placement through the assessment process.

General Education: AA/AS Area II(b); CSU Area B4

This course explores mathematical patterns and relations as well as the formulation and proof of conjectures. Topics from number theory, probability and statistics, and geometry are investigated. This course is recommended for students interested in a degree in education.

MATH 311 Mathematical Concepts for Elementary School Teachers - Number Systems

Units: 3
Hours: 54 hours LEC
Prerequisite: MATH 120, 125, 129, or 133 with a grade of "C" or better, or placement through the assessment process.
Transferable: CSU; UC

General Education: AA/AS Area II(b); CSU Area B4
C-ID: C-ID MATH 120

This course focuses on the development of quantitative reasoning skills through in-depth, integrated explorations of topics in mathematics, including history of real number systems and subsystems, basic number theory, sets and relations, logic, mathematical induction, and current national and state curriculum standards for mathematics. It emphasizes comprehension and critical analysis of mathematical concepts and applications of logical reasoning.

MATH 320 Symbolic Logic

Same As: PHIL 324
Units: 3
Hours: 54 hours LEC
Prerequisite: MATH 120, 125, 129, or 133 with a grade of "C" or better, or placement through the assessment process.
Transferable: CSU; UC

General Education: AA/AS Area II(b)
C-ID: C-ID PHIL 210

This course is an introduction to symbolic logic. It includes a study of the logic of sentences (propositional logic) and the logic of classes and relations (predicate logic), together with an introduction to the nature of deductive systems. This course is not open to students who have completed PHIL 324.

MATH 325 Problem-Solving

Units: 3
Hours: 54 hours LEC
Prerequisite: MATH 120, 125, 129, or 133 with a grade of "C" or better, or placement through the assessment process.
Transferable: CSU

General Education: AA/AS Area II(b); CSU Area B4

This course focuses on the development of specific strategies and skills necessary to solve real-world and advanced mathematics problems. It emphasizes the development of logical, organizational, and divergent thinking, as well as written and oral communication skills, individual and group work, and clear presentation of mathematical work. Topics include drawing a diagram, eliminating possibilities, making a systematic list, looking for a pattern, guessing and checking, solving an easier related problem, working backwards, using algebraic representation, and applying the method of finite differences.

MATH 333 Introduction to College Algebra

Units: 3
Hours: 54 hours LEC
Prerequisite: Through the Los Rios Placement Process or High School Algebra 2 or Integrated Math 3 or Intermediate Algebra.
Transferable: CSU; UC

General Education: AA/AS Area II(b); CSU Area B4; Cal-GETC Area 2 (effective Fall 2025); IGETC Area 2

This course is a transfer-level algebra course for majors in the Liberal Arts. This course also offers instruction in algebra that is necessary for pre-calculus-level Business, Science, Technology, Engineering and Math (BSTEM) coursework. Topics include absolute value, polynomial, rational, radical, exponential, and logarithmic functions; solving equations involving these functions; graphing these functions using transformations; solving linear and nonlinear inequalities; systems of equations; complex numbers; and inverse functions.

MATH 340 Calculus for Business and Economics

Units: 3
Hours: 54 hours LEC
Prerequisite: MATH 120, 129, or 133 with a grade of "C" or better, or placement through the assessment process.
Transferable: CSU; UC (UC credit limitation: MATH 340, 350 & 400 combined: maximum credit, one course)

General Education: AA/AS Area II(b); CSU Area B4; Cal-GETC Area 2 (effective Fall 2025); IGETC Area 2
C-ID: C-ID MATH 140

This course introduces how differential calculus and integral calculus are used in the fields of business, economics, social science, and biological science. Topics include finding limits, applying various rules to find derivatives of polynomial, rational, exponential, and logarithmic functions, as well as using derivatives to analyze marginal cost, revenue, and profit. It is not recommended for mathematics and physical science majors.

MATH 342 Modern Business Mathematics

Units: 3
Hours: 54 hours LEC
Prerequisite: MATH 120, 129, or 133 with a grade of "C" or better, or placement through the assessment process.
Transferable: CSU; UC

General Education: AA/AS Area II(b); CSU Area B4; Cal-GETC Area 2 (effective Fall 2025); IGETC Area 2

This course is designed around applications of mathematics in economic and business contexts. Specific topics include functions and related business formulas, tables and graphs, finance (interest and exponential models in economics), rates of change, applications and optimization, and linear programming.
MATH 355 Calculus for Biology and Medicine I

Units: 4
Hours: 72 hours LEC
Prerequisite: MATH 373 with a grade of "C" or better, or placement through the assessment process.
Advisory: MATH 370 or 375
Transferable: CSU; UC
General Education: AA/AS Area II(b); CSU Area B4; Cal-GETC Area 2 (effective Fall 2025); IGETC Area 2

This course is an introduction to differential calculus and elementary differential equations via applications in biology and medicine. It covers limits, derivatives of polynomials, trigonometric and exponential functions, graphing, and applications of the derivative to biology and medicine. Topics include the fundamental Theorem of Calculus and techniques of integration, including integral tables and numerical methods.

MATH 356 Calculus for Biology and Medicine II

Units: 4
Hours: 72 hours LEC
Prerequisite: MATH 355 with a grade of "C" or better
Transferable: CSU; UC
General Education: AA/AS Area II(b); CSU Area B4; Cal-GETC Area 2 (effective Fall 2025); IGETC Area 2

This course covers matrix algebra with eigenvalues and eigenvectors, systems of linear equations, functions of several variables, partial derivatives, systems of differential equations, and applications to biology and medicine.

MATH 370 Pre-Calculus Mathematics

Units: 5
Hours: 90 hours LEC
Prerequisite: MATH 373 with a grade of "C" or better, or placement through the assessment process.
Transferable: CSU; UC
General Education: AA/AS Area II(b); CSU Area B4; Cal-GETC Area 2 (effective Fall 2025); IGETC Area 2
C-ID: C-ID MATH 155

This course provides foundational mathematics and problems that require critical thinking in preparation for the calculus sequence for science, technology, engineering, and mathematics (STEM) majors. Topics include rigorous treatment of polynomial, rational, logarithmic, exponential, and trigonometric functions, including graphing and applications, as well as systems of linear and non-linear equations and inequalities. This course also covers analytic geometry, conic sections, vectors, parametric equations, and polar equations.

MATH 372 College Algebra for Calculus

Units: 4
Hours: 72 hours LEC
Prerequisite: MATH 120, 129, or 133 with a grade of "C" or better, or placement through the assessment process.
Transferable: CSU; UC
General Education: AA/AS Area II(b); CSU Area B4; Cal-GETC Area 2 (effective Fall 2025); IGETC Area 2

This course provides a rigorous treatment of college-level algebra and its applications, with a particular focus on preparing students for the calculus sequence for Science, Technology, Engineering, and Mathematics (STEM) majors. Topics include polynomial, rational, exponential, absolute value, logarithmic functions, graphs, and equations; systems of equations; the theory of polynomial equations; analytic geometry including conics; and an introduction to sequences and series. Emphasis is given to analytical reasoning and problem-solving. This course may be taken concurrently with MATH 373, Trigonometry for Calculus. Completion of both MATH 372 AND MATH 373 with grades of "C" or better meets the prerequisite for MATH 400, Calculus I.

MATH 373 Trigonometry for Calculus

Units: 4
Hours: 72 hours LEC
Prerequisite: MATH 120, 129, or 133 with a grade of "C" or better, or placement through the assessment process.
Advisory: MATH 110; or completion of high school geometry
Transferable: CSU; UC
General Education: AA/AS Area II(b); CSU Area B4

This course provides a rigorous treatment of trigonometric functions and its applications, with a particular focus on preparing students for the calculus sequence for science, technology, engineering, and mathematics (STEM) majors. It emphasizes the study of trigonometric functions from numerical, graphical, and algebraic descriptions. Topics include functions and their graphs, transformations of functions, geometric properties of circles and triangles, degree and radian measurements of angles, right triangle trigonometry, reference angle trigonometry, unit circle trigonometry, graphs and transformations of trigonometric functions, verifying and applying trigonometric identities, inverse trigonometric functions, solving trigonometric equations, solving triangles using the Law of Sines and the Law of Cosines, vectors, the polar coordinate system, and roots and powers of complex numbers including De Moivre's Theorem. This course may be taken concurrently with MATH 372, College Algebra for Calculus. Completion of both MATH 372 AND MATH 373 with grades of "C" or better meets the prerequisite for MATH 400, Calculus I.

MATH 375 Pre-Calculus

Units: 6
Hours: 108 hours LEC
Prerequisite: MATH 120, 129, or 133 with a grade of "C" or better, or placement through the assessment process.
Advisory: MATH 110; or completion of high school geometry
Transferable: CSU; UC
General Education: AA/AS Area II(b); CSU Area B4; Cal-GETC Area 2 (effective Fall 2025); IGETC Area 2

This course provides a rigorous treatment of the foundational mathematical concepts and skills that will prepare students for the calculus sequence for science, technology, engineering, and mathematics (STEM) majors. Topics include polynomial, absolute value, rational, radical, exponential, and logarithmic functions, with graphing and applications; trigonometric functions and their inverses, including graphs, proving identities, trigonometric equations, and solving triangles; systems of equations and inequalities; analytic geometry and conics; vectors and polar coordinates; and an introduction to sequences and series. It emphasizes analytical reasoning and problem-solving.

MATH 400 Calculus I

Units: 5
Hours: 90 hours LEC
Prerequisite: MATH 370 (Pre-Calculus Mathematics), OR MATH 375 (Pre-Calculus Mathematics), OR MATH 372 (College Algebra for Calculus) AND MATH 373 (Trigonometry for Calculus) with grades of "C" or better, or placement through the assessment process.
Transferable: CSU; UC (UC credit limit: MATH 340, 350 & 400 combined: maximum credit, one course)
General Education: AA/AS Area II(b); CSU Area B4; Cal-GETC Area 2 (effective Fall 2025); IGETC Area 2
C-ID: C-ID MATH 210; Part of C-ID MATH 900S

This course is an introduction to differential and integral calculus. It covers limits, continuity, differentiation and integration of algebraic, trigonometric, logarithmic, exponential, and other transcendental functions. Some applications are also covered.

MATH 401 Calculus II

Units: 5
Hours: 90 hours LEC
Prerequisite: MATH 400 with a grade of "C" or better
Transferable: CSU; UC (UC credit limitation: MATH 351 & 401 combined: maximum credit, one course)

General Education: CSU Area B4; Cal-GETC Area 2 (effective Fall 2025); IGETC Area 2
C-ID: C-ID MATH 220; Part of C-ID MATH 900S

This course is a continuation of MATH 400. It builds on the methods of integration learned in MATH 400, and also covers improper integrals, sequences, infinite series, power series, polar coordinates, and parametric and polar equations. Many calculus applications are also included.

**MATH 402 Calculus III**

Units: 5  
Hours: 90 hours LEC  
Prerequisite: MATH 401 with a grade of "C" or better  
Transferable: CSU; UC  
General Education: CSU Area B4; Cal-GETC Area 2 (effective Fall 2025); IGETC Area 2  
C-ID: C-ID MATH 230

This course is a continuation of MATH 401. It extends the concepts of limits, derivatives, and integrals to vector-valued functions and multivariate functions. The topics include multivariate functions, partial derivatives, extrema of multivariate functions, iterated integrals, development of vector calculus, line integrals, three-dimensional analytic geometry, and Green's, Gauss' (Divergence), and Stokes' Theorems. Many applications of calculus are also covered.

**MATH 410 Introduction to Linear Algebra**

Units: 3  
Hours: 54 hours LEC  
Prerequisite: MATH 401 with a grade of "C" or better  
Advisory: MATH 402  
Transferable: CSU; UC  
General Education: CSU Area B4; Cal-GETC Area 2 (effective Fall 2025); IGETC Area 2  
C-ID: C-ID MATH 250; Part of C-ID MATH 910S

This course provides an introduction to linear algebra including matrices, determinants, vector spaces, inner product spaces, linear transformations, and eigenvectors. It is intended for majors in mathematics, engineering, economics, science, and related fields. This course emphasizes cogent reasoning, mathematical proof, and problem solving.

**MATH 420 Differential Equations**

Units: 4  
Hours: 72 hours LEC  
Prerequisite: MATH 401 with a grade of "C" or better  
Advisory: MATH 402  
Transferable: CSU; UC  
General Education: CSU Area B4; Cal-GETC Area 2 (effective Fall 2025); IGETC Area 2  
C-ID: C-ID MATH 240; Part of C-ID MATH 910S

This course is a study of ordinary differential equations, including linear equations, systems of equations, equations with variable coefficients, existence and uniqueness of solutions, series solutions, singular points, transform methods, boundary value problems, and applications.

**MATH 480 Honors Seminar in Mathematics**

Units: 1  
Hours: 18 hours LEC  
Prerequisite: MATH 370 with a grade of "C" or better  
Transferable: CSU

Honors Seminar in Mathematics is a one-unit intensive course. The course is taught in a seminar format where work is done independently in pursuit of solutions to challenging problems in mathematics in consultation with the instructor. Seminar participants will explore strategies and techniques for solving problems and present their solutions to the class.

**MATH 495 Independent Studies in Mathematics**

Units: 1 - 3  
Hours: 54 - 162 hours LAB  
Prerequisite: None.  
Transferable: CSU

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

**MATH 499 Experimental Offering in Mathematics**

Units: 0.5 - 4  
Prerequisite: None.  
Transferable: CSU

This is the experimental courses description.

**Mathematics Support (MATHS) Courses**

**MATHS 33 Support for Introduction to College Algebra**

Units: 2  
Hours: 36 hours LEC  
Prerequisite: None.  
Corequisite: MATH 333

This course provides intensive instruction and practice in the core mathematical skills, competencies, and concepts necessary for success in MATH 333 (Introduction to College Algebra). Students taking this course must be concurrently enrolled in the corresponding section of MATH 333. The content of this course is designed to provide arithmetic and algebraic support to students as they learn related concepts in their corequisite course. Topics and homework assignments are often connected to assignments in the corequisite course. This course is graded Pass/No Pass.

**MATHS 45 Support for Business Mathematics**

Units: 2  
Hours: 36 hours LEC  
Prerequisite: None.  
Corequisite: MATH 340 or 342

This course provides intensive instruction and practice in the core mathematical skills, competencies, and concepts necessary for success in Calculus for Business and Economics (MATH 340) and Modern Business Mathematics (MATH 342). Students taking this course must be concurrently enrolled in the corresponding section of MATH 340 or MATH 342. The content of this course is designed to provide arithmetic and algebraic support to students as they learn related concepts in their corequisite course. Topics and homework assignments are often connected to students' assignments in the corequisite course. This course is graded Pass/No Pass.
MATHS 72 Support for College Algebra for Calculus

Units: 2
Hours: 36 hours LEC
Prerequisite: None.
Corequisite: MATH 372

This course provides intensive instruction and practice in the core mathematical skills, competencies, and concepts necessary for success in MATH 372 (College Algebra for Calculus). Students taking this course must be concurrently enrolled in the corresponding section of MATH 372. The content of this course is designed to provide arithmetic and algebraic support to students as they learn related concepts in their corequisite course. Topics and homework assignments are often connected to assignments in the corequisite course. This course is graded Pass/No Pass.

MATHS 73 Support Course for Trigonometry for Calculus

Units: 2
Hours: 36 hours LEC
Prerequisite: None.
Corequisite: MATH 373

This course provides intensive instruction and practice in the core mathematical skills, competencies, and concepts necessary for success in Trigonometry for Calculus (MATH 373). Students taking this course must be concurrently enrolled in the corresponding section MATH 373. The course content is designed to provide arithmetic, algebra, geometry and learning skills support to students as they learn related concepts in their corequisite course. Topics and homework assignments are often connected to assignments in the corequisite course. This course is graded Pass/No Pass.

MATHS 75 Support for Pre-Calculus

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Corequisite: MATH 375

This course provides intensive instruction and practice in the core mathematical skills, competencies, and concepts necessary for success in MATH 375 (Pre-Calculus). Students taking this course must be concurrently enrolled in the corresponding section of MATH 375. The content of this course is designed to provide arithmetic, algebra, geometry, and learning skills support to students as they learn related concepts in their corequisite course. Topics and homework assignments are often connected to assignments in the corequisite course. This course is graded Pass/No Pass.

MATHS 95 Support for Introduction to Mathematical Ideas

Units: 2
Hours: 36 hours LEC
Prerequisite: None.
Corequisite: MATH 300

This course provides intensive instruction and practice in the core mathematical skills, competencies, and concepts necessary for success in MATH 300 (Introduction to Mathematical Ideas). Students taking this course must be concurrently enrolled in the corresponding section of MATH 300. The content of this course is designed to provide arithmetic and algebraic support to students as they learn related concepts in their corequisite course. Topics and homework assignments are often connected to assignments in the corequisite course. This course is graded Pass/No Pass.

MATHS 299 Experimental Offering in Mathematics Support

Units: 0.5 - 4
Prerequisite: None.

This is the experimental courses description.

MATHS 499 Experimental Offering in Mathematics Support

Units: 0.5 - 4
Prerequisite: None.

This is the experimental courses description.

Statistics (STAT) Courses

STAT 10 Support for Introduction to Probability and Statistics

Units: 2
Hours: 36 hours LEC
Prerequisite: None.
Corequisite: STAT 300

This course provides intensive instruction and practice in the core mathematical skills, competencies, and concepts necessary for success in STAT 300 (Introduction to Probability and Statistics). Students taking this course must be concurrently enrolled in the corresponding section of STAT 300. The content of this course is designed to help students develop effective learning strategies, and to provide arithmetic, algebraic, and geometric support as they learn concepts in the statistics course. Topics and homework assignments are often connected to assignments in the statistics course. Support using the required statistical technology package is also included. This course is graded Pass/No Pass.

STAT 105 Statway, Part I

Units: 6
Hours: 108 hours LEC
Prerequisite: MATH 32 or 42 with a grade of "C" or better, or placement through the assessment process.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340.
Transferable: CSU

This is the first semester of a two-semester course that introduces the concepts of probability and statistics with requisite arithmetic and algebraic topics integrated throughout. It is structured to serve students planning to transfer and continue studies in humanities or social sciences. Statistics topics emphasize data analysis and include methods for collecting data, graphical and numerical descriptive statistics, correlation, linear regression, simple exponential regression, and introduction to probability. Algebra topics include proportional relationships (including variation) with applications, expressions, linear equations and systems with applications, functions, quadratic and exponential equations, and linear and exponential models. Learning strategies for success with an emphasis on study skills, resource acquisition, and maintaining a positive perspective towards learning are also discussed and applied.

STAT 300 Introduction to Probability and Statistics

Units: 4
Hours: 72 hours LEC
Prerequisite: MATH 120, 125, 129, or 133 with a grade of "C" or better, or placement through the assessment process.
Transferable: CSU; UC (UC credit limitation: STAT 300, 305, and PSYC 330 combined: maximum credit, one course)
**General Education:** AA/AS Area II(b); CSU Area B4; Cal-GETC Area 2 (effective Fall 2025); IGETC Area 2  
**C-ID:** C-ID MATH 110

This course is an introduction to probability and statistics. Topics include elementary principles and applications of descriptive statistics, counting principles, elementary probability principles, probability distributions, estimation of parameters, hypothesis testing, linear regression and correlation, and Analysis of Variance (ANOVA). Applications use data from various disciplines including business, social sciences, psychology, life and health sciences, and education. Statistical analysis using a computer statistics package or graphing calculator is required.

**STAT 305 Statway, Part II**

**Units:** 6  
**Hours:** 108 hours LEC  
**Prerequisite:** STAT 105 with a grade of "C" or better  
**Transferable:** CSU; UC (UC credit limitation: STAT 300, 305, and PSYC 330 combined: maximum credit, one course; Maximum credit limitation: 4 semester/6 quarter units. STAT 105 and 305 must both be completed w/ "C" or better.)  
**General Education:** AA/AS Area II(b); CSU Area B4; Cal-GETC Area 2 (effective Fall 2025); IGETC Area 2

This is the second semester of a two-semester course that introduces the concepts of probability and statistics with requisite arithmetic and algebraic topics integrated throughout. It is structured to serve students planning to transfer and continue studies in humanities or social sciences. Statistics topics emphasize data analysis and include basic concepts of probability; confidence intervals; hypothesis tests for means, proportions, and variance; chi-squared tests; and ANOVA (Analysis of Variance). Algebra topics include proportional relationships (including variation) with applications, expressions, linear equations and systems with applications, functions, quadratic and exponential equations, and linear and exponential/logarithmic models. Learning strategies for success with an emphasis on study skills, resource acquisition, and maintaining a positive perspective towards learning are also discussed and applied. Both parts of Statway must be completed with a grade of "C" or better to receive credit for transfer-level statistics.

**STAT 480 Introduction to Probability and Statistics - Honors**

**Units:** 4  
**Hours:** 72 hours LEC  
**Prerequisite:** MATH 120, 125, 129, or 133 with a grade of "C" or better, or placement through the assessment process.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area II(b); CSU Area B4; Cal-GETC Area 2 (effective Fall 2025); IGETC Area 2  
**C-ID:** C-ID MATH 110

This course is an introduction to probability and statistics designed for students in the honors program. Topics include elementary principles and applications of descriptive statistics, counting principles, elementary probability principles, probability distributions, estimation of parameters, hypothesis testing, linear regression and correlation, and Analysis of Variance (ANOVA). Applications use data from various disciplines including business, social sciences, psychology, life and health sciences, and education. Statistical analysis using a computer statistics package is required. This honors section uses an intensive instructional methodology designed to challenge motivated students, and includes a capstone project. This course is not open to students who have completed STAT 300.

**STAT 495 Independent Studies in Statistics**

**Units:** 1 - 3  
**Hours:** 54 - 162 hours LAB  
**Prerequisite:** None.  
**Transferable:** CSU

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

**STAT 499 Experimental Offering in Statistics**

**Units:** 0.5 - 4  
**Prerequisite:** None.  
**Transferable:** CSU

This is the experimental courses description.
Math and Statistics Course Sequence

Statistics and Liberal Arts Math (SLAM)

Statistics Pathway
Choose one of the following options:

- STAT 300: Introduction to Probability and Statistics (4 units)
- STAT 300: Introduction to Probability and Statistics (4 units) and STAT 10: Support for Introduction to Probability and Statistics (2 units) – must be taken concurrently
- STAT 480: Introduction to Probability and Statistics - Honors (4 units)

Liberal Arts Math Pathway
Choose one of the following options:

- MATH 300: Introduction to Mathematical Ideas (3 units)
- MATH 300: Introduction to Mathematical Ideas (3 units) and MATHS 95: Support for Introduction to Mathematical Ideas (2 units) – must be taken concurrently
- MATH 325: Problem-Solving (3 units)

BSTEM Prep - Business, Science, Technology, Engineering, and Math

BSTEM Prep Pathway
This option is for students who did not complete IM3 or Algebra 2 with a "C-" or better. Choose one of the following options:

- MATH 333: Introduction to College Algebra (3 units)
- MATH 333: Introduction to College Algebra (3 units) and MATHS 33: Support for Introduction to College Algebra (2 units) – must be taken concurrently

Education

Education Pathway
All education courses require IM3, Algebra 2, or MATH 333 prerequisites to be satisfied. Choose one of the following options:

- MATH 310: Mathematical Discovery (3 units)
- MATH 311: Mathematical Concepts for Elementary School Teachers - Number Systems (3 units)

BSTEM - Business, Science, Technology, Engineering, and Math

All BSTEM courses require IM3, Algebra 2, or MATH 333 prerequisites to be satisfied.

Business/Other Pathways
Choose one of the following options:

- MATH 320: Symbolic Logic (3 units)
- MATH 340: Calculus for Business and Economics (3 units)
- MATH 340: Calculus for Business and Economics (3 units) and MATHS 45: Support for Business Mathematics (2 units) – must be taken concurrently
Calculus Pathway

Option One
Choose one of the following:
- MATH 375: Pre-Calculus (6 units) or
- MATH 375: Pre-Calculus (6 units) and MATHS 75 Support for Pre-Calculus (3 units) – must be taken concurrently

Option Two
Choose one from each of the following, which may be taken in any order or together in a single semester:
- MATH 372: College Algebra for Calculus (4 units) or
- MATH 372: College Algebra for Calculus (4 units) and MATHS 72: Support for College Algebra for Calculus (2 units) – must be taken concurrently
and
- MATH 373: Trigonometry for Calculus (4 units) or
- MATH 373: Trigonometry for Calculus (4 units) and MATHS 73: Support Course for Trigonometry for Calculus (2 units) – must be taken concurrently

Sequence of Next Courses
1. MATH 400 Calculus I (5 units)
2. MATH 401 Calculus II (5 units)

Recommended Sequence of Final Three Courses
1. MATH 402 Calculus III (5 units)
2. MATH 410 Introduction to Linear Algebra (3 units)
3. MATH 420 Differential Equations (4 units)

Biology and Medicine Calculus Pathway
Choose one of the following options:
- MATH 373: Trigonometry for Calculus (4 units)
- MATH 373: Trigonometry for Calculus (4 units) and MATHS 73: Support Course for Trigonometry for Calculus (2 units) – must be taken concurrently

Sequence of Next Courses
1. MATH 355: Calculus for Biology and Medicine I (4 units)
2. MATH 356: Calculus for Biology and Medicine II (4 units)

Note: MATH 355 and 356 might not be accepted by all biology/medicine programs.
Music

The Music Degree program is designed to provide students with a rich foundation and core curriculum for the development of the professional musician through music theory, history, performance, and production. Associate of Arts degrees are offered in both traditional and jazz studies with an emphasis in either instrumental or vocal performance.

The Commercial Music program is designed to serve as a springboard for a career in the music business. The program offers Associate of Arts degrees and certificates in audio recording or music business. Students study with industry professionals and learn in ARC's state-of-the-art equipped recording studios and facilities.

Degrees and Certificates Offered

A.A.-T. in Music
A.A. in Commercial Music: Business
A.A. in Commercial Music: Recording
A.A. in Jazz Studies
A.A. in Music
Commercial Music: Business Certificate
Commercial Music: Recording Certificate
Digital Audio Production Certificate
Music Management and Promotion Certificate
Music Instructional Assistant Certificate
Studio Jazz/Pop Voice Instructor Certificate
Studio Music Instructor Certificate
Studio Voice Instructor Certificate

Dean Angela Milano
Department Chair Dyne Eifertsen
Joe Gilman
Phone (916) 484-8433

Associate Degrees for Transfer

A.A.-T. in Music

Completion of this degree provides a foundation in music. Program offerings include coursework in music theory and aural skills, applied composition, instrumental and vocal instruction, and ensemble performance.

The Associate in Arts in Music for Transfer provides students with a major that fulfills the general requirements of the California State University for transfer. Students with this degree will receive priority admission with junior status to the California State University system.

The Associate in Arts in Music for Transfer (A.A.-T.) may be obtained by the completion of 60 transferable, semester units with a minimum of a 2.0 GPA, including (a) the major or area of emphasis described in the Required Program outlined below (earning a C or better in these courses), and (b) the Intersegmental General Education Transfer Curriculum (IGETC).

---

1. MUIV 411 is repeatable four times for credit for a maximum of four units.

The Associate in Arts in Music for Transfer (AA-T) degree may be obtained by completion of 60 transferable, semester units with a minimum 2.0 GPA, including (a) the major or area of emphasis described in the Required Program, and (b) the Intersegmental General Education Transfer Curriculum (IGETC).

### Student Learning Outcomes

Upon completion of this program, the student will be able to:

- analyze musical scores and compositions.
- critique personal music performances and those of other musicians.
- analyze and perform the elements of music (rhythm, melody, harmony, and form).
- create derivative or original music at a level appropriate to the area of specialization.

### Career Information

Individuals with four-year degrees in music may be placed in the K-12 educational field as well as performers in professional music ensembles, directors for religious and community music groups, private music studio instructors, composers for media and publishing, music therapists, and administrative staff for music organizations. Advanced degrees in music may lead to careers as educators at the college or university level, performers, music directors, and music editors and journalists.

### Associate Degrees

#### A.A. in Commercial Music: Business

This degree explores the inner workings of the music industry in areas such as publishing, entertainment, distribution, and music law. Course work addresses industry-specific issues such as copyright, record contracts, publishing agreements, artist management, promotion, and marketing.

### Degree Requirements

| Course Code | Course Title | Units |
--- | --- | ---|
BUS 300 | Introduction to Business | 3  
BUS 340 | Business Law | 3  
BUS 350 | Small Business Management/Entrepreneurship | 3  
MUFHL 321 | Basic Musicianship | 3  
MUFHL 330 | World Music | 3  
MUSM 110 | The Business of Music | 3  
MUSM 111 | The Business of Music | 3  
MUSM 112 | The Business of Music/Artist Management | 3  
MUSM 113 | The Business of Music/Promotion | 3  
MUSM 120 | Contemporary Songwriting I | 3  

A minimum of 3 units from the following:

| Course Code | Course Title | Units |
--- | --- | ---|
BUS 210 | The Business Plan (1) |  
BUS 212 | Marketing for Small Businesses (1) |  
BUS 214 | Financing a Small Business (1) |  
BUS 216 | Essential Records for the Small Business (1) |  
BUS 218 | Management Skills for the Small Business (1) |  
BUS 220 | Retailing and Merchandising for the Small Business (1) |  
BUS 224 | Customer Service (1) |  
BUS 228 | Selling Techniques for the Small Business (1) |  

Total Units: 33

The Commercial Music: Business Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

### Student Learning Outcomes

Upon completion of this program, the student will be able to:

- create a music business and marketing plan.
- organize an artist tour, assemble a promotional packet, create a publicity campaign, and develop media, industry, and fan lists.
- evaluate and implement recordkeeping systems for financial, employment, and tax records.
- demonstrate a basic knowledge of music fundamentals, cross-cultural influences from diverse geographical regions, and song composition/arranging techniques.
- analyze case problems and apply legal principles to interpret regulations, laws, and statutes related to the music industry.
- compare the job descriptions and duties of attorneys, publishers, merchandisers, record company personnel, agents, managers, and producers.
- assess record contract points, publisher-writer exclusive agreements, attorney-client contracts, as well as management and touring agreements.

### Career Information

Typical career options include booking agent, personal manager, business manager, concert promotion, studio owner/manager, music legal services, publicity writer/public relations, tour management, music retail, music publishing and distribution, and music licensing. The degree also prepares students for transfer to a four-year institution.
A.A. in Commercial Music: Recording

This degree provides students the core skills needed to enter a career in audio engineering. Foundational classes in the theory and art of recording are coupled with significant laboratory experiences in order to prepare the student for further study at a four-year institution or for an entry-level career position.

The Commercial Music: Recording Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- analyze the signal flow and understand the operation of electrical components found in a typical recording studio.
- set up and employ the use of mixing consoles, multi-track recorders, Digital Audio Workstations (DAWs), and sound reinforcement systems.
- select and set up outboard signal processing hardware and software plug-ins for audio enhancement.
- explain music fundamentals, cross-cultural influences from diverse geographical regions, and song composition/arranging techniques.
- create Musical Instrument Digital Interface (MIDI) sequencing and notation projects utilizing music keyboard input devices and various software packages.
- design and equip a fully-functioning and acoustically-sound recording studio.
- formulate and implement effective musical and technical recording session techniques.

Career Information

Typical career paths include recording engineer, broadcast engineer, live sound reinforcement, post-production audio, sound effects editor, multimedia/internet audio, and audio/music education.

A.A. in Jazz Studies

This degree provides a rigorous curriculum of jazz theory, history, performance groups, improvisation, piano, and individual applied instruction.

1 MUIVI 411 may be taken four times for credit.

The Jazz Studies Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- analyze musical scores and compositions from the jazz idiom.
- critique personal music performances and those of other musicians.
- analyze and perform the basic elements of music (rhythm, melody, harmony, and form).
- create (compose and improvise) jazz music appropriate to the area of specialization.
- compare and contrast the characteristics of various historical periods of jazz.
- arrange compositions and assemble musicians for a performance.

Career Information

This degree prepares a student for careers in performance (concert and studio), education, arranging/composing, and the music industry. It also prepares students for transfer to a four-year institution.

A.A. in Music

The Music degree includes vocal and instrumental components, as well as courses in music, history, and theory. The general program is designed to provide students with a foundation in music theory and

Total Units: 37

Student Learning Outcomes
Upon completion of this program, the student will be able to:

• create, arrange, and notate music using standard Musical Instrument Digital Interface (MIDI) software
• produce audio recordings, music mixes, and audio post-production projects using a Digital Audio Workstation (DAW)
• evaluate various formats and platforms of digital audio recording hardware and software
• integrate outboard signal processing equipment and plug-ins into the audio signal path for audio enhancement
• formulate and implement effective recording session techniques
• analyze the fundamental process and sequence involved in the production of digital audio

Career Information
Typical career paths include post-production audio, broadcast engineer, sound effects editor, multimedia/internet audio, professional recording studio engineer, and owner/engineer of a smaller demo production studio.

Digital Audio Production Certificate
This certificate is intended to provide a practical foundation in audio production skills, provide suitable preparation to begin work in the recording and sound production industry, or to serve as a foundation for further study. It also enables people currently employed in the field of audio recording and other associated fields a means to upgrade and expand their skills.

Total Units: 12.5 - 14

Student Learning Outcomes
Upon completion of this program, the student will be able to:

• analyze the signal flow and understand the operation of electrical components found in a typical recording studio.
• set up and employ the use of mixing consoles, multi-track recorders, Digital Audio Workstations (DAWs), and sound reinforcement systems.
• select and set up outboard signal processing hardware and software plug-ins for audio enhancement.

Career Information
Typical career paths include recording engineer, broadcast engineer, live sound reinforcement, post-production audio, sound effects editor, multimedia/internet audio, and audio/music education.
Music Management and Promotion Certificate

This certificate offers an overview of the core skills essential to enter the music industry in careers such as artist and music facility management, concert promotion, marketing, and publishing. It also assists those who wish to pursue a career as an independent artist, set up their own record label, or manage their own career.

Total Units: 12

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- evaluate and critique recording, management, publishing, and other music industry contracts
- propose and employ networking skills and tools to develop contacts in the music industry
- compare and contrast traditional and alternative music distribution channels
- research merchandising considerations including design, pricing, manufacturing, and distribution
- create marketing and business plans
- describe emerging trends, models, and entrepreneurial opportunities in the music industry
- assess promotion tools such as radio, television, and new media, such as YouTube, social networking, and viral campaigns

Career Information

Typical career options include booking agent, personal manager, business manager, concert promotion, studio owner/manager, music legal services, publicity writer/public relations, tour management, music retail, music publishing and distribution, and music licensing.

Certificates

Music Instructional Assistant Certificate

The certificate is an introductory program for students planning careers in music education for grades K-12.

Enrollment Eligibility

To be eligible for enrollment in the program, the student must meet the following criteria:

- three years of experience in any band or choir

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- interpret a music score and play a melody with accompanying block chords (I, IV, V7)
- evaluate the playing of others
- recommend and demonstrate good practice habits
- formulate practice routines specific to an instrument
- create basic lesson plans for beginning instrumental or choral ensembles
- evaluate and critique performance ensembles
• select appropriate teaching materials for beginning band or choral ensembles
• compose for various instrumental and vocal combinations
• apply effective leadership styles at work, with consideration to group dynamics, team and individual decision making, and workforce diversity

Career Information

This certificate prepares a student for careers in music education, grades K-12, in paraprofessional roles such as a docent, tutor, or instructional assistant.

Studio Jazz/Pop Voice Instructor Certificate

This certificate offers an overview of the skills essential to enter the studio jazz/pop voice teaching profession as either a member of a retail studio or as an independent voice instructor, coach, consultant, or tutor.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

• diagnose poor vocal habits.
• formulate a pedagogical plan to resolve poor vocal habits.
• evaluate a voice student's vocal skills.
• devise a pedagogical plan to develop or improve basic vocal skills.
• devise a pedagogical plan to develop or improve jazz/pop style.
• assess a vocalist's ability to maintain independence in a harmonic setting.
• devise and implement a pedagogical plan to develop or improve a vocalist's ability to maintain independence in a harmonic setting.
• demonstrate the basic skills necessary to sing with appropriate breath support and jazz/pop tone quality.
• demonstrate the basic skills necessary to expand the vocal range and flexibility.

Career Information

Typical career options include employment as owner or employee of a private voice studio and vocal consultant to local recording studios, bands, and music troupes.

Studio Music Instructor Certificate

This certificate focuses on studio music teaching and prepares students for employment as an owner or employee of a private or public music studio. It includes tutoring and coaching students/clients in basic instrumental/vocal technique with an emphasis on performance pedagogy.

AMERICAN RIVER COLLEGE

2023-2024 Catalog
Enrollment Eligibility
To be eligible for enrollment in the program, the student must meet the following criteria:
- three years of experience in either band or choir.

Student Learning Outcomes
Upon completion of this program, the student will be able to:
- apply effective leadership styles at work, with consideration to group dynamics, team and individual decision making, and workforce diversity
- design and implement an effective practice routine
- interpret a music score and play a melody with accompanying block chords (I, IV, V7)
- compare and contrast music from different musical eras written for instrument/voice
- analyze music performance skills
- demonstrate the skills needed to play simultaneously with other pianists/musicians
- demonstrate individual musical skills commensurate with the Level I & II National Association of Schools of Music (NASM) guidelines
- analyze basic music form and structure
- construct scales, chords, harmonic progressions and rhythms

Career Information
The Studio Voice Instructor will find employment as owner or employee of a private voice studio. This position will include coaching students/clients in basic vocal technique with an emphasis on traditional vocal pedagogy.

Music - Fundamentals, History, and Literature (MUFHL) Courses

MUFHL 299 Experimental Offering in Music Fundamentals/History and Literature
Units: 0.5 - 4
Prerequisite: None.
This is the experimental courses description.

MUFHL 300 Introduction to Music
Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340.
Transferable: CSU; UC
General Education: AA/AS Area I; CSU Area C1; Cal-GETC Area 3A (effective Fall 2025); IGETC Area 3A
C-ID: C-ID MUS 100
This course is an introductory examination of how composers and songwriters apply the various elements of music to heighten the expressive impact of a composition. Aspects of melody, rhythm, harmony, tone, and structure are studied through focused listening of works from the Renaissance to contemporary styles of avant-garde and popular music. This course requires no previous musical study.

MUFHL 308 Introduction to Music: Rock & Roll
Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340.
Transferable: CSU; UC
General Education: AA/AS Area I; CSU Area C1; Cal-GETC Area 3A (effective Fall 2025); IGETC Area 3A
This course examines social, political, cultural, and economic issues as they relate to the history of Rock & Roll music. It includes guided listening and video presentations to show the evolution of Rock from its roots to current stylistic trends. This course requires no previous musical study.
MUFHL 310 Survey of Music History and Literature (Greek Antiquity to 1750)

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: MUFHL 321 and 400; AND eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.
Transferable: CSU; UC
General Education: AA/AS Area I; CSU Area C1; Cal-GETC Area 3A (effective Fall 2025); IGETC Area 3A
C-ID: C-ID MUS 105

This is the first of a two-course series that offers a survey of the history of music, including the most significant composers and works from antiquity to 1750. It provides background on medieval, renaissance, and baroque music, thus increasing understanding of modern styles derived from these early periods of music.

MUFHL 311 Survey of Music History and Literature (1750 to the present)

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: MUFHL 321 and 400; Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.
Transferable: CSU; UC
General Education: AA/AS Area I; CSU Area C1; Cal-GETC Area 3A (effective Fall 2025); IGETC Area 3A
C-ID: C-ID MUS 106

This is the second of a two-course series that offers a survey of the history of music including the most significant composers and works from the Classical period to the present. It provides background on Classical, Romantic, Impressionistic, and 20th-century music, thus increasing understanding of modern styles derived from these periods of music.

MUFHL 315 Jazz History

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340.
Transferable: CSU; UC
General Education: AA/AS Area I; AA/AS Area VI; CSU Area C1; Cal-GETC Area 3A (effective Fall 2025); IGETC Area 3A
C-ID: C-ID MUS 107

This course introduces the history of jazz. Topics include ethnicity, ethnocentrism, racism, ageism, class differences, and gender issues. Guided listening presentations show how African and early African American musical traditions have led to the development of various improvisational forms and styles including ragtime, swing, bebop, free jazz, fusion, and acid jazz.

MUFHL 321 Basic Musicianship

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.
Transferable: CSU; UC
General Education: AA/AS Area I; CSU Area C1; Cal-GETC Area 3A (effective Fall 2025); IGETC Area 3A
C-ID: C-ID MUS 110

This course introduces the elements of music including scales, chords, aural skills, harmonic progression, form, notation, and composition. No previous musical study is required.

MUFHL 330 World Music

Units: 3

This course introduces the history of jazz. Topics include ethnicity, ethnocentrism, racism, ageism, class differences, and gender issues. Guided listening presentations show how African and early African American musical traditions have led to the development of various improvisational forms and styles including ragtime, swing, bebop, free jazz, fusion, and acid jazz.

MUFHL 400 Music Theory and Musicianship I

Units: 4
Hours: 54 hours LEC; 54 hours LAB
Prerequisite: None.
Advisory: MUFHL 321 or MUIVI 340 with a grade of "C" or better; Knowledge of musical notation
Transferable: CSU; UC
General Education: AA/AS Area I; CSU Area C1; Cal-GETC Area 3A (effective Fall 2025); IGETC Area 3A
C-ID: C-ID MUS 125; C-ID MUS 120

This course is a study of scales, intervals, triads, diatonic harmonies, part writing, rhythms, sight-singing, ear training, dictation, history, and performance. It includes short creative assignments to provide experience in the application of materials learned in class. It includes analysis and composition and is required for music majors.

MUFHL 401 Music Theory and Musicianship II

Units: 4
Hours: 54 hours LEC; 54 hours LAB
Prerequisite: MUFHL 400 with a grade of "C" or better
Advisory: MUIVI 341
Transferable: CSU; UC
General Education: AA/AS Area I; CSU Area C1; Cal-GETC Area 3A (effective Fall 2025); IGETC Area 3A
C-ID: C-ID MUS 130; C-ID MUS 135

This course is a continuation of MUFHL 400. It provides a more in-depth study of scales, triads, diatonic harmonies, part writing, rhythms, sight singing, ear training, dictation, form, history, and performance. It also includes the study of harmonic progression, dominant and non-dominant seventh chords, modulation, secondary function chords, and binary and ternary form. It includes analysis and composition and is required for music majors.

MUFHL 410 Music Theory and Musicianship III

Units: 4
Hours: 54 hours LEC; 54 hours LAB
Prerequisite: MUFHL 401 with a grade of "C" or better
Advisory: MUIVI 350
Transferable: CSU; UC
General Education: CSU Area C1; Cal-GETC Area 3A (effective Fall 2025); IGETC Area 3A
C-ID: C-ID MUS 140; C-ID MUS 145

This course is a continuation of MUFHL 401. It includes the study of 16th- and 18th-century counterpoint, fugue, variation, altered chords, sonata-allegro, and rondo forms, and late 19th-century writing techniques; practice in rhythmic, melodic, harmonic, and contrapuntal sight singing; ear training, and dictation. This course is required for music majors.
MUFHL 411 Music Theory and Musicianship IV

Units: 4
Hours: 54 hours LEC; 54 hours LAB
Prerequisite: MUFHL 410 with a grade of "C" or better
Advisory: MUIVI 351
Transferable: CSU; UC

This course is a continuation of MUFHL 410. It includes a more in-depth study of altered chords and late 19th- and 20th-century writing techniques including: 9th, 11th, and 13th chords; altered dominants; chromatic harmony; dodecaphony; set theory; aleatory; minimalism; and analysis techniques. It includes practice in rhythmic, melodic, harmonic, and contrapuntal sight-singing, ear-training, and dictation. This course is required for music majors.

MUFHL 420 Beginning Jazz Theory

Units: 2
Hours: 36 hours LEC; 18 hours LAB
Prerequisite: MUFHL 400 with a grade of "C" or better
Advisory: MUIVI 385 and 400
Transferable: CSU; UC

This course introduces the elements of jazz theory including harmonic, melodic, and formal elements of the jazz idiom. It includes analysis and composition and is required for jazz majors.

MUFHL 421 Advanced Jazz Theory

Units: 2
Hours: 36 hours LEC; 22 hours LAB
Prerequisite: MUFHL 420 with a grade of "C" or better
Advisory: MUIVI 386 and 400
Transferable: CSU; UC

This course presents a continuation of jazz concepts presented in MUFHL 420. It emphasizes advanced elements of jazz theory including composition and arranging, as well as harmonic, melodic, and formal analysis in the jazz idiom.

MUFHL 495 Independent Studies in Music Fundamentals/History and Literature

Units: 1 - 3
Hours: 54 - 162 hours LAB
Prerequisite: None.
Transferable: CSU

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

MUFHL 499 Experimental Offering in Music Fundamentals/History and Literature

Units: 0.5 - 4
Hours: 9 - 54 hours LEC
Prerequisite: None.
Transferable: CSU

This course is designed to give students an opportunity to study topics in music which are not included in current course offering. May be taken four times for credit for a maximum of eight units on different topics.

Music - Instrumental/Voice Instruction (MUIVI) Courses

MUIVI 200 Introduction to Music Education

Units: 0.5
Hours: 9 hours LEC
Prerequisite: MUFHL 321 (Basic Musicianship) with a grade of "C" or better, or equivalent, AND three years of experience in either band or choir.

This course is a survey of the resources used in the music education profession as a band or choir teacher. It introduces the basic skills necessary to teach beginning band or choir. Topics include creating lesson plans, classroom management, and basic conducting patterns.

MUIVI 298 Work Experience in Instrumental/Voice Instruction

Units: 0.5 - 4
Hours: 30 - 300 hours LAB
Prerequisite: None.
Enrollment Limitation: Students must be in a paid or unpaid internship, volunteer position, or job related to the instrumental/voice instruction field with a cooperating site supervisor. Students are advised to consult with the Music Department faculty to review specific certificate and degree work experience requirements.

This course provides students with opportunities to develop marketable skills in preparation for employment or advancement within the field of instrumental/voice instruction. It is designed for students interested in work experience and/or internships in associate degree level or certificate occupational programs. Course content includes understanding the application of education to the workforce, completion of Title 5 required forms which document the student’s progress and hours spent at the work site, and developing workplace skills and competencies.

During the semester, the student is required to complete 37.5 hours of related paid work experience, or 30 hours of related unpaid work experience for 0.5 unit. An additional 37.5 or 30 hours of related work experience is required for each additional 0.5 units. All students are required to attend the first class meeting, a mid-semester meeting, and a final meeting. Additionally, students who have not already successfully completed a Work Experience course will be required to attend weekly orientations while returning participants may meet individually with the instructor as needed. Students may take up to 16 units total across all Work Experience course offerings. This course may be taken up to four times when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

MUIVI 310 Voice Class I

Units: 2
Hours: 36 hours LEC; 18 hours LAB
Course Family: Traditional Voice Fundamentals
Prerequisite: None.
Advisory: MUFHL 321
Transferable: CSU; UC

This course is the study of solo singing. Topics include basic vocal technique, breathing, mouth position, and solo repertoire.

MUIVI 311 Voice Class II

Units: 2
Hours: 36 hours LEC; 18 hours LAB  
Course Family: Traditional Voice Fundamentals  
Prerequisite: MUIVI 310 with a grade of "C" or better  
Advisory: MUFHL 321  
Transferable: CSU; UC

This course is the continued study of solo singing. Topics include vocal technique, breathing, mouth positions and vowel formation, the International Phonetic Alphabet, and solo repertoire.

**MUIVI 320 Voice Class III**

Units: 2  
Hours: 36 hours LEC; 18 hours LAB  
Course Family: Traditional Voice Technique and Repertoire  
Prerequisite: MUIVI 311 with a grade of "C" or better  
Advisory: MUFHL 321  
Transferable: CSU; UC

This course is the continued study of solo singing. Topics include tone placement, register balance, vocal health, and solo repertoire.

**MUIVI 321 Voice Class IV**

Units: 2  
Hours: 36 hours LEC; 18 hours LAB  
Course Family: Traditional Voice Technique and Repertoire  
Prerequisite: MUIVI 320 with a grade of "C" or better  
Advisory: MUFHL 321  
Transferable: CSU; UC

This course is the continued study of solo singing. Topics include bel canto technique, Italian and German solo repertoire, tone placement, register balance, and vocal health.

**MUIVI 340 Beginning Piano**

Units: 2  
Hours: 36 hours LEC; 18 hours LAB  
Course Family: Traditional Piano Fundamentals  
Prerequisite: None.  
Transferable: CSU; UC  
C-ID: C-ID MUS 170

This course introduces piano/keyboard skills. It presents beginning concepts of music theory, music notation, and harmonizing simple melodies. This course is open to all students and is recommended for music majors who do not demonstrate equivalent piano proficiency.

**MUIVI 341 Piano II**

Units: 2  
Hours: 36 hours LEC; 18 hours LAB  
Course Family: Traditional Piano Fundamentals  
Prerequisite: MUIVI 340 with a grade of "C" or better  
Transferable: CSU; UC  
C-ID: C-ID MUS 171

This course is a continuation of MUIVI 340 and is designed for students interested in piano as a medium of expression and enjoyment, as well as for prospective preschool, kindergarten, and elementary-school teachers. It covers major and minor scales and chords, bass styles, chromatic scales, and literature with greater rhythmic and harmonic complexity. It is the second semester of a four-semester sequence for music majors who need to demonstrate piano proficiency.

**MUIVI 350 Piano III**

Units: 2  
Hours: 36 hours LEC; 18 hours LAB  
Course Family: Traditional Piano Technique and Repertoire  
Prerequisite: MUIVI 341 with a grade of "C" or better; or the ability to play major scales (one octave, hands together C, G, F, D, A, and E major) and the ability to play a simple melody with basic chordal accompaniment in a major or minor key.  
Transferable: CSU; UC  
C-ID: C-ID MUS 172

This course expands on the foundations of piano playing studied in MUIVI 341 and includes further study of the harmonization of melodies, major and minor scales, and repertoire.

**MUIVI 351 Piano IV**

Units: 2  
Hours: 36 hours LEC; 18 hours LAB  
Course Family: Traditional Piano Technique and Repertoire  
Prerequisite: MUIVI 350 with a grade of "C" or better; OR the ability to play all major scales, hands together, two octaves, and harmonic minor scales in A, E, B, F, D, and G, hands together, two octaves.  
Transferable: CSU; UC

This course is the fourth semester of piano study. It is a continuation of MUIVI 350 and includes the further development of insight into music as an artistic means of communication through the study of scales, chords, melodic harmonization, and repertoire. This course also serves to develop the fundamental skills for the non-keyboard music major.

**MUIVI 370 Beginning Guitar**

Units: 2  
Hours: 36 hours LEC; 18 hours LAB  
Course Family: Traditional Guitar and Bass  
Prerequisite: None.  
Transferable: CSU; UC

This course provides guitar instruction emphasizing the fundamentals of music reading, basic technique and skills in note reading, improvisation, accompanying, and development of personal style.

**MUIVI 371 Intermediate Guitar**

Units: 2  
Hours: 36 hours LEC; 18 hours LAB  
Course Family: Traditional Guitar and Bass  
Prerequisite: MUIVI 370 with a grade of "C" or better  
Transferable: CSU; UC

This course is a continuation of MUIVI 370. It emphasizes increased skills in note reading, improvisation, accompanying, and development of personal style.

**MUIVI 385 Jazz Styles and Improvisation I**

Units: 2  
Hours: 36 hours LEC; 18 hours LAB  
Course Family: Jazz Instrumental  
Prerequisite: None.  
Enrollment Limitation: Ability to play a melodic instrument or ability to sight sing; ability to read music in the treble or bass clef.  
Advisory: MUFHL 400  
Transferable: CSU; UC

This course is the study of instrumental and vocal applications of jazz improvisation. It includes analysis and composition and is required for jazz studies majors.

**MUIVI 386 Jazz Styles and Improvisation II**

Units: 2  
Hours: 36 hours LEC; 18 hours LAB  
Course Family: Jazz Instrumental  
Prerequisite: MUIVI 385 with a grade of "C" or better  
Advisory: MUFHL 420  
Transferable: CSU; UC

This course is the study of advanced instrumental and vocal applications of jazz improvisation. It includes analysis and is a continuation of the concepts covered in MUIVI 385.
**MUIVI 390 Jazz and Popular Vocal Styles and Improvisation I**

- **Units:** 2
- **Hours:** 36 hours LEC; 18 hours LAB
- **Course Family:** Jazz Voice
- **Prerequisite:** MUIVI 310 with a grade of “C” or better
- **Advisory:** MUFHL 321 and MUIVI 310
- **Transferable:** CSU; UC
- **C-ID:** C-ID MUS 160

This course is a study of popular and jazz solo singing styles and improvisation. Topics include jazz and pop styles, microphone technique, basic improvisation, and vocal technique.

**MUIVI 391 Jazz and Popular Vocal Styles and Improvisation II**

- **Units:** 2
- **Hours:** 36 hours LEC; 18 hours LAB
- **Course Family:** Jazz Voice
- **Prerequisite:** MUIVI 390 with a grade of “C” or better
- **Advisory:** MUIVI 311
- **Transferable:** CSU; UC
- **C-ID:** C-ID MUS 160

This course is the continued study of popular and jazz singing styles and improvisation. Topics include rhythm section rehearsal techniques for singers, funk styles, pentatonic scales, Lydian dominant improvisation, and transposition.

**MUIVI 400 Beginning Jazz Piano**

- **Units:** 2
- **Hours:** 36 hours LEC; 18 hours LAB
- **Course Family:** Jazz Piano
- **Prerequisite:** MUIVI 340 with a grade of “C” or better
- **Advisory:** MUFHL 400, MUFHL 420, or MUIVI 385
- **Transferable:** CSU; UC

This course is an introduction to the fundamentals of jazz piano. Topics include blues, left-hand voicings, two-hand voicings, and scale theory applications to the keyboard.

**MUIVI 401 Intermediate Jazz Piano**

- **Units:** 2
- **Hours:** 36 hours LEC; 18 hours LAB
- **Course Family:** Jazz Piano
- **Prerequisite:** MUIVI 400 with a grade of “C” or better
- **Advisory:** MUFHL 420
- **Transferable:** CSU; UC

This course covers intermediate studies in jazz piano. Topics include arranging jazz harmonies at the keyboard using techniques such as three- and four-note rootless voicings, five-note mixed-modal voicings, “Drop 2,” Red Garland voicings, and the “So What” chord.

**MUIVI 411 Applied Music Practicum**

- **Units:** 1
- **Hours:** 18 hours LEC
- **Enrollment Limitation:** Performance assessment
- **Advisory:** Enrolled in one of the following: MUIVI 340, MUFHL 321, 400, 401, 410, 411, 420, or 421; AND Enrolled in one of the following: MUP 310, 320, 323, 330, 340, 350, 360, or 400.
- **Transferable:** CSU; UC
- **C-ID:** C-ID MUS 160

This course is the study of appropriate techniques and repertoire for the voice and instruments appropriate for music majors. It focuses on individualized instrumental, composition, or vocal instruction. It also includes solo performances, recital participation, masterclasses, and a final juried performance.

**MUIVI 420 Applied Music**

- **Units:** 1
- **Hours:** 7 hours LEC; 33 hours LAB
- **Course Family:** Traditional Applied Music Fundamentals
- **Prerequisite:** None.
- **Corequisite:** MUFHL 400, AND one of the following: MUP 310, 320, 330, 340, 350, 360, or 400.
- **Enrollment Limitation:** Audition
- **Transferable:** CSU; UC
- **C-ID:** C-ID MUS 160

This is the first course in a four-part series which focuses on the development of individual performance skills and solo and ensemble repertoire. It includes one-on-one instrumental, composition, or vocal instruction for a total of seven hours per semester. It also includes six hours per semester of solo performance, recital participation, masterclasses, and a final juried performance. It also includes one-and-one-half hours documented practice time per week. This course is required for all traditional performance and jazz music majors. Students must be concurrently enrolled in a large performance ensemble appropriate for their concentration. Students should also be enrolled in or have completed MUFHL 400.

**MUIVI 421 Applied Music II**

- **Units:** 1
- **Hours:** 7 hours LEC; 33 hours LAB
- **Course Family:** Traditional Applied Music Fundamentals
- **Prerequisite:** MUIVI 420 with a grade of “C” or better
- **Corequisite:** MUFHL 401, AND one of the following: MUP 310, 320, 330, 340, 350, 360, or 400.
- **Enrollment Limitation:** Audition
- **Transferable:** CSU; UC
- **C-ID:** C-ID MUS 160

This is the second course in a four-part series which focuses on the development of individual performance skills and solo and ensemble repertoire. It includes one-on-one or small-group instrumental, composition, or vocal instruction for a total of seven hours per semester. It also includes six hours per semester of solo performance, recital participation, masterclasses, and a final juried performance. It also includes one-and-one-half hours documented practice time per week. This course is required for all traditional performance and jazz music majors. Students must be concurrently enrolled in a large performance ensemble appropriate for their concentration. Students should also be enrolled in or have completed music theory course MUFHL 401.

**MUIVI 422 Applied Music III**

- **Units:** 1
- **Hours:** 7 hours LEC; 33 hours LAB
- **Course Family:** Traditional Applied Music Technique and Repertoire
- **Prerequisite:** MUIVI 421 with a grade of “C” or better
- **Corequisite:** MUFHL 410, AND one of the following: MUP 310, 330, 340, 350, 360, or 400.
- **Enrollment Limitation:** Audition
- **Transferable:** CSU; UC
- **C-ID:** C-ID MUS 160

This is the third course in a four-part series which focuses on the development of individual performance skills and solo and ensemble repertoire. It includes one-on-one or small group instrumental, composition, or vocal instruction for a total of seven hours per semester. It also includes seven hours per semester of solo performance, recital attendance, masterclasses, and a final juried performance. It also includes one-and-one-half hours documented practice time per week. This course is required for all traditional performance and composition majors. Students must be concurrently enrolled in a traditional large performance ensemble appropriate to their concentration. Students should also be enrolled in or have completed music theory course MUFHL 410.

**MUIVI 423 Applied Music IV**

- **Units:** 1
- **Hours:** 7 hours LEC; 33 hours LAB
Course Family: Traditional Applied Music Technique and Repertoire
Prerequisite: MUIVI 422 with a grade of "C" or better
Corequisite: MUFHL 411, AND one of the following: MUP 310, 330, 340, 350, or 360
Enrollment Limitation: Audition
Transferable: CSU; UC
C-ID: C-ID MUS 160

MUIVI 425 Applied Music - Jazz I
Units: 1
Hours: 7 hours LEC; 33 hours LAB
Course Family: Jazz Applied Music
Prerequisite: MUIVI 421 with a grade of "C" or better
Corequisite: MUFHL 410 or 420; AND MUP 320 or 400.
Enrollment Limitation: Audition
Transferable: CSU; UC
C-ID: C-ID MUS 160

This is the third course in a four-part series which focuses on the development of individual performance skills and solo and ensemble repertoire in the jazz idiom. It includes one-on-one instrumental or vocal instruction for a total of seven hours per semester. It also includes seven hours per semester of solo performance, recital attendance, masterclasses, and a final juried performance. It also includes one-and-one-half hours documented practice time per week. This course is required for all jazz studies majors. Students must be concurrently enrolled in a large performance ensemble appropriate for their concentration. Students should also be enrolled in or have completed music theory course MUFHL 411.

MUIVI 426 Applied Music - Jazz II
Units: 1
Hours: 7 hours LEC; 33 hours LAB
Course Family: Jazz Applied Music
Prerequisite: MUIVI 425 with a grade of "C" or better; AND MUFHL 410 or 420.
Corequisite: MUFHL 410 or 420; AND MUP 320 or 400.
Enrollment Limitation: Audition
Transferable: CSU; UC
C-ID: C-ID MUS 160

This is the final course in a four-part series which focuses on the development of individual performance skills and solo and ensemble repertoire in the jazz idiom. It includes one-on-one instrumental or vocal instruction for a total of seven hours per semester. It also includes seven hours per semester of solo performance, recital attendance, masterclasses, and a final juried performance. It also includes one-and-one-half hours documented practice time per week. This course is required for all jazz performance majors. Students must be concurrently enrolled in a large performance jazz ensemble appropriate for their concentration. Students should also be enrolled in or have completed music theory course MUFHL 410 or MUFHL 420.

MUIVI 495 Independent Studies in Music Instrumental/Voice Instruction
Units: 1 - 3
Hours: 54 - 162 hours LAB
Prerequisite: None.
Transferable: CSU

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

MUIVI 498 Work Experience in Instrumental/Voice Instruction
Units: 0.5 - 4
Hours: 30 - 300 hours LAB
Prerequisite: None.
Enrollment Limitation: Students must be in a paid or unpaid internship, volunteer position, or job related to the instrumental/voice instruction with a cooperating site supervisor. Students are advised to consult with the Music Department faculty to review specific certificate and degree work experience requirements.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGRD 300; OR ESLW 340.
Transferable: CSU

This course provides students with opportunities to develop marketable skills in preparation for employment or advancement within the field of instrumental/voice instruction. It is designed for students interested in work experience and/or internships in transfer-level degree occupational programs. Course content includes understanding the application of education to the workforce, completion of Title 5 required forms which document the student's progress and hours spent at the work site, and developing workplace skills and competencies.

During the semester, the student is required to complete 37.5 hours of related paid work experience, or 30 hours of related unpaid work experience for 0.5 unit. An additional 37.5 or 30 hours of related work experience is required for each additional 0.5 units. All students are required to attend the first class meeting, a mid-semester meeting, and a final meeting. Additionally, students who have not already successfully completed a Work Experience course will be required to attend weekly orientations while returning participants may meet individually with the instructor as needed. Students may take up to 16 units total across all Work Experience course offerings. This course may be taken up to four times when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

MUIVI 499 Experimental Offering in Music Instrumental/Voice Instruction
Units: 0.5 - 4
Prerequisite: None.
Transferable: CSU

This is the experimental courses description.

Music - Performance (MUP) Courses

MUP 310 Orchestra
Units: 2
Hours: 18 hours LEC; 54 hours LAB
Prerequisite: None.
Enrollment Limitation: Ability to play at least one instrument commonly used in orchestra.
Transferable: CSU; UC
C-ID: C-ID MUS 180

This course is the study and performance of orchestral repertoire encompassing a wide variety of orchestral styles. Public performances and field trips may be required. This course may be taken up to four times for credit.
MUP 311 Advanced Orchestra

Units: 1 - 2
Hours: 9 - 18 hours LEC; 27 - 54 hours LAB
Prerequisite: MUP 310 with a grade of "C" or better; or an audition.
Transferable: CSU; UC
C-ID: C-ID MUS 180

This course is the continuing study and performance of orchestral repertoire. Additional topics include conducting, rehearsal techniques, and section leading. Public performances and/or field trips may be required. This course may be taken up to four times for credit.

MUP 320 Jazz Band

Units: 2
Hours: 18 hours LEC; 54 hours LAB
Prerequisite: None.
Transferable: CSU; UC
C-ID: C-ID MUS 180

This course is the study and performance of jazz band repertoire encompassing a wide variety of music in the jazz style. Public performances and/or field trips may be required. This course may be taken up to four times for credit.

MUP 321 Advanced Jazz Band

Units: 1 - 2
Hours: 9 - 18 hours LEC; 27 - 54 hours LAB
Prerequisite: Completion of 8 units of MUP 320 with a grade of "C" or better
Transferable: CSU; UC
C-ID: C-ID MUS 180

This course is the continuing study and performance of jazz band repertoire and techniques. Additional topics include improvising, conducting, rehearsal technique, and section leading. Public performances and field trips may be required. This course may be taken up to four times for credit.

MUP 323 Latin Jazz Ensemble

Units: 2
Hours: 18 hours LEC; 54 hours LAB
Prerequisite: None.
Enrollment Limitation: Ability to play at least one instrument commonly used in jazz ensemble; audition required.
Transferable: CSU; UC
C-ID: C-ID MUS 180

This course is the study and performance of Latin jazz repertoire encompassing a wide variety of Latin American and Afro-Cuban jazz styles. Public performances and field trips may be required. This course may be taken up to four times for credit.

MUP 324 Advanced Latin Jazz Ensemble

Units: 1 - 2
Hours: 9 - 18 hours LEC; 27 - 54 hours LAB
Prerequisite: Completion of 8 units of MUP 323 with a grade of "C" or better
Transferable: CSU; UC
C-ID: C-ID MUS 180; C-ID MUS 185

This course is the further study, rehearsal, and public performance of Latin Jazz literature appropriate to the ensemble. It emphasizes the development of skills needed to perform a wide variety of Latin American and Afro-Cuban jazz styles. Different literature will be studied each semester. Public performance is required; field trips may be required. This course may be taken up to four times for credit.

MUP 327 Chamber Jazz Ensemble

Units: 2
Hours: 18 hours LEC; 54 hours LAB
Prerequisite: None.
Enrollment Limitation: Ability to play at least one instrument commonly found in a jazz ensemble; audition required.
Transferable: CSU; UC
C-ID: C-ID MUS 180; C-ID MUS 185

This course examines and evaluates techniques of chamber jazz group organization, jazz arranging, and jazz improvisation. Chamber jazz recording techniques are analyzed focusing on studio etiquette, microphone setup, headphone mix, and playback critique. Public performances and field trips may be required. This course may be taken up to four times for credit.

MUP 328 Advanced Chamber Jazz Ensemble

Units: 2
Hours: 18 hours LEC; 54 hours LAB
Prerequisite: Completion of 8 units of MUP 327 with a grade of "C" or better
Transferable: CSU; UC
C-ID: C-ID MUS 180; C-ID MUS 185

This course examines and evaluates advanced techniques of chamber jazz ensemble organization. Ensemble members select music, formulate rehearsal strategy, and set up and evaluate group performances. Public performances and field trips may be required. This course may be taken up to four times for credit.

MUP 330 Concert Band

Units: 2
Hours: 18 hours LEC; 54 hours LAB
Prerequisite: None.
Enrollment Limitation: Ability to play a concert band instrument.
Transferable: CSU; UC
C-ID: C-ID MUS 180

This course is the study and performance of concert band repertoire. It is open to those who play a concert band instrument. Public performances and/or field trips may be required. This course may be taken up to four times for credit.

MUP 331 Advanced Concert Band

Units: 1 - 2
Hours: 9 - 18 hours LEC; 27 - 54 hours LAB
Prerequisite: MUP 330 (Concert Band) with a grade of "C" or better; or audition.
Transferable: CSU; UC
C-ID: C-ID MUS 180

This course is the continuing study and performance of concert band repertoire. It is open to those who play a concert band instrument. Public performances and/or field trips may be required. This course may be taken up to four times for credit.

MUP 334 Symphonic Band

Units: 2
Hours: 18 hours LEC; 54 hours LAB
Prerequisite: None.
Enrollment Limitation: Ability to play a symphonic band instrument.
Transferable: CSU; UC
C-ID: C-ID MUS 180

This course is the study and performance of the symphonic band repertoire. It is open to those who play a symphonic band instrument. Public performances and/or field trips may be required. This course may be taken up to four times for credit.
MUP 341 Advanced Symphonic Band

Units: 1 - 2
Hours: 9 - 18 hours LEC; 27 - 54 hours LAB
Prerequisite: MUP 340 (Symphonic Band) with a grade of "C" or better; or audition.
Transferable: CSU; UC
C-ID: C-ID MUS 180

This course is the continuing study and performance of advanced symphonic band literature. Additional topics include conducting, rehearsal techniques, and section leading. Public performances and/or field trips may be required. This course may be taken up to four times for credit.

MUP 350 Concert Choir I

Units: 2
Hours: 18 hours LEC; 54 hours LAB
Prerequisite: None.
Enrollment Limitation: Ability to match pitch and produce a good tone demonstrated in the audition.
Transferable: CSU; UC
C-ID: C-ID MUS 180

This course is the study and performance of choir literature including classical works, contemporary pieces, and music of many diverse cultures. Public performances, festivals, and field trips may be required. This course may be taken up to four times for credit.

MUP 352 Advanced Concert Choir

Units: 2
Hours: 18 hours LEC; 54 hours LAB
Prerequisite: MUP 350 with a grade of "C" or better
Transferable: CSU; UC
C-ID: C-ID MUS 180

This course provides continued study and performance of advanced choir literature including classical works, contemporary pieces, and music of many diverse cultures. Advanced ensemble members may learn conducting skills and lead small-group practice sessions. Public performances, festivals, and field trips may be required. This course may be taken up to four times for credit.

MUP 360 Chamber Singers

Units: 2
Hours: 18 hours LEC; 54 hours LAB
Prerequisite: None.
Enrollment Limitation: Audition required. Auditions generally occur during the first week of instruction. The audition includes sight singing, the preparation of a short musical excerpt, and an aural skills assessment.
Transferable: CSU; UC
C-ID: C-ID MUS 180

This course is an advanced chorus ensemble of limited size. It covers a wide variety of music; classical, world music, folksong arrangements, and contemporary compositions. An audition is required. Public performances, festivals, and field trips may be required. This course may be taken up to four times for credit.

MUP 361 Advanced Chamber Singers

Units: 2
Hours: 18 hours LEC; 54 hours LAB
Prerequisite: 8 units of MUP 360 with a grade of "C" or better
Enrollment Limitation: Audition required. Auditions generally occur during the first week of instruction. The audition includes sight singing, the preparation of a short musical excerpt, and an aural skills assessment.
Transferable: CSU; UC
C-ID: C-ID MUS 180

This course is an advanced chorus ensemble of limited size performing a wide variety of music; classical, world music, folksong arrangements, and contemporary compositions. Advanced ensemble members may conduct pieces and lead small-group breakout practice sessions. Public performances, festivals, and field trips may be required. This course may be taken up to four times for credit.

MUP 370 Rehearsal and Performance - Musical Ensemble

Same As: TA 466
Units: 0.5 - 3
Hours: 27 - 162 hours LAB
Course Family: Musical Performance and Technical Production
Prerequisite: None.
Enrollment Limitation: Audition/Interview
Transferable: CSU; UC

This course provides a workshop training experience in the preparation and performance of musical theatre ensemble productions. A different production is presented each semester the course is offered. Students interested in singing/acting roles audition with the director. Students interested in instrumental positions audtion with the musical director. Students interested in technical work interview with the technical director. Field trips may be required. A portion of this course may be offered in a TBA component of 27-162 hours which may include acting, singing, dancing, musical, or technical rehearsals and preparation. It is not open to students who have completed TA 466.

MUP 400 Vocal Jazz Ensemble

Units: 2
Hours: 18 hours LEC; 54 hours LAB
Prerequisite: None.
Enrollment Limitation: Audition is required. The audition will include sight singing, aural skills, improvisation, and the preparation of a short musical excerpt.
Transferable: CSU; UC
C-ID: C-ID MUS 180; C-ID MUS 185

This course is a vocal jazz ensemble of limited size which focuses on a wide variety of music in the jazz style. Public performance, festivals and field trips may be required. This course may be taken up to four times for credit.

MUP 401 Advanced Vocal Jazz Ensemble

Units: 1 - 2
Hours: 9 - 18 hours LEC; 27 - 54 hours LAB
Prerequisite: MUP 400 with a grade of "C" or better
Enrollment Limitation: Audition is required. The audition will include sight-singing, aural skills, improvisation, and the preparation of a short musical excerpt.
Transferable: CSU; UC
C-ID: C-ID MUS 180; C-ID MUS 185

This course is the continuing study of vocal jazz ensemble repertoire and techniques. Additional topics include experiences in scat singing, conducting, rehearsal techniques, and leading small-group breakout practice sessions. Public performance, festivals, recording sessions, and field trips may be required. This course may be taken up to four times for credit.

MUP 420 Special Ensemble Participation

Units: 1 - 2
Hours: 9 - 18 hours LEC; 27 - 54 hours LAB
Prerequisite: None.
Enrollment Limitation: Auditon
Transferable: CSU; UC
C-ID: C-ID MUS 185

This course is open to all students who sing or play musical instruments. Studies are designed for instrumental and vocal groups of various combinations. Students may explore chamber music, large ensemble, or solo repertoire. Public performances and field trips may be required. This course may be taken up to four times for credit.
MUP 495 Independent Studies in Music Performance

Units: 1 - 3
Hours: 54 - 162 hours LAB
Prerequisite: None.
Transferable: CSU

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

MUP 499 Experimental Offering in Music Performance

Units: 0.5 - 4
Prerequisite: None.
Transferable: CSU

This is the experimental courses description.

Music - Specializations in Music (MUSM) Courses

MUSM 110 The Business of Music

Units: 3
Hours: 54 hours LEC
Prerequisite: C-ID CMUS 140X

This course gives an overview of the processes of the music industry. It includes record contracts as well as the duties and responsibilities of record producers, agents, managers, and performing artists.

MUSM 111 The Business of Music

Units: 3
Hours: 54 hours LEC
Prerequisite: MUSM 110 with a grade of "C" or better

The course gives an in-depth view of the fundamentals and organization of the music business. It includes the duties of attorneys, publishers, radio stations, and streaming services regarding musical and financial matters. It also defines and analyzes publishing agreements, merchandising contracts, trademark, and service mark points.

MUSM 112 The Business of Music/Artist Management

Units: 3
Hours: 54 hours LEC
Prerequisite: None.

This course covers the definitions, duties, and agreements of artist management. Topics include the functions of a personal manager, guidelines to career planning, choosing managers and clients, record company negotiations, and selecting other team players. It also analyzes the personal manager agreement and how to organize an artist’s tour.

MUSM 113 The Business of Music/Promotion

Units: 3

MUSM 120 Contemporary Songwriting I

Units: 3
Hours: 54 hours LEC
Prerequisite: MUSM 120 with a grade of "C" or better
C-ID: C-ID CMUS 150X

This course covers the processes of the songwriting industry in popular music today, including instrumental and vocal arrangements in jazz, pop, and rock musical styles. Other related topics such as lyrics, formation of melodies and harmonies, popular music form, and musical notation are covered.

MUSM 121 Contemporary Songwriting II

Units: 3
Hours: 54 hours LEC
Prerequisite: MUSM 120 with a grade of "C" or better

This course covers the processes of writing popular songs, including lyric evaluation, song forms, and music styles. It includes production techniques, publishing, and marketing strategies.

MUSM 140 Concert Sound Reinforcement

Units: 2
Hours: 36 hours LEC; 18 hours LAB
Prerequisite: MUSM 342 with a grade of "C" or better
C-ID: C-ID CMUS 120X

This course is an overview of live concert sound reinforcement. Topics include basic sound system theory and its application. It also covers individual sound system component operation, including microphones, mixers, effects, power amplifiers, and speaker systems. This course offers opportunities for experiences in troubleshooting, sound checking, and mixing sound for concert performances and touring.

MUSM 295 Independent Studies in Music Specializations in Music

Units: 1 - 3
Hours: 54 - 162 hours LAB
Prerequisite: None.

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

MUSM 299 Experimental Offering in Music Specializations in Music

Units: 0.5 - 4
Prerequisite: None.

This is the experimental courses description.
MUSM 334 Introduction to Musical Instrument Digital Interface (MIDI)

Units: 2
Hours: 18 hours LEC; 54 hours LAB
Prerequisite: None
Advisory: MUFHL 321 or MUUI 340
Transferable: CSU
C-ID: C-ID CMUS 100X

This introductory course examines the terminology, hardware, software, techniques, and concepts related to using Musical Instrument Digital Interface (MIDI) and associated music technology. It surveys the principles and practices of sound, MIDI, synthesis, notation, and audio recording, as well as digital audio workstation (DAW) options and configurations.

MUSM 335 Intermediate Musical Instrument Digital Interface (MIDI)

Units: 2
Hours: 18 hours LEC; 54 hours LAB
Prerequisite: MUSM 334 with a grade of "C" or better
Transferable: CSU

This course builds on skills learned in MUSM 334 and introduces intermediate techniques in MIDI/Digital Audio Workstation (DAW) composition and arranging for various styles of music. Topics include integrating MIDI and digital audio, film and video scoring, and the use of sound editing software.

MUSM 342 Recording Studio Techniques I

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: MUSM 342 with a grade of "C" or better
Transferable: CSU
General Education: CSU Area C1
C-ID: C-ID CMUS 130X

This is the first course in a four-part series of Recording Studio Techniques. It covers entry-level techniques in audio/music production, microphone fundamentals and applications, studio equipment, recording console functions, and multitrack recording procedures.

MUSM 344 Recording Studio Techniques II

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: MUSM 342 with a grade of "C" or better
Transferable: CSU

This is the second course in a four-part series of Recording Studio Techniques. It covers intermediate techniques of audio and music production, and introduces mixdown session techniques, outboard gear application, remote recording, and studio design.

MUSM 350 Recording Studio Techniques III

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: MUSM 344 with a grade of "C" or better
Transferable: CSU

This is the third course in a four-part series of Recording Studio Techniques. Topics include studio design and management principles, managing and organizing sessions, and recording, editing, and mixing in a Digital Audio Workstation (DAW) environment.

MUSM 352 Recording Studio Techniques IV

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: MUSM 350 and 356 with grades of "C" or better
Transferable: CSU

This is the fourth course in a four-part series on Recording Studio Techniques. It covers advanced techniques of audio engineering and is designed for recording engineers seeking careers in audio and post production. It includes advanced concepts of analog and digital recording, mixdown, surround sound, synchronizing audio to video, and mastering.

MUSM 356 Pro Tools 101, Introduction to Pro Tools

Units: 1.5
Hours: 27 hours LEC
Prerequisite: MUSM 342 with a grade of "C" or better
Transferable: CSU

This course is an introduction to Avid's Pro Tools digital audio workstation software application. Basic Pro Tools principles, including how to complete a Pro Tools project from initial set up to final mixdown are covered. It covers how to record, edit, and mix music and Musical Instrument Digital Interface (MIDI) tracks within the Pro Tools application. This course is the first in a series of courses leading to multiple Avid Pro Tools certifications.

MUSM 357 Pro Tools 110 Intermediate Pro Tools

Units: 1.5
Hours: 27 hours LEC
Prerequisite: MUSM 356 with a grade of "C" or better
Transferable: CSU

This is an intermediate-level course in Avid's Pro Tools digital audio workstation hardware and software application. Concepts and skills needed to operate large sessions in a project studio environment are covered. It covers managing large track counts, multiple channels of simultaneous inputs and outputs, and the use of specialized plug-ins for specific music and post-production tasks. This course is the second in a series of courses leading to multiple Avid Pro Tools certifications.

MUSM 361 Advanced Studio Sessions

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: MUSM 350 with a grade of "C" or better
Transferable: CSU

This course focuses on expanding the skills mastered in MUSM 350 by offering studio recording sessions that are entirely student-planned, organized, and completed. Students will select appropriate equipment for the project and configure preamps, compressors, and cat5 based headphone mixers. Students will use automation and outboard equipment to complete tracking, mixing, and mastering using analog tape and Pro Tools HDX.

MUSM 362 Mixing and Mastering Music Projects

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: MUSM 350, 356, and 357 with grades of "C" or better
Transferable: CSU

This course introduces the methods used to create professional mixes from multi-track master recordings in analog or digital formats. Advanced techniques in equalization, spatial placement, automation, and reverb are investigated. Lab work is regularly presented in
A routine component of the course is listening exercises to develop critical listening skills. The Music Department's Avid Pro Tools HD Digital Audio Workstation will be used for mixing projects. A final mix project will then be mastered and converted into a number of possible final output formats including various streaming platforms.

**MUSM 366 Pro Tools 201, Advanced Pro Tools**

**Units:** 1.5  
**Hours:** 27 hours LEC  
**Prerequisite:** MUSM 344 and 357 with grades of "C" or better  
**Transferable:** CSU

This is an advanced-level course in Avid’s Pro Tools digital audio workstation hardware and software application. Topics include the core concepts and skills needed to operate a Pro Tools HD system in a professional studio environment. Advanced recording, editing, and mixing techniques are presented. This course is the third in a series of courses leading to multiple Avid Pro Tools certifications.

**MUSM 367 Audio for Video Post Production**

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Prerequisite:** MUSM 344 with a grade of "C" or better  
**Transferable:** CSU

This course introduces post production, the art and science of adding sound to picture for television, feature films, and commercials. Pro Tools digital audio workstation environment, Sound Design, Foley, Scoring, Dialog Editing, and mixing skills will be demonstrated.

**MUSM 495 Independent Studies in Music Specializations**

**Units:** 1 - 3  
**Hours:** 54 - 162 hours LAB  
**Prerequisite:** None.  
**Transferable:** CSU

Independent Study is an opportunity for students to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

**MUSM 499 Experimental Offering in Music Specializations in Music**

**Units:** 0.5 - 4  
**Prerequisite:** None.  
**Transferable:** CSU

This is the experimental courses description.
Natural Resources

Environmental Conservation is an interdisciplinary program that advances understanding of ecological systems and their interrelationships, including those with human society. Core study involves plant and animal ecology and natural history, field methods and study design, and conservation and management of ecosystems and natural resources. Students are able to focus their studies in conservation and sustainability; plant ecology, conservation and management; and/or vertebrate ecology, conservation and management. This program covers a wide range of environmental studies, provides many unique opportunities for hands-on and real-world field experience, and prepares students for a variety of careers as well as transfer at the upper division level to academic programs involving environmental sciences.

The Natural Resources Department within the Science & Engineering Division has developed new A.S. degree and certificate programs in Environmental Conservation that recognize the change in emphasis in this field’s academics and job market.

An increasing number of sectors of the labor market in California, the U.S., and beyond, require knowledge and skills emphasizing conservation and management of plant and animal populations and their habitats, sustainable resource use, and an enhanced understanding of the environment. This program prepares students for entry-level work in a variety of industries and settings, including private firms, nonprofit organizations, and government agencies at the local, state, and federal levels. Students receive not only rigorous instruction in the theory and application of environmental sciences but unique hands-on training as well.

Degrees and Certificates Offered

A.S. in Environmental Conservation
A.S. in General Science
Environmental Conservation Technician (Fisheries) Certificate
Environmental Conservation Technician (Sustainability) Certificate
Environmental Conservation Technician (Vegetation) Certificate
Environmental Conservation Technician (Wildlife) Certificate
Environmental Conservation Certificate
Environmental Conservation Technician (Conservation/Restoration) Certificate
Environmental Conservation Technician (Forest/Rangeland) Certificate
Environmental Conservation Technician (Water Resources) Certificate

Dean Joel Keebler
Department Chair Jennifer Neale
Phone (916) 484-8107

Associate Degrees

A.S. in Environmental Conservation

Environmental Conservation is an interdisciplinary program that advances the understanding of ecological systems and their interrelationships, including those with human society. Core study involves plant and animal ecology and natural history, field methods and study design, and conservation and management of ecosystems and natural resources. Students have the opportunity to choose among courses in the areas of conservation and sustainability; plant ecology, conservation, and management; and vertebrate ecology, conservation and management. This program covers a wide range of environmental studies, provides many unique opportunities for hands-on and real-world field experience, and prepares students for a variety of careers as well as transfer at the upper division level to academic programs involving environmental sciences.

Total Units: 31 - 33

¹At least 10 of the 16 units must come from NATR courses.

The Environmental Conservation Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- apply scientific methodologies and critical analysis to environmental investigations.
- evaluate natural resource systems, including their past and present use and management, and future sustainability.
- analyze social, ethical, and biological implications of environmental management alternatives.
• identify ecological phenomena in one's everyday experiences and apply ecological principles to understand local, national, and global environmental issues,
• assess the relationships of plants and animals to their environment and to each other,
• measure, analyze, and monitor biological and physical components of the environment.
• evaluate basic land survey, water quality, soils, vegetation, and wildlife data.
• examine the significance of biodiversity conservation.

Career Information

An increasing number of sectors of the labor market in California, the U.S., and beyond, require knowledge and skills emphasizing conservation and management of plant and animal populations and their habitats, sustainable resource use, and an enhanced understanding of the environment. This program prepares students for entry-level work in a variety of industries and settings, including private firms, nonprofit organizations, and government agencies at the local, state, and federal levels. Students receive not only rigorous instruction in the theory and application of environmental sciences, but also unique hands-on training.

A.S. in General Science

This program provides a broad study in the fields of biological and physical sciences in preparation for transfer to a four-year program and continuation of studies in upper division science courses.

2023-2024 Catalog
### Student Learning Outcomes

Upon completion of this program, the student will be able to:

- apply appropriate quantitative and qualitative methods to interpret and analyze pertinent data.
- outline the basic concepts and fundamental theories of a natural science.
- articulate orally and/or in writing the importance of continuous examination and modification of accepted ideas as a fundamental element in the progress of science.
- discuss ethical components of scientific decision making and apply personal and social values within the process of decision making in scientific endeavors.

### Certificates of Achievement

#### Environmental Conservation Technician (Fisheries) Certificate

This certificate advances the understanding of ecological systems and their interrelationships, including those with human society. It focuses on ecology, field methods and study design, and conservation and management of ecosystems and natural resources, with an emphasis on fish evolution, ecology, conservation and management. Marine and freshwater fisheries, their impacts on society and the environment, and sustainability issues are investigated, including environmental, ecological, economic, and social aspects. Commercial and recreational fisheries management and aquaculture are also explored.

### Student Learning Outcomes

Upon completion of this program, the student will be able to:

- apply the scientific method and critical analysis to environmental investigations
- evaluate natural resource systems, including their past and present use and management and future sustainability
- analyze social, ethical, and biological implications of environmental management alternatives
- identify ecological phenomena in one's everyday experiences and apply ecological principles to understand local, national and global environmental issues
- assess the relationships of plants and animals to their environment and to each other
- measure and analyze the physical environment of plant and animal populations
- evaluate basic land survey, water quality, vegetation, and wildlife data
- examine the significance of biodiversity conservation
- analyze aspects of fish evolution and ecology important to their management and synthesize basic parameters of fish population dynamics in terms of rate functions and limiting factors
- analyze function and dynamics of freshwater and marine communities, emphasizing those in temperate North America, and their associated fisheries management issues
- interpret fisheries management data, define management problems and stakeholders involved, and suggest appropriate strategies to reach management objectives
Career Information

This program prepares students for entry-level fisheries ecologist aide/technician positions in a variety of industries and settings, including private firms, nonprofit organizations, educational institutions, and government agencies at the local, state, and federal levels. Students receive not only rigorous instruction in the theory and application of environmental sciences but also unique hands-on training in fisheries ecology, conservation, and management. Students prepare for positions in areas such as fisheries conservation and management, basic fish biology research, and aquatic habitat restoration.

Environmental Conservation Technician (Sustainability) Certificate

This certificate advances the understanding of ecological systems and their interrelationships, including those with human society. It focuses on ecology, field methods and study design, and conservation and management of ecosystems and natural resources, with an emphasis on sustainability. Theoretical and practical aspects of sustainability are explored including social, economic, and environmental dimensions. Sustainable principles and practices are examined in the context of energy production and consumption, transportation systems, food production, water resources, industry, and the built environment. Environmental as well as social and cultural impacts of industrialization, capitalism, and globalization are addressed at various scales, and potential solutions to current problems are discussed.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- apply the scientific method and critical analysis to environmental investigations
- evaluate natural resource systems, including their past and present use and management and future sustainability
- analyze social, ethical, and biological implications of environmental management alternatives
- identify ecological phenomena in one’s everyday experiences and apply ecological principles to understand local, national, and global environmental issues
- assess the relationships of plants and animals to their environment and to each other
- measure and analyze the physical environment of plant and animal populations
- evaluate basic land survey, water quality, vegetation, and wildlife data
- examine the significance of biodiversity conservation
- examine technological, geographic, socioeconomic, cultural, and environmental considerations of alternative forms of energy production
- investigate theoretical and practical aspects of sustainability in the context of energy consumption, transportation systems, food production, water resources, industry, the built environment, and socio-cultural institutions and practices

Career Information

This program prepares students for entry-level sustainability consultant/technician positions in a variety of industries and settings, including private firms, nonprofit organizations, educational institutions, and government agencies at the local, state, and federal levels. Work opportunities for program graduates include positions in environmental economics, sustainable business practices, green building, as well as sustainable communities, food systems, energy, and transportation.

Environmental Conservation Technician (Vegetation) Certificate

This certificate advances the understanding of ecological systems and their interrelationships, including those with human society. It focuses on ecology, field methods and study design, and conservation and management of ecosystems and natural resources, with an emphasis on woody and herbaceous vegetation. Major topics include plant taxonomy, natural history and life cycle, physiology, evolution, human uses of--and threats to--California native plant communities and their component species.

- evaluate natural resource systems, including their past and present use and management and future sustainability
- analyze social, ethical, and biological implications of environmental management alternatives
- identify ecological phenomena in one’s everyday experiences and apply ecological principles to understand local, national and global environmental issues
- assess the relationships of plants and animals to their environment and to each other
- measure and analyze the physical environment of plant and animal populations
- evaluate basic land survey, water quality, vegetation, and wildlife data
- examine the significance of biodiversity conservation
- assess the structure and function of vegetative communities of California
- interpret plant keys and develop skills in their use in plant identification
- collect and prepare a plant collection of representative native California plants
- analyze plant adaptations and environmental gradients in a variety of ecosystems
- investigate the implications of plant conservation, restoration, and community management alternatives

Career Information

This program prepares students for entry-level plant ecologist aide/technician positions in a variety of industries and settings, including...
private firms, nonprofit organizations, educational institutions, and government agencies at the local, state, and federal levels. Students receive not only rigorous instruction in the theory and application of environmental sciences but also unique hands-on training in plant identification, ecology, conservation, and management. Skills developed in the program support student preparation for positions related to plant taxonomy, dendrology, research and management (e.g., of California endemics), unique environments such as vernal pools, invasive species, etc.) and environmental restoration.

Environmental Conservation Technician (Wildlife) Certificate

This certificate advances the understanding of ecological systems and their interrelationships, including those with human society. It focuses on ecology, field methods and study design, and conservation and management of ecosystems and natural resources, with an emphasis on vertebrate wildlife. Major topics include population ecology; community dynamics; wildlife habitat; management of game, invasive, and non-game species; conservation of threatened and endangered wildlife; and theoretical and practical tools and methods for studying wildlife, such as sampling techniques, population modeling, habitat assessment, radiotelemetry, and remote sensing.

- identify ecological phenomena in one’s everyday experiences and apply ecological principles to understand local, national and global environmental issues.
- assess the relationships of plants and animals to their environment and to each other.
- measure and analyze the physical environment of plant and animal populations.
- evaluate basic land survey, water quality, vegetation, and wildlife data.
- examine the significance of biodiversity conservation.
- apply and compare various wildlife habitat and population assessment techniques across a variety of environmental settings.
- interpret wildlife population data and construct a population model, evaluating alternative wildlife management decisions based on computer-simulation results.
- evaluate alternative wildlife management decisions in the context of ecosystem dynamics as well as and social/cultural and economic considerations.

Career Information

This program prepares students for entry-level wildlife biologist aide/technician positions in a variety of industries and settings, including private firms, nonprofit organizations, educational institutions, and government agencies at the local, state, and federal levels. Students receive not only rigorous instruction in the theory and application of environmental sciences but also unique hands-on training in wildlife ecology, conservation, and management. Participants develop skills appropriate for positions dealing with aspects of wildlife such as population sampling and monitoring, data analysis, and management/conservation of threatened, endangered, and invasive species of wildlife.

Environmental Conservation Certificate

Environmental Conservation is an interdisciplinary program that advances the understanding of ecological systems and their interrelationships, including those with human society. Core study involves plant and animal ecology and natural history, field methods and study design, and conservation and management of ecosystems and natural resources. Students have the opportunity to choose among courses in the areas of conservation and sustainability: plant ecology, conservation, and management; and vertebrate ecology, conservation, and management. This program covers a wide range of environmental studies, provides many unique opportunities for hands-on and real-world field experience, and prepares students for a variety of entry-level positions in the area of environmental sciences and natural resources as well as transfer at the upper division level to academic programs involving environmental sciences.

- measure, analyze, and monitor biological and physical components of the environment.
- evaluate basic land survey, water quality, soils, vegetation, and wildlife data.
- examine the significance of biodiversity conservation.

Career Information

An increasing number of sectors of the labor market in California, the U.S., and beyond, require knowledge and skills emphasizing conservation and management of plant and animal populations and their habitats, sustainable resource use, and an enhanced understanding of the environment. This program prepares students for entry-level work in a variety of industries and settings, including private firms, nonprofit organizations, and government agencies at the local, state, and federal levels. Students receive not only rigorous instruction in the theory and application of environmental sciences, but also unique hands-on training.

Certificates

Environmental Conservation Technician (Conservation/Restoration) Certificate

This certificate advances the understanding of ecological systems and their interrelationships, including those with human society. It focuses on ecology, field methods and study design, and conservation and management of ecosystems and natural resources, with an emphasis on environmental restoration theory and practice and global and emerging environmental and conservation issues. Topics include both the causes of ecological degradation and biodiversity loss, as well as the science of development, management, monitoring, and sustainability of restored environments. Conservation priorities and emerging environmental concerns are investigated, such as climate change, energy production, socioeconomic systems, human population, disease dynamics, species extinctions, invasive species, stresses on water resources and food-producing systems, and over-exploitation of natural resources. Emphasis is placed on development of strategies for the establishment of protected areas, monitoring and adaptive management, and conservation outside of protected areas, as well as an understanding of biodiversity at genetic, species, and community/landscape levels.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- apply the scientific method and critical analysis to environmental investigations
- evaluate natural resource systems, including their past and present use and management and future sustainability
- analyze social, ethical, and biological implications of environmental management alternatives

Career Information

This program prepares students for entry-level conservation/restoration aide/technical positions in a variety of industries and settings, including private firms, nonprofit organizations, educational institutions, and government agencies at the local, state, and federal levels. Students receive not only rigorous instruction in the theory and application of environmental sciences but also unique hands-on training in conservation and restoration. Potential job opportunities include work in the areas of survey/monitoring of threatened and endangered species and habitats, planning and execution of restoration projects, climate change adaptation for human communities, conservation advocacy, and other fields.

Environmental Conservation Technician (Forest/Rangeland) Certificate

This certificate advances the understanding of ecological systems and their interrelationships, including those with human society. It focuses on ecology, field methods and study design, and conservation and management of forests and rangelands, with an emphasis on forests and rangelands. Basic biological and physical science concepts important to a general understanding of forest and rangeland/grassland ecology, forestry, and grazing by native herbivores and livestock are investigated. History of use and management, taxonomy and ecology of plant communities, soils, pests and diseases, and disturbance regimes of forested landscapes and rangelands are explored. Classes assess current policies, multiple-use management, and emerging threats related to forest and rangeland conservation.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- apply the scientific method and critical analysis to environmental investigations
- evaluate natural resource systems, including their past and present use and management and future sustainability
• analyze social, ethical, and biological implications of environmental management alternatives
• identify ecological phenomena in one's everyday experiences and apply ecological principles to understand local, national and global environmental issues
• assess the relationships of plants and animals to their environment and to each other
• measure and analyze the physical environment of plant and animal populations
• evaluate basic land survey, water quality, vegetation, and wildlife data
• examine the significance of biodiversity conservation
• analyze important characteristics, processes, and stressors of population, community, and ecosystem dynamics of forest/rangeland environments
• evaluate social, ethical, and biological implications of forest/rangeland conservation and management alternatives, including impacts of grazing and forestry

Career Information
This program prepares students for entry-level forest/rangeland ecologist aide/technician positions in a variety of industries and settings, including private firms, nonprofit organizations, educational institutions, and government agencies at the local, state, and federal levels. Students receive not only rigorous instruction in the theory and application of environmental sciences but also unique hands-on training in forest/rangeland ecology, conservation, and management. This program prepares students for work in forestry, conservation, land management, grassland and forest ecological research, and other fields.

Environmental Conservation Technician (Water Resources) Certificate
This certificate advances the understanding of ecological systems and their interrelationships, including those with human society. It focuses on ecology, field methods and study design, and conservation and management of ecosystems and natural resources, with an emphasis on water resources. It provides a historical perspective on water development and explores current and projected water issues. Surface water and groundwater systems are considered, with an emphasis on the interdisciplinary nature of sustainable water resource management that balances urban, agricultural, industrial, and environmental water needs. The implications of water rights and key water policies are considered in evaluating how water is used and exploited.

Student Learning Outcomes
Upon completion of this program, the student will be able to:
• apply the scientific method and critical analysis to environmental investigations
• evaluate natural resource systems, including their past and present use and management and future sustainability
• analyze social, ethical, and biological implications of environmental management alternatives
• identify ecological phenomena in one's everyday experiences and apply ecological principles to understand local, national and global environmental issues
• assess the relationships of plants and animals to their environment and to each other
• measure and analyze the physical environment of plant and animal populations
• evaluate basic land survey, water quality, vegetation, and wildlife data
• examine the significance of biodiversity conservation
• describe the hydrologic cycle in both natural and urban environments, including key characteristics of surface water and groundwater resources and the interactions between these
• investigate the components of integrated water resources planning and management, including evaluation of water policy initiatives and determination of water rights
• analyze future water sustainability scenarios under uncertain conditions, including impacts of drought and climate change

Career Information
This program prepares students for entry-level water resources aide/technician positions in a variety of industries and settings, including private firms, nonprofit organizations, educational institutions, and government agencies at the local, state, and federal levels. Students receive not only rigorous instruction in the theory and application of environmental sciences but also unique hands-on training in water resources conservation and management, preparing them for positions in environmental consulting and planning, water conservation, hydrological research, and other fields.

Natural Resources (NATR) Courses

NATR 294 Topics in Natural Resources
Units: 0.5 - 5
Hours: 9 - 72 hours LEC
Prerequisite: None.

Current topics in natural resources conservation and management not covered by regular catalog offerings are examined. Topics and field locations vary, including advanced subjects related to wildlife, fisheries, soil and water resources, conservation biology, forest resources and management, restoration ecology and aquatic ecology. Field trips may be required.

NATR 300 Introduction to Natural Resource Conservation and Policy
Units: 4
Hours: 72 hours LEC
Prerequisite: None.
Transferable: CSU; UC
General Education: AA/AS Area IV

This course provides a survey of concepts, issues, management approaches, laws and regulations relevant to Earth's natural resources, such as soils, water, wildlife, fisheries, rangelands, and forests, with a focus on their sustainable management and conservation. It integrates over-exploitation, pollution, land use, and waste issues throughout the course, and explores principles, problems, and potential solutions in the context of ecology, economics, and ethics. This course stresses critical thinking, the scientific method and ecological dynamics as it deals with past, present, and future natural resource issues. Major themes include sustainability and global environmental problems as well as environmental laws and policies. Field labs may be required.

NATR 301 Introduction to Ornithology
Same As: BIOL 332
Units: 4
Hours: 54 hours LEC; 54 hours LAB
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; OR ESLR 340 AND ESWL 340.
Transferable: CSU; UC
General Education: AA/AS Area IV; CSU Area B2; CSU Area B3; Cal-GETC Area 5B (effective Fall 2025); Cal-GETC Area SC (effective Fall 2025); IGEC Area 5B; IGETC Area SC

This introductory course covers the biology and natural history of birds. Topics include evolutionary origins of birds and of flight, avian anatomy and physiology, and bird behavior, such as migration, song, feeding ecology, and mating systems. Conservation strategies are also investigated. Laboratory work explores bird structure and function, taxonomic classification, and species identification, particularly of those found in California and the western United States. Field trips may be required. This course is not open to students who have completed BIOL 332.

NATR 302 Introduction to Wildlife Biology

Units: 4
Hours: 54 hours LEC; 54 hours LAB
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; OR ESLR 340 AND ESWL 340; AND eligible for transfer-level Math.
Transferable: CSU; UC
General Education: AA/AS Area IV; CSU Area B2; CSU Area B3; Cal-GETC Area 5B (effective Fall 2025); Cal-GETC Area SC (effective Fall 2025); IGEC Area 5B; IGETC Area SC

This course is an introduction to the science of wildlife biology and the basic principles and techniques involved in wildlife research, conservation, and management. It emphasizes ecological aspects of wildlife populations and communities such as predator-prey relationships, population dynamics, diseases and parasites of wildlife, and wildlife habitat. Animal behavior, nutritional ecology, and other aspects of wildlife biology are also explored. Human dimensions of wildlife management including wildlife restoration and conservation, human-wildlife conflicts, hunting, invasive species, impacts of global climate change, and other relevant issues are examined. Social, economic, and ecological implications of management alternatives are investigated. Additionally, this course provides hands-on experience with habitat and population sampling, data analysis and interpretation; radio telemetry; wildlife capture and handling; and critical analysis of wildlife management policies and the development of a wildlife management plan. Field trips are required.

NATR 303 Energy and Sustainability

Same As: ENERGY 303
Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: MATH 120, 125, 129, 133 or higher; NATR 300, or an equivalent transferable life science course; and Eligible for ENGRD 310 or ENGRD 312 AND ENGW 300, OR ESLR 340 AND ESWL 340.
Transferable: CSU
General Education: AA/AS Area IV

This course investigates fundamentals of energy and impacts of energy systems on society and the environment. It explores energy resources, efficiency, conservation, and emerging technologies. Specifically addressed are mechanisms, advantages, disadvantages, and sustainability of current and future energy systems. This course also focuses on economic, cultural, political, and environmental aspects of energy production and consumption in the context of the built environment, transportation, food systems, manufacturing, and public services. Field trips may be required. This course is not open to students who have completed ENERGY 303 or ET 303.

NATR 304 The Forest Environment

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: MATH 120 with a grade of "C" or better
Transferable: CSU; UC
General Education: AA/AS Area IV

This course covers basic biological and physical science concepts important to a general understanding of forest ecology and forestry. It investigates tree anatomy and basic physiology, forest types and distributions across the Earth, ecological processes and species adaptations, forests of the United States and the history of their use, California forests and major tree species, soils, fire ecology and natural selection, and pests and diseases of forest trees. Additional topics include the role of fire in forest management, the science of silviculture and forestry, forest management and harvest techniques, history of the forest conservation movement, and current issues and policies related to forest resource use. Field trips are required.

NATR 305 Fisheries Ecology and Management

Units: 4
Hours: 54 hours LEC; 54 hours LAB
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; OR ESLR 340 AND ESWL 340; AND eligible for transfer-level math.
Transferable: CSU
General Education: AA/AS Area IV; CSU Area B2; CSU Area B3

This course covers the fundamentals of marine and freshwater fisheries, ecosystems, and their impacts on society and the environment. Fish life history, ecology, habitats, and population dynamics are examined. Fisheries' sustainability issues are investigated, including environmental, ecological, economic, and social aspects. Commercial and recreational fisheries management and aquaculture are covered. Field trips are required.

NATR 306 Introduction to Rangeland Ecology and Management

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: None.
Transferable: CSU
General Education: AA/AS Area IV; CSU Area B2

This course introduces the science of range ecology and management. It covers ecological principles that apply to rangeland ecosystems and their conservation and management, as well as the history of rangelands and their management. This course focuses on the interactions among the different components of rangelands: soils, plants, non-human animals, and people. The effects of different management systems on ecosystem services provided by rangelands are studied, including food, fiber, fuel, water, habitat, and carbon sequestration. In addition, it explores current issues and research surrounding rangeland conservation, sustainability, restoration, and climate change. Field trips are required.

NATR 307 Principles of Sustainability

Units: 4
Hours: 54 hours LEC; 54 hours LAB
Prerequisite: None.
Transferable: CSU; UC
General Education: AA/AS Area V(b); CSU Area D7; Cal-GETC Area 4 (effective Fall 2025); IGEC Area 4

Theoretical and practical aspects of sustainability are explored including social, economic, and environmental dimensions. Sustainable principles and practices are examined in the context of energy production and consumption, transportation systems, food production, water resources, industry, and the built environment. The environmental as well as social and cultural impact of industrialization is addressed, and solutions to current problems are discussed. Field trips may be required.
NATR 310 Study Design and Field Methods

Units: 4
Hours: 54 hours LEC; 54 hours LAB
Prerequisite: None.
Advisory: NATR 300; MATH 120 or higher; eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; OR ESLR 340 AND ESLW 340.
Transferable: CSU
General Education: AA/AS Area IV; CSU Area B2; CSU Area B3

This course addresses study design and field methods important to the field of natural resources. It covers basic statistical approaches and sampling designs, and introduces a variety of sampling and monitoring protocols and techniques. Field labs provide practice with a variety of hands-on methods for vertebrate study, vegetation assessment, land survey, and aquatic studies. Specific portions of the course focus on (1) survey skills including distance and direction measurement, topographic map reading, and Geographic Information Systems (GIS); (2) woody and herbaceous vegetation sampling strategies such as transect and quadrat, and habitat assessment; (3) methods used in terrestrial vertebrate wildlife studies, such as radio telemetry, remote cameras, and live-trapping; and (4) techniques specific to aquatic ecology and water quality measurements. It also includes applications of GIS and Global Positioning Systems (GPS). Field trips may be required.

NATR 320 Principles of Ecology

Units: 4
Hours: 54 hours LEC; 54 hours LAB
Prerequisite: None.
Transferable: CSU; UC
General Education: AA/AS Area IV; CSU Area B2; CSU Area B3; Cal-GETC Area 5B (effective Fall 2025); Cal-GETC Area 5C (effective Fall 2025); IGETC Area 5B; IGETC Area 5C

This course covers basic principles of ecology, including the physical and biological factors of different environments in relation to the distribution and abundance of plants and animals. Emphasis is on the management of ecosystems using ecological principles and the understanding of current ecological issues. Field trips are required.

NATR 322 Environmental Restoration

Units: 2
Hours: 27 hours LEC; 27 hours LAB
Prerequisite: None.
Advisory: NATR 300, 302, 310, 320, and 330
Transferable: CSU

This course covers fundamental principles and practices of environmental restoration—the process in which a damaged resource is renewed biologically, structurally, and functionally. Topics include both the causes of ecological degradation and biodiversity loss, as well as the science of development, management, monitoring, and sustainability of restored environments. Ecological principles, ecosystem processes, and biological interactions are covered in the context of restoration of wildlands and more urbanized areas. The course emphasizes hands-on experience with a variety of restoration techniques and materials in diverse habitats. Previously restored habitats in the Sacramento region are explored and current restoration sites are evaluated. Field trips may be required.

NATR 324 Field Studies: Birds and Plants of the High Sierra

Units: 1.5
Hours: 9 hours LEC; 54 hours LAB
Prerequisite: None.
Transferable: CSU; UC

This field study course focuses on identification, distribution, abundance, ecological relationships, and conservation of bird and plant communities of the High Sierra. Primary environments explored include montane chaparral, riparian woodland, coniferous forest, montane bog and fen, rocky outcrop, montane meadow, subalpine woodland, and alpine tundra. Emphasis is placed on the natural history and life history characteristics of common birds and plants, as well as rare and endangered species and their conservation challenges. Field trips are required.

NATR 330 Native Trees and Shrubs of California

Units: 4
Hours: 54 hours LEC; 54 hours LAB
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; OR ESLR 340 AND ESLW 340
Transferable: CSU; UC
General Education: AA/AS Area IV

This dendrology course covers classification and ecology of major natural plant communities of California and their component tree and shrub species. Emphasis is placed on biotic and abiotic factors of native woody plant distribution and abundance in northern California, focusing on characterization of the dominant vegetation types and identification of native woody species. Major topics include plant adaptation, evolution, and diversity in time and space; morphology and physiology; life history; soils, climate, and topography; endemism; interspecific and intraspecific interactions; invasive species; disease; anthropogenic and natural environmental change; human uses of native plants; and native plant restoration and conservation. This course involves the creation of a plant collection including at least 60 representative native woody species. Field trips are required.

NATR 332 Wildflowers of California

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: None.
Advisory: NATR 330
Transferable: CSU; UC
General Education: AA/AS Area IV

This course investigates biology, ecology, conservation, and management in the context of California wildflowers. Field labs focus on the California Floristic Province. The identification, distribution, and interrelationships of herbaceous plants in their natural environment, physical and biological influences, ecological relationships, and representative plant communities are examined. Special emphasis is given to the study of plant families in our local grasslands, vernal pools, oak woodlands, and foothills. Field trips may be required.

NATR 346 Water Resources and Conservation

Units: 3
Hours: 54 hours LEC
Prerequisite: MATH 120 with a grade of "C" or better
Transferable: CSU; UC
General Education: AA/AS Area IV

This course provides an introduction to water resource management with an emphasis on water issues in California. It explores current and projected water issues in California and introduces students to fundamental aspects of Hydrology and Hydrogeology. The course investigates surface water and groundwater systems, with an emphasis on the interdisciplinary nature of sustainable water resource management that balances urban, agricultural, industrial, and environmental water needs. It considers the implications of water rights and key water policies in evaluating how water is used and exploited. The course also explores concepts and practices of water budgeting for agriculture and domestic use.

NATR 495 Independent Studies in Natural Resources

Units: 1 - 3
Hours: 54 - 162 hours LAB
Prerequisite: None.
Transferable: CSU

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

NATR 498 Work Experience in Natural Resources

Units: 0.5 - 4
Hours: 30 - 300 hours LAB
Prerequisite: None.
Enrollment Limitation: Students must be in a paid or unpaid internship, volunteer position, or job related to natural resources with a cooperating site supervisor. Students are advised to consult with the Natural Resources Department faculty to review specific certificate and degree work experience requirements.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.
Transferable: CSU
General Education: AA/AS Area III(b)

This course provides students with opportunities to develop marketable skills in preparation for employment or advancement within the field of natural resources. It is designed for students interested in work experience and/or internships in transfer-level degree occupational programs. Course content includes understanding the application of education to the workforce, completion of Title 5 required forms which document the student's progress and hours spent at the work site, and developing workplace skills and competencies.

During the semester, the student is required to complete 37.5 hours of related paid work experience, or 30 hours of related unpaid work experience for 0.5 unit. An additional 37.5 or 30 hours of related work experience is required for each additional 0.5 units. All students are required to attend the first class meeting, a mid-semester meeting, and a final meeting. Additionally, students who have not already successfully completed a Work Experience course will be required to attend weekly orientations while returning participants may meet individually with the instructor as needed. Students may take up to 16 units total across all Work Experience course offerings. This course may be taken up to four times when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

NATR 499 Experimental Offering in Natural Resources

Units: 0.5 - 4
Prerequisite: None.

This is the experimental courses description.
Nursing and Allied Health

The Nursing program consists of a combination of general education and nursing courses with related laboratory experience in local health agencies. Successful completion of the program qualifies the student to take the National Licensing Examination to become registered as a nurse and eligible for employment. A grade of "C" or better is required in each nursing course for progression in the program and for an Associate Degree in Nursing. The nursing curriculum is a two-year program offered in four sequential semesters. There are two application periods per year and students are accepted for the spring and fall semesters. There are morning, afternoon, evening, and weekend clinical experiences required which may change with limited notice.

The nursing program at American River College is impacted; there are more students who apply than can be accepted into the program. All applicants with 70 points or more are put into the selection pool (see Prescreening Criteria Form for details). If an applicant is not chosen, the student may reapply the next nursing application cycle.

Startup program costs are approximately $7,000. The student is responsible for providing uniforms, laboratory fees, malpractice insurance, necessary equipment, and transportation to off-campus laboratory locations. Nursing program students should expect fees of approximately $575.00 to take the R.N. licensure exam. All costs/fees are subject to change.

Degrees and Certificates Offered

A.S. in LVN to RN Career Mobility
A.S. in Pre-Health Occupations
A.S. in Registered Nursing
Licensed Vocational Nurse (LVN) 30-unit option Certificate
Certified Nurse Assistant Certificate
Home Health Aide Certificate

Dean Narinedat Madramootoo
Department Chairs Lisa Parrinella
Phone (916) 484-8254
Email loucksa@arc.losrios.edu

Associate Degrees

A.S. in LVN to RN Career Mobility

Nursing is a health care profession that draws on nursing science, natural physical and biological sciences, as well as the social sciences and humanities. The Nursing Program consists of general education and nursing courses designed to prepare an entry-level registered nurse, who can function effectively in the rapidly changing healthcare environment. Simulated and actual patient centered learning experiences provide for application of concepts. Each semester of education builds upon previous learning.

This degree is designed for the California Licensed Vocational Nurse (LVN) who is admitted for advanced placement into the second year of the Registered Nursing (Associate Degree) Program. The graduate of the Associate Degree Nursing program at American River College demonstrates entry-level competencies and meets the educational requirements necessary to take the National Council Licensure Examination (NCLEX-RN) to become licensed as a Registered Nurse and eligible for employment.

A grade of "C" or better is required in each nursing course for progression in the program. Clinical experiences may change with limited notice and occur morning, afternoon, evening, and weekends. Students are responsible for their own transportation. Students are required to pay for uniforms, necessary equipment, malpractice insurance, background checks, drug testing, and health requirements.

Note: The California Board of Registered Nursing (BRN) protects the public by screening applicants for licensure in order to identify potentially unsafe practitioners. The law provides for denial of licensure for crimes or acts, which are substantially related to nursing qualifications, functions, or duties. At time of licensure application, all convictions must be reported except for minor traffic violation. (Business and Professions Code §480 and Nurse Practice Act ARTICLE 3 §2761)

Note: Providing a Social Security Number (SSN) OR Individual Taxpayer Identification Number (ITIN): Pursuant to Business and Professions Code §30(c) the BRN will not process any application for licensure unless the applicant provides a SSN or ITIN. The Nursing Practice Act provides for a unified examination and licensing application. Once an applicant passes the examination, a license is automatically issued. Under these circumstances the BRN cannot accept applications for the examination and licensure without a SSN/ITIN.

Total Units: 76 - 77

1BIOL 430, 440, and 442 have prerequisites. Please check catalog course descriptions.

2Credit for NURSE 400 will be given after evaluation of LVN program transcripts.

3Credit for NURSE 410 will be given after evaluation of LVN program transcripts.

The LVN to RN Career Mobility Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education
requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Enrollment Eligibility

To be eligible for enrollment in the program, the student must meet the following criteria:

- Possession of a current clear and active California Licensed Vocational Nurse (LVN) license at the time of application and through program completion.
- A grade of "C" or better and a cumulative G.P.A. of 3.0 in the following science prerequisites: BIOL 430, BIOL 431, and BIOL 440 or 442.
- A grade of "C" or better and a cumulative G.P.A. of 2.5 in the following prerequisite courses: ANTH 310, ANTH 481, SOC 300, or SOC 480; ENGWR 300 or ENGWR 480; NUTRI 300; PSYC 300 or PSYC 480; and COMM 301.
- Completion of the latest edition of the Test of Essential Academic Skills (TEAS), developed by the Assessment Technologies Institute, LLC (ATI). A minimum composite score is necessary to be eligible for application to the program. Additional information is available from the ARC Nursing website: http://www.arc.losrios.edu/~nursing/
- Note: In-progress grades are not accepted for prerequisite courses.
- Note: The Nursing Admissions Committee will determine acceptance of pre-nursing courses taken outside the Los Rios Community College District.
- Note: The American River College Nursing Program reserves the right to make changes in the enrollment criteria, academic requirements, grading standards and other processes without notice at any time.

Enrollment Process

Eligible students are selected for the program according to the following steps:

- Applicants must obtain a Los Rios Community College District student identification number in order to access the online application.
- Detailed information about program requirements, enrollment criteria, enrollment applications and deadlines are available on the ARC Nursing website at www.arc.losrios.edu/ARC_Majors/Health_And_Education/Nursing.htm.
- Applications for enrollment, transcripts, and all other supporting documents must be submitted by the posted due date for the candidate's application to be reviewed, and potentially placed into the pool for random selection. Only students who meet the educational and pre-nursing requirements and follow the enrollment procedures will be considered for the program.
- Only students who meet the educational and pre-nursing requirements and follow the pre-enrollment procedures will be considered for the program. Meeting all these requirements does not guarantee acceptance into the program.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- use clinical reasoning and knowledge based on the nursing program of study, evidence based practice outcomes, and research based policies and procedures as the basis for decision-making and delivery of comprehensive, safe, patient-centered care.
- use information and technology to communicate, manage knowledge, and mitigate error.
- participate in quality improvement activities to measure patient outcomes, identify hazards and errors, and to improve care.
- coordinate, collaborate, and communicate with diverse patients, families, and the interdisciplinary healthcare team to plan, deliver, and evaluate care that promotes quality of life.
- demonstrate delegation, management, and leadership skills that integrate systems thinking, communication, and change processes.
- demonstrate behavior that reflects the values of the nursing profession including self-awareness, a spirit of inquiry, leadership, ethical comportment, effective communication, clinical judgment and competence, and mentorship.
- adhere to standards of practice within legal, ethical, and regulatory frameworks of the professional nurse.

Career Information

“Employment of registered nurses is projected to grow 16 percent from 2014 to 2024, much faster than the average for all occupations. Growth will occur for a number of reasons, including an increased emphasis on preventive care; growing rates of chronic conditions, such as diabetes and obesity; and demand for healthcare services from the baby-boom population, as they live longer and more active lives” (Bureau of Labor Statistics, Dec. 2015, Job Outlook Registered Nurse. Retrieved from www.bls.gov/ooh/healthcare/registered-nurses.htm).

A.S. in Pre-Health Occupations

This degree prepares students interested in a variety of Allied Health occupations. The degree will prepare students with a rigorous course of study prior to selecting the program of their chosen career. Students will complete coursework with an emphasis on basic science, healthcare delivery and culturally competent patient care. Students completing the degree will be prepared to enter programs for careers in Diagnostic Medical Sonography, Medical Assisting, Health Information Technology, Nursing and others. Students may also choose to complete this degree in preparation for transfer to a Health Sciences Baccalaureate degree program. Completion of the degree does not guarantee enrollment in any health occupation program.

The Pre-Health Occupations Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education.
requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- articulate career options and necessary educational pathways.
- describe the structure and function of each body system.
- demonstrate a workable knowledge of medical language.
- demonstrate professionalism in a range of clinical interactions and settings.
- describe the principles of nutrition and their effect on health.
- describe the role that culture and diversity play in patient care.

Career Information

Upon completion students are prepared to enter a range of Allied Health and Nursing training programs. This may include training programs for professions such as: nursing, dental hygiene, physical therapy assistant, occupational therapy assistant, respiratory therapy, and radiology technician.

A.S. in Registered Nursing

Nursing is a health care profession that draws on nursing science, natural physical and biological sciences, as well as the social sciences and humanities. The Nursing Program consists of general education and nursing courses designed to prepare an entry-level registered nurse, who can function effectively in the rapidly changing healthcare environment. Simulated and actual patient centered learning experiences provide for application of concepts. Each semester of education builds upon previous learning. The graduate of the Associate Degree Nursing program at American River College demonstrates entry-level competencies and meets the educational requirements necessary to take the National Council Licensure Examination (NCLEX-RN) to become licensed as a Registered Nurse and eligible for employment.

A grade of "C" or better is required in each nursing course for progression in the program. Clinical experiences may change with circumstances the BRN cannot accept applications for the examination. Upon completion of the latest edition of the Test of Essential Academic Skills (TEAS), developed by the Assessment Technologies Institute, LLC (ATI). A minimum composite score is necessary to be eligible for application to the program.

1ANTH or SOC must be taken either prior to or concurrently with NURSE 410.
2BIOL 430, 440, and 442 have prerequisites. Please check catalog course descriptions.
3COMM 301 must be taken either prior to or concurrently with NURSE 400.

The Registered Nursing Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Enrollment Eligibility

To be eligible for enrollment in the program, the student must meet the following criteria:

- Graduation from an accredited high school or successful completion of General Education Development (GED) or California High School Proficiency Exam (CHSPE). Graduates from outside the United States must have transcripts evaluated by an approved independent agency. These requirements are defined by the Nurse Practice Act, California Code of Regulations, Title 16, Division 14, ARTICLE 1, §1412.
- A grade of "C" or better and a cumulative G.P.A. of 3.0 in the following science prerequisites: BIOL 430, BIOL 431, and BIOL 440 or BIOL 442.
- A grade of "C" or better and a cumulative college GPA of 2.5 in the following courses: ENGWR 300 or ENGWR 480, NUTRI 300, and PSYC 300 or PSYC 480.
- Completion of the latest edition of the Test of Essential Academic Skills (TEAS), developed by the Assessment Technologies Institute, LLC (ATI). A minimum composite score is necessary to be eligible for application to the program.
- Note: In-progress grades are not accepted for prerequisite courses.
- Note: The Nursing Admissions Committee will determine acceptance of pre-nursing courses taken outside the Los Rios Community College District.
- Note: The American River College Nursing Program reserves the right to make changes in the enrollment criteria, academic requirements, grading standards and other processes without notice at any time.
Enrollment Process

Eligible students are selected for the program according to the following steps:

- The Associate in Science Degree Registered Nursing Program at American River College uses a multi-criteria enrollment process. Students must reapply each semester. There is no waiting list.
- Detailed information about program requirements, enrollment criteria, enrollment applications and deadlines are available on the ARC Nursing website at www.arc.losrios.edu/ARC_Majors/Health_And_Education/Nursing.htm
- Applicants must obtain a Los Rios Community College District student identification number in order to access the online application.
- Applications for enrollment, OFFICIAL transcripts, and all other supporting documents must be submitted by the posted due date for the candidate's application to be reviewed, and potentially placed into the pool for random selection. Only students who meet the educational and pre-nursing requirements and follow the enrollment procedures will be considered for the program. Meeting all these requirements does not guarantee acceptance into the program.
- Students wishing to transfer into the second, third, or fourth semester of the nursing program must contact the department office at (916) 484-8254. The office will provide a transfer packet and current information on space availability.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- use clinical reasoning and knowledge based on the nursing program of study, evidence based practice outcomes, and research based policies and procedures as the basis for decision-making and delivery of comprehensive, safe, patient centered care.
- use information and technology to communicate, manage knowledge, and mitigate error.
- participate in quality improvement activities to measure patient outcomes, identify hazards and errors, and to improve care.
- coordinate, collaborate, and communicate with diverse patients, families, and the interdisciplinary healthcare team to plan, deliver, and evaluate care that promotes quality of life.
- demonstrate delegation, management, and leadership skills that integrate systems thinking, communication, and change processes.
- demonstrate behavior that reflects the values of the nursing profession including self-awareness, a spirit of inquiry, leadership, ethical comportment, effective communication, clinical judgment and competence, and mentorship.
- adhere to standards of practice within legal, ethical, and regulatory frameworks of the professional nurse.

Career Information

"Employment of registered nurses is projected to grow 16 percent from 2014 to 2024, much faster than the average for all occupations. Growth will occur for a number of reasons, including an increased emphasis on preventive care; growing rates of chronic conditions, such as diabetes and obesity; and demand for healthcare services from the baby-boom population, as they live longer and more active lives" (Bureau of Labor Statistics, Dec. 2015. Job Outlook Registered Nurse. Retrieved from www.bls.gov/ooh/healthcare/registered-nurses.htm).

Certificate of Achievement

Licensed Vocational Nurse (LVN) 30-unit option Certificate

The LVN 30-unit option program, which is required by the Board of Registered Nursing (California Code of Regulations §1429), provides the Licensed Vocational Nurse (LVN) the opportunity to take the National Council Licensure Examination (NCLEX-RN) once the registered nursing course requirements have been met and without meeting the degree requirements for the Associate in Science Degree. This option does not satisfy American River College's Nursing Program requirements nor lead to an Associate of Science Degree in Nursing.

A grade of “C” or better is required in each nursing course for progression in the program. Clinical experiences may change with limited notice and occur morning, afternoon, evening, and weekends. Students are responsible for their own transportation. Students are required to pay for uniforms, necessary equipment, malpractice insurance, background checks, drug testing, and health requirements.

Note: The California Board of Registered Nursing (BRN) protects the public by screening applicants for licensure in order to identify potentially unsafe practitioners. The law provides for denial of licensure for crimes or acts, which are substantially related to nursing qualifications, functions, or duties. At time of licensure application, all convictions must be reported except for minor traffic violation. (Business and Professions Code §480 and Nurse Practice Act ARTICLE 3 §2761).

Note: Providing a Social Security Number (SSN) OR Individual Taxpayer Identification Number (ITIN): Pursuant to Business and Professions Code §30(c) the BRN will not process any application for licensure unless the applicant provides a SSN or ITIN. The Nursing Practice Act provides for a unified examination and licensing application. Once an applicant passes the examination, a license is automatically issued. Under these circumstances the BRN cannot accept applications for the examination and licensure without a SSN/ITIN.

1 BIOL 430, 440, and 442 have prerequisites. Please check catalog course descriptions.

Enrollment Eligibility

To be eligible for enrollment in the program, the student must meet the following criteria:

- Possession of a current clear and active California Licensed Vocational Nurse (LVN) license at the time of application and through program completion.
- Completion of a minimum of six months recent LVN work experience.
- A grade of “C” or better and a cumulative G.P.A. of 3.0 in the following science prerequisites: BIOL 430, BIOL 431, and BIOL 440 or BIOL 442.
- Note: In-progress grades are not accepted for prerequisite courses.
- Note: The Nursing Admissions Committee will determine acceptance of pre-nursing courses taken outside the Los Rios Community College District.
- Note: The American River College Nursing Program reserves the right to make changes in the enrollment criteria, academic...
requirements, grading standards and other processes without notice at any time.

Enrollment Process

Eligible students are selected for the program according to the following steps:

- Contact the Nursing Department at 916-484-8254 for an appointment with the Program Director. Objective counseling of this option and individual evaluation will occur at the appointment.
- Provide unofficial transcripts and course descriptions of physiology, microbiology, and previous LVN program at the appointment.
- Meeting these requirements does not guarantee acceptance into the program. Entry is subject to space availability.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- use clinical reasoning and knowledge based on the nursing program of study, evidence based practice outcomes, and research based policies and procedures as the basis for decision-making and delivery of comprehensive, safe, patient centered care.
- use information and technology to communicate, manage knowledge, and mitigate error.
- participate in quality improvement activities to measure patient outcomes, identify hazards and errors, and to improve care.
- coordinate, collaborate, and communicate with diverse patients, families, and the interdisciplinary healthcare team to plan, deliver, and evaluate care that promotes quality of life.
- demonstrate delegation, management, and leadership skills that integrate systems thinking, communication, and change processes.
- demonstrate behavior that reflects the values of the nursing profession including self-awareness, a spirit of inquiry, leadership, ethical comportment, effective communication, clinical judgment and competence, and mentorship.
- adhere to standards of practice within legal, ethical, and regulatory frameworks of the professional nurse.

Career Information

The State of California provides the LVN with an option to take the National Council Licensure Examination (NCLEX-RN) after completing 30 college semester units. The LVN seeking this path to RN licensure will not receive a degree and this may impact employment opportunities. Additionally, reciprocal RN licensure in other states may be affected. LVNs considering moving out-of-state are encouraged to consult with that state’s board of nursing for RN licensure requirements before committing to the 30-unit option.

Certificates

Certified Nurse Assistant Certificate

The Certified Nurse Assistant (CNA) certificate program provides instruction in the holistic care and health needs of people over 65 years of age, who live in long-term care facilities. Students who successfully complete the program receive a certificate of course completion and become eligible to take the California state exam to become a certified nurse assistant.

Enrollment Eligibility

To be eligible for enrollment in the program, the student must meet the following criteria:

- The program reserves the right to make changes in the enrollment criteria, academic requirements, grading standards, and other processes without notice at any time.
- Students must complete course AH 110 with a "C" or better.
- Student will be required to submit a negative TB skin test completed within 90 days prior to class entrance or a negative chest x-ray completed within 90 days prior to class entrance.
- Spring semester student must submit proof of having a current influenza vaccine to participate in clinical experiences. Fall semester student must obtain an influenza vaccine when the vaccine becomes available.
- Student must submit a completed health history and physical exam completed within 90 days prior to class entrance. Physical exam must clear student to fully participate in clinical labs. Student must use and submit the ARC Nurse Assistant Medical Form.
- Student must meet the California Department of Public Health (CDPH) regulation that requires the student be able to listen, comprehend, and respond appropriately, both verbally and in action, to the English language at a minimum sixth grade level.
- CNA student-applicants must obtain a criminal screening prior to acceptance into the course.

Enrollment Process

Eligible students are selected for the program according to the following steps:

- Read the application process located at the ARC Nursing Department website and follow the directions.
- Admission to the course is by department consent only and determined after review of the applications.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- explain the California Administrative Code, Title XXII, Section 72527, as it relates to the role and responsibilities of the Certified Nursing Assistant regarding professionalism, ethics, and confidentiality.
- discuss resident rights, appropriate interaction with residents, families, and other members of the health care team.
- describe and demonstrate rehabilitation and restorative care with proper and safe body mechanics.
- explain what constitutes an emergency and the basics of emergency care required of a Certified Nurse Assistant.
- discuss and practice basic restraint use and associated safety measures and alternatives to restraints.
- differentiate common therapeutic diets.
- discuss and demonstrate basic care procedures required of a Certified Nurse Assistant.
- state and demonstrate protective measures to prevent the spread of infection.
Career Information

Certified Nurse Assistants (CNA) have a wide variety of work opportunities. The most common work placement is in long-term care facilities. Additionally, CNA work may be found in acute care settings, assisted care facilities, and rehabilitation care centers.

Home Health Aide Certificate

This certificate expands on previously learned Certified Nurse Assistant (CNA) theory to incorporate the holistic care and health needs of the elderly homebound person. This program introduces the student to the roles and responsibilities of the home health aide. Students who successfully complete the course will receive a Certificate of Completion from the instructor. The State of California will certify the CNA as a Home Health Aide after successful course completion and without further testing.

Note: More information is available about NURSE 101 at the ARC nursing website in the NURSE 101 course information packet.

1 Student must submit one of the following items prior to the start of class: (A.) A copy of a current Certified Nurse Assistant (CNA) certificate (B) Be currently enrolled in a CNA course at ARC.

Enrollment Eligibility

To be eligible for enrollment in the program, the student must meet the following criteria:

- Proof of having completed a CA approved nurse assistant course or proof of current California nurse assistant certification.
- have a completed health history and physical exam done within 90 days prior to the start of class. The health history and physical exam must be signed by the student and the health care provider. Physical exam must clear student to fully participate in clinical labs. Student must use the ARC Nurse Assistant Medical form provided.
- provide a Tuberculin [TB] skin clearance test within 90 days prior to start of class, or submit a TB clearance chest x-ray within 90 days prior to start of class.
- proof of current influenza vaccine and other required vaccines.
- proof of criminal clearance before entering the NURSE 101 class.

Enrollment Process

Eligible students are selected for the program according to the following steps:

- Student must submit completed, time-sensitive prerequisites. Student must refer to the ARC Nursing website, NURSE 101 information for complete information about course prerequisites and prerequisite submission deadline.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- explain and discuss the roles and responsibilities of the Home Health Aide (HHA).
- discuss and demonstrate documentation requirements of the HHA.
- describe how culture, religious/spiritual needs, lifestyle, and life experiences of the client and family can influence care provided by the HHA.
- describe and discuss the signs and symptoms of common diseases and disorders of the homebound client.
- provide basic personal care needs and a clean, safe, and healthy environment for the homebound client.

Career Information

The Home Health Aide may expand on the CNA work experiences and settings to include the homebound client.

Allied Health (AH) Courses

AH 112 Strategies for Student Success in Health Occupations

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.
General Education: AA/AS Area III(b)

This course provides realistic and useful strategies to enhance success in reaching career goals associated with health occupations. It covers the necessary skills to determine a career path based on a realistic understanding of specific health occupations and associated aptitudes.

AH 299 Experimental Offering in Allied Health

Units: 0.5 - 4
Prerequisite: None.

This is the experimental courses description.

AH 311 Medical Language for Health-Care Providers

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Transferable: CSU

This course is an orientation to medical language. It covers the basic structure of medical terms and their components: prefixes, suffixes, roots, and combining forms with emphasis on meaning, spelling, and pronunciation. This course also builds a medical vocabulary applicable to the specialties of medicine, the systems of the body, names of major diseases, and terms used in physical examination, diagnosis, and treatment. This course was formerly known as AH 110, and is not open to students who have completed AH 110.

Nursing (NURSE) Courses

NURSE 100 Nurse Assistant

Units: 7
Hours: 86 hours LEC; 120 hours LAB
Prerequisite: AH 311 with a grade of "C" or better
Enrollment Limitation: Acceptance into the CNA Program.

This course leads to the nurse assistant certification exam. It emphasizes the gerontological nursing assistant's role and responsibilities as a healthcare team member. It also covers principles of asepsis, infection control, resident care skills, and emotional, social, and spiritual needs of the resident.
NURSE 101 Home Health Aide

Units: 2
Hours: 27 hours LEC; 27 hours LAB
Prerequisite: Proof of having completed a CA approved nurse assistant course or proof of current California nurse assistant certification

This course focuses on home health aide responsibilities: personal and rehabilitation nursing care in the home, skills of maintaining a safe home environment, meal planning and preparation, emotional care of the homebound, and home emergency procedures. This course's information is available on-line at the ARC Nursing Program website.

NURSE 299 Experimental Offering in Nursing

Units: 0.5 - 4
Prerequisite: None.

This is the experimental courses description.

NURSE 305 Transition to Nursing, Patient, and Healthcare Concepts for the Associate Degree Nurse

Units: 5
Hours: 54 hours LEC; 108 hours LAB
Prerequisite: None.
Enrollment Limitation: Acceptance into the career mobility track of the Associate Degree Nursing Program.
Transferable: CSU

This bridge course is designed for the California Licensed Vocational Nurse (LVN) who is admitted for advanced placement into the second year of the Associate Degree Nursing (Registered Nursing) Program. It introduces the concept based curriculum and the knowledge, skills, and attitudes essential to nursing. It focuses on nursing management of the patient's response to health alterations as well as health promotion through the application of nursing knowledge, nursing process, and evidence based practice. The clinical laboratory experience is designed to facilitate the development of the core competencies of clinical practice: communication, leadership, patient centered care, professionalism, safety, teamwork and collaboration, evidence based practice, informatics and technology, and quality improvement. Emphasis is placed on health assessment across the lifespan, family communication, patient education, teamwork and collaboration, role transition, clinical judgment, and management of care.

NURSE 310 Pharmacology and Implications for Health Care Practitioners

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Transferable: CSU

This course presents the principles of drug therapy as they apply to treating disease and maintaining health. It covers the metabolism and action of drugs, absorption, duration of action, distribution in the body, and adverse drug reactions. Major drug classes are included, as well as their related implications for people receiving these drugs and the effects on the body. This course also includes discussions on the administration of medications according to nursing professional standards and other health care professionals.

NURSE 320 Medical Dosage Calculations

Units: 1.5
Hours: 27 hours LEC
Prerequisite: None.
Advisory: MATH 25 and 41
Transferable: CSU

This course prepares health professionals to calculate oral and parenteral drug dosages with a focus on safety and accuracy. Three systems of measurement and conversion are practiced. This course also provides experience in understanding drug orders and drug labels. Calculation accuracy is emphasized by clinical scenarios and case study assignments.

NURSE 370 Focused Learning in the First Year of the ARC Nursing Program

Units: 1.5
Hours: 27 hours LEC
Prerequisite: None.
Corequisite: NURSE 400
Transferable: CSU

This course offers strategies to enhance student success in the first year of the Associate Degree Nursing (ADN) program. It provides an assessment of personal aptitudes, learning styles, strengths, and weaknesses in written and verbal communication, and potential barriers to successful completion of the nursing program. It also provides the development of personal and professional support systems and development of a purposeful analytic process that supports reasoned decisions and judgments as a health care professional. Pass/No Pass only.

NURSE 372 Focused Learning in the Second Year of the ARC Nursing Program

Units: 1.5
Hours: 27 hours LEC
Prerequisite: None.
Corequisite: NURSE 420 or 430
Transferable: CSU

This course offers strategies to enhance student success in the second year of the Associate Degree Nursing (ADN) program. This course reviews personal aptitudes, learning styles, strengths, and weaknesses in written and verbal communication as well as potential barriers to completion of the nursing program. Course content addresses the specific theory and clinical needs of NURSE 420 and NURSE 430 while focusing on the development of critical thinking skills used when managing a group of patients in the clinical setting. Pass/No Pass only.

NURSE 400 Nursing, Patient, and Healthcare Concepts I

Units: 10.5
Hours: 81 hours LEC; 324 hours LAB
Prerequisite: None.
Corequisite: COMM 301
Enrollment Limitation: Acceptance into the Associate Degree Nursing Program
Transferable: CSU

This course introduces essential concepts of safe and effective nursing care for patients across the lifespan, utilizing the nursing process and evidence based practice. It focuses on the introduction of the wellness/illness continuum and the core competencies of clinical practice. The competencies include communication, leadership, patient centered care, professionalism, safety, teamwork and collaboration, evidence based practice, informatics and technology, and quality improvement. The clinical experience is designed to facilitate the fundamental acquisition of the core competencies of clinical practice. Emphasis in clinical is placed on health assessment across the lifespan, recognition of alterations from the norm, safety for patients and providers of care, interpersonal communication, patient centered care, ethics, and safe, evidence based technical skill interventions.

NURSE 410 Nursing, Patient, and Healthcare Concepts II

Units: 10.5
Hours: 81 hours LEC; 324 hours LAB
**Prerequisite:** COMM 301 and NURSE 400 with grades of "C" or better  
**Corequisite:** ANTH 310, ANTH 481, SOC 300, or SOC 480  
**Transferable:** CSU

This course applies concepts of safe and effective nursing care for diverse children, adults, and families, concentrating on healthcare needs on the wellness/illness continuum across the lifespan. It focuses on nursing management of the patient’s response to health alterations as well as health promotion for childbearing and childrearing families through the application of nursing knowledge, nursing process, and evidence based practice. The clinical experience is designed to facilitate the development of the core competencies of clinical practice: communication, leadership, patient centered care, professionalism, safety, teamwork and collaboration, evidence based practice, informatics and technology, and quality improvement. Emphasis is placed on family communication, patient education, teamwork and collaboration, clinical judgment, and management of care.

**NURSE 420 Nursing, Patient, and Healthcare Concepts III**

**Units:** 10.5  
**Hours:** 81 hours LEC; 324 hours LAB  
**Prerequisite:** NURSE 305 or 410 with a grade of "C" or better; SOC 300 or SOC 480, or ANTH 310 or ANTH 481, with a grade of "C" or better.  
**Transferable:** CSU

This course adapts concepts of safe and effective nursing care for diverse adults experiencing acute and chronic alterations across the wellness/illness continuum. It focuses on nursing management of the adult patient’s response to physical and mental health alterations through the application of nursing knowledge, nursing process, and evidence based practice. The clinical experience is designed to facilitate the development of the core competencies of clinical practice: communication, leadership, patient centered care, professionalism, safety, teamwork and collaboration, evidence based practice, informatics and technology, and quality improvement. Emphasis is placed on clinical judgment, interprofessional communication, patient centered care, safety, and team collaboration.

**NURSE 430 Nursing, Patient, and Healthcare Concepts IV**

**Units:** 10.5  
**Hours:** 81 hours LEC; 324 hours LAB  
**Prerequisite:** NURSE 420 with a grade of "C" or better  
**Transferable:** CSU

This course integrates concepts of safe and effective nursing care for individuals and groups of patients across the lifespan. It is designed to facilitate integration of knowledge, evidence based practice, and clinical judgment in the management of patients with complex healthcare needs, and to facilitate the student's transition into the profession of nursing. Clinical judgment skills are enhanced through advanced clinical experiences and role transition opportunities. The clinical experience is designed to facilitate the development and demonstration of the core competencies of clinical practice: communication, leadership, patient centered care, professionalism, safety, teamwork and collaboration, evidence based practice, informatics and technology, and quality improvement. Emphasis in clinical is placed on evidence based practice, quality improvement, team collaboration concepts, managing care for groups of patients, the role of the nurse in a systems based practice, interprofessional collaboration, legal precepts, and health policy.

**NURSE 499 Experimental Offering in Nursing**

**Units:** 0.5 - 4  
**Prerequisite:** None.  
**Transferable:** CSU

This is the experimental courses description.
Nutrition and Foods

The Nutrition Department at ARC offers an academically rich, inclusive environment that inspires critical thinking, learning, and achievement. Students learn to apply evidence-based nutrition principles to improve health and quality of life. The Nutrition Associate’s Degree prepares students for transfer into programs such as Dietetics, Community Nutrition, and the Health Sciences. The Department also offers a wide variety of Nutrition courses to satisfy general education requirements.

Nutrition is a multi-dimensional field of study, and can lead to careers in:

1. Research – Academics, government
2. Clinical Nutrition and Counseling – Registered Dietitians (RD), Dietetic Technician, Registered (DTR)
3. Food Industry - Develop new foods, marketing and communications
4. Education – Develop programs, direct education to the public
5. Public Health – Create nutrition related policies, develop and promote nutrition education
6. Food Service – Dietary Manager, menu development, regulation and compliance with food safety

Degrees and Certificates Offered

A.S.-T. in Nutrition and Dietetics

Dietary Manager/Dietary Service Supervisor Certificate

Dean Narinedat Madramootoo
Department Chair Susan Chou
Phone (916) 484-8902

Associate Degree for Transfer

A.S.-T. in Nutrition and Dietetics

The Associate in Science in Nutrition and Dietetics for Transfer degree provides students with a major that fulfills the general requirements of the California State University for transfer. Students with this degree will receive priority admission with junior status to the California State University system. The Associate in Science in Nutrition and Dietetics for Transfer (AS-T) degree may be obtained by completion of 60 transferable, semester units with a minimum overall grade point average (GPA) of 2.0, including (a) a minimum grade of "C" (or "P") for each course in the major or area of emphasis described in the Required Program, and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education-Breadth Requirements.

Total Units: 26

Student Learning Outcomes

Upon completion of this program, the student will be able to:

• explain the principles of nutrition and their effects on overall health status and chronic disease risk.
• analyze nutritional adequacy of a diet and recommend dietary changes to meet nutrition guidelines.
• demonstrate an understanding of the relationships between chemistry, biology, and nutrition.
• assess the validity of sources of nutrition information.
• interpret the findings of current nutrition research.

Career Information

This degree is designed to facilitate students’ successful transfer to four-year colleges that prepare them to become registered dietitians. Organizations or companies that employ registered dietitians include hospitals, nursing homes, school food services, other health related facilities, college food service departments, restaurants, public health agencies, nutrition programs, WIC programs, Meals on Wheels, health clubs, weight management clinics, community wellness centers, food companies, contract food management companies, and food distribution companies.

Certificate of Achievement

Dietary Manager/Dietary Service Supervisor Certificate

The Dietary Manager/Dietary Service Supervisor Certificate provides certification for employment in nutritional care and dietary management within a health-care facility, such as a skilled nursing facility. This certificate program meets the California State Department of Health Service’s requirements for certification.

Nutrition (NUTRI) Courses

NUTRI 130 Introduction to Dietary Management
Units: 2  
Hours: 36 hours LEC  
Prerequisite: None.

NUTRI 132 Management of the Dietary Department in Health Care Facilities
Units: 3

NUTRI 133 Clinical Experience in Health Care Facilities
Units: 2.5

NUTRI 134 Nutritional Care Management
Units: 3

NUTRI 135 Clinical Experience in Nutritional Care Management
Units: 2.5

Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340.

This course provides an introduction to the profession of dietetics, with emphasis on a career as a dietary services supervisor (DSS). It examines current public policy and legislation related to the profession. It also includes the fundamentals of basic nutrition, individual’s nutritional needs throughout the life cycle, health promotion, and disease prevention.

NUTRI 132 Management of the Dietary Department in Health Care Facilities
Units: 3  
Hours: 54 hours LEC  
Prerequisite: NUTRI 130 with a grade of "C" or better  
Corequisite: NUTRI 133  
Enrollment Limitation: Current ServSafe Certification

This course reviews the standards of management and food preparation as they apply to the quantity of food production in health care facilities. Topics include types and components of food production systems, work flow, menu implementation, emergency planning, maintenance of equipment, food production procedures, dietary staff schedules, and management.

NUTRI 133 Clinical Experience in Health Care Facilities
Units: 2.5  
Hours: 18 hours LEC; 90 hours LAB  
Prerequisite: NUTRI 130 with a grade of "C" or better  
Corequisite: NUTRI 132  
Enrollment Limitation: Current TB clearance and other immunizations required by clinical facility.

This course offers clinical experience in health care facilities and is performed under professional supervision. Topics include residents’ rights in food service, disaster relief feeding programs, getting ready for state inspection, and injury and illness prevention programs. A portion of this course may be offered in a TBA component of 90 hours which will include professionally supervised clinical experience in dietary departments of acute care hospitals and long term care facilities.

NUTRI 134 Nutritional Care Management
Units: 3  
Hours: 54 hours LEC  
Prerequisite: NUTRI 130 with a grade of "C" or better  
Corequisite: NUTRI 135

This course is a study of nutrition therapeutic diets used in health care facilities. It emphasizes the modification of diets for various dietary needs of the long-term care resident.

NUTRI 135 Clinical Experience in Nutritional Care Management
Units: 2.5  
Hours: 18 hours LEC; 90 hours LAB  
Prerequisite: NUTRI 130 with a grade of "C" or better  
Corequisite: NUTRI 134  
Enrollment Limitation: Current TB clearance and other immunizations required by clinical facility.

This course provides clinical experience in nutritional care management. Topics include disorders of the gastrointestinal tract, diabetes, wasting disorders, nutrition, and mental health. A portion of this course may be offered in a TBA component of 90 hours which will include professionally supervised clinical experience in dietary departments of acute care hospitals and long term care facilities.

NUTRI 294 Topics in Nutrition and Foods
Units: 0.5 - 4
NUTRI 295 Independent Studies in Nutrition and Foods

Units: 1 - 3
Prerequisite: None.

This course provides opportunities to study current, controversial topics in nutrition which are either not included in current offerings or require emphasis beyond that offered in existing courses. A portion of this course may be offered in a TBA component of 4.5-27 hours which may include reading-peer reviewed research studies regarding a particular nutrition issue and formulating conclusions based upon study results and/or evaluating the scientific validity of a supplement claim.

NUTRI 299 Experimental Offering in Nutrition and Foods

Units: 0.5 - 4
Prerequisite: None.

This is the experimental courses description.

NUTRI 300 Nutrition

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340.
Transferable: CSU; UC
General Education: AA/AS Area III(b); AA/AS Area IV; CSU Area E1
C-ID: C-ID NUTR 110

This course is an in-depth study of the essential nutrients and their functions, and the chemical compositions of foods and their utilization in the body. It includes discussion of the nutritional values of foods, current topics in nutrition, and an individual's nutrition needs throughout the life cycle.

NUTRI 302 Nutrition for Physical Performance

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Transferable: CSU
General Education: AA/AS Area III(b); AA/AS Area IV

This course presents a comprehensive study of nutrition and fitness as they apply to fitness, sport skill training, and athletic performance. It includes an in-depth study of essential nutrients and functions, chemical compositions of foods and their use in the body as they relate to physical performance, muscle strength development, cardiovascular fitness, and body composition.

NUTRI 305 Nutrition for Health

Units: 2
Hours: 36 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340.

This course covers the basic principles of nutrition and the interactions between nutrition and fitness training. Topics include dietary practices and nutrient intake modifications that affect physical performance, including intake of energy nutrients, vitamins, water, electrolytes, and dietary supplements. It also covers the study of body weight and body composition, as well as factors that affect body weight and the effect of body composition on physical performance. This course is not open to students who have completed KINES 402.

NUTRI 307 Nutrition for Fitness

Same As: KINES 402
Units: 2
Hours: 36 hours LEC
Prerequisite: None.
Transferable: CSU

This course presents a study of nutrition and fitness designed to increase awareness of food, nutrition, and physical activity and their interrelationships. Topics include diet selection and food preparation. This course is designed for those interested in general wellness.

NUTRI 310 Cultural Foods of the World

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340.
Transferable: CSU; UC
General Education: AA/AS Area V(b); AA/AS Area VI; CSU Area D7; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4G

This course offers an anthropological perspective of traditional and contemporary food customs and cultures. Global food customs are compared including their social, religious, economic, and aesthetic significance. Topics include ethnocentrism, gender-related stereotypes, and racism as they relate to the availability, distribution, and preparation of food throughout the world. The course addresses the nutritional status of various cultures related to geographic, agricultural, and socioeconomic factors. This course is not open to students who have completed NUTRI 481.

NUTRI 319 Children's Health, Safety and Nutrition

Same As: ECE 415
Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340.
Transferable: CSU
C-ID: C-ID ECE 220

This course examines basic nutrition, health, and safety needs of children from the prenatal period through school age. Topics include introduction to early childhood curriculum, laws, regulations, standards, policies, and procedures related to child health, safety, and nutrition. It emphasizes integrating and maintaining the optimal health, safety, and nutritional concepts in everyday planning and program development for all children, along with the importance of collaboration with families and health professionals. This course is not open to students who have taken ECE 415.

NUTRI 324 Nutrition for Healthy Aging

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340.
Transferable: CSU
This course focuses on the nutrition of older adults. Topics include the effects of nutrition on health and well-being and physiologic changes in aging, the effects of smell and taste on nutritional status, age-related changes in the gastrointestinal tract, risk factors for cardiovascular disease, as well as cancer and nutrition. This course is not open to students who have completed GERON 340.

**NUTRI 481 Honors - Cultural Foods of the World**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** Placement into ENGWR 480 through the assessment process.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area V(b); AA/AS Area VI; CSU Area D; IGETC Area 4 (effective Fall 2025)

This seminar-style course offers an in-depth anthropological perspective of traditional and contemporary food customs and cultures. Global food customs are compared including their social, religious, economic, and aesthetic significance. Included are ethnocentrism, gender-related stereotypes, and racism as they relate to the availability, distribution, and preparation of food throughout the world. The nutritional status of various cultures as it relates to geographic, agricultural, and socioeconomic factors is studied. The specific cultural groups included are driven by student interests. This course is not open to students who have completed NUTRI 310.

**NUTRI 495 Independent Studies in Nutrition and Foods**

**Units:** 1 - 3  
**Hours:** 54 - 162 hours LAB  
**Prerequisite:** None.  
**Transferable:** CSU

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

**NUTRI 499 Experimental Offering in Nutrition and Foods**

**Units:** 0.5 - 4  
**Prerequisite:** None.  
**Transferable:** CSU

This is the experimental courses description.
Paramedic

Paramedicine is an allied health specialty whose practitioners respond to emergencies before a patient reaches a hospital, rendering basic and advanced medical treatment before and during transport to a medical facility. Classroom, clinical and field internship training prepares paramedics to assess and treat a wide variety of medical emergencies. The knowledge, skills and experience gained through the 12-month paramedic program allows students to meet the responsibilities outlined in the Department of Transportation’s Emergency Medical Services Education Standards.

Minimum Expectation goal

The minimum expectation goal of the ARC program is to prepare individuals to render pre-hospital advanced life support within an organized Emergency Medical Services (EMS) system.

Program Student Results/Outcomes and Positive Placement Data:

Paramedic Program with Outcomes CAAHEP Accredited Paramedic Programs and CoAEMSP Letter of Review (LoR) Programs track and report outcome measures annually to the Committee on Accreditation for the Emergency Medical Services Professions (CoAEMSP). The most recent CoAEMSP Annual Report was for the calendar year 2021. The most recent success rate for the National Registry of EMT Paramedic/State Cognitive exam was 100%. The most recent positive placement rate for graduates was 100%. Positive placement is defined by the CoAEMSP as ‘Employed full or part-time in a related field and/or continuing his/her education and/or serving in the military’. Positive placement is measured at completion of the program. The most recent retention rate was 68.4%.

The American River College Paramedic Program is accredited by the Commission on Accreditation of Allied Health Education Programs (https://www.caahp.org/) upon the recommendation of the Committee on Accreditation of Educational Programs for the Emergency Medical Services Profession (CoEMSP).

2024 Projected Program Costs

$46.00 per college unit. Students need to complete 46 college units for a total of $2116.00

Associated student fees:

• Required combined Textbooks and FISDAP Account is $850.00
• Required Background/Immunization Tracking program: $150.00

Immunization costs and background costs are extremely variable (based on student history) but would add to the cost. Occasionally local clinics provide low or no cost immunizations for students.

• Required Medical Liability $55.00 (paramedic)
• Parking: $60.00 (waived currently)
• Required Uniforms: approximately $100.00.
• Approximate total of known costs: $3271.00
• Unknown and changing costs are personal protective gear for clinical and field internships.

Degrees and Certificates Offered

A.S. in Paramedic

Paramedic Certificate

Emergency Medical Technician (EMT) Certificate

Dean Narinedat Madrakootoo

The Paramedic Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Enrollment Eligibility

To be eligible for enrollment in the program, the student must meet the following criteria:

• Graduation from an accredited high school in the United States, or successful completion of General Education Development (GED) or the California High School Proficiency Exam (CHSPE).
• Students with a high school diploma from a school outside the United States must have transcripts evaluated by an approved independent agency. Such cases will be evaluated on an individual basis.
• Current curriculum planning summary sheet within the semester in which the pre-enrollment packet is being submitted.
• Completion of the program application (pre-enrollment packet) and submittal prior to the deadline.
• Current certification as an Emergency Medical Technician-Basic and approximately one year verified EMS experience or a minimum of 280 verifiable EMS patient encounters acting as a team lead. See program website for examples of commonly acceptable experience and a patient encounter tracking form.
Enrollment Process

Eligible students are selected for the program according to the following steps:

- Pre-enrollment applications to the program may be obtained from the Health and Education Division office or at http://arc.losrios.edu/edhealth/paramed.html. Applications for Spring admission will be available in September and must be submitted to the division office no later than the first Friday in December by 4:00 p.m. Please refer to the Paramedic Information Sheet for the most current information.
- Only students who meet the educational requirements and follow the pre-enrollment procedures will be considered for the program. Meeting all of these requirements does not guarantee enrollment in the program.
- Class size is limited. If the pre-enrollment pool is greater than the program can accept, students are chosen based on a computerized random selection process from among the qualified candidates.
- Students accepted into the Paramedic program are required to have a physical examination, approved immunizations, drug screen, background check, program uniform, required learning materials, and malpractice insurance prior to deadlines set by the program.

Career Information

The ARC Paramedic program is designed to prepare the student for licensure as a paramedic, working for a fire department, rescue squad, private provider, industry, clinic or hospital.

Certificate of Achievement

Paramedic Certificate

Paramedicine is an allied health specialty whose practitioners respond to emergencies before a patient reaches a hospital, rendering basic and advanced medical treatment before and during transport to a medical facility. Enrollment Eligibility

To be eligible for enrollment in the program, the student must meet the following criteria:

- Graduation from an accredited high school in the United States, or successful completion of the General Education Development (GED or the California High School Proficiency Exam (CHSPE).
- Students with a high school diploma from a school outside the United States must have transcripts evaluated by an approved independent agency. Such cases will be evaluated on an individual basis.
- Current curriculum planning summary sheet within the semester in which the pre-enrollment packet is being submitted.
- Completion of the program application (pre-enrollment packet) and submittal prior to the deadline.
- Current certification as an Emergency Medical Technician-Basic and approximately one year verified EMS experience or a minimum of 280 verifiable EMS patient encounters acting as a team lead. See program website for examples of commonly acceptable experience and a patient encounter tracking form.

Enrollment Process

Eligible students are selected for the program according to the following steps:

- Pre-enrollment applications to the program may be obtained from the Health and Education Division office or at http://arc.losrios.edu/edhealth/paramed.html. Applications for Spring admission will be available in September and must be submitted to the division office no later than the first Friday in December by 4:00 p.m. Please refer to the Paramedic Information Sheet for the most current information.
- Only students who meet the educational requirements and follow the pre-enrollment procedures will be considered for the program. Meeting all of these requirements does not guarantee enrollment in the program.
- Class size is limited. If the pre-enrollment pool is greater than the program can accept, students are chosen based on a computerized random selection process from among the qualified candidates.
- Students accepted into the Paramedic program are required to have a physical examination, approved immunizations, drug screen, background check, program uniform, required learning materials, and malpractice insurance prior to deadlines set by the program.
Student Learning Outcomes
Upon completion of this program, the student will be able to:

- synthesize pre-arrival information and initial assessment findings to classify patient acuity.
- utilize support personnel and equipment to maximize scene and patient management.
- diagnose patient conditions using auditory, tactile, and visual senses.
- correlate signs and symptoms of common diseases to emergency patients and their primary complaint.
- formulate competent treatment plans for medical or trauma patients.
- report assessment findings, diagnosis, and treatment plans to appropriate health professionals.
- develop and implement strategies to strengthen personal empathy and sympathy for prehospital patients.
- apply ethical practices during all phases of an emergency medical response.
- demonstrate advanced life support skills competency as set by the National Registry of Emergency Medical Technicians.
- assess scene and personal safety before, during, and after each emergency response.
- compose accurate, timely and specific patient care reports in accordance with local, regional, and state documentation standards.

Enrollment Process
Eligible students are selected for the program according to the following steps:

- Verification of current American Heart Association Basic Life Support CPR certification. No other form of CPR certification is accepted. Students must be present and provide a copy of the AHA CPR certification on the first day of the course. Not open to students with current NREMT or California State certification or licensure as an EMT, EMT-Basic, Advanced EMT or paramedic.

Student Learning Outcomes
Upon completion of this program, the student will be able to:

- evaluate the nature and seriousness of the patient's condition or extent of injuries.
- apply emergency medical care based on assessments and findings.
- demonstrate proper procedures in lifting, moving, and positioning a patient to minimize discomfort and prevent further injury.
- utilize communicating, transporting, and record keeping skills.

Career Information
Emergency Medical Technicians operate in a variety of settings from public emergency services, private industry and health care facilities. EMT employment varies from community to community and is considered a growing occupation within the Allied Health professions.

Certificate
Emergency Medical Technician (EMT) Certificate
This program prepares students to function as certified Emergency Medical Technicians. Training topics include the skills necessary to provide emergency medical care at a basic life support level with a fire, ambulance, or other specialized service. This program is conducted in compliance with Title 22, Division 9, Chapter 2 of the California Code of Regulations and Emergency Medical Technician (EMT). A "C" or better is required to obtain a course completion certificate.

Enrollment Eligibility
To be eligible for enrollment in the program, the student must meet the following criteria:

- Documentation of current American Heart Association CPR Basic Life Support certification. No other form of CPR certification is accepted. Students must be present and provide a copy of the AHA CPR certification on the first day of the course. Not open to students with current NREMT or California State certification or licensure as an EMT, EMT-Basic, Advanced EMT or paramedic.

Paramedic (PMED) Courses

PMED 105 Prehospital Pharmacology
Units: 1  
Hours: 18 hours LEC  
Prerequisite: None.  
Advisory: MATH 32 or 42 with a grade of "C" or better AND Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.  
This course provides basic instruction in prehospital pharmacology and calculating medication dosages.

PMED 106 Emergency Medical Technician Pre-hospital Practices and Internship
Units: 6.5  
Hours: 36 hours LEC; 243 hours LAB  
Prerequisite: Current California State Emergency Medical Technician certification.  
Corequisite: NURSE 320 or PMED 105  
Enrollment Limitation: A background check, drug screening, proof of current immunizations and malpractice insurance are required. Current California State Emergency Medical Technician (EMT) Certification and Professional BLS CPR certification from the American Heart Association. Only AHA BLS CPR certification will be accepted.  
Advisory: AH 311, BIOL 102, ENGRD 116, ENGWR 101, and MATH 32  
This course provides expanded education in Emergency Medical Services (EMS) related topics, including assisting with Advanced Life Support (ALS) procedures as well as patient assessment and management training through patient simulation, clinical observation, and field experience. It can also serve as partial preparation for application to the American River College Paramedic Program.

PMED 108 Emergency Medical Response
Units: 3  
Hours: 45 hours LEC; 27 hours LAB
Prerequisite: None.

This course is an introduction to the principles and practices of the Emergency Medical Services (EMS). It provides the knowledge and skills needed to integrate the care provided through the EMS system. A certificate of completion is available upon successful completion of this course.

**PMED 110 Introduction to Advanced Prehospital Care**

**Units:** 12  
**Hours:** 144 hours LEC; 216 hours LAB  
**Prerequisite:** BIOL 102 and PMED 105 with grades of "C" or better  
**Enrollment Limitation:** Acceptance into the Paramedic Program  
**Advisory:** AH 311, HCD 114, MATH 32, and MATH 42; Eligible for ENGRD 310 or ENGRD 312 AND ENGRD 300; OR ESLW 340.

This course covers the didactic material and the related skills necessary to establish a foundation for subsequent prehospital patient assessment and management. Topics include preparatory, human body and human systems, pharmacology, patient assessment, airway management, trauma management, and respiratory and cardiac emergencies.

**PMED 114 Preparatory**

**Units:** 11  
**Hours:** 168 hours LEC; 108 hours LAB  
**Prerequisite:** EMT 110 and 111 with grades of "C" or better  
**Enrollment Limitation:** Acceptance into the Paramedic Program

This course covers didactic materials and related skills considered foundational to the practice of the paramedicine. The course topics include: EMS systems, the safety/well-being of the paramedic, medical legal/ethical, anatomical and physiology, pathophysiology of all human systems, medical terminology, oral communications, and life span development. This course considers principles of public health and epidemiology including public health emergencies, health promotion and illness and injury prevention. This course also integrates knowledge of pharmacology to formulate a treatment plan intended to mitigate emergencies and improve the overall health of the patient.

**PMED 115 Clinical Behavior, Patient Assessment, and Airway Management**

**Units:** 5  
**Hours:** 80 hours LEC; 30 hours LAB  
**Prerequisite:** PMED 114 with a grade of "C" or better  
**Enrollment Limitation:** Acceptance into the Paramedic Program

This course covers the didactic material and the related skills necessary to establish a foundation for subsequent prehospital clinical judgment, patient assessment and management. It also focuses on airway management, respiration and ventilation, primary and secondary assessments, therapeutic communication, cultural humility, professionalism, decision making, and team dynamics will be covered.

**PMED 120 Clinical Internship**

**Units:** 7  
**Hours:** 54 hours LEC; 216 hours LAB  
**Prerequisite:** PMED 110 with a grade of "B" or better  
**Enrollment Limitation:** Current Emergency Medical Technician certification. Current student enrolled in the Paramedic program.

This course provides an opportunity to apply the cognitive knowledge and psychomotor skills gained in PMED 110 to patient care in a hospital or other approved clinical setting. This course provides for increasing assessment techniques and advanced prehospital skills. Field trips may be required. A portion of this course may be offered in a TBA component of 216 hours which may include direct patient care in a clinical setting.

**PMED 121 Prehospital Medicine and Clinical Internship**

**Units:** 12.5  
**Hours:** 175 hours LEC; 168 hours LAB  
**Prerequisite:** PMED 115 with a grade of "C" or better  
**Enrollment Limitation:** Acceptance into the Paramedic Program

This course integrates assessment findings with principles of epidemiology and pathophysiology to formulate a clinical impression and implement a treatment/disposition plan for a patient with a medical complaint. The course also includes a clinical practicum with regional hospital partners.

**PMED 125 Introduction to Paramedicine**

**Units:** 5.5  
**Hours:** 45 hours LEC; 162 hours LAB  
**Prerequisite:** BIOL 102, PMED 105, and PMED 106 with grades of "C" or better  
**Enrollment Limitation:** Acceptance into the paramedic program. Successful completion a background, drug screen, and health physical exam as well as provide proof of current American Heart Association BLS Provider CPR certification and immunizations prior to enrollment into the course. Students must maintain current EMT licensure at all times throughout the course.  
**Advisory:** AH 311, ENGRD 116, ENGWR 101, HCD 114, and MATH 32

This course covers the didactic and psychomotor material necessary to establish a foundation for subsequent paramedic prehospital patient assessment and management. Topics include preparatory, human body and human systems, pharmacology, patient assessment, and airway management.

**PMED 126 Paramedic Practices I**

**Units:** 7  
**Hours:** 54 hours LEC; 216 hours LAB  
**Prerequisite:** PMED 125 with a grade of "C" or better  
**Enrollment Limitation:** Acceptance into the paramedic program. Current EMT licensure must be maintained at all times throughout the course.

This course covers the didactic and psychomotor material necessary to establish a foundation for emergency care for patients suffering from respiratory, cardiac, shock, and traumatic emergencies.

**PMED 127 Paramedic Practices II**

**Units:** 7  
**Hours:** 54 hours LEC; 216 hours LAB  
**Prerequisite:** PMED 126 with a grade of "C" or better  
**Enrollment Limitation:** Acceptance into the paramedic program. Current EMT licensure must be maintained at all times throughout the course.

This course covers the didactic and psychomotor material necessary to establish a foundation for emergency care for patients suffering from medical, obstetric, pediatric and neonatal emergencies.

**PMED 130 Prehospital Field Internship**

**Units:** 14  
**Hours:** 54 hours LEC; 600 hours LAB  
**Prerequisite:** PMED 120 with a grade of "B" or better  
**Enrollment Limitation:** Current EMT certification. Current student enrolled in the Paramedic program.

This course provides paramedic students with hands-on prehospital experiences and is the final course in the series preparing for a California paramedic license. Under the direct supervision and evaluation of a licensed paramedic or a mobile intensive care nurse, interns complete a prehospital field experience.
PMED 131 Trauma, Shock, EMS Operations, and Field Internship  
**Units:** 17.5  
**Hours:** 114 hours LEC; 603 hours LAB  
**Prerequisite:** PMED 121 with a grade of "C" or better  
**Enrollment Limitation:** Acceptance into the Paramedic Program

This course integrates assessment findings with principles of epidemiology and pathophysiology to formulate a field impression and implement a treatment/disposition plan for a patient with a traumatic complaint. The course also provides awareness of EMS operational practices, and includes a field practicum with regional Emergency Medical Services (EMS) partners.

PMED 140 Pediatric Advanced Life Support Certification  
**Units:** 0.5  
**Hours:** 6 hours LEC; 12 hours LAB  
**Prerequisite:** None.

This course provides education modules specific to pediatric emergencies for health care professionals. Certification in Pediatric Advanced Life Support (PALS) is granted to students who successfully complete the course.

PMED 142 Advanced Cardiac Life Support Certification  
**Units:** 0.5  
**Hours:** 6 hours LEC; 12 hours LAB  
**Prerequisite:** None.

**Enrollment Limitation:** Current Provider C Basic Cardiac Life Support Card, equivalent licensure as a paramedic, nurse, physician, or allied health professional, or current enrollment in the last semester of an allied health program.

This course provides education modules specific to adult cardiac emergencies for health care professionals. Certification in Advanced Cardiac Life Support (ACLS) is granted to students who successfully complete the course.

PMED 146 Prehospital Trauma Life Support  
**Units:** 0.5  
**Hours:** 5.5 hours LEC; 10.5 hours LAB  
**Prerequisite:** None.

**Enrollment Limitation:** Current licensure as an emergency medical technician (EMT), paramedic, nurse, physician, or allied health professional, or current enrollment in the last semester of an allied health program.

This course is designed to improve the quality of trauma care and decrease mortality by stressing the treatment of the multisystem trauma patient. It utilizes the internationally recognized National Association of EMTs (NAEMT) Prehospital Trauma Life Support (PHTLS) curriculum. PHTLS is appropriate for EMTs, paramedics, nurses, physician assistants, physicians, and other prehospital providers.

PMED 160 Introductory Wilderness Medicine  
**Units:** 2  
**Hours:** 27 hours LEC; 27 hours LAB  
**Prerequisite:** None.

This course provides the didactic material and related skills necessary to establish a foundation of medical care in the wilderness setting. Topics include anatomy and physiology, care of traumatic injuries, patient assessment, environmental injuries, medical emergencies, common simple wilderness medical problems, basic wilderness survival for the initial responder, improvised bleeding control in the field setting, and selecting and caring for wilderness medical equipment and supplies. This course emphasizes improvised care options and long-term care in field settings.

PMED 161 Advanced Wilderness Medicine  
**Units:** 2  
**Hours:** 27 hours LEC; 27 hours LAB  
**Prerequisite:** None.  
**Advisory:** PMED 160

This course provides the didactic material and related skills necessary to establish an advanced level of medical care in the wilderness setting. Topics include anatomy and physiology, improvised airway control, principles of musculoskeletal care, synthesis of wilderness medicine and urban care, and common simple wilderness medical problems. Additionally, basic wilderness survival for the wilderness responder, and selecting and caring for wilderness medical equipment and supplies are covered. This course emphasizes improvisation care options and long-term care in remote field settings.

PMED 165 EMS Search and Technical Rescue  
**Units:** 2  
**Hours:** 27 hours LEC; 27 hours LAB  
**Prerequisite:** None.

**Enrollment Limitation:** Students must be in a paid or unpaid internship, volunteer position, or job related to the paramedic field with a cooperating site supervisor. Students are advised to consult with the Paramedic faculty to review specific certificate and degree work experience requirements.

**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGRWR 300; OR ESLW 340.

**General Education:** AA/AS Area III(b)

This course provides students with opportunities to develop marketable skills in preparation for employment or advancement within the paramedic field. It is designed for students interested in work...
experience and/or internships in associate degree level or certificate occupational programs. Course content includes understanding the application of education to the workforce, completion of Title 5 required forms which document the student's progress and hours spent at the work site, and developing workplace skills and competencies.

During the semester, the student is required to complete 37.5 hours of related paid work experience, or 30 hours of related unpaid work experience for 0.5 unit. An additional 37.5 or 30 hours of related work experience is required for each additional 0.5 units. All students are required to attend the first class meeting, a mid-semester meeting, and a final meeting. Additionally, students who have not already successfully completed a Work Experience course will be required to attend weekly orientations while returning participants may meet individually with the instructor as needed. Students may take up to 16 units total across all Work Experience course offerings. This course may be taken up to four times when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

PMED 299 Experimental Offering in Paramedic

**Units:** 0.5 - 4  
**Prerequisite:** None.

This is the experimental courses description.

PMED 1000 Emergency Medical Technician: Refresher

**Units:** 1.5  
**Hours:** 20 hours LEC; 21 hours LAB

**Prerequisite:** None.  
**Enrollment Limitation:** Current or recent certification as an Emergency Medical Technician.

This course provides continuing education and skills verification modules for current Emergency Medical Technicians (EMTs) certified at the Basic Life Support (BLS) level. It satisfies most of the refresher requirements of local, state, and national Emergency Medical Services (EMS) certifying organizations. EMS-related topics include airway management and ventilation, cardiac care and resuscitation, patient assessment, injury management, legal and ethical issues, vital signs monitoring, and assisting with medication administration. This course does not provide preparation for the National Registry of Emergency Medical Technicians (NREMT) entry or recertification exam. Completion of this course provides currently certified EMTs wanting to recertify with the NREMT, with the 24 hours of required course content as well as the verification of required skills competency.

PMED 1006 Post Licensure/Certification Out-of-Hospital Skills: Medical

**Units:** 0.5  
**Hours:** 6 hours LEC; 9 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** Current certification as an EMT-Basic (1) or licensure as a Paramedic

This course provides education modules related to medical emergencies for prehospital health care professionals. Each module will specifically address issues related to prehospital emergencies and local treatment protocol. This course provides continuing education credit necessary for maintenance of EMT-Basic certification or a Paramedic license. Pass/No Pass only.
Philosophy

Philosophy is the critical, rational examination of fundamental questions that people have pondered for more than 2500 years. These include, but are not limited to, questions such as: What is reality? What is the nature of the self? Does God exist? What is good and just? What ought I to do? Philosophy courses are directed towards an understanding of these and other fundamental questions, often through reading and studying philosophers who have addressed these questions in the past, with appreciation of the historical and cultural contexts in which these questions are raised and answered. Philosophy courses help students to develop good logical and critical reasoning skills, expose hidden preconceptions, encourage open debate and independent thought, and provide opportunity to apply valuable insights gained to contemporary life.

Associate Degree for Transfer

A.A.-T. in Philosophy

This program provides lower-division preparation for students interested in transferring into baccalaureate philosophy programs.

The Associate in Arts degree in Philosophy for Transfer provides students with a major that fulfills the general requirements of the California State University for transfer. Students with this degree will receive priority admission with junior status to the California State University system. The Associate in Arts degree in Philosophy for Transfer (AA-T) may be obtained by the completion of 60 transferable, semester units with a minimum 2.0 GPA, including (a) the major or area of emphasis described in the Required Program, and (b) either the Inter-segmental General Education Transfer Curriculum (IGETC) or the California State University General Education Breadth Requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- identify and express arguments found in philosophical and non-philosophical sources.
- analyze arguments from philosophical and non-philosophical sources into their constituent premises and conclusions.
- evaluate the cogency of arguments from philosophical and non-philosophical sources with respect to structure and content.
- critically discuss and evaluate important concepts and theories in ethics, metaphysics, and epistemology.
- develop and defend personal views concerning important philosophical issues.

Career Information

Because of continuing social and technological changes, today's graduates are more likely to change their jobs/careers than ever before. Job skills learned today for a specific career may be too specific to transfer to other jobs or simply become outdated. The technical skills and knowledge required by many fields are also changing, requiring constant updating to stay current. One advantage to studying philosophy is that it focuses on broader issues such as the nature of knowledge, values, the use of language, and the application of logic and
critical reasoning: content that transfers across specific jobs/careers. The analytic skills developed in the study of philosophy are valuable in problem solving and effectively communicating ideas clearly and precisely. Finally, philosophy provides an excellent pre-law preparation, as philosophy majors generally score amongst the highest on the LSAT (Law School Admission Test).

### Philosophy (PHIL) Courses

#### PHIL 300 Introduction to Philosophy

<table>
<thead>
<tr>
<th>Units: 3</th>
<th>Hours: 54 hours LEC</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Prerequisite:</strong> None.</td>

<tr>
<td><strong>C-ID:</strong> C-ID PHIL 110</td>
<td><strong>Transferable:</strong> CSU; UC</td>
</tr>
</tbody>
</table>

This course examines some of the perennial questions that have been addressed in the history of philosophy. Some of these include: Do we have free will? Is there a God? What is knowledge? What is the fundamental nature of reality? What makes actions right or wrong? This examination includes a critical analysis of fundamental concepts involved in the issues addressed by these questions, as well as an evaluation of reasoning used to defend various answers to them.

#### PHIL 310 Introduction to Ethics

<table>
<thead>
<tr>
<th>Units: 3</th>
<th>Hours: 54 hours LEC</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Prerequisite:</strong> None.</td>
<td><strong>Advisory:</strong> Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.</td>

<td><strong>C-ID:</strong> C-ID PHIL 120</td>
<td><strong>Transferable:</strong> CSU; UC</td>
</tr>
</tbody>
</table>

This course is an introduction to ethics and moral philosophy. It includes a survey of various normative ethical theories including Aristotle's Virtue Ethics, Utilitarianism, and Kant's Deontological Ethics. It may also cover various meta-ethical issues such as ethical relativism vs. ethical objectivism, as well as questions of knowledge and justification of moral claims. It may also include the application of normative ethical theories to contemporary moral issues.

#### PHIL 315 Contemporary Moral Issues

<table>
<thead>
<tr>
<th>Units: 3</th>
<th>Hours: 54 hours LEC</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Prerequisite:</strong> None.</td>
<td><strong>Advisory:</strong> Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.</td>
</tr>
<tr>
<td><strong>Transferable:</strong> CSU; UC</td>
<td><strong>General Education:</strong> AA/AS Area I; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B</td>

<tr>
<td><strong>C-ID:</strong> C-ID PHIL 140</td>
<td><strong>Transferable:</strong> CSU; UC</td>
</tr>
</tbody>
</table>

This is an investigation into some of the moral issues our society presently faces. These issues may include abortion, euthanasia, genetic engineering, individual liberty and the collective good, sexuality/gender and society, war and terrorism, capital punishment, hunger/poverty and moral obligation, discrimination, and affirmative action.

#### PHIL 320 Logic and Critical Reasoning

<table>
<thead>
<tr>
<th>Units: 3</th>
<th>Hours: 54 hours LEC</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Prerequisite:</strong> None.</td>
<td><strong>Advisory:</strong> Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.</td>
</tr>
<tr>
<td><strong>Transferable:</strong> CSU; UC</td>
<td><strong>General Education:</strong> AA/AS Area I(b); CSU Area A3</td>
</tr>
</tbody>
</table>

This course is an introduction to symbolic logic. It includes a study of the logic of sentences (propositional logic) and the logic of classes and relations (predicate logic), together with an introduction to the nature of deductive systems. This course is not open to students who have completed MATH 320.

#### PHIL 324 Symbolic Logic

<table>
<thead>
<tr>
<th>Same As: MATH 320</th>
<th>Units: 3</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Prerequisite:</strong> None.</td>
<td><strong>Hours:</strong> 54 hours LEC</td>

<tr>
<td><strong>Advisory:</strong> Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.</td>
<td><strong>Transferable:</strong> CSU; UC</td>
</tr>
<tr>
<td><strong>General Education:</strong> AA/AS Area I; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B</td>
<td><strong>C-ID:</strong> C-ID PHIL 210</td>
</tr>
</tbody>
</table>

This course is an introduction to symbolic logic. It includes a study of the logic of sentences (propositional logic) and the logic of classes and relations (predicate logic), together with an introduction to the nature of deductive systems. This course is not open to students who have completed MATH 320.

#### PHIL 330 History of Classical Philosophy

<table>
<thead>
<tr>
<th>Units: 3</th>
<th>Hours: 54 hours LEC</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Prerequisite:</strong> None.</td>
<td><strong>Advisory:</strong> Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.</td>
</tr>
<tr>
<td><strong>Transferable:</strong> CSU; UC</td>
<td><strong>General Education:</strong> AA/AS Area I; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B</td>
</tr>
<tr>
<td><strong>C-ID:</strong> C-ID PHIL 130</td>
<td><strong>Transferable:</strong> CSU; UC</td>
</tr>
</tbody>
</table>

This course is a survey of classical Greek philosophy. Through a careful examination of primary sources, it begins with an overview of Pre-Socratic thought and focuses primarily on the philosophical ideas of Socrates, Plato, and Aristotle. An overview of Hellenistic and Roman philosophy may be included.

#### PHIL 331 History of Modern Philosophy

<table>
<thead>
<tr>
<th>Units: 3</th>
<th>Hours: 54 hours LEC</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Prerequisite:</strong> None.</td>
<td><strong>Advisory:</strong> Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.</td>
</tr>
<tr>
<td><strong>Transferable:</strong> CSU; UC</td>
<td><strong>General Education:</strong> AA/AS Area I; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B</td>
</tr>
<tr>
<td><strong>C-ID:</strong> C-ID PHIL 140</td>
<td><strong>Transferable:</strong> CSU; UC</td>
</tr>
</tbody>
</table>

This course is an overview of important themes in the history of Western Philosophical thought from the Early Modern era to the turn of the nineteenth century. These themes may include the fundamental nature of reality, knowledge, values, society, God, and human nature.

#### PHIL 350 Philosophy of Religion

<table>
<thead>
<tr>
<th>Units: 3</th>
<th>Hours: 54 hours LEC</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Prerequisite:</strong> None.</td>
<td><strong>Advisory:</strong> Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.</td>
</tr>
<tr>
<td><strong>Transferable:</strong> CSU; UC</td>
<td><strong>General Education:</strong> AA/AS Area I; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B</td>
</tr>
</tbody>
</table>

This course is an introduction to a philosophical examination of religion. This examination typically includes an analysis of basic religious concepts such as God, the afterlife, the soul, faith, karma, religious
experience, good, and evil. The rationality of religious belief and the relation of religion to science may also be covered.

PHIL 360 Social/Political Philosophy

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.
Transferable: CSU; UC
General Education: AA/AS Area I; CSU Area C2; CSU Area D7; Cal-GETC Area 3B (effective Fall 2025); Cal-GETC Area 4 (effective Fall 2025); IGETC Area 3B; IGETC Area 4G

This course is a historical and topical survey of significant themes of social/political philosophy from Plato to the present. Topics may include freedom, government, justice, law, rights, punishment, war, authority, and the state.

PHIL 495 Independent Studies in Philosophy

Units: 1 - 3
Prerequisite: None.
Transferable: CSU

PHIL 499 Experimental Offering in Philosophy

Units: 0.5 - 4
Prerequisite: None.
Transferable: CSU

This is the experimental courses description.
Physics

If you wish to pursue a career in physics or a related field, ARC's Physics program offers you a strong foundation. Through this program, you have a number of course options to fulfill a GE requirement and/or needed physics coursework required for your major. You will be required to take some course work in physics if you major in, for example, biology, chemistry, many pre-health fields, engineering, mathematics, or computer science.

Career Options

The Careers Toolbox for Undergraduate Physics Students (https://www.spsnational.org/sites/all/careerstoolbox/) is a great place to start exploring career options for physics majors. For more detailed information, you can find a variety of up-to-date employment data and reports for physicists, astronomers, and related scientists here (https://www.aip.org/statistics/employment). Many other career and internship-related resources are available to you at the AAPT Career Center (https://jobs.aapt.org/jobseekers/resources/).

Degrees Offered

A.S.-T. in Physics
A.S. in General Science
A.S. in Physical Science/Mathematics

Dean Joel Keebler
Department Chair Shih-Wen Young
Phone (916) 484-8107

Associate Degrees for Transfer

A.S.-T. in Physics

The Associate in Science in Physics for Transfer provides students with a major that fulfills the general requirements of the California State University for transfer. Students with this degree will receive priority admission with junior status to the California State University system.

The Associate in Science in Physics for Transfer (A.S.-T.) may be obtained by completion of 60 transferable, semester units with a minimum 2.0 GPA, including (a) the major or area of emphasis described in the Required Program, and (b) the Intersegmental General Education Transfer Curriculum (IGETC).

Upon completion of this program, the student will be able to:

• test the validity of a hypothesis using the scientific method.
• identify the basic physical principles that apply in a particular situation.
• solve problems requiring the application of physics and mathematics up through calculus.
• interpret the results of physics calculations.
• define common physics terms and physical laws.
• compose a well-organized and complete lab report.

Career Information

This degree is designed to facilitate students' successful transfer to four-year programs that prepare them for advanced study in physics and other related fields, including biophysics, physical chemistry, geophysics, and astrophysics. Physicists with undergraduate and graduate degrees have a broad range of employment opportunities, including high technology, computer programming, research, and teaching.

A.S. in General Science

This program provides a broad study in the fields of biological and physical sciences in preparation for transfer to a four-year program and continuation of studies in upper division science courses.

**Total Units:** 18

1 must be transfer-level and must include one laboratory course in a physical science and one laboratory course in a biological science.

The General Science Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education.
requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- evaluate new and accepted ideas about the natural universe using scientific methods.
- analyze a wide variety of natural phenomena using basic definitions and fundamental theories of biological or physical sciences.
- apply appropriate quantitative and qualitative methods to interpret and analyze pertinent data.
- outline the basic concepts and fundamental theories of a natural science.
- articulate orally and/or in writing the importance of continuous examination and modification of accepted ideas as a fundamental element in the progress of science.
- discuss ethical components of scientific decision making and apply personal and social values within the process of decision making in scientific endeavors.

A.S. in Physical Science/Mathematics

This degree provides a broad study in the fields of physical science and mathematics. It effectively prepares students for transfer to a four-year program in science, technology, engineering, or mathematics (STEM).

The Physical Science/Mathematics Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- recognize and correctly use the terminology of math, statistics, and/or science.
- analyze and interpret data, charts, and graphs using quantitative and qualitative methods.
- recognize and construct valid arguments using deductive and inductive reasoning.
- evaluate new and accepted ideas about the natural universe using testable methodology.

Physics (PHYS) Courses

**PHYS 310 Conceptual Physics**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** MATH 32 with a grade of "C" or better, or placement through the assessment process.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300, OR ESLW 340.  
**Transferrable:** CSU; UC (UC credit limitations: PHYS 350 & 311 combined: maximum credit, one course. No credit if taken after PHYS 350 or 410)  
**General Education:** AA/AS Area IV; CSU Area B1; Cal-GETC Area 5A (effective Fall 2025); IGETC Area 5A  

This course covers selected topics in motion, gravity, heat, sound, electricity, magnetism, light, and atomic and nuclear physics. It is designed for non-science majors and students who have not taken a course in physics.

**PHYS 311 Basic Physics**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** MATH 373 with a grade of "C" or better  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLR 340 AND ESLW 340.  
**Transferrable:** CSU; UC (UC credit limitations: PHYS 310 & 311 combined: maximum credit, one course. No credit if taken after PHYS 350 or 410)  
**General Education:** AA/AS Area IV; CSU Area B1; Cal-GETC Area 5A (effective Fall 2025); IGETC Area 5A  

This survey course emphasizes problem solving in physics. Topics include motion in one and two dimensions, forces, energy, and momentum. It is designed for science majors who plan to continue with PHYS 350 or 410.

**PHYS 312 Conceptual Physics Laboratory**

**Units:** 1  
**Hours:** 54 hours LAB  
**Prerequisite:** None.  
**Corequisite:** PHYS 310  
**Advisory:** MATH 100 or 132  
**Transferrable:** CSU; UC  
**General Education:** AA/AS Area IV; CSU Area B3; Cal-GETC Area 5C (effective Fall 2025); IGETC Area 5C  

This laboratory course provides hands-on observation activities and interpretation of data in a variety of experimental situations. Topics include motion, sound, light, heat, electricity, and magnetism.

**PHYS 350 General Physics**

**Units:** 4  
**Hours:** 54 hours LEC; 54 hours LAB  
**Prerequisite:** MATH 373 with a grade of "C" or better  
**Advisory:** PHYS 311; Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLW 340.  
**Transferrable:** CSU; UC (UC credit limitation: PHYS 350, 360 & 410, 421, 431 combined: maximum credit, one series)  
**General Education:** AA/AS Area IV; CSU Area B1; CSU Area B3; Cal-GETC Area 5A (effective Fall 2025); Cal-GETC Area 5C (effective Fall 2025); IGETC Area 5A; IGETC Area 5C  
**C-ID:** Part of C-ID PHYS 140  

This trigonometry-based physics course covers the mechanics of particles, rigid bodies, and fluids. It also covers mechanical waves, sound, heat, and thermodynamics. The PHYS 350/360 series is designed for biological science students, including those in pre-medical, pre-dental, agricultural, and forestry programs.

**PHYS 360 General Physics**

**Units:** 4  
**Hours:** 54 hours LEC; 54 hours LAB  
**Prerequisite:** PHYS 350 with a grade of "C" or better  
**Advisory:** PHYS 311; Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLW 340.  
**Transferrable:** CSU; UC (UC credit limitation: PHYS 350, 360 & 410, 421, 431 combined: maximum credit, one series)  
**General Education:** AA/AS Area IV; CSU Area B1; CSU Area B3; Cal-GETC Area 5A (effective Fall 2025); Cal-GETC Area 5C (effective Fall 2025); IGETC Area 5A; IGETC Area 5C  
**C-ID:** Part of C-ID PHYS 140  

This trigonometry-based physics course covers electricity, magnetism, basic electric circuit theory, optics, wave behavior, and modern physics. The PHYS 350/360 series is designed for biological science students, including those in pre-medical, pre-dental, agricultural, and forestry programs.

**PHYS 410 Mechanics of Solids and Fluids**

**Units:** 5  
**Hours:** 72 hours LEC; 54 hours LAB  
**Prerequisite:** MATH 400 with a grade of "C" or better  
**Corequisite:** MATH 401  
**Advisory:** PHYS 311; and eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLW 340.  
**Transferrable:** CSU; UC (UC credit limitation: PHYS 350, 360 & 410, 421, 431 combined: maximum credit, one series)
**PHYS 421 Electricity and Magnetism**

**Units:** 4  
**Hours:** 54 hours LEC; 54 hours LAB  
**Prerequisite:** MATH 401 and PHYS 410 with grades of "C" or better  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.  
**Transferable:** CSU; UC (UC credit limitation: PHYS 350, 360 & 410, 421, 431 combined: maximum credit, one series)  
**C-ID:** C-ID PHYS 210; Part of C-ID PHYS 2005

This calculus-based physics course is an in-depth treatment of electricity and magnetism. It involves problem solving with an emphasis on physics problems that require integral calculus.

**PHYS 431 Heat, Waves, Light and Modern Physics**

**Units:** 4  
**Hours:** 54 hours LEC; 54 hours LAB  
**Prerequisite:** MATH 401 and PHYS 410 with grades of "C" or better  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.  
**Transferable:** CSU; UC (UC credit limitation: PHYS 350, 360 & 410, 421, 431 combined: maximum credit, one series)  
**C-ID:** C-ID PHYS 215; Part of C-ID PHYS 200S

This calculus-based physics course explores the fundamental theories of thermodynamics, waves, optics, and modern physics. Topics include heat, temperature, kinetic theory, waves, sound, light reflection and refraction, optics, interference, diffraction, atomic theory, and nuclear physics.
Political Science

Government and politics profoundly impact us every day, from the laws that govern our behavior, to the quality of the water we drink, to the decision of whether to go to war. Political Science encourages critical thinking about how government works at the local, state, national, and international levels, and how we—as democratic participants—can make government work better. Political Science students may pursue a wide range of careers, at home or abroad, in fields such as law, advocacy, diplomacy, and public administration.

Associate Degrees for Transfer

A.A.-T. in Political Science

The Associate in Arts in Political Science for Transfer degree provides students with a major that fulfills the general requirements of the California State University for transfer. Students with this degree will receive priority admission with junior status to the California State University system. The Associate in Arts in Political Science for Transfer (AA-T) degree may be obtained by the completion of 60 transferable, semester units with a minimum 2.0 GPA, including (a) the major or area of emphasis described in the Required Program outlined below (earning a C or better in these courses) and (b) either the Inter-segmental General Education Transfer Curriculum (IGETC) or the California State University General Education-Breadth Requirements.

The Associate in Arts in Political Science for Transfer (AA-T) degree may be obtained by completion of 60 transferable, semester units with a minimum overall grade point average (GPA) of 2.0, including (a) a minimum grade of “C” (or “P”) for each course in the major or area of emphasis described in the Required Program, and (b) either the Inter-segmental General Education Transfer Curriculum (IGETC) or the California State University General Education-Breadth Requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- describe the fundamentals of political science and governance.
- compare and contrast contemporary comparative systems and governance.
- evaluate the relationship between the governing process and public policy.
- examine how citizen and interest group participation influence political systems.
- analyze the role of culture and its influence on politics.
- assess how the design of political institutions and processes affect policy and stability.
- analyze politics and diplomacy in the international system.
- apply basic research methods to political science.
- analyze political and public policy making processes, and relate these to current issues and problems, for evaluating political events and their role in the political system.
- compare and contrast various theories of justice and the just state.
- evaluate various theories of the purpose of government and apply to a critical analysis of current political events.

Career Information

Career opportunities in political science include, but are not limited to, advocate/organizer, campaign worker, diplomat, educator/teacher, events planner, foreign affairs specialist, lawyer, legislative aide (state and federal), lobbyist, political consultant, and public relations specialist.

Associate Degrees

A.A. in Political Science

This degree provides a comprehensive introduction to the field of political science. It stresses the systematic study of politics, political institutions and governmental processes, state and local government, public policy, foreign policy, international relations, comparative politics, and political theory.

Political Science

The Political Science Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

• describe the fundamentals of political science and governance.
• compare and contrast contemporary comparative systems and governance.
• evaluate the relationship between the governing process and public policy.
• examine how citizen and interest group participation influence political systems.
• analyze the role of culture and its influence on politics.
• assess how the design of political institutions and processes affect policy and stability.
• analyze politics and diplomacy in the international system.
• apply basic research methods to political science.
• analyze political and public policy making processes, and relate these to current issues and problems, for evaluating political events and their role in the political system.
• compare and contrast various theories of justice and the just state.
• evaluate various theories of the purpose of government and apply to a critical analysis of current political events.

Career Information

This degree is designed to facilitate successful transfer to four-year institutions. Career opportunities in political science include, but are not limited to, advocate/organizer, campaign worker, diplomat, educator/teacher, events planner, foreign affairs specialist, lawyer, legislative aide (state and federal), lobbyist, political consultant, and public relations specialist.

Political Science (POLS) Courses

POLS 301 Introduction to Government: United States

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLW 340.
Transferable: CSU; UC
General Education: AA/AS Area V(a); CSU Area D8; CSU Area U3; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4H
C-ID: C-ID POLS 110

This course analyzes the U.S. government’s historic origins, philosophical and theoretical justification, federal structure, and constitutional structures. The course studies the rights and liberties of individuals as articulated in the U.S. Constitution and federal court decisions. Further, it examines and describes the procedural aspects of the U.S. and California political systems including amending the U.S. and California constitutions, holding elections, campaigning, legislating, executing and adjudicating law. The course examines individual and group political behavior in voting, interest groups, political parties, and the media. It provides an analysis of contemporary problems and issues and looks at factors that shape politics and policy-making including diversity, political culture, political socialization, political ideologies, and public opinion. Finally, it also describes California state and local governments’ constitutional base, structures and functions, political process, problems and issues, and federal-state relations. This course is not open to students who have completed POLS 481.

POLS 302 Comparative Politics

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLW 340.
Transferable: CSU; UC
General Education: AA/AS Area V(b); CSU Area D8; CSU Area U3; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4H
C-ID: C-ID POLS 130

This course is a comparative study and analysis of political systems, ideologies, institutions, policies, cultures, histories, and the development of government within various countries. It emphasizes the cultural and social dimensions of political behavior and attitudes in connection with governmental and political practices typical of particular geographical regions. It also covers an examination of selected developed and lesser developed nation-states from a global perspective.

POLS 304 Introduction to Government: California

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLW 340.
Transferable: CSU; UC
General Education: AA/AS Area V(a); CSU Area D8; CSU Area U3; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4H
C-ID: C-ID POLS 140

This course covers the essential organization, institutions, and processes of California state and local government. It fulfills the California State University requirement for state and local government, but not the requirement for the U.S. Constitution.

POLS 310 Introduction to International Relations

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLW 340.
Transferable: CSU; UC
General Education: AA/AS Area V(b); CSU Area D8; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4H
C-ID: C-ID POLS 110

This course introduces the academic field of International Relations. It surveys global issues as they relate to theories of international relations, the nation-state system, the role of state and non-state actors, globalization, armed conflict and its causes, international law and conflict resolution, and international political economy. It emphasizes comparing global perspectives among developed and developing nations. This course is not open to students who have completed POLS 480.

POLS 320 Introduction to Political Theory

Units: 3
This course is a survey of the ideas that have shaped Western political development, covering important thinkers from the ancient, medieval, and modern periods. Topics include theories of just and unjust societies, social contract theory, justifications for government authority, and the rights of citizens versus the responsibilities of citizenship.

POLS 330 Constitutional Rights

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340
Transferable: CSU; UC
General Education: AA/AS Area V(b); CSU Area D8; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4
C-ID: C-ID POLS 120

This course is a survey of American constitutional rights and civil liberties. Emphasis is placed on analysis of U.S. Supreme Court decisions and related materials dealing with issues arising under the Bill of Rights and the 14th Amendment to the U.S. Constitution.

POLS 342 Women and Politics from a Global Perspective

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340
Transferable: CSU; UC
General Education: AA/AS Area V(b); CSU Area D8; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4

This course examines the impact of politics on women's lives and women's impact on politics from a global perspective. It explores past and current influences on the political and legal status of women as well as women's participation in the political process throughout the world.

POLS 480 Introduction to International Relations - Honors

Units: 3
Hours: 54 hours LEC
Prerequisite: Placement into ENGWR 480 through the assessment process.
Advisory: ENGWR 300 or 480
Transferable: CSU; UC
General Education: AA/AS Area V(b); CSU Area D; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4
C-ID: C-ID POLS 140

This course examines global issues as they relate to theories of international relations, the nation-state system, the role of state and non-state actors, globalization, armed conflict and its causes, international law and conflict resolution, and international political economy. Emphasis is placed on the comparison of global perspectives among developed and developing nations. This seminar-style honors course approaches the topical material through class discussion which encourages problem-solving techniques focusing on current international relations issues. This course is not open to students who have completed POLS 310.

POLS 481 Introduction to Government: United States - Honors

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Placement into ENGWR 300.
Transferable: CSU; UC
General Education: AA/AS Area V(a); CSU Area D; CSU Area U2; CSU Area U3; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4

This course analyzes the U.S. government's historic origins, philosophical and theoretical justification, constitutional structures and how these institutions work. It examines and describes the procedural aspects of the political system including holding elections, campaigning, voting, lobbying, legislating, executing and adjudicating law. It provides an analysis of contemporary problems and issues. It also describes California state and local governments' constitutional base, structures and functions, political process, problems and issues. Conducted in a seminar format, this course emphasizes participatory classroom styles of learning and the material used is more substantial and sophisticated. In addition, there are extensive research projects on American institutions, political processes, and political behavior designed to challenge and motivate. This course is not open to students who have completed POLS 301.

POLS 494 Topics in Political Science

Units: 0.5 - 4
Hours: 9 - 54 hours LEC
Prerequisite: None.
Advisory: ENGRD 116, or placement through the assessment process.; ENGWR 102 or 103, and ENGRD 116 with a grade of "C" or better; OR ESLR 320 and ESLW 320 with a grade of "C" or better; OR placement through assessment process.
Transferable: CSU

This course provides the opportunity for concentrated study of specialized topics in Political Science. Each offering focuses on a discrete aspect of the Political Science discipline. Refer to class schedule for class topic. Individual field trips may be required.

POLS 495 Independent Studies in Political Science

Units: 1 - 3
Hours: 54 - 162 hours LAB
Prerequisite: None.
Transferable: CSU

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

POLS 499 Experimental Offering in Political Science

Units: 0.5 - 4
Prerequisite: None.
Transferable: CSU

This is the experimental courses description.
Psychology

An Associate of Art (AA) degree is offered, including university-level transfer courses and other graduation requirements. Courses include general principles, biological and social psychology, research methods, introductory statistics, contemporary issues, biological psychology lab, psychology of death and dying, work and human behavior, abnormal behavior, human development, marriage and family, human sexuality, and psychology of aging.

Associate Degrees for Transfer

A.A.-T. in Psychology

The Associate in Arts degree in Psychology for Transfer provides a clearly articulated curricular track for students who wish to transfer to a CSU campus, while also serving the diverse needs of students interested in the breadth and depth of the field of psychology. Additionally, this degree exposes students to the core principles and practices of the field in order to build a foundation for their future personal, academic, or vocational paths.

The degree was designed to facilitate students’ successful transfer to four-year programs that prepare them for advanced study in a variety of graduate programs, as well as a variety of careers such as nursing, sales and marketing, teaching, and law enforcement. Psychologists with graduate programs, as well as a variety of careers such as nursing, sales and marketing, teaching, and law enforcement.

The Associate in Arts degree in Psychology for Transfer was designed to facilitate students’ successful transfer to four-year programs that prepare them for advanced study in a variety of graduate programs, as well as a variety of careers such as nursing, sales and marketing, teaching, and law enforcement. Psychologists with graduate programs, as well as a variety of careers such as nursing, sales and marketing, teaching, and law enforcement.

Career Information

The Associate in Arts degree in Psychology for Transfer provides students with a major that fulfills the general requirements of the California State University for transfer and many other 4-year universities. Students with this degree will receive priority admission with junior status to the California State University system. The degree was designed to facilitate students’ successful transfer to four-year programs. From there, students are prepared for a variety of careers such as case management, sales and marketing, health care facility

Total Units: 18 - 19

1 Or any of the major electives or courses not used above.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

• differentiate between scientifically derived knowledge versus pseudoscience within the field of psychology.
• compare and contrast the major theoretical perspectives in psychology.
• define and apply basic psychological terminology regarding behavior, cognition, and emotion, and be able to express it clearly when writing or speaking about psychology.
• evaluate psychological data, use the scientific method, draw reasonable conclusions, recognize the ethical implications of these conclusions, and apply these to personal, community, and scientific problems.
• employ and integrate psychological principles that lay the foundation for life-long personal growth and development of interpersonal and social skills.
• demonstrate appropriate interpersonal and social skills in interactions with a diverse population using principles of equity, justice, and inclusion.

2023-2024 Catalog AMERICAN RIVER COLLEGE
administration, teaching, and law enforcement. The degree also prepares students to continue their academic studies in post-graduate programs. Psychologists with graduate degrees and professional certificates also have a broad range of employment opportunities including, but not limited to, licensed psychologists, industrial/organizational psychologists, consumer psychologists, and research psychologists.

**Associate Degrees**

**A.S. in General Science**

This program provides a broad study in the fields of biological and physical sciences in preparation for transfer to a four-year program and continuation of studies in upper division science courses.

graduation requirements. The General Science Associate in Science (A.S.) degree may be obtained by completing the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

• evaluate new and accepted ideas about the natural universe using scientific methods.
• analyze a wide variety of natural phenomena using basic definitions and fundamental theories of biological or physical sciences.
• apply appropriate quantitative and qualitative methods to interpret and analyze pertinent data.
• outline the basic concepts and fundamental theories of a natural science.
• articulate orally and/or in writing the importance of continuous examination and modification of accepted ideas as a fundamental element in the progress of science.
• discuss ethical components of scientific decision making and apply personal and social values within the process of decision making in scientific endeavors.

A.A. in Psychology

Psychology focuses on the study of behavior of humans and other animals. It involves both pure and practical application of science to matters of everyday life.

Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340.
Transferable: CSU; UC (UC credit limitation: PSYC 300, 305, & 480 combined: maximum credit, one course)
General Education: AA/AS Area V(b); CSU Area D9; IGETC Area 4 (effective Fall 2025); IGETC Area 41
C-ID: C-ID PSY 110

This course provides a broad overview of general principles of psychology. Topics include the scientific method, statistics, biological determinants, as well as general processes of behavior, such as development, learning, language, intelligence, perception, motivation, emotion, personality, and mental health. This course is not open to students who have taken PSYC 480.

PSYC 305 Psychology Applied to Modern Life

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340.
Transferable: CSU; UC (UC credit limitation: PSYC 300, 305, & 480 combined: maximum credit, one course)
General Education: AA/AS Area V(b); CSU Area D9; IGETC Area 4 (effective Fall 2025); IGETC Area 41
C-ID: C-ID PSY 115

This course explores human behavior, emphasizing the practical aspects of psychology in everyday life utilizing both psychological theory and research. Topics include personality, stress and coping, self-understanding, communication, interpersonal relationships, gender, sexuality, psychological disorders and their treatment, personality, personal values, and positive psychology.

PSYC 310 Biological Psychology

Units: 3
Hours: 54 hours LEC
Prerequisite: PSYC 300 or 480 with a grade of "C" or better
Transferable: CSU; UC
General Education: AA/AS Area IV; CSU Area B2; IGETC Area 5B (effective Fall 2025); IGETC Area 5C
C-ID: C-ID PSY 150

This course examines the physiological determinants of behavior and cognition. The role of genetics, neural development, neural communication and pathways, brain structures, neurotransmitters, drugs, endocrine system, and sensory systems in typical and atypical behavior and cognition are addressed. Current theories related to the role of neural and biological processes in the etiology and treatment of psychological disorders, motor disorders, and other central nervous pathologies are presented. Ethical standards for human and animal research are discussed.

PSYC 311 Biological Psychology Laboratory

Units: 1
Hours: 54 hours LAB
Prerequisite: None.
Corequisite: PSYC 310
Transferable: CSU; UC
General Education: CSU Area B3; Cal-GETC Area 5C (effective Fall 2025); IGETC Area 5C

This course involves the applied study of the nervous system focusing on its anatomy, physiology, biochemistry, and impact on behavioral and mental processes. It provides a foundation in the principles of the scientific method and practical experience in its application to the study of biological psychology. Specific topics include anatomy, physiology, and organization of the nervous system, with special emphasis on the brain; anatomy and physiology of the neuron; physiology of nerves and nerve conduction; the biochemistry of the synapse; anatomy and physiology of sensory systems; and psychophysiological examination of sensation and perception. It utilizes brain dissection procedures, interactive computer simulations, and lab experiments with data collection and analysis.

PSYC 320 Social Psychology

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: PSYC 300 with a grade of "C" or better
Transferable: CSU; UC
General Education: AA/AS Area V(b); CSU Area D; IGETC Area 4 (effective Fall 2025); IGETC Area 4
C-ID: C-ID PSY 170

This course analyzes human behavior in relation to the social environment, including the power of the situation, other individuals, and the social group. Topics include aggression, prejudice, attraction, altruism, attitude change, conformity, gender roles, cultural norms, person perception, and social cognition.

PSYC 330 Introductory Statistics for the Behavioral Sciences

Units: 3
Hours: 54 hours LEC
Prerequisite: Through the Los Rios Placement Process or successful completion of Algebra II or Intermediate Math 3 or Intermediate Algebra.
Transferable: CSU; UC (UC credit limitation: PSYC 330, STAT 300, STAT 305, STAT 480 and ECON 310 combined: maximum credit, 1 course)
General Education: AA/AS Area II(b); CSU Area B4; Cal-GETC Area 2 (effective Fall 2025); IGETC Area 2
C-ID: C-ID MATH 110

This course focuses upon the concepts and applications of descriptive and inferential statistics in psychology and other behavioral sciences.
Topics include descriptive statistics, probability and sampling distributions, parametric and nonparametric statistical methods, hypothesis testing, statistical inference and power, correlation and regression, chi-square, t-tests, and analysis of variance procedures. Application of both hand computation and statistical software to data in a social science context is emphasized to include the interpretation of the relevance of the statistical findings.

PSYC 335 Research Methods in Psychology

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** PSYC 300 AND PSYC 330 or STAT 300 with a grade of "C" or better.  
**Advisory:** ENGR 300 or ESLW 340 with a grade of "C" or better.  
**Transferable:** CSU; UC  
**C-ID:** C-ID PSY 200

This course introduces students to the various psychological research methods and to the critical evaluation of research. It emphasizes research design, experimental procedures, descriptive methods, instrumentation, and the collection, analysis, interpretation, and reporting of research data. Research design and methodology are investigated through a review of research in a variety of sub-disciplines in psychology. Students gain knowledge in scientific writing, including proficiency in APA style.

PSYC 340 Abnormal Behavior

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLR 340.  
**Transferable:** CSU; UC (UC credit limitation: PSYC 340 & 481 combined: maximum credit, one course)  
**General Education:** AA/AS Area III(b); CSU Area D9; CSU Area E1; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4I  
**C-ID:** C-ID PSY 120

This course explores the broad questions of normality and abnormality. Topics include the investigation of specific mental, emotional, and behavioral difficulties and current approaches to psychological intervention including present community mental health practices. It considers the contribution of social, biological, and psychological factors to the development and persistence of behavior disorders. This course is not open to students who have taken PSYC 481.

PSYC 342 Introduction to Applied Behavior Analysis

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** PSYC 300 or 305 with a grade of "C" or better  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area III(b); CSU Area E1

This course focuses on basic behavioral principles that describe relations between operant behavior and the social and physical environment. It examines behavior as a part of the natural world and in everyday situations. This course focuses on principles of operant conditioning, such as reinforcement, extinction, differential reinforcement, and punishment, as they are related to naturally occurring events. Additional topics include experimental and intervention procedures of applied behavioral analysis. The course also covers practical applications including self-management, institutional settings, schools, child behavior management, as well as treatment of neurodevelopmental disorders including autism spectrum disorders.

PSYC 354 The Psychology of Family Life and Intimate Relationships in a Diverse Society

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLR 340 AND ESLW 340.

This course is a study of family life and intimate relationships from historical, sociological, and psychological viewpoints. Topics include elements for building and maintaining intimate relationships, the structure and functions of the family, sexuality, parenting, gender roles, partner selection, conflict, crisis, divorce, and starting over.

PSYC 356 Human Sexuality

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLR 340 AND ESLW 340.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area III(b); AA/AS Area VI; CSU Area D4; CSU Area D9; CSU Area E1; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4D; IGETC Area 4I  
**C-ID:** C-ID PSY 130

This course offers a balanced scientific understanding of the biopsychosocial perspective on human sexual behavior from birth through adulthood. It provides factual, up-to-date, nonjudgmental information designed to dispel myths, and to facilitate problem identification and possible solutions. Sexuality is explored from historical, cultural, psychological, physiological, sociological, and legal viewpoints.

PSYC 359 Stress Management and Health

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLR 340 AND ESLW 340.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area III(b); CSU Area E1

This course examines the connection between stress, stress response, coping, and health. It covers various types of stressors, stress responses, and coping strategies, and the scientific research in these areas. Topics include the impact of stress on physical, cognitive, behavioral, and emotional health. This course focuses on developing healthy ways to cope with stress, including cognitive-behavioral techniques, mindfulness, and relaxation techniques.

PSYC 361 Psychology of Women in a Multicultural Society

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area V(b); AA/AS Area VI; CSU Area D3; CSU Area D4; CSU Area D9; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4C; IGETC Area 4D; IGETC Area 4I

This course is a study of the psychological effects of society upon women. It emphasizes the exploration of gender roles, sex roles, and stereotypes, as well as the sociocultural, intrapsychical, and interpersonal factors in the development of women.

PSYC 365 Issues of Diverse Populations

**Same As:** HSER 330  
**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLR 340 AND ESLW 340.
PSYC 370 Human Development: A Life Span

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340.
Transferable: CSU; UC
General Education: AA/AS Area V(b); AA/AS Area III(b); CSU Area D; CSU Area E1; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4I
C-ID: C-ID PSY 180

This course examines human development across the lifespan, from conception through death, by focusing on the main domains in developmental psychology (physical, cognitive, and socio-emotional) as well as the interaction among these domains. It emphasizes development as an on-going process, with an effort to encourage the practical application of the knowledge acquired. This course is designed to provide a foundation for careers in educational, social, psychological, and medical fields as well as a better understanding of one’s own developmental process.

PSYC 372 Child Development

Same As: ECE 312
Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGR 300; OR ESLR 340 AND ESLW 340.
Transferable: CSU; UC (UC credit limitation: PSYC 372, 373, and ECE 312 combined: maximum credit, one course)
General Education: AA/AS Area V(b); CSU Area D9; CSU Area E1; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4I
C-ID: C-ID CDEV 100

This course is a study of the growth and development of children from the prenatal stage through adolescence. For each stage of development, the physical, cognitive, linguistic, social-moral, and emotional aspects of development are discussed in reference to relevant research and theories. The course covers research methods and data collection approaches. The influences of culture, family, and the interaction of maturational and environmental factors are studied. The material in this course is designed as a foundation for early child care and education, teaching, and parenting. This course is not open to students who have completed ECE 312.

PSYC 373 Child Psychology

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGR 300; OR ESLR 340 AND ESLW 340.
Transferable: CSU; UC (UC credit limitation: PSYC 372, 373, and ECE 312 combined: maximum credit, one course)
General Education: AA/AS Area V(b); CSU Area D9; CSU Area E1; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4I

This course introduces the science of child psychology through the analysis of developmental theories and research. It examines key developmental events across the main domains in developmental psychology (physical, cognitive, socioemotional) are examined from conception through adolescence. Questions about development are investigated, with an emphasis on the role of the scientific method. It explores typical and atypical psychological development research is explored as well as the influences of culture, society, family, and physical environments on children’s behavior and mental processes. Additionally, this course provides a scientific foundation for future studies in social sciences, including psychology.

PSYC 374 Psychology of Aging: Adult Development and Aging

Same As: GERON 302
Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340.
Transferable: CSU; UC (UC credit limitation: PSYC 374, GERON 300, 302, & SOC 335 combined: maximum credit, one course)
General Education: AA/AS Area V(b); CSU Area D; CSU Area E1; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4

This course covers the physical, psychological, and social aspects of the aging process including the interactions between the elderly and the rest of society. Topics include an analysis of stereotypes, social bonds, environmental factors, sexuality, physical health, mental health, death, and bereavement. This course is not open to students who have completed GERON 302.

PSYC 375 Introduction to Geropsychology and the Aging Brain

Same As: GERON 305
Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.
Transferable: CSU; UC (effective Fall 2024)
General Education: AA/AS Area V(b); AA/AS Area III(b); CSU Area D; CSU Area E1

This course introduces foundation theories and constructs of gerontology and psychology to examine the aging-related biopsychosocial changes that influence how mature and older adults feel about themselves, how they process information, and how they encode memories about what they experience and learn. Special emphasis is placed on psychological differences between aging cohorts based on psychosocial factors present during the decade of birth and earlier stages of life, gender/sex and race/ethnicity, the social determinants of health, bias development, prejudice and discrimination, and racism, ableism, sexism, and ageism. Topics include psychological theories, models, and constructs that have practical application during interactions with older people; stages of life and phases of aging; aging-related changes (senescence) and the psychological impact of those changes; how illnesses, diseases, and disabilities complicate aging; the anatomy of the central and peripheral nervous systems; and models of sensorineural processing and learning/memory. Case studies are utilized to explore older adult health and mental health, personality and communication behaviors, environmental factors, and the impact of the social determinants of health on overall well-being, quality of life, and aging outcomes. This course is not open to students who have completed GERON 305.

PSYC 390 Psychology of Death and Dying

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGR 300; OR ESLR 340 AND ESLW 340.
Transferable: CSU; UC
General Education: AA/AS Area III(b); CSU Area D9; CSU Area E1; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4I

This course introduces the science of child psychology through the analysis of developmental theories and research. It examines key developmental events across the main domains in developmental psychology (physical, cognitive, socioemotional) are examined from conception through adolescence. Questions about development are investigated, with an emphasis on the role of the scientific method. It explores typical and atypical psychological development research is explored as well as the influences of culture, society, family, and physical environments on children’s behavior and mental processes. Additionally, this course provides a scientific foundation for future studies in social sciences, including psychology.
This course investigates beliefs, attitudes, anxieties, and behaviors associated with dying and death. Information about suicide, life-threatening illnesses, bereavement, and euthanasia are presented.

**PSYC 400 Introduction to Chemical Dependency**

**Same As:** HSER 340  
**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** HSER 340 or PSYC 400 with a grade of "C" or better  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area III(b); CSU Area E1

This course examines the biopsychosocialcultural effects of chemical dependency on the individual and the family. It includes an analysis of alcohol and drug use; misuse and abuse across age, gender, sexuality, race, ethnicity, and economic conditions contributing to substance abuse; and a description of community efforts at prevention and treatment. This course is not open to students who have completed this course's equivalent.

**PSYC 401 Physiology and Pharmacology: Alcohol & Other Drugs**

**Same As:** HSER 341  
**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** HSER 340 or PSYC 400 with a grade of "C" or better  
**Transferable:** CSU; UC  

This course is a study of the absorption, metabolism, and the mechanism of action of alcohol and other psychoactive drugs including opiates, stimulants, depressants, cannabinoids, and psychedelics. It includes the pharmacological mechanisms as well as the social and psychological implications of tolerance, habituation, and substance abuse of the user and abuser. This course is not open to students who have completed HSER 341.

**PSYC 402 Alcoholism: Intervention, Treatment & Recovery**

**Same As:** HSER 342  
**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** HSER 341 or PSYC 401 with a grade of "C" or better  
**Transferable:** CSU  

This course is a study and evaluation of techniques used in the treatment of alcohol dependency. This course will cover both physical and psychological effects of alcohol use, abuse and the impact on family and society. Topics include prevention, intervention, individual and group counseling, detoxification, twelve-step program, therapeutic communities, aftercare programs, harm reduction and addressing high risk drinking. This course is not open to students who have completed this course's equivalent.

**PSYC 415 Studying in London: Psychological Elements of British Life and Culture**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Transferable:** CSU  
**General Education:** AA/AS Area V(b); CSU Area D9  

This course, offered in a London study abroad program, surveys elements in British history and culture that have influenced the science of psychology. It emphasizes the influences of Sigmund Freud, Charles Darwin, Sir Francis Galton, and the events of World War II to current psychological theories. Additionally, the course examines the social norms in English culture in comparison to other cultures. Field trips are required.

**PSYC 480 Honors General Principles**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Enrollment Limitation:** Eligibility for the Honors Program.  
**Transferable:** CSU; UC (UC credit limitation: PSYC 300, 305, & 480 combined: maximum credit, one course)  
**General Education:** AA/AS Area V(b); CSU Area D; Cal-GETC Area 4 (effective Fall 2023); IGETC Area 4  
**C-ID:** C-ID PSY 110

This course is for psychology majors, behavioral science majors, and other students who desire a challenging, issues-oriented introduction to the general principles of psychology. Topics include the scientific method, statistics, biological determinants, and general processes of behavior, such as development, learning, language, intelligence, perception, motivation, emotion, personality, and mental health. In comparison to PSYC 300, this honors course uses an intensive instructional methodology designed to challenge students and cultivate advanced critical thinking skills. Instruction emphasizes critical thinking in a seminar style, where the focus is on analysis and evaluation of psychological theories and research studies as they relate to practical, everyday issues. Honor students will also develop proficiency in library and internet-based research, make oral and written presentations, and participate in student-led group discussions. An APA style research paper is also required. This course is not open to students who have completed PSYC 300.

**PSYC 481 Honors Abnormal Behavior**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** Placement into ENGWR 480 through the assessment process.  
**Transferable:** CSU; UC (UC credit limitation: PSYC 340 & 481 combined: maximum credit, one course)  
**General Education:** AA/AS Area III(b); CSU Area D9; CSU Area E1; Cal-GETC Area 4 (effective Fall 2023); IGETC Area 4I  
**C-ID:** C-ID PSY 120

This honors course is for psychology majors, behavioral science majors, and others who desire a challenging, critical thinking, and issues-oriented exploration of normality and abnormality. It examines the origins, symptoms, and treatment of psychological disorders through first-person accounts, the role of multicultural factors, and various theoretical stances. It focuses on thorough analysis and evaluation of biopsychosocial theories and research studies as they relate to the development and persistence of behavior disorders and treatment approaches. In comparison to PSYC 340: Abnormal behavior, this honors course uses an intensive instructional methodology designed to challenge motivated students and cultivate advanced critical thinking skills. Instruction emphasizes critical thinking in a seminar style, where the focus is on analysis and evaluation of psychological theories, case studies, journal research articles, and the Diagnostic and Statistical Manual of Mental Disorders (5th edition) as they relate to the understanding of abnormal psychology. Honor students will also develop proficiency in library and internet-based research, make oral and written presentations, and participate in student-led group discussions. This course is not open to students who have taken PSYC 340.

**PSYC 495 Independent Studies in Psychology**

**Units:** 1 - 3  
**Hours:** 54 - 162 hours LAB  
**Prerequisite:** None.  

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the
study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

**PSYC 499 Experimental Offering in Psychology**

Units: 0.5 - 4  
Prerequisite: None.

This is the experimental courses description.
Real Estate

ARC's Real Estate program offers students a variety of classes. Students can pursue an Associate's degree, certificate, or department certificate. The Associate's degree can be a pathway to a career as a real estate salesperson or broker, or as a small business owner.

Degrees and Certificates Offered

A.A. in Real Estate
Real Estate Certificate
Real Estate Sales Certificate

Division Dean Kirsten Corbin
Department Chair Rachna Nagi-Condos
Phone (916) 484-8361

Associate Degree

A.A. in Real Estate

This degree focuses on the practical application of concepts utilized in real estate markets and career fields. Course work includes real estate principles, legal aspects, practice, finance, economics, and appraisal.

Total Units: 34 - 35

The Real Estate Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- Identify and explain the major functional areas of real estate, including legal aspects, finance, economics, real estate practice, and appraisal.
- Demonstrate effective leadership skills in a real estate environment.
- Analyze practical real estate problems.
- Integrate real estate principles related to finance, law, products, services and information.
- Assess current real estate market conditions.
- Recommend appropriate sales strategies, based on market conditions.
- Qualify for the California Real Estate Brokers and Salesperson license examinations.
- Utilize research and critical thinking to evaluate and recommend alternative solutions to real estate problems.

Career Information

Real estate salesperson; real estate broker; real estate appraiser; small business owner

Certificate of Achievement

Real Estate Certificate

This certificate introduces the basic concepts of the real estate career field. Topics include the principles of real estate, law, economics, finance, practice and appraisal.

MKT 310 | Selling Professionally | (3)
MKT 314 | Advertising | (3)

Total Units: **24**

**Student Learning Outcomes**

Upon completion of this program, the student will be able to:

- Apply a basic knowledge of the fundamental concepts of real estate.
- Define the technical terminology involved in the real estate field.
- Interpret and apply a knowledge of real estate transactions.
- Qualify for the California Real Estate Salesperson's License Examination.
- Analyze real estate situations and property, interpret the data, and properly complete deposit receipts.

**Certificate**

**Real Estate Sales Certificate**

This certificate introduces the basic concepts of the real estate career field, with a specific focus on sales. Topics include the principles of real estate, law, economics, finance, practice, and appraisal.

**Student Learning Outcomes**

Upon completion of this program, the student will be able to:

- apply a basic knowledge of the fundamental concepts of real estate
- define the technical terminology involved in the real estate field
- interpret and apply a knowledge of real estate transactions
- qualify for the California Real Estate Salesperson's License Examination

**Real Estate (RE) Courses**

**RE 295 Independent Studies in Real Estate**

Units: **1 - 3**

**RE 299 Experimental Offering in Real Estate**

Units: **0.5 - 4**

Prerequisite: None.

This is the experimental courses description.

**RE 300 California Real Estate Principles**

Units: **3**

Hours: **54 hours LEC**

Prerequisite: None.

Transferable: CSU

This course covers the basic laws and principles of California real estate. It provides the background and terminology necessary for advanced study in specialized courses. This course is required by the California Department of Real Estate prior to taking the real estate salesperson's examination.

**RE 310 Real Estate Practice**

Units: **3**

Hours: **54 hours LEC**

Prerequisite: None.

Transferable: CSU

This course covers the daily operations in the role of real estate agent or broker. It includes listing, prospecting, advertising, financing, sales techniques, escrow, and ethics. This course also covers basic laws and practices of California real estate and provides background and terminology necessary for advanced study in more specialized courses. This course applies towards the educational requirements for the California State Broker's examination.

**RE 320 Real Estate Finance**

Units: **3**

Hours: **54 hours LEC**

Prerequisite: None.

Advisory: RE 300; RE 300; ENGWR 102 or 103 and ENGRD 116 or ESLR 320 and ESLW 320; BUS 105

Transferable: CSU

This course covers real estate financing, including lending policies and problems in financing transactions in residential apartments and commercial and special purpose properties. Methods of financing properties are emphasized. It meets one of the educational requirements to qualify for the California Department of Real Estate broker's examination.

**RE 330 Legal Aspects of Real Estate**

Units: **3**

Hours: **54 hours LEC**

Prerequisite: None.

Advisory: RE 300; RE 300; ENGWR 102 or 103 and ENGRD 116 or ESLR 320 and ESLW 320; BUS 105

Transferable: CSU

This course covers California real estate laws, including methods of ownership, estates, transfers, financing instruments, foreclosures, leasing, contracts, and agency. It meets one of the educational...
requirements to qualify for the California Department of Real Estate broker's examination.

**RE 342 Real Estate Appraisal**

- **Units:** 3
- **Hours:** 62 hours LEC
- **Prerequisite:** None.
- **Transferable:** CSU

This course covers entry-level education in the real estate appraisal field, concentrating on the appraisal of single-family residences (real property). It covers Basic Appraisal Principles (30 Hours) and Basic Appraisal Procedures (30 Hours) pursuant to the Appraiser Qualifications Board's (AQB) Real Property Appraiser Qualification Criteria (effective January 1, 2008). This course is designed to meet the California Bureau of Real Estate Appraisers (BREA) requirements for Basic Education (60 Hours). It also meets the California Bureau of Real Estate (BRE) college-level educational requirements (3 semester units) for the salesperson and broker examinations.

**RE 350 Real Property Management**

- **Units:** 3
- **Hours:** 54 hours LEC
- **Prerequisite:** None.
- **Transferable:** CSU

This course covers operation and management of real property marketing procedures, leases, maintenance, insurance, accounting, records, public and human relations, employer responsibilities, and selection of personnel and agreements. This course applies towards the educational requirements for the California State Broker's Examination.

**RE 360 Real Estate Economics**

- **Units:** 3
- **Hours:** 54 hours LEC
- **Prerequisite:** None.
- **Transferable:** CSU

This course covers the nature and classification of real estate and real estate investments. Topics include economic development of real property, real estate cycles and market trends, and governmental and private sector influence on the economics of real estate. It is recommended that this course be taken last in the real estate series. This course meets one of the educational requirements to qualify for the California Bureau of Real Estate broker's examination.

**RE 495 Independent Studies in Real Estate**

- **Units:** 1 - 3
- **Hours:** 54 - 162 hours LAB
- **Prerequisite:** None.
- **Transferable:** CSU

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

**RE 499 Experimental Offering in Real Estate**

- **Units:** 0.5 - 4
- **Prerequisite:** None.
- **Transferable:** CSU

This is the experimental courses description.
Recreation

ARC’s recreation program offers an associate degree that provides training for an entry-level career in the field of recreation and leisure services. Our program explores the many career fields in recreation, including public service, private recreation, outdoor recreation, and leadership positions.

Total Units: 20

The Recreation Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

• analyze community needs for parks and recreation programs.
• create recreation programs and supervise staff.
• demonstrate leadership skills in recreation programs.
• administer a wide variety of parks and community services.

Career Information

Careers in recreation include jobs in park facilities and services in federal, state, municipal, and voluntary nonprofit agencies. Commercial and private recreation also provide opportunities for employment. Travel and tourism, club management, resort recreation, food and beverage services, lodging, professional sports, entertainment, and cultural services are very much an integral part of the recreation and leisure services market.

Recreation (RECR) Courses

ReCR 300 Introduction to Recreation and Leisure Services

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Transferable: CSU

This course is an overview of recreation, park, and leisure services. It covers recreation as a form of community service, as well as the nature, scope, and significance of leisure and recreation as a social force in contemporary society. It emphasizes the role of the professional leader in organizing recreation programs and services, operations, facilities, and resources. Field trips may be required.

ReCR 310 Outdoor Recreation

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Transferable: CSU

This course is an orientation to job opportunities in the outdoor recreation field. It includes an overview of different types of outdoor recreation, socio-economic factors in outdoor recreation, the role of government, the role of the private sector, management, and issues and trends in outdoor recreation. Philosophies and operating purposes of outdoor recreation facilities run by federal, state, and local governments are discussed. Virtual and or in-person field trips are required.

ReCR 320 Recreation Activity Leadership

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGR 300; OR ESLW 340.
Transferable: CSU

This is a basic course for recreation majors, involving a study of essential elements and basic principles of organization and leadership of various types of recreation programs. It covers the methods and materials used in planning and conducting organized recreation programs in public and private agencies. It also emphasizes the role of the face-to-face leader in organizing recreational programs in a variety of settings. Field trips are required.

ReCR 498 Work Experience in Recreation

Units: 0.5 - 4
Hours: 30 - 300 hours LAB
Prerequisite: None.
Enrollment Limitation: Students must be in a paid or unpaid internship, volunteer position, or job related to recreation with a cooperating site supervisor. Students are advised to consult with the Recreation Department faculty to review specific certificate and degree work experience requirements.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGR 300; OR ESLW 340.
Transferable: CSU
General Education: AA/AS Area III(b)

This course provides students with opportunities to develop marketable skills in preparation for employment or advancement within the field of recreation. It is designed for students interested in work experience and/or internships in transfer-level degree occupational programs. Course content includes understanding the application of education to the workforce, completion of Title 5 required forms which document the student's progress and hours spent at an approved training site, and
developing workplace skills and competencies.

During the semester, the student is required to complete 37.5 hours of related paid work experience, or 30 hours of related unpaid work experience for 0.5 unit. An additional 37.5 or 30 hours of related work experience is required for each additional 0.5 units. All students are required to attend the first course meeting, a mid-semester meeting, and a final meeting. Additionally, students who have not already successfully completed a Work Experience course will be required to attend weekly orientations while returning participants may meet individually with the instructor as needed. Students may take up to 16 units total across all Work Experience course offerings. This course may be taken up to four times when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

**RECR 499 Experimental Offering in Recreation**

**Units:** 0.5 - 4  
**Prerequisite:** None.  
**Transferable:** CSU

This is the experimental courses description.
Regional Public Safety Training Center

The Regional Public Safety Training Center (RPSTC), operated by American River College, is dedicated to providing high quality training and educational programs for public safety personnel. The center offers entry-level and advanced in-service instruction in areas that meet the needs of individuals as well as public and private agencies.

All courses meet the academic standards of the Los Rios Community College District. These courses may be certified by the California Commission on Peace Officers Standards and Training (POST), California Standards and Training for Corrections (STC), and the California State Fire Marshal’s Office. Most courses presented at the SRPSTC are offered in an intensive, concentrated, short-term format.

Graduates from the basic core courses may be eligible for employment in county and city law enforcement agencies specializing in police, corrections and/or probation.

Fire and Forestry Services (FFS) Courses

FFS 1500 All Hazards Operations Section Chief (S-430/E-958)

Units: 1.5
Hours: 24.5 hours LEC; 7.70 hours LAB
Prerequisite: FFS 1510, 1511, and 1514 with grades of "C" or better
Enrollment Limitation: To enroll in this course (FFS 1500) the student must be an employee of a federal wildland fire fighting agency, which includes: United States Department of Agriculture, Forest Service, the United States Department of Interior’s Bureau of Land Management, National Park Service, United States Fish and Wildlife Service, the Bureau of Indian Affairs, or a member of a local or state fire agency.

The purpose of this course is to provide local and state-level emergency responders with an overview of key duties and responsibilities of an Operations Section Chief Type-III in a Type III All-Hazards Incident Management Team (AHIMT). Topics include roles and responsibilities, management cycle, strategy and planning, contingency planning, supervision and communications, managing and adjusting the operations section, risk assessment and safety management, and personnel interaction. Pass/No Pass only.

FFS 1501 United States Department of Agriculture (USDA) Foundational Academy

Units: 7
Hours: 114.5 hours LEC; 45.5 hours LAB
Prerequisite: None.
Enrollment Limitation: To enroll in this course (FFS 1501) the student must be an employee of a federal wildland fire fighting agency, which includes: United States Department of Agriculture, Forest Service, the United States Department of Interior’s Bureau of Land Management, National Park Service, United States Fish and Wildlife Service, the Bureau of Indian Affairs.

This course is designed to provide the skills and knowledge necessary to perform as a team leader. Topics include leadership, fire fighting skills, fire behavior, basic air operations, firing equipment and techniques, fireline fatalities, and physical training. This course is presented in a formal academy setting. This course was formerly listed as FIRE 1502. This course is not open to students who have completed FIRE 1502. Pass/No Pass only.

FFS 1502 United States Department of Agriculture (USDA) Core Academy

Units: 5.5
Hours: 63.5 hours LEC; 112.5 hours LAB
Prerequisite: FFS 1501 with a grade of "C" or better
Enrollment Limitation: To enroll in this course (FFS 1502) the student must be an employee of a federal wildland fire fighting agency, which includes: United States Department of Agriculture, Forest Service, the United States Department of Interior’s Bureau of Land Management, National Park Service, United States Fish and Wildlife Service, the Bureau of Indian Affairs.

This course is designed to provide the skills and knowledge necessary to perform as a skilled Wildland Firefighter. Topics include physical fitness, wellness, nutrition, first responder medical, risk and safety, effects of fire, firing operations, helicopter transport of external loads, fire line construction, hand tool use, communications, leadership, and firefighter skills. The academy is presented in a formal setting. This course was formerly listed as FIRE 1501. This course is not open to students who have completed FIRE 1501. Pass/No Pass Only.

FFS 1503 USDA Suburban Emergency Response (SUBE)

Units: 1.25
Hours: 20 hours LEC; 12 hours LAB
Prerequisite: None.
Enrollment Limitation: To enroll in this course (FFS 1503) the student must 1) be an employee of a federal wildland fire fighting agency, which includes: United States Department of Agriculture, Forest Service, the United States Department of Interior’s Bureau of Land Management, National Park Service, United States Fish and Wildlife Service, the Bureau of Indian Affairs, or a member of a local or state fire agency, 2) have obtained Advanced Firefighter/Squad Boss (FFT1), and 3) be required to meet OSHA requirements concerning facial hair and Self Contained Breathing Apparatus (SCBA).

The course provides a baseline training level to assist the performance on a variety of all-risk emergency incidents. Topics include being able to recognize hazardous situations that may arise in the wildland interface and act responsibility under current regulations and policies utilizing current fire suppression tactics and protective equipment.

FFS 1510 Intermediate Incident Command System (I-300)

Units: 0.75
Hours: 12.5 hours LEC; 5.5 hours LAB
Prerequisite: None.
Enrollment Limitation: To enroll in this course (FFS 1510) the student must be 1) an employee of a federal wildland fire fighting agency, which includes: United States Department of Agriculture, Forest Service, the United States Department of Interior’s Bureau of Land Management, National Park Service, United States Fish and Wildlife Service, the Bureau of Indian Affairs, or a member of a local or state fire agency, and 2) successful completion of Incident Command System (I-200), which is an online course offered by Federal Emergency Management Agency (FEMA).

This course provides expanded description and detail of the organization and operation of the Incident Command System (ICS). Topics include management of expanding incidents, incident/event management process, and development of an Incident Action Plan (IAP). This course was formerly listed as FIRE 1622 prior to November 2017. This course is not open to students who have completed FIRE 1622.

FFS 1511 Advanced Incident Command System (I-400)

Units: 0.75
Hours: 16 hours LEC
Prerequisite: FFS 1510
Enrollment Limitation: To enroll in this course (FFS 1511) the student must be 1) an employee of a federal wildland fire fighting agency, which includes: United States Department of Agriculture, Forest Service, the United States Department of Interior’s Bureau of Land Management, National Park Service, United States Fish and Wildlife Service, the Bureau of Indian Affairs, or a member of a local or state fire agency.

This course provides in-depth training in the Incident Command System (ICS) and its components. This course provides the necessary training needed to manage and command large scale complex incidents, as well as to the knowledge to develop organizational structures. Topics include fundamentals review for command and general staff, major and/ or complex incident/event management, area command, and multi-agency coordination. This course was formerly listed as FIRE 1623 prior to November 2017.

FFS 1512 National Incident Management System (NIMS) ICS All-Hazards Safety Officer (E954)

Units: 1.5
Hours: 27 hours LEC; 5 hours LAB
Prerequisite: FFS 1510, 1511, and 1514 with grades of "C" or better
Enrollment Limitation: To enroll in this course (FFS 1512) the student must be an employee of a federal wildland fire fighting agency, which includes: United States Department of Agriculture, Forest Service, the United States Department of Interior’s Bureau of Land Management, National Park Service, United States Fish and Wildlife Service, the Bureau of Indian Affairs, or a member of a local or state fire agency.

This course provides local and state-level emergency responders with an overview of key duties and responsibilities of a safety officer type III in a type-III All-Hazards Incident Management Team (AHIMT). Topics include incident safety officer’s role, obtaining information, identifying hazards and risks, prioritizing and managing hazards and risks, site safety and control planning, and incident safety planning. Pass/No Pass only.

FFS 1514 Command and General Staff (S-420)

Units: 1.5
Hours: 26 hours LEC; 10 hours LAB
Prerequisite: None.
Enrollment Limitation: To enroll in this course (FFS 1514) the student must be 1) an employee of a federal wildland fire fighting agency, which includes: United States Department of Agriculture, Forest Service, the United States Department of Interior’s Bureau of Land Management, National Park Service, United States Fish and Wildlife Service, the Bureau of Indian Affairs, or a member of a local or state fire agency, and 2) strongly recommended that the student has completed all prerequisite experience and course work to be qualified at the type 2 level as an incident commander (ICT2), command, or general staff.

This course prepares students to function effectively in the position of a type 2 incident commander, command, or general staff. It focuses on the application of previously acquired knowledge and skills. Topics include effective decision making, team interaction, transfer of command, and the planning process. Pass/No Pass only.

FFS 1516 National Incident Management System (NIMS) ICS All-Hazards Division/Group Supervisor (E960/S339)

Units: 0.75
Hours: 13.75 hours LEC; 6.25 hours LAB
Prerequisite: None.
Enrollment Limitation: Qualified as a Task Force Leader (TFLD) OR qualified as an Incident Commander Type 3 (ICT3) OR qualified as an Incident Commander Type 4 (ICT4) and in any two strike team leader positions (one must be STCR or STEN).

The purpose of this course is to provide local and State-level emergency responders with an overview of key duties and responsibilities of a Division/Group Supervisor type-III in a type-III All-Hazards Incident Management Team (AHIMT). Topics include overview of the Strike Team/Task Force Leader Positions, Division/Group management and personnel management, information gathering and briefings, and the role in the planning process. Pass/No Pass only.

FFS 1518 Fire Program Management (M-581)

Units: 2
Hours: 36 hours LEC
Prerequisite: None.
Enrollment Limitation: To enroll in this course (FFS 1518) the student must be 1) an employee of a federal wildland fire fighting agency, which includes: United States Department of Agriculture, Forest Service, the United States Department of Interior’s Bureau of Land Management, National Park Service, United States Fish and Wildlife Service, the Bureau of Indian Affairs, or a member of a local or state fire agency, 2) recommends students obtain the competencies provided in Fireline Leadership (L-380), 3) Introduction to Fire Effects (RX-310), and 4) Intermediate ICS (ICS-300) prior to attending this course.

This training course meet the needs of current and future unit-level fire program managers. It is intended to aid in the application of fire management principles in sound decision making, business management, human resource management, administrative functions, use of state-of-the-art tools and methods in fire management programs, and recognition of the necessity for personal accountability required in fire program management. Topics include safety, decision making, laws, fire management plans, policy, budget planning, execution and monitoring, management implications, preparedness, and managing the fire program. Pass/No Pass only.

FFS 1519 Facilitative Instructor (M-410)

Units: 1.25
Hours: 17 hours LEC; 19 hours LAB
Prerequisite: None.
Enrollment Limitation: To enroll in this course (FFS 1519) the student must be 1) an employee of a federal wildland fire fighting agency, which includes: United States Department of Agriculture, Forest Service, the United States Department of Interior’s Bureau of Land Management, National Park Service, United States Fish and Wildlife Service, the Bureau of Indian Affairs, or a member of a local or state fire agency.

This course presents quality instructional delivery methods with an emphasis on student-oriented adult training techniques. It is designed for students to meet National Wildfire Coordinating Group (NWCG) instructor requirements. Topics include instructional tools and equipment, verbal and nonverbal communications, presentation skills, course coordination, and ethics. Pass/No Pass only.

FFS 1520 Helibase Manager (S-371)

Units: 1
Hours: 13 hours LEC; 19 hours LAB
Prerequisite: None.
Enrollment Limitation: To enroll in this course (FFS 1520) the student must 1) be an employee of a federal wildland fire fighting agency, which includes: United States Department of Agriculture, Forest Service, the United States Department of Interior’s Bureau of Land Management, National Park Service, United States Fish and Wildlife Service, the Bureau of Indian Affairs, or a member of a local or state fire agency, and 2) qualified as a helicopter manager, single resource (HMGB).

This course provides students with the skills necessary to perform as a helibase manager through facilitated discussions and group exercises. It gives students a realistic helibase manager experience which prompts the student to communicate, resolve issues, and make decisions in support of an incident. Topics include common responsibilities, policies, and duties, helibase organization, briefings, selection and layout, helibase tactical log, emergency procedure, and military aviation operations. Pass/No Pass only.

FFS 1521 Helicopter Manager (S-372)

Units: 1.25
Hours: 20 hours LEC; 20 hours LAB
Prerequisite: None.
Enrollment Limitation: To enroll in this course (FFS 1521) the student must 1) be an employee of a federal wildland fire fighting agency, which includes: United States Department of Agriculture, Forest Service, the United States Department of Interior’s Bureau of Land Management, National Park Service, United States Fish and Wildlife Service, the Bureau of Indian Affairs, or a member of a local or state fire agency, and 2) satisfactory performance as a helicopter crewmember.

This course prepares students to perform the job of helicopter manager. Topics include policy, dispatching and ordering, contract administration and pay documents, load calculations, risk management and simulation. The final exercise gives students a realistic helicopter manager experience. Pass/No Pass only.

**FFS 1522 Air Support Group Supervisor (S-375)**

**Units:** 1

**Hours:** 20 hours LEC

**Prerequisite:** None.

**Enrollment Limitation:** To enroll in this course (FFS 1522) the student must 1) be an employee of a federal wildland fire fighting agency, which includes: United States Department of Agriculture, Forest Service, the United States Department of Interior’s Bureau of Land Management, National Park Service, United States Fish and Wildlife Service, the Bureau of Indian Affairs, or a member of a local or state fire agency, and 2) qualified as a helibase manager type 1 (HEB1).

This course prepares the student for the duties and responsibilities of the Air Support Group Supervisor (ASGS). Topics include addressing aviation safety, risk management, airspace coordination, dispatch relations and coordination, fixed-wing, rotor-wing, and military operations. This course is to prepare students to make the transition from being a type 1 helibase manager (HEB1) to an ASGS. Pass/No Pass only.

**FFS 1523 Aerial Supervision (S-378)**

**Units:** 1.75

**Hours:** 32 hours LEC; 8 hours LAB

**Prerequisite:** None.

**Enrollment Limitation:** To enroll in this course (FFS 1523) the student must be an employee of a federal wildland fire fighting agency, which includes: United States Department of Agriculture, Forest Service, the United States Department of Interior’s Bureau of Land Management, National Park Service, United States Fish and Wildlife Service, the Bureau of Indian Affairs, or a member of a state fire agency.

This course is designed to meet the training needs of an Air Tactical Group Supervisor (ATGS), Helicopter Coordinator (HLCO), lead plane pilot, Air Tanker Coordinator (ATCO), and Aerial Supervision Module (ASM) crewmember as outlined in the Interagency Aerial Supervision Guide (IASG). Topics include aerial supervision program introduction, aerial supervision roles and responsibilities, administration, training, certification, currency, policies, incident aircraft, suppressants and retardants, aerial supervision mission procedures, aerial firefighting strategy and tactics, incident aircraft operations, all-hazard incidents, and safety. Pass/No Pass only.

**FFS 1524 Helicopter Management Refresher (RT-372)**

**Units:** 1

**Hours:** 20 hours LEC

**Prerequisite:** FFS 1521 with a grade of “C” or better

**Enrollment Limitation:** To enroll in this course (FFS 1524) the student must be an employee of a federal wildland fire fighting agency, which includes: United States Department of Agriculture, Forest Service, the United States Department of Interior’s Bureau of Land Management, National Park Service, United States Fish and Wildlife Service, the Bureau of Indian Affairs, or a member of a local or state fire agency.

This course is a refresher course for the job of helicopter manager. Topics include policy review, dispatching and ordering, contract administration and pay documents update, risk management, and operational review. Pass/No Pass only.

**FFS 1525 Air Tactical Group Supervisor (ATGS) Workshop (RT-378)**

**Units:** 1

**Hours:** 20 hours LEC

**Prerequisite:** FFS 1522 and 1523 with grades of “C” or better

**Enrollment Limitation:** To enroll in this course (FFS 1525) the student must be an employee of a federal wildland fire fighting agency, which includes: United States Department of Agriculture, Forest Service, the United States Department of Interior’s Bureau of Land Management, National Park Service, United States Fish and Wildlife Service, the Bureau of Indian Affairs, or a member of a local or state fire agency.

This is a workshop course for the job of Air Tactical Group Supervisor (ATGS). Topics include aviation safety/risk management, airspace coordination, dispatch coordination, fixed-wing and rotor-wing operations, contract administration, and operational review. Pass/No Pass only.

**FFS 1530 Expanded Dispatch Support Dispatcher (D-310)**

**Units:** 1.5

**Hours:** 23.5 hours LEC; 12.5 hours LAB

**Prerequisite:** None.

**Enrollment Limitation:** To enroll in this course (FFS 1530) the student must 1) be an employee of a federal wildland fire fighting agency, which includes: United States Department of Agriculture, Forest Service, the United States Department of Interior’s Bureau of Land Management, National Park Service, United States Fish and Wildlife Service, the Bureau of Indian Affairs, or a member of a local or state fire agency, and 2) qualified as an expanded dispatch recorder (EDRC).

This course prepares the student to accomplish the duties and responsibilities of an Expanded Dispatch Support Dispatcher (EDSD). Topics include Resource Ordering and Status System (ROSS); planning and implementing a dispatch area to meet the needs of the incident(s); policies and procedures using resource orders and supplemental forms; mobilizing, reassigning, and demobilizing resources; and demonstrating the ability to respond to changing priorities and situations. Pass/No Pass only.

**FFS 1531 Initial Attack Dispatcher (D-311)**

**Units:** 1.25

**Hours:** 22 hours LEC; 10 hours LAB

**Prerequisite:** FFS 1540 with a grade of “C” or better

**Enrollment Limitation:** To enroll in this course (FFS 1531) the student must 1) be an employee of a federal wildland fire fighting agency, which includes: United States Department of Agriculture, Forest Service, the United States Department of Interior’s Bureau of Land Management, National Park Service, United States Fish and Wildlife Service, the Bureau of Indian Affairs, or a member of a local or state fire agency, 2) successful completion of Basic Firefighter (S-130), and 3) qualified as dispatch recorder (EDRC).

This course provides a consistent knowledge and skill base for the initial attack dispatcher (IADP). It includes concepts that will help an IADP perform at an acceptable level on a national basis without regard to geographic boundaries. Topics include initial attack dispatching, extended attack support, maps and aviation charts, and radio use. Pass/No Pass only.

**FFS 1532 Aircraft Dispatcher (D-312)**

**Units:** 1.75

**Hours:** 32 hours LEC; 8 hours LAB

**Prerequisite:** None.

**Enrollment Limitation:** To enroll in this course (FFS 1532) the student must 1) be an employee of a federal wildland fire fighting agency, which includes: United States Department of Agriculture, Forest Service, the
United States Department of Interior’s Bureau of Land Management, National Park Service, United States Fish and Wildlife Service, the Bureau of Indian Affairs, or a member of a local or state fire agency, and 2) qualified as dispatch recorder (EDRC).

This course provides a consistent knowledge and skill base for the aircraft dispatcher (ACDP). It includes concepts that will help an ACDP perform at an acceptable level on a national basis without regard to geographic boundaries. It also provides an overview of aircraft dispatching, maps and aviation charts, decision making, situational awareness, airspace coordination, safety, and aircraft. Pass/No Pass only.

**FFS 1533 ROSS Dispatch (NROSSD)**

**Units:** 1.5  
**Hours:** 28.5 hours LEC; 3.5 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** To enroll in this course (FFS 1533) the student must 1) be an employee of a federal wildland fire fighting agency, which includes: United States Department of Agriculture, Forest Service, the United States Department of Interior’s Bureau of Land Management, National Park Service, United States Fish and Wildlife Service, the Bureau of Indian Affairs, or a member of a local or state fire agency, and 2) have successfully completed I-100 Incident Command System (Introduction), 3) have successfully completed I-200 Incident Command System (Basic), and 4) successfully completed D-110 Expanded Dispatch Recorder.

This course prepares students to perform the duties of the Resource Ordering and Status System (ROSS) dispatching system. Topics include how to create an incident, create a request, fill orders, release and reassign resources. Pass/No Pass only.

**FFS 1534 USDA Law Enforcement Dispatch (LEDSP)**

**Units:** 1.5  
**Hours:** 28 hours LEC; 4 hours LAB  
**Prerequisite:** FFS 1531 with a grade of "C" or better  
**Enrollment Limitation:** To enroll in this course (FFS 1534) the student must 1) be an employee of a federal wildland fire fighting agency, which includes: United States Department of Agriculture, Forest Service, the United States Department of Interior’s Bureau of Land Management, National Park Service, United States Fish and Wildlife Service, the Bureau of Indian Affairs, or a member of a local or state fire agency. This is an interagency course for wildland dispatchers, designed to help the students understand the roles and functions of law enforcement dispatching in the emergency dispatch centers. Topics include law enforcement incidents, agencies, organizational structures, the importance of the dispatcher as first point of contact, appropriate response to a incident, procedures for making inquiry into law enforcement information systems, and cross referencing the information obtained within these systems. Pass/No Pass only.

**FFS 1540 Introduction to Wildland Fire Behavior (S-190)**

**Units:** 0.25  
**Hours:** 8 hours LEC  
**Prerequisite:** None.  
**Enrollment Limitation:** To enroll in this course (FFS 1540) the student must be an employee of a federal wildland fire fighting agency, which includes: United States Department of Agriculture, Forest Service, the United States Department of Interior’s Bureau of Land Management, National Park Service, United States Fish and Wildlife Service, the Bureau of Indian Affairs, or a member of a local or state fire agency. This is the first course in a series that collectively serves to develop fire behavior prediction knowledge and skills. Topics include the fire triangle, topography, fuels, weather, and fire behavior. Pass/No Pass only.

**FFS 1541 Intermediate Wildland Fire Behavior (S-290)**

**Units:** 1.75  
**Hours:** 32 hours LEC  
**Prerequisite:** FFS 1540 with a grade of "C" or better  
**Enrollment Limitation:** To enroll in this course (FFS 1541) the student must 1) be an employee of a federal wildland fire fighting agency, which includes: United States Department of Agriculture, Forest Service, the United States Department of Interior’s Bureau of Land Management, National Park Service, United States Fish and Wildlife Service, the Bureau of Indian Affairs, or a member of a local or state fire agency. This is the second course in a series that collectively serves to develop fire behavior prediction knowledge and skills. Topics include the fire environment, topographic influences, fuels, weather, wind, fuel moisture, and extreme fire behavior. Pass/No Pass only.

**FFS 1542 Introduction to Wildland Fire Behavior Calculations (S-390)**

**Units:** 1.5  
**Hours:** 29 hours LEC; 3 hours LAB  
**Prerequisite:** FFS 1541 with a grade of "C" or better  
**Enrollment Limitation:** To enroll in this course (FFS 1542) the student must 1) be an employee of a federal wildland fire fighting agency, which includes: United States Department of Agriculture, Forest Service, the United States Department of Interior’s Bureau of Land Management, National Park Service, United States Fish and Wildlife Service, the Bureau of Indian Affairs, or a member of a local or state fire agency. This course provides an introduction into fire behavior calculations by manual methods, using nomograms, and the Fireline Handbook Appendix B: Fire Behavior. Topics include studying inputs (weather, slope, fuels, and fuel moisture), interpreting fire behavior outputs, documentation processes, and fire behavior briefing components. Pass/No Pass only.

**FFS 1543 Advanced Fire Behavior Calculations (S-490)**

**Units:** 2  
**Hours:** 34 hours LEC; 6 hours LAB  
**Prerequisite:** FFS 1542 with a grade of "C" or better  
**Enrollment Limitation:** To enroll in this course (FFS 1543) the student must 1) be an employee of a federal wildland fire fighting agency, which includes: United States Department of Agriculture, Forest Service, the United States Department of Interior’s Bureau of Land Management, National Park Service, United States Fish and Wildlife Service, the Bureau of Indian Affairs, or a member of a local or state fire agency, and 2) satisfactory completion of Introduction to Wildland Fire Behavior Calculations (S-390). This course prepares students desiring to become qualified as a prescribed fire burn boss type 1 (RXB1). Topics include atmospheric stability, critical fire weather patterns, crown fire behavior, wildland fire behavior on slopes, predicting large fire growth, and adapting large scale winds to local terrain. Pass/No Pass only.

**FFS 1544 Intermediate National Fire Danger Rating System (S-491)**

**Units:** 1.5  
**Hours:** 24 hours LEC; 12 hours LAB  
**Prerequisite:** FFS 1541 and 1556 with grades of "C" or better  
**Enrollment Limitation:** To enroll in this course (FFS 1544) the student must 1) be an employee of a federal wildland fire fighting agency, which includes: United States Department of Agriculture, Forest Service, the United States Department of Interior’s Bureau of Land Management, National Park Service, United States Fish and Wildlife Service, the Bureau of Indian Affairs, or a member of a local or state fire agency, 2) demonstrate at least intermediate skills with the current Windows™ operating system, 4) possess a valid Weather Information Management System (WIMS) and Wildland Fire Management Information (WFMI).
This course provides the knowledge and skills necessary to operate, apply, and manage the National Fire Danger Rating System (NFDRS). Topics include NFDRS input, calculations and inputs, data retrieval and analysis, decisions, and application. Pass/No Pass only.

**FFS 1548 Smoke Management Techniques (RX-410)**

**Units:** 1.5
**Hours:** 28 hours LEC; 4 hours LAB
**Prerequisite:** None.
**Enrollment Limitation:** To enroll in this course (FFS 1548) the student must 1) be an employee of a federal wildland fire fighting agency, which includes: United States Department of Agriculture, Forest Service, the United States Department of Interior’s Bureau of Land Management, National Park Service, United States Fish and Wildlife Service, the Bureau of Indian Affairs, or a member of a local or state fire agency, and 2) students should have a background in prescribed fire planning, implementing, monitoring, permitting or smoke/air regulating.

This course leads students through the ecological and historical role of fire, characteristics of smoke and the health, safety and visibility impacts of smoke. Other topics include public relations, legal requirements, meteorology, fuel consumption, smoke production dispersion modeling, and operational smoke management strategies. The pre-course work assignment is designed to familiarize students with the Smoke Management Guide and air quality regulations that impact prescribed fire programs. Pass/No Pass only.

**FFS 1550 All Hazards Planning Section Chief (S-440/E-962)**

**Units:** 1.25
**Hours:** 24 hours LEC
**Prerequisite:** FFS 1510, 1511, and 1514 with grades of "C" or better
**Enrollment Limitation:** To enroll in this course (FFS 1550) the student must be an employee of a federal wildland fire fighting agency, which includes: United States Department of Agriculture, Forest Service, the United States Department of Interior’s Bureau of Land Management, National Park Service, United States Fish and Wildlife Service, the Bureau of Indian Affairs, or a member of a local or state fire agency, and 2) Resources Unit Leader (RESL), Situation Unit Leader (SITL), Planning Section Chief type 3 (PSC3), Operations Section Chief type 2 (OSC2), Safety Officer type 2 (SOF2), or Logistics Section Chief type 2 (LSC2).

This course provides local and state-level emergency responders with an overview of key duties and responsibilities of a Planning Section Chief type-III in a Type III All-Hazards Incident Management Team (AHIMT). Topics include the role of the Planning Section Chief, Resources Unit and Situation Unit, initial response, the planning cycle, interactions, and an overview of the documentation and demobilization units. Pass/No Pass only.

**FFS 1552 National Incident Management System (NIMS) ICS All-Hazards Resources Unit Leader (E965/S349)**

**Units:** 1
**Hours:** 15.5 hours LEC; 9.5 hours LAB
**Prerequisite:** FFS 1510, 1511, and 1514 with grades of "C" or better
**Enrollment Limitation:** To enroll in the course, you must be an employee of a federal wildland fire fighting agency, which includes: United States Department of Agriculture, Forest Service, the United States Department of Interior’s Bureau of Land Management, National Park Service, United States Fish and Wildlife Service and the Bureau of Indian Affairs, or a member of a Local, or State Fire Agency.

This course provides local and State-level emergency responders with an overview of key duties and responsibilities of a Resources Unit Leader (RESL) type III in a type-III All-Hazards Incident Management Team (AHIMT). Topics include overview of the planning section and process, overview of the resources unit, tracking resource status, operational planning, unit products/outputs, and demobilization. Pass/No Pass only.
FFS 1553 Incident Training Specialist (S-445)

Units: 1
Hours: 18 hours LEC
Prerequisite: FFS 1541 with a grade of “C” or better
Enrollment Limitation: To enroll in this course (FFS 1553) the student must be an employee of a federal wildland fire fighting agency, which includes: United States Department of Agriculture, Forest Service, the United States Department of Interior’s Bureau of Land Management, National Park Service, United States Fish and Wildlife Service, the Bureau of Indian Affairs, or a member of a local or state fire agency.

The course is designed to meet the training needs of the incident training specialist (TNSP) on an incident as outlined in the Wildland Fire Qualification System Guide PMS 310-1, and the position task book. Topics include roles and responsibilities, initiating the incident training program, individual training plans, and incident training activities. Pass/No Pass only.

FFS 1556 Weather Information Management System (WIMS)

Units: 1
Hours: 16 hours LEC; 8 hours LAB
Prerequisite: FFS 1541 with a grade of “C” or better
Enrollment Limitation: To enroll in this course (FFS 1556) the student must be an employee of a federal wildland fire fighting agency, which includes: United States Department of Agriculture, Forest Service, the United States Department of Interior’s Bureau of Land Management, National Park Service, United States Fish and Wildlife Service, the Bureau of Indian Affairs, or a member of a local or state fire agency.

This course meets the training needs of individuals charged with the collection and maintenance of fire weather data collected from remote automated weather systems used to support the National Fire Danger Rating System (NFDRS). Topics include WIMS navigation and functionality, weather station siting and maintenance, observations, weather forecaster interactions, managing the model, viewing outputs, and troubleshooting. Pass/No Pass only.

FFS 1560 All-Hazards Logistics Section Chief (E-967)

Units: 2
Hours: 35 hours LEC; 5 hours LAB
Prerequisite: FFS 1510, 1511, and 1514 with grades of “C” or better
Enrollment Limitation: To enroll in this course (FFS 1560) the student must be an employee of a federal wildland fire fighting agency, which includes: United States Department of Agriculture, Forest Service, the United States Department of Interior’s Bureau of Land Management, National Park Service, United States Fish and Wildlife Service, the Bureau of Indian Affairs, or a member of a local or state fire agency.

This course provides local and state-level emergency responders with an overview of key duties and responsibilities of a logistics section chief on a type III or IV All Hazards Incident Management Team (AHIMT). Topics include overview of the facilities, ground support, supply, food, medical, and communications units as well as coordination with command and general staff. Pass/No Pass only.

FFS 1562 Facilities Unit Leader (S-354)

Units: 1
Hours: 20.5 hours LEC; 3.5 hours LAB
Prerequisite: None
Enrollment Limitation: To enroll in this course (FFS 1562) the student must 1) be an employee of a federal wildland fire fighting agency, which includes: United States Department of Agriculture, Forest Service, the United States Department of Interior’s Bureau of Land Management, National Park Service, United States Fish and Wildlife Service, the Bureau of Indian Affairs, or a member of a local or state fire agency, and 2) satisfactory performance as a base/camp manager (BCMCG).

FFS 1563 Ground Support Unit Leader (S-355)

Units: 0.5
Hours: 12 hours LEC; 4 hours LAB
Prerequisite: None
Enrollment Limitation: To enroll in this course (FFS 1563) the student must be an employee of a federal wildland fire fighting agency, which includes: United States Department of Agriculture, Forest Service, the United States Department of Interior’s Bureau of Land Management, National Park Service, United States Fish and Wildlife Service, the Bureau of Indian Affairs, or a member of a local or state fire agency.

This course prepares students to perform the duties of managing the transportation plan, maintenance, and related services at an incident. Topics include gathering information about the assignment; organizing, staffing, and laying out the unit; field inspection of equipment; operation and coordination of the unit with other units; and demobilization. Pass/No Pass only.

FFS 1564 All-Hazards Supply Unit Leader (E-970/S-356)

Units: 1.25
Hours: 21 hours LEC; 9 hours LAB
Prerequisite: None
Enrollment Limitation: To enroll in this course (FFS 1564) the student must be an employee of a federal wildland fire fighting agency, which includes: United States Department of Agriculture, Forest Service, the United States Department of Interior’s Bureau of Land Management, National Park Service, United States Fish and Wildlife Service, the Bureau of Indian Affairs, or a member of a local or state fire agency.

This course provides the information required for a supply unit leader in the Incident Command System’s (ICS) logistics section. Topics include setup and management of the supply unit, demobilization, the ordering process, maintaining inventory, incident mobilization, initial situational awareness, and receiving and distributing items. Pass/No Pass only.

FFS 1565 Food Unit Leader (S-357)

Units: 1.5
Hours: 28 hours LEC; 4 hours LAB
Prerequisite: None
Enrollment Limitation: To enroll in this course (FFS 1565) the student must be an employee of a federal wildland fire fighting agency, which includes: United States Department of Agriculture, Forest Service, the United States Department of Interior’s Bureau of Land Management, National Park Service, United States Fish and Wildlife Service, the Bureau of Indian Affairs, or a member of a local or state fire agency.

This course meets the training needs of a food unit leader (FDUL). Topics include information about the assignment, coordination, general information, safe food handling, national contract administration, alternate feeding methods, and demobilization. A significant portion of this course is devoted to examining the administration of the National Mobile Food Services Contract as it applies to the FDUL. Pass/No Pass only.

FFS 1566 Remote Automated Weather Station (RAWS) Maintenance

Units: 1.25
Hours: 23.5 hours LEC; 4.5 hours LAB
Prerequisite: None
Enrollment Limitation: To enroll in this course (FFS 1566) the student must be an employee of a federal wildland fire fighting agency, which includes: United States Department of Agriculture, Forest Service, the United States Department of Interior’s Bureau of Land Management,
National Park Service, United States Fish and Wildlife Service, the Bureau of Indian Affairs, or a member of a local or state fire agency. This course trains students to understand National Fire Danger Rating System (NFDRS) requirements concerning RAWS stations. Topics include Wildfire Management Information (WFMI), weather navigation, checking observations, ordering parts, and completing post-trip input data. Pass/No Pass only

**FFS 1570 National Incident Management System (NIMS) ICS All-Hazards Finance/Administration Unit Leader (E-975)**

**Units:** 1.25  
**Hours:** 24 hours LEC  
**Prerequisite:** FFS 1510, 1511, and 1514 with grades of "C" or better  
**Enrollment Limitation:** To enroll in this course (FFS 1570) the student must be an employee of a federal wildland fire fighting agency, which includes: United States Department of Agriculture, Forest Service, the United States Department of Interior’s Bureau of Land Management, National Park Service, United States Fish and Wildlife Service, the Bureau of Indian Affairs, or a member of a local or state fire agency. This course provides local and state-level emergency responders with an overview of key duties and responsibilities of a finance/administration section chief type III on a type-III All-Hazards Incident Management Team (AHIMT). Topics include functions of the finance/administration section; responsibilities of the time unit, cost unit, compensation/claims unit, and procurement unit. Pass/No Pass only.

**FFS 1571 National Incident Management System (NIMS) All-Hazards Finance/Admin Section Chief (E-973)**

**Units:** 1.25  
**Hours:** 24 hours LEC  
**Prerequisite:** FFS 1510, 1511, and 1514 with grades of "C" or better  
**Enrollment Limitation:** To enroll in this course (FFS 1571) the student must be an employee of a federal wildland fire fighting agency, which includes: United States Department of Agriculture, Forest Service, the United States Department of Interior’s Bureau of Land Management, National Park Service, United States Fish and Wildlife Service, the Bureau of Indian Affairs, or a member of a local or state fire agency. This course provides local and state-level emergency responders with an overview of key duties and responsibilities of a finance/administration section chief type III on a type-III All-Hazards Incident Management Team (AHIMT). Topics include information gathering and sharing, section management, and interaction and coordination. Pass/No Pass only.

**FFS 1574 Incident Contract Project Inspector (S-262)**

**Units:** 0.75  
**Hours:** 16 hours LEC; 4 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** To enroll in this course (FFS 1574) the student must be an employee of a federal wildland fire fighting agency, which includes: United States Department of Agriculture, Forest Service, the United States Department of Interior’s Bureau of Land Management, National Park Service, United States Fish and Wildlife Service, the Bureau of Indian Affairs, or a member of a local or state fire agency. This course introduces students to tools and techniques used to perform the duties of the Incident Contract Project Inspector (ICPI). Topics include an overview of what to expect if dispatched to an incident, basic contract administration, types of equipment to be inspected, and inspection opportunities to inspect equipment. Pass/No Pass only.

**FFS 1575 Human Resource Specialist (S-340)**

**Units:** 1

**FFS 1576 Incident Business Advisor (S-481)**

**Units:** 1  
**Hours:** 20 hours LEC  
**Prerequisite:** None.  
**Enrollment Limitation:** To enroll in this course (FFS 1576) the student must be an employee of a federal wildland fire fighting agency, which includes: United States Department of Agriculture, Forest Service, the United States Department of Interior’s Bureau of Land Management, National Park Service, United States Fish and Wildlife Service, the Bureau of Indian Affairs, or a member of a local or state fire agency, and must be an employee of a federal wildland fire fighting agency, which includes: United States Department of Agriculture, Forest Service, the United States Department of Interior’s Bureau of Land Management, National Park Service, United States Fish and Wildlife Service, the Bureau of Indian Affairs, or a member of a local or state fire agency, and must be an employee of a federal wildland fire fighting agency, which includes: United States Department of Agriculture, Forest Service, the United States Department of Interior’s Bureau of Land Management, National Park Service, United States Fish and Wildlife Service, the Bureau of Indian Affairs, or a member of a local or state fire agency, and must be an employee of a federal wildland fire fighting agency, which includes: United States Department of Agriculture, Forest Service, the United States Department of Interior’s Bureau of Land Management, National Park Service, United States Fish and Wildlife Service, the Bureau of Indian Affairs, or a member of a local or state fire agency, and must be an employee of a federal wildland fire fighting agency, which includes: United States Department of Agriculture, Forest Service, the United States Department of Interior’s Bureau of Land Management, National Park Service, United States Fish and Wildlife Service, the Bureau of Indian Affairs, or a member of a local or state fire agency, and must be an employee of a federal wildland fire fighting agency, which includes: United States Department of Agriculture, Forest Service, the United States Department of Interior’s Bureau of Land Management, National Park Service, United States Fish and Wildlife Service, the Bureau of Indian Affairs, or a member of a local or state fire agency.

**FFS 1580 USDA Intelligence Support Specialist (N9032)**

**Units:** 1.5  
**Hours:** 30 hours LEC; 2 hours LAB  
**Prerequisite:** None.  
**Enrollment Limitation:** To enroll in this course (FFS 1580), a student must be an employee of a federal wildland fire fighting agency, which includes: United States Department of Agriculture, Forest Service, the United States Department of Interior’s Bureau of Land Management, National Park Service, United States Fish and Wildlife Service, the Bureau of Indian Affairs, or a member of a local or state fire agency, and must have successfully completed Introduction to Incident Command System (ICS), I-100, which is an online course provided by Federal Emergency Management Agency (FEMA). This course provides students with a working knowledge of the functions and responsibilities of the Intelligence Support position within the dispatch/coordination system. Topics include basic terminology and concepts related to maps, weather, fire danger, preparation and submission of reports and briefings, and product dissemination.

**Firefighting Training Center (FIRE) Courses**

**FIRE 1084 Wildfire Powersaws Refresher (S-212)**

**Units:** 0.5  
**Hours:** 8 hours LEC; 8 hours LAB  
**Prerequisite:** FIRE 1080
This course is designed to refresh and re-certify chain saw operators in the job performance requirements of the wildfire power saw operator position in the Incident Command System and on the fire ground. Pass/No Pass only.

**FIRE 1100 Fire Control 3A (Structural Fire Fighting in Acquired Structures)**

- **Units:** 0.25
- **Hours:** 1 hours LEC; 15 hours LAB
- **Prerequisite:** None.
- **Enrollment Limitation:** To enroll in this course (FIRE 1100) the student must be an employee of a federal fire fighting agency, or a member of a state or local fire agency.

This course is designed to develop fundamental skills in combating structure fires by providing the students with a thorough understanding of structural fire attack, utilizing an acquired structure. Topics include fire behavior, ventilation, interior attack, and exterior attack. Pass/No Pass only.

**FIRE 1101 Fire Control 3B (Structural Fire Fighting in Live-fire Simulators)**

- **Units:** 0.25
- **Hours:** 1 hours LEC; 15 hours LAB
- **Prerequisite:** None.
- **Enrollment Limitation:** To enroll in this course (FIRE 1101) the student must be an employee of a federal fire fighting agency, or a member of a state or local fire agency.

This course is designed to develop fundamental skills in combating structure fires by providing the students with a thorough understanding of structural fire attack, utilizing a live-fire simulator. Topics include fire behavior, ventilation, interior attack, and exterior attack. Pass/No Pass only.

**FIRE 1102 Fire Control 4 (Controlling Ignitable Liquids and Gases)**

- **Units:** 0.5
- **Hours:** 6.5 hours LEC; 9.5 hours LAB
- **Prerequisite:** FIRE 1600
- **Enrollment Limitation:** To enroll in this course (FIRE 1102) the student must be an employee of a federal fire fighting agency, or a member of a state or local fire agency.

This course provides the knowledge and skills that prepare a firefighter to extinguish an ignitable liquid fire, control a flammable gas fire, and develop an incident action plan for a pipeline emergency. Topics include ignitable liquid fires, flammable gas fires, pipeline emergencies, and skills exercises. Pass/No Pass only.

**FIRE 1103 Fire Control 3: Structural Fire Fighting**

- **Units:** 0.5
- **Hours:** 14 hours LEC; 10 hours LAB
- **Prerequisite:** Meet the minimum job performance requirements for Fire Fighter 1 in National Fire Protection Association (NFPA) 1001; Standard for Fire Fighter Professional Qualifications related to safety; fire behavior; portable extinguishers; personal protective equipment (PPE); ladders; fire hose, appliances, and streams; overhaul; water supply; ventilation; forcible entry; and building construction (NFPA 1403 (2018)); OR State Fire Training (SFT) Fire Fighter 1 certification
- **Enrollment Limitation:** Students who have taken and passed FIRE 1100 and FIRE 1101 are not eligible for this course.

This course provides the knowledge and skills that prepare a firefighter to locate, control, and extinguish an interior structure fire. Pass/No Pass only.

**FIRE 1130 Company Officer 2A (Human Resource Management for Company Officers)**

- **Units:** 1.75
- **Hours:** 33 hours LEC; 7 hours LAB
- **Prerequisite:** FIRE 1507 with a grade of "C" or better

This course provides information on the use of human resources to accomplish assignments, evaluate member performance, supervise personnel, and integrate health and safety plans, policies, and procedures into daily activities as well as the emergency scene. Topics include human resource management, and health and safety. Pass/No Pass only.

**FIRE 1131 Company Officer 2B (General Administration Functions for Company Officers)**

- **Units:** 0.75
- **Hours:** 15 hours LEC; 5 hours LAB
- **Prerequisite:** FIRE 1507 with a grade of "C" or better

This course provides information on general administrative functions and the implementation of department policies and procedures and addresses conveying the fire department’s role, image, and mission to the public. Topics include administration, and community and government relations. Pass/No Pass only.

**FIRE 1132 Company Officer 2C (Fire Inspections and Investigation for Company Officers)**

- **Units:** 1.75
- **Hours:** 33 hours LEC; 7 hours LAB
- **Prerequisite:** FIRE 1507 and 1602 with grades of "C" or better

This course provides information on conducting inspections, identifying hazards and addressing violations, performing a fire investigation to determine preliminary cause, and securing the incident scene and preserving evidence. Topics include orientation, fire and life safety inspections, and fire investigation. Pass/No Pass only.

**FIRE 1133 Company Officer 2D (All-Risk Operations for Company Officers)**

- **Units:** 1.25
- **Hours:** 20 hours LEC; 20 hours LAB
- **Prerequisite:** FIRE 1507 and 1602 with grades of "C" or better
- **Enrollment Limitation:** Completion of Incident Command System (I-200), which is an online course offered by Federal Emergency Management Agency (FEMA).

This course provides information on conducting incident size-up, developing and implementing an initial plan of action involving single and multiunit operations for various types of emergency incidents to mitigate the situation following agency safety procedures, conducting preincident planning, and develop and conduct a post-incident analysis. Topics include initial Incident Action Plan (IAP), postincident analysis, operational planning, and service demands. Pass/No Pass only.

**FIRE 1134 Company Officer 2E (Wildland Incident Operations for Company Officers)**

- **Units:** 1.75
- **Hours:** 28 hours LEC; 12 hours LAB
- **Prerequisite:** FFS 1541, FIRE 1133, and FIRE 1507 with grades of "C" or better
This course provides information on evaluating and reporting incident conditions, analyzing incident needs, developing and implementing a plan of action to deploy incident resources completing all operations to suppress a wildland fire, establishing an incident command post, creating and incident action plan, and completing incident records and reports. Topics include report on conditions, ongoing incident conditions, establishing an incident command post, deploying resources, incident needs, suppression operations, personnel needs and issues, and incident records and reports. Pass/No Pass only.

FIRE 1140 Chief Fire Officer 3A: Human Resources Management

Units: 1
Hours: 16.25 hours LEC; 9.75 hours LAB
Prerequisite: None.
Enrollment Limitation: Meet the educational requirements for Company Officer, or seeking Fire Marshal Certification.

This course provides students with a basic knowledge of the human resources requirements related to the roles and responsibilities of a chief fire officer. Topics include developing plans for providing employee accommodation, developing hiring procedures, establishing personnel assignments, describing methods of facilitating and encouraging professional development, developing an ongoing education training program, developing promotion procedures, developing proposals for improving employee benefits, and developing a measurable accident and injury prevention program. Pass/No Pass only.

FIRE 1141 Chief Fire Officer 3B: Budget and Fiscal Responsibilities

Units: 0.5
Hours: 9.5 hours LEC; 8.5 hours LAB
Prerequisite: None.
Enrollment Limitation: Meet the educational requirements for Company Officer.

This course provides students with a basic knowledge of the budgeting requirements related to the roles and responsibilities of a chief fire officer. Topics include developing plans for providing employee accommodation, developing hiring procedures, establishing personnel assignments, describing methods of facilitating and encouraging professional development, developing an ongoing education training program, developing promotion procedures, developing proposals for improving employee benefits, and developing a measurable accident and injury prevention program. Pass/No Pass only.

FIRE 1142 Chief Fire Officer 3C: General Administration Functions for Chief Fire Officers

Units: 0.75
Hours: 14 hours LEC; 10 hours LAB
Prerequisite: None.
Enrollment Limitation: Meet the educational requirements for Company Officer.

This course provides a basic knowledge of the administration requirements related to the roles and responsibilities of a Chief Fire Officer. Topics include directing a department record management system, analyzing and interpreting records and data, developing a model plan for continuous organizational improvement, developing a plan to facilitate approval, preparing community awareness programs, and evaluating the inspection program of the Agency Having Jurisdiction (AHJ). Pass/No Pass only.

FIRE 1143 Chief Fire Officer 3D: Emergency Service Delivery Responsibilities

Units: 0.75
Hours: 12.5 hours LEC; 11.5 hours LAB
Prerequisite: None.

Enrollment Limitation: Meet the educational requirements for Company Officer.

This course provides basic knowledge of the emergency service requirements related to the roles and responsibilities of a Chief Fire Officer. Topics include developing a plan for the integration of fire services resources, developing an agency resource contingency plan, evaluating incident facilities, supervising multiple resources, developing and utilizing an incident action plan, obtaining incident information to facilitate transfer of command, developing and conducting a post-incident analysis, and maintaining incident records. Pass/No Pass only.

FIRE 1150 Executive Chief Fire Officer: Human Resource Management

Units: 1
Hours: 19 hours LEC; 9 hours LAB
Prerequisite: None.
Enrollment Limitation: Meet educational requirements for Chief Fire Officer

This course provides the skills and knowledge needed to perform one's duties safely, effectively, and competently. Topics include selection and placement of human resources, development of a positive and participative member/management program, establishment and evaluation of a list of education and in-service training goals, appraisal of a member assistance program, and the evaluation of an incentive program to determine if the desired results are achieved. Pass/No Pass only.

FIRE 1151 Executive Chief Fire Officer: Community and Government Relations

Units: 0.25
Hours: 6.5 hours LEC; 4 hours LAB
Prerequisite: None.
Enrollment Limitation: Meet educational requirements for Chief Fire Officer

This course introduces the skills and knowledge needed to perform one's duties safely, effectively, and competently. Topics include assuming a leadership role in community events. Pass/No Pass only.

FIRE 1152 Executive Chief Fire Officer: Administration

Units: 1.25
Hours: 21.5 hours LEC; 9 hours LAB
Prerequisite: None.
Enrollment Limitation: Meet educational requirements for Chief Fire Officer

This course introduces the skills and knowledge needed to perform one's duties safely, effectively, and competently. Topics include developing a comprehensive, long-range plan, evaluating and projecting training requirements, assessing facility and building needs, completing a written comprehensive risk, hazard, and value analysis, and developing a plan for a capital improvement project or program. Pass/No Pass only.

FIRE 1153 Executive Chief Fire Officer: Emergency Services Delivery

Units: 2
Hours: 35.5 hours LEC; 3 hours LAB
Prerequisite: None.
Enrollment Limitation: Meet educational requirements for Chief Fire Officer

This course provides the skills and knowledge needed to perform one's duties safely, effectively, and competently. Topics include developing a comprehensive disaster plan and a comprehensive plan for the organization to operate at a civil disturbance. Pass/No Pass only.
FIRE 1154 Executive Chief Fire Officer: Health and Safety

Units: 0.5
Hours: 11.5 hours LEC; 3 hours LAB
Prerequisite: None.
Enrollment Limitation: Meet educational requirements for Chief Fire Officer

This course introduces the skills and knowledge needed to perform his/her duties safely, effectively, and competently. Topic include maintaining, developing, and providing leadership for a risk management program. Pass/No Pass only.

FIRE 1160 Incident Management of Major Fires

Units: 1.25
Hours: 16 hours LEC; 24 hours LAB
Prerequisite: FFS 1510 with a grade of "C" or better

This course covers the knowledge, skills, and abilities for those who are responsible for command and control of dynamic and complex fireground emergencies. Topics include assuming command, situational awareness and risk assessment process, Incident Action Plan (IAP), incident organization, accountability and command worksheets, continuing, transferring, and terminating command, and simulations. Pass/No Pass only.

FIRE 1161 Incident Management of High-Rise Fires

Units: 1.5
Hours: 20.5 hours LEC; 19.5 hours LAB
Prerequisite: FIRE 1133 and 1160 with grades of "C" or better

This course provides knowledge, skills, and abilities required for those managing incidents occurring in large, multistory buildings. These incidents may present significant management, logistical, and safety challenges to emergency personnel. The size and complexity of the interior spaces; limited, sometimes arduous access; extended travel and response times; and the concentrated occupant load are just some of the challenges faced by emergency responders. Additionally, most high-rise structures are equipped with various environmental, fire protection, and life-safety systems that require support and control. Successful emergency operations in these types of buildings also require preplanning and technical competence on the part of the emergency responders. Topics include identifying critical factors and hazards, identifying construction and fire-protection features, response roles and responsibilities, development and multi-division/group response roles and responsibilities, development and multi-branch response roles and responsibilities, and assessing and using fire and life-safety systems. Pass/No Pass only.

FIRE 1162 Incident Management of the Firefighter Emergency

Units: 0.75
Hours: 9 hours LEC; 15 hours LAB
Prerequisite: FIRE 1133 with a grade of "C" or better
Enrollment Limitation: Completion of Incident Command System (I-200), which is an online course offered by Federal Emergency Management Agency (FEMA).

This course provides incident management terminology and methodology that is employed during a fire fighter emergency. Topics include functions of command, critical incident factors, warning signs of a Rapid Intervention Crew (RIC) deployment, duties of the RIC, command procedures of the emergency, and post deployment considerations. Pass/No Pass only.

FIRE 1221 Fire Prevention 1B

Units: 2

This course focuses on specific codes, ordinances and statutes that pertain to fire prevention practices in California. Topics include building construction, occupancy requirements, evacuation procedures, fire hazards, safety devices, inspection reports, fire detection and alarm systems. Credit/No Credit Only.

FIRE 1222 Fire Prevention 1C

Units: 2
Hours: 40 hours LEC
Prerequisite: None.

This course focuses on the special hazards associated with flammable and combustible liquids and gases. Topics of discussion include bulk flammable liquid and gas storage, extinguishing flammable liquid and gas fires, and transportation of flammable liquids and gases. Credit/No Credit Only.

FIRE 1500 Firefighter Academy

Units: 11 - 15
Hours: 125.75 hours LEC; 218.25 - 436.25 hours LAB
Prerequisite: None.
Enrollment Limitation: Public Safety First Aid and CPR per California Health and Safety code 1797.182 or equivalent

This course provides the knowledge necessary to assume the role of firefighter with the ability to work effectively and safely within a fire agency. Topics include indoctrination into the fire service, firefighter health and safety, self-contained breathing apparatus (SCBA), emergency scene operations, ropes and knots, hand and power tools, building construction and related hazards, fire behavior, fire hose use and maintenance, ground ladder operations, forcible entry, structural search and rescue operations, structural firefighting operations, ventilation techniques, overhaul, firefighter survival, wildland firefighting techniques, tools and equipment, hazardous materials, and weapons of mass destruction.

This course was formerly listed as FIRE 1090 prior to September 2010. Pass/No Pass only.

FIRE 1503 Firefighter Intern Recruit Academy

Units: 12 - 12.5
Hours: 130 hours LEC; 270 - 290 hours LAB
Prerequisite: None.
Enrollment Limitation: Completion of a firefighter intern certificate.

This course is a continuation of the firefighter intern program. It provides the techniques and skills to work effectively and safely within the fire environment as well as the fire department. Topics include indoctrination into the fire service, general maintenance, apparatus and equipment operations, fire control, wildland firefighting, emergency vehicle operations, salvage, fire prevention and public education, fire and arson investigation, rapid intervention crew tactics, vehicle extrication, physical fitness/wellness, emergency care, and forcible entry. This course was formerly listed as SMFD 1121 prior to November 2010. Pass/No Pass only.

FIRE 1504 CDF Firefighter 1 Basic

Units: 3
Hours: 48 hours LEC; 18 hours LAB
Prerequisite: None.

This course provides basic knowledge, skills, and demonstrated abilities as required to perform as a California Department of Forestry (CDF) Firefighter 1 Basic. Topics include fire physics and vegetation terminology, personal protective gear, self-contained breathing apparatus, ground ladders, firefighting equipment, fire shelters, wildland hose-lays, structural firefighting, and safety procedures. This course was formerly listed as FIRE 1096 prior to October 2010. Pass/No Pass only.
FIRE 1506 Transitional Fire Academy

Units: 11.5 - 13.5
Hours: 140 hours LEC; 205 - 300 hours LAB
Prerequisite: None.
Enrollment Limitation: Acceptance into the transitional firefighter academy AND successful completion of a California State Fire Training accredited fire academy or lateral transfer from a full-time career fire department.

This course provides the knowledge necessary to assume the role of firefighter with the ability to work effectively and safely with the fire environment as well as within a company in the fire department in all functions of that urban fire agency. Topics include indoctrination into a particular fire department, general maintenance, apparatus and equipment operations, fire control, wildland firefighting, emergency vehicle operations, salvage, fire prevention and public education, fire and arson investigation, rapid intervention crew tactics, vehicle extrication, physical fitness/wellness, emergency care, and forcible entry. Pass/No Pass only.

FIRE 1507 Firefighter II Academy

Units: 3.5
Hours: 42 hours LEC; 70 hours LAB
Prerequisite: None.
Enrollment Limitation: To enroll in this course (FIRE 1507) the student must be an employee of a state or local fire agency and a Certified Fire Fighter I.

This course provides the skills and knowledge needed for the entry-level professional firefighter to perform one's duties safely, effectively, and competently. Topics include fire department communications, fireground operations, rescue operations, prevention, preparedness, and maintenance. Pass/No Pass only.

FIRE 1509 Advanced Fire Fighter Academy

Units: 14 - 28
Hours: 186 - 248.25 hours LEC; 246.25 - 801.75 hours LAB
Prerequisite: None.
Corequisite: Students must successfully complete the FEMA independent study courses IS-100, IS-200, IS-700, and IS-800 prior to the instruction of Topic: Operating within the Incident Command System.
Enrollment Limitation: The student must meet other Academy requirements including but not limited to: drug screening, background check, physical, and possession of a valid California driver's license. The background check may include, but is not limited to: criminal history check, physical fitness examination, credit background check, social media and internet check, Department of Motor Vehicle Check, Professional License/Certificate confirmation, and Social Security Number Trace.

This course provides the knowledge necessary to assume the role of a Fire Service Emergency Medical Services (EMS) worker with the ability to work effectively and safely within a fire agency. Topics include introduction to the fire service, health and safety, personal protective equipment (PPE), emergency scene operations, ambulance apparatus operations, basic and advanced life support (BLS/ALS), emergency medical protocols, medical assistance to firefighting operations, medical assistance to hazardous materials operations, emergency vehicle operations, confined space awareness, lifelong physical fitness and behavioral health and wellness. Pass/No Pass only.

FIRE 1520 Fire Apparatus Driver/Operator 1A - Pumping Apparatus

Units: 1.25
Hours: 19.5 hours LEC; 20.5 hours LAB
Prerequisite: None.
Enrollment Limitation: Valid Class C California Drivers License.

This course provides information on fire apparatus preventive maintenance and driving/operating. Topics include routine tests, inspections, and servicing functions, operate, reverse, maneuver, and turn a fire apparatus in a variety of conditions, and operate all fixed systems and equipment on a fire apparatus. This course was formerly listed as FIRE 1260 prior to October 2010. Pass/No Pass only.

FIRE 1521 Fire Apparatus Driver/Operator 1B - Pumping Apparatus Operations

Units: 1.25
Hours: 18 hours LEC; 22 hours LAB
Prerequisite: FIRE 1520
Enrollment Limitation: Hold a valid Class C Firefighter Endorsed driver's license (minimum).

This course provides information on pumping apparatus preventive maintenance and operations. Topics include routine tests, inspections, and servicing functions, producing hand, master, and foam fire streams, relay pump operations, and supplying water to fire sprinkler and standpipe systems. This course was formerly listed as FIRE 1261 prior to October 2010. Pass/No Pass only.

FIRE 1522 Fire Apparatus Engineer Refresher

Units: 1.5
Hours: 20 hours LEC; 21 hours LAB
Prerequisite: None.
Enrollment Limitation: Must be in the position of Fire Engineer or above.

This course provides updates, enhancements, and refreshes the skills required by the fire apparatus engineer. Topics include wildland firefighting, arson identification, structural firefighting, incident command, strategy and tactics on initial attack incidents, supervision, management and company officer skills. This course was formerly listed as FIRE 1010 prior to October 2010. Pass/No Pass only.

FIRE 1523 Emergency Vehicle Operator - Phase I

Units: 0.25
Hours: 2 hours LEC; 7 hours LAB
Prerequisite: None.
Enrollment Limitation: Completion of a State of California Fire Marshal approved Firefighter 1 academy.
This course is the first phase of operating the emergency vehicle for fire personnel. The course includes skid pan exercises and vehicle driving exercises. This course was formerly listed as SMFD & SFD 1041 prior to October 2010. Pass/No Pass Only.

**FIRE 1524 Emergency Vehicle Operator - Phase II**

**Units:** 0.25  
**Hours:** 2 hours LEC; 7 hours LAB  
**Prerequisite:** None.

This course is a continuation of Driver Emergency Vehicle Operator Phase I training techniques. It includes vehicle placement, steering basics, acceleration, and braking. This course was formerly listed as SMFD & SFD 1042 prior to October 2010. Pass/No Pass Only.

**FIRE 1525 Emergency Vehicle Operator: Fire**

**Units:** 0.5  
**Hours:** 9 hours LEC  
**Prerequisite:** None.

This course is a continuation of Emergency Vehicle Operator - Phase II training techniques. It includes apparatus inspection, safety, code 3 driving, and special considerations. This course was formerly listed as SMFD & SFD 1043 prior to October 2010. Pass/No Pass Only.

**FIRE 1526 Fire Apparatus Driver/Operator - Aerial Apparatus**

**Units:** 1.5  
**Hours:** 23 hours LEC; 17 hours LAB  
**Prerequisite:** FIRE 1500 and 1520  
**Enrollment Limitation:** Hold a valid Class C Firefighter Endorsed driver’s license (minimum).

This course provides information on aerial apparatus preventive maintenance and operations. Topics include routine tests, inspections, and servicing functions on the systems and components unique to an aerial apparatus; maneuvering, positioning, and lowering the aerial device; and deploying and operating an elevated master stream. Pass/No Pass only.

**FIRE 1527 Fire Apparatus Driver/Operator - Tillered Apparatus**

**Units:** 1  
**Hours:** 13 hours LEC; 27 hours LAB  
**Prerequisite:** FIRE 1500 and 1521  
**Enrollment Limitation:** Hold a valid Class C Firefighter Endorsed driver’s license (minimum).

This course provides information on operating a fire department aerial apparatus equipped with a tiller. Topics include practical driving exercises, and operating, positioning and stabilizing the apparatus from both the tractor and tiller positions. Pass/No Pass only.

**FIRE 1528 Fire Apparatus Driver/Operator - Water Tender**

**Units:** 0.75  
**Hours:** 7.5 hours LEC; 24.5 hours LAB  
**Prerequisite:** FIRE 1500, 1520, and 1521  
**Enrollment Limitation:** Hold a valid Class C Firefighter Endorsed driver’s license (minimum).

This course provides information on water tender preventive maintenance and operations. Topics include routine tests, inspections, and servicing functions unique to a water tender, maneuvering and positioning a water tender at a water shuttle fill site and establishing, maneuvering, and positioning at a water shuttle dumpsite. Pass/No Pass only.

**FIRE 1529 Fire Apparatus Driver/Operator - Wildland Fire Apparatus**

**Units:** 0.5  
**Hours:** 5 hours LEC; 19 hours LAB  
**Prerequisite:** FIRE 1500, 1520, and 1521  
**Enrollment Limitation:** Hold a valid Class C Firefighter Endorsed driver’s license (minimum).

This course provides information on preventive maintenance and operation of a wildland fire apparatus. Topics include routine tests, inspections, and servicing functions on the systems and components unique to wildland fire apparatus, and operating a wildland fire apparatus and producing an effective fire stream. Pass/No Pass only.

**FIRE 1554 Communicable Disease Awareness**

**Units:** 0.5  
**Hours:** 9 hours LEC  
**Prerequisite:** None.

Enrollment Limitation: Currently certified as a California EMT-1  
This course provides emergency responders with communicable disease awareness. Topics include identification, recognition, communicability, prevention, and the operation of communicable diseases. This course was formerly listed as FIRE 1116 prior to November 2010. Pass/No Pass only.

**FIRE 1600 Hazmat First Responder Operational**

**Units:** 1.5  
**Hours:** 23.5 hours LEC; 16.5 hours LAB  
**Prerequisite:** None.

This course provides the awareness skills and knowledge needed for the entry-level fire fighter to recognize and identify hazardous materials (Hazmat) and weapons of mass destruction (WMD), isolate hazards and deny entry, and initiate required notification. At the operations level, this course provides the skills and knowledge needed to identify incident scope; select, use and inspection of personal protective equipment (PPE); perform emergency decontamination; perform assigned tasks at a Hazmat/WMD incident including product control techniques; and evaluate and report incident progress.

**FIRE 1601 Hazardous Materials First Responder Operational Refresher**

**Units:** 0.25  
**Hours:** 6 hours LEC; 3 hours LAB  
**Prerequisite:** FIRE 1600

This course is a refresher covering the basic strategies involving potential exposure to hazardous materials. Topics include detecting hazardous material substances, consulting references for information, and implementing operational procedures. May be taken one time for credit. This course was formerly listed as CDF 1085 prior to April 2011. Pass/No Pass Only.

**FIRE 1602 Hazardous Materials Incident Commander**

**Units:** 0.5  
**Hours:** 10 hours LEC; 6 hours LAB  
**Prerequisite:** FIRE 1600; Proof of completion of FEMA Incident Command System (ICS) 100
This course provides the content related to the role of an Incident Commander (IC), during a hazardous material (hazmat) event, with the emphasis on personnel safety and management. Topics include hazmat laws and regulations, command and scene management, operational risk management, and protective actions. This course was formerly listed as CDF, FJPA, SFD, SMFD, and USDA 1091 prior to April 2011. Pass/No Pass Only.

FIRE 1610 Hazardous Materials Technician: Module 1A: Basic Chemistry

Units: 2
Hours: 40 hours LEC
Prerequisite: FIRE 1600

This course provides the student with the most essential and basic aspects of chemistry and physics as they relate to successful hazardous materials incident management. Topics include basic terminology and theory of chemistry, overview of the identification and hazards of salts, hydrocarbons, and other non-salts and, most importantly, provides the student with the skills required to recognize the hazard and behavior of a material given only its chemical identification or formula. It meets standards prescribed by the CA State Fire Marshal and Office of Emergency Services. Pass/No Pass only.

FIRE 1611 Hazardous Materials Technician: Module 1B: Applied Chemistry

Units: 1.25
Hours: 20.25 hours LEC; 19.75 hours LAB
Prerequisite: FIRE 1610

This course provides the student with basic terminology and theory of chemistry as it relates to hazardous materials. Topics include chemical aspects of the hazard classes, toxicology, including hazard and risk assessment, function and use of detection instruments, monitoring hazardous atmospheres, and use of a field identification kit to identify unknown solids and liquids. It meets standards prescribed by the CA State Fire Marshal and Office of Emergency Services. Pass/No Pass only.

FIRE 1612 Hazardous Materials Technician: Module 1C: Incident Considerations

Units: 1.25
Hours: 18.5 hours LEC; 21.5 hours LAB
Prerequisite: None.

This course provides the student with on-scene incident considerations. Topics include data research, meteorological considerations, protective actions, personal protective equipment, incident command aspects, site safety concepts, legislative and regulatory measures influencing emergency response, and contingency planning. It meets standards prescribed by the CA State Fire Marshal and Office of Emergency Services. Pass/No Pass only.

FIRE 1613 Hazardous Materials Technician: Module 1D: Tactical Field Operations

Units: 1.25
Hours: 20 hours LEC; 20 hours LAB
Prerequisite: FIRE 1612

This course provides the student with experience in hazardous materials tactical field operations. Topics include confinement, control, hazmat triage and sabotage, performing in chemical protective clothing, preservation of evidence, decontamination, and emergency medical system considerations. It meets standards prescribed by the CA State Fire Marshal and Office of Emergency Services. Pass/No Pass only.

FIRE 1614 Hazardous Materials Specialist Module 1F: Special Mitigation Techniques

Units: 1.75
Hours: 28 hours LEC; 12 hours LAB
Prerequisite: FIRE 1613

This course is an introduction to mitigation techniques. Topics include plugging, patching and repairing methods, advanced chemical field identification testing procedures, and fixed facility repair considerations. It is part one of a two part series (including FIRE 1615) leading to certification as a Hazardous Materials Specialist. It meets requirements of CA Code of Regulations Title 8, Section 519(q). Pass/No Pass only.

FIRE 1615 Hazardous Materials Specialist Module 1G: Advanced Field Operations

Units: 0.75
Hours: 2 hours LEC; 38 hours LAB
Prerequisite: FIRE 1614

This course covers material presented in Hazardous Materials Courses 1A-1F in an environment of scenario based full scale exercises. Students are evaluated on their ability to perform and be certified as a member of a Hazardous Materials Team. Pass/No Pass only.

FIRE 1621 Incident Command System (I-200)

Units: 0.5
Hours: 12 hours LEC
Prerequisite: None.

This class introduces the basic components of the Incident Command System (ICS) used to manage all types of emergency incidents. This management system includes common structure, responsibilities and terminology used on incidents at the local, state, and federal levels. This course was formerly listed as FIRE 1052 prior to April 2011. Pass/No Pass only.

FIRE 1628 High Rise Incident Management - Basic Organization

Units: 0.25
Hours: 3.5 hours LEC; 3 hours LAB
Prerequisite: None.

This course provides the content related to management of major high rise fire incidents. The content is based on curricula established at the National Fire Academy and Firefighting Resources of Southern California Organized for Potential Emergencies (FIRESCOPE), program. This course was formerly listed as FIRE 1078 prior to April 2011. Pass/No Pass only.

FIRE 1631 Incident Management

Units: 1
Hours: 20 hours LEC; 4 hours LAB
Prerequisite: None.

Enrollment Limitation: Completion of a State of California Fire Marshal approved Firefighter 1 academy.

This course provides an in-depth look into the various areas of commanding an initial attack. Topics include command presence, transfer of command, tactics and strategy, and size-up. This course was formerly listed as CDF, FJPA, SFD, and SMFD 1092 prior to April 2011. Pass/No Pass Only.
FIRE 1653 Instructor I: Instructional Methodology
Units: 1.25
Hours: 16.5 hours LEC; 23.5 hours LAB
Prerequisite: None.

This course introduces the skills and knowledge needed for the entry-level professional instructor to perform his or her duties safely, effectively, and competently. At the end of this course, candidates for certification will be able to teach and deliver instruction from a prepared lesson plan utilizing instructional aids and evaluation instruments. The Instructor will also be able to adapt a lesson plan and complete the reporting requirements to the local jurisdiction. Topics include instructional development, instructional delivery, evaluation and testing, and program management. Pass/No Pass only.

FIRE 1654 Instructor II: Instructional Development
Units: 1.25
Hours: 14.25 hours LEC; 25.75 hours LAB
Prerequisite: FIRE 1653 with a grade of "C" or better

This course introduces the skills and knowledge needed for the intermediate level professional instructor to perform his or her duties safely, effectively, and competently. Topics include developing lesson plans and evaluation instruments, teaching and delivering instruction, evaluating and coaching other instructors, analyzing resources, and formulating a program budget. Pass/No Pass only.

FIRE 1655 Instructor III: Instructional Program Management
Units: 1.5
Hours: 26.75 hours LEC; 9.25 hours LAB
Prerequisite: FIRE 1653 and 1654 with grades of "C" or better

This course introduces information on planning, developing, and implementing comprehensive programs and curricula. Topics include instructional development, program management, program and instructor evaluation, and test reliability and validity. Pass/No Pass only.

FIRE 1656 Regional Instructor Orientation
Units: 0.25
Hours: 3.5 hours LEC; 0.5 hours LAB
Prerequisite: None.

This course is designed to provide instructors who will deliver State Fire Training (SFT) training programs with an overview of State Fire Training, California Fire Service Training and Education System (CFSTES) and Fire Service Training and Education Program (FSTEP) programs. Topics include instructor registration requirements, instructor responsibilities and accountability, how to schedule and return courses, and the SFT Procedures Manual.

FIRE 1657 Ethical Leadership for Instructors
Units: 0.25
Hours: 3.75 hours LEC; 4.25 hours LAB
Prerequisite: None.

This course provides the knowledge and skills needed to identify the value of ethical behavior in instructional settings. It describes how ethical norms influence individual ethics. Topics include identifying personal ethical perspectives and core values, and how they impact communication and ethical decision making. How to make an ethical decision using an ethical decision-making model to assist in making ethical decisions when faced with an ethical dilemma. It also covers how to carry out the roles and responsibilities of a California State Fire Training (SFT) instructor in an ethical manner.

FIRE 1670 Fire Investigation 1A, Fire Cause and Origin Determination
Units: 2
Hours: 40 hours LEC
Prerequisite: None.

This course provides participants with an introduction and basic overview of fire scene investigation. The focus of this course is to provide information in determining the area of fire origin in fires involving vehicles, structures, and wildland. Accidental and criminal fire causes are discussed in detail. This course was formerly listed as FIRE 1240 prior to September 2010. Pass/No Pass only.

FIRE 1671 Fire Investigation 1B, Techniques of Fire Investigation
Units: 2
Hours: 40 hours LEC
Prerequisite: FIRE 1670

This course expands on specific topics encountered by the fire investigator. These topics include detailed information on motives of fire setters; conducting a post blast scene; the investigation of a fire death; the recognition, collection, and preservation of evidence; interviewing and interrogation of witnesses and suspects; and the effect of a building's construction on the spread of fire. This course was formerly listed as FIRE 1241 prior to September 2010. Pass/No Pass only.

FIRE 1672 Fire Investigation 2A
Units: 2
Hours: 40 hours LEC
Prerequisite: FIRE 1671

This course provides information on how to investigate, apprehend, and convict arsonists. It focuses heavily on legal case preparation. Topics include interviewing and interrogating suspects, search and seizure, warrants, courtroom demeanor, and working with the district attorney's office. This course was formerly listed as FIRE 1242 prior to September 2010. Pass/No Pass only.

FIRE 1673 Fire Investigation 2B
Units: 2
Hours: 40 hours LEC
Prerequisite: FIRE 1672

This course provides advanced instruction in fire scene investigation, case preparation, and courtroom presentation. Topics include reviewing fire scene photography, sketching, evidence collection, interviewing and interrogation, and extensive use of simulations for developing and presenting an arson case in court. This course was formerly listed as FIRE 1243 prior to September 2010. Pass/No Pass only.

FIRE 1674 Fire Investigator 1A: Basic Fire Investigation
Units: 1.75
Hours: 29 hours LEC; 11 hours LAB
Prerequisite: FT 304 with a grade of "C" or better
Enrollment Limitation: On-line courses: Basic Electricity (CFITrainer.net), and Ethics and the Fire Investigator (CFITrainer.net)

This course provides information on securing the fire scene and determining the origin and cause of the fire. Topics include responsibilities of a fire investigator, securing the fire ground, conducting an exterior and interior survey, analyzing fire patterns, interpreting individual fire patterns, discriminating the effects of explosions, examining and removing fire debris, reconstructing the area of origin, inspecting the performance of building systems. Pass/No Pass only.
FIRE 1675 Fire Investigator 1B: Evidence and Documentation

Units: 1.5
Hours: 24 hours LEC; 10 hours LAB
Prerequisite: FIRE 1674
Enrollment Limitation: On-line course: Introduction to Evidence (CFITrainer.net)

This course provides information on scene documentation and evidence collection/preservation. Topics include photographing the scene, diagramming the scene, constructing investigative notes, processing evidence and establishing chain of custody, processing victims and fatalities, selecting evidence for analysis, maintaining a chain of custody, preparing a fire investigation report, and disposing of evidence. Pass/No Pass only.

FIRE 1676 Fire Investigator 1C: Preparation for Legal Proceedings

Units: 1.25
Hours: 19 hours LEC; 21 hours LAB
Prerequisite: FIRE 1674, FIRE 1675, and PSTC 1501
Enrollment Limitation: On-line course: Motive, Means, and Opportunity: Determining Responsibility in an Arson Case (CFITrainer.net)

This course provides information on legal considerations for a court proceeding. Topics include coordinating expert resources, formulating an opinion, presenting investigative findings, and testifying during legal proceedings. Pass/No Pass only.

FIRE 1682 Interagency Incident Business Management (S-260)

Units: 0.75
Hours: 16 hours LEC
Prerequisite: None.

This course provides the foundation of incident business management practices. Topics include property management, recruitment, acquisition, and accident investigation. This course was formerly listed as FIRE 1093 prior to April 2011. Pass/No Pass only.

FIRE 1703 Basic Wildland Fire Prevention

Units: 1
Hours: 24 hours LEC
Prerequisite: None.

This course provides the basic methods and practices used in wildland fire prevention. Topics include fire prevention history, campfire safety, powerline safety and fire investigation. This course was formerly listed as USDA 1107 prior to April 2011. Pass/No Pass only.

FIRE 1722 Division/Group Supervisor (S-339)

Units: 1
Hours: 24 hours LEC
Prerequisite: None.

This course provides the knowledge and skills to perform specific responsibilities as a Division/Group Supervisor within the Incident Command System. Topics include pre-incident responsibilities, incident arrival and check-in, assigned and available status, and out-of-service status and demobilization. This course was formerly listed as CDF,EGFD,FJPA,SMFD,and USDA 1086 prior to April 2011. Pass/No Pass Only.

FIRE 1723 Professional Training for Fire Service Personnel

Units: 7.5 - 9.75
Hours: 84 - 114 hours LEC; 156 - 186 hours LAB
Prerequisite: None.
Enrollment Limitation: Completion of a State of California Fire Marshal approved Firefighter 1 academy

This course provides current knowledge and techniques needed to maintain and improve fire service skills. It meets mandatory state and local training requirements. Topics may include fire service administration, suppression, emergency medical services, fire prevention, wellness and fitness, rescue, leadership/management, and command and control. This course was formerly listed as SFD and SMFD 1104 prior to April 2011. Pass/No Pass Only.

FIRE 1760 Low-Angle Rope Rescue Operational (LARRO)

Units: 0.5
Hours: 7 hours LEC; 17 hours LAB
Prerequisite: None.
Enrollment Limitation: On-line course: Introduction to Evidence

This course provides the techniques and methods for using rope, webbing, hardware friction devices, and litters in low-angle rescue situations. Topics include rope and related equipment, anchor systems, safety lines, stretcher lashing and rigging, mechanical advantage systems, and single-line and two-line rescue systems. Pass/No Pass only.

FIRE 1761 Rescue Systems 1: Basic Rescue Skills

Units: 1
Hours: 9 hours LEC; 31 hours LAB
Prerequisite: FIRE 1500 and 1760

This course provides rescue professionals with the level of knowledge to perform urban search and rescues. Topics include team organization, rescue, and environmental considerations, use of ropes, knots rigging and pulley systems, descending, rapping, and belaying tools and techniques, subsurface rescue techniques, use of cribbing, wedges, cutting/prying and hydraulic tools, use of fire service ladders in specialized rescue situations, and day and night simulated rescue exercises. Pass/No Pass only.

FIRE 1762 Aircraft Rescue and Firefighting (FC 5)

Units: 1
Hours: 19 hours LEC; 5 hours LAB
Prerequisite: None.
Advisory: FIRE 1500

This course provides the knowledge to operate safely during an aircraft emergency. This course identifies types of aircraft, aviation fuels, proper extinguishing agents, and airport communication systems used in aircraft emergencies. This course was formerly listed as CDF, FJPA, SFD, SMFD, USDA, and FIRE 1062 prior to April 2011. Pass/No Pass only.

FIRE 1763 Rescue Boat Operations

Units: 0.5
Hours: 6 hours LEC; 18 hours LAB
Prerequisite: None.
Advisory: Ability to Swim

This course provides the skills needed to operate a rescue boat and perform rescue in river and flood situations. Safety, course philosophy, and terminology are covered. “In-water” experiences for students include how to read dynamics flow for safety travel, perform self-rescue and victim-rescue operations, along with executing pre/post-inspections of the personal watercraft (PWC). This course was formerly listed as FIRE 1059 prior to April 2011. Pass/No Pass only.
FIRE 1764 Personal Watercraft Operations

Units: 0.5  
Hours: 4 hours LEC; 12 hours LAB  
Prerequisite: None.  
Advisory: Ability to swim.

This course provides the knowledge and skills necessary to operate personal watercraft on water related incidents. Subjects learned are the reading of water movement and the tactics/strategies for operating personal water craft. Not open to students who have completed CDF 1063, Rescue Water Craft. This course was formerly listed as CDF, SFD, and SMFD 1061 prior to April 2011. Pass/No Pass Only.

FIRE 1766 River and Flood Water Rescue

Units: 0.5  
Hours: 5 hours LEC; 11 hours LAB  
Prerequisite: None.

This course is intended for the training of fire service personnel in water rescue techniques. Topics include swift water rescue, submerged vehicles, drowning, use of engine/truck company equipment for water rescue, use of rafts and boats, and underwater search and recovery. This course was formerly listed as FIRE 1079 prior to April 2011. Pass/No Pass only.

FIRE 1768 Vehicle Extrication

Units: 0.75  
Hours: 9 hours LEC; 15 hours LAB  
Prerequisite: FIRE 1500

This course provides the knowledge and skills to prepare a fire fighter to extricate victim(s) from a common passenger vehicle in a safe and effective manner in accordance with established polices and procedures. Topics include sizing up a vehicle incident, scene safety zones, fire protection, stabilizing a common passenger vehicle, isolating and managing energy sources, access and egress points, disentangling victims, removing victims, and terminating a vehicle incident. Pass/No Pass only.

FIRE 1769 Trench Rescue Technician

Units: 0.75  
Hours: 10 hours LEC; 14 hours LAB  
Prerequisite: FIRE 1761

This course transitions students from classroom discussion to working safely and efficiently in a trench rescue environment. Topics include trench and excavation regulations, understanding soil, trench configurations, trench hazards, rescue team preparation, incident response, initial on-scene and pre-entry operations, shoring systems and components, installation of shoring systems, victim rescue and recovery, and incident termination. Pass/No Pass only.

FIRE 1800 Firefighter Training (S-130)

Units: 2  
Hours: 35.5 hours LEC  
Prerequisite: None.

This course provides new firefighters with basic wildland firefighting skills. It also provides the knowledge needed to identify basic weather conditions, topography, fuels, and their effect on fire behavior. Pass/No Pass only.

FIRE 1801 Fire Fighter Survival

Units: 0.25  
Hours: 4 hours LEC; 12 hours LAB  
Prerequisite: None.

This course provides a greater understanding of how to avoid committing fatal errors on the fireground. Topics include fire fighter survival terminology, developing a survival attitude, increasing situational awareness, and problem-solving techniques. Pass/No Pass only.

FIRE 1803 Rapid Intervention Crew Operations

Units: 0.5  
Hours: 4 hours LEC; 20 hours LAB  
Prerequisite: FIRE 1500 and 1801

This course is designed for fire fighters to rescue a downed fire fighter in an Immediately Dangerous to Life and Health (IDLH) environment in the continuing effort to reduce the number of fire fighter injuries and deaths that occur regularly. Students train using evolutions and scenarios based off tragedies suffered by fellow fire fighters from departments across the country. Students receive information on how to locate and use these Line of Duty Death (LODD) studies as training and prevention tools throughout their careers. This course focuses on the three phases of a Rapid Intervention Crew (RIC) operation: 1) predeployment, 2) deployment, and 3) rescue. During the class, you will also gain a greater understanding of RIC operations terminology and the RIC mindset. Topics include identifying causes of firefighter injuries and fatalities at structure fires, describing and preventing common fire ground errors that have caused injuries or fatalities, demonstrating self-survival knowledge and techniques, and demonstrating and applying firefighter rescue and self-survival techniques. This course was formerly listed as FIRE 1050 prior to April 2011. Pass/No Pass only.

FIRE 1804 Confined Space Awareness

Units: 0.25  
Hours: 6 hours LEC; 2 hours LAB  
Prerequisite: None.

This course provides instruction in identifying a permit and non-permit required confined space, the hazards associated with confined spaces, state regulations and industry standards, incident management, communications, and equipment requirements. It does not qualify participants to make permit-required entries. Topics include regulations and standards, dangers of confined space incidents, permit-required confined spaces, hazards, resources needed, tactical worksheets, communications, nonentry rescue, and incident command. This course was formerly listed as CDF 1081 prior to April 2011. Pass/No Pass only.

FIRE 1805 Wildland Firefighting Skills

Units: 1.75  
Hours: 26 hours LEC; 20 hours LAB  
Prerequisite: None.

This course provides the necessary information required in wildland firefighting to safely operate in emergency conditions. Topics include map/compass and GPS use, radio use, hand tool use, fire shelters, belt weather kits, and human factors. This course was formerly listed as USDA 1109 prior to April 2011. Credit/No Credit only.

FIRE 1806 Confined Space Rescue Technician

Units: 1  
Hours: 11 hours LEC; 29 hours LAB  
Prerequisite: FIRE 1804

This course is an intensive hands-on training program that will prepare students for confined-space emergencies. Topics include identifying confined spaces and permit-required confined spaces, the hazards associated with permit-required confined spaces, target industries and hazards, state and federal regulations, components of a rescue operation, and the roles and responsibilities of the rescue team. Pass/No Pass only.
FIRE 1807 Advanced Firefighter Training (S-131)

Units: 0.5
Hours: 8 hours LEC
Prerequisite: FIRE 1800

This course provides advanced training in wildland firefighting skills with an emphasis on safety and tactics. This is suggested training for firefighters who wish to become qualified at first level supervisory positions. This course also meets the training requirements for Advanced Firefighter/Squad Boss and Incident Commander Type 5. This course was formerly listed as FIRE 1067 prior to April 2011. Pass/No Pass only.

FIRE 1808 Fire Ground Skills: Update

Units: 0.25
Hours: 4 hours LEC; 4 hours LAB
Prerequisite: Completion of a State of California Fire Marshal approved Firefighter 1 academy

This course updates critical knowledge, skills, and abilities employed in emergency conditions. Topics include self-contained breathing apparatus, ground ladders, ropes and knots, apparatus operation, wildland hoselays, and fire shelter deployment and safety. This course was formerly listed as CDF 1048 prior to April 2011. Credit/No Credit only.

FIRE 1809 Wildland Fire Chain Saws (S-212)

Units: 1
Hours: 11 hours LEC; 25 hours LAB
Prerequisite: None.

Enrollment Limitation: To enroll in this course (FIRE 1809) the student must be an employee of a federal fire fighting agency, or a member of a state or local fire agency.

This course is designed for prospective chainsaw operators. Topics include introduction to the function, maintenance and use of internal combustion engine powered chain saws, tactical wildland fire applications, and training for firefighters with little or no previous experience in operating a chain saw, providing hands-on cutting experience in surroundings similar to fireline situations. This course was formerly listed as CDF, FJPA, SMFD, USDA, EGF, and SFD 1080 prior to September 2011. Credit/No Credit only.

FIRE 1860 Physical Fitness for Fire Service Personnel

Units: 1.5 - 3
Hours: 13 hours LEC; 42 - 130 hours LAB
Prerequisite: None.

This course is a physical fitness course for employed firefighters. It includes fire service wellness initiatives, cardiovascular and muscular fitness, safety and proper use of exercise equipment, joint flexibility, hydration, nutrition and weight control, cardiac risk factors, and sleep disorders. This course was formerly listed as FITNS 341 prior to April 2011. Pass/No Pass only.

FIRE 1872 Basic Air Operations (S-270)

Units: 0.75
Hours: 16 hours LEC
Prerequisite: None.

This course covers aircraft types and capabilities, aviation management and safety for flying in and working with agency aircraft, tactical and logistical uses of aircraft, and requirements for helicopter take-off and landing areas. Topics include the types of helicopters and air tankers and the criteria that make up each type. Also included are safe firefighting conduct operations when aircraft are being used. Note: The regulations, procedures and policies addressed in this course are primarily those governing federal agency and ICS operations. State, county, or other political subdivisions using this course will need to consult their agency having jurisdiction with respect to regulations, procedures and policies. This course was formerly listed as FIRE 1058 prior to April 2011. Pass/No Pass only.

FIRE 1873 Strike Team/Task Force Leader, All-Hazards (STEN/TFLD) (AH-330)

Units: 1.25
Hours: 22 hours LEC; 10 hours LAB
Prerequisite: None.

Enrollment Limitation: To enroll in this course (FIRE 1873) the student must be an employee of a federal fire fighting agency, or a member of a state or local fire agency.

This course provides the skills and knowledge needed to perform in the position of Strike Team/Task Force Leader. Topics include position overview, pre-deployment responsibilities, concept of the position, resource typing standards, pre-dispatch preparation, incident responsibilities, administration, supervision, response, assignment, demobilization, tactics and safety, risk management, entrapment avoidance, Wildland Urban Interface (WUI), case studies, scenarios, and appropriate action vs. freelancing. This course was formerly listed as FIRE 1066 prior to April 2011. Pass/No Pass only.

FIRE 1874 Task Force/Strike Team Leader Refresher

Units: 0.25 - 0.5
Hours: 4 - 8 hours LEC
Prerequisite: None.

This course presents the rules and regulations required to operate as a strike team/task force leader on emergency incidents. Additionally, this course explains the many rules and regulations governing strike team leaders' actions. This course was formerly listed as CDF, FJPA, SMFD, and USDA 1075 prior to April 2011. Credit/No Credit only.

FIRE 1875 Fire Operations in the Wildland/Urban Interface (S-215)

Units: 0.25 - 0.75
Hours: 16 hours LEC; 4 - 8 hours LAB
Prerequisite: None.

Enrollment Limitation: To enroll in this course (FIRE 1875) the student must be an employee of a federal fire fighting agency or a member of a state or local fire agency.

This course is designed for the firefighter operating as incident commander in areas where urban growth and expansion interfaces with the wildland. Topics include firefighter safety in the interface, managing human factors in the interface, pre-incident planning, size-up and initial strategy, structure triage, structure protection overview, tactics in the interface, tactical operations and resource use in the interface, action assessment, plans updates, and after action review. This course was formerly listed as FIRE 1073 prior to April 2011. Pass/No Pass only.

FIRE 1880 Field Observer/Display Processor (S-244/S-245)

Units: 1.5
Hours: 24 hours LEC; 8 hours LAB
Prerequisite: CDF 1052

This course provides the techniques, theory, and practical experience to be a field observer/display processor in the Incident Command System Planning Section. Topics include identifying and interpreting maps, making map calculations, using observation aids, mapping from aircraft, making field observations, and processing and displaying data. This course was formerly listed as CDF, FJPA, SMFD, and USDA 1118 prior to April 2011. Credit/No Credit only.
FIRE 1881 Helicopter Training (S217)

Units: 1.5
Hours: 26 hours LEC; 14 hours LAB
Prerequisite: FT 55 (SMFD 1055) and FT 52 (SMFD 1052)

This course provides an understanding of basic helicopter operations and their use on wildland firefighting incidents. This course includes aircraft terminology, helicopter support systems and helicopter tactics used in their operation. This course was formerly listed as FIRE 1070 prior to April 2011. Credit/No Credit only.

FIRE 1882 Ignition Operations (S-234)

Units: 1
Hours: 16 hours LEC; 8 hours LAB
Prerequisite: None.

This course presents the functions of an Ignition Specialist or Firing-Boss on emergency incidents. It includes backfire and burnout safety training and the proper application of fire suppression firing methods and practices. This course was formerly listed as FIRE 1094 prior to April 2011. Pass/No Pass only.

FIRE 1883 Chainsaw Bench

Units: 0.5
Hours: 9 hours LEC
Prerequisite: None.

This course covers basic chainsaw field mechanics and troubleshooting. Topics include chainsaw components, attachments, adjustments, problems, and maintenance. This course was CDF, FJPA, and USDA 1083 prior to September 2011. Pass/No Pass only.

FIRE 1884 Crew Boss (Single Resource) (Blended) (S-230)

Units: 0.25
Hours: 8 hours LEC
Prerequisite: FFS 1541 with a grade of “C” or better
Enrollment Limitation: To enroll in this course (FIRE 1884) the student must be an employee of a federal fire fighting agency, or a member of a state or local fire agency.

This course covers the performance of duties associated with the single resource boss position from initial dispatch through demobilization to the home unit. Topics include operational leadership, preparation and mobilization, assignment preparation, risk management, entrainment avoidance, safety and tactics, offline duties, demobilization, and post incident responsibilities. Pass/No Pass only.

FIRE 1885 Firing Operations (S-219)

Units: 1
Hours: 16 hours LEC; 8 hours LAB
Prerequisite: None.
Enrollment Limitation: To enroll in this course (FIRE 1885) the student must be an employee of a federal fire fighting agency, or a member of a state or local fire agency.

This course utilizes a blended approach to learning, incorporating a mix of online and instructor-led training (ILT). Students complete the online training portion of the course prior to taking the ILT. Topics include the roles and responsibilities of a Firing Boss (FIRB), outlines duties of other personnel who may engage firing operations, and illustrates common firing devices and techniques. Pass/No Pass only.

FIRE 1886 Engine Boss (Single Resource) (Blended) (S-231)

Units: 0.25
Hours: 3.5 hours LEC; 4.5 hours LAB
Prerequisite: FIRE 1884

Enrollment Limitation: To enroll in this course (FIRE 1886) the student must be an employee of a federal fire fighting agency, or a member of a state or local fire agency.

This course is designed to produce student proficiency in the performance of the duties associated with Engine Boss, single resource (ENGB). Topics include engine and crew capabilities and limitations, information sources, fire size-up considerations, tactics, and wildland/urban interface. Pass/No Pass only.

FIRE 1999 Experimental Offering in Firefighting Training

Units: 0.5 - 4
Prerequisite: None.

This is the experimental courses description.

Public Safety Training Center (PSTC) Courses

PSTC 1251 Skills and Knowledge Modules

Units: 0.25 - 3
Hours: 4.5 - 44 hours LEC
Prerequisite: PSTC 1683; POST certified basic law enforcement academy or equivalent as determined by the Dean of Academy Instruction. NOTE: Approval of equivalent training is not a guarantee state regulatory or licensing agencies will also grant POST certified basic law enforcement academy or equivalent as determined by the Dean of Academy Instruction. NOTE: Approval of equivalent training is not a guarantee state regulatory or licensing agencies will also grant equivalency.

Enrollment Limitation: Students must 1) be free of felony convictions; 2) possess a valid California Driver’s License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate; pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.

This course facilitates the student’s acquisition of advanced skills and knowledge necessary for policing and peacekeeping in contemporary society. Course topics are based upon changes in local, state and federal laws, California Commission on Peace Officer Standards and Training (POST) required updates to mandated minimum training for peace officers, and evolving bodies of knowledge in the law enforcement field. Course hours are variable in order to meet specific local and regional needs which may exceed POST minimum requirements. Topics include: arrest methods update, chemical agents update, courtroom testimony, cultural competency, entry techniques update, ethics, field operations and tactics, impact weapons update, investigative report writing update, juvenile law update, legal update, less than lethal force update, officer health and wellness, police-community relations, principled policing, search and seizure update, search warrant writing and service, strategic communication update, tactical firearms update, technology update, and use of force update. Pass/No Pass.

PSTC 1270 Juvenile Corrections Officer Core

Units: 7.5
Hours: 130.5 hours LEC; 37.5 hours LAB
Prerequisite: None.

This course is designed for new juvenile corrections officers and students interested in a career in the juvenile corrections field. It covers the California criminal justice system, professionalism and ethics, defensive tactics, report writing, mental health challenges, gangs, physical conditioning, social justice, cultural awareness, and behavioral health. This course is certified by California Standards and Training for
Corrections (STC). It was formerly known as PSTC 1519. Pass/No Pass only.

**PSTC 1271 Adult Correctional Officer Core Course**

Units: 8.5  
Hours: 151 hours LEC; 28.5 hours LAB  
Prerequisite: None.  
This course is designed for entry level positions in the adult corrections field. Topics include criminal procedure, interviewing and counseling techniques, defensive tactics, public relations, oral and written communications, classifications and housing of inmates, court testimony and indicators of psychological problems. This course meets or exceeds Standards and Training for Corrections’ minimum training requirements for entry level adult corrections officers. This course is formerly known as SCSD 1139 and PSTC 1879. Pass/No Pass only.

**PSTC 1273 Probation Officer Core Course**

Units: 9  
Hours: 150 hours LEC; 39 hours LAB  
Prerequisite: None.  
This course is designed for entry-level positions in the probation officer field. Topics include the criminal justice system, legal foundations, terminology, codes, statutes, case law, indicators of psychological problems, gangs, interviews, court reports, defensive tactics, social justice, cultural awareness, and report writing. This course meets or exceeds minimum standards set by Standards and Training for Corrections (STC). This course is formerly known as PSTC 1878. Pass/No Pass only.

**PSTC 1275 Adult Corrections: Supplemental Core Course**

Units: 3.5  
Hours: 59.5 hours LEC; 10.5 hours LAB  
Prerequisite: PSTC 1271  
This course expands upon the student’s existing knowledge of legal and procedural concepts introduced in PSTC 1271. Instruction is focused on correctional codes and statutes, inmate classification, contraband, and booking and inmate supervision. This course is formerly known as PSTC 1294. Pass/No Pass only.

**PSTC 1403 Basic Skills for the Non-Sworn Investigator**

Units: 1.5  
Hours: 32 hours LEC  
Prerequisite: None.  
This course provides the student with foundational skills and knowledge for employment as a non-sworn investigator with a law enforcement organization. Topics include the role of the non-sworn investigator, evidence, interview skills, report writing, technology resources, criminal justice information systems, subpoenaeas and due diligence, personal safety, and courtroom testimony. Pass/No Pass only.

**PSTC 1500 Basic Sheriff Academy**

Units: 25  
Hours: 198 hours LEC; 758 hours LAB  
Prerequisite: None.  
Enrollment Limitation: Students must 1) be free of felony convictions; 2) possess a valid California Driver’s License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate, pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.  
This course is a consolidated program of regular basic law enforcement training. Topics include criminal law, juvenile law, laws of evidence, administration of justice, community relations, investigation, traffic control and procedures, patrol procedures, defensive tactics, arrest control, weaponless defense, baton techniques, first aid/ cardiopulmonary resuscitation (CPR), and vehicle operations. This course is certified by the California Commission on Peace Officer Standards and Training (POST). Pass/No Pass only.

**PSTC 1501 PC 832 Arrest, Search & Seizure**

Units: 2  
Hours: 30 hours LEC; 10 hours LAB  
Prerequisite: None.  
This course satisfies the arrest, search, and seizure requirement for peace officers as defined in section 832 of the California Penal Code. Topics include professionalism, ethics, the criminal justice system, policing in the community, laws of evidence and arrest, investigation, cultural diversity/discrimination, use of force, and arrest and control. This course is Commission on Peace Officer Standards and Training (POST) certified. Pass/No Pass only.

**PSTC 1502 Basic Law Enforcement Academy- Module III**

Units: 6 - 7  
Hours: 82 - 84 hours LEC; 86 - 130 hours LAB  
Prerequisite: None.  
Enrollment Limitation: Students must 1) be free of felony convictions 2) possess a valid California Driver’s License 3) undergo a fingerprint and criminal history check 4) be a minimum of 18 years of age 5) be a United States high school graduate, pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university, and 6) complete a medical suitability examination.  
This course satisfies the Commission on Peace Officer Standards and Training (POST) Level III reserve peace officer training requirements. It is the first in a three-part series of courses which prepares students for entry-level employment as reserve or regular full-time California peace officers. Topics include leadership, professionalism, and ethics; policing in the community; introduction to criminal law; investigative report writing; use of force and de-escalation; traffic enforcement; crimes scenes and forensics; arrest and control; firearms; and cultural diversity and discrimination. Pass/No Pass only.

**PSTC 1503 Basic Law Enforcement Academy- Module II**

Units: 8 - 11  
Hours: 108 - 140 hours LEC; 132 - 200 hours LAB  
Prerequisite: PSTC 1502  
Enrollment Limitation: Students must 1) be free of felony convictions 2) possess a valid California Driver’s License 3) undergo a fingerprint and criminal history check 4) be a minimum of 18 years of age 5) be a United States high school graduate, pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university, and 6) complete a medical suitability examination.  
This course satisfies training requirements of the Commission on Peace Officer Standards and Training (POST) Module II. Topics include property crimes, crimes against persons, crimes against the justice system, laws of arrest, search and seizure, presentation of evidence, patrol techniques, vehicle pullovers, crimes in progress, lifetime fitness, and career preparation. POST certification #2970-00140. Pass/No Pass only.

**PSTC 1504 Basic Law Enforcement Academy- Module I**

Units: 13.5 - 17  
Hours: 149 - 190 hours LEC; 286 - 360 hours LAB
Prerequisite: PSTC 1503

Enrollment Limitation: Students must 1) be free of felony convictions; 2) possess a valid California Driver's License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate; pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.

This course, the third in a three-part series of courses, satisfies training requirements of the Commission on Peace Officer Standards and Training (POST) for the Level I reserve or full-time regular peace officer. Topics include victimology, crimes against children, juvenile law and procedure, vehicle operations, crimes in progress, domestic violence, missing persons, traffic collision investigation, lifetime fitness, firearms and chemical agents, persons with disabilities, gang awareness, emergency management, interview and interrogations, courtroom testimony and emotional survival. Upon successful completion the students will possess a Certificate of Completion of the POST Basic Law Enforcement Academy. POST certification #2970-00150. Pass/No Pass only.

PSTC 1505 California Highway Patrol Basic Law Enforcement Academy

Units: 25
Hours: 152 hours LEC; 894 hours LAB
Prerequisite: None.
Enrollment Limitation: Students must 1) be free of felony convictions; 2) possess a valid California Driver's License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate, pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.

This Commission on Peace Officer Standards and Training (POST) certified course is a consolidated program of training in criminal law, juvenile law, laws of evidence, administration of justice, community relations, investigation, traffic control and procedures, patrol procedures, defensive tactics, arrest control including handcuffing and weaponless defense, baton techniques, firearms, first aid and CPR, and vehicle operations. Pass/No Pass only.

PSTC 1506 Sacramento Police Department Basic Academy

Units: 22 - 26
Hours: 251 hours LEC; 466 - 682 hours LAB
Prerequisite: None.
Enrollment Limitation: Students must 1) be free of felony convictions; 2) possess a valid California Driver's License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate, pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.

This course presents a comprehensive program of training in law, ethics, community policing, vehicle operations, use of force, patrol techniques, firearms, traffic control and enforcement, criminal investigations, physical fitness, chemical agents, and first aid and CPR. Upon successful completion of the course, students receive a Commission on Peace Officer Standards and Training (POST) Basic Academy Certificate of Completion. This course is formerly known as SPD 1100. Pass/No Pass only.

PSTC 1507 Preparing for a Law Enforcement Career

Units: 0.5 - 0.75
Hours: 4 - 8 hours LEC; 16 - 24 hours LAB
Prerequisite: None.

This course introduces the student to requirements that must be met for application and acceptance into a California Peace Officer Standards and Training (POST) certified regular basic law enforcement academy. Topics include an overview of the academy training program and program standards, POST and legislatively mandated pre-academy testing, educational requirements, required clearances, reading and writing tests, physical skills tests, and availability of financial assistance through the community college. It also covers guidance in researching law enforcement agencies throughout the state and preparing for a law enforcement agency background and interview process. Field trips may be required. Pass/No Pass only.

PSTC 1514 Academy Graduate Training - SPD

Units: 1.5 - 2
Hours: 28 - 34 hours LEC
Prerequisite: None.

This course, designed for the new academy graduate, provides specific additional training in areas not covered in the POST Basic Academy. Topics include use of the intoxilyzer, in-car camera, field training overview and the robbery alarm monitor system. Pass/No Pass only.

PSTC 1515 Academy Instructor Certification Course

Units: 1.5
Hours: 24 hours LEC; 16 hours LAB
Prerequisite: None.

This course provides valuable skills for all instructors of California law enforcement including, in-service and public safety dispatch training. Students will gain facilitation skills and an understanding of how to employ adult learning methodologies appropriate for various law enforcement topics. This course meets the basic instructional skills training requirement to teach in the California Peace Officer Standards and Training (POST) Regular Basic Course and for the Academy Instructor Certificate Program. Pass/No Pass only.

PSTC 1517 Academy Graduate Training

Units: 2
Hours: 41 hours LEC; 32 hours LAB
Prerequisite: California POST-certified basic law enforcement academy within 2 years or equivalent as determined by the Dean of Academy Instruction. NOTE: Approval of equivalent training is not a guarantee that state regulatory or licensing agencies will also grant equivalency.
Enrollment Limitation: Students must 1) be free of felony convictions; 2) possess a valid California Driver's License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate; pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.

This course provides the recent POST-certified law enforcement academy graduate with additional training in topics specific to daily field operations. It is intended to bridge the academy and field training programs with a focus on enhancing the safety and well-being of law enforcement officers and the communities they serve. Topics include introduction to the field training program, internal affairs and the role of the police officers' union, legal updates, fair and impartial policing, less lethal force options and deployment, crowd movement and control, court appearances, and work-life balance and wellness. Pass/No Pass only.

PSTC 1520 POST Supervisor

Units: 2
Hours: 16 hours LEC; 64 hours LAB
Prerequisite: POST-certified basic law enforcement academy or equivalent as determined by the Dean of Academy Instruction. NOTE: Approval of equivalent training is not a guarantee that state regulatory or licensing agencies will also grant equivalency.
Enrollment Limitation: Students must 1) be free of felony convictions; 2) possess a valid California Driver's License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate; pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.

This course presents a comprehensive program of training in law, ethics, community policing, vehicle operations, use of force, patrol techniques, firearms, traffic control and enforcement, criminal investigations, physical fitness, chemical agents, and first aid and CPR. Upon successful completion of the course, students receive a Commission on Peace Officer Standards and Training (POST) Basic Academy Certificate of Completion. This course is formerly known as SPD 1100. Pass/No Pass only.
Students must 1) be free of felony convictions; 2) possess a valid California Driver’s License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate; pass the GED; pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.

This course examines the legal, moral, and ethical responsibilities and challenges associated with first line field operations supervision specific to the law enforcement environment. Lectures, facilitated discussions, and student presentations emphasize the examination of case studies, reviews and updates of case and statutory law, situational leadership, followership, critical incidents and critical incident management, stress management, managing conflict, counseling, and problem solving. It includes examining personality profiles for effective team development and supervision, developing and conducting subordinate counseling sessions, and preparing performance evaluations and improvement programs. This course is certified by the California Commission on Peace Officer Standards and Training, POST #2970-00400. Pass/No Pass only.

PSTC 1521 Supervisory (STC Format)
Units: 2
Hours: 24 hours LEC; 56 hours LAB
Prerequisite: PSTC 1270, 1271, or 1273

This course focuses on aspects of supervision specific to the field of corrections. This examination of supervision in the context of parole and probation examinations will include ethics, problem solving, discipline, legal update, grievance procedures, and leadership. This course is accredited by the State of California’s Standards and Training for Corrections (STC) with STC Certification #0218-011703. Pass/No Pass only.

PSTC 1531 Frontline Leadership SPD
Units: 3
Hours: 24 hours LEC; 59 hours LAB
Prerequisite: None.

This course is designed to enhance the leadership skills of line-level law enforcement personnel. Topics include characteristics of leadership, personal accountability, holding employees accountable, and ethical dilemmas in leadership.

PSTC 1533 Internal Affairs Investigation
Units: 1
Hours: 16 hours LEC; 8 hours LAB
Prerequisite: POST certified basic law enforcement academy or equivalent as determined by the Dean of Academy Instruction. NOTE: Approval of equivalent training is not a guarantee state regulatory or licensing agencies will also grant equivalency.

Enrollment Limitation: Students must 1) be free of felony convictions; 2) possess a valid California Driver’s License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate; pass the GED; pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.

This course introduces the issues and techniques associated with conducting Internal Affairs investigations in a law enforcement environment. Topics include the role and purpose of internal affairs, risk and liability assessment, role of internal affairs investigator, policy considerations and public employee rights. This course also explores the impact of internal investigations on employees, the organization and the public. This course is certified by the California Peace Officer Standards and Training (POST). Pass/No Pass only.

PSTC 1534 Sergeant Training and Orientation
Units: 2.5
Hours: 40 hours LEC; 40 hours LAB
Prerequisite: State of California Commission on Peace Officer Standards and Training (POST)-certified basic law enforcement academy or equivalent as determined by the Dean of Academy Instruction. NOTE: Approval of equivalent training is not a guarantee state regulatory or licensing agencies will also grant equivalency.

Enrollment Limitation: Students must 1) be free of felony convictions as reported by the Department of Justice; 2) possess a valid California Driver’s License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate; pass the GED; pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.

This course is designed for new law enforcement sergeants. It emphasizes leadership, handling of critical incidents and major crimes, internal affairs investigations, and pursuit liability. Pass/No Pass only.

PSTC 1542 Property and Evidence Room Management
Units: 1.25
Hours: 24 hours LEC
Prerequisite: None.

This course covers the legal requirements, procedures, and basic responsibilities and techniques involved in the proper operation of a property room. Topics include property room problems and solutions, packaging, security, storage management, documentation, purging, dispositions, audits, and inventories.

PSTC 1550 Code Enforcement Officer
Units: 2
Hours: 36 hours LEC; 4 hours LAB
Prerequisite: None.

This course is designed for newly appointed code enforcement/peace officers who are assigned to enforce the codes of a city, county, or state. Topics include ethics, zoning laws, sub-standard housing, inspection protocol, report writing, case preparation, and administrative hearings. Pass/No Pass only.

PSTC 1551 Code Enforcement Officer - Intermediate
Units: 2
Hours: 36 hours LEC; 4 hours LAB
Prerequisite: None.

This course is designed for code enforcement/peace officers with experience enforcing city, county, and state administrative codes. Topics include legal update, courtroom testimony, administrative hearings, tactical communication, use of pepper spray, problem oriented policing (POP), customer service, officer safety, and animal awareness. Pass/No Pass only.

PSTC 1552 Code Enforcement Officer - Advanced
Units: 2
Hours: 36 hours LEC; 4 hours LAB
Prerequisite: None.

This course covers advanced topics for code enforcement/peace officers. Topics include legal updates and personal safety, with a focus on vectors, molds, fire, electrical, and plumbing codes. Pass/No Pass only.

PSTC 1555 Regulatory Investigative Techniques
Units: 2
Hours: 40 hours LEC
Prerequisite: None.
This course is designed for the law enforcement officer assigned to an investigative role within a state agency. The course focuses on techniques that enhance the investigator's ability to prepare a criminal or administrative case for prosecution in a criminal or administrative hearing. Topics include roles and responsibilities, interview techniques, search warrants and report writing. Pass/No Pass only.

**PSTC 1571 Field Training Officer**

**Units:** 2  
**Hours:** 40 hours LEC  
**Prerequisite:** POST certified basic law enforcement academy or equivalent as determined by the Dean of Academy Instruction. NOTE: Approval of equivalent training is not a guarantee that state regulatory or licensing agencies will also grant equivalency.  
**Enrollment Limitation:** Students must 1) be free of felony convictions; 2) possess a valid California Driver’s License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate; pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.

This course is designed for newly assigned personnel responsible for training entry-level law enforcement officers. Topics include field training program goals and objectives; the expectations, functions, and roles of the field training officer; legal and liability issues for field training officers; driver awareness and safety; interaction with persons with mental illness or intellectual disability; teaching and training skills development; competency evaluation and documentation; intervention techniques; remediation; and test and scenario development strategies. Field Training Officer is certified by the California Commission on Peace Officer Standards and Training (POST), certification #2970-31725. Pass/No Pass only.

**PSTC 1572 Field Training Officer - Update**

**Units:** 1  
**Hours:** 24 hours LEC  
**Prerequisite:** PSTC 1571

This course updates field training officers on new training methods, new policing methods, and legal liabilities. Topics include academy update, remediation methodologies, tactical communications, adult learning theories, ethics, liability, and supervision. Pass/No Pass only.

**PSTC 1573 Field Training Program Supervisor, Administrator, Coordinator Course**

**Units:** 1  
**Hours:** 24 hours LEC  
**Prerequisite:** POST certified basic law enforcement academy or equivalent as determined by the Dean of Academy Instruction. NOTE: Approval of equivalent training is not a guarantee state regulatory or licensing agencies will also grant equivalency.  
**Enrollment Limitation:** Students must 1) be free of felony convictions; 2) possess a valid California Driver’s License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate; pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.

This POST certified course is designed for personnel responsible for administering their law enforcement agency's Field Training Program. Topics include POST approved Field Training Program and manual, managing a training program, documentation and legal liability. Pass/No Pass only.

**PSTC 1586 Citizens Academy - SPD**

**Units:** 1  
**Hours:** 12 hours LEC; 24 hours LAB  
**Prerequisite:** None.

This course provides a comprehensive overview of the criminal justice system. Topics include the role of the District Attorney, role of law enforcement and internal affairs, special challenges for the prosecution, race as a factor in the criminal justice system, the federal criminal justice system, anatomy of a criminal case, the judicial system, community focus and gangs, and building bridges and partnerships. Pass/No Pass only.

**PSTC 1602 Arrest and Control Instructor**

**Units:** 1.25  
**Hours:** 80 hours LAB  
**Prerequisite:** State of California Commission on Peace Officer Standards and Training (POST) certified law enforcement and/or State of California Board of State and Community Corrections Standard and Training for Corrections (STC) certified correctional environments. Instruction is provided in the areas of arrest and control, liability issues for police and corrections, health and safety precautions for instructing manipulative skills, safe and effective application of control holds, take-down maneuvers, and ground fighting. Pass/No Pass only.

**PSTC 1603 Arrest and Control Instructor Advanced**

**Units:** 0.5  
**Hours:** 40 hours LAB  
**Prerequisite:** PSTC 1602  
**Enrollment Limitation:** Students must 1) be free of felony convictions; 2) possess a valid California Driver’s License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate; pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.

This course provides students with advanced skills and knowledge for providing weaponless defense ground fighting instruction in State of California Commission on Peace Officer Standards and Training (POST) certified law enforcement and/or State of California Board of State and Community Corrections Standard and Training for Corrections (STC) certified corrections environments. Topics include legal updates, ground control, take-downs, wall defenses, escapes, and sustained resistance techniques. Pass/No Pass only.

**PSTC 1604 Arrest and Control Instructor Update**

**Units:** 0.25  
**Hours:** 24 hours LAB  
**Prerequisite:** PSTC 1602  
**Enrollment Limitation:** Students must 1) be free of felony convictions; 2) possess a valid California Driver’s License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate; pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.

This course provides weaponless defense instructors with updates in techniques, tactics, and legal issues in contemporary policing. Topics include legal updates, control holds, take-downs, arrest tactics,
searches, handcuffing, ground control, and expert witness testimony. 
Pass/No Pass only.

**PSTC 1621 Impact Weapons Instructor**

**Units:** 1.25  
**Hours:** 80 hours LAB  
**Prerequisite:** POST certified basic law enforcement academy or equivalent as determined by the Dean of Academy Instruction. NOTE: Approval of equivalent training is not a guarantee state regulatory or licensing agencies will also grant equivalency.  
**Enrollment Limitation:** Students must 1) be free of felony convictions; 2) possess a valid California Driver's License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate; pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.  

This course introduces students to effective instructional design and methods for teaching a Peace Officers Standards and Training (POST) certified course in the use of impact weapons course in public safety environments. Topics include adult learning, aggression and suspect action, POST regulations for instructing, evaluating, and testing in the use of impact weapons and documentation per the POST Administrative Manual (PAM), relevant case law, legal issues, physical warm-ups, striking and blocking techniques with the baton and the yawara stick, personal body weapons, and confrontational exercises and evaluations. Pass/No Pass only.

**PSTC 1645 Force and Weaponry - Basic**

**Units:** 1.5  
**Hours:** 18 hours LEC; 22 hours LAB  
**Prerequisite:** PSTC 1273  
**Enrollment Limitation:** Students must 1) be free of felony convictions as reported by the Department of Justice; 2) possess a valid California Driver's License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate; pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.  

This course meets the Standards and Training for Corrections (STC) requirements for field probation officers who are required to carry firearms in the performance of their duties. Topics include introduction to firearms, firearms safety, basic firearms manipulation, use of force, weaponless defense, weapon retention, and tactical movement. Students are required to participate in live-fire exercises and pass the PC 832 and close combat firearms qualifications. Upon course completion, students receive PC 832 firearms certification from STC and the California Commission on Peace Officer Standards and Training (POST). Pass/No Pass only.

**PSTC 1646 Force and Weaponry - Advanced**

**Units:** 1  
**Hours:** 16 hours LEC; 8 hours LAB  
**Prerequisite:** PSTC 1645  
**Enrollment Limitation:** Students must 1) be free of felony convictions; 2) possess a valid California Driver's License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate; pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.  

This course provides an update for armed probation officers. Topics include legal issues, shoot/don't shoot, weapon retention, arrest and control, and weapon malfunctions. Pass/No Pass only.

**PSTC 1648 Firearms Tactical Rifle SSD**

**Units:** 0.75  
**Hours:** 10 hours LEC; 14 hours LAB  
**Prerequisite:** POST certified basic law enforcement academy or equivalent as determined by the Dean of Academy Instruction. NOTE: Approval of equivalent training is not a guarantee state regulatory or licensing agencies will also grant equivalency.  
**Enrollment Limitation:** Students must 1) be free of felony convictions; 2) possess a valid California Driver's License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate; pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.  

This course builds upon the student's existing skills and knowledge in the legal, safe, and proper use of firearms in the law enforcement environment. Instruction includes the safe and proper handling of the long rifle, consideration of environmental factors, tactical shooting,
tactical movement, and shooting under dim light conditions. This course is
formerly known as SCSD 1221. Pass/No Pass only.

**PSTC 1650 Firearms and Tactical Rifle Instructor**

**Units:** 2.5  
**Hours:** 30 hours LEC; 50 hours LAB  
**Prerequisite:** PSTC 1648 and 1683; State of California Commission on Peace Officer Standards and Training (POST) certified basic law enforcement academy or equivalent as determined by the Dean of Academy Instruction. NOTE: Approval of equivalent training is not a guarantee that state regulatory or licensing agencies will also grant equivalency.

**Enrollment Limitation:** Students must be peace officer members of a police department, sheriff’s office, marshal’s office, the California Highway Patrol, the Department of Justice, or the Department of Corrections and Rehabilitation and are authorized by their agencies to possess short-barreled rifles within the course and scope of their duties. Additionally, students must have completed a training course in the use of these weapons certified by POST.

This course is specifically designed to prepare experienced law enforcement personnel to teach the POST certified firearms course at the basic law enforcement academy level and in-service law enforcement firearms training courses. Topics include the role of the law enforcement firearms instructor, liability issues, instructor development, lesson plan development, basic marksmanship, shooter problem analysis, standard and non-traditional shooting positions, weapons transition, and tactical movement and cover. This course meets the minimum instructor certification requirements to be a POST certified pistol and rifle instructor. Successful completion of all portions of the course, including all course work and firearms qualifications, are mandatory to receive certification. Partial certification will not be allowed. POST certification 2970-21209. Pass/No Pass.

**PSTC 1651 Firearms Instructor Update**

**Units:** 0.5  
**Hours:** 2 hours LEC; 22 hours LAB  
**Prerequisite:** PSTC 1650  
**Enrollment Limitation:** Students must 1) be free of felony convictions; 2) possess a valid California Driver’s License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate; pass the GED or the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.

This course is designed to further develop and update existing firearm instructors on instructional techniques, diagnostic interpretation, and target systems. This course is accredited by the Commission on Peace Officer Standards and Training (POST) with POST Certification #297021740 and the Standards and Training for Correction (STC) Program #0218-027422. This course is formerly known as PSTC 1258. Pass/No Pass only.

**PSTC 1653 Firearms Instructor - Long Rifle**

**Units:** 1.5  
**Hours:** 30 hours LEC; 10 hours LAB  
**Prerequisite:** PSTC 1650; POST-certified basic law enforcement academy or equivalent as determined by the Dean of Academy Instruction. NOTE: Approval of equivalent training is not a guarantee that state regulatory or licensing agencies will also grant equivalency.

This course is designed for existing law enforcement firearms instructors to develop into effective patrol rifle instructors in the AR15 platform patrol rifle. This will be accomplished through an understanding of the weapon, legal aspects, demonstrating proficiency with the weapon, as well as specific training in the teaching of a patrol rifle course. Topics include safety protocol, liability, nomenclature, weapon employment, and student presentations. Because this course is designed to provide practical hands-on training in police tactics and weapon usage, participants will engage in activities and exercises that include a risk of injury. Pass/No Pass only.

**PSTC 1654 Firearms / Rifle Instructor - Update**

**Units:** 0.5  
**Hours:** 2 hours LEC; 22 hours LAB  
**Prerequisite:** PSTC 1653  
**Enrollment Limitation:** Students must be legally authorized to carry/possess the short-barreled rifle. Authorized persons are identified as “peace officer members of a police department, sheriff’s office, marshal’s office, the California Highway Patrol, the Department of Justice, or the Department of Corrections and Rehabilitation, when on duty and the use is authorized by the agency and is within the course and scope of their duties, and the officers have completed a training course in the use of these weapons certified by the Commission on Peace Officer Standards and Training.”

This course provides the POST-certified law enforcement rifle instructor with contemporary information on legal issues, liability issues, updated training techniques and skills assessment in the use of the short-barreled patrol rifle. Topics include instructional techniques, close-quarter combat and active shooter techniques, weapon maintenance, and deployment shooting techniques. Pass/No Pass only.

**PSTC 1660 Public Safety Dispatcher - Basic (SPD)**

**Units:** 6  
**Hours:** 105 hours LEC; 15 hours LAB  
**Prerequisite:** None.

This course is designed to introduce new dispatchers to the basic requirements of first responder dispatching. This course fulfills the requirement by the Commission on Standards and Training for Peace Officers (POST). Topics include telephone procedures, radio procedures, stress management, criminal justice system and law. Pass/No Pass only.

**PSTC 1661 Public Safety Dispatcher - Advanced (SPD)**

**Units:** 8  
**Hours:** 77 hours LEC; 203 hours LAB  
**Prerequisite:** PSTC 1660

This course is designed for students who have successfully completed the Public Safety Dispatcher Basic Course. Topics include using Computer Aided Dispatch (CAD), databases, dispatcher role in officer safety, telecommunications, and practical applications. Pass/No Pass only.

**PSTC 1662 Radio Dispatch Academy (SPD)**

**Units:** 2.5  
**Hours:** 33 hours LEC; 42 - 47 hours LAB  
**Prerequisite:** PSTC 1660

This course increases the student’s knowledge of radio procedures and technology, emergency dispatch, and telecommunications. Topics include radio equipment, radio codes, basic voice dispatch, special assistance commands, broadcast procedures, officer safety, and search patterns. Pass/No Pass only.
PSTC 1663 SPD Communications Training Officer Program

Units: 2
Hours: 34 hours LEC; 6 hours LAB
Prerequisite: Completion of a POST Law Enforcement Basic or Dispatcher's Academy

This course is designed to instruct law enforcement dispatchers on the techniques for training newly assigned communications center personnel. Topics include ethics and leadership, adult learning concepts, training methods and performance assessments, training action plans, and emotional intelligence and conflict resolution throughout the training process. Pass/No Pass only.

PSTC 1671 Automated Field Reporting (AFR)

Units: 0.5
Hours: 4 hours LEC; 16 hours LAB
Prerequisite: PSTC 1660 (Public Safety Dispatcher - Basic (SPD)) or equivalent as determined by the Dean of academy instruction.

This course builds upon students' existing skills, providing training and orientation to the law enforcement records management system. Topics include records management, tracking, data screens and terminology. Pass/No Pass only.

PSTC 1683 Continuing Professional Training for Peace Officers

Units: 0.25 - 1.5
Hours: 6 - 16 hours LEC
Prerequisite: California POST-certified basic law enforcement academy within two (2) years or equivalent as determined by the Dean of Academy Instruction (Chapter 11, California Code of Regulations, Section 1005). NOTE: Approval of equivalent training is not a guarantee state regulatory or licensing agencies will also grant equivalency.

Enrollment Limitation: Students must 1) be free of felony convictions; 2) possess a valid California Driver's License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate; pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.

This course is designed to meet the 2-year perishable skills training cycle requirements for California peace officers. Course content consists of instructional blocks which update and advance the student's existing knowledge and skill set associated with providing public safety in dynamic and multicultural environments. Instruction includes tactical communication, first aid/CPR update, tactical firearms, arrest and control, and may include additional topics determined by legislative mandates and/or regional needs. Formerly SCSD 1150. Pass/No Pass only.

PSTC 1684 Continued Professional Training - Sacramento Police Department

Units: 0.25 - 2.5
Hours: 4 - 40 hours LEC; 4 - 40 hours LAB
Prerequisite: POST-certified basic law enforcement academy within two (2) years or equivalent as determined by the Dean of Academy Instruction (Chapter 11, California Code of Regulations, Section 1005). NOTE: Approval of equivalent training is not a guarantee state regulatory or licensing agencies will also grant equivalency.

Enrollment Limitation: Students must 1) be free of felony convictions; 2) possess a valid California Driver's License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate; pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.

This course updates and advances the student's existing knowledge and skill set associated peacekeeping and law enforcement in contemporary society. Instruction in evolving issues includes the safe handling of firearms, tactical shooting, tactical movement, arrest and control, ground fighting, chemical weapons, non-lethal weapons, government codes, penal codes, vehicle codes, health and safety codes, welfare and institution codes, and interpersonal and tactical communication. This course is formerly known as SPD 1193. Pass/No Pass only.

PSTC 1685 Patrol Entry and Search Training- SPD

Units: 0.25
Hours: 3 hours LEC; 5 hours LAB
Prerequisite: POST certified basic law enforcement academy or equivalent as determined by the Dean of Academy Instruction. NOTE: Approval of equivalent training is not a guarantee state regulatory or licensing agencies will also grant equivalency.

Enrollment Limitation: Students must 1) be free of felony convictions; 2) possess a valid California Driver's License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate; pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.

This update course provides students with information on the various aspects of patrol entry and search techniques. Topics include firearms entry and search techniques in the law enforcement environment, including room clearing, three man bump, and team composition. This course is formerly known as SPD 1217. Pass/No Pass only.

PSTC 1720 Defensive Driving

Units: 0.5
Hours: 8 hours LEC
Prerequisite: None.

This course is designed to enhance the driving skills of public employees who are required to drive motor vehicles in the performance of their duties. Pass/No Pass only.

PSTC 1722 Driver Training - Update

Units: 0.5
Hours: 6 hours LEC; 12 hours LAB
Prerequisite: POST certified basic law enforcement academy or equivalent as determined by the Dean of Academy Instruction. NOTE: Approval of equivalent training is not a guarantee state regulatory or licensing agencies will also grant equivalency.

Enrollment Limitation: Students must 1) be free of felony convictions; 2) possess a valid California Driver's License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate; pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.

This course is designed for law enforcement personnel to update them on new laws and refresh their driving skills. This is a Commission on Peace Officer Standards and Training (POST) mandate. Pass/No Pass only.

PSTC 1729 Emergency Vehicle Operations Instructor (SSD/SPD)

Units: 1
Hours: 12 hours LEC; 28 hours LAB
Prerequisite: Completion of a Commission on Peace Officer Standards and Training (POST) Basic Academy

This course provides information and resources to start an emergency vehicle operations course, develop instructional lesson plans, and day to day operational issues. Topics include starting an Emergency Vehicle Operations Course program, Emergency Response, Pursuit Driving, and Civil Liability. Pass/No Pass only.
PSTC 1734 Basic K9 Training

Units: 7
Hours: 8 hours LEC; 372 hours LAB
Prerequisite: POST-certified basic law enforcement academy or equivalent as determined by the Dean of Academy Instruction. NOTE: Approval of equivalent training is not a guarantee that state regulatory or licensing agencies will also grant equivalency.
Enrollment Limitation: Students must 1) be free of felony convictions; 2) possess a valid California Driver's License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate; pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.

This course provides law enforcement officers with skills and knowledge in areas of canine (K9) training and deployment. Topics include care at the home of the canine partner, canine behavior, obedience, obstacle and agility course work, field searches, narcotics and explosives detection, vehicle retention, and safety. Pass/No Pass only.

PSTC 1744 Less Lethal Force Update-SPD

Units: 0.75
Hours: 12 hours LEC; 6 hours LAB
Prerequisite: POST certified basic law enforcement academy or equivalent as determined by the Dean of Academy Instruction. NOTE: Approval of equivalent training is not a guarantee state regulatory or licensing agencies will also grant equivalency.
Enrollment Limitation: Students must 1) be free of felony convictions; 2) possess a valid California Driver's License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate; pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.

This update course on lethal force enhances the knowledge of personal safety and effectiveness of the officer assigned to patrol. Topics include pepper spray, use of baton, and carotid holds. This course is formerly known as SPD 1195. Pass/No Pass only.

PSTC 1745 Police Radar Operator (SPD)

Units: 0.5
Hours: 32 hours LAB
Prerequisite: POST certified basic law enforcement academy or equivalent as determined by the Dean of Academy Instruction. NOTE: Approval of equivalent training is not a guarantee state regulatory or licensing agencies will also grant equivalency. Students who do not hold a POST basic certificate, or equivalent, may struggle in this course, because fundamental terms and concepts and laws basic to law enforcement will not be taught or explained.

Enrollment Limitation: Students must 1) be free of felony convictions; 2) possess a valid California Driver's License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate; pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.

This course advances the student's existing knowledge and skill set in the area of traffic violation enforcement and in the proper use of police radar devices. Topics include speed enforcement, history and theory, vehicle code law and court decisions, moving radar operation, radar effects, and visual speed and range estimation. The course may meet at various off-campus locations. Pass/No Pass only.

PSTC 1749 Officer Survival and Tactics

Units: 1
Hours: 8 hours LEC; 32 hours LAB
Prerequisite: POST certified basic law enforcement academy or equivalent as determined by the Dean of Academy Instruction. NOTE: Approval of equivalent training is not a guarantee state regulatory or licensing agencies will also grant equivalency.
Enrollment Limitation: Students must 1) be free of felony convictions; 2) possess a valid California Driver's License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate; pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.

This course is designed to advance the skill level of law enforcement personnel in the most current methods of field tactics and combative confrontations. Topics include officer survival techniques, handgun retention techniques, and defensive tactics. Pass/No Pass only.

PSTC 1761 Crime Prevention Through Environmental Design

Units: 2
Hours: 40 hours LEC
Prerequisite: None.

This course is designed for crime prevention personnel and city and county planners dealing with environmental designs. Topics include reviewing new construction submittals and their impact on law enforcement, community policing, problem solving and theory and process. Pass/No Pass only.

PSTC 1770 Basic Peer Support

Units: 0.5 - 1
Hours: 6 - 10 hours LEC; 18 - 30 hours LAB
Prerequisite: None.

This course introduces the skills required to provide basic peer support in the law enforcement environment. Topics include communication and listening skills, peer support methods, critical incidents and critical incident stress management, operational stress injury, the grief cycle, suicide prevention and intervention, peer support responses, and peer support program building. Pass/No Pass only.

PSTC 1771 Faith in Crisis

Units: 1.5
Hours: 24 hours LEC
Prerequisite: None.

This course provides volunteer crisis responders with the basic knowledge needed to provide appropriate support for survivors of violent crimes and critical incidents. Topics include local program background, structure, and code of ethics; operational procedures for local public safety agencies; local resources and referral agencies; occupational health, safety, and first aid; and mandated reporting requirements. Pass/No Pass only.

PSTC 1773 Basic Critical Incident Stress Management

Units: 1
Hours: 18 hours LEC
Prerequisite: None.

This course examines a wide range of crisis intervention services, including pre-incident and post-incident crisis education, significant support services, crisis intervention for individuals, demobilizations after large-scale traumatic incidents, small-group diffusing, and the group intervention known as Critical Incident Stress Debriefing (CISD). Pass/No Pass only.

PSTC 1780 Campus Law Enforcement

Units: 2
Hours: 36 hours LEC; 4 hours LAB
Prerequisite: Successful completion of a POST certified basic law enforcement academy within the last three years or current equivalent...
training as determined by the Dean of Academy Instruction. NOTE: Approval of equivalent training is not a guarantee that state regulatory or licensing agencies will also grant equivalency. Students who do not hold a POST basic certificate or equivalent may struggle in this course. Fundamental terms, concepts, and laws basic to law enforcement will not be taught or explained.

Enrollment Limitation: Students must 1) be free of felony convictions; 2) possess a valid California Driver's License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate; pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.

This course satisfies the requirements of California Penal Code section 832.3(h) which requires any school peace officer first employed by a K-12 public school district or California Community College complete the specialized course of training within two years of the date of first employment. This course also satisfies the minimum standards for legislatively mandated courses requirement established by 11 CCR § 1081. Topics include the role and responsibility of school police in campus communities, laws and liability, mandated reporting requirements, de-escalation skills and conflict resolution, dynamics of student development, principled policing and problem-solving, operational awareness in the educational environment, and emergency operations. While this course is suitable for sworn peace officers employed by a county sheriff or city police department who are assigned to perform the duties of a School Resource Officer at a K-12 public school, there is no mandate for their attendance. This course is certified by the California Commission on Peace Officer Standards and Training (POST), #2970-22294. Pass/No Pass only.

**PSTC 1781 School Resource Officer**

Units: 2
Hours: 40 hours LEC
Prerequisite: None.

This course is designed for the officer assigned or newly assigned as a school resource officer. Topics include school law, mentoring, basic teaching skills, instructional techniques and constructing a course outline. Pass/No Pass only.

**PSTC 1787 School Security Officer**

Units: 1
Hours: 24 hours LEC
Prerequisite: None.

This course is designed for security officers and guards (watch-person, campus monitor, campus officer) employed by a school district (K-12 or California Community College) for more than 20 hours per week. Topics include roles and responsibilities, liability issues, conflict resolution and student behavior. This course is approved by the Department of Consumer Affairs/Bureau of Security and Investigative Services, and the California Commission on Peace Officers Standards and Training (POST). Pass/No Pass only.

**PSTC 1800 Interview and Interrogation Techniques**

Units: 2
Hours: 36 hours LEC; 4 hours LAB
Prerequisite: POST certified basic law enforcement academy or equivalent as determined by the Dean of Academy Instruction. NOTE: Approval of equivalent training is not a guarantee state regulatory or licensing agencies will also grant equivalency. Students who do not hold a POST basic certificate or equivalent may struggle in this course.

Enrollment Limitation: Students must 1) be free of felony convictions; 2) possess a valid California Driver's License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate; pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.

This course advances the law enforcement or corrections student’s knowledge and skills set in legal and behavioral techniques associated with interview and interrogation. Topics include predictable behavior, free-format interviews, elimination interviews, polygraphs, and the Ten Step Plan for interviews and interrogations. This course is certified by the California Commission on Peace Officer Standards and Training (POST), #2970-31445 and Standards and Training for Corrections (STC), #0218-007921. Pass/No Pass only.

**PSTC 1801 Background Investigations**

Units: 1.5 - 2
Hours: 32 - 40 hours LEC
Prerequisite: None.

This course is designed for law enforcement or civilian personnel who are responsible for conducting background investigations for the hiring of public safety personnel. Topics include the background process, psychological evaluations, interviewing techniques and documentation. This course is approved by the California Commission on Peace Officer Standards and Training (POST) and California Standards and Training for Corrections (STC). Pass/No Pass only.

**PSTC 1804 Informant Development and Maintenance**

Units: 1
Hours: 24 hours LEC
Prerequisite: POST certified basic law enforcement academy or equivalent as determined by the Dean of Academy Instruction. NOTE: Approval of equivalent training is not a guarantee state regulatory or licensing agencies will also grant equivalency.

Enrollment Limitation: Students must 1) be free of felony convictions; 2) possess a valid California Driver's License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate; pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.

This course advances students’ existing investigative skills, interview and interrogation skills, informant development and management, case management and the development and execution of search warrants. Topics include common problems when using informants, limitations on the use of informants, informant motives, informant policies, investigative strategies, and informants and ethics.

**PSTC 1807 Advanced Identification of Organized Criminal Street Gangs and Criminal Gang Activities**

Units: 0.25 - 0.75
Hours: 8 - 16 hours LEC
Prerequisite: None.

This course provides students with information and resource identification critical to the reduction of gang violence. Pass/No Pass only.

**PSTC 1812 Fingerprint Identification - Basic**

Units: 2
Hours: 40 hours LEC
Prerequisite: None.

This course is designed to provide basic instruction in fingerprint comparison and identification. Topics include ridge characteristics, basic pattern types, classifications and verifications. Pass/No Pass only.
PSTC 1813 Crime Scene and Forensic Photography of Physical Evidence
Units: 1
Hours: 24 hours LEC
Prerequisite: None.

This course provides law enforcement crime scene investigators the skills needed to conduct forensic photography of physical evidence as well as conduct general crime scene photography. Topics include legal admissibility, photographic coverage, major crime scene photography, film speed, lighting techniques, and photographic equipment. Pass/No Pass only.

PSTC 1814 Advanced Latent Print Comparison & Identification
Units: 2
Hours: 40 hours LEC
Prerequisite: PSTC 1812

This advanced course is designed for the crime scene investigator or fingerprint technician to learn how to compare and identify latent/fragmentary prints to inked fingerprint and palm print impressions. This course is formerly known as PSTC 1821. Pass/No Pass only.

PSTC 1820 Crime Scene Investigation - Basic
Units: 2
Hours: 30 hours LEC; 30 hours LAB
Prerequisite: None.

This course is designed for newly assigned law enforcement agency crime scene investigators who are responsible for conducting crime scene investigations. Topics include evidence integrity, documentation, evidence recognition and preservation, firearms study, latent prints, and evidence handling and storage. Pass/No Pass only.

PSTC 1852 Drug and Alcohol Recognition - Update
Units: 1
Hours: 24 hours LEC
Prerequisite: None.

This course provides law enforcement personnel with the knowledge and skills to evaluate the effects of drugs and alcohol on an individual and to provide expert testimony on the evaluation. Topics include legal codes, stimulants and depressants, investigative techniques and courtroom testimony. Pass/No Pass only.

PSTC 1853 Integrated Narcotics Training
Units: 0.5 - 1
Hours: 4 - 8 hours LEC; 32 - 36 hours LAB
Prerequisite: POST certified basic law enforcement academy or equivalent as determined by the Dean of Academy Instruction. NOTE: Approval of equivalent training is not a guarantee state regulatory or licensing agencies will also grant equivalency.

Enrollment Limitation: Students must 1) Be free of felony convictions; 2) possess a valid California Driver's License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate; pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.

This course advances the student's existing advanced investigative skills with specialized narcotics related training. Topics include ethics and integrity, surveillance techniques, undercover operations, and asset seizure. This course is formerly known as SPD 1237. Pass/No Pass only.

PSTC 1854 Drug Recognition Evaluator Course
Units: 3.5
Hours: 64 hours LEC; 8 hours LAB
Prerequisite: POST certified basic law enforcement academy or equivalent as determined by the Dean of Academy Instruction. NOTE: Approval of equivalent training is not a guarantee state regulatory or licensing agencies will also grant equivalency. Enrollment Limitation: Students must 1) Be free of felony convictions; 2) possess a valid California Driver's License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate; pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.

This course enhances the skills of law enforcement personnel to evaluate and provide expert testimony on the effects of drugs and alcohol. Topics include psycho-physical tests, eye examinations, alcohol workshop, signs and symptoms, drugs in society, vehicle operation, drug classification process and procedures, dystagmus, convergence, pupil size and reaction to light, physiology and drugs, depressants, stimulants, physician's desk reference, hallucinogens, associative anesthetics, narcotic analgesics, inhalants, cannabis, report writing, curriculum vitae, and case preparation and testimony. Pass/No Pass only.

PSTC 1874 Traffic Collision Investigation
Units: 2
Hours: 40 hours LEC
Prerequisite: PSTC 1900

This course is designed to expand the investigative knowledge and skills of the traffic collision investigator. Topics include definitions and terminologies associated with minor and major collisions, measuring and diagramming the collision scene and speed computation. Pass/No Pass only.

PSTC 1900 Traffic Collision - Basic
Units: 2
Hours: 40 hours LEC
Prerequisite: None.

This course provides in-depth instruction into the multiple disciplines of traffic collision investigation. Topics include scene management techniques and introduction to the Manual on Uniform Traffic Control Devices, highway engineering definitions, Nine-Cell Matrix, incident scene photography, primary collision factors, identification and documentation of physical evidence, measuring and diagramming methodology, use of the Northwestern University traffic template functions and nomographs, and an in-depth discussion on proper traffic collision documentation and Highway Patrol Manual 110.5, Collision Investigation Manual (CIM). This course satisfies the prerequisites for the Intermediate Collision Investigation course, as well as the requirements of Vehicle Code Section 40600.

PSTC 1902 Traffic Accident Reconstruction
Units: 4
Hours: 72 hours LEC; 8 hours LAB
Prerequisite: POST certified basic law enforcement academy or equivalent as determined by the Dean of Academy Instruction. NOTE: Approval of equivalent training is not a guarantee state regulatory or licensing agencies will also grant equivalency. Students who do not hold a POST basic certificate, or equivalent, may struggle in this course, because fundamental terms and concepts and laws basic to law enforcement will not be taught or explained.
Enrollment Limitation: Students must 1) be free of felony convictions; 2) possess a valid California Driver's License; 3) undergo a fingerprint and criminal history check; 4) be a minimum of 18 years of age; 5) be a United States high school graduate; pass the GED, pass the California High School Proficiency Examination, or have attained a two-year or four-year degree from an accredited college or university; and 6) complete a medical suitability examination.

This course advances the skill set of law enforcement personnel assigned to investigate traffic collisions. It covers the knowledge and skills needed to determine at-impact speeds of collision-involved vehicles and to draw conclusions of how and why the collision occurred. Topics include math and physics review, reconstruction principles, crush analysis, conservation of momentum analysis, heavy duty and articulated vehicles, motorcycle collision, vehicle vs. pedestrian, and bicycle collision analysis. Pass/No Pass only.

PSTC 1998 Work Experience in PSTC
Units: 1 - 4

Prerequisite: None.

PSTC 1999 Experimental Offering in PSTC
Units: 0.5 - 4
Prerequisite: None.

This course is designed to meet the changing needs of law enforcement and corrections by providing a curriculum for new or experimental courses promulgated by a specific criminal agency, STC, POST or the State Legislature as curriculum is being tested. The courses will vary in length from two-hour courses to twenty-four-hour technical courses. This course may be taken four (4) times for credit.

Sacramento Metropolitan Fire District (SMFD) Courses
Respiratory Care

This degree is preparation for licensure as a Respiratory Care Practitioner in the state of California as a Respiratory Care Practitioner at the Advanced Registered Respiratory Therapist level. It focuses on diagnostic procedures, treatment, and management of patients with conditions affecting the cardiopulmonary system. Course work includes physical assessment, medical gas therapies, mechanical life support, airway care, pharmacology, neonatal/pediatric therapy, and specialized cardiopulmonary procedures. All degree major courses require a grade of “C” or better to remain in the program.

ARC’s Respiratory Care Program is designed to prepare California licensed respiratory care practitioners at the registered respiratory therapist level. It focuses on diagnostic procedures, treatment, and management of patients with conditions affecting the cardiopulmonary system. The respiratory care practitioner works closely with the physician in assessing the patient and planning the proper respiratory care protocol.

The Respiratory Care curriculum is a two-year program designed to prepare the student for employment and to participate as a member of the healthcare team by providing direct patient care. Experience in respiratory care is provided in selected local hospitals where the student participates in clinical externships. Safe, ethical, and professional levels of practice are necessary for retention of students in the Respiratory Care Program.

The American River College (ARC) Respiratory Care (RC) program is accredited by the Commission on Accreditation for Respiratory Care (CoARC) (https://coarc.com/),

The ARC RC CoARC number is 200194.

CoARC accredits respiratory therapy education programs in the United States. To achieve this end, it utilizes an ‘outcomes based’ process. Programmatic outcomes are performance indicators that reflect the extent to which the educational goals of the program are achieved and by which program effectiveness is documented. CoARC Programmatic Outcome Data. (https://coarc.com/students/programmatic-outcomes-data/)

The Respiratory Care Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Enrollment Eligibility

To be eligible for enrollment in the program, the student must meet the following criteria:

- Graduation from an accredited high school (graduates from outside the United States must have transcripts evaluated by an independent agency), or successful completion of the General Educational Development (GED) Test or California High School Proficiency Examination (CHSPE) as defined by the current requirements of the State of California and National Board for Respiratory Care.
- A GPA of 2.5 in all prerequisite courses.
Respiratory Care

• AH 110 with a grade of "C" or better.
• BIOL 430 and BIOL 431 with grades of "C" or better.
• BIOL 440 or BIOL 442 with a grade of "C" or better.
• PHYS 310 or PHYS 350 with a grade of "C" or better.
• Current college GPA of 2.0 or better.
• A Curriculum Planning Summary Sheet completed by an ARC counselor and dated within the year the enrollment application packet is submitted.
• A completed pre-enrollment application.

Enrollment Process

Eligible students are selected for the program according to the following steps:

• Applications to the program may be obtained online at http://www.arc.losrios.edu/Programs_of_Study/Health_and_Education/Respiratory_Care.htm. Please check the above website for application period and submission deadline.
• Only students who meet the pre-enrollment requirements and follow the pre-enrollment procedures will be considered for the program.
• Selection is based on a computerized random selection process from among the qualified applicants.
• The student accepted into the Respiratory Care program is required to have a physical examination, inoculations, drug screen, background check, and malpractice insurance. The student is responsible for any cost incurred related to meeting the requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

• discuss patient/client reports with members of the health care network.
• collect patient information relevant to the diagnosis and treatment of patients affected by pulmonary disease.
• recommend appropriate treatment plans based upon auditory, tactile, and visual feedback.
• record assessment findings, treatment plans, and recommendations for care in medical records.
• chart patient care in accordance with local, regional, and national standards.
• categorize patients affected by pulmonary disease as having acute or chronic conditions.
• define pulmonary disorders as restrictive or obstructive disease.
• comply with ethical standards of the profession.

Career Information

The Bureau of Labor Statistics states that faster than average employment growth is projected for respiratory therapists. The increasing demand will come from substantial increases in the middle aged and elderly populations. Greater demand will also result from the expanding role of respiratory therapist in case management, disease prevention, emergency care, and the early detection of pulmonary disorders. Career opportunities include positions in hospitals and other areas, especially in home health care services, physician’s offices, and medical equipment supply companies.

Respiratory Care (RC) Courses

RC 110 Cardiopulmonary Pathologies for Respiratory Care

Units: 4
Hours: 72 hours LEC
Prerequisite: None.
Corequisite: RC 111
Enrollment Limitation: Acceptance into the Respiratory Care Program.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.

This course introduces the common pathologies affecting the cardiopulmonary system and related pharmacological treatment. Topics include obstructive and restrictive airway diseases, early childhood respiratory diseases, infectious pulmonary diseases, and pulmonary vascular diseases.

RC 111 Principles of Respiratory Care

Units: 7
Hours: 108 hours LEC; 54 hours LAB
Prerequisite: None.
Corequisite: RC 110
Enrollment Limitation: Acceptance into the Respiratory Care Program.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.

This course introduces critical thinking skills necessary for entry into clinical practice in respiratory care. It includes a comprehensive overview of the cardiopulmonary system with emphasis on applied physiology. Additionally, it covers ventilation, gas transport, gas exchange, and acid-base balance, including interpretation of data and the relationship of therapeutics to physiological principles. Respiratory care equipment, patient assessment skills, safe practices, such as the Health Insurance Portability and Accountability Act (HIPAA), human rights and privacy, personal health and hygiene, and hospital orientations are introduced. This course is preparation for general practice as a respiratory care practitioner. It covers laboratory skills and procedures with emphasis on the application of theories and techniques related to assessment, evaluation, and interpretation of patients with cardiopulmonary illness. Included are concepts of Basic Life Support.

RC 112 Concepts of Airway Care & Mechanical Ventilation

Units: 4
Hours: 72 hours LEC
Prerequisite: RC 110 and 111 with grades of "C" or better
Corequisite: RC 122, 123, and 124

This course expands on the principles of respiratory failure, airway protective techniques, and advanced life support. Topics include mechanical ventilator theories and modes, invasive and noninvasive airway care, and Advanced Cardiac Life Support (ACLS) procedures.

RC 122 Airway Care & Mechanical Ventilation Laboratory

Units: 1
Hours: 54 hours LAB
Prerequisite: RC 110 and 111 with grades of "C" or better
Corequisite: RC 121, 123, and 124

This course introduces higher levels of clinical practice including critical care. It covers Advanced Cardiac Life Support (ACLS), airway protective procedures, and mechanical ventilation.
RC 123 Clinical Externship I

Units: 3
Hours: 162 hours LAB
Prerequisite: RC 110 and 111 with grades of "C" or better
Corequisite: RC 121, 122, and 124
Enrollment Limitation: Students must meet the health requirements of the Los Rios Community College District for Allied Health Programs and certification in Basic Life Support for the Health Care Provider.

This course presents the principles of medical gas delivery devices; humidity, aerosol and hyperinflation therapies, and chest physiotherapy. It also covers the application, patient assessment, patient monitoring, and evaluation of the efficacy of medical gas, humidity, aerosol and hyperinflation therapies, and chest physiotherapy. A portion of this course may be offered with a TBA component which may include working in clinical sites.

RC 124 Respiratory Care Pharmacology

Units: 3
Hours: 54 hours LEC
Prerequisite: RC 110 and 111 with grades of "C" or better
Corequisite: RC 121, 122, and 123

This course covers the concepts and principles of pharmacology required in the practice of respiratory care, including medications, actions, dosages, routes of administration, and adverse reactions. Topics include patient education of medication delivery devices, patient monitoring devices, utilization techniques, and the standards for therapeutic efficacy in relation to asthma, chronic obstructive pulmonary disease, and smoking cessation.

RC 130 Respiratory Care in Neonatal and Pediatric Populations & Diagnostic Studies

Units: 3
Hours: 54 hours LEC
Prerequisite: RC 121, 122, 123, and 124 with grades of "C" or better
Corequisite: RC 131 and 123

This course prepares students to work in laboratories and special care areas of a hospital. Topics include perinatal and pediatric diseases, labor and delivery, rehabilitation, and advanced diagnostic studies performed by respiratory therapists. Additional topics include bronchoscopy, advanced pulmonary function studies, bronchial provocation testing, polysomnography, exercise stress tests, metabolic studies, hemodynamic measurements, advanced modalities of mechanical ventilation, and cardiovascular testing.

RC 131 Respiratory Care in Neonatal and Pediatric Populations & Diagnostic Studies Laboratory

Units: 1
Hours: 54 hours LAB
Prerequisite: RC 121, 122, 123, and 124 with grades of "C" or better
Corequisite: RC 130 and 132

This course prepares students for general practice as respiratory care practitioners. It provides laboratory practice in medical gas, humidity/aerosol, hyperinflation and bronchial hygiene therapies, airway management, and non-invasive and invasive mechanical ventilatory support as applied to neonatal and pediatric patients in specialized critical care units. Additionally, it covers pulmonary rehabilitation techniques, cardiopulmonary stress testing, sleep studies, and respiratory care techniques in the home setting. Students must successfully complete the National Board for Respiratory Care (NBRC) Self Assessment Examinations to receive a passing grade in this course. Students are responsible for fees associated with this examination.

RC 132 Clinical Externship II

Units: 6
Hours: 324 hours LAB
Prerequisite: RC 121, 122, 123, and 124 with grades of "C" or better
Corequisite: RC 130 and 131

Enrollment Limitation: Student must meet the health requirements of the Los Rios Community College District for Allied Health Programs and certification in Advanced Cardiac Life Support.

This is a preparatory course for advanced practice as respiratory care practitioners. Topics include clinical practice in the application of airway management, including intubation, suctioning, and bronchoscopy, to adult patients in critical care units. Additionally it includes clinical practice in application of non-invasive and invasive mechanical ventilatory support, ventilator settings/adjustments, monitoring, adjusting ventilators to improve oxygenation and/or ventilation and discontinuance from mechanical ventilatory support. Clinical experience is provided in regional hospitals and clinics. A portion of this course may be offered with a TBA component which may include working in clinical sites.

RC 140 Professional Development in Respiratory Care

Units: 2
Hours: 36 hours LEC
Prerequisite: RC 130, 131, and 132 with grades of "C" or better
Corequisite: RC 142

This course prepares students for transition into professional practice. Topics include ethical behaviors, resume writing, and professional attributes and dress for the respiratory care setting. Interviewing skills, professional test preparation for national licensing examinations, and practice examinations for the National Board of Respiratory Care's (NBRC) Therapist Multiple-Choice Examination (TMC) and Clinical Simulation Self Assessment Examinations (CSE) are also covered.

RC 142 Clinical Externship III

Units: 6
Hours: 324 hours LAB
Prerequisite: RC 130, 131, and 132 with grades of "C" or better
Corequisite: RC 140

Enrollment Limitation: Meet the health requirements of the Los Rios Community College District for Allied Health Programs and certification in Pediatric Advanced Life Support and Neonatal Resuscitation Program.

This course prepares for advanced practice of respiratory care. Topics include labor and delivery, neonatal intensive care, cardiac and medical intensive care, medical trauma management, application of pulmonary rehabilitation techniques, cardiopulmonary stress testing, sleep studies, and respiratory care techniques in the home setting. Additional topics include case studies in medical management.

RC 295 Independent Studies in Respiratory Care

Units: 1 - 3
Prerequisite: None.

RC 299 Experimental Offering in Respiratory Care

Units: 0.5 - 4
Prerequisite: None.

This is the experimental courses description.
Social Justice Studies

Starting Fall 2019 American River College is offering two Social Justice Studies degrees. Social Justice Studies is an interdisciplinary AA-T degree program that combines core courses in social justice with related coursework in a variety of disciplines, including History, English, Sociology, and Psychology.

Students in the program will:

• Research theoretical perspectives and critical theories on social justice
• Analyze power, privilege, and oppression
• Study historical origins of social justice
• Assess artistic works that examine oppression, power, and justice

Some of the core courses include:

• SJS 300 Introduction to Social Justice Studies
• SJS 310 Introduction to LGBTQ Studies
• SOC 320 Minorities in America
• SOC 342 Gender Relations in America

See a counselor for more details and a complete listing of all course options!

Degrees Offered

A.A.-T. in Social Justice Studies: Race and Ethnicity
A.A.-T. in Social Justice Studies: Women, Gender, and LGBTQ Studies

Associate Degrees for Transfer

A.A.-T. in Social Justice Studies: Race and Ethnicity

The Associate in Arts in Social Justice Studies: Race and Ethnicity for Transfer degree provides students with a major that fulfills the general requirements of the California State University for transfer. Students with this degree will receive priority admission with junior status to the California State University system. The Associate in Arts in Social Justice Studies: Race and Ethnicity for Transfer (AA-T) degree may be obtained by the completion of 60 transferable, semester units with a minimum 2.0 GPA, including (a) the major or area of emphasis described in the Required Program outlined below (minimum grade of “C” (or “P”) for each course in the major) and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education Breadth Requirements.

The Associate in Arts in Social Justice Studies: Race and Ethnicity for Transfer degree provides a curricular track for students who wish to transfer into a variety of CSU majors related to race and ethnicity, such as Ethnic Studies, Chicana and Chicano Studies, or African American Studies. This Transfer Model Curriculum is an “Area of Emphasis” (AOE), which allows for students to transfer into more than one CSU major related to Race and Ethnicity. Students interested in transferring to a CSU campus to pursue a bachelor’s degree in an Area of Emphasis should meet with a counselor to confirm the courses required for lower division preparation in the major. This degree exposes students to the core principles and practices of the Social Justice Studies field in order to build a foundation for their future personal, academic, or vocational paths.

The Associate in Arts in Social Justice Studies: Race and Ethnicity for Transfer (AA-T) degree may be obtained by completion of 60 transferable, semester units with a minimum overall grade point average (GPA) of 2.0, including (a) a minimum grade of “C” (or “P”) for each course in the major or area of emphasis described in the Required Program, and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education-Breadth Requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

• research how theoretical perspectives and critical theories on social justice inform the social, political, economic, historical, and cultural circumstances surrounding justice as they relate to race and ethnicity as well as other intersectional aspects of life in society.
• define and analyze power and oppression to better understand how they operate at the individual, cultural, institutional, and systemic levels.
• explain how intersectional formations of social identity reflecting various levels of power and privilege impact social justice at the individual, cultural, institutional, and systemic levels.
• recognize the historical origins and similarities and differences in struggles for social justice among different ethnic and racial groups.
• assess artistic works that examine oppression, power, and justice as they relate to race and ethnicity.

Career Information

The AA-T degree provides students with a solid foundation in Social Justice Studies as well as prerequisites for upper division coursework leading to the baccalaureate degree in a variety of Areas of Emphasis. The degree gives students a pathway to possibilities, options, and baccalaureate degrees focusing on social justice. In addition, a student can use the AA-T in Social Justice Studies to get into a CSU and then complete a graduate degree in a related field. Students with degrees in this field often assume careers as (or in the following): activists, community organizers, political campaigns, human rights groups, religious organizations, international agencies, lobbyists, and mediators. This program is also an excellent starting point for students interested in a career in law, law enforcement, social work, clinical psychology, social science, politics, business, education, or public policy.

A.A.-T. in Social Justice Studies: Women, Gender, and LGBTQ Studies

The Associate in Arts in Social Justice Studies: Women, Gender, and LGBTQ Studies for Transfer degree provides students with a major that fulfills the general requirements of the California State University for transfer. Students with this degree will receive priority admission with junior status to the California State University system. The Associate in Arts in Social Justice Studies: Women, Gender, and LGBTQ Studies for Transfer (AA-T) degree may be obtained by the completion of 60 transferable, semester units with a minimum grade of “C” (or “P”) for each course in the major, including (a) the major or area of emphasis described in the Required Program outlined below (earning a C or better in these courses) and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education Breadth Requirements.

The Associate in Arts in Social Justice Studies: Women, Gender, LGBTQ Studies for Transfer (AA-T) degree provides a curricular track for students who wish to transfer into a variety of CSU majors related to Women, Gender, LGBTQ Studies, such as Women’s Studies, Gender Studies, or Queer Studies. This Transfer Model Curriculum is an “Area of Emphasis” (AOE), which allows for students to transfer into more than one CSU major related to Women, Gender, LGBTQ Studies. Students interested in transferring to a CSU campus to pursue a bachelor’s degree in an Area of Emphasis should meet with a counselor to confirm the courses required for lower division preparation in the major. Social Justice Studies (SJS)

Courses

**SJS 299 Experimental Offering in Social Justice Studies**

**Units:** 0.5 - 4  
**Prerequisite:** None.

This is the experimental courses description.

**SJS 300 Introduction to Social Justice Studies**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area V(b); AA/AS Area VI; CSU Area D; CalGETC Area 4 (effective Fall 2025); IGETC Area 4  
**C-ID:** C-ID SJS 110

This interdisciplinary course introduces students to the theoretical and practical foundations of social justice and the social processes that create and resist oppression. It covers the sociology, history, and psychology of oppressions based upon race, ethnicity, class, gender, sexuality, and other group identities in the United States and the corresponding social justice movements for liberation. It investigates how creating and undoing asymmetrical power relations are linked to social structures, institutional processes, and culture. Additionally, it provides a basis for a better understanding of socioeconomic, political, and cultural conditions of key social groups in the United States. Topics include theoretical foundations of social justice and oppression, history and politics of group identity, culture and ideologies, forms of oppression, privilege, and forms of resistance. Field trips may be required.

**SJS 310 Introduction to LGBTQ Studies**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area V(b); AA/AS Area VI; CSU Area D; CalGETC Area 4 (effective Fall 2025); IGETC Area 4  
**C-ID:** C-ID SJS 130

This course introduces students to Lesbian, Gay, Bisexual, Transgender, and Queer (LGBTQ) studies. It explores how LGBTQ individuals and communities are impacted by various social, cultural, historical, and political factors. Topics include politics of sexuality and sexual identities; forms of oppression including heterosexism, homophobia, and transphobia, as well as resistance to oppression, violence against LGBTQ individuals and communities, and queer activism. This course also includes contemporary issues in families, education, religion, and the law.

**SJS 499 Experimental Offering in Social Justice Studies**

**Units:** 0.5 - 4  
**Prerequisite:** None.

This is the experimental courses description.
Social Science

A degree major is offered, including 18 units of university transfer-level work in addition to other graduation requirements. In addition there is an International Studies Certificate option, designed to benefit students who plan to seek careers or transfer with an international focus. The required courses will transfer as electives or lower division prerequisite for selected majors at the university level.

Degrees Offered

A.A. in Social Science

Dean Kathy Sorensen
Department Chair Pam Chao
Phone (916) 484-8283

Associate Degree

A.A. in Social Science

The Social Science degree provides an interdisciplinary approach to academic studies. The purpose of the program is for students to gain an understanding of the interconnectedness of various scientific disciplines. The interdisciplinary approach enables students to understand how issues and events are shaped by diverse socio-economic, political, ecological, biological and geographical forces.

</tbody>
</table>

Transferable courses must be selected from four of the following areas: anthropology, economics, geography, history, philosophy, political science, psychology (except PSYC 335), and sociology. Courses used for General Education purposes cannot be used for this degree.

Total Units: 18

The Social Science Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- Research and analyze topics from an interdisciplinary perspective.
- Integrate various social-scientific perspectives into the understanding of the subject matter.
- Compare and contrast the relative contribution of courses offered in various disciplines to an overall understanding of issues and events.
- Develop a personal interpretation about issues and matters under study.
- Identify and explain various forces that interact to shape events and social occurrences.
- Define and describe issues and events within an interdisciplinary perspective.

Social Science (SOCSC) Courses

SOCSC 299 Experimental Offering in Social Science

Units: 0.5 - 4
Prerequisite: None.

This is the experimental courses description.

SOCSC 495 Independent Studies in Social Science

Units: 1 - 3
Prerequisite: None.
Transferable: CSU

SOCSC 499 Experimental Offering in Social Science

Units: 0.5 - 4
Prerequisite: None.
Transferable: CSU

This is the experimental courses description.
## Sociology

Sociology is the study of human society in all its manifestations. Its aim is to discover the process and structure of human interaction, to identify the main forces that sustain or weaken social groups, and to determine the conditions that transform social life. Sociology, like any science, is a disciplined, intellectual quest for knowledge about the fundamental nature of things.

### Degrees Offered

**A.A.-T. in Sociology**

**Dean** Kathy Sorensen  
**Department Chair** Pam Chao  
**Phone** (916) 484-8283

### Associate Degree for Transfer

**A.A.-T. in Sociology**

This Associate in Arts in Sociology for Transfer provides a path to students who wish to transfer to a CSU campus in Sociology and serves the diverse needs of students who wish to obtain a broad and an in-depth understanding of the field. Additionally, this degree allows students to learn the fundamental principles and practices of Sociology in order to create a solid foundation for their future personal and academic endeavors.

The Associate in Arts in Sociology for Transfer provides students with a major that fulfills the general requirements of the California State University for transfer. Students with this degree will receive priority admission with junior status to the California State University system.

The Associate in Arts in Sociology for Transfer (A.A.-T.) may be obtained by the completion of 60 transferable, semester units with a minimum of a 2.0 GPA, including (a) the major or area of emphasis described in the Required Program, and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education-Breadth Requirements.

**Total Units:** 18

The Associate in Arts in Sociology for Transfer (AA-T) degree may be obtained by completion of 60 transferable, semester units with a minimum overall grade point average (GPA) of 2.0, including (a) a minimum grade of “C” (or “P”) for each course in the major or area of emphasis described in the Required Program, and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education-Breadth Requirements.

### Student Learning Outcomes

Upon completion of this program, the student will be able to:

- differentiate between scientifically-based sociological knowledge and hearsay, personal beliefs, and opinions.
- compare and contrast the major theoretical perspectives in sociology.
- define basic sociological terms and concepts regarding the nature of social life, social structures, socio-economic, political, and cultural institutions.
- analyze various sociological perspectives and their relevance to the understanding of social life in general and personal life in particular.
- construct and evaluate sociological data, utilize the scientific method, draw reasonable conclusions.
- identify and understand the ethical implications involved in research and their impact on social policy/public policies.
- apply sociological principles and theories to everyday life situations in regard to interaction with people from diverse backgrounds in a just, equitable, and inclusive manner.

### Career Information

The Sociology degree is designed to facilitate students' successful transfer to four-year colleges that prepare them for advanced study in a variety of graduate programs as well as a variety of career opportunities in social work, law, criminology, law enforcement, teaching, health services, urban planning and development, and research.

### Sociology (SOC) Courses

#### SOC 300 Introductory Sociology

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area V(b); CSU Area D0; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4  
**C-ID:** C-ID SOC 110

This course examines principles and basic concepts in sociology. It includes the study of institutions, culture, social organization, group interaction, social stratification, economy, politics, social movements, and urbanization. This course is not open to students who have completed SOC 480.

#### SOC 301 Social Problems

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; or ESLW 340.

Transferable: CSU; UC

**General Education:** AA/AS Area V(b); CSU Area D0; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4

**C-ID:** C-ID SOCI 115

This course examines contemporary social problems in the US within a theoretical and global context. It examines the role and the structure of power and ideology in shaping our understanding and approach to social problems. This course supports students to include a critical analysis of their causes, consequences as well as an evaluation of proposed solutions and methods of treatment. Attention is directed to poverty and inequality, race and gender inequalities, problems of the environment, unequal access to education as well as problems in the economic and political systems and the impact of globalization on these problems.

**SOC 302 Introduction to Social Research Methods**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** SOC 300 with a grade of "C" or better  
**Advisory:** ENGWR 300, ESLW 340, PSYC 330, STAT 300, or STAT 305 with a grade of "C" or better  
**Transferable:** CSU; UC

**General Education:** AA/AS Area V(b); CSU Area D; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4

**C-ID:** C-ID SOCI 120

This course examines basic principles and methods of sociological research, application and critique of major research methods, including survey, ethnographic, experimental and historical comparative analysis. It emphasizes the fundamental components of sociological research design such as theory, hypothesis, data collection, and variables. Ethical, ideological, and political implications of social research are also considered.

**SOC 309 Self and Society**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340  
**Transferable:** CSU; UC

**General Education:** AA/AS Area V(b); CSU Area D0; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4

This course introduces concepts, social theories, and methods used to analyze how the sense of self is created in everyday life. It explores various theories of the development of self, the nature of human behavior, the importance of language for perception and thought, and reality as a social construction. Additionally, it examines how the self emerges and is maintained through social interaction and our involvement in social relationships. It includes the study of social identity, roles, socialization, identity change, and emotions.

**SOC 318 Introduction to Crime, Deviance, and Social Control**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Transferable:** CSU; UC

**General Education:** AA/AS Area V(b); CSU Area D0; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4

**C-ID:** C-ID SOCI 160

This course introduces various sociological perspectives regarding issues of crime, deviance, and social control. Particular attention is paid to the analysis of how laws and cultural norms shape the definition and meaning of crime and deviance. Topics covered include street crimes, corporate crimes, white-collar crimes, domestic violence, drugs and alcohol abuse, lifestyle crimes, prison systems, capital punishment, rehabilitation, and the trend towards privatization of prisons. Field trips may be required.

**SOC 321 Race, Ethnicity and Inequality in the United States**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 325

**Transferable:** CSU; UC

**General Education:** AA/AS Area V(b); AA/AS Area V; CSU Area D0; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4

**C-ID:** C-ID SOCI 150

In this course, students are invited to examine patterns of racial and ethnic group relations in the United States of America. This course utilizes basic sociological approaches to study race and ethnicity and includes an emphasis on a comparative and intersectional analysis of historical, social, political, and economic factors affecting intergroup and intragroup dynamics and current political and social issues. Using multiple perspectives, students will explore topics that include prejudice, discrimination, racism, anti-racism, racialization, racial and ethnic stratification, inequality, intersectionality, demographic shifts, colonization, decolonization, oppression, liberation, civil rights, and other related topics. Course focus will be on Native Americans, African Americans, Latinx peoples, Asian and Pacific Islander Americans, and European Americans. A variety of different learning activities will be included. Any course-related field trips will not be mandatory and alternative assignments will be offered.

**SOC 325 Chicano Culture**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340  
**Transferable:** CSU; UC

**General Education:** AA/AS Area V(b); AA/AS Area VI; CSU Area D0; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4

This course is an introduction to fundamental concepts, social theories, and methods used to understand and critically analyze the production, adaptation, and construction of Chicano identity and Chicano culture within the United States. It includes micro and macro sociological analysis of Chicano culture and its relationship to Chicano social identity, social inequality, and social change.

**SOC 335 Sociology of Aging**

**Same As:** GERON 300  
**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** ENGWR 102 and ENGRD 116 with a grade of "C" or better; OR ESLR 320 and ESLW 320 with a grade of "C" or better.  
**Transferable:** CSU; UC (UC credit limitation: SOC 335, GERON 300, 302, & PSYC 374 combined: maximum credit, one course)

**General Education:** AA/AS Area III(b); CSU Area E1

This course examines the aged and aging process with emphasis on social factors affecting and affected by an aging population. It includes an analysis of demographics, history of aging in America, social conditions, resources and support systems, employment, retirement, and social class/cultural differences. This course is not open to students who have completed GERON 300.

**SOC 342 Gender Relations in American Society**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340  
**Transferable:** CSU; UC
This course deals with gender relations in American society. It examines historical, social, economic, political, and cultural forces in shaping gender identity, gender roles, and gender expectations. This course utilizes sociological theories to explain gender experiences as socially constructed rather than biologically determined. Specifically, it examines the experiences of people of diverse economic, racial, and ethnic backgrounds within historical and cross-cultural perspectives. This course includes analysis and discussion of topics such as gender relations in the home, workplace, mass media, health care system, and politics.

**SOC 350 Sociology of Popular Culture**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area V(b); CSU Area D0; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4J

This course analyzes the historical development and emergence of American popular culture and the relationship between contemporary popular culture, social institutions and social behavior. Further, it explores popular culture within the context of social, political, technological, and economic changes in the United States and includes an analysis of sociological theories of popular culture, social media, advertising, music, and film.

**SOC 480 Introductory Sociology - Honors**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** Placement into ENGWR 480 through the assessment process.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area V(b); CSU Area D0; Cal-GETC Area 4 (effective Fall 2025); IGETC Area 4J

This course provides an in-depth examination of society and human behavior from various sociological perspectives. Sociological theories, both macro and micro, are applied to different aspects of life including culture, social stratification and inequality, social change, politics, economy, and deviance. The course is conducted as a seminar in which students will be responsible for developing in-depth analysis and understanding of issues based on classical and contemporary sociological theories. This course is designed for those from all academic disciplines who are motivated to learn sociological perspectives and how they apply to aspects of human experience both at the individual and societal levels. This course is not open to students who have successfully completed SOC 300.

**SOC 495 Independent Studies in Sociology**

**Units:** 1 - 3  
**Hours:** 54 - 162 hours LAB  
**Prerequisite:** None.  
**Transferable:** CSU

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

**SOC 499 Experimental Offering in Sociology**

**Units:** 0.5 - 4  
**Prerequisite:** None.

This is the experimental courses description.
Speech-Language Pathology

The Speech Language Pathology degree program prepares students to assist Speech-Language Pathologists in treating disorders of communication. Such disorders may be related to articulation and phonology, child and adult language, motor speech, voice, fluency, and hearing.

Topics include an introduction to the field of communication disorders, articulation and phonology for the speech-language pathology assistant (SLPA), professional issues and practices in speech-language pathology, speech/language/hearing clinical strategies, clinical considerations in service delivery to clients with communication disorders, and fieldwork experience.

Degrees and Certificates Offered

A.S. in Speech-Language Pathology Assistant Program
SLPA Core Curriculum Certificate
SLPA Specialization: Adult Neurogenic Certificate
SLPA Specialization: Early Intervention Certificate
SLPA Specialization: School Age Certificate

Dean Narinedat Madramootoo
Department Chair Kristina Zajic

Associate Degree

A.S. in Speech-Language Pathology Assistant Program

This degree prepares students to assist Speech-Language Pathologists in treating disorders of communication. Such disorders may be related to articulation and phonology, child and adult language, motor speech, voice, fluency, and hearing. Topics include an introduction to the field of communication disorders, articulation and phonology for the speech-language pathology assistant (SLPA), professional issues and practices in speech-language pathology, speech/language/hearing clinical strategies, clinical considerations in service delivery to clients with communication disorders, and fieldwork experience.

Total Units: 41

The Speech-Language Pathology Assistant Program Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- describe various communication disorders, including etiology and some remedial techniques.
- explain the major areas of cultural diversity and the relationship between culture and communication.
- demonstrate skills needed to assist in the management of speech-language pathology programs and services.
- describe the therapeutic process especially in terms of how learning occurs and strategies for effective lesson delivery.
- implement a treatment protocol as prescribed by the supervising Speech-Language Pathologist.
- describe professional responsibilities and ethical behavior appropriate for the Speech-Language Pathology Assistant.

Career Information

Upon completion of the Associate in Science degree, a student possesses the course work and field work experience to work as a Speech-Language Pathology Assistant (SLPA) in both private and public agencies, such as hospitals, rehabilitation centers, and the public schools serving preschool through adult-age clients. Successful completion of the Speech-Language Pathology Assistant program qualifies the graduate for eligibility to apply to the Speech-Language Pathology and Audiology and Hearing Aid Dispensers Board for registration as a Speech-Language Pathology Assistant.

Certificates of Achievement

SLPA Core Curriculum Certificate

This certificate is designed for students with a bachelor's degree in the field of communication sciences and disorders. With the addition of this certificate, they will be prepared to assist Speech-Language Pathologists in treating disorders of communication. Such disorders may be related to articulation and phonology, child and adult language, motor speech, voice, fluency, and hearing. Topics include articulation and phonology for the speech-language pathology assistant (SLPA), professional issues and practices in speech-language pathology, clinical considerations in service delivery to clients with communication disorders, and fieldwork experience.

2023-2024 Catalog
Student Learning Outcomes

Upon completion of this program, the student will be able to:

- describe various communication disorders, including etiology and some remedial techniques.
- explain the major areas of cultural diversity and the relationship between culture and communication.
- demonstrate skills needed to assist in the management of speech-language pathology programs and services.
- describe the therapeutic process especially in terms of how learning occurs and strategies for effective lesson delivery.
- implement a treatment protocol as prescribed by the supervising Speech-Language Pathologist.
- describe professional responsibilities and ethical behavior appropriate for the Speech-Language Pathology Assistant.

Career Information

Upon completion of the SLPA Core Curriculum Certificate and awarding of the Bachelor's degree in the field of Communication Sciences and Disorders, the student qualifies for for eligibility to apply to the Speech-Language Pathology and Audiology and Hearing Aid Dispensers Board (SLPAHADB) for registration as a Speech-Language Pathology Assistant (SLPA) in the State of California. The registered SLPA may work in both private and public agencies, such as hospitals, rehabilitation centers, and the public schools serving infants through adult-age clients addressing communication and cognitive needs.

SLPA Specialization: Adult Neurogenic Certificate

This certificate prepares students to assist Speech-Language Pathologists in treating disorders of communication occurring in the adult neurogenic population. Such disorders may be related to articulation and phonology, language, motor speech, voice, fluency, and hearing. Topics include medical language for health care providers, psychology of aging - adult development and aging, neurogenic communication disorders, neurogenic therapy techniques, and fieldwork experience.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- describe various communication disorders affecting the adult age population, including etiology and remediation techniques.
- demonstrate skills needed to assist in the management of adult neurogenic speech-language pathology programs and services.
- describe the therapeutic process especially in terms of how learning occurs and strategies for effective lesson delivery for the adult population.
- implement a treatment protocol as prescribed by the supervising Speech-Language Pathologist.
- explain service provision differences between inpatient, outpatient, home, and clinic-based therapeutic models for the adult.
- describe professional responsibilities and ethical behavior appropriate for the Speech-Language Pathology Assistant when working with the adult population.

Career Information

Successful completion of the Speech-Language Pathology Assistant (SLPA) program qualifies the student to earn an Associate in Science degree in Speech-Language Pathology. The SLPA graduate possesses the course work and field work experience to apply to the Speech-Language Pathology and Audiology and Hearing Aid Dispensers Board (SLPAHADB) for registration as a Speech-Language Pathology Assistant (SLPA) in the State of California. The registered SLPA may work in both private and public agencies, such as hospitals, rehabilitation centers, and the public schools serving infants through adult-age clients. This certificate will indicate specialized learning opportunities for addressing the communicative and cognitive needs of the adult with neurological impairments.

SLPA Specialization: Early Intervention Certificate

This certificate prepares students to assist Speech-Language Pathologists in treating disorders of communication for children between the ages of birth-3 years of age. Such disorders may be related to language, oral motor movements, and hearing. Topics include infant and toddler development, children with special needs, Early Intervention therapy techniques, childhood language development, and fieldwork experience.

Upon completion of this program, the student will be able to:

- describe various communication disorders affecting children ages birth-3 years, including etiology and remediation techniques.
- demonstrate skills needed to assist in the management of Early Intervention (EI) speech-language pathology programs and services.
- describe the therapeutic process especially in terms of how learning occurs and strategies for effective lesson delivery for the EI population.
- implement a treatment protocol as prescribed by the supervising Speech-Language Pathologist.
- explain service provision differences between home and clinic therapeutic models for the EI population.
- describe professional responsibilities and ethical behavior appropriate for the Speech-Language Pathology Assistant.

**Career Information**

Successful completion of the Speech-Language Pathology Assistant (SLPA) program qualifies the student to earn an Associate in Science degree in Speech-Language Pathology. The SLPA graduate possesses the course work and field work experience to apply to the Speech-Language Pathology and Audiology and Hearing Aid Dispensers Board (SLPAHADB) for registration as a Speech-Language Pathology Assistant (SLPA) in the State of California. The registered SLPA may work in both private and public agencies, such as hospitals, rehabilitation centers, and the public schools serving infants through adult-age clients. This certificate will indicate specialized learning opportunities for addressing the communicative needs of the Early Intervention (EI) population.

**SLPA Specialization: School Age Certificate**

This certificate prepares students to assist Speech-Language Pathologists in treating disorders of communication occurring in the school age population. Such disorders may be related to articulation and phonology, language, motor speech, voice, fluency, and hearing. Topics include child development, children with special needs, school age therapy techniques, childhood language development, and fieldwork experience.

**Student Learning Outcomes**

Upon completion of this program, the student will be able to:

- describe various communication disorders affecting the school age population (3-21 years), including etiology and remediation techniques.
- demonstrate skills needed to assist in the management of school-aged speech-language pathology programs and services.
- describe the therapeutic process especially in terms of how learning occurs and strategies for effective lesson delivery for the school-aged population.
- implement a treatment protocol as prescribed by the supervising Speech-Language Pathologist.
- explain service provision differences between clinic and educational therapeutic models for the school-aged population.
- describe professional responsibilities and ethical behavior appropriate for the Speech-Language Pathology Assistant.

**Career Information**

Successful completion of the Speech-Language Pathology Assistant (SLPA) program qualifies the student to earn an Associate in Science degree in Speech-Language Pathology. The SLPA graduate possesses the course work and field work experience to apply to the Speech-Language Pathology and Audiology and Hearing Aid Dispensers Board (SLPAHADB) for registration as a Speech-Language Pathology Assistant (SLPA) in the State of California. The registered SLPA may work in both private and public agencies, such as hospitals, rehabilitation centers, and the public schools serving infants through adult-age clients. This certificate will indicate specialized learning opportunities for addressing the communicative needs of the school-aged population.

**Speech-Language Pathology (SLPA) Courses**

**SLPA 105 Articulation and Phonology for the SLPA**

Units: 3  
Hours: 54 hours LEC  
**Prerequisite:** SLPA 300 with a grade of "C" or better

This course introduces principles and practices for management of individuals with articulation and/or phonological disorders, with consideration for cultural and linguistic variations. Screening protocols as well as therapeutic practices and materials are discussed. Additionally, this course covers the study and application of the International Phonetic Alphabet (IPA), transcription from Standard American English to IPA, and transcription from IPA to Standard American English.

**SLPA 110 Professional Issues and Practices in Speech-Language Pathology**

Units: 3  
Hours: 54 hours LEC  
**Prerequisite:** SLPA 300 with a grade of "C" or better

This course introduces principles and practices for management of individuals with communicative disorders, with consideration for cultural
and linguistic variations. It includes legal and ethical considerations for the practicing Speech-Language Pathology Assistant (SLPA) as well as the practicing Speech-Language Pathologist (SLP). Requirements for employment in various work settings, including interdisciplinary and supervisory relationships, observational skills, mandated reporting, Code of Ethics, and scope of practice are covered. A total of six (6) hours of clinical observation, in-person or virtual, are required.

SLPA 115 Speech, Language, and Hearing Clinical Strategies

Units: 3  
Hours: 36 hours LEC; 54 hours LAB  
Prerequisite: SLPA 105 with a grade of "C" or better

This course explores specific materials and strategies regarding speech, language, and hearing therapeutic service delivery with a focus on screening and intervention. It covers speech, language and hearing screening procedures, forms of Augmentative and Alternative Communication (AAC), development of forms of AAC, and the collection and transcription of language samples. This course is designed as an additional opportunity to gain more experience in preparation for fieldwork as a Speech-Language Pathology Assistant (SLPA).

SLPA 116 SLPA Therapy Techniques: Neurogenic Communication Disorders

Units: 2  
Hours: 36 hours LEC  
Prerequisite: SLPA 300 with a grade of "C" or better

This course explores specific neurologically-based disorders of communication and their causes and characteristics as acquired by adult clientele. Specific materials and strategies are emphasized for therapeutic service delivery within the realm of speech, language, and cognition. It covers anatomy, neurological etiologies, remediation techniques/material/equipment, rationales for commonly used therapeutic approaches, individual vs. group therapy, service provision sites, data collection, clinical documentation and record keeping, and the role of the Speech-Language Pathology Assistant (SLPA).

SLPA 117 SLPA Therapy Techniques: School Age

Units: 2  
Hours: 36 hours LEC  
Prerequisite: SLPA 300 with a grade of "C" or better

This course explores specific disorders of communication and therapeutic service provision with the school-aged population. Specific materials and strategies regarding service delivery are emphasized, with a focus on evidence-based practice. It covers remediation techniques and rationales for commonly used therapeutic approaches, strategies for service delivery in school and clinic environments, materials management, proxemics, data collection, safety, and communication with caregiver, colleagues and supervisor. This course also reviews service delivery models, scope of responsibilities, and the role of the Speech-Language Pathology Assistant (SLPA) in intervention.

SLPA 118 SLPA Therapy Techniques: Early Intervention

Units: 1.5  
Hours: 18 hours LEC; 27 hours LAB  
Prerequisite: SLPA 300 with a grade of "C" or better

This course explores specific disorders of communication and therapeutic service provision with the Early Intervention (EI) population. Specific materials and strategies regarding service delivery are emphasized, with a focus on evidence-based practice. It also covers remediation techniques and rationales for commonly used therapeutic approaches, strategies for service delivery in home and clinic environments, materials management, proxemics, data collection, safety, and communication with caregiver and supervisor. This course reviews the scope of responsibilities and the role of the Speech-Language Pathology Assistant (SLPA) in intervention.

SLPA 120 Clinical Considerations in Service Delivery to Clients with Communication Disorders

Units: 3  
Hours: 54 hours LEC  
Prerequisite: SLPA 110 with a grade of "C" or better

This course explores specific disorders of communication, and their causes and characteristics. Specific materials and strategies regarding service delivery are emphasized, with a focus on evidence-based practice. Similarities and differences with regard to therapeutic service provision by the Speech-Language Pathology Assistant (SLPA) and the Speech-Language Pathologist (SLP) are introduced. This course covers remediation techniques and rationales for commonly used therapeutic approaches as well as principles of learning, strategies for service delivery with groups of clients, data collection, clinical documentation, and record keeping. It also reviews the scope of responsibilities and the role of the SLPA in intervention and behavior management strategies. A total of six (6) hours of clinical observation, in-person or virtual, are required.

SLPA 121 Fieldwork Experience in Speech-Language Pathology

Units: 4  
Hours: 18 hours LEC; 162 hours LAB  
Prerequisite: SLPA 115 and 120 with grades of "C" or better  
Enrollment Limitation: Prior to student orientation, the following requirements must be submitted for review: (1) Proof of negative tuberculin (TB) skin test within three months prior to class. (2) If the TB skin test result is positive, proof of inactive TB chest x-ray within one year prior to class. (3) Proof of completion of CPR/First Aid certification. (4) Proof of malpractice insurance. Live Scan fingerprinting is determined through clinical placement protocol. If a student receives a deficient grade (D/F), SLPA 121 may be repeated once.

This course provides supervised fieldwork experience assisting with the clinical management of persons with communicative disorders. It covers the job-related skills needed to be a speech-language pathology assistant (SLPA). It also provides opportunities to interact with clients/patients while implementing a prescribed treatment plan and assisting with screening or evaluation under the direction of a speech-language pathologist. This course includes opportunities for record keeping and managing client data, setting up/preparing for sessions, and performing various clerical duties. A portion of this course may be offered in a TBA component of 162 hours which will include supervised fieldwork experience assisting with the clinical management of persons with communicative disorders.

SLPA 126 Neurogenic Communication Disorders for the SLPA

Units: 3  
Hours: 54 hours LEC  
Prerequisite: SLPA 300 with a grade of "C" or better

This course explores neurogenic cognitive-communicative disorders in adults and is designed for the speech-language pathology assistant (SLPA). It covers basic neuroanatomy, cognitive-communicative disorders acquired in adulthood, as well as therapeutic approaches and strategies for service delivery. The scope of responsibilities and the role of the SLPA are reviewed.

SLPA 127 Childhood Language Development

Units: 3  
Hours: 54 hours LEC  
Prerequisite: None.
This course prepares the student for a complete review of how children develop language within their established language communities. It is designed to prepare people who work with children (early childhood educators, speech-language pathology assistants, etc.) with the knowledge of developmental stages of language acquisition, as well as receptive and expressive language milestones. Topics include the hearing mechanism, comprehension of language, gestures, social pragmatics, semantic development, morphology and syntax, language impairment, as well as cultural variables impacting communication.

SLPA 299 Experimental Offering in Speech-Language Pathology

Units: 0.5 - 4
Prerequisite: None.

This is the experimental courses description.

SLPA 300 Introduction to Communication Disorders

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300.
Transferable: CSU

This course is an introduction to the field of communication disorders, including an overview and history of the profession of speech-language pathology. It includes an overview of various speech and language disorders, as well as guidelines for determining the development of typical and atypical speech and language. Students are required to observe a minimum of three hours of videotaped clinical sessions from the Master Clinician Network.
Student Government

The student government program is designed to help nurture the leaders of the future. In addition to student government classes, we also offer a Leadership Development Certificate.

Dean Hanna Blodgett
Phone (916) 484-8471
Email ReyesC3@arc.losrios.edu

Student Government (SGVT) Courses

SGVT 300 Introduction to Student Government

Units: 2
Hours: 18 hours LEC; 54 hours LAB
Prerequisite: None.
Transferable: CSU

This course provides a study of the legal, educational, and philosophical basis of student government and leadership studies. It may include travel to other campuses, area and state conferences, and it provides the opportunity to participate on faculty and administrative committees. Topics are designed to teach leadership skills and to give practical experience in the field of student government. This course is highly advised for those involved in student government. Field trips may be required.

SGVT 310 Leadership Development

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Transferable: CSU

This course provides emerging and existing student leaders the opportunity to explore the concept of leadership and to develop and improve their leadership skills. It examines contemporary leadership models as well as personal values and beliefs that affect personal philosophy of leadership. This course provides opportunities to experience leadership in college and community settings. This course is highly advised for those involved in student government.

SGVT 499 Experimental Offering in Student Government

Units: 0.5 - 4
Prerequisite: None.
Transferable: CSU

This is the experimental courses description.
Technical Communication

Technical Communication is an interdisciplinary course of study designed to prepare students for employment as professional writers and communicators in a variety of media intended to instruct and inform audiences.

The degree program includes substantial course work in writing, information design, editing, page design, online help development, website creation, and the use of industry standard applications.

The certificate offers an interdisciplinary program of courses in Technical Communications, Art/New Media, and Computer Information Systems to prepare students for a variety of technical writing and professional communication careers. The certificate includes the theory, writing skills, design background, and computer applications knowledge needed for jobs in technical communication.

Technical communicators find employment in medical, scientific, high tech, business, university, and government settings. They may write white papers, tutorials, reference and procedure manuals, help systems, user assistance video scripts, grants and proposals, and more.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- analyze audience information needs.
- compose concise, clearly written professional documents organized with the audiences' needs in mind.
- design print and online resources that communicate organizations' values, enhance readability, and are easy to use.
- demonstrate basic skills in the use of word processing, page design, and web design applications.
- evaluate organizations' communication goals and needs based on technical writing principles.

Career Information

Technical communicators find employment in medical, scientific, high tech, business, university, and government settings. They may write white papers, tutorials, reference and procedure manuals, help systems, user assistance video scripts, grants and proposals, and more.

TECCOM 300 Introduction to Technical/Professional Communication

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: BUS 100 or 310 with a grade of "C" or better
Transferable: CSU

This course emphasizes principles of reader-centered writing for the workplace, focusing specifically on aspects of technical and professional communication. It covers the writing of documents used in businesses, academia, industry, and government. These documents may include memos, letters, brochures, instructions and procedures, proposals, grants, technical and informational reports, web sites, blogs, and product documentation. This course is formerly known as ENGWR 342.

TECCOM 310 Writing Digital Content

Units: 1
Hours: 18 hours LEC
Prerequisite: BUS 100, BUS 310, ENGWR 300, or TECCOM 300 with a grade of "C" or better
Advisory: ARTNM 352, CISA 305, and CISW 300 with grades of "C" or better
Transferable: CSU

This course emphasizes the writing of digital content for the workplace and for technical and business disciplines. It covers audience analysis, online formats, research techniques, and concise, grammatical writing. This course is formerly known as ENGWR 344.

TECCOM 330 Writing Technical Manuals

Units: 1
Hours: 18 hours LEC
Prerequisite: BUS 100, BUS 310, ENGWR 300, or TECCOM 300 with a grade of "C" or better
Advisory: ARTNM 352 and CISA 305 with grades of "C" or better
Transferable: CSU

This course is designed for professionals in all fields who need to design, create, and revise user and reference manuals in print or online formats. The course offers strategies for audience and task analysis, product learning, document design, drafting, procedure writing, and revision.
Word processing, desktop publishing, and/or online tools are used to produce a print or online manual. This course is formerly known as ENGWR 352.
Theatre Arts

The Department of Theatre and Film at American River College offers a wide range of classes in all areas of theatre, along with an expanding Film Studies program. We also maintain a busy production schedule in a variety of performance spaces in our recently modernized and expanded facility. In addition to our season of full-scale department productions, we feature touring Children's Theatre productions, student-produced performances featuring scenes, improv and one-act plays, and an ongoing partnership with the Broadway at Music Circus program. This schedule provides broad opportunities for theoretical and practical training for our students, and an exciting and varied menu of theatrical fare for our audiences.

Degrees and Certificates Offered

A.A.-T. in Theatre Arts
A.A. in Theatre Arts: Acting
A.A. in Theatre Arts: Technical Production
Acting Certificate
Children's Theatre Certificate
Costuming Certificate
Musical Theatre Certificate
Theatre Production Certificate

Associate Degrees for Transfer

A.A.-T. in Theatre Arts

This degree is designed to facilitate successful transfer to baccalaureate theatre or drama degree programs. It provides students with the lower division breadth and depth of the field of theatre arts and exposes students to the core principles and practices in the field. It covers the basics of acting, theatre technology and production, and the historical and modern development of theatre and dramatic literature in the world of entertainment.

The Associate in Arts in Theatre Arts for Transfer degree provides students with a major that fulfills the general requirements of the California State University for transfer. Students with this degree will receive priority admission with junior status to the California State University system. The Associate in Arts in Theatre Arts for Transfer (AA-T) degree may be obtained by completion of 60 transferable, semester units with a minimum overall grade point average (GPA) of 2.0, including (a) the major or area of emphasis described in the Required Program outlined below (earning a C or better in these courses) and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education Breadth Requirements.

The Associate in Arts in Theatre Arts for Transfer (AA-T) degree may be obtained by completion of 60 transferable, semester units with a minimum overall grade point average (GPA) of 2.0, including (a) a minimum grade of "C" (or "P") for each course in the major or area of emphasis described in the Required Program, and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education-Breadth Requirements.
Student Learning Outcomes

Upon completion of this program, the student will be able to:

- critique and evaluate the role of the theatre arts and its relationship to other parts of society.
- evaluate the historical, artistic, social, and philosophical environments in which theatre exists.
- analyze and critique dramatic literature and performance.
- formulate alternative solutions to theatrical production situations.
- employ audition and performance skills in community, educational, and/or professional theatres.
- develop skills to work as a theatre technician in community, educational, and/or professional theatres.
- demonstrate the ability to work effectively as an ensemble member of a theatre company.
- demonstrate skills that will allow the student to thrive in a baccalaureate level theatre program.

Associate Degrees

A.A. in Theatre Arts: Acting

This degree provides training in the areas of acting, voice, movement, improvisation, and dramatic styles. The course work and theatrical production activities are arranged to provide opportunities for students to develop an appreciation for theatre, to improve in the knowledge and skills necessary for work in the theatrical arts professions, and to transfer to a four-year theatre program.

- TA 356 Acting for the Camera I (3)
- TA 357 Acting for the Camera - II (3)
- TA 362 Styles of Acting: Classical (3)
- TA 366 Styles of Acting: Modern (3)

Any TA or TAP course not used to fulfill other graduation requirements of the major.

A minimum of 3 units from the following:

- TA 356 Acting for the Camera I (3)
- TA 357 Acting for the Camera - II (3)
- TA 362 Styles of Acting: Classical (3)
- TA 366 Styles of Acting: Modern (3)
- TA 377 Musical Theatre Techniques (3)
- TA 390 Directing and Play Production (3)
- TA 406 Children's Theatre (3)

A minimum of 2 units from the following:

- MUSM 342 Recording Studio Techniques I (3)
- TA 404 Techniques of Puppetry (3)
- TA 422 Stage Lighting (3)

Any TA or TAP course not used to fulfill other requirements of the major.

Total Units: 31

1Not used to fulfill other requirements for the major.

The Theatre Arts: Acting Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- recognize standard practices of ensemble playing in a rehearsal/performance environment
- compare and analyze the theories and techniques of acting from a historical perspective
- analyze texts and scripts as they pertain to performance
- demonstrate skill for technical aspects of acting, including physical, vocal, imaginative, analytical, and emotional elements
- analyze theatre as a dynamic art form influencing society
- compare and contrast theatrical periods and styles in terms of acting, directing, playwriting, and technical elements
- analyze the components of a theatrical production
- apply imagination and character analysis to identify and describe the personality and motivations of a given character
- apply technical processes, including lighting, set, costume, and/or stage make-up design, as they pertain to a given dramatic script

A.A. in Theatre Arts: Technical Production

The Technical Theatre degree provides a broad overview of theatre with an emphasis on exploring the technical elements of theatre. Coursework...
includes stagecraft, lighting, costuming, makeup, sound, and puppetry, together with opportunities for practical participation in productions. The program is designed to prepare students for work as technicians and crew, or to transfer to four-year colleges in preparation to be designers.

### A minimum of 6 units from the following:

- Any TA or TAP courses not used to fulfill other requirements for the major.

### Total Units: 29

### Student Learning Outcomes

Upon completion of this program, the student will be able to:

- assess the influence of theatre as a dynamic art form and a social and cultural force in our society.
- compare theatrical periods and styles in terms of acting, directing, playwriting, and technical elements.
- analyze the components of a theatrical production and the role of technical theatre in the production process.
- evaluate a script, assess production requirements, and develop practical and artistic solutions through scenic, lighting, costume, sound, or makeup designs.
- integrate practical information from construction plans.
- demonstrate proficiency in technical production skills.
- evaluate tools, materials, and processes used in technical theatre work.
Certificates of Achievement

Acting Certificate

This certificate provides training in the theories and techniques of acting. The training starts with the basic principles of acting and refines them through theoretic, rehearsal, and performance processes. This program is designed to introduce and develop the craft of acting.

1Not used to fulfill other requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- analyze children's literature for dramatic structure, characterization, and performance elements.
- demonstrate the basic skills of drama, acting, voice, movement, and improvisation.
- develop simple drama activities and games to promote child creativity.
- apply technical processes, including stagecraft, costume construction, and stage make-up, as they pertain to children's theatre.
- integrate dramatic techniques of acting, puppetry, storytelling, and movement into children's theatre productions.

Career Information

People with a Children's Theatre certificate may work as actors or directors in children's theatre, or utilize their skills to augment careers in elementary education, recreation, or arts programs.

Costuming Certificate

This certificate provides training in the skills needed to create theatrical costumes. Coursework includes costume construction, history of costume, patterning, and makeup.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- analyze the role of technical theatre in the production process.
- analyze historical and artistic theatrical styles.
- analyze production requirements and develop practical and artistic solutions.
- evaluate a script and develop appropriate scenic, lighting, costume, sound, or makeup designs.
- analyze and apply information from scenic, lighting, and/or costuming plans.
- demonstrate proficiency in technical production skills.
- identify and evaluate tools, materials, and processes used in technical theatre areas.

Career Information

A person with a Theatre Production certificate may become a stagehand, set builder, lighting and sound technician, makeup artist, properties artisan, or stage manager in theatre, film, or TV.

Theatre Arts (TA) Courses

TA 294 Topics in Theatre Arts

Units: 0.5 - 4
Hours: 27 - 162 hours LAB
Prerequisite: None.

This course covers topics in theatre which are not included in current course offerings. A portion of this course may be offered in a TBA component of 27-216 hours which may include theatrical studies, preparation or performance.

TA 299 Experimental Offering in Theatre Art

Units: 0.5 - 4
Prerequisite: None.

This is the experimental courses description.

TA 300 Introduction to the Theatre

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; OR ESLR 340 AND ESWL 340.
Transferable: CSU; UC
General Education: AA/AS Area I; CSU Area C1; Cal-GETC Area 3A (effective Fall 2025); IGETC Area 3A
C-ID: C-ID THTR 111

This course provides a general introduction to live theatre as an artistic and social force. It surveys the literary, cultural, and historical aspects of theatre arts. This is an audience-oriented, non-performance course open to all students. Field trips may be required.

TA 302 History and Theory of the Theatre I

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGW 300; OR ESLR 340 AND ESWL 340.
Transferable: CSU; UC
General Education: AA/AS Area I; CSU Area C1; Cal-GETC Area 3A (effective Fall 2025); Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3A; IGETC Area 3B
C-ID: C-ID THTR 113

This course is a survey of the history of world theatre from its origins through the 17th Century. The history and evolution of drama and theatre practice are studied in relationship to cultural, political, and cultural, political, and social forces.
social conditions of the time. Plays are read that exemplify major developments and significant artists. Field trips to attend live performances may be required.

**TA 303 History and Theory of the Theatre II**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGRWR 300; OR ESLW 340.  
**Transferrable:** CSU; UC  
**General Education:** AA/AS Area I; CSU Area C1; CSU Area C2; Cal-GETC Area 3A (effective Fall 2025); Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3A; IGETC Area 3B

This course is a survey of the history of world theatre from the 17th Century to the modern era. It covers the history and evolution of drama and theatre practice in relation to cultural, political, and social conditions of the time. Topics include plays that exemplify major developments and significant artists. Field trips to attend live performances may be required.

**TA 306 Diversity in American Drama (1960 to Present)**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGRWR 300; OR ESLW 340.  
**Transferrable:** CSU; UC  
**General Education:** AA/AS Area I; CSU Area C1; CSU Area C2; Cal-GETC Area 3A (effective Fall 2025); Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B

This course surveys Native-American, African-American, Latinx, Asian-American, and other diverse theatre from 1960 to the present. It includes the social, political, cultural, and economic climate reflected in the text and production of the play. Field trips may be required.

**TA 344 Improvisation and Theatre Games**

**Units:** 2  
**Hours:** 18 hours LEC; 54 hours LAB  
**Prerequisite:** None.  
**Transferrable:** CSU; UC  

This course explores theatre games and improvisational exercises designed to develop trust, cooperation, mental acuity, and physical and vocal range as an actor. Improvisation technique is built from the ground up, providing a strong foundation for advanced work in non-scripted performances as well as modern rehearsal techniques that involve extensive use of improvisation. Field trips may be required.

**TA 350 Theory and Techniques of Acting I**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** None.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGRWR 300; OR ESLW 340.  
**Transferrable:** CSU; UC (UC credit limitation: TA 350 with a grade of "C" or better  
**C-ID:** C-ID THTR 152

This course covers the application of advanced acting theories and techniques. It includes analyzing and performing scripts from realistic and stylized drama, audition monologues, and complex acting exercises. Field trips may be required.

**TA 351 Theory and Techniques of Acting II**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** TA 350 with a grade of "C" or better  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGRWR 300; OR ESLR 340 AND ESLW 340  
**Transferrable:** CSU; UC  

This course introduces the theory and technique of acting for film and video, focusing on the differences between stage acting and acting for the camera. It provides opportunities to apply acting theory and technique in a video studio setting. Field trips may be required.

**TA 357 Acting for the Camera - II**

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Prerequisite:** TA 350 with a grade of "C" or better  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGRWR 300; OR ESLR 340 AND ESLW 340  
**Transferrable:** CSU; UC  

This course develops advanced skills of acting for film and television. It provides opportunities in a studio setting to practice monologues, commercials using a teleprompter, and scene work. Field trips may be required.

**TA 362 Styles of Acting: Classical**

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Prerequisite:** TA 350 with a grade of "C" or better  
**Advisory:** CSU; UC (UC credit limitation: 362 and 366 combined: maximum credit, 6 units)  

This course explores the styles of acting used in Classic Theatre from the Greeks through Restoration. It examines the actor's approach to the text as well as the voice and movement needs of classic styles. Styles include Greek, Commedia dell'Arte, Shakespeare, and Restoration. Field trips may be required.

**TA 366 Styles of Acting: Modern**

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Prerequisite:** TA 350 with a grade of "C" or better  
**Advisory:** TA 300 and 351  
**Transferrable:** CSU; UC (UC credit limitation: 362 and 366 combined: maximum credit, 6 units)  

This course explores the styles of acting required for modern theatre from 1875 to the present. It examines the actor's approach to modern texts as well as the voice and movement needs of modern styles. Topics include Realism, Epic Theatre, Theatre of the Absurd, and contemporary solo performance. Field trips may be required.
TA 370 Theatre Movement

Units: 2  
Hours: 18 hours LEC; 54 hours LAB  
Prerequisite: None.  
Transferable: CSU; UC

This course is an active participation and performance experience designed to provide opportunities in discovery and to solve movement tasks of the actor. It incorporates exercises to expand the individual's movement for characters and scenes, as well as training in specific movement areas, such as combat, mime, period style, and dance. Field trips may be required.

TA 375 Voice, Diction and Dialects

Units: 3  
Hours: 54 hours LEC  
Prerequisite: None.  
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340.  
Transferable: CSU; UC

This course focuses on the overall improvement of vocal quality, explores monologue and dialogue performances, and develops confidence in speaking and voice production. It emphasizes self-improvement drills involving breath control, resonance, pitch, inflection, and articulation, and introduces a study of the vocal anatomy, its parts, and their functions. Additionally, this course covers the study and application of the International Phonetic Alphabet (IPA), and includes a special study and application of stage dialects and/or accent reduction.

TA 377 Musical Theatre Techniques

Units: 3  
Hours: 36 hours LEC; 54 hours LAB  
Prerequisite: None.  
Transferable: CSU; UC

This is a performance-oriented course integrating acting and singing skills through the creation of a unified character. It is both an introduction for students with little or no previous musical theatre experience and a continuing performance forum for those with previous training. Primary emphasis is placed on the three core areas of musical theatre performance: acting, singing, and movement. Field trips may be required.

TA 390 Directing and Play Production

Units: 3  
Hours: 36 hours LEC; 54 hours LAB  
Prerequisite: TA 350 with a grade of "C" or better  
Advisory: TA 300, 351, and 420; and eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340.  
Transferable: CSU; UC  
General Education: AA/AS Area I; CSU Area C1

This course is an introduction to directing and the elements of play production. It includes the process of preparing and analyzing a script for production, auditioning and casting a play, blocking and rehearsing actors, and dealing with technical and promotion needs of a production. It also requires directing scenes and/or short plays and preparing a prompt book. Field trips may be required.

TA 395 Playwriting

Units: 3  
Hours: 54 hours LEC  
Prerequisite: Eligibility for ENGWR 300.  
Transferable: CSU; UC

This course is an introduction to the fundamentals of the craft of dramatic writing. It emphasizes elements of plot construction and character development through writing exercises, study of superior models of drama, and drafting and revision of an original play script. Field trips may be required.

TA 400 Creative Drama for Children

Units: 3  
Hours: 36 hours LEC; 54 hours LAB  
Prerequisite: None.  
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340.  
Transferable: CSU

This course explores theatrical forms and activities to help drama leaders guide children in developing their academic, social, and performance skills. It includes strategies for infusing drama, pantomime, improvisation, puppetry, and creative role-playing into school curriculum and recreational programs. It is designed for anyone who interacts with pre-school and elementary-age children. Field trips may be required.

TA 404 Techniques of Puppetry

Units: 3  
Hours: 36 hours LEC; 54 hours LAB  
Prerequisite: None.  
Advisory: Eligible for ENGRD 116 AND ENGWR 101; OR ESLR 320 AND ESLW 320.  
Transferable: CSU

This course explores puppetry as a dramatic medium. It covers the history and development of puppetry, puppet design and creation, puppet manipulation and improvisation, and puppet play production techniques and applications.

TA 406 Children's Theatre

Units: 3  
Hours: 36 hours LEC; 54 hours LAB  
Prerequisite: None.  
Enrollment Limitation: Audition/Interview  
General Education: AA/AS Area I; CSU Area C1

This course explores children's literature in performance through dramatic presentations of fiction, drama, and poetry for an audience of children or young people. It provides the opportunity to analyze and experience the production process from script to stage. It includes the development of a touring children's production. No prior theatrical experience is required. This course is recommended for theatre, education, early childhood education, and recreation majors. Public performances and regular field trips are required.

TA 420 Stagecraft

Units: 3  
Hours: 36 hours LEC; 72 hours LAB  
Prerequisite: None.  
Advisory: MATH 25 OR MATH 41 with a grade of "C" or better or placement through the placement process; AND TA 300; AND eligible for ENGRD 116 AND ENGWR 102; OR ESLR 320 AND ESLW 320; AND ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLR 340 AND ESLW 340.  
Transferable: CSU; UC  
C-ID: C-ID THTR 171

This course is an introduction to technical theatre and the creation of scenic elements for theatre, film or television. It covers design styles, painting, set construction, set movement techniques, properties construction, backstage and rehearsal organization and management, and career possibilities. The course combines lectures, reading and projects with practical experience gained from working on department productions. A portion of this course may be offered in a TBA component of 18 hours which may include scenery construction, props, and painting.

TA 422 Stage Lighting

Units: 3  
Hours: 36 hours LEC; 72 hours LAB  
Prerequisite: None.
Theatre Arts

Advisory: ENGRD 15 and ENGWR 51, OR ESLR 310 and ESLW 310, OR placement through assessment process; AND MATH 25 or MATH 41, TA 300, and TA 420.

Transferable: CSU; UC
C-ID: C-ID THTR 173

This course introduces the basic concepts of lighting for stage, film or television. Topics include the basic elements of lamps and fixtures, electricity, dimmers and control consoles. It also covers the design elements of color, distribution, and space to produce a lighting design. Practical lighting skills are gained from work on department productions. A portion of this course may be offered in a TBA component of 18 hours which may include hanging, circuiting, and focusing lights.

TA 424 Advanced Technical Theatre

Units: 3
Hours: 36 hours LEC; 72 hours LAB
Prerequisite: TA 420 and 422 with grades of "C" or better
Transferable: CSU; UC

This is an advanced study course dealing with technical theatre design and production techniques in the areas of scenery, props, lighting, sound, scenic painting, rigging or stage management through individual projects and participation in major productions. A portion of this course may be offered in a TBA component of 18-72 hours which may include practical work in lighting, scenic construction or design, sound design, rigging, or stage managing techniques.

TA 430 Costume Construction

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: TA 420 and 422 with grades of "C" or better
Transferable: CSU; UC

This course covers the principles and techniques involved in developing costumes for mainstage productions. Projects focus on developing sewing, craft, and patterning skills, clothing alteration methods and working with fabrics, hats and accessories, dyes and textile paints as utilized in each production. Field trips may be required.

TA 433 Costume Production

Units: 0.5 - 3
Hours: 27 - 162 hours LAB
Prerequisite: FASHN 374 or TA 430 with a grade of "C" or better
Advisory: Eligible for ENGRD 116 AND ENGWR 102; OR ESLR 320 AND ESLW 320.
Transferable: CSU
C-ID: C-ID THTR 174

This course covers the basic techniques of theatrical makeup. It explores makeup materials, color and light, modeling techniques, and design elements of costume design are also covered. Field trips may be required.

TA 435 History and Theory of Costuming

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Transferable: CSU; UC
C-ID: C-ID THTR 173

This is a survey course of historical periods as portrayed through fashion and costumes from ancient through modern times. The impact of social, political, cultural, and economic issues on costume is explored and analyzed, as is the effect of costumes on society. This course integrates design elements with historical styles to develop designs for theatrical costumes. Field trips may be required.

TA 437 Stage Make-up I

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: None.
Transferable: CSU; UC
C-ID: C-ID THTR 173

This course introduces the basic concepts of lighting for stage, film or television. Topics include the basic elements of lamps and fixtures, electricity, dimmers and control consoles. It also covers the design elements of color, distribution, and space to produce a lighting design. Practical lighting skills are gained from work on department productions. A portion of this course may be offered in a TBA component of 18 hours which may include hanging, circuiting, and focusing lights.

TA 440 Arts Management

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.
Transferable: CSU

This general survey course in arts management emphasizes organization, marketing, audience development, and financial management. It includes promotion and publicity, house management, box office operations, and public relations. It also includes field work projects with an existing arts organization.

TA 452 One-Act Play Workshop

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: None.
Enrollment Limitation: Audition/Interview
Transferable: CSU; UC

This course explores the play production process. It provides experience as an active participant in the analysis, preparation, and production of one-act plays through participation as either directors, writers, actors, or technicians. This course culminates in public performances.

TA 466 Rehearsal and Performance - Musical Ensemble

Same As: MUP 370
Units: 0.5 - 3
Hours: 27 - 162 hours LAB
Course Family: Musical Performance and Technical Production
Prerequisite: None.
Enrollment Limitation: Audition/Interview
Transferable: CSU; UC

This course provides a workshop training experience in the preparation and performance of musical theatre ensemble productions. A different
production is presented each semester the course is offered. Students interested in singing/acting roles audition with the director. Students interested in instrumental positions audition with the musical director. Students interested in technical work interview with the technical director. Field trips may be required. A portion of this course may be offered in a TBA component of 27-162 hours which may include acting, singing, dancing, musical, or technical rehearsals and preparation. It is not open to students who have completed MUP 370.

**TA 494 Topics in Theatre Arts**

**Units:** 0.5 - 4  
**Hours:** 27 - 162 hours LAB  
**Prerequisite:** None.  
**Transferable:** CSU  

This course covers topics in theatre which are not included in current course offerings. May require field trips. A portion of this course may be offered in a TBA component of 27-216 hours which may include theatrical studies, preparation or performance.

**TA 495 Independent Studies in Theatre Arts**

**Units:** 1 - 3  
**Hours:** 54 - 162 hours LAB  
**Prerequisite:** None.  
**Transferable:** CSU  

Independent Study is an opportunity for the student to extend classroom experience in this subject, while working independently of a formal classroom situation. Independent study is an extension of work offered in a specific class in the college catalog. To be eligible for independent study, students must have completed the basic regular catalog course at American River College. They must also discuss the study with a professor in this subject and secure approval. Only one independent study for each catalog course will be allowed.

**TA 498 Work Experience in Theatre Arts**

**Units:** 0.5 - 4  
**Hours:** 30 - 300 hours LAB  

**Prerequisite:** None.  
**Enrollment Limitation:** Students must be in a paid or unpaid internship, volunteer position, or job related to theatre arts with a cooperating site supervisor. Students are advised to consult with the Theatre Arts Department faculty to review specific certificate and degree work experience requirements.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.  
**Transferable:** CSU  
**General Education:** AA/AS Area III(b)  

This course provides students with opportunities to develop marketable skills in preparation for employment or advancement within the field of theatre arts. It is designed for students interested in work experience and/or internships in transfer-level degree occupational programs. Course content includes understanding the application of education to the workforce, completion of Title 5 required forms which document the student's progress and hours spent at the work site, and developing workplace skills and competencies.

During the semester, the student is required to complete 37.5 hours of related paid work experience, or 30 hours of related unpaid work experience for 0.5 unit. An additional 37.5 or 30 hours of related work experience is required for each additional 0.5 units. All students are required to attend the first class meeting, a mid-semester meeting, and a final meeting. Additionally, students who have not already successfully completed a Work Experience course will be required to attend weekly orientations while returning participants may meet individually with the instructor as needed. Students may take up to 16 units total across all Work Experience course offerings. This course may be taken up to four times when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

**TA 499 Experimental Offering in Theatre Arts**

**Units:** 0.5 - 4  
**Prerequisite:** None.  
**Transferable:** CSU  

This is the experimental courses description.
Theatre Arts Film

ARC's Theatre Arts Film offerings include a variety of transferable, general education classes as well as degree and certificate programs.

Degrees and Certificates Offered

A.A. in Film
Film Certificate

Dean Angela Milano
Department Chairs Kathy Burleson
Sam Williams
Phone (916) 484-8433

Associate Degree

A.A. in Film

This degree provides a broad overview of film history, theory, and practice. It combines the critical study of film as an art form and societal influence, including studies in diversity and genres, with opportunities for practical experience in film acting, writing, production, and post-production. It provides students with a foundation for further study in cinematic arts, as well as preparation for career opportunities which employ those arts.

Total Units: 27

The Film Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- analyze the historical development of film art.
- assess the influence of film as a dynamic art form, and as a social and cultural force in our society.
- evaluate the components of a film production, including acting, directing, writing, and technical elements.
- compare and contrast different styles and genres of film.
- integrate theoretical knowledge with practical production experience.

Certificate of Achievement

Film Certificate

This certificate concentrates on the critical study of film as an art form and societal influence, with additional opportunities for practical experience in film acting, production, and post-production.

Total Units: 17
Student Learning Outcomes

Upon completion of this program, the student will be able to:

- assess the influence of film as a dynamic art form and a social and cultural force in our society.
- distinguish the component parts of a film including acting, directing, screenwriting, cinematography, and production and technical elements.
- analyze the historical development of film.
- evaluate films in terms of cultural diversity.
- integrate theoretical knowledge with practical production experience.

Career Information

People may go into the field of film or television as actors, directors, producers, critics, and technicians.

Theatre Arts Film (TAFILM) Courses

TAFILM 300 Introduction to Film

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLW 340
Transferable: CSU; UC
General Education: AA/AS Area I; CSU Area C1; Cal-GETC Area 3A (effective Fall 2025); IGETC Area 3A

This course explores the artistic, business, and social elements of film. It examines components of film making, such as acting, directing, cinematography, writing, and editing. Films are analyzed to evaluate film making techniques and the impact of cinematic art and entertainment on society. This course is formerly known as TA 310.

TAFILM 302 History of Film

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLW 340
Transferable: CSU; UC (Transfer Credit Limitation: TA 312/TAFILM 302, TA 314/TAFILM 303, TA 315/TAFILM 304, TA 481 - any combination, maximum credit 6 units)
General Education: AA/AS Area I; CSU Area C1; Cal-GETC Area 3A (effective Fall 2025); IGETC Area 3A

This course examines one or more films which are landmarks in the art of moviemaking from around the world, from the invention of film to the present day. This course is formerly known as TA 312.

TAFILM 303 History of Film: 1880's through 1950's

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLW 340
Transferable: CSU; UC (Transfer Credit Limitation: TA 312/TAFILM 302, TA 314/TAFILM 303, TA 315/TAFILM 304, TA 481 - any combination, maximum credit 6 units)
General Education: AA/AS Area I; CSU Area C1; Cal-GETC Area 3A (effective Fall 2025); IGETC Area 3A

This course is an historical and critical survey of film as an art form, it emphasizes the evolution of artistic and technical facets of production in features, documentaries, and experimental films, concentrating on films from the 1880s through the 1950s. This course is formerly known as TA 314.

TAFILM 304 History of Film: 1950's to Present

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 101; OR ESLW 340
Transferable: CSU; UC (Transfer Credit Limitation: TA 312/TAFILM 302, TA 314/TAFILM 303, TA 315/TAFILM 304, TA 481 - any combination, maximum credit 6 units)
General Education: AA/AS Area I; CSU Area C1; Cal-GETC Area 3A (effective Fall 2025); IGETC Area 3A

This course is an historical and critical survey of film as an art form. It emphasizes the evolution of artistic and technical facets of production in features, documentaries, and experimental films, concentrating on films from 1950 to the present. This course is formerly known as TA 315.

TAFILM 307 Diversity in American Film

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLW 340
Transferable: CSU; UC
General Education: AA/AS Area I; AA/AS Area VI; CSU Area C1; Cal-GETC Area 3A (effective Fall 2025); IGETC Area 3A

This course surveys the cinematic expression of artists often underrepresented in the mainstream media, such as women, Native-Americans, African-Americans, Hispanics/Latinos, Asian-Americans, and gays, lesbians, bisexuals, and transgender people. It covers media stereotypes and the social, political, and cultural climates that created them. This course is formerly known as TA 318.

TAFILM 320 Cinema Genres

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLW 340
Transferable: CSU; UC
General Education: AA/AS Area I; CSU Area C2; Cal-GETC Area 3A (effective Fall 2025); IGETC Area 3A

This course examines one or more film genres such as western, horror, film noir, and science fiction. It explores specific types of film in depth, concentrating on historical and technical developments in a specific genre, and examines the work of actors, directors, writers, cinematographers, producers, and studios for that genre. This course is formerly known as TA 320.
Theatre Arts Performance

ARC's Theatre Arts Performance classes give you real-world experience acting on stage or working behind the scenes. You will have the opportunity to be a part of ARC's award-winning productions.

Theatre Arts Performance (TAP) Courses

TAP 300 Modern Rehearsal and Performance I

Units: 1 - 3
Hours: 54 - 162 hours LAB
Course Family: Modern Performance and Technical Production
Prerequisite: TAP 300 with a grade of "C" or better
Enrollment Limitation: Students must audition and/or interview with the director to participate in this course.
Advisory: TA 350
Transferable: CSU; UC
C-ID: C-ID THTR 191

This course is the first in a series of four courses that provide workshop training in the rehearsal and performance of Modern theatre. It is designed for students with little or no prior theatre experience. Students audition or interview with the director for participation in a Modern drama or comedy. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include acting, singing, dancing, and/or technical rehearsals and preparation.

TAP 301 Modern Rehearsal and Performance II

Units: 1 - 3
Hours: 54 - 162 hours LAB
Course Family: Modern Performance and Technical Production
Prerequisite: TAP 300 with a grade of "C" or better
Enrollment Limitation: Students must audition and/or interview with the director to participate in this course.
Advisory: TA 366
Transferable: CSU; UC
C-ID: C-ID THTR 191

This course is the second in a series of four courses that provide workshop training in the rehearsal and performance of Modern theatre. It is designed for students with basic/minimal theatre experience. Students audition or interview with the director for participation in a Modern drama or comedy. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include acting, singing, dancing, and/or technical rehearsals and preparation.

TAP 302 Modern Rehearsal and Performance III

Units: 1 - 3
Hours: 54 - 162 hours LAB
Course Family: Modern Performance and Technical Production
Prerequisite: TAP 301 with a grade of "C" or better
Enrollment Limitation: Students must audition and/or interview with the director to participate in this course.
Advisory: TA 366
Transferable: CSU; UC
C-ID: C-ID THTR 191

This course is the third in a series of four courses that provide workshop training in the rehearsal and performance of Modern theatre. It is designed for students with beginning/moderate theatre experience. Students audition or interview with the director for participation in a Modern drama or comedy. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include acting, singing, dancing, and/or technical rehearsals and preparation.

TAP 303 Modern Rehearsal and Performance IV

Units: 1 - 3
Hours: 54 - 162 hours LAB
Course Family: Modern Performance and Technical Production
Prerequisite: TAP 302 with a grade of "C" or better
Enrollment Limitation: Students must audition and/or interview with the director to participate in this course.
Advisory: TA 366
Transferable: CSU; UC
C-ID: C-ID THTR 191

This course is the fourth in a series of four courses that provide workshop training in the rehearsal and performance of Modern theatre. It is designed for students with intermediate/significant theatre experience. Students audition or interview with the director for participation in a Modern drama or comedy. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include acting, singing, dancing, and/or technical rehearsals and preparation.

TAP 310 Modern Technical Production I

Units: 1 - 3
Hours: 54 - 162 hours LAB
Course Family: Modern Performance and Technical Production
Prerequisite: None.
Enrollment Limitation: Interview
Transferable: CSU; UC
C-ID: C-ID THTR 192

This course is the first in a series of four courses that provide practical experience, in the modern theatre style, in one of the following areas: scenery, scenic painting, properties, costumes, lighting, sound, video, projections, stage management, house management, box office, publicity, and running crews. It is designed for students who want an introductory experience. Students interested in technical work interview for positions with the technical director. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include technical preparation, activities, rehearsals, and performances.

TAP 311 Modern Technical Production II

Units: 1 - 3
Hours: 54 - 162 hours LAB
Course Family: Modern Performance and Technical Production
Prerequisite: TAP 310 with a grade of "C" or better
Enrollment Limitation: Interview
Transferable: CSU; UC
C-ID: C-ID THTR 192

This course is the second in a series of four courses that provide practical experience, in the modern theatre style, in one of the following areas: scenery, scenic painting, properties, costumes, lighting, sound, video, projections, stage management, house management, box office, publicity, and running crews. It is designed for students with basic/minimal experience. Students interested in technical work interview for positions with the technical director. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include technical preparation, activities, rehearsals, and performances.
TAP 312 Modern Technical Production III

Units: 1 - 3
Hours: 54 - 162 hours LAB
Course Family: Modern Performance and Technical Production
Prerequisite: TAP 311 with a grade of "C" or better
Enrollment Limitation: Interview
Transferable: CSU; UC
C-ID: C-ID THTR 192

This course is the third in a series of four courses that provide workshop training in the technical production of modern theatre. It provides practical experience, in the modern theatre style, in one of the following areas: scenery, scenic painting, properties, costumes, lighting, sound, video, projections, stage management, house management, box office, publicity, and running crews. It is designed for students with beginning/moderate experience. Students interested in technical work interview for positions with the technical director. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include technical preparation, activities, rehearsals, and performances.

TAP 313 Modern Technical Production IV

Units: 1 - 3
Hours: 54 - 162 hours LAB
Course Family: Modern Performance and Technical Production
Prerequisite: TAP 312 with a grade of "C" or better
Enrollment Limitation: Interview
Transferable: CSU; UC
C-ID: C-ID THTR 192

This course is the fourth in a series of four courses that provide workshop training in the technical production of modern theatre. It provides practical experience, in the modern theatre style, in one of the following areas: scenery, scenic painting, properties, costumes, lighting, sound, video, projections, stage management, house management, box office, publicity, and running crews. It is designed for students with intermediate/significant theatre experience. Students interested in technical work interview for positions with the technical director. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include technical preparation, activities, rehearsals, and performances.

TAP 320 Classical Rehearsal and Performance I

Units: 1 - 3
Hours: 54 - 162 hours LAB
Course Family: Classical Performance and Technical Production
Prerequisite: None.
Enrollment Limitation: Students must audition and/or interview with the director to participate in this course.
Advisory: TA 350
Transferable: CSU; UC
C-ID: C-ID THTR 191

This course is the first in a series of four courses that provide workshop training in the rehearsal and performance of Classical theatre. It is designed for students with little or no prior theatre experience. Students audition or interview with the director for participation in a Classical drama or comedy. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include acting, singing, dancing, and/or technical rehearsals and preparation.

TAP 321 Classical Rehearsal and Performance II

Units: 1 - 3
Hours: 54 - 162 hours LAB
Course Family: Classical Performance and Technical Production
Prerequisite: TAP 320 with a grade of "C" or better
Enrollment Limitation: Students must audition and/or interview with the director to participate in this course.
Advisory: TA 362
Transferable: CSU; UC
C-ID: C-ID THTR 192

This course is the second in a series of four courses that provide workshop training in the rehearsal and performance of Classical theatre. It is designed for students with basic/minimal theatre experience. Students audition or interview with the director for participation in a Classical drama or comedy. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include acting, singing, dancing, and/or technical rehearsals and preparation.

TAP 322 Classical Rehearsal and Performance III

Units: 1 - 3
Hours: 54 - 162 hours LAB
Course Family: Classical Performance and Technical Production
Prerequisite: TAP 321 with a grade of "C" or better
Enrollment Limitation: Students must audition and/or interview with the director to participate in this course.
Advisory: TA 362
Transferable: CSU; UC
C-ID: C-ID THTR 191

This course is the third in a series of four courses that provide workshop training in the rehearsal and performance of Classical theatre. It is designed for students with beginning/moderate theatre experience. Students audition or interview with the director for participation in a Classical drama or comedy. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include acting, singing, dancing, and/or technical rehearsals and preparation.

TAP 323 Classical Rehearsal and Performance IV

Units: 1 - 3
Hours: 54 - 162 hours LAB
Course Family: Classical Performance and Technical Production
Prerequisite: TAP 322 with a grade of "C" or better
Enrollment Limitation: Students must audition and/or interview with the director to participate in this course.
Advisory: TA 362
Transferable: CSU; UC
C-ID: C-ID THTR 191

This course is the fourth in a series of four courses that provide workshop training in the rehearsal and performance of Classical theatre. It is designed for students with intermediate/significant theatre experience. Students audition or interview with the director for participation in a Classical drama or comedy. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include acting, singing, dancing, and/or technical rehearsals and preparation.
TAP 331 Classical Technical Production II

Units: 1 - 3  
Hours: 54 - 162 hours LAB  
Course Family: Classical Performance and Technical Production  
Prerequisite: TAP 330 with a grade of "C" or better  
Enrollment Limitation: Interview  
Transferable: CSU; UC  
C-ID: C-ID THTR 192  

This course is the second in a series of four courses that provide workshop training in the technical production of classical theatre. It provides practical experience, in the classical theatre style, in one of the following areas: scenery, scenic painting, properties, costumes, lighting, sound, video, projections, stage management, house management, box office, publicity, and running crews. It is designed for students with basic/minimal theatre experience. Students interested in technical work interview for positions with the technical director. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include technical preparation, activities, rehearsals, and performances.

TAP 332 Classical Technical Production III

Units: 1 - 3  
Hours: 54 - 162 hours LAB  
Course Family: Classical Performance and Technical Production  
Prerequisite: TAP 331 with a grade of "C" or better  
Enrollment Limitation: Interview  
Transferable: CSU; UC  
C-ID: C-ID THTR 192  

This course is the third in a series of four courses that provide workshop training in the technical production of classical theatre. It provides practical experience, in the classical theatre style, in one of the following areas: scenery, scenic painting, properties, costumes, lighting, sound, video, projections, stage management, house management, box office, publicity, and running crews. It is designed for students with beginning/moderate theatre experience. Students interested in technical work interview for positions with the technical director. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include technical preparation, activities, rehearsals, and performances.

TAP 333 Classical Technical Production IV

Units: 1 - 3  
Hours: 54 - 162 hours LAB  
Course Family: Classical Performance and Technical Production  
Prerequisite: TAP 332 with a grade of "C" or better  
Enrollment Limitation: Interview  
Transferable: CSU; UC  
C-ID: C-ID THTR 192  

This course is the fourth in a series of four courses that provide workshop training in the technical production of classical theatre. It provides practical experience, in the classical theatre style, in one of the following areas: scenery, scenic painting, properties, costumes, lighting, sound, video, projections, stage management, house management, box office, publicity, and running crews. It is designed for students with intermediate/significant theatre experience. Students interested in technical work interview for positions with the technical director. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include technical preparation, activities, rehearsals, and performances.

TAP 340 Musical Rehearsal and Performance I

Units: 1 - 3  
Hours: 54 - 162 hours LAB  
Course Family: Musical Performance and Technical Production  
Prerequisite: None.  
Enrollment Limitation: Students must audition and/or interview with the director to participate in this course.

Advisory: TA 350  
Transferable: CSU; UC  
C-ID: C-ID THTR 191

This course is the first in a series of four courses that provide workshop training in the rehearsal and performance of musical theatre. It is designed for students with little or no prior theatre experience. Students audition or interview with the director for participation in a musical. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include acting, singing, dancing, and/or technical rehearsals and preparation.

TAP 341 Musical Rehearsal and Performance II

Units: 1 - 3  
Hours: 54 - 162 hours LAB  
Course Family: Musical Performance and Technical Production  
Prerequisite: TAP 340 with a grade of "C" or better  
Enrollment Limitation: Students must audition and/or interview with the director to participate in this course.

Advisory: TA 377  
Transferable: CSU; UC  
C-ID: C-ID THTR 191

This course is the second in a series of four courses that provide workshop training in the rehearsal and performance of musical theatre. It is designed for students with basic/minimal theatre experience. Students audition or interview with the director for participation in a musical. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include acting, singing, dancing, and/or technical rehearsals and preparation.

TAP 342 Musical Rehearsal and Performance III

Units: 1 - 3  
Hours: 54 - 162 hours LAB  
Course Family: Musical Performance and Technical Production  
Prerequisite: TAP 341 with a grade of "C" or better  
Enrollment Limitation: Students must audition and/or interview with the director to participate in this course.

Advisory: TA 370 and 377  
Transferable: CSU; UC  
C-ID: C-ID THTR 191

This course is the third in a series of four courses that provide workshop training in the rehearsal and performance of musical theatre. It is designed for students with beginning/moderate theatre experience. Students audition or interview with the director for participation in a musical. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include acting, singing, dancing, and/or technical rehearsals and preparation.

TAP 343 Musical Rehearsal and Performance IV

Units: 1 - 3  
Hours: 54 - 162 hours LAB  
Course Family: Musical Performance and Technical Production  
Prerequisite: TAP 342 with a grade of "C" or better  
Enrollment Limitation: Students must audition and/or interview with the director to participate in this course.

Advisory: TA 370 and 377  
Transferable: CSU; UC  
C-ID: C-ID THTR 191

This course is the fourth in a series of four courses that provide workshop training in the rehearsal and performance of musical theatre. It is designed for students with intermediate/significant theatre experience. Students audition or interview with the director for participation in a musical. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include acting, singing, dancing, and/or technical rehearsals and preparation.
TAP 350 Musical Technical Production I

Units: 1 - 3
Hours: 54 - 162 hours LAB
Course Family: Musical Performance and Technical Production
Prerequisite: TAP 352 with a grade of "C" or better
Enrollment Limitation: Interview
Transferable: CSU; UC
C-ID: C-ID THTR 192

This course is the first in a series of four courses that provide workshop training in the technical production of musical theatre. It provides practical experience, in the musical theatre style, in one of the following areas: scenery, scenic painting, properties, costumes, lighting, sound, video, projections, stage management, house management, box office, publicity, and running crews. It is designed for students who want an introductory experience. Students interested in technical work are interviewed for positions with the technical director. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include technical preparation, activities, rehearsals, and performances.

TAP 351 Musical Technical Production II

Units: 1 - 3
Hours: 54 - 162 hours LAB
Course Family: Musical Performance and Technical Production
Prerequisite: TAP 350 with a grade of "C" or better
Enrollment Limitation: Interview
Transferable: CSU; UC
C-ID: C-ID THTR 192

This course is the second in a series of four courses that provide workshop training in the technical production of musical theatre. It provides practical experience, in the musical theatre style, in one of the following areas: scenery, scenic painting, properties, costumes, lighting, sound, video, projections, stage management, house management, box office, publicity, and running crews. It is designed for students with basic/minimal theatre experience. Students interested in technical work are interviewed for positions with the technical director. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include technical preparation, activities, rehearsals, and performances.

TAP 352 Musical Technical Production III

Units: 1 - 3
Hours: 54 - 162 hours LAB
Course Family: Musical Performance and Technical Production
Prerequisite: TAP 351 with a grade of "C" or better
Enrollment Limitation: Interview
Transferable: CSU; UC
C-ID: C-ID THTR 192

This course is the third in a series of four courses that provide workshop training in the technical production of musical theatre. It provides practical experience, in the musical theatre style, in one of the following areas: scenery, scenic painting, properties, costumes, lighting, sound, video, projections, stage management, house management, box office, publicity, and running crews. It is designed for students with beginning/moderate theatre experience. Students interested in technical work are interviewed for positions with the technical director. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include technical preparation, activities, rehearsals, and performances.

TAP 353 Musical Technical Production IV

Units: 1 - 3
Hours: 54 - 162 hours LAB
Course Family: Musical Performance and Technical Production
Prerequisite: TAP 352 with a grade of "C" or better
Enrollment Limitation: Interview
Transferable: CSU; UC
C-ID: C-ID THTR 192

This course is the fourth in a series of four courses that provide workshop training in the technical production of musical theatre. It provides practical experience, in the musical theatre style, in one of the following areas: scenery, scenic painting, properties, costumes, lighting, sound, video, projections, stage management, house management, box office, publicity, and running crews. It is designed for students with intermediate/significant experience. Students interested in technical work are interviewed for positions with the technical director. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include technical preparation, activities, rehearsals, and performances.

TAP 360 Children's Theatre Rehearsal and Performance I

Units: 1 - 3
Hours: 54 - 162 hours LAB
Course Family: Children's Theatre Performance and Technical Production
Prerequisite: None
Enrollment Limitation: Students must audition and/or interview with the director to participate in this course.
Advisory: TA 350
Transferable: CSU; UC
C-ID: C-ID THTR 191

This course is the first in a series of four courses that provide workshop training in the rehearsal and performance of children's theatre. It is designed for students with little or no prior theatre experience. Students audition or interview with the director for participation in a children's show. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include acting, singing, dancing, and/or technical rehearsals and preparation.

TAP 361 Children's Theatre Rehearsal and Performance II

Units: 1 - 3
Hours: 54 - 162 hours LAB
Course Family: Children's Theatre Performance and Technical Production
Prerequisite: TAP 360 with a grade of "C" or better
Enrollment Limitation: Students must audition and/or interview with the director to participate in this course.
Advisory: TA 350
Transferable: CSU; UC
C-ID: C-ID THTR 191

This course is the second in a series of four courses that provide workshop training in the rehearsal and performance of children's theatre. It is designed for students with basic/minimal theatre experience. Students audition or interview with the director for participation in a children's show. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include acting, singing, dancing, and/or technical rehearsals and preparation.

TAP 362 Children's Theatre Rehearsal and Performance III

Units: 1 - 3
Hours: 54 - 162 hours LAB
Course Family: Children's Theatre Performance and Technical Production
Prerequisite: TAP 361 with a grade of "C" or better
Enrollment Limitation: Students must audition and/or interview with the director to participate in this course.
Advisory: TA 350
Transferable: CSU; UC
C-ID: C-ID THTR 191

This course is the third in a series of four courses that provide workshop training in the rehearsal and performance of children's theatre. It is designed for students with basic/minimal theatre experience. Students audition or interview with the director for participation in a children's show. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include acting, singing, dancing, and/or technical rehearsals and preparation.
TAP 363 Children's Theatre Rehearsal and Performance IV

Units: 1 - 3  
Hours: 54 - 162 hours LAB  
Course Family: Children's Theatre Performance and Technical Production  
Prerequisite: TAP 362 with a grade of "C" or better  
Enrollment Limitation: Students must audition and/or interview with the director to participate in this course.  
Advisory: TA 350  
Transferable: CSU; UC  
C-ID: C-ID THTR 191

This course is the fourth in a series of four courses that provide workshop training in the rehearsal and performance of children's theatre. It is designed for students with intermediate/significant theatre experience. Students audition or interview with the director for participation in a children's show. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include acting, singing, dancing, and/or technical rehearsals and preparation.

TAP 370 Children's Theatre Technical Production I

Units: 1 - 3  
Hours: 54 - 162 hours LAB  
Course Family: Children's Theatre Performance and Technical Production  
Prerequisite: None.  
Enrollment Limitation: Interview  
Transferable: CSU; UC  
C-ID: C-ID THTR 192

This course is the first in a series of four courses that provide workshop training in the technical production of children's theatre. It provides practical experience, in the children's theatre style, in one of the following areas: scenery, scenic painting, properties, costumes, lighting, sound, video, projections, stage management, house management, box office, publicity, and running crews. It is designed for students who want an introductory experience. Students interested in technical work interview for positions with the technical director. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include technical preparation, activities, rehearsals, and performances.

TAP 371 Children's Theatre Technical Production II

Units: 1 - 3  
Hours: 54 - 162 hours LAB  
Course Family: Children's Theatre Performance and Technical Production  
Prerequisite: TAP 370 with a grade of "C" or better  
Enrollment Limitation: Interview  
Transferable: CSU; UC  
C-ID: C-ID THTR 192

This course is the second in a series of four courses that provide workshop training in the technical production of children's theatre. It provides practical experience, in the children's theatre style, in one of the following areas: scenery, scenic painting, properties, costumes, lighting, sound, video, projections, stage management, house management, box office, publicity, and running crews. It is designed for students with basic/minimal theatre experience. Students interested in technical work interview for positions with the technical director. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include technical preparation, activities, rehearsals, and performances.

TAP 372 Children's Theatre Technical Production III

Units: 1 - 3  
Hours: 54 - 162 hours LAB  
Course Family: Children's Theatre Performance and Technical Production  
Prerequisite: TAP 371 with a grade of "C" or better  
Enrollment Limitation: Interview  
Transferable: CSU; UC  
C-ID: C-ID THTR 192

This course is the third in a series of four courses that provide workshop training in the technical production of children's theatre. It provides practical experience, in the children's theatre style, in one of the following areas: scenery, scenic painting, properties, costumes, lighting, sound, video, projections, stage management, house management, box office, publicity, and running crews. It is designed for students with beginning/moderate theatre experience. Students interested in technical work interview for positions with the technical director. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include technical preparation, activities, rehearsals, and performances.

TAP 373 Children's Theatre Technical Production IV

Units: 1 - 3  
Hours: 54 - 162 hours LAB  
Course Family: Children's Theatre Performance and Technical Production  
Prerequisite: TAP 372 with a grade of "C" or better  
Enrollment Limitation: Interview  
Transferable: CSU; UC  
C-ID: C-ID THTR 192

This course is the fourth in a series of four courses that provide workshop training in the technical production of children's theatre. It provides practical experience, in the children's theatre style, in one of the following areas: scenery, scenic painting, properties, costumes, lighting, sound, video, projections, stage management, house management, box office, publicity, and running crews. It is designed for students with intermediate/significant theatre experience. Students audition or interview with the technical director for positions with the technical director. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include technical preparation, activities, rehearsals, and performances.

TAP 380 Repertory/Touring Rehearsal and Performance I

Units: 1 - 3  
Hours: 54 - 162 hours LAB  
Course Family: Repertory/Touring Performance and Technical Production  
Prerequisite: None.  
Enrollment Limitation: Students must audition and/or interview with the director to participate in this course.  
Advisory: TA 350  
Transferable: CSU; UC  
C-ID: C-ID THTR 191

This course is the first in a series of four courses that provide workshop training in the rehearsal and performance of repertory and/or touring theatre. It is designed for students with little or no prior theatre experience. Students audition or interview with the director for participation in a repertory and/or touring theatre production. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include technical preparation, activities, rehearsals, and performances.

TAP 381 Repertory/Touring Rehearsal and Performance II

Units: 1 - 3  
Hours: 54 - 162 hours LAB  
Course Family: Repertory/Touring Performance and Technical Production  
Prerequisite: TAP 380 with a grade of "C" or better  
Enrollment Limitation: Students must audition and/or interview with the director to participate in this course.  
Advisory: TA 350  
Transferable: CSU; UC  
C-ID: C-ID THTR 191

This course is the second in a series of four courses that provide workshop training in the rehearsal and performance of repertory and/or
touring theatre. It is designed for students with basic/minimal theatre experience. Students audition or interview with the director for participation in a repertory and/or touring theatre production. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include acting, singing, dancing, and/or technical rehearsals and preparation.

TAP 382 Repertory/Touring Rehearsal and Performance III

Units: 1 - 3
Hours: 54 - 162 hours LAB
Course Family: Repertory/Touring Performance and Technical Production
Prerequisite: TAP 381 with a grade of "C" or better
Enrollment Limitation: Students must audition and/or interview with the director to participate in this course.
Advisory: TA 350
Transferable: CSU; UC
C-ID: C-ID THTR 191

This course is the third in a series of four courses that provide workshop training in the rehearsal and performance of repertory and/or touring theatre. It is designed for students with beginning/moderate theatre experience. Students audition or interview with the director for participation in a repertory and/or touring theatre production. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include acting, singing, dancing, and/or technical rehearsals and preparation.

TAP 383 Repertory/Touring Rehearsal and Performance IV

Units: 1 - 3
Hours: 54 - 162 hours LAB
Course Family: Repertory/Touring Performance and Technical Production
Prerequisite: TAP 382 with a grade of "C" or better
Enrollment Limitation: Students must audition and/or interview with the director to participate in this course.
Advisory: TA 350
Transferable: CSU; UC
C-ID: C-ID THTR 191

This course is the fourth in a series of four courses that provide workshop training in the rehearsal and performance of repertory and/or touring theatre. It is designed for students with intermediate/significant theatre experience. Students audition or interview with the director for participation in a repertory and/or touring theatre production. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include acting, singing, dancing, and/or technical rehearsals and preparation.

TAP 390 Repertory and Touring Technical Production I

Units: 1 - 3
Hours: 54 - 162 hours LAB
Course Family: Repertory/Touring Performance and Technical Production
Prerequisite: None.
Enrollment Limitation: Interview
Transferable: CSU; UC
C-ID: C-ID THTR 192

This course is the first in a series of four courses that provide workshop training in the technical production of repertory and touring theatre. It provides practical experience, in the repertory and touring theatre style, in one of the following areas: scenery, scenic painting, properties, costumes, lighting, sound, video, projections, stage management, house management, box office, publicity, and running crews. It is designed for students who want an introductory experience. Students interested in technical work may be required. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include technical preparation, activities, rehearsals, and performances.

TAP 391 Repertory and Touring Technical Production II

Units: 1 - 3
Hours: 54 - 162 hours LAB
Course Family: Repertory/Touring Performance and Technical Production
Prerequisite: TAP 390 with a grade of "C" or better
Enrollment Limitation: Interview
Transferable: CSU; UC
C-ID: C-ID THTR 192

This course is the second in a series of four courses that provide workshop training in the technical production of repertory and touring theatre. It provides practical experience, in the repertory and touring theatre style, in one of the following areas: scenery, scenic painting, properties, costumes, lighting, sound, video, projections, stage management, house management, box office, publicity, and running crews. It is designed for students with basic/minimal theatre experience. Students interested in technical work may be required. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include technical preparation, activities, rehearsals, and performances.

TAP 392 Repertory and Touring Technical Production III

Units: 1 - 3
Hours: 54 - 162 hours LAB
Course Family: Repertory/Touring Performance and Technical Production
Prerequisite: TAP 391 with a grade of "C" or better
Enrollment Limitation: Interview
Transferable: CSU; UC
C-ID: C-ID THTR 192

This course is the third in a series of four courses that provide technical training in the technical production of repertory and touring theatre. It provides practical experience, in the repertory and touring theatre style, in one of the following areas: scenery, scenic painting, properties, costumes, lighting, sound, video, projections, stage management, house management, box office, publicity, and running crews. It is designed for students with intermediate/significant theatre experience. Students interested in technical work may be required. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include technical preparation, activities, rehearsals, and performances.

TAP 393 Repertory and Touring Technical Production IV

Units: 1 - 3
Hours: 54 - 162 hours LAB
Course Family: Repertory/Touring Performance and Technical Production
Prerequisite: TAP 392 with a grade of "C" or better
Enrollment Limitation: Interview
Transferable: CSU; UC
C-ID: C-ID THTR 192

This course is the fourth in a series of four courses that provide technical training in the technical production of repertory and touring theatre. It provides practical experience, in the repertory and touring theatre style, in one of the following areas: scenery, scenic painting, properties, costumes, lighting, sound, video, projections, stage management, house management, box office, publicity, and running crews. It is designed for students with intermediate/significant theatre experience. Students interested in technical work may be required. Field trips may be required. A portion of this course may be offered in a TBA component of 54-162 hours which may include technical preparation, activities, rehearsals, and performances.

TAP 499 Experimental Offering in Theatre Arts Performance

Units: 0.5 - 4
Prerequisite: None.

This is the experimental courses description.
Welding Technology

The ARC Welding Technology department offers students the opportunity to pursue an Associates in Science degree or several certificates. The department is committed to preparing students for success in an exciting, in-demand career field. Our faculty have decades of industry experience. They work closely with local employers and our partners with the American Welding Society (https://www.aws.org/) to ensure that you will gain the skills and training to have a successful career.

Degrees and Certificates Offered

A.S. in Welding Technology
Shielded Metal Arc Plate and Pipe Certificate
Welding Metallurgy and Inspection (270 hours) Certificate
Welding Technology Certificate
Gas Metal Arc and Flux Core Arc Welding Plate (252 hours) Certificate
Gas Tungsten Arc Plate and Pipe Welding (180 hours) Certificate
Pipe Welding Certificate
Welding Equipment Maintenance and Blueprint Interpretation (234 hours) Certificate

Dean Gary Aguilar
Department Chair Chris Messier
Phone (916) 484-8588

Associate Degree

A.S. in Welding Technology

The Welding Technology degree provides skills and knowledge in manual and semi-automatic welding processes used in the metal fabrication and construction industries. Instruction covers materials, equipment, procedures, testing techniques as well as safety and blueprint reading. Competencies include techniques of joining ferrous and non-ferrous metals by the use of Shielded Metal Arc Welding (SMAW), Gas Metal Arc Welding (GMAW), Flux Cored Arc Welding (FCAW), and Gas Tungsten Arc Welding (GTAW), and welding procedures.

1 A minimum of 1 unit from the following courses.

The Welding Technology Associate in Science (A.S.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

• select the correct electrode classification and parameters for various thickness of material and welding positions on ferrous and nonferrous metals.
• define principles of GMAW.
• interpret GMAW electrode and classification and specification.
• describe GMAW welding operations of various joint designs using selected electrodes on different positions.
• describe SMAW operations of various positions using selected electrodes on different joint designs.
• define principles of arc welding.
• select correct electrode amperage settings for the job application.
• identify GTAW principles and safe welding practices.
• define GTAW applications and limitations.
• explain the reason for the formation of each discontinuity type, and distinguish different discontinuities.
• interpret fabrication blueprints using a systematic process.
• interpret graphic welding symbols.
• relate the requirements for welding ferrous and nonferrous metals.
• select the appropriate setting and application methods.
• list the methods used for discontinuity prevention and identify surface defects in welds.

Career Information

Welding certification is recognized by the welding industry as an important step in the profession. The American Welding Society (AWS) nationally accredits American River College’s welding program. The ARC welding program has met all the requirements of the AWS QC4 standards for Accreditation of Test Facilities for their Certified Welder Program. Graduating students may find positions in oil refineries, nuclear power plants, aerospace, structural buildings, bridge construction, auto industry, and small commercial fabricating shops.

Certificates of Achievement

Shielded Metal Arc Plate and Pipe Certificate

This certificate promotes competence in plate and pipe welding. Emphasis is on power sources, electrode selection on various joint designs, techniques, and positions in welding. Instruction includes safety and proper procedures in making fillet and groove welds that are in compliance with structural and pipe welding codes.

Certificate Requirements

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- interpret electrode classification and specification
- select correct amperage setting for the job application
- define principles of arc welding
- certify and perform SMA operations in various positions using selected electrodes on different joint designs

Welding Metallurgy and Inspection (270 hours) Certificate

The Welding Metallurgy and Inspection certificate provides the science of metallurgy and weld inspection. Emphasis is on the identification and selection of irons and steel, mechanical and physical properties of metals and crystal structures of metals, rules and regulations of the welding construction industry, and principles, requirements and methods of inspection.

Certificate Requirements

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- Describe the mechanical properties of different types of metals
- Interpret and explain the Nondestructive Testing (NDT) procedures of codes and specifications relating to welding
- Evaluate and explain in simple terms the reason for the formation of discontinuity in each of the welding processes
- Explain different methods used for the prevention of weld discontinuities
- Describe the crystalline structures of metals and explain how grain forms in metal
- Explain the problems hydrogen causes when welding steel
- Analyze phase diagrams of carbon and stainless steels

Welding Technology Certificate

This certificate provides skills and knowledge in manual and semi-automatic welding processes used in the metal fabrication and construction industries. Instruction covers materials, equipment, welding procedures, testing techniques, inspection, welding metallurgy, blueprint reading, and welding safety. Competencies include techniques of joining ferrous and non-ferrous metals by the use of Shielded Metal Arc Welding (SMAW), Gas Metal Arc Welding (GMAW), Flux Cored Arc Welding (FCAW), and Gas Tungsten Arc Welding (GTAW). Oxyacetylene welding, oxyacetylene cutting and plasma arc cutting, are also covered.

</tbody>
</table>

Career Information

Graduates may find employment in a number of industries including: pipe line construction, oil refining, aerospace, structural building, bridge construction, automotive, and small commercial fabricating. They may also work as welding shop supervisors and welding sales persons, and they can also become welding shop owners.
Certificates

Gas Metal Arc and Flux Core Arc Welding Plate (252 hours) Certificate

The Gas Metal Arc Welding certificate promotes competence in welding with different types of metal transfer, constant voltage power sources, different types of shielding gases, and electrode selection on various joint designs. Instruction is provided in gas metal and flux cored arc welding on fillet and groove welds to specific structural and pipe standards.

Certificate Requirements

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- select the correct electrode classification and parameters for various thicknesses of material and welding positions on ferrous and nonferrous metals
- define principles of gas metal arc welding
- interpret electrode classification and specification
- analyze gas metal arc welding operations on various joint designs using selected electrodes for different welding positions

Gas Tungsten Arc Plate and Pipe Welding (180 hours) Certificate

The Gas Tungsten Arc Welding certificate promotes competence in welding ferrous and nonferrous materials. Emphasis is on proper use of gas tungsten arc welding (GTA) equipment setup requirements, process variables, material requirements, and welding procedures that are in compliance with industry standards.

Certificate Requirements

<table>

<td>9</td>
</tr>
</tbody>
</table>

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- identify GTA principles and safe practices.
- define GTA applications and limitations.
- weld mild steel, stainless steel, and aluminum alloys using GTA procedures in all positions.
- evaluate and demonstrate procedures for a given welding project or application.
- relate the requirements of welding ferrous and nonferrous materials.
- select the appropriate settings and applications methods of GTA process.

Pipe Welding Certificate

This certificate promotes competence in pipe welding with emphasis on power sources, electrode/filler metal selection on various joint designs, techniques, and positions for welding. Instruction includes safety, math, and proper procedures in making fillet and groove welds that are in compliance with structural and pipe welding codes.

Certificate Requirements

</table>

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- interpret electrode and filler metal classifications and specifications.
- select correct amperage setting for the job application.
- define principles of arc welding.
- perform Shielded Metal Arc Welding and Gas Tungsten Arc Welding operations in various positions using selected electrodes on different joint designs.
- use math in welding applications.

Career Information

Certificate completers may find employment in a number of industries, including PG&E pipeline construction, oil refining, power generation, structural building, bridge construction, and small commercial fabricating shops.

Welding Equipment Maintenance and Blueprint Interpretation (234 hours) Certificate

This certificate promotes competence in solving equipment, mathematical and manufacturing problems that apply to the welding trade. It emphasizes metal placement, measurement, and layout of tools used in construction, as well as the fundamentals of blueprint reading and welding equipment repair.

Certificate Requirements

</tbody>
</table>

Student Learning Outcomes

Upon completion of this program, the student will be able to:

- evaluate algebraic expressions by substituting given numbers for letter values
- solve formulas by substituting numbers for letters, analyzing word statements and diagram values
- compute the area, radius, and diameter of a circle
• compute area, radius, and central angles of a sector
• measure angles in degrees, minutes, and seconds
• identify and demonstrate the proper use of common power tools and accessories used in the welding trade
• interpret fabrication blueprints using a systematic process
• interpret graphic welding symbols
• interpret electrical and electronically controlled circuits
• evaluate testing equipment used for welding maintenance repair

Welding (WELD) Courses

WELD 105 Introduction to Metal Sculpture

Units: 1.5
Hours: 18 hours LEC; 27 hours LAB
Prerequisite: None.

This course covers metal sculpture techniques, design principles, and materials used for sculpture for functional and nonfunctional art forms, on ferrous and non-ferrous metals. Techniques on the major welding processes such as Shielded Metal Arc, Gas Metal Arc, Gas Tungsten Arc, and Oxy-Acetylene are an integral part of the course, as well as related safety issues.

WELD 107 Welding Equipment Maintenance

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: None.

This course covers the basics of welding equipment maintenance, troubleshooting, and repair. Electrical and electronically controlled circuits are discussed and tested. Overall theory of operation and safety are presented, as well as maintenance scheduling and the use of electronic test equipment and other measuring devices. Field trips may be required.

WELD 115 Code Welding

Units: 2
Hours: 18 hours LEC; 54 hours LAB
Prerequisite: WELD 300 with a "C" grade or better, or a minimum of one year of welding experience.

This course provides individualized training for welder performance qualification. Code and test requirements are presented. Welders select the code, metal, process, and positions to be used. Preparation for competing in the SkillsUSA regional, state, and national competition is also covered. This course may be taken up to four times for credit with different competitions. A field trip and participation at the site of the SkillsUSA regional competition are required.

WELD 117 Ultrasonic Testing Level One

Units: 3
Hours: 45 hours LEC; 27 hours LAB
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.

This course covers the theory, technique, application, and evaluation used in the material processing, welding, and inspection industries. Ultrasonic testing as applied to industry practices, such as building construction, aeronautics, shipbuilding, materials fabrication, and others, is covered. Successful completion of this course certifies that the requirements of the American Society of Nondestructive Testing (ASNT) TC-1A for UT level I are met.

WELD 118 Ultrasonic Testing Level Two

Units: 3
Hours: 45 hours LEC; 27 hours LAB
Prerequisite: WELD 117 with a "C" or better, or evidence of completion of UT Level I certification.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; or ESLW 340.

This course covers advanced theory, technique application, and evaluation techniques used in the material processing, welding, and inspection industries. It covers advanced ultrasonic testing as applied to industry practices such as building construction, aeronautics, shipbuilding, and materials fabrication. Successful completion of this course meets the requirements of the American Society of Nondestructive Testing (ASNT) TC1-A for Ultrasonic Testing Level II.

WELD 140 Mathematics for Welding Technicians

Units: 3
Hours: 54 hours LEC
Prerequisite: None.
General Education: AA/AS Area II(b)

This course covers the application of mathematics principles in technical and trade work. Areas covered are fundamentals of general mathematics, common fractions, decimal fractions, percent, signed numbers, measurements, customary measurement units, metric measurement units, steel rules and vernier calipers, fundamentals of algebra, basic algebraic operations, fundamentals of plane geometry, triangles, polygons, circles, areas, volumes, and fundamentals of trigonometry.

WELD 150 Employability Skills for Technical Careers

Same As: AT 107 and ET 250
Units: 2
Hours: 36 hours LEC
Prerequisite: None.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.
General Education: AA/AS Area III(b)

This course provides the opportunity to explore technical careers while developing valuable work and life skills. It is an introduction to a variety of technically-related occupations, emphasizing technical careers in the Sacramento area. Activities are designed to enhance personal development, employability skills, and self esteem through leadership, citizenship, and character development. This course is not open to students who have completed AT 107 or ET 250.

WELD 155 Industry Training

Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: None.

This course covers welding processes, knowledge, and skills specific to employers’ needs. Workplace safety and etiquette are included. Metal fabrication skills for specific employment needs and welding certification testing are covered if requested by employers.

WELD 294 Topics in Welding

Units: 0.5 - 5
Hours: 9 hours LEC; 27 - 270 hours LAB
Prerequisite: None.

This course provides an opportunity to study current topics in welding technology that are not included in existing courses.
WELD 295 Independent Studies in Welding
Units: 1 - 3
Prerequisite: None.

WELD 298 Work Experience in Welding
Units: 0.5 - 4
Hours: 30 - 300 hours LAB
Prerequisite: None.
Enrollment Limitation: Students must be in a paid or unpaid internship, volunteer position, or job related to the welding field with a cooperating site supervisor. Students are advised to consult with the Welding Department faculty to review specific certificate and degree work experience requirements.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLW 340.
General Education: AA/AS Area III(b)
This course provides students with opportunities to develop marketable skills in preparation for employment or advancement within the welding field. It is designed for students interested in work experience and/or internships in associate degree level or certificate occupational programs. Course content includes understanding the application of education to the workforce, completion of Title 5 required forms which document the student’s progress and hours spent at the work site, and developing workplace skills and competencies.
During the semester, the student is required to complete 37.5 hours of related paid work experience, or 30 hours of related unpaid work experience for 0.5 unit. An additional 37.5 or 30 hours of related work experience is required for each additional 0.5 units. All students are required to attend the first class meeting, a mid-semester meeting, and a final meeting. Additionally, students who have not already successfully completed a Work Experience course will be required to attend weekly orientations while returning participants may meet individually with the instructor as needed. Students may take up to 16 units total across all Work Experience course offerings. This course may be taken up to four times when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

WELD 299 Experimental Offering in Welding
Units: 0.5 - 4
Prerequisite: None.
This is the experimental courses description.

WELD 300 Introduction to Welding
Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: None.
Transferable: CSU
This course is an introduction to welding processes, including shielded metal arc welding (SMAW) in the horizontal (2F-2G), vertical (3F-3G), and overhead (4F-4G) positions on steel. It also covers filler metal classifications, welding power supplies, and welding safety. Welding test plates in accordance with the requirements to AWS D1.1 Structural Welding Code and AWS D1.5 Bridge Code are also covered.

WELD 302 Introduction to Welding Metallurgy
Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: None.
Corequisite: WELD 300
Transferable: CSU
This course provides a general overview of basic metallurgy of ferrous and non-ferrous metals. Topics include various steel making processes, different types of furnaces, identifying types of steels, and their mechanical, physical, chemical, and electrical properties. Crystal structures of metals, the iron equilibrium diagram, the periodic table of elements emphasizing those elements associated with steels, metallurgical failure of welds, steel deformation, and heat treatment of steels are also covered. In addition, material hardness using different hardness testing methods, calculation of different steel strengths and stresses, and impact tests using the Charpy and Izod methods are covered. Field trips may be required.

WELD 316 Welding Inspection
Units: 2
Hours: 36 hours LEC
Prerequisite: WELD 300 with a grade of "C" or better; OR at least one year of welding experience.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLW 340.
Transferable: CSU
This course covers the welding requirements for any type of welded structure made from commonly used carbon and low-alloy steel construction. Topics include the welding construction industry, rules, regulations, and the principles, requirements, and methods of inspection. It covers weld measurements and discontinuities for evaluation acceptance using a variety of tools. It also emphasizes the lines of communication between the plant managers, welders, welding engineers, design/project engineers, welding foreman/supervisors, shop or field superintendents, and reporting supervisors. This course offers preparation for the Certified Welding Inspector Examination given by the American Welding Society.

WELD 320 Shielded Metal Arc Welding Structural
Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: WELD 300 with a grade of "C" or better; OR at least one year of welding experience.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLW 340.
Transferable: CSU
This course covers employment training for welding technicians. It emphasizes developing manipulative proficiency in the use of Shielded Metal Arc Welding (SMAW) in the horizontal (2F-2G), vertical (3F-3G), and overhead (4F-4G) positions on steel. It also covers filler metal classifications, welding power supplies, and welding safety. Welding test plates in accordance with the requirements to AWS D1.1 Structural Welding Code and AWS D1.5 Bridge Code are also covered.

WELD 322 Shielded Metal Arc Welding (Pipe)
Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: WELD 320 with a grade of "C" or better; OR a minimum of 2 years of welding experience.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGRW 300; OR ESLW 340.
Transferable: CSU
This course covers the applications of shielded metal arc welding used to join low-pressure piping systems that carry water and residential natural gas. Topics include: welding required for high pressure critical piping systems such as steam pipe, fuel transportation pipe lines, boilers, offshore oil-rigs, and other critical heavy-duty piping systems.

WELD 330 Gas Tungsten Arc Welding (Plate)
Units: 3
Hours: 36 hours LEC; 54 hours LAB
Prerequisite: WELD 300 with a grade of "C" or better; OR at least one year of welding experience.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.  
Transferable: CSU

This course covers Gas Tungsten Arc Welding (GTAW) of aluminum, stainless steel, carbon steel, and other metals used in industry. This course content is relevant to code welding in accordance with the American Society of Mechanical Engineers Section 1X (ASME), the Structural welding Code D1.1 (AWS), and the American Petroleum Institute 1104 (API). It also covers filler metal selection, both specifications and classifications, shielding gases, welding power supplies, and welding safety. Certification and procedure qualification to code specifications are also covered.

**WELD 332 Gas Tungsten Arc Welding (Pipe)**

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Prerequisite:** WELD 330 with a grade of "C" or better; OR a minimum of two years of welding experience.  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300; OR ESLW 340.  
**Transferable:** CSU

This course covers the application of low-pressure and high-pressure critical piping systems used in oil, gas, nuclear, and chemical industries. It covers Gas Tungsten Arc Welding (GTAW) of aluminum pipe, stainless steel pipe, and carbon steel pipe. It explores code welding in accordance with the American Society of Mechanical Engineers Section 1X (ASME), Structural Welding Code D1.1 (AWS), and American Petroleum Institute 1104 (API). Certification and procedure qualification to ASME Section 1X, AWS D1.1, API 1104 code specifications are also covered.

**WELD 333 Gas Metal Arc Welding, Steel**

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Prerequisite:** WELD 300 with a grade of "C" or better, or a minimum of one year of welding experience.  
**Transferable:** CSU

This course is the study of welding using the Gas Metal Arc Welding (GMAW) process on carbon steels in accordance with the American Welding Society (AWS), Structural Welding Code D1.1, and Sheet Steel Code D1.3. It covers semi-automatic wire-feed welding with micro wires on steel plates of varying thicknesses. It also covers joint design and all welding positions, welding power supplies, types of metal transfer (spray, globular, pulsed-arc, and short circuit), filler metal selection, both specifications and classifications, shielding gases used for each type of transfer, and welding safety.

**WELD 334 Gas Metal Arc Welding: Ferrous and Non-Ferrous Metals**

**Units:** 2  
**Hours:** 18 hours LEC; 54 hours LAB  
**Prerequisite:** WELD 333 with a grade of "C" or better  
**Advisory:** Eligible for ENGRD 310 or ENGRD 312 and ENGWR 300; or ESLW 340.  
**Transferable:** CSU

This course covers semiautomatic wire feed welding using micro wires on aluminum and stainless steel plates of varying thickness, joint design, gas variations and all welding positions are covered. The emphasis of this course is on code welding aluminum and stainless steels. The content of this course is relevant to code welding in accordance with the American Welding Society (AWS), Structural Aluminum Welding Code D1.2 and Structural Welding Stainless Steel Code D1.6. It also covers welding power supplies, types of metal transfer (spray, globular, pulsed-arc, and short circuit). This course also covers filler metal selection, both specifications and classifications, and shielding gases used for each type of transfer. Welding safety is also covered.

**WELD 335 Flux Core Arc Welding**

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Prerequisite:** WELD 300 with a grade of "C" or better, or a minimum of one year of welding experience.  
**Transferable:** CSU

This course provides training to develop semi-automatic welding skills on carbon steels. Topics include small and large diameter flux cored electrodes, with and without external shielding gas, in all positions on fillet and groove welds. It also provides a thorough technical understanding of the Flux Core Arc Welding process and arc welding safety.

**WELD 342 Symbol Reading, Layout and Fabrication**

**Units:** 3  
**Hours:** 36 hours LEC; 54 hours LAB  
**Prerequisite:** WELD 300  
**Corequisite:** WELD 300  
**Transferable:** CSU

This course covers blueprint and welding symbol interpretation. It includes metal layout, measurement, marking, and layout tools used in construction, and techniques of fabrication and assembly methods. It also covers fundamentals of blueprint reading, including basic lines and views, dimensions, notes and specifications, structural shapes, sections, detail, and assembly.

**WELD 495 Independent Studies in Welding**

**Units:** 1 - 3  
**Prerequisite:** None.  
**Transferable:** CSU

**WELD 499 Experimental Offering in Welding**

**Units:** 0.5 - 4  
**Prerequisite:** None.  
**Transferable:** CSU

This is the experimental courses description.
Work Experience

Cooperative Work Experience (WEXP) is an experiential academic program where students apply what they have learned in the classroom to a work environment.

The program offers students the opportunity to develop technical skills, explore possible career choices, build confidence, network with people in the field, and transition into the world of work.

Work Experience (WEXP) Courses

WEXP 198 Work Experience - General

Units: 0.5 - 3
Hours: 30 - 225 hours LAB
Prerequisite: None.
Enrollment Limitation: Students must be in a paid or unpaid internship, volunteer position, or job with a cooperating site supervisor.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300 OR ESLW 340.
General Education: AA/AS Area III(b)

This course provides students with opportunities to acquire desirable work habits, attitudes and career awareness. It is designed for students interested in exploring various career options. Course content includes understanding the application of education to the workforce, completion of Title 5 required forms which document the student's progress and hours spent at the work site, and developing workplace skills and competencies.

During the semester, the student is required to complete 37.5 hours of related paid work experience, or 30 hours of related unpaid work experience for 0.5 unit. An additional 37.5 or 30 hours of related work experience is required for each additional 0.5 unit. All students are required to attend the first class meeting, a mid-semester meeting, and a final meeting. Additionally, students who have not already successfully completed a Work Experience course will be required to attend weekly orientations while returning participants may meet individually with the instructor as needed. Students may take up to 16 units total across all Work Experience course offerings. This course may be taken up to four times when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.

WEXP 498 Work Experience in (Subject)

Units: 0.5 - 4
Hours: 30 - 300 hours LAB
Prerequisite: None.
Enrollment Limitation: Students must be in a paid or unpaid internship, volunteer position, or job related to career goals with a cooperating site supervisor.
Advisory: Eligible for ENGRD 310 or ENGRD 312 AND ENGWR 300 OR ESLW 340.
General Education: AA/AS Area III(b)

This course provides students with opportunities to develop marketable skills in preparation for employment in their major field of study or advancement within their career. It is designed for students interested in work experience and/or internships in associate degree level or certificate occupational programs. Course content includes understanding the application of education to the workforce, completion of Title 5 required forms which document the student's progress and hours spent at the work site, and developing workplace skills and competencies.

During the semester, the student is required to complete 37.5 hours of related paid work experience, or 30 hours of related unpaid work experience for 0.5 unit. An additional 37.5 or 30 hours of related work experience is required for each additional 0.5 unit. All students are required to attend the first class meeting, a mid-semester meeting, and a final meeting. Additionally, students who have not already successfully completed a Work Experience course will be required to attend weekly orientations while returning participants may meet individually with the instructor as needed. Students may take up to 16 units total across all Work Experience course offerings. This course may be taken up to four times when there are new or expanded learning objectives. Only one Work Experience course may be taken per semester.
World Languages

American River College offers courses in World Languages designed to help students develop a command of a variety of languages necessary to pursue career, transfer and degree goals.

Degrees Offered

A.A.-T. in Spanish
A.A. in Language Studies

Dean (Interim) Corinna Arrieta Katzorke
Department Chairs Inés Garcia
Phone (916) 484-8653

Associate Degrees for Transfer

A.A.-T. in Spanish

This degree provides students with a major that fulfills the general requirements of the California State University for transfer. Students with this degree will receive priority admission with junior status to the California State University system. The Associate in Arts degree in Spanish for Transfer (AA-T) may be obtained by completion of 60 transferable, semester units with a minimum 2.0 GPA, including (a) the major or area of emphasis described in the Required Program, and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education Breadth Requirements.

The Associate in Arts in Spanish for Transfer (AA-T) degree may be obtained by completion of 60 transferable, semester units with a minimum 2.0 GPA, including (a) the major or area of emphasis described in the Required Program, and (b) either the Intersegmental General Education Transfer Curriculum (IGETC) or the California State University General Education-Breadth Requirements.

Student Learning Outcomes

Upon completion of this program, the student will be able to:

• demonstrate proficiency in the five skills as mandated by the competency guidelines of the American Council of the Teaching of Foreign Languages (ACTFL): comprehension, speaking, reading, writing, and understanding the people and culture of the Spanish-speaking countries.

• utilize correct grammatical structures of standard Spanish.

• read Spanish proficiently as found, for example, in Spanish language newspapers, magazines, short stories, essays, and selections of poetry written by Spanish, Spanish-American, and Chicano authors.

• demonstrate appropriate writing and composition skills in Spanish.

• critique and discuss Latin American and Peninsular literature in a historical context.

• analyze and discuss major historical events and periods in the history of Spanish-speaking countries.

• compare and contrast aspects of the Spanish-speaking culture that are different or similar to one's own culture.

• compare and contrast aspects of Spanish to another modern language.

Career Information

This degree is designed to facilitate students' successful transfer to four-year colleges that prepare them for a variety of career opportunities, such as airlines/travel, banking, bilingual education, bilingual telecommunications, emergency services, foreign service, Foreign Language Teacher, imports and exports, international business, intelligence/military services, IRS/State Franchise Tax Board, law enforcement/correctional officer, social services, translating/interpreting, and tourism. Some careers may require additional training specific to the trade.

Associate Degrees

A.A. in Language Studies

This degree provides an area of emphasis in communication skills in both English and foreign languages. It is intended for students wishing to develop communication skills for the workplace. Students who work closely with their counselors can use this area of emphasis to prepare for majoring at a four-year college in world languages as well as any other majors which require proficiency in one or more world languages.

1These 12 units must be completed in a single language.

The Language Studies Associate in Arts (A.A.) degree may be obtained by completion of the required program, plus general education requirements, plus sufficient electives to meet a 60-unit total. See ARC graduation requirements.

**Student Learning Outcomes**

Upon completion of this program, the student will be able to:

- write expository and argumentative papers.
- synthesize ideas and develop conclusions.
- examine the connection between culture and communication.
- engage in conversation and written correspondence in a language other than English.

**German (GERM) Courses**

**GERM 401 Elementary German I**

| Units | Hours: 72 hours LEC | Prerequisite: None. | Transferable: CSU; UC | General Education: AA/AS Area I; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B; IGETC Area 6 |

This course is an introduction to the language of the German-speaking people. It includes the fundamentals of German pronunciation and grammar, as well as the development of listening, reading, and writing with emphasis on the communicative skills.

**GERM 402 Elementary German II**

| Units | Hours: 72 hours LEC | Prerequisite: GERM 401 with a grade of “C” or better or two years of high school German. | Transferable: CSU; UC |

This course continues to develop proficiency in speaking, reading, and writing German. It also explores the German culture and affords opportunities to make cross-linguistic and cross-cultural comparisons.

**GERM 411 Intermediate German**

| Units | Hours: 72 hours LEC | Prerequisite: GERM 402 with a grade of “C” or better or three years of high school German. | Transferable: CSU; UC | General Education: AA/AS Area I; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B; IGETC Area 6 |

This course continues to develop proficiency in speaking, reading, and writing German. It reviews German grammar and offers readings of varied texts, which further explore study of historical and cultural background of German-speaking countries and afford opportunities to make cross-linguistic and cross-cultural comparisons.

**GERM 412 Intermediate German**

| Units | Hours: 72 hours LEC | Prerequisite: GERM 411 with a grade of “C” or better or four years of high school German. | Transferable: CSU; UC | General Education: AA/AS Area I; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B; IGETC Area 6 |

This intermediate-level German course provides continued development of the language and cultural awareness of the German-speaking world. It includes further development of listening, speaking, reading, and writing skills in German with emphasis on communicative skills.

**GERM 495 Independent Studies in German**

| Units | Hours: 54 hours LEC | Prerequisite: None. | Transferable: CSU |

This is the experimental courses description.

**GERM 499 Experimental Offering in German**

| Units | Hours: 0.5 - 4 | Prerequisite: None. | Transferable: CSU |

This is the experimental courses description.

**Italian (ITAL) Courses**

**ITAL 351 Conversational Italian, Elementary I**

| Units | Hours: 54 hours LEC | Prerequisite: None. | Transferable: CSU |

This course is designed for students at the first-semester level in Italian. Conversations and discussions, both controlled and spontaneous, are used to develop basic conversational skills in Italian. Emphasis includes oral proficiency and development of Italian cultural awareness.
ITAL 352 Conversational Italian, Elementary II

Units: 3
Hours: 54 hours LEC
Prerequisite: ITAL 351 with a grade of "C" or better or two years of high school Italian.
Transferable: CSU

This course is designed for students at the second-semester level in Italian. It continues the development of oral-aural skills in Italian through conversations and discussions, both controlled and spontaneous. Emphasis includes oral proficiency and development of Italian cultural awareness.

ITAL 401 Elementary Italian

Units: 4
Hours: 72 hours LEC
Prerequisite: None.
Transferable: CSU; UC
General Education: AA/AS Area I; CSU Area C2; IGETC Area 6

This course is an introduction to the Italian language and culture of Italy. It includes the development of listening, speaking, reading, and writing Italian with emphasis on the communicative skills, as well as the fundamentals of Italian pronunciation and grammar.

ITAL 402 Elementary Italian

Units: 4
Hours: 72 hours LEC
Prerequisite: ITAL 401 with a grade of "C" or better; or 2 years of high school Italian.
Transferable: CSU; UC
General Education: AA/AS Area I; CSU Area C2; IGETC Area 6

This course provides continued development of the language and culture of Italy. It includes further development of listening, speaking, reading, and writing Italian and emphasizes communicative skills, as well as the fundamentals of Italian pronunciation and grammar.

ITAL 411 Intermediate Italian

Units: 4
Hours: 72 hours LEC
Prerequisite: ITAL 402 with a grade of "C" or better; or 3 years of high school Italian.
Transferable: CSU; UC
General Education: AA/AS Area I; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B; IGETC Area 6

This intermediate-level Italian course provides continued development of the language and culture of Italy. It includes further development of listening, speaking, reading, and writing Italian with emphasis on communicative skills. Additionally, it covers more complex grammar topics and provides further study of the cultural and historical background of Italy.

ITAL 412 Intermediate Italian

Units: 4
Hours: 72 hours LEC
Prerequisite: ITAL 411 with a grade of "C" or better; or 4 years of high school Italian.
Transferable: CSU; UC
General Education: AA/AS Area I; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B; IGETC Area 6

This intermediate-level Italian course provides continued development of the language and culture of Italy. It includes further development of listening, speaking, reading and writing skills in Italian with emphasis on communicative skills. Additionally, it reviews and provides further study and complex grammar topics of the cultural and historical background of Italy as well as its major literary types and works.

ITAL 495 Independent Studies in Italian

**Russian (RUSS) Courses**

**RUSS 401 Elementary Russian**

**Units:** 4  
**Hours:** 72 hours LEC  
**Prerequisite:** None.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area I; CSU Area C2; Cal-GETC Area 3B

This course is an introduction to the Russian language and culture of Russia. It includes the development of listening, speaking, reading, and writing skills in Russian with emphasis on the communicative skills, as well as the fundamentals of Russian pronunciation and grammar.

**RUSS 402 Elementary Russian**

**Units:** 4  
**Hours:** 72 hours LEC  
**Prerequisite:** RUSS 401 with a grade of "C" or better OR two years of high school Russian.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area I; CSU Area C2; Cal-GETC Area 3B

This course provides continued development of the Russian language and culture. It includes further development of listening, speaking, reading, and writing skills in Russian with emphasis on communicative skills, as well as the fundamentals of Russian pronunciation and grammar. Cross-linguistic and cross-cultural comparisons are emphasized.

**RUSS 411 Intermediate Russian**

**Units:** 4  
**Hours:** 72 hours LEC  
**Prerequisite:** RUSS 402 with a grade of "C" or better, or three years of high school Russian.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area I; CSU Area C2; Cal-GETC Area 3B

This intermediate-level Russian course provides continued development of the language and culture of the Russian-speaking world. It includes further development of listening, speaking, reading, and writing skills in Russian with emphasis on communicative skills.

**RUSS 412 Intermediate Russian**

**Units:** 4  
**Hours:** 72 hours LEC  
**Prerequisite:** RUSS 411 with a grade of "C" or better, or placement through the assessment process.; RUSS 411 with a grade of "C" or better or 4 years of high school Russian  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area I; CSU Area C2; Cal-GETC Area 3B

This intermediate-level Russian course provides continued development of the language and cultural awareness of the Russian-speaking world. It includes further development of listening, speaking, reading, and writing skills in Russian with emphasis on communicative skills.

**RUSS 413 Russian for Heritage Speakers I**

**Units:** 4  
**Hours:** 72 hours LEC  
**Prerequisite:** RUSS 411 or Russian heritage speaker proficiency as assessed by an oral interview with the instructor in Russian.  
**Transferable:** CSU; UC

This course offers the fundamentals of spoken and written Russian for heritage speakers with different levels of Russian who want to gain literacy and improve their Russian skills. It covers the structure of the language, oral communication, spelling, and fundamentals of grammar and composition. In addition, the course introduces the student to the geography and culture of the Russian-speaking world.

**RUSS 415 Russian for Heritage Speakers II**

**Units:** 4  
**Hours:** 72 hours LEC  
**Prerequisite:** RUSS 413 with a grade of "C" or better, or placement through the assessment process.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area I; CSU Area C2; Cal-GETC Area 3B

This course is designed as a continuation of Russian 413. It offers the fundamentals of spoken and written contemporary Russian for the native speakers of Russian. It covers more advanced structures of the language, oral communication, and composition. This course focuses primarily on major literary movements and developments in the 20th century Russian literature and cinema. In addition, the course reviews problem areas of Russian grammar and introduces some advanced topics in grammar and syntax. This course is conducted in Russian.

**RUSS 495 Independent Studies in Russian**

**Units:** 1 - 3  
**Prerequisite:** None.  
**Transferable:** CSU

**RUSS 499 Experimental Offering in Russian**

**Units:** 0.5 - 4  
**Prerequisite:** None.  
**Transferable:** CSU

This is the experimental courses description.

**Spanish (SPAN) Courses**

**SPAN 131 Elementary Spanish Lab I**

**Units:** 0.5 - 1  
**Hours:** 27 - 54 hours LAB  
**Prerequisite:** None.  
**Advisory:** Concurrent enrollment in SPAN 401.

This laboratory course enables Spanish language learners to develop, expand, and reinforce multiple Spanish language skills while working independently and/or in small groups. Coursework includes integrated study topics related to vocabulary, grammar, reading, writing, listening, and oral skills covered in first semester Spanish courses. Students may register until the sixth week of the semester. This course may be taken up to 2 times, for a total of 1.0 unit, using different topics. Pass/No Pass only.

**SPAN 132 Elementary Spanish Lab II**

**Units:** 0.5 - 1  
**Hours:** 27 - 54 hours LAB  
**Prerequisite:** None.  
**Advisory:** SPAN 131, or concurrent enrollment in SPAN 402.

This laboratory course enables Spanish language learners to continue developing, expanding, and reinforcing multiple Spanish language skills.
while working independently and/or in small groups. Coursework includes integrated study topics related to vocabulary, grammar, reading, writing, listening, and oral skills covered in second semester Spanish courses. Students may register until the sixth week of the semester. This course may be taken up to two times for a total of 1.0 unit, using different topics. Pass/No Pass only.

SPAN 133 Intermediate Spanish Lab I

Units: 0.5 - 1
Hours: 27 - 54 hours LAB
Prerequisite: None.
Advisory: SPAN 132 or concurrent enrollment in SPAN 411.

This laboratory course enables Spanish learners to develop, expand, and reinforce multiple Spanish language skills while working independently and/or in small groups. Coursework includes integrated study topics related to vocabulary, grammar, reading, writing, listening, and oral skills covered in second semester Spanish courses. Students may register until the sixth week of the semester. This course may be taken up to two times, for a total of 1.0 unit, using different topics. Pass/No Pass only.

SPAN 299 Experimental Offering in Spanish

Units: 0.5 - 4
Prerequisite: None.

This is the experimental courses description.

SPAN 351 Conversational Spanish, Elementary

Units: 3
Hours: 54 hours LEC
Prerequisite: SPAN 351 OR SPAN 401 with a grade of "C" or better or two years of high school Spanish.
Transferable: CSU

This course is for students at the second-semester level in Spanish. It includes the development of listening, speaking, reading, and writing Spanish with emphasis on communicative skills. Class discussions and group interaction, both controlled and spontaneous, are used to develop basic conversational skills in Spanish. Emphasis includes oral proficiency and development of Hispanic cultural awareness.

SPAN 352 Conversational Spanish, Elementary

Units: 3
Hours: 54 hours LEC
Prerequisite: SPAN 351 OR SPAN 401 with a grade of "C" or better or two years of high school Spanish.
Transferable: CSU

This course is for students at the second-semester level in Spanish. It includes the development of listening, speaking, reading, and writing Spanish with emphasis on communicative skills. Class discussions and group interaction, both controlled and spontaneous, are used to develop basic conversational skills in Spanish. Emphasis includes oral proficiency and development of Hispanic cultural awareness.

SPAN 356 Conversational Spanish, Intermediate

Units: 3
Hours: 54 hours LEC
Prerequisite: SPAN 352 OR SPAN 402 with a grade of "C" or better, or three years of high school Spanish.
Transferable: CSU

This course is designed for students at the third-semester level in Spanish. It includes the development of listening, speaking, reading, and writing Spanish with emphasis on communicative skills. Discussions and group interaction, both controlled and spontaneous, are used to develop basic conversational skills in Spanish. Emphasis includes oral proficiency and development of Hispanic cultural awareness.

SPAN 362 Conversational Spanish, Intermediate

Units: 3
Hours: 54 hours LEC
Prerequisite: SPAN 361 OR Spanish 411 with a grade of "C" or better or 4 years high school Spanish
Transferable: CSU; UC

This course covers language and culture of the Spanish-speaking world. It continues the development of listening, speaking, reading, and writing Spanish with emphasis on communicative skills. Discussions and group interaction, both controlled and spontaneous, are used to develop conversational skills in Spanish.

SPAN 401 Elementary Spanish

Units: 4
Hours: 72 hours LEC
Prerequisite: None.
Transferable: CSU; UC
General Education: AA/AS Area I; CSU Area C2; IGETC Area 6
C-ID: C-ID SPAN 100

This course introduces the language and culture of the Spanish-speaking world. It includes the development of listening, speaking, reading, and writing Spanish with emphasis on the communicative skills, as well as the fundamentals of Spanish pronunciation and grammar.

SPAN 402 Intermediate Spanish

Units: 4
Hours: 72 hours LEC
Prerequisite: SPAN 401 with a grade of "C" or better or two years of high school Spanish.
Transferable: CSU; UC
General Education: AA/AS Area I; CSU Area C2; IGETC Area 3B
(effective Fall 2025); IGETC Area 6;
C-ID: C-ID SPAN 110

This course provides continued development of the language and explores history and culture of the Spanish-speaking world. It includes further development of listening, speaking, reading, and writing Spanish with emphasis on communicative skills, as well as the fundamentals of Spanish pronunciation and grammar. Language acquisition is approached through a historical and cultural perspective.

SPAN 411 Intermediate Spanish

Units: 4
Hours: 72 hours LEC
Prerequisite: SPAN 402 with a grade of "C" or better OR three years of high school Spanish.
Transferable: CSU; UC
General Education: AA/AS Area I; CSU Area C2; Cal-GETC Area 3B
(effective Fall 2025); IGETC Area 3B; IGETC Area 6
C-ID: C-ID SPAN 200

This intermediate-level Spanish course provides continued development of the language and culture of the Spanish-speaking world. It includes further development of listening, speaking, reading, and writing skills in Spanish with emphasis on communicative skills. Additionally, it covers more complex grammar topics and provides further study of the cultural and historical background of Spanish-speaking countries.

SPAN 412 Intermediate Spanish

Units: 4
Hours: 72 hours LEC
Prerequisite: SPAN 411 with a grade of "C" or better or 4 years of high school Spanish
Transferable: CSU; UC
**General Education:** AA/AS Area I; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B; IGETC Area 6
**C-ID:** C-ID SPAN 210

This intermediate-level Spanish course provides continued development of the language and culture of the Spanish-speaking world. It includes further development of listening, speaking, reading, and writing skills in Spanish with emphasis on communicative skills. Additionally, it reviews and provides further study and complex grammar topics of the cultural and historical background of Spanish-speaking countries as well as their major literary types and works.

**SPAN 413 Spanish for Native Speakers I**

**Units:** 4  
**Hours:** 72 hours LEC  
**Prerequisite:** Spanish native speaker proficiency or the equivalent intermediate level as assessed by the Foreign Language Department Assessment Process at American River College.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area I; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B; IGETC Area 6  
**C-ID:** C-ID SPAN 220

This course offers the fundamentals of spoken and written Spanish for the native speaker of Spanish. It covers the structure of the language, oral communication, fundamentals of grammar and composition. It focuses primarily on tenses in the indicative mode. This course also covers diacritical marks, like the accent mark, and their uses. In addition, it introduces the student to the geography and culture of the Spanish-speaking world. This course is conducted entirely in Spanish.

**SPAN 415 Spanish for Native Speakers II**

**Units:** 4  
**Hours:** 72 hours LEC  
**Prerequisite:** SPAN 413 with a grade of “C” or better, or placement through the assessment process.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area I; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B; IGETC Area 6  
**C-ID:** C-ID SPAN 230

This course is a continuation of Spanish 413. It offers the fundamentals of spoken and written Spanish for the native speaker of Spanish. It covers the structure of the language, oral communication, fundamentals of grammar and composition. Focus is placed primarily on the conditional and subjunctive forms, the future tense, and the compound tenses. The course also covers diacritical marks, like the accent mark, and their uses. In addition, the course introduces the student to the geography and culture of the Spanish speaking world. This course is conducted in Spanish.

**SPAN 427 Introduction to Spanish American Literature**

**Units:** 3  
**Hours:** 54 hours LEC  
**Prerequisite:** SPAN 411 with a grade of “C” or better, or placement through the assessment process.  
**Transferable:** CSU; UC  
**General Education:** AA/AS Area I; CSU Area C2; Cal-GETC Area 3B (effective Fall 2025); IGETC Area 3B

This course introduces students to Spanish and Latin American Literature. It covers the analysis of a variety of literary formats that include short stories, poems, plays, and novel excerpts from the established literary canon. Films are integrated to develop auditory skills and to engage students in discussions. It emphasizes critical thinking, interpretation, speaking, and writing skills, and is conducted entirely in Spanish.

**SPAN 495 Independent Studies in Spanish**

**Units:** 1 - 3  
**Prerequisite:** None.  
**Transferable:** CSU

**SPAN 499 Experimental Offering in Spanish**

**Units:** 0.5 - 4  
**Prerequisite:** None.  
**Transferable:** CSU

This is the experimental courses description.

Chemistry  
B.A., U.C. Berkeley  
Ph.D., U.C. Davis  

Farahmandnia, Saideh (2020)  
Biology  
B.A., UC Davis  
M.D., Ross School of Medicine  

Hanstad, Janet (2018)  
Biology  
B.A., University of Oregon  
M.S., Utah State University  
M.B.A., Western Governors University  
Ph.D., UC Davis
Hernandez, Cecilia (1998)  
Physics/Physical Science  
B.S., M.S., University of Puerto Rico

Holmes, Michael (2018)  
Biology  
B.S., Cal Poly, SLO  
M.S., University of Oregon  
Ph.D., UC Berkeley

Hong, Tamilyn W. (1998)  
Chemistry  
B.S., University of Hawaii  
M.S.

Howard, Hugh H. (2005)  
GIS/Geography/Earth Science  
B.A., M.A., San Francisco State University  
M.S., Stanford University  
Ph.D., University of Kansas

Jaecks, Glenn (2007)  
Geology  
B.S., University of Wisconsin  
M.S., University of Colorado  
Ph.D., UC Davis

Koskelo, Ilkka (2018)  
Physics  
M.S., UC Santa Barbara

Geology  
B.S., M.A., East Tennessee State University

Loucks, Stuart (2000)  
Physics  
B.S., M.S., UCLA

Maddox, Michael W. (2006)  
Chemistry  
B.S., Hons, Bath University, UK  
Ph.D., Oxford University, UK

Martinez, Marlene (2004)  
Biology  
B.S., U.C. Davis  
Ph.D., UC Berkeley

Meador, Dianne (2003)  
Chemistry  
B.S., University of Wisconsin  
Ph.D., UC Davis

Meadows, Chris (2009)  
Chemistry  
B.A., University of South Florida  
Ph.D., UC Davis

Moore, Justin A. (2005)  
Biology  
B.S., CSU Fresno  
M.S., M.A., UC Davis

Natural Resources/Science  
B.A., UC Santa Cruz  
M.S., UC Berkeley  
Ph.D., UC Davis

Niedzinski, Edmund (2008)  
Chemistry  
B.S., University of Scranton  
Ph.D., UC Davis

Payne, Michael (2014)  
Chemistry  
B.A., CSU Sacramento  
M.S., CSU Sacramento

Ramones, Susan (2013)  
Biology  
B.S., UC Davis  
M.S., CSU Sacramento

River, Lynn M. (2001)  
Biology/Health Science  
A.A., Mt. San Antonio College  
B.S., Brigham Young University  
M.A., CSU Chico  
Ph.D., Texas Woman’s University

Romo, Angela (2022)  
Chemistry  
B.S., Southeast Missouri State University  
Ph.D., Johns Hopkins University

Roy, Deboleena (2001)  
Chemistry  
B.S., M.S., Jadavpur University, India  
Ph.D., Texas Tech University

Shahrok, Renee (1997)  
Biology  
B.S., M.S., UC Davis

Physics  
B.S., Willamette University  
Ph.D., UC Riverside

Slutsky, Daniel (2008)  
Biology  
M.A., CSU Sacramento  
B.S., Ph.D., UC Davis

Smith, Lori (2000)  
Biology  
B.S., Ph.D., UC Davis

Stewart, Daniel (2008)  
Chemistry  
A.A & A.S., Santa Rosa Junior College  
B.S., Ph.D., UC Davis

Sweet, Michael (1999)  
Biology  
B.S., University of Iowa  
M.A., UC Santa Cruz

Telleen, Adam (2018)  
Biology/Bio-Technology  
B.S., UC Davis  
Ph.D., UC Davis

Thomsen, Charles E. (1999)  
Geography  
B.A., UCLA  
M.A., CSU Chico

Topinka, John (2008)  
Biology  
B.A., Carleton College  
Ph.D., UC Davis

Torrano, Liz (2001)  
Biology  
A.A., San Joaquin Delta  
B.S., UC Davis  
M.A., San Francisco State University

Van Den Bogert, Kevin (2018)  
Engineering  
M.S., UC Los Angeles

Volz, Christopher (2019)  
Physics/Astronomy  
M.S., Indiana University, Bloomington

Weissbart, Brian (2005)  
Chemistry  
B.S., UC Riverside  
Ph.D., UC Davis
**Wolfe, David E.** (2006)  
Biology  
B.A., UC Santa Barbara  
M.S., Arizona State University

**Won, Dean K.** (2005)  
Biology  
A.A., San Joaquin Delta College  
B.S., UC Davis  
M. Ed., University of the Pacific  
Ph.D., UCLA

**Woolsey, Marcella J.** (1998)  
Biology/Anatomy/Physiology  
B.A., Southern College, Tennessee  
M.A., Loma Linda University  
Ph.D., UC Davis

**Young, Shih-Wen Michael** (2003)  
Physics/Physical Science  
B.S., National Taiwan Normal University  
Ph.D., Kansas State University

**Zarate, Victor H.** (2005)  
Physics  
B.S., M.S., UC Berkeley

**Zarzana, Linda** (1989)  
Chemistry  
B.S., UC Davis  
M.S., CSU Sacramento

**Zhao, Yu** (Joy) (2007)  
Biology  
B.S., Capital Normal University, Beijing  
M.S., California State Polytechnic University  
Ph.D., Loma Linda University

## Technical Education

**Ahmadi, Al** (2008)  
Electronics Technology  
B.S., University of Oklahoma  
M.S., Golden Gate University

**Andronas, Jennifer** (2014)  
Automotive Technology  
A.S., Sierra College  
B.S., CSU Sacramento

**Beaushaw, Frank** (2015)  
Diesel Technology  
A.S., American River College

**Evangelisti, Fred** (1998)  
Electronics Technology  
A.A., American River College  
B.A., CSU Sacramento  
M.A.V.E., Consortium of CSU  
Ed.D., CSU, Sacramento

**French, Benjamin R.** (2005)  
Automotive Technology  
A.S., Sierra Community College  
B.V.E., CSU Sacramento

**George, Gary T.** (2002)  
Electronics Technology  
A.A., Golden West College  
A.S., American River College  
B.S., Cal Poly, Pomona

Automotive Technology  
A.S., Sierra College  
B.S., CSU Sacramento

**Jones, Stanley** (2019)  
Horticulture  
M.S., Texas A&M University

**Messier, Christopher** (2015)  
Welding Technology  
Certification, Cosumnes River College

**Meyer, Jordan** (2015)  
Electronics Technology  
B.S., UC San Diego  
M.S., UC San Diego

**Moore, Christopher** (2012)  
Automotive Technology/Apprenticeship  
A.S., American River College

**Reese, Mark Alan** (2003)  
Welding Technology  
A.A., American River College  
B.V.E., CSU Sacramento  
IMET, CSU Sacramento

**Schuster, Randy O.** (2006)  
Design Technology  
B.S.M.E., UC Davis

**Sichi, Cielo** (2016)  
Horticulture  
B.S., California State Polytechnic University

**Weckman, Craig** (2008)  
Diesel/Clean Diesel Technology & Automotive Collision Technology  
B.V.E., CSU Sacramento  
A.A., American River College  
B.S., CSU Sacramento  
M.S., CSU East Bay

## Workforce Development

**Dillon, Vivian** (2013)  
Work Experience & Internships  
B.A., UC Santa Barbara  
M.S., CSU Northridge

**McKnight-Flentroy, Dana** (2017)  
Foster & Kinship Care Education  
M.S., CSU Sacramento
